PART I - FINANCIAL INFORMATION

ITEM 1. CONSOLIDATED FINANCIAL STATEMENTS.

The reviewed consolidated financial statements of the Company, for the period covered by this report, are included elsewhere in this report, beginning at page F/S 1.

The reviewed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for the interim financial information with the instructions to Form 10-QSB and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal accruals) considered necessary for a fair presentation have been included. Operating results for the nine-month period ended July 31, 2003 are not necessarily indicative of the results that may be expected for the full year ending October 31, 2003.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-KSB for the year ended October 31, 2002 incorporated by reference herein.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

RESULTS OF OPERATIONS FOR THE PERIOD ENDED JULY 31, 2003.

Nine months ended July 31, 2003 compared to the nine months ended July 31, 2002:

During the nine months ended July 31, 2003, the Company realized other income of \$287,846 from the sale of zinc carbonate ore from the Company's San Salvadore mine, in accordance with a contract with Cameron Chemicals, Inc., Norfolk, Virginia. Costs associated

Edgar Filing: METALLINE MINING CO - Form 10QSB

with the Sale of the ore totaled \$248,473.36 for the nine-month period ended July 31, 2003. There were ore sales of \$73,894 in the nine-month period ended July 31, 2002. General and administrative expenses increased to \$849,472 for the nine-month period ended July 31, 2003 as compared to \$442,710 for the nine-month period ended July 31, 2002. The increase is primarily due to an increase in payroll expenses of \$264,000, an increase in professional services of \$101,000, and a \$32,000 increase in expenses of maintaining the property. For the nine months ended July 31, 2003, the Company experienced a loss of \$770,335, or \$0.07 per share, compared to a loss of \$519,970, or \$0.05 per share, during the comparable period in the previous year.

LIQUIDITY AND CAPITAL RESOURCES.

Metalline Mining Company (the "Company") is an exploration stage enterprise formed under the laws of the State of Nevada, on August 20, 1993, to engage in the business of mining. The Company has no operating history and is subject to all the risks inherent in a new business enterprise. The likelihood of success of the Company must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with a new business, and the competitive and regulatory environment in which the Company will operate.

From inception until May 1996, the Company was essentially dormant having as its only asset unpatented mining claims located in the State of Montana ("Kadex Property"). Since May 1996, the focus of the Company has been the Sierra Mojada Project in Mexico, and the Company has dropped the Kadex Property claims. The Company is currently involved in exploration and evaluation of its Mexican Property under agreement with Minas Penoles.

Page 1

The Company has insufficient funds to carry on operations during the next twelve months. In order to maintain operations, the Company will have to raise additional capital through loans or through the sale of securities. If the Company is unable to raise additional capital, it may have to cease operations. The Company's plan of operation, subject to maintaining sufficient funds, calls for continued mining of zinc carbonate from the white zinc manto for delivery to Metalline's fertilizer clients, and drilling and sampling of the red zinc manto to define an ore reserve. The red zinc manto work is being conducted and funded by Penoles.

Due to the Company's lack of revenues, the Company's independent certified public accountants included a paragraph in the Company's 2002 financial statements relative to a going concern uncertainty. The Company financed its obligations during the 2001-2002 fiscal year by its sale of 212,667 shares at an average price of \$1.62 per share. During the current period, the Company has realized \$210,500 from the sale of 107,000 shares at prices ranging from \$1.50 to \$2.00 per share.

The Company is engaged in the business of mining. The Company currently owns one mining property located in Mexico known as the Sierra Mojada Property. The Company conducts its operations in Mexico through its wholly owned subsidiary corporation, Minera Metalin S.A. de C.V. ("Minera Metalin").

The Sierra Mojada Property is comprised of eight concessions totaling 7,060 hectares (17,446 acres). The concessions were

Edgar Filing: METALLINE MINING CO - Form 10QSB

acquired by purchase agreements from the titled owners. The Company owns title to 100% of the concessions.

The Sierra Mojada Mining District is located in the west central part of the state of Coahuila, Mexico, near the Coahuila-Chihuahua state border some 200 kilometers south of the Big Bend of the Rio Grande River. The principal mining area extends for some 5 kilometers in an east-west direction along the base of the precipitous, 1,000 meter high, Sierra Mojada Range.

Vehicle access from Torreon is by 250 kilometers on paved road to Sierra Mojada. There is a well maintained, 1200 meter, gravel airstrip. The District has high voltage electric power and is served by a rail line, which was constructed from Escalon to the district in 1891 and later connected to Monclova.

The initial discovery of silver ore in the Sierra Mojada Property was made in 1879. Over the next 12 years, numerous small mines developed along an oxidized silver lead ore body known as the "lead manto" (a bed, layer or strata). The lead manto was mined continuously for 3 kilometers and discontinuously for another 2 kilometers. Ore was selectively mined and hauled by wagon to Escalon on the railroad main line from El Paso to Mexico City; from there it went to smelters in Mexico and the United States.

In September of 1891 the Mexican Northern Railroad completed its spur line from Escalon to the district. Rail access stimulated development and the period from 1891 to the late 1920's was the peak of productivity of the district. The main lead manto was nearly mined out by 1905, the same year that the discovery of the first silver-copper ore body was made. Additional discoveries of silver, silver-copper, and silver-copper-zinc-lead ores provided production through the 1930's. Between 1922 and 1931 additional lead manto silver-lead ore was discovered and mined to the southwest for some 1,400 meters under the Sierra Mojada range. This manto was eventually mined for more than 2 kilometers.

By the mid 1920's many of the mines were under control of Penoles Corporations ("Penoles") and ASARCO Incorporated ("ASARCO"). ASARCO ceased mining in the district in the late 1930's. Both companies still owned properties during the 1940's and Penoles mined until the late 1950's when the Mineros Nortenos Cooperative acquired the Penoles properties. The Mineros Nortenos Cooperative

Page 2

("Mineros Nortenos") has operated the San Salvador, Encantada and Fronteriza mines since 1957 and direct shipped high-grade oxide zinc and lead-silver ore to smelters in Mexico.

The lead manto produced 3 to 3.5 million tons prior to 1905 with another 1.5 million tons of similar ore coming from other ore bodies to the west and to the southwest.

Mineros Nortenos has mined about 600,000 tons of predominantly oxide zinc ore with grades of 20 to 50% zinc. Some of this ore was oxide silver-lead and silver, copper, zinc and lead sulfide at grades of 1 to 4 kilogram silver per ton, 1 to 5% copper, 10 to 30% zinc and 30 to 70% lead. Production records from 1978 to 1981 for the San Salvador mine average 33.5% zinc.

The Sierra Mojada Property has produced in excess of 10 million tons of high-grade ore that graded in excess of 30% lead, 20% zinc, 1% copper and 1 kg (31 ounces) silver per ton that was

Edgar Filing: METALLINE MINING CO - Form 10QSB

shipped directly to the smelter. The district has never had a mill to concentrate ore. All of the mining was done selectively for ore of sufficient grade to direct ship; mill grade ore was left unmined. More than 50 kilometers of underground workings are spread through the 5 kilometer by 2 kilometer area from which more than 45 mines have produced ore. The deepest workings have ore grade mineralization and provide some of the best targets for reserve development. In spite of the amount of historic work, when a map of all of the historic workings is viewed there is much more unexplored area in the 5 by 2 kilometer area than has been explored and the vertical extent greater than 100 meters is totally unexplored.

The sediments are predominantly carbonate with some sandstone and shale and the attitudes are near horizontal. The mines are dry and the rocks are competent, there is very little unstable ground and the ore thickness is amenable to high volume mechanized mining methods. Sierra Mojada has ideal mining conditions and grades for low cost production.

Based upon the foregoing, the Company is of the opinion that the magnitude of the Sierra Mojada mineral system and its exploration potential is capable of providing new reserves for many more years of mining. However, there is no assurance as to the quantity or quality of the undeveloped reserves.

There is potential for long-term reserve expansion within the known extent of the mineral systems. There is potential to discover ore deposits in unexplored portions of the land position and at depth in unexplored stratigraphy. There is however, no assurance that the Company will have the monetary resources to continue to explore for, develop, or retrieve any of the minerals located in the Sierra Mojada Property.

In October, 1999 Minera Metalin signed a Joint Venture Letter Agreement with Minera North S. de R.L. de C.V. a wholly owned subsidiary of North Limited of Melbourne Australia, a major international mining company. The agreement allowed North to acquire a 60% participating interest in Sierra Mojada by exploring and completing a feasibility study over a "Earn In Period" of not more than 5 years.

In August, 2000 Rio Tinto Ltd. purchased North Limited for its iron ore holding and has subsequently terminated the agreement with Minera Metalin.

Penoles Agreement

On the 15th of November, 2001 Metalline Mining Company and its Mexican Subsidiary Minera Metalin, S.A. de C.V. signed an Agreement with Minas Penoles, S.A. de C.V. and Compania Minera La Parrena, S.A. de C.V. The Agreement allows Minas Penoles to earn a 60% interest in the Sierra Mojada project by exploring and completing a feasibility study over an "Earn in Period" of not more than 5 years.

Page 3

The study is to be of sufficient detail and quality to be used to secure debt financing for the development and operation of the project. Minas Penoles is committed to complete US \$1,000,000 (one million US Dollars) of Qualified Expenditures on the Property as may be recommended by the Technical Committee during the first year as of the date of signing the Agreement. Minas

Edgar Filing: METALLINE MINING CO - Form 10QSB

Penoles is to be the Operator; operations are under the control of the Technical Committee that will be composed of 2 representatives from Metalin and 3 from Minas Penoles. In addition, Minas Penoles will purchase Metalline Mining Company shares at a fixed price of US\$2.00 per share in the following schedule and manner:

(i). 50,000 shares upon signing the Agreement, purchased by Minas Penoles, S.A. de C.V. by means of a capital contribution to Metalline. Subsequently, and always following this same mechanism (i.e. capital contribution to Mealline), if Penoles should elect to continue exploration after twelve months time as of the Effective Date, then (ii). Minas Penoles, S.A. de C.V. shall purchase 100,000 additional Metalline shares at US \$2.00 per share; (iii). if Penoles should continue exploration after twenty-four months, Minas Penoles, S.A. de C.V. shall purchase an additional 100,000 Metalline shares at US \$2.00 per share.

It is the parties' intent and understanding that, in order to carry out to completion the Project once the Earn-In has been achieved or at whatever other time the Parties shall agree to in writing, the parties shall form a joint venture vehicle (the "Joint Venture Company") subject to the terms of the Agreement. The terms and conditions of the Joint Venture will be established in separate document(s) as the parties may deem necessary, in which Joint Venture, Minas Penoles, S.A. de C.V. shall have a 60% participation, and Metalin a 40% participation, subject to the terms of the Agreement.

In December 2001 Metalline Mining Company signed an agreement with the B.O.W. Corporation of El Paso, Texas for an exclusive lease on 41 patented and 81 unpatented mining claims in the Silver Hills District at Orogrande, New Mexico. The property contains high-grade garnet deposits that will be developed for the industrial abrasive market. The agreement allows Metalline to mine, process and market any metallic, non-metallic, or other mineral mined and sold from the property by establishing the quality and marketability of the garnet and by furnishing B.O.W. a business plan and feasibility study within six months. The agreement also provides that within 12 months of completing the feasibility study, if warranted, Metalline will construct and place into production a mining and marketing operation with a minimum capacity of 25,000 tons per year of industrial garnet. As consideration for the exclusive lease, B.O.W. will receive up to 50% of net profits from the operation. The Company announced in October 2002, that this agreement has been terminated.

EFFECT OF RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS.

In September 2000, the FASB issued SFAS No.140 "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities". This statement provides accounting and reporting standards for transfers and servicing of financial assets and extinguishment of liabilities and also provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings. SFAS No.140 is effective for recognition and reclassification of collateral and for disclosures relating to securitization transactions and collateral for fiscal years ending after December 15, 2000, and is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after March 31, 2001. The Company believes that the adoption of this standard will not

Edgar Filing: METALLINE MINING CO - Form 10QSB

have a material effect on the Company's results of operations or financial position.

In June 2001, the FASB issued SFAS No.141, "Business Combinations" and SFAS No.142, "Goodwill and Other Intangible Assets". SFAS No.141 provides for the elimination of the pooling-of-interests method of accounting for business combinations with an acquisition date of July 1,2001 or later.

Page 4

SFAS No.142 prohibits the amortization of goodwill and other intangible assets with indefinite lives and requires periodic reassessment of the underlying value of such assets for impairment. SFAS No.142 is effective for fiscal years beginning after December 15, 2001. An early adoption provision exists for companies with fiscal years beginning after March 15, 2001. On October 31, 2001, the Company adopted SFAS No.142. Application of the non-amortization provision of SFAS No.142 is expected to result in no change in net income in fiscal 2002. The Company is currently evaluating the impact of the transitional provisions of the statement.

In October 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No.143, "Accounting for Asset Retirement Obligations" (SFAS No.143). SFAS No.143 establishes guidelines related to the retirement of tangible long-lived assets of the Company and the associated retirement costs. This statement requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived assets. This statement is effective for financial statements issued for the fiscal years beginning after June 15, 2002. The Company adopted SFAS No.143, which will not impact the financial statements of the Company at October 31, 2002.

CASH FLOWS FOR THE NINE MONTHS ENDED
JULY 31, 2003 WERE AS FOLLOWS:

During the nine-month period ended July 31, 2003, the Company's cash position decreased by \$115,801, to \$100,562. During the nine-month period, the Company used \$306,793 in operating activities. In addition, the Company realized \$210,500 from the sale of Company stock and financed \$23,148 for the purchase of equipment. On June 21, 2002, the Company authorized the purchase of property and equipment from the Mineros Nortenos Cooperativa, located at the Company's Sierra Mojada Project at La Esmeralda, Coahuila, Mexico. Total purchase price, after conversion to U.S. Dollars, amounted to \$272,616. The final payment of \$38,610 due under the contract was paid June 2003.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

Minera Metalin, the Company's Mexican subsidiary, has been named as a co-defendant in a lawsuit filed in Mexico regarding the Company's purchase of two mining concessions. During the nine months ended July 31, 2003 the Company settled this suit for approximately \$36,000. The Company paid approximately \$13,800 at the time of settlement, with the balance payable in six equal installments of approximately \$3,700. The Company has been

Edgar Filing: METALLINE MINING CO - Form 10QSB

current with its payments.

ITEM 2. CHANGES IN SECURITIES.

Neither the constituent instruments defining the rights of the registrant's securities holders nor the rights evidenced by the registrant's outstanding common stock have been modified, limited, or qualified. During the nine months ended July 31, 2003 the Company sold 100,000 shares of its common stock at a price of \$2.00 per share; and sold 7,000 units comprised of one share of common stock and a warrant for 1/3 of a share of common stock at \$1.50 per unit. The value of the warrants was determined to be \$0.25 per warrant, using the Black Scholes pricing calculator with an adjustment made to reflect the 1/3 of a share.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

The registrant has no outstanding senior securities.

Page 5

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

In February 2001 a notice of annual meeting and proxy statement were mailed to shareholders of record January 5, 2001 regarding matters to be considered at the annual shareholders meeting held March 1, 2001. Matters considered were (1) election of directors, (2) consideration and approval of the Company's 2001 Stock Option Plan, (3) consideration and approval of a proposed amendment to the Company's Articles of Incorporation to authorize a class of Preferred Shares, (4) election of outside auditors. There have been no matters submitted to a vote of security holders since March 1, 2001.

ITEM 5. OTHER INFORMATION. None.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K.

EXHIBITS.

The following exhibit is filed as part of this report: None.

REPORTS ON FORM 8-K.

No reports on Form 8-K were filed by the registrant during the period covered by this report.

METALLINE MINING COMPANY
An Exploration Stage Company
Notes to the Consolidated Financial Statements
July 31, 2003

The interim consolidated financial statements of Metalline Mining Company included herein have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange. Although certain information normally included in financial statements prepared in accordance with generally accepted accounting principles has been condensed or omitted, the Company believes that the disclosures are adequate to make the information presented no misleading. The accompanying interim financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's annual report on Form 10-KSB for the fiscal year ended October 31, 2002.

The consolidated financial statements included herein reflect all normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation of the results for interim periods. The results for interim periods are not necessarily indicative of

Edgar Filing: METALLINE MINING CO - Form 10QSB

trends or of results to be expected for a full year.

NOTE 1

PREFERRED STOCK

At its March 1, 2001 annual shareholders meeting, the Company approved a change to its articles of incorporation whereby the Company is authorized to issue one million shares of \$0.01 par value preferred stock. The specific features of the preferred stock will be determined by the Company's board of directors. There have been no preferred shares issued as of July 31, 2003.

STOCK OPTION PLAN

On March 1, 2001, the Company's shareholders approved a qualified stock option plan. The number of shares eligible for issuance under the qualified plan is to be determined by the Company's board of directors.

NOTE 2

On November 15, 2001, the Company entered into an agreement with Compania Minera La Parrena S.A. de C.V. ("Penoles") whereby Penoles may earn the right to acquire a 60% interest in certain mining concessions located in the Sierra Majada region of Coahuila, Mexico. The earn-in right is contingent upon the following: delivery by Penoles within four years of a pre-feasibility study, completion by Penoles of \$1,000,000 of qualified expenditures on the aforementioned mining concessions, and Penoles' purchase of up to 250,000 shares of Metalline's common stock at \$2.00 per share.

During the nine months ended July 31, 2003, Metalline received reimbursement of \$53,938 from Penoles for expenses incurred by Metalline, which were applied toward qualified expenditures.

NOTE 3

In December 2001 Metalline Mining Company signed an agreement with the B.O.W. Corporation of El Paso, Texas for an exclusive lease on 41 patented and 81 unpatented mining claims in the Silver Hills District at Orogrande, New Mexico. The property contains high-grade garnet deposits that will be developed for the industrial abrasive market. The agreement allows Metalline to mine, process and market any metallic, non-metallic, or other mineral mined and sold from the property by establishing the quality and marketability of the garnet and by furnishing B.O.W. a business plan and feasibility study within six months. The agreement also provides that within 12 months of completing the feasibility study, if warranted, Metalline will construct and place into production a mining and marketing operation with a minimum capacity of 25,000 tons per year of industrial garnet. As consideration for the exclusive lease, B.O.W. will receive up to 50% of net profits from the operation. The Company announced in October 2002 that the agreement has been terminated.

F/S 11

METALLINE MINING COMPANY
An Exploration Stage Company
Notes to the Consolidated Financial Statements
July 31, 2003

NOTE 4

Edgar Filing: METALLINE MINING CO - Form 10QSB

On June 21, 2002, the Company authorized the purchase of property and equipment from the Mineros Nortenos Cooperativa, located at the Company's Sierra Majada Project at La Esmeralda, Coahuila, Mexico. Total purchase price, after conversion to U.S. Dollars, amounted to \$272,616. The final payment of \$38,610 was made in June 2003.

NOTE 5

On May 20, 2002 the Company authorized the offering of 1,000,000 stock units, with each unit consisting of one share of common stock and one warrant equal to 1/3 of a share of common stock. As of July 31, 2003, 169,667 units have been sold for cash totaling \$254,500.

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize, and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
