CARRIZO OIL & GAS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Nature of Operations

Carrizo Oil & Gas, Inc. is a Houston-based energy company which, together with its subsidiaries (collectively, the “Company”), is actively engaged in the exploration, development, and production of oil and gas primarily from resource plays located in the United States. The Company’s current operations are principally focused in proven, producing oil and gas plays primarily in the Eagle Ford Shale in South Texas, the Utica Shale in Ohio, the Niobrara Formation in Colorado, and the Marcellus Shale in Pennsylvania.

2. Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The consolidated financial statements include the accounts of the Company after elimination of intercompany transactions and balances and are presented in accordance with U.S. generally accepted accounting principles (“GAAP”). The Company proportionately consolidates its undivided interests in oil and gas properties as well as investments in unincorporated entities, such as partnerships and limited liability companies where the Company, as a partner or member, has undivided interests in the oil and gas properties. The consolidated financial statements reflect all necessary adjustments, all of which were of a normal recurring nature and are in the opinion of management necessary to present fairly, in all material respects, the Company’s interim financial position, results of operations and cash flows. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). The operating results for the periods presented are not necessarily indicative of the results that may be expected for the full year. The consolidated financial statements included herein should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

Reclassifications

Certain reclassifications have been made to prior period amounts to conform to the current period presentation. Such reclassifications had no material impact on prior period amounts.

Discontinued Operations

On February 22, 2013, the Company closed on the sale of Carrizo UK Huntington Ltd, a wholly owned subsidiary of the Company (“Carrizo UK”), and all of its interest in the Huntington Field discovery, including a 15% non-operated working interest and certain overriding royalty interests, to a subsidiary of Iona Energy Inc. (“Iona Energy”) for an agreed-upon price of \$184.0 million, including the assumption and repayment by Iona Energy of the \$55.0 million of borrowings outstanding under Carrizo UK’s senior secured multicurrency credit facility as of the closing date. The liabilities, results of operations and cash flows associated with Carrizo UK have been classified as discontinued operations in the consolidated financial statements. Unless otherwise indicated, the information in these notes relate to the Company’s continuing operations. Information related to discontinued operations is included in “Note 3.

Discontinued Operations” and “Note 10. Condensed Consolidating Financial Information.”

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods reported. Certain of such estimates and assumptions are inherently unpredictable and will differ from actual results. The Company evaluates subsequent events through the date the financial statements are issued.

Significant estimates include volumes of proved oil and gas reserves, which are used in calculating depreciation, depletion, and amortization (“DD&A”) of proved oil and gas property costs, the present value of future net revenues included in the full cost ceiling test, estimates of future taxable income used in assessing the realizability of deferred tax assets, and the estimated costs and timing of cash outflows underlying asset retirement obligations. Oil and gas reserve estimates, and therefore calculations based on such reserve estimates, are subject to numerous inherent uncertainties, the accuracy of which, is a function of the quality and quantity of available data, the application of engineering and geological interpretation and judgment to available data and the interpretation of mineral leaseholds

and other contractual arrangements, including adequacy of title, drilling requirements and royalty obligations. These estimates also depend on assumptions regarding quantities and production rates of recoverable oil and gas reserves, oil and gas prices, timing and amounts of development costs and operating expenses, all of which will vary from those assumed in the Company's estimates. Other significant estimates are involved in determining impairments of unevaluated

-5-

leasehold costs, fair values of derivative assets and liabilities, stock-based compensation, collectability of receivables, and in evaluating disputed claims, interpreting contractual arrangements (including royalty obligations and notional interest calculations) and contingencies. Estimates are based on current assumptions that may be materially affected by the results of subsequent drilling and completion, testing and production as well as subsequent changes in oil and gas prices, counterparty creditworthiness, interest rates and the market value and volatility of the Company's common stock.

Cash and Cash Equivalents

Cash equivalents include highly liquid investments with original maturities of three months or less. Certain of the Company's cash accounts are zero-balance controlled disbursement accounts that do not have the right of offset against the Company's other cash balances. The Company presents the outstanding checks written against these zero-balance accounts as a component of accounts payable in the consolidated balance sheets. Outstanding checks included as a component of accounts payable totaled \$47.5 million and \$2.2 million as of September 30, 2014 and December 31, 2013, respectively.

Accounts Receivable and Accounts Payable

The Company establishes an allowance for doubtful accounts when it determines that it will not collect all or a part of an accounts receivable balance. The Company assesses the collectability of its accounts receivable on a quarterly basis and adjusts the allowance as necessary using the specific identification method. The allowance for doubtful accounts was not significant at September 30, 2014 and December 31, 2013. Accounts receivable from related parties at September 30, 2014 and December 31, 2013 was \$0.1 million and \$6.6 million, respectively. Accounts payable to related parties at September 30, 2014 and December 31, 2013 was \$1.3 million and \$2.8 million, respectively.

Concentration of Credit Risk

The Company's accounts receivable consists primarily of receivables from oil and gas purchasers and joint interest owners in properties the Company operates. This concentration of accounts receivable from customers and joint interest owners in the oil and gas industry may impact the Company's overall credit risk in that these entities may be similarly affected by changes in economic and other industry conditions. The Company does not require collateral from its customers and joint interest owners. The Company generally has the right to withhold future revenue distributions to recover any non-payment of joint interest billings.

The Company's derivative instruments in a net asset position also subject the Company to a concentration of credit risk. See "Note 8. Derivative Instruments."

Oil and Gas Properties

Oil and gas properties are accounted for using the full cost method of accounting under which all productive and nonproductive costs directly associated with property acquisition, exploration and development activities are capitalized to cost centers established on a country-by-country basis. The internal cost of employee compensation and benefits, including stock-based compensation, directly associated with acquisition, exploration and development activities are capitalized and totaled \$3.4 million and \$3.8 million for the three months ended September 30, 2014 and 2013, respectively, and \$14.1 million and \$10.1 million for the nine months ended September 30, 2014 and 2013, respectively. Internal costs related to production, general corporate overhead and similar activities are expensed as incurred.

Capitalized oil and gas property costs within a cost center are amortized on an equivalent unit-of-production method, converting natural gas to barrels of oil equivalent at the ratio of six thousand cubic feet of gas to one barrel of oil, which represents their approximate relative energy content. The equivalent unit-of-production amortization rate is computed on a quarterly basis by dividing current quarter production by proved oil and gas reserves at the beginning of the quarter then applying such amortization rate to capitalized oil and gas property costs, which includes estimated asset retirement costs, less accumulated amortization, plus the estimated future expenditures (based on current costs) to be incurred in developing proved reserves, net of estimated salvage values. Average DD&A per Boe of proved oil and gas properties was \$26.75 and \$19.75 for the three months ended September 30, 2014 and 2013, respectively, and \$26.58 and \$19.34 for the nine months ended September 30, 2014 and 2013, respectively.

Unproved properties, not being amortized, include unevaluated leasehold and seismic costs associated with specific unevaluated properties, the cost of exploratory wells in progress, and related capitalized interest. Exploratory wells in progress and individually significant unevaluated leaseholds are assessed on a quarterly basis to determine whether or

not and to what extent proved reserves have been assigned to the properties or if an impairment has occurred, in which case the related costs along with associated capitalized interest are added to the oil and gas property costs subject to amortization. Factors the Company considers in its impairment assessment include drilling results by the Company and other operators, the terms of oil and gas leases not held by production and drilling and completion capital expenditure plans. The Company expects to complete its evaluation of the majority of its unevaluated leaseholds within the next five years and exploratory wells in progress within the next year. Individually insignificant unevaluated leaseholds are grouped by major area and added to the oil and gas property costs subject to amortization

based on the average primary lease term of the properties. The Company capitalized interest costs associated with its unproved properties totaling \$8.7 million and \$7.5 million for the three months ended September 30, 2014 and 2013, respectively, and \$25.0 million and \$21.8 million for the nine months ended September 30, 2014 and 2013, respectively. The amount of interest costs capitalized is determined on a quarterly basis based on the average balance of unproved properties using a weighted-average interest rate based on outstanding borrowings.

Proceeds from the sale of proved and unproved oil and gas properties are recognized as a reduction of capitalized oil and gas property costs with no gain or loss recognized, unless the sale significantly alters the relationship between capitalized costs and proved reserves of oil and gas attributable to a cost center. For the three and nine months ended September 30, 2014, the Company did not have any sales of oil and gas properties that significantly altered such relationship.

Capitalized costs, less accumulated amortization and related deferred income taxes, are limited to the “cost center ceiling” equal to (i) the sum of (A) the present value of estimated future net revenues from proved oil and gas reserves, less estimated future expenditures to be incurred in developing and producing the proved reserves computed using a discount factor of 10%, (B) the costs of unproved properties not being amortized, and (C) the lower of cost or estimated fair value of unproved properties included in the costs being amortized; less (ii) related income tax effects. If the net capitalized costs exceed the cost center ceiling, the excess is recognized as an impairment of oil and gas properties. An impairment recognized in one period may not be reversed in a subsequent period even if higher oil and gas prices in the future increase the cost center ceiling applicable to the subsequent period.

The estimated future net revenues used in the cost center ceiling are calculated using the average realized prices for sales of oil and gas on the first calendar day of each month during the preceding 12-month period prior to the end of the current reporting period. Prices are held constant indefinitely and are not changed except where different prices are fixed and determinable from applicable contracts for the remaining term of those contracts. Prices do not include the impact of derivative instruments because the Company elected not to meet the criteria to qualify its derivative instruments for hedge accounting treatment.

Depreciation of other property and equipment is recognized using the straight-line method based on estimated useful lives ranging from five to ten years.

Debt Issuance Costs

Debt issuance costs associated with the revolving credit facility are amortized to interest expense on a straight-line basis over the term of the facility. Debt issuance costs associated with the senior notes are amortized to interest expense using the effective interest method over the terms of the related notes.

Financial Instruments

The Company’s financial instruments consist of cash and cash equivalents, receivables, payables, derivative assets and liabilities and long-term debt. The carrying amounts of cash and cash equivalents, receivables and payables approximate fair value due to the highly liquid or short-term nature of these instruments. The fair values of the Company’s derivative assets and liabilities are based on a third-party industry-standard pricing model that uses market data obtained from third-party sources, including quoted forward prices for oil and gas, discount rates and volatility factors. The carrying amounts of long-term debt under the Company’s revolving credit facility approximate fair value as borrowings bear interest at variable rates of interest. The carrying amounts of the Company’s senior notes and other long-term debt may not approximate fair value because carrying amounts are net of any unamortized discount and the notes bear interest at fixed rates of interest. See “Note 6. Long-Term Debt” and “Note 9. Fair Value Measurements.”

Asset Retirement Obligations

The Company’s asset retirement obligations represent the present value of the estimated future costs associated with plugging and abandoning oil and gas wells, removing production equipment and facilities and restoring the surface of the land in accordance with the terms of oil and gas leases and applicable local, state and federal laws. Determining asset retirement obligations requires estimates of the costs of plugging and abandoning oil and gas wells, removing production equipment and facilities and restoring the surface of the land as well as estimates of the economic lives of the oil and gas wells and future inflation rates. The resulting estimate of future cash outflows are discounted using a credit-adjusted risk-free interest rate that corresponds with the timing of the cash outflows. Cost estimates consider historical experience, third party estimates, the requirements of oil and gas leases and applicable local, state and federal laws, but do not consider estimated salvage values. Asset retirement obligations are recognized when the well

is drilled or when the production equipment and facilities are installed with an associated increase in oil and gas property costs. Asset retirement obligations are accreted to their expected settlement values with any difference between the actual cost of settling the asset retirement obligations and recorded amount being recognized as an adjustment to proved oil and gas property costs. On an interim basis, when indicators suggest there have been material changes in the estimates underlying the obligation, the Company reassesses its asset retirement obligations to determine whether any revisions to the obligations are

-7-

necessary. At least annually, the Company reassesses all of its asset retirement obligations to determine whether any revisions to the obligations are necessary. Revisions typically occur due to changes in estimated costs or well economic lives, or if federal or state regulators enact new requirements regarding plugging and abandoning oil and gas wells.

Commitments and Contingencies

Liabilities are recognized for contingencies when (i) it is both probable that an asset has been impaired or that a liability has been incurred and (ii) the amount of such loss is reasonably estimable.

Revenue Recognition

Oil and gas revenues are recognized when production is sold to a purchaser at a fixed or determinable price, delivery has occurred, title has transferred and collectability is reasonably assured. The Company follows the sales method of accounting whereby revenues from the production of natural gas from properties in which the Company has an interest with other producers are recognized for production sold to purchasers, regardless of whether the sales are proportionate to the Company's ownership interest in the property. Production imbalances are recognized as an asset or liability to the extent that the Company has an imbalance on a specific property that is in excess of its remaining proved reserves. Sales volumes are not significantly different from the Company's share of production and as of September 30, 2014 and December 31, 2013, the Company did not have any material production imbalances.

Derivative Instruments

The Company uses commodity derivative instruments, primarily fixed price swaps and costless collars, to reduce its exposure to commodity price volatility for a substantial, but varying, portion of its forecasted oil and gas production up to 36 months and thereby achieve a more predictable level of cash flows to support the Company's drilling and completion capital expenditure program. All derivative instruments are recorded on the consolidated balance sheets as either an asset or liability measured at fair value. The Company nets its derivative instrument fair value amounts executed with the same counterparty pursuant to ISDA master agreements, which provide for net settlement over the term of the contract and in the event of default or termination of the contract. Although the derivative instruments provide an economic hedge of the Company's exposure to commodity price volatility, because the Company elected not to meet the criteria to qualify its derivative instruments for hedge accounting treatment, gains and losses as a result of changes in the fair value of derivative instruments are recognized as (gain) loss on derivative instruments, net in the consolidated statements of income in the period in which the changes occur. The net cash flows resulting from the payments to and receipts from counterparties as a result of derivative settlements are classified as cash flows from operating activities. The Company does not enter into derivative instruments for speculative or trading purposes. The Company's Board of Directors establishes risk management policies and reviews derivative instruments, including volumes, types of instruments and counterparties, on a quarterly basis. These policies require that derivative instruments be executed only by the President or Chief Financial Officer after consultation with and concurrence by the President, Chief Financial Officer and Chairman of the Board. See "Note 8. Derivative Instruments" for further discussion of the Company's derivative instruments.

Stock-Based Compensation

The Company recognized the following stock-based compensation expense (benefit) associated with stock appreciation rights to be settled in cash ("SARs"), restricted stock awards and units and performance share awards for the periods indicated which is reflected as general and administrative expense in the consolidated statements of income:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands)			
Stock appreciation rights	(\$8,935)	\$6,752	\$10,637	\$10,691

Performance share awards	592	—	925	—
	249	11,984	34,079	24,242
Less: amounts capitalized	(1,179)	(2,112)	(5,870)	(4,904)
Total stock-based compensation expense (benefit)	(\$930)	\$9,872	\$28,209	\$19,338

Edgar Filing: CARRIZO OIL & GAS INC - Form 10-Q

Income tax benefit (expense)	(\$326)	\$3,627	\$9,874	\$7,097
------------------------------	----------	---------	---------	---------

Stock Appreciation Rights. For SARs, stock-based compensation expense is based on the fair value liability (using the Black-Scholes-Merton option pricing model) remeasured at each reporting period, recognized over the vesting period (generally three years) using the graded vesting method. For periods subsequent to vesting and prior to exercise, stock-based compensation expense is based on the fair value liability remeasured at each reporting period based on the intrinsic value of the SAR. The liability for SARs are classified as "Other current liabilities" for the portion of the awards that are vested or are expected to vest within the

-8-

next 12 months, with the remainder classified as “Other liabilities.” SARs typically expire between four and seven years after the date of grant.

Restricted Stock Awards and Units. For restricted stock awards and units granted to employees, stock-based compensation expense is based on the price of the Company’s common stock on the grant date and recognized over the vesting period (generally one to three years) using the straight-line method, except for award or units with performance conditions, in which case the Company uses the graded vesting method. For restricted stock awards and units granted to independent contractors, stock-based compensation expense is based on fair value remeasured at each reporting period and recognized over the vesting period (generally three years) using the straight-line method.

Performance Share Awards. For performance share awards, stock-based compensation expense is based on the grant-date fair value (using a Monte Carlo valuation model) and recognized over the three year vesting period using the straight-line method. The number of shares of common stock issuable upon vesting range from zero to 200% of the number of performance share awards granted based on the Company’s total shareholder return relative to an industry peer group over a three year performance period.

Income Taxes

Income taxes are recognized based on earnings reported for tax return purposes in addition to a provision for deferred income taxes. Deferred income taxes are recognized at each reporting period for the future tax consequences of cumulative temporary differences between the tax bases of assets and liabilities and their reported amounts in the Company’s financial statements based on existing tax laws and enacted statutory tax rates applicable to the periods in which the temporary differences are expected to affect taxable income. The Company routinely assesses the realizability of its deferred tax assets by taxing jurisdiction and considers its estimate of future taxable income based on production of proved reserves at estimated future pricing in making such assessments. If the Company concludes that it is more likely than not that some portion or all of the benefit from deferred tax assets will not be realized, the deferred tax assets are reduced by a valuation allowance. The Company classifies interest and penalties associated with income taxes as interest expense.

Income From Continuing Operations Per Common Share

Supplemental income from continuing operations per common share information is provided below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands, except per share data)			
Income From Continuing Operations	\$82,997	\$5,712	\$92,832	\$44,073
Basic weighted average common shares outstanding	45,257	40,386	45,277	40,083
Effect of dilutive instruments	772	541	832	518
Diluted weighted average common shares outstanding	46,029	40,927	46,109	40,601
Income From Continuing Operations Per Common Share				
Basic	\$1.83	\$0.14	\$2.05	\$1.10
Diluted	\$1.80	\$0.14	\$2.01	\$1.09

Basic income from continuing operations per common share is based on the weighted average number of shares of common stock outstanding during the period. Diluted income from continuing operations per common share is based on the weighted average number of common shares and all potentially dilutive common shares outstanding during the period which include restricted stock awards and units, performance share awards, stock options and warrants. The Company excludes the number of awards, units, options and warrants from the calculation of diluted weighted average shares outstanding when the grant date or exercise prices are greater than the average market prices of the Company’s common stock for the corresponding period as the effect would be antidilutive to the computation. The Company includes the number of potentially dilutive common shares attributable to the performance share awards based on the number of shares, if any, that would be issuable as if the end of the period was the end of the performance period. The number of awards, units, options, warrants and performance share awards excluded for the three and nine months ended September 30, 2014 and 2013 were not significant.

Recent Accounting Pronouncements

Edgar Filing: CARRIZO OIL & GAS INC - Form 10-Q

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606), which supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, and industry specific guidance in Subtopic 932-605, Extractive Activities- Oil and Gas- Revenue Recognition. This ASU requires entities to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration the entity expects to be entitled to in exchange for those goods and services. This ASU is effective for annual and interim periods

-9-

beginning in 2017, and is required to be adopted either retrospectively or as a cumulative-effect adjustment as of the date of adoption, with no early adoption permitted. The Company is currently evaluating the impact of the adoption of this ASU on its consolidated financial statements.

3. Discontinued Operations

On February 22, 2013, the Company closed on the sale of Carrizo UK, and all of its interest in the Huntington Field discovery, including a 15% non-operated working interest and certain overriding royalty interests, to a subsidiary of Iona Energy for an agreed-upon price of \$184.0 million, including the assumption and repayment by Iona Energy of the \$55.0 million of borrowings outstanding under Carrizo UK's senior secured multicurrency credit facility as of the closing date. The liabilities of discontinued operations of \$20.8 million and \$28.3 million as of September 30, 2014 and December 31, 2013, respectively, relate to an accrual for estimated future obligations related to the sale. See "Note 2. Summary of Significant Accounting Policies—Use of Estimates" for further discussion of estimates and assumptions that may affect the reported amounts of liabilities related to the sale of Carrizo UK.

The following table summarizes the amounts included in income (loss) from discontinued operations, net of income taxes presented in the consolidated statements of income for the three and nine months ended September 30, 2014 and 2013:

	Three Months Ended September 30, 2014		September 30, 2013	
	(In thousands)			
Revenues	\$—	\$—	\$—	\$—
Costs and Expenses				
General and administrative	259	408	1,162	709
Accretion related to asset retirement obligations	—	—	—	36
Gain on sale of discontinued operations	—	—	—	(37,294)
Increase (decrease) in estimated future obligations	(2,144)	1,187	(696)	(1,378)
Loss on derivatives, net	16	18	34	93
Other (income) expense, net	—	(106)	—	(438)
Income (Loss) From Discontinued Operations Before Income Taxes	1,869	(1,507)	(500)	38,272
Income tax (expense) benefit	(1,077)	316	(248)	(14,673)
Income (Loss) From Discontinued Operations, Net of Income Taxes	\$792	(\$1,191)	(\$748)	\$23,599
Income Taxes				

Carrizo UK is a disregarded entity for U.S. federal income tax purposes. Accordingly, the income tax (expense) benefit reflected above includes the Company's U.S. deferred income tax (expense) benefit associated with the income (loss) from discontinued operations before income taxes. The related U.S. deferred tax assets and liabilities have been classified as deferred income taxes of continuing operations in the consolidated balance sheets.

4. Property and Equipment, Net

As of September 30, 2014 and December 31, 2013, total property and equipment, net consisted of the following:

	September 30, 2014	December 31, 2013
	(In thousands)	
Proved properties	\$2,747,915	\$2,182,226
Accumulated depreciation, depletion and amortization	(1,000,070)	(773,742)

Other property and equipment, net	7,580	8,294
Total property and equipment, net	\$2,255,147	\$1,794,215

5. Income Taxes

The Company's estimated annual effective income tax rates are used to allocate expected annual income tax expense to interim periods. The rates are the ratio of estimated annual income tax expense to estimated annual income before income taxes by taxing jurisdiction, except for discrete items, which are significant, unusual or infrequent items for which income taxes are computed and recorded in the interim period in which the discrete item occurs. The estimated annual effective income tax rates are applied to the year-to-date income before income taxes by taxing jurisdiction to determine the income tax expense allocated to the interim period. The Company updates its estimated annual effective income tax rates at the end of each quarterly period considering the geographic mix of income based on the tax jurisdictions in which the Company operates. Actual results that are different from the assumptions used in estimating the annual effective income tax rates will impact future income tax expense. Income tax expense differs from income tax expense computed by applying the U.S. federal statutory corporate income tax rate of 35% to income from continuing operations before income taxes as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(In thousands)			
Income tax expense at the statutory rate	(\$45,675)	(\$2,650)	(\$51,220)	(\$24,474)
State income taxes, net of U.S. federal income tax effect	(2,560)	791	(2,974)	(1,275)
Other, net	731	—	684	(104)
Income tax expense	(\$47,504)	(\$1,859)	(\$53,510)	(\$25,853)

6. Long-Term Debt

Long-term debt consisted of the following as of September 30, 2014 and December 31, 2013:

	September 30, 2014 (In thousands)	December 31, 2013
8.625% Senior Notes due 2018	\$600,000	\$600,000
Unamortized discount for 8.625% Senior Notes	(3,634)	(4,178)
7.50% Senior Notes due 2020	300,000	300,000
Other long-term debt due 2028	4,425	4,425
Senior Secured Revolving Credit Facility due 2018	119,000	—
Total long-term debt	\$1,019,791	\$900,247
Senior Secured Revolving Credit Facility		

The Company is party to a senior secured revolving credit facility with Wells Fargo Bank, National Association as the administrative agent. The revolving credit facility provides for a borrowing capacity up to the lesser of (i) the borrowing base (as defined in the senior credit agreement governing the revolving credit facility) and (ii) \$1.0 billion. The revolving credit facility matures on July 2, 2018. The revolving credit facility is secured by substantially all of the Company's U.S. assets and is guaranteed by all of the Company's existing Material Domestic Subsidiaries (as defined in the credit agreement governing the revolving credit facility). As of September 30, 2014, the Company's borrowing base was \$570.0 million. The amount the Company is able to borrow with respect to the borrowing base is subject to compliance with the financial covenants and other provisions of the credit agreement governing the revolving credit facility. See "Note 11. Subsequent Events" for further discussion of the borrowing base.

The Company is subject to certain covenants under the terms of the revolving credit facility, as amended, which include the maintenance of the following financial covenants determined as of the last day of each quarter: (1) a ratio of Total Debt to EBITDA of not more than 4.00 to 1.00; and (2) a Current Ratio of not less than 1.00 to 1.00; (each of the capitalized terms used in the foregoing clauses (1) and (2) being as defined in the credit agreement governing the revolving credit facility). As of September 30, 2014, the ratio of Total Debt to EBITDA was 2.02 to 1.00 and the Current Ratio was 1.68 to 1.00. As defined in the credit agreement governing the revolving credit facility, Total Debt is net of cash and cash equivalents and the Current Ratio includes an add back of the available borrowing capacity. Because the calculation of the financial ratios are made as of a certain date, the financial ratios can fluctuate significantly period to period as the amounts outstanding under the revolving credit facility are dependent on the timing of cash flows from operations, capital expenditures, sales of oil and gas properties and securities offerings. As of September 30, 2014, the Company had \$119.0 million of borrowings outstanding under the revolving credit facility with a weighted average interest rate of 2.01%. As of September 30, 2014, the Company also had \$0.6 million in letters of credit outstanding which reduced the amounts available under the revolving credit facility. The amount available for borrowing with respect to the borrowing base is subject to compliance with the financial covenants and other provisions of the credit agreement governing the revolving credit facility. The revolving credit facility is generally used to fund ongoing working capital needs and the Company's capital expenditure plan to the extent such amounts exceed cash flows from operations, proceeds from the sale of oil and gas properties and securities offerings.

7. Commitments and Contingencies

From time to time, the Company is party to certain legal actions and claims arising in the ordinary course of business. While the outcome of these events cannot be predicted with certainty, management does not currently expect these matters to have a materially adverse effect on the financial position or results of operations of the Company.

The results of operations and financial position of the Company continue to be affected from time to time in varying degrees by domestic and foreign political developments as well as legislation and regulations pertaining to restrictions on oil and gas production, imports and exports, natural gas regulation, tax increases, environmental regulations and cancellation of contract rights. Both the likelihood and overall effect of such occurrences on the Company vary greatly and are not predictable.

8. Derivative Instruments

The Company uses commodity derivative instruments, primarily fixed price swaps and costless collars, to reduce its exposure to commodity price volatility for a substantial, but varying, portion of its forecasted oil and gas production

up to 36 months and thereby achieve a more predictable level of cash flows to support the Company's drilling and completion capital expenditure program. Costless collars are designed to establish floor and ceiling prices on anticipated future oil and gas production. While the use of these derivative instruments limits the downside risk of adverse price movements, they may also limit future revenues from favorable price movements. The Company does not enter into derivative instruments for speculative or trading purposes.

-12-

The Company typically has numerous hedge positions that span several time periods and often result in both fair value asset and liability positions held with that counterparty, which positions are all offset to a single fair value asset or liability at the end of each reporting period. The Company nets its derivative instrument fair value amounts executed with the same counterparty pursuant to ISDA master agreements, which provide for net settlement over the term of the contract and in the event of default or termination of the contract. The fair value of derivative instruments where the Company is in a net asset position with its counterparties as of September 30, 2014 and December 31, 2013 totaled \$36.0 million and \$9.3 million, respectively, and is summarized by counterparty in the table below:

Counterparty	September 30, 2014	December 31, 2013	
Wells Fargo	41	% 23	%
Credit Suisse	23	% 46	%
Societe Generale	22	% 31	%
Regions	8	% —	%
Union Bank	4	% —	%
Royal Bank of Canada	2	% —	%
Total	100	% 100	%

The counterparties to the Company's derivative instruments are lenders under the Company's credit agreement. Because each of the lenders have investment grade credit ratings, the Company believes it has minimal credit risk and accordingly does not currently require its counterparties to post collateral to support the net asset positions of its derivative instruments. As such, the Company is exposed to credit risk to the extent of nonperformance by the counterparties to its derivative instruments. Although the Company does not currently anticipate such nonperformance, it continues to monitor the financial viability of its counterparties.

The fair value of derivative instruments where the Company is in a net liability position with its counterparties as of September 30, 2014 and December 31, 2013 totaled \$0.2 million and \$10.1 million, respectively.

For the three months ended September 30, 2014 and 2013, the Company recorded in the consolidated statements of income a gain on derivative instruments, net of \$71.8 million and a loss on derivative instruments, net of \$27.7 million, respectively. For the nine months ended September 30, 2014 and 2013, the Company recorded in the consolidated statements of income a gain on derivative instruments, net of \$11.2 million and a loss on derivative instruments, net of \$16.5 million, respectively.

The following sets forth a summary of the Company's crude oil derivative positions at average NYMEX prices as of September 30, 2014:

Period	Type of Contract	Volumes (in Bbls/d)	Weighted Average Floor Price (\$/Bbl)	Weighted Average Ceiling Price (\$/Bbl)	Weighted Average Short Put Price (\$/Bbl)	Weighted Average Put Spread (\$/Bbl)
October - December 2014	Fixed Price Swaps	11,500	\$93.55			
	Costless Collars	3,000	\$88.33	\$104.26		
	Three-way Collars	500	\$85.00	\$107.75	\$65.00	\$20.00
January - December 2015	Fixed Price Swaps	10,370	\$92.97			
	Costless Collars	700	\$90.00	\$100.65		
	Three-way Collars	1,000	\$85.00	\$105.00	\$65.00	\$20.00
January - December 2016	Fixed Price Swaps	3,000	\$91.09			
	Three-way Collars	667	\$85.00	\$104.00	\$65.00	\$20.00

The following sets forth a summary of the Company's natural gas derivative positions at average NYMEX prices as of September 30, 2014:

Period	Type of Contract	Volumes (in MMBtu/d)	Weighted Average	Weighted Average
--------	------------------	-------------------------	---------------------	---------------------

Edgar Filing: CARRIZO OIL & GAS INC - Form 10-Q

			Floor Price (\$/MMBtu)	Ceiling Price (\$/MMBtu)
October - December 2014	Fixed Price Swaps	54,380	\$4.16	
	Calls	10,000		\$5.50
January - December 2015	Fixed Price Swaps	30,000	\$4.29	

-13-

9. Fair Value Measurements

Accounting guidelines for measuring fair value establish a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy categorizes assets and liabilities measured at fair value into one of three different levels depending on the observability of the inputs employed in the measurement. The three levels are defined as follows:

Level 1 – Observable inputs such as quoted prices in active markets at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Other inputs that are observable directly or indirectly such as quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Unobservable inputs for which there is little or no market data and which the Company makes its own assumptions about how market participants would price the assets and liabilities.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables summarize the location and amounts of the Company's assets and liabilities measured at fair value on a recurring basis as presented in the consolidated balance sheets as of September 30, 2014 and December 31, 2013. All items included in the tables below are Level 2 inputs within the fair value hierarchy:

	September 30, 2014		
	Gross Amounts Recognized	Gross Amounts Offset in the Consolidated Balance Sheets	Net Amounts Presented in the Consolidated Balance Sheets
	(In thousands)		
Derivative assets			
Derivative assets	\$22,873	(\$2,279)	\$20,594
Other assets	16,328	(921)	15,407
Derivative liabilities			
Derivative liabilities	(2,414)	2,279)	(135)
Other liabilities	(986)	921)	(65)
Total	\$35,801	\$—	\$35,801
	December 31, 2013		
	Gross Amounts Recognized	Gross Amounts Offset in the Consolidated Balance Sheets	Net Amounts Presented in the Consolidated Balance Sheets
	(In thousands)		
Derivative assets			
Derivative assets	\$2,389	(\$2,389)	\$—
Other assets	11,709	(2,425)	9,284
Derivative liabilities			
Derivative liabilities	(12,336)	2,389)	(9,947)
Other liabilities	(2,613)	2,425)	(188)
Total	(\$851)	\$—	(\$851)

The fair values of the Company's derivative assets and liabilities are based on a third-party industry-standard pricing model that uses market data obtained from third-party sources, including quoted forward prices for oil and gas, discount rates and volatility factors. The fair values are also compared to the values provided by the counterparty for reasonableness and are adjusted for the counterparties' credit quality for derivative assets and the Company's credit quality for derivative liabilities. To date, adjustments for credit quality have not had a material impact on the fair values.

The derivative asset and liability fair values reported in the consolidated balance sheets are as of a particular point in time and subsequently change as these estimates are revised to reflect actual results, changes in market conditions and other factors. The Company typically has numerous hedge positions that span several time periods and often result in both derivative assets and liabilities with the same counterparty, which positions are all offset to a single derivative asset or liability in the consolidated balance sheets. The Company nets the fair values of its derivative assets and

liabilities associated with derivative instruments executed with the same counterparty pursuant to ISDA master agreements, which provide for net settlement over the term of the

-14-

contract and in the event of default or termination of the contract. The Company had no transfers in or out of Levels 1 or 2 for the nine months ended September 30, 2014 or 2013.

Fair Value of Other Financial Instruments

The Company's other financial instruments consist of cash and cash equivalents, receivables, payables and long-term debt which are classified as Level 1 under the fair value hierarchy. The carrying amounts of cash and cash equivalents, receivables, and payables approximate fair value due to the highly liquid or short-term nature of these instruments.

The following table presents the carrying amounts and fair values of the Company's senior notes and other long-term debt, based on quoted market prices, as of September 30, 2014 and December 31, 2013.

	September 30, 2014		December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In thousands)			
8.625% Senior Notes due 2018	\$596,366	\$627,750	\$595,822	\$644,978
7.50% Senior Notes due 2020	300,000	312,750	300,000	327,000
Other long-term debt due 2028	4,425	4,027	4,425	4,115

10. Condensed Consolidating Financial Information

The rules of the SEC require that condensed consolidating financial information be provided for a subsidiary that has guaranteed the debt of a registrant issued in a public offering, where the guarantee is full, unconditional and joint and several and where the voting interest of the subsidiary is 100% owned by the registrant. The Company is, therefore, presenting condensed consolidating financial information as of September 30, 2014 and December 31, 2013, and for the three and nine months ended September 30, 2014 and 2013 on a parent company, combined guarantor subsidiaries, combined non-guarantor subsidiaries and consolidated basis and should be read in conjunction with the consolidated financial statements. The financial information may not necessarily be indicative of results of operations, cash flows, or financial position had such guarantor subsidiaries operated as independent entities.

Investments in subsidiaries are accounted for by the respective parent company using the equity method for purposes of this presentation. Results of operations of subsidiaries are therefore reflected in the parent company's investment accounts and earnings. The principal elimination entries set forth below eliminate investments in subsidiaries and intercompany balances and transactions. Typically in a condensed consolidating financial statement, the net income and equity of the parent company equals the net income and equity of the consolidated entity. The Company's oil and gas properties are accounted for using the full cost method of accounting whereby impairments and DD&A are calculated and recorded on a country by country basis. However, when calculated separately on a legal entity basis, the combined totals of parent company and subsidiary impairments and DD&A can be more or less than the consolidated total as a result of differences in the properties each entity owns including amounts of costs incurred, production rates, reserve mix, future development costs, etc. Accordingly, elimination entries are required to eliminate any differences between consolidated and parent company and subsidiary company combined impairments and DD&A.

11. Subsequent Events

On October 7, 2014, a fifth amendment to the credit agreement governing the revolving credit facility (the “Fifth Amendment”) was executed. The Fifth Amendment (i) permitted the Company to increase or decrease the aggregate principal amount of the commitments of the lenders under the credit agreement governing the revolving credit facility provided that the aggregate commitments do not exceed the then existing borrowing base, (ii) increased the letter of credit facility from \$15.0 million to \$30.0 million, (iii) established an approved borrowing base of \$675.0 million until the next redetermination and (iv) amended the availability of issuances of additional senior notes. As a result of the Fall 2014 borrowing base redetermination, effective October 7, 2014, the borrowing base was increased to \$675.0 million from \$570.0 million. However, the Company voluntarily elected to limit the lenders’ aggregate commitment to \$585.0 million. Prior to giving effect to the amendment, the revolving credit facility provided availability for issuances of additional senior notes in the aggregate principal amount of up to \$350.0 million. The amendment replaced this limitation to permit unlimited issuances of additional senior notes as long as, subject to certain other conditions described therein, after giving effect to the issuance of the additional senior notes, the Company is in compliance with our financial covenants under the credit agreement governing our revolving credit facility.

On October 24, 2014, the Company completed the acquisition of oil and gas properties from Eagle Ford Minerals, LLC (“EFM”) primarily in LaSalle, Atascosa and McMullen Counties, Texas in the Eagle Ford Shale (the “Eagle Ford Shale Transaction”). The transaction had an effective date of October 1, 2014, with an adjusted purchase price of \$243.0 million, which represents an agreed upon price of \$250.0 million less working capital adjustments. The Company paid approximately \$93.0 million at closing, which was funded from borrowings under the revolving credit facility that were repaid with net proceeds from the senior note offering discussed below. The Company is required to pay the remaining \$150.0 million no later than February 16, 2015, which will be funded with borrowings under the revolving credit facility. Prior to the acquisition, the Company and EFM were joint working interest owners in the properties that were subject to the transaction, for which the Company acted as the operator and owned an approximate 75% working interest in nearly all of such properties. After giving effect to the transaction, the Company holds an approximate 100% working interest in nearly all of the acquired properties.

In conjunction with the Eagle Ford Shale Transaction described above, the borrowing base was increased to \$800.0 million from \$675.0 million. However, the Company voluntarily elected to limit the lenders’ aggregate commitment to \$685.0 million. The lenders’ aggregate commitment can be increased at any time to the full \$800.0 million by requesting one or more lenders to approve an increase to their commitment. The borrowing base will be redetermined by the lenders at least semi-annually on or around each May 1 and November 1, with the next redetermination expected in the Spring of 2015. The amount the Company is able to borrow with respect to the borrowing base is subject to compliance with the financial covenants and other provisions of the credit agreement governing the revolving credit facility.

On October 30, 2014, the Company issued \$300.0 million aggregate principal amount of 7.50% Senior Notes due 2020 at a price to the initial purchasers of 100.50% of par in a private placement. These notes have substantially identical terms, other than with respect to certain transfer restrictions and registration rights, to the Company’s existing 7.50% Senior Notes due 2020 that were issued on September 10, 2012, although the new 7.50% Senior Notes were issued as a separate series of securities. The Company intends to use the net proceeds of approximately \$299.8 million, net of offering costs, to fund the Eagle Ford Shale Transaction as described above, repay amounts outstanding under its revolving credit facility and for general corporate purposes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's discussion and analysis of the significant factors that affected the Company's financial position and results of operations during the periods included in the accompanying unaudited consolidated financial statements. You should read this in conjunction with the discussion under "Item 7A. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2013, and the unaudited consolidated financial statements included in this quarterly report.

General Overview

For the third quarter of 2014, we recognized total revenues of \$196.2 million and production of 3.1 MMBoe. The key drivers to our success for the three months ended September 30, 2014 included the following:

Drilling. See the table below for details of our operated drilling and completion activity in our primary areas of activity:

	Three Months Ended September 30, 2014				As of September 30, 2014				
	Drilled		Wells Brought on Production		Waiting on Completion		Producing		Rig count
Region	Gross	Net	Gross	Net	Gross	Net	Gross	Net	
Eagle Ford	15	13.1	20	15.8	16	13.0	182	142.0	3
Niobrara	9	3.5	7	3.3	4	1.3	107	44.2	1
Marcellus	—	—	—	—	11	4.4	81	26.0	—
Utica	—	—	—	—	—	—	1	0.9	1
Total	24	16.6	27	19.1	31	18.7	371	213.1	5

Production. Our third quarter 2014 crude oil production of 1.8 MMBbls, or 20,000 Bbls/d, increased 64% from our third quarter 2013 production of 1.1 MMBbls, or 12,228 Bbls/d, primarily due to production from new wells in the Eagle Ford. Our third quarter 2014 natural gas production of 5.9 Bcf, or 63,630 Mcf/d, decreased 32% from our third quarter 2013 production of 8.6 Bcf, or 93,511 Mcf/d. This was primarily due to the sale of our remaining oil and gas properties in the Barnett to EnerVest Energy Institution Fund XIII-A, L.P., EnerVest Energy Institutional Fund XIII-WIB, L.P., EnerVest Energy Institutional Fund XIII-WIC, L.P., and EV Properties, L.P. (collectively, "EnerVest") in October 2013 partially offset by production from new wells in Marcellus.

Prices. Our average realized crude oil price during the third quarter of 2014 was \$94.17 per Bbl, a 10% decrease as compared to our average realized price of \$104.71 per Bbl in the same period in 2013. Our average realized natural gas price during the third quarter of 2014 increased 9% to \$2.59 per Mcf from \$2.38 per Mcf in the same period in 2013. Commodity prices are affected by changes in market demand, overall economic activity, weather, pipeline capacity constraints, inventory storage levels, basis differentials and other factors. Our financial results are largely dependent on commodity prices, which are beyond our control and have been and are expected to remain volatile.

Recent Developments

The Eagle Ford Shale Transaction. On October 24, 2014, we completed the acquisition of additional leasehold and producing interests in the Eagle Ford Shale (the "Eagle Ford Shale Transaction") from Eagle Ford Minerals, LLC ("EFM"). The properties acquired in the Eagle Ford Shale Transaction include approximately 6,820 net acres and 20.1 net producing wells located primarily in LaSalle, Atascosa and McMullen Counties, Texas. We estimate that net production from the acquired interests in the properties was approximately 2,260 Bbls/d and 2,457 Mcfe/d for the three months ended September 30, 2014.

Prior to the acquisition, we and EFM were joint working interest owners in the properties that were the subject of the transaction, for which we acted as the operator and owned a 75% working interest in nearly all of such properties. After giving effect to the transaction, we hold an approximate 100% working interest in all of the acquired properties. The transaction had an effective date of October 1, 2014, with a purchase price of \$243.0 million in cash, net of working capital adjustments, of which we paid EFM approximately \$93.0 million on October 24, 2014 and are required to pay the remaining \$150.0 million no later than February 16, 2015. The agreement provides for post-closing purchase price adjustments and indemnities.

We intend to use the net proceeds from the offering described below to fund the Eagle Ford Shale Transaction purchase price of \$243.0 million, net of working capital adjustments, and for general corporate purposes. \$93.0 million of the Eagle Ford Shale Transaction purchase price was paid at the closing of such transaction, and was funded from borrowings under our revolving credit facility that were repaid with net proceeds from the senior notes offering described below. The remaining \$150.0 million will be paid on a deferred basis no later than February 16, 2015 with borrowings under the revolving credit facility. Until net proceeds

-21-

are used to pay the deferred portion of the Eagle Ford Shale Transaction purchase price, net proceeds of such offering will be used to repay amounts outstanding under our revolving credit facility.

Senior Notes Offering. On October 30, 2014, we completed a private placement of \$300.0 million aggregate principal amount of 7.50% Senior Notes due 2020 at a price equal to 100.50% of par, plus accrued interest from September 15, 2014. The use of net proceeds of \$299.8 million is described above under “The Eagle Ford Shale Transaction.” The new 7.50% Senior Notes have substantially identical terms, other than with respect to transfer restrictions and registration rights, as our original 7.50% Senior Notes due 2020 that were issued on September 10, 2012 (the “Original 7.50% Senior Notes”), although the new 7.50% Senior Notes were issued as a separate series of securities.

The 7.50% Senior Notes bear interest at a rate of 7.50% per annum and will mature on September 15, 2020. We may redeem all or a portion of the 7.50% Senior Notes at any time on or after September 15, 2016 at varying redemption prices. Before September 15, 2016, we may, at our option, redeem all or a portion of the notes at 100% of the principal amount plus a make-whole premium. In addition, prior to September 15, 2015, we may, at our option, redeem up to 35% of the aggregate principal amount of the 7.50% Senior Notes with the proceeds of certain equity offerings at a specified redemption price. Holders of the 7.50% Senior Notes may require us to repurchase some or all of their 7.50% Senior Notes for cash in the event of certain fundamental changes, at 101% of the amount plus accrued and unpaid interest.

Edgar Filing: CARRIZO OIL & GAS INC - Form 10-Q

Results of Operations

Three Months Ended September 30, 2014, Compared to the Three Months Ended September 30, 2013

The following table summarizes total production volumes, daily production volumes, average realized prices and revenues for the three months ended September 30, 2014 and 2013:

	Three Months Ended September 30,		2014 Period Compared to 2013 Period		
	2014	2013	Increase (Decrease)	% Increase (Decrease)	
Total production volumes -					
Crude oil (MBbls)	1,840	1,125	715	64	%
NGLs (MBbls)	274	202	72	36	%
Natural gas (MMcf)	5,854	8,603	(2,749)	(32)	%
Total Natural gas and NGLs (MMcfe)	7,498	9,815	(2,317)	(24)	%
Total barrels of oil equivalent (MBoe)	3,090	2,761	329	12	%
Daily production volumes by product -					
Crude oil (Bbls/d)	20,000	12,228	7,772	64	%
NGLs (Bbls/d)	2,978	2,196	782	36	%
Natural gas (Mcf/d)	63,630	93,511	(29,881)	(32)	%
Total Natural gas and NGLs (Mcfe/d)	81,500	106,685	(25,185)	(24)	%
Total barrels of oil equivalent (Boe/d)	33,587	30,011	3,576	12	%
Daily production volumes by region (Boe/d) -					
Eagle Ford	23,153	13,960	9,193	66	%
Niobrara	2,790	2,061	729	35	%
Barnett	—	7,609	(7,609)	(100)	%
Marcellus	7,348	6,069	1,279	21	%
Utica and other	296	312	(16)	(5)	%
Total barrels of oil equivalent (Boe/d)	33,587	30,011	3,576	12	%
Average realized prices -					
Crude oil (\$ per Bbl)	\$94.17	\$104.71	(\$10.54)	(10)	%
NGLs (\$ per Bbl)	28.46	29.83	(1.37)	(5)	%
Natural gas (\$ per Mcf)	2.59	2.38	0.21	9	%
Total Natural gas and NGLs (\$ per Mcfe)	\$3.06	\$2.70	\$0.36	13	%
Total average realized price (\$ per Boe)	\$63.50	\$52.27	\$11.23	21	%
Revenues (In thousands) -					
Crude oil	\$173,277	\$117,797	\$55,480	47	%
NGLs	7,798	6,025	1,773	29	%
Natural gas	15,150	20,507	(5,357)	(26)	%
Total revenues	\$196,225	\$144,329	\$51,896	36	%

Revenues for the three months ended September 30, 2014 increased 36% to \$196.2 million from \$144.3 million for the same period in 2013 primarily due to the significant increase in oil production, partially offset by the decrease in oil prices. Production volumes for the three months ended September 30, 2014 and 2013 were 3.1 and 2.8 MMBoe, respectively. The increase in production from the third quarter of 2013 to the third quarter of 2014 was primarily due to increased production from new wells in the Eagle Ford, partially offset by normal production declines and the sale of Barnett to EnerVest in October 2013. Average realized oil prices decreased 10% to \$94.17 per Bbl in the third quarter of 2014 from \$104.71 per Bbl in the same period in 2013. Average realized natural gas prices increased 9% to \$2.59 per Mcf in the third quarter of 2014 from \$2.38 per Mcf in the same period in 2013. Average realized NGL

prices decreased 5% to \$28.46 per Bbl in the third quarter of 2014 from \$29.83 per Bbl in the same period in 2013.

-23-

Lease operating expenses for the three months ended September 30, 2014 increased to \$21.0 million (\$6.80 per Boe) from \$12.9 million (\$4.68 per Boe) for the same period in 2013. The increase in lease operating expenses is primarily due to increased operating costs associated with increased production from new wells in the Eagle Ford, partially offset by the sale of Barnett to EnerVest. The increase in lease operating expense per Boe is primarily due to the sale of lower operating cost per Boe gas properties in the Barnett as well as increased production from higher operating cost per Boe oil properties in the Eagle Ford.

Production taxes increased to \$8.4 million (4.3% of revenues) for the three months ended September 30, 2014 from \$5.6 million (3.9% of revenues) for the same period in 2013 as a result of increased oil production, primarily in the Eagle Ford. The increase in production taxes as a percentage of revenues was primarily due to increased oil production, which has a higher effective production tax rate as compared to natural gas production.

Ad valorem taxes increased slightly to \$2.2 million for the three months ended September 30, 2014 as compared to \$2.1 million for the same period in 2013. The increase in ad valorem taxes is due to new wells drilled in Eagle Ford in 2013, partially offset by the sale of Barnett to EnerVest.

Depreciation, depletion and amortization ("DD&A") expense for the third quarter of 2014 increased to \$83.6 million (\$27.05 per Boe) from \$55.4 million (\$20.05 per Boe) in the third quarter of 2013. The increase in DD&A is attributable to both the increase in production and an increase in the DD&A rate per Boe. The increase in the DD&A rate per Boe is largely due to the impact of the significant decrease in natural gas reserves in the Barnett as a result of the sale to EnerVest as well as the increase in crude oil reserves, primarily in the Eagle Ford, which have a higher finding cost per Boe than our natural gas reserves. The components of our DD&A expense were as follows:

	Three Months Ended	
	September 30,	
	2014	2013
	(In thousands)	
DD&A of proved oil and gas properties	\$82,645	\$54,541
Depreciation of other property and equipment	433	442
Amortization of other assets	293	251
Accretion of asset retirement obligations	201	128
Total DD&A	\$83,572	\$55,362

General and administrative expense decreased to \$9.5 million for the three months ended September 30, 2014 from \$19.7 million for the corresponding period in 2013. The decrease was primarily due to decreased stock-based compensation expense associated with SARs as a result of a decrease in stock price during the three months ended September 30, 2014 as compared to an increase in stock price during the corresponding period in 2013, partially offset by an increase in stock-based compensation expense associated with a higher level of restricted stock outstanding during third quarter of 2014 as compared to the same period of 2013.

The gain on derivative instruments, net for the three months ended September 30, 2014 amounted to \$71.8 million primarily due to the downward shift in the futures curve of forecasted commodity prices for crude oil and natural gas from July 1, 2014 (or the subsequent date on which new contracts were entered into) to September 30, 2014. The loss on derivative instruments, net for the three months ended September 30, 2013 amounted to \$27.7 million primarily due to the upward shift in the futures curve of forecasted commodity prices for crude oil from July 1, 2013 (or the subsequent date on which prior year contracts were entered into) to September 30, 2013.

Interest expense, net for the three months ended September 30, 2014 was \$12.2 million as compared to \$13.4 million for the same period in 2013. The decrease in interest expense, net was primarily due to an increase in the amount of interest that was capitalized due to a higher average balance of unproved properties.

The effective income tax rate for the third quarter of 2014 and 2013 was 36.4% and 24.6%, respectively. The rate for third quarter 2014 is higher than the U. S. federal statutory rate of 35% primarily due to the impact of state income tax, while the rate for the third quarter of 2013 is lower than the U. S. federal statutory rate of 35% due to a change in estimate for state income tax.

Edgar Filing: CARRIZO OIL & GAS INC - Form 10-Q

Nine Months Ended September 30, 2014, Compared to the Nine Months Ended September 30, 2013

The following table summarizes total production volumes, daily production volumes, average realized prices and revenues for the nine months ended September 30, 2014 and 2013:

	Nine Months Ended September 30,		2014 Period Compared to 2013 Period

Marcellus	8,222	6,016	2,206	37	%
Utica and other	700	326	374	115	%
Total barrels of oil equivalent (Boe/d)	31,172	28,278	2,894	10	%
Average realized prices -					
Crude oil (\$ per Bbl)	\$96.43	\$102.60	(\$6.17)	(6)	%
NGLs (\$ per Bbl)	30.35	28.26	2.09	7	%
Natural gas (\$ per Mcf)	3.21	2.64	0.57	22	%
Total Natural gas and NGLs (\$ per Mcfe)	\$3.54	\$2.82	\$0.72	26	%
Total average realized price (\$ per Boe)	\$64.27	\$50.58	\$13.69	27	%
Revenues (In thousands) -					
Crude oil	\$469,601	\$311,084	\$158,517	51	%
NGLs	19,669	11,532	8,137	71	%
Natural gas	57,642	67,838	(10,196)	(15)	%
Total revenues	\$546,912	\$390,454	\$156,458	40	%

Revenues for the nine months ended September 30, 2014 increased 40% to \$546.9 million from \$390.5 million for the same period in 2013 primarily due to the increase in oil production, partially offset by the decrease in gas production and oil prices. Production volumes for the nine months ended September 30, 2014 and 2013 were 8.5 MMBoe and 7.7 MMBoe, respectively. The increase in production from the nine months ended September 30, 2013 to the nine months ended September 30, 2014 was primarily due to increased production from new wells in the Eagle Ford and Marcellus, partially offset by normal production declines and the sale of Barnett to EnerVest. Average realized oil prices decreased 6% to \$96.43 per barrel from \$102.60 per barrel in the same period in 2013. Average realized gas prices increased 22% to \$3.21 per Mcf for the nine months ended September 30, 2014 from \$2.64 per Mcf in the same period in 2013. Average realized NGL prices increased 7% to \$30.35 per Bbl for the nine months ended September

30, 2014 from \$28.26 per Bbl in the same period in 2013.

Lease operating expenses were \$51.0 million (\$5.99 per Boe) for the nine months ended September 30, 2014 as compared to lease operating expenses of \$34.9 million (\$4.52 per Boe) for the same period in 2013. The \$16.1 million increase in lease operating expenses is primarily due to increased operating costs associated with increased production from new wells in the Eagle

-25-

Ford, partially offset by the sale of Barnett to EnerVest. The increase in lease operating expense per Boe is primarily due to the sale of lower operating cost per Boe gas properties in the Barnett as well as increased production from higher operating cost per Boe oil properties in the Eagle Ford.

Production taxes were \$22.7 million (or 4.1% of revenues) for the nine months ended September 30, 2014 as compared to \$14.7 million (or 3.8% of revenues) for the same period in 2013. The increase in production taxes is due primarily to increased oil production, primarily in the Eagle Ford, partially offset by the sale of Barnett to EnerVest. The increase in production taxes as a percentage of revenues was primarily due to increased oil production, which has a higher effective production tax rate as compared to natural gas production.

Ad valorem taxes decreased to \$5.6 million for the nine months ended September 30, 2014 from \$6.8 million for the same period in 2013. The decrease in ad valorem taxes is due primarily to lower actual ad valorem taxes than previously estimated for the year ended December 31, 2013 and the sale of Barnett to EnerVest, partially offset by an increase in ad valorem taxes for new wells drilled in Eagle Ford in 2013.

DD&A expense for the nine months ended September 30, 2014 increased \$77.3 million to \$228.9 million (\$26.90 per Boe) from the DD&A expense for the nine months ended September 30, 2013 of \$151.6 million (\$19.64 per Boe). The increase in DD&A is attributable to both the increase in production and an increase in the DD&A rate per Boe. The increase in the DD&A rate per Boe is largely due to the impact of the significant decrease in natural gas reserves in the Barnett as a result of the sale to EnerVest as well as the increase in crude oil reserves, primarily in the Eagle Ford, which have a higher finding cost per Boe than our natural gas reserves. The components of our DD&A expense were as follows:

	Nine Months Ended September 30, 2014 2013 (In thousands)	
DD&A of proved oil and gas properties	\$226,217	\$149,294
Depreciation of other property and equipment	1,309	1,249
Amortization of other assets	894	689
Accretion of asset retirement obligations	492	355
Total DD&A	\$228,912	\$151,587

General and administrative expense increased to \$65.5 million for the nine months ended September 30, 2014 from \$53.7 million for the corresponding period in 2013. The increase was primarily due an increase in stock-based compensation expense as a result of a higher level of restricted stock outstanding during the nine months ended September 30, 2014 as compared to same period in 2013 as well as an increase in personnel for 2014 as compared to 2013.

The gain on derivative instruments, net for the nine months ended September 30, 2014 amounted to \$11.2 million primarily due to new hedge additions during 2014 and the significant downward shift in the futures curve of forecasted commodity prices for crude oil and natural gas from July 1, 2014 (or the subsequent date prior year contracts were entered into) to September 30, 2014, partially offset by the upward shift in the commodity prices for crude oil from January 1, 2014 to June 30, 2014. The loss on derivative instruments, net for the nine months ended September 30, 2013 amounted to \$16.5 million primarily due to the upward shift in the futures curve of forecasted commodity prices for crude oil from January 1, 2013 (or the subsequent date prior year contracts were entered into) to September 30, 2013.

Interest expense, net for the nine months ended September 30, 2014 was \$36.6 million as compared to \$42.4 million for the same period in 2013. The decrease in interest expense was primarily due to the repurchase of the 4.375% convertible senior notes in June 2013 as well as an increase in the amount of interest that was capitalized due to a higher average balance of unproved properties.

The effective income tax rates for the nine months ended September 30, 2014 and 2013 were 36.6% and 37.0%, respectively. These rates are higher than the U.S. federal statutory corporate income tax rate of 35% primarily due to the impact of state income taxes.

Liquidity and Capital Resources

2014 Capital Expenditure Plan and Funding Strategy. Our 2014 drilling and completion capital expenditure plan is \$690.0 million to \$710.0 million (excluding the recent Eagle Ford Shale Transaction). Our 2014 leasehold and seismic capital expenditure plan is \$150.0 million. We expect to allocate the majority of the leasehold and seismic capital to acreage acquisitions in the Eagle Ford and Utica shales. We currently intend to finance the remainder of our 2014 capital expenditure plan primarily from the sources described below under “—Sources and Uses of Cash.” Our capital program could vary depending upon various factors, including the availability and cost of drilling rigs, land and industry partner issues, our available cash flow and financing, success of drilling programs, weather delays, commodity prices, market conditions, the acquisition of leases with drilling commitments and other factors. Below is a summary of capital expenditures through September 30, 2014:

	Three Months Ended			Nine Months Ended
	March 31, 2014	June 30, 2014	September 30, 2014	September 30, 2014
	(In thousands)			
Drilling and completion				
Eagle Ford	\$128,870	\$154,350	\$118,353	\$401,573
Niobrara	24,204	29,726	27,430	81,360
Utica	2,238	4,396	10,094	16,728
Marcellus	13,736	9,931	(2,418) 21,249
Other	1,649	(289) 6,274	7,634
Total drilling and completion	170,697	198,114	159,733	528,544
Leasehold and seismic	27,268	73,406	22,973	123,647
Total	\$197,965	\$271,520	\$182,706	\$652,191

Our capital expenditure plan and the capital expenditures included above exclude capitalized general and administrative expense, capitalized interest and asset retirement obligations.

Sources and Uses of Cash. Our primary use of cash is capital expenditures related to our drilling and completion programs and, to a lesser extent, our leasehold and seismic data acquisition programs. For the nine months ended September 30, 2014, we funded our capital expenditures with cash provided by operations, cash on hand, and borrowings under our revolving credit facility. Potential sources of future liquidity include the following:

- Cash provided by operations. Cash flows from operations are highly dependent on commodity prices. As such, we hedge a portion of our forecasted production to mitigate the risk of a decline in oil and gas prices.

Borrowings under our revolving credit facility. At October 31, 2014, we had no borrowings outstanding and \$0.6 million in letters of credit outstanding under the revolving credit facility, which reduce the amounts available under our revolving credit facility. The amount we are able to borrow with respect to the borrowing base of the revolving credit facility is subject to compliance with the financial covenants and other provisions of the credit agreement governing our revolving credit facility. As a result of the Fall 2014 borrowing base redetermination and in conjunction with the acquisition of additional leasehold and producing interests in the Eagle Ford Shale Transaction, the borrowing base was increased to \$800.0 million. However, we voluntarily elected to limit the lenders’ aggregate commitment to \$685.0 million. The lenders’ aggregate commitment can be increased at any time to the full \$800.0 million by requesting one or more lenders to approve an increase to their commitment.

Asset sales. In order to fund our capital expenditure plan, we may consider the sale of certain properties or assets that are not part of our core business or are no longer deemed essential to our future growth, provided we are able to sell such assets on terms that are acceptable to us.

Securities offerings. As situations or conditions arise, we may choose to issue debt, equity or other instruments to supplement our cash flows, including the recent issuance of \$300.0 million aggregate principal amount of 7.50% Senior Notes due 2020. However, we may not be able to obtain such financing on terms that are acceptable to us, or at all.

Joint ventures. Joint ventures with third parties through which such third parties fund a portion of our exploration activities to earn an interest in our exploration acreage or purchase a portion of interests, or both.

•

Lease purchase option arrangements. Lease option agreements and land banking arrangements, such as those we have previously entered into in other plays.

• Other sources. We may consider sale/leaseback transactions of certain capital assets, such as our remaining pipelines and compressors, which are not part of our core oil and gas exploration and production business.

-27-

Overview of Cash Flow Activities. Net cash provided by operating activities from continuing operations was \$388.7 million and \$310.3 million for the nine months ended September 30, 2014 and 2013, respectively. The change was primarily due to increased crude oil revenues, offset by increases in operating expenses, net cash paid/received for derivative settlements, and the net change in working capital related to operating activities.

Net cash used in investing activities from continuing operations were \$654.2 million and \$503.4 million for the nine months ended September 30, 2014 and 2013, respectively and relate primarily to oil and gas capital expenditures associated with our capital expenditure plan.

Net cash provided by financing activities from continuing operations were \$123.2 million and \$17.4 million for the nine months ended September 30, 2014 and 2013, respectively. The increase was primarily due to increased net borrowings in 2014 as compared to 2013, consisting of increased borrowings under our revolving credit facility, as well as the repurchase of the 4.375% convertible senior notes in the second quarter of 2013.

Liquidity and Cash Flow Outlook

Economic downturns may adversely affect our ability to access capital markets in the future. We currently believe that cash provided by operating activities and borrowings under our revolving credit facility will be sufficient to fund our immediate cash flow requirements. Cash provided by operating activities is primarily driven by production and commodity prices. To manage our exposure to commodity price risk and to provide a level of certainty in the cash flows to support our drilling and completion capital expenditure program, we hedge a portion of our forecasted production and, as of September 30, 2014, our hedge positions for the remainder of 2014 comprised 54,380 MMBtu/d of natural gas and 15,000 Bbls/d of crude oil. As of October 31, 2014, our borrowing base under our revolving credit facility is \$800.0 million, which was increased from \$675.0 million in connection with the Eagle Ford Shale Transaction. In connection with such borrowing base increase, we elected to limit the aggregate principal amount of the commitments of the lenders under the credit agreement governing our revolving credit facility to \$685.0 million. As of October 31, 2014, we had no borrowings outstanding under our revolving credit facility. Additionally, as described under “—Sources and Uses of Cash” above, the amount we are able to borrow with respect to the borrowing base is subject to compliance with the financial covenants and other provisions of the credit agreement governing the revolving credit facility. The borrowing base under our revolving credit facility is affected by our lenders’ assumptions with respect to future oil and gas prices. Our borrowing base may decrease if our lenders reduce their expectations with respect to future oil and gas prices from those assumptions used to determine our existing borrowing base. The next borrowing base redetermination is expected to occur in the Spring of 2015.

If cash provided by operating activities from continuing operations, borrowings under our revolving credit facility and the other sources of cash described under “—Sources and Uses of Cash” are insufficient to fund the remainder of our 2014 capital expenditure plan, we may need to reduce our capital expenditure plan or seek other financing alternatives. We may not be able to obtain financing needed in the future on terms that would be acceptable to us, or at all. If we cannot obtain adequate financing, we may be required to limit or defer a portion of our remaining 2014 capital expenditure plan, thereby adversely affecting the recoverability and ultimate value of our oil and gas properties. Subject in each case to then existing market conditions and to our then expected liquidity needs, among other factors, we may use a portion of our cash flows from operations, proceeds from asset sales, securities offerings or borrowings to reduce debt prior to scheduled maturities through debt repurchases, either in the open market or in privately negotiated transactions, through debt redemptions or tender offers, or through repayments of bank borrowings.

Contractual Obligations

The following table sets forth estimates of our contractual obligations as of September 30, 2014 (in thousands):

	October-December 2014	2015	2016	2017	2018	2019 and Thereafter	Total
Long-term debt (1)	\$—	\$—	\$—	\$—	\$719,000	\$304,425	\$1,023,425
Interest on long-term debt (2)	26,521	76,835	76,835	76,835	75,659	46,823	379,508
Operating leases	447	3,774	3,752	3,881	3,974	14,242	30,070
Drilling and completion services (3)	12,311	34,936	21,277	20,057	3,864	—	92,445
Pipeline volume commitments (3)	1,409	7,435	3,432	1,565	1,565	9,733	25,139
Asset retirement obligations and other (4)	2,099	9,026	6,806	2,870	803	10,059	31,663
Total Contractual Obligations	\$42,787	\$132,006	\$112,102	\$105,208	\$804,865	\$385,282	\$1,582,250

Long-term debt consists of the principal amounts of the 8.625% Senior Notes due 2018, the 7.50% Senior Notes (1) due 2020, other long-term debt due 2028 and \$119.0 million of borrowings outstanding as of September 30, 2014 under our revolving credit facility which matures in 2018.

Cash payments for interest on the 8.625% Senior Notes due 2018, the 7.50% Senior Notes due 2020, other long-term debt due 2028 and our revolving credit facility which matures in 2018 are estimated assuming no (2) principal repayments until the due dates of the instruments. Cash interest payments on our revolving credit facility were calculated using the weighted average interest rate of the outstanding borrowings under the revolving credit facility as of September 30, 2014 of 2.01%.

Drilling and completion services and pipeline volume commitments represent gross contractual obligations and (3) accordingly, other joint owners in the properties operated by the Company will generally be billed for their working interest share of such costs.

Asset retirement obligations and other are based on estimates and assumptions that affect the reported amounts as of September 30, 2014. Certain of such estimates and assumptions are inherently unpredictable and will differ from (4) actuals results. See “Note 2. Summary of Significant Accounting Policies - Use of Estimates” for further discussion of estimates and assumptions that may affect the reported amounts.

Financing Arrangements

7.50% Senior Notes

As described under “—Recent Developments”, on October 30, 2014, we completed an offering of \$300.0 million aggregate principal amount of 7.50% Senior Notes due 2020 at a price equal to 100.50% of par, plus accrued interest from September 15, 2014.

8.625% Senior Notes

As of September 30, 2014, we had \$600.0 million aggregate principal amount of 8.625% Senior Notes due 2018 issued and outstanding. The 8.625% Senior Notes are guaranteed by all of our existing Material Domestic Subsidiaries (as defined in the credit agreement governing our revolving credit facility). The 8.625% Senior Notes mature on October 15, 2018, with interest payable semi-annually. Since October 15, 2014, we had the right to redeem all or a portion of our 8.625% Senior Notes at redemption prices decreasing from 104.313% to 100% of the principal amount on October 15, 2017, plus accrued and unpaid interest. We could seek to refinance the 8.625% Senior Notes in connection with such a redemption or a repurchase of notes.

Senior Secured Revolving Credit Facility

We are party to a senior secured revolving credit facility with Wells Fargo Bank, National Association as the administrative agent. The revolving credit facility is secured by substantially all of our U.S. assets and is guaranteed by all of our existing Material Domestic Subsidiaries (as defined in the credit agreement governing the revolving credit facility). Any subsidiary of ours that does not currently guarantee our obligations under our revolving credit

facility that subsequently becomes a Material Domestic Subsidiary will be required to guarantee our obligations under our revolving credit facility.

On October 7, 2014, a fifth amendment to the credit agreement governing our revolving credit facility (the “Fifth Amendment”) was executed. The Fifth Amendment (i) permitted us to increase or decrease the aggregate principal amount of the commitments of the lenders under the credit agreement governing the revolving credit facility provided that the aggregate commitments do not exceed the then existing borrowing base, (ii) increased the letter of credit sublimit under such facility from \$15.0 million to \$30.0 million, (iii) established an approved borrowing base of \$675.0 million until the next redetermination and (iv) amended the availability of issuances of additional senior notes. As a result of the Fall 2014 borrowing base redetermination, effective October 7, 2014, the borrowing base was increased to \$675.0 million from \$570.0 million. Prior to giving effect to the amendment, the senior secured revolving credit facility provided availability for issuances of additional senior notes in the aggregate principal amount of up to \$350.0 million. The amendment replaced this limitation to permit unlimited issuances of additional senior notes

as long as, subject to certain other conditions described therein, after giving effect to the issuance of the additional senior notes, we are in compliance with our financial covenants under the credit agreement governing our revolving credit facility.

In conjunction with the Eagle Ford Shale Transaction completed on October 24, 2014, the borrowing base was increased to \$800.0 million from \$675.0 million. However, we voluntarily elected to limit the lenders' aggregate commitment to \$685.0 million. The lenders' aggregate commitment can be increased at any time to the full \$800.0 million by requesting one or more lenders to approve an increase to their commitment. The borrowing base will be redetermined by the lenders at least semi-annually on or around each May 1 and November 1, with the next redetermination expected in Spring 2015. The amount we are able to borrow with respect to the borrowing base is subject to compliance with the financial covenants and other provisions of the credit agreement governing the revolving credit facility.

We are subject to certain covenants under the terms of the revolving credit facility, as amended, which include, but are not limited to, the maintenance of the following financial covenants determined as of the last day of each quarter: (1) a ratio Total Debt to EBITDA of not more than 4.00 to 1.00 and (2) a Current Ratio of not less than 1.00 to 1.00 (each of the capitalized terms used in the foregoing clauses (1) and (2) being as defined in the credit agreement governing the revolving credit facility). As of September 30, 2014, the ratio of Total Debt to EBITDA was 2.02 to 1.00 and the Current Ratio was 1.68 to 1.00. As defined in the credit agreement governing the revolving credit facility, Total Debt is net of cash and cash equivalents and the Current Ratio includes an add back of the available borrowing capacity. Our revolving credit facility also places restrictions on us and certain of our subsidiaries with respect to additional indebtedness, liens, dividends and other payments to shareholders, repurchases or redemptions of our common stock, redemptions of senior notes, investments, acquisitions, mergers, asset dispositions, transactions with affiliates, hedging transactions and other matters.

Our revolving credit facility is subject to customary events of default, including a change in control (as defined in the credit agreement governing our revolving credit facility). If an event of default occurs and is continuing, the Majority Lenders (as defined in the credit agreement governing our revolving credit facility) may accelerate amounts due under the revolving credit facility (except for a bankruptcy event of default, in which case such amounts will automatically become due and payable).

As of September 30, 2014, we had \$119.0 million of borrowings outstanding under the revolving credit facility and had \$0.6 million in letters of credit outstanding which reduced the amounts available under the revolving credit facility. The amount we are able to borrow with respect to the borrowing base is subject to compliance with the financial covenants and other provisions of the credit agreement governing the revolving credit facility. The revolving credit facility is generally used to fund ongoing working capital needs and the remainder of our capital expenditure plan to the extent such amounts exceed the cash flows from operations and proceeds from asset sales and securities offerings.

Critical Accounting Policies

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods reported. Certain of such estimates are inherently unpredictable and will differ from actual results. We have identified the following critical accounting policies and estimates used in the preparation of our financial statements: use of estimates, oil and gas properties, oil and gas reserve estimates, derivative instruments, income taxes and commitments and contingencies. These policies and estimates are described in our Annual Report on Form 10-K for the year ended December 31, 2013. We evaluate subsequent events through the date the financial statements are issued.

The table below presents results of the full cost ceiling test as of September 30, 2014 along with various pricing scenarios to demonstrate the sensitivity of our cost center ceiling to changes in 12 month average benchmark oil and gas prices underlying our average realized prices. Prices do not include the impact of crude oil and natural gas derivative instruments. This sensitivity analysis is as of September 30, 2014, and, accordingly, does not consider drilling results, production and prices subsequent to September 30, 2014 that may require revisions to our proved reserve estimates.

Full Cost Pool Scenarios	12 Month Average Realized Prices		Excess of cost center ceiling over net capitalized costs	Increase (Decrease) in excess of cost center ceiling over net capitalized costs
	Crude Oil (\$/Bbl)	Natural Gas (\$/Mcf)	(In millions)	(In millions)
September 30, 2014 Actual	\$96.80	\$3.31	\$520	
Oil and Gas Price Sensitivity				
Oil and Gas +10%	\$106.70	\$3.74	\$797	\$277
Oil and Gas -10%	\$86.90	\$2.88	\$243	(\$277)
Oil Price Sensitivity				
Oil +10%	\$106.70	\$3.31	\$769	\$249
Oil -10%	\$86.90	\$3.31	\$271	(\$249)
Gas Price Sensitivity				
Gas +10%	\$96.80	\$3.74	\$548	\$28
Gas -10%	\$96.80	\$2.88	\$492	(\$28)

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606), which supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, and industry specific guidance in Subtopic 932-605, Extractive Activities- Oil and Gas- Revenue Recognition. This ASU requires entities to recognize revenue in a way that depicts the transfer of promised goods or services to customers in an amount that reflects the consideration the entity expects to be entitled to in exchange for those goods and services. This ASU is effective for annual and interim periods beginning in 2017, and is required to be adopted either retrospectively or as an accumulative-effect adjustment as of the date of adoption, with no early adoption permitted. We are currently evaluating the impact of the adoption of this ASU on our consolidated financial statements.

Volatility of Oil and Gas Prices

Our revenues, future rate of growth, results of operations, financial position and ability to borrow funds or obtain additional capital are substantially dependent upon prevailing prices of oil and gas.

We review the carrying value of our oil and gas properties on a quarterly basis using the full cost method of accounting. See “Summary of Critical Accounting Policies—Oil and Gas Properties,” in our Annual Report on Form 10-K for the year ended December 31, 2013.

We use commodity derivative instruments, primarily fixed price swaps and costless collars, to reduce our exposure to commodity price volatility for a substantial, but varying, portion of our forecasted oil and gas production up to 36 months and thereby achieve a more predictable level of cash flows to support our drilling and completion capital expenditure program. Costless collars are designed to establish floor and ceiling prices on anticipated future oil and gas production. While the use of these derivative instruments limits the downside risk of adverse price movements, they may also limit future revenues from favorable price movements. We do not enter into derivative instruments for speculative or trading purposes.

We typically have numerous hedge positions that span several time periods and often result in both fair value asset and liability positions held with that counterparty, which positions are all offset to a single fair value asset or liability at the end of each reporting period. We net our derivative instrument fair value amounts executed with the same counterparty pursuant to ISDA master agreements, which provide for net settlement over the term of the contract and in the event of default or termination of the contract. The fair value of derivative instruments where we are in a net asset position with our counterparties as of September 30, 2014 and December 31, 2013 totaled \$36.0 million and \$9.3 million, respectively, and is summarized by counterparty in the table below:

Counterparty	September 30, 2014	December 31, 2013
Wells Fargo	41	% 23
Credit Suisse	23	% 46
Societe Generale	22	% 31
Regions	8	% —
Union Bank	4	% —
Royal Bank of Canada	2	% —
Total	100	% 100

The counterparties to our derivative instruments are lenders under our credit agreement. Because each of the lenders have investment grade credit ratings, we believe we have minimal credit risk and accordingly do not currently require our counterparties to post collateral to support the net asset positions of our derivative instruments. As such, we are exposed to credit risk to the extent of nonperformance by the counterparties to our derivative instruments. Although we do not currently anticipate such nonperformance, we continue to monitor the financial viability of our counterparties.

The fair value of derivative instruments where we are in a net liability position with our counterparties as of September 30, 2014 and December 31, 2013 totaled \$0.2 million and \$10.1 million, respectively.

For the three months ended September 30, 2014 and 2013, we recorded in the consolidated statements of income a gain on derivative instruments, net of \$71.8 million and a loss on derivative instruments, net of \$27.7 million, respectively. For the nine months ended September 30, 2014 and 2013, we recorded in the consolidated statements of income a gain on derivative instruments, net of \$11.2 million and a loss on derivative instruments, net of \$16.5 million, respectively.

The following sets forth a summary of our crude oil derivative positions at average NYMEX prices as of September 30, 2014:

Period	Type of Contract	Volumes (in Bbls/d)	Weighted Average Floor Price (\$/Bbl)	Weighted Average Ceiling Price (\$/Bbl)	Weighted Average Short Put Price (\$/Bbl)	Weighted Average Put Spread (\$/Bbl)
October - December 2014	Fixed Price Swaps	11,500	\$93.55			
	Costless Collars	3,000	\$88.33	\$104.26

Forward-Looking Statements

The statements contained in all parts of this document, including, but not limited to, those relating to the Company's or management's intentions, beliefs, expectations, hopes, projections, assessment of risks, estimations, plans or predictions for the future, including our schedule, targets, estimates or results of future drilling, including the number, timing and results of wells, budgeted wells, increases in wells, the timing and risk involved in drilling follow-up wells, timing and amounts of production, expected working or net revenue interests, planned expenditures, prospects budgeted and other future capital expenditures, risk profile of oil and gas exploration, capital expenditure plans, planned evaluation of prospects, probability of prospects having oil and gas, expected production or reserves, pipeline connections, increases in reserves, acreage, working capital requirements, commodity price risk management activities and the impact on our average realized prices, the availability of expected sources of liquidity to implement the Company's business strategies, accessibility of borrowings under our credit facility, debt repayments, redemptions or tender offers, future exploration activity, drilling, completion and fracturing of wells, land acquisitions, production rates, forecasted production, growth in production, development of new drilling programs, participation of our industry partners, exploration and development expenditures, the impact of our business strategies, the benefits, results, effects, availability of and results of new and existing joint ventures and sales transactions, receipt of receivables, proceeds from sales, use of proceeds and all and any other statements regarding future operations, financial results, business plans and cash needs and other statements regarding future operations, financial results, business plans and cash needs and other statements that are not historical facts are forward looking statements. When used in this document, the words "anticipate," "estimate," "expect," "may," "project," "plan," "believe" and similar expressions are intended to be among the statements that identify forward looking statements. Such statements involve risks and uncertainties, including, but not limited to, those relating to the worldwide economic downturn, availability of financing, our dependence on our exploratory drilling activities, the volatility of and changes in oil and gas prices, the need to replace reserves depleted by production, operating risks of oil and gas operations, our dependence on our key personnel, factors that affect our ability to manage our growth and achieve our business strategy, results, delays and uncertainties that may be encountered in drilling, development or production, interpretations and impact of oil and gas reserve estimation and disclosure requirements, actions and approvals of our partners and parties with whom we have alliances, technological changes, capital requirements, borrowing base determinations and availability under our credit facility, evaluations of the Company by lenders under our credit facility the potential impact of government regulations, including current and proposed legislation and regulations related to hydraulic fracturing, and natural gas drilling, air emissions and climate change, regulatory determinations, litigation, competition, the uncertainty of reserve information, property acquisition risks, availability of equipment, actions by our midstream and other industry partners, weather, availability of financing, market conditions, actions by lenders, our ability to obtain permits and licenses, the existence and resolution of title defects, new taxes and impact fees, delays, costs and difficulties relating to our joint ventures, actions by joint venture partners, results of exploration activities, the availability of and completion of land acquisitions, completion and connection of wells, and other factors detailed in the "Item 1A. Risk Factors" and other sections of our Annual Report on Form 10-K for the year ended December 31, 2013 and in our other filings with the SEC, including this quarterly report. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by reference to these risks and uncertainties. You should not place undue reliance on forward-looking statements. Each forward-looking statement speaks only as of the date of the particular statement and we undertake no obligation to update or revise any forward-looking statement.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For information regarding our exposure to certain market risks, see "Item 7A. Quantitative and Qualitative Disclosures about Market Risk" of our Annual Report on Form 10-K for the year ended December 31, 2013. There have been no material changes to the disclosure regarding our exposure to certain market risks made in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Our Chief Executive Officer and Chief Financial Officer performed an evaluation of our disclosure controls and procedures, which have been designed to provide reasonable

assurance that the information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. They concluded that the controls and procedures were effective as of September 30, 2014 to provide reasonable assurance that the information required to be disclosed by the Company in reports it files under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. While our disclosure controls and procedures provide reasonable assurance that the appropriate information will be available on a timely basis, this assurance is subject to limitations inherent in any control system, no matter how well it may be designed or administered.

Changes in Internal Controls. There was no change in our internal control over financial reporting during the quarter ended September 30, 2014 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, the Company is party to certain legal actions and claims arising in the ordinary course of business. While the outcome of these events cannot be predicted with certainty, management does not currently expect these matters to have a materially adverse effect on the financial position or results of operations of the Company.

Please see our Current Report on Form 8-K filed on September 26, 2014 for information on a jury verdict against the Company on September 24, 2014 in a case entitled Barrow-Shaver Resources Company v. Carrizo Oil & Gas, Inc. in the 7th Judicial District Court of Smith County, Texas.

Item 1A. Risk Factors

There were no material changes to the factors discussed in “Part I. Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

The Eagle Ford Shale Transaction. On October 24, 2014, we completed the acquisition of additional leasehold and producing interests in the Eagle Ford Shale (the “Eagle Ford Shale Transaction”) from Eagle Ford Minerals, LLC (“EFM”). For a further description of this matter, see “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Recent Developments.” We reported the consummation of the Eagle Ford Shale Transaction on October 27, 2014 on a Current Report on Form 8-K filed on that date. Historical financial statements for the business acquired and pro forma financial information were not included in that report but will be filed in a subsequent Current Report on Form 8-K within the time period set forth in the Securities Exchange Act of 1934 and rules promulgated thereunder.

Item 6. Exhibits

The following exhibits are required by Item 601 of Regulation S-K and are filed as part of this report:

Exhibit Number	Exhibit Description
2.1	– Asset Purchase Agreement dated October 24, 2014 by and between Eagle Ford Minerals, LLC and Carrizo (Eagle Ford) LLC (incorporated by reference to Exhibit 2.1 to the Company’s Current Report on Form 8-K filed on October 27, 2014). The schedules to the Asset Purchase Agreement have been omitted pursuant to Item 601(b) of Regulation S-K. A copy of the omitted schedules will be furnished to the U.S. Securities and Exchange Commission supplementally upon request.
*10.1	– Retirement and Consulting Agreement effective as of August 11, 2014 by and between Carrizo Oil & Gas, Inc. and Paul F. Boling.
*31.1	– CEO Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
*31.2	– CFO Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
*32.1	– CEO Certification Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
*32.2	– CFO Certification Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
*101	– Interactive Data Files

* Filed herewith.
