- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events

On June 16, 2015, Acorda Therapeutics, Inc.(the “Company”) issued a press release announcing that it has presented data from a Phase 2b clinical trial of CVT-301, an inhaled levodopa (L-dopa) under development for the episodic treatment of OFF episodes associated with Parkinson’s disease (PD). OFF episodes are characterized by a re-emergence of PD motor symptoms, such as impaired ability to move, muscle stiffness and tremor. The trial showed that patients experiencing an OFF episode, treated with CVT-301, showed significantly greater improvements in motor function than patients treated with inhaled placebo; the difference in improvement was already apparent 10 minutes after dosing and was durable for at least an hour, the longest time point at which patients were measured. These data were presented at the 19th International Congress of Parkinson's Disease and Movement Disorders (MDS) in San Diego, CA. A copy of the press release is attached as Exhibit 99.1 to this Current Report on Form 8-K, and incorporated by reference into this Item.

Item 9.01 Financial Statements and Exhibits
