		(Do not check if a smaller reporting company)	

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

Table of Contents

The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is declared effective. This preliminary prospectus is not an offer to sell these securities and we are not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion, Preliminary Prospectus dated May 8, 2012

PROSPECTUS

8,000,000 Shares

Common Stock

Western Asset Mortgage Capital Corporation is a Delaware corporation focused on investing in, financing and managing primarily Agency RMBS, which are residential mortgage-backed securities for which the principal and interest payments are guaranteed by a U.S. Government agency, such as the Government National Mortgage Association, or a U.S. Government-sponsored entity, such as the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation. Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with residential mortgage-backed securities that are not guaranteed by a U.S. Government agency or sponsored entity, commercial mortgage-backed securities and other asset-backed securities. We will be externally managed and advised by Western Asset Management Company, or our Manager, an investment advisor registered with the Securities and Exchange Commission and a wholly-owned subsidiary of Legg Mason, Inc. (NYSE: LM).

This is our initial public offering and no public market currently exists for our common stock. We are offering 8,000,000 shares of our common stock, par value \$0.01 per share, as described in this prospectus. We expect the initial public offering price of our common stock to be \$20.00 per share. We have applied to list our common stock on the New York Stock Exchange under the symbol "WMC."

Concurrently with the completion of this offering, we will complete two private placements in which we expect to sell (i) 2,231,787 units, with each unit consisting of one share of our common stock and a warrant to purchase 0.5 share of our common stock, to certain institutional accredited investors for \$20.00 per unit, and (ii) 46,043 shares of our common stock for \$20.00 per share to our Manager's deferred compensation plan, which will make this investment on behalf of the beneficiaries of this plan, which includes certain executives and other employees of our Manager and its affiliates, in each case subject to certain adjustments as described in "Summary Concurrent private placements." No placement agent fee or underwriting discount or commission will be payable by us with respect to any of the units or the shares sold in these private placements.

We intend to elect and qualify to be taxed as a real estate investment trust for U.S. federal income tax purposes, commencing with our taxable year ending December 31, 2012. To assist us in qualifying as a real estate investment trust, stockholders are generally restricted from owning more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common or capital stock. Our certificate of incorporation contains various other restrictions on the ownership and transfer of our common stock. See "Description of capital stock Restrictions on ownership and transfer of our capital stock."

We are an "emerging growth company" as that term is used in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act.

Investing in our common stock involves risks. See "Risk factors" beginning on page 26 of this prospectus for a discussion of the following and other risks:

We have no operating history and may not be able to successfully operate our business or generate sufficient revenue to make or sustain distributions to our stockholders.

We may change our strategies, policies or procedures without stockholder consent.

We have not yet identified any specific investments we may make with the net proceeds of this offering.

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

We may pay distributions from offering proceeds, borrowings or the sale of assets to the extent that distributions exceed earnings or cash flow from our operations.

We are dependent on our Manager and its key personnel for our success.

There are various conflicts of interest in our relationship with our Manager that could result in decisions that are not in the best interests of our stockholders.

If we do not qualify as a real estate investment trust or if we fail to remain qualified as a real estate investment trust, we will be subject to tax as a regular corporation and could face a substantial tax liability, which would reduce the amount of cash available for distribution to our stockholders.

Loss of our exemption from regulation pursuant to the Investment Company Act of 1940, as amended, would adversely affect us.

	Per Share	Total
Public offering	\$	\$
Underwriting discount ⁽¹⁾	\$	\$
Proceeds, before expenses, to us	\$	\$

(1) Our Manager will pay the underwriters at closing \$ _____ per share for each share sold in this offering, representing the full underwriting discount payable with respect to the shares sold in this offering.

The underwriters may also purchase up to an additional 1,200,000 shares of our common stock from us at the initial public offering price, less the underwriting discount, within 30 days after the date of this prospectus solely to cover overallocments, if any.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The shares will be ready for delivery on or about _____, 2012.

Our business, financial condition, liquidity, results of operations and prospects may have changed since those dates.

Until _____, 2012 (25 days after the date of this prospectus), all dealers that effect transactions in these securities, whether or not participating in this offering, may be required to deliver a prospectus. This is in addition to the dealers' obligation to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

Table of Contents

Summary

This summary highlights some of the information in this prospectus. It does not contain all of the information that you should consider before investing in our common stock. You should read carefully the more detailed information set forth under "Risk Factors" and the other information included in this prospectus. Except where the context suggests otherwise, the terms "company," "we," "us," and "our" refer to Western Asset Mortgage Capital Corporation, a Delaware corporation, and "our Manager" refers to Western Asset Management Company, a California corporation, our external manager. Unless indicated otherwise, the information in this prospectus assumes (1) that we sell 8,000,000 shares of common stock in this offering, (2) the common stock to be sold in this offering is sold at \$20.00 per share, and (3) no exercise by the underwriters of their overallotment option to purchase up to an additional 1,200,000 shares of our common stock.

Our Company

We are organized as a Delaware corporation focused on investing in, financing and managing primarily residential mortgage-backed securities, or RMBS, for which the principal and interest payments are guaranteed by a U.S. Government agency, such as the Government National Mortgage Association, or a U.S. Government-sponsored entity, including the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. We refer to these types of securities as Agency RMBS. Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with RMBS that are not guaranteed by a U.S. Government agency or U.S. Government-sponsored entity, or non-Agency RMBS, commercial mortgage-backed securities, or CMBS, and other asset-backed securities, or ABS. We refer to these assets as our potential target assets. We intend to finance investments in Agency RMBS and our potential target assets primarily through the use of repurchase agreements.

Our objective is to provide attractive risk-adjusted returns to our investors over the long term, primarily through dividends and secondarily through capital appreciation. We intend to achieve this objective by selectively acquiring a diversified investment portfolio of assets designed to produce attractive returns across a variety of market conditions and economic cycles. We intend to construct a diversified investment portfolio by focusing on the relative value of securities within various sectors of the mortgage markets and security selection.

We will be externally managed and advised by our Manager, an investment advisor registered with the U.S. Securities and Exchange Commission, or the SEC, and a wholly-owned subsidiary of Legg Mason, Inc., or Legg Mason (NYSE: LM). Our Manager will be responsible for administering our business activities and day-to-day operations, subject to the supervision and oversight of our board of directors.

We have not made any investments in Agency RMBS or our potential target assets as of the date of this prospectus. We will not commence significant operations until we have completed this offering and the concurrent private placements. We intend to elect and qualify to be taxed as a real estate investment trust, or REIT, for U.S. federal income tax purposes, commencing with our taxable year ending December 31, 2012. We generally will not be subject to U.S. federal income taxes on our taxable income to the extent that we annually distribute all of our net taxable income to stockholders and maintain our intended qualification as a REIT. We also intend to operate our business in a manner that will permit us to maintain our exemption from registration under the Investment Company Act of 1940, or the 1940 Act.

Current market opportunities

Since the height of the financial crisis in 2008, there have been a number of proposals put forward regarding the reform of the housing finance market. We believe the most important theme of these

Table of Contents

proposals, as highlighted in the U.S. Department of Treasury and Department of Housing and Urban Development report to Congress on February 11, 2011, is the reduction of the government's role in, and the return of private capital to, the housing finance market. Several tools intended to encourage investment of private capital were recommended in the U.S. Department of Treasury and Department of Housing and Urban Development report including increasing guarantee fees, decreasing loan limits and tightening underwriting criteria for conforming loans. We believe these recommended changes, some of which have begun to be implemented, such as the tightening of conforming loan limits in October 2011, will reduce the future supply of Agency RMBS, limit mortgage refinancing and associated prepayment risk, and reduce the future volatility of the Agency RMBS market, which we view as positive developments for existing Agency RMBS.

We believe investors continue to seek incremental spreads relative to U.S. Treasury Notes in a low yield environment and financial institutions continue to prefer high quality, liquid Agency RMBS. In addition, our Manager has observed that the long-standing correlation between the prepayment rates of borrowers and their ability to refinance mortgage loans (as defined by the difference between available rates in the market and the legacy rates being paid by borrowers) has become partially de-linked in the past several years. Our Manager believes this is primarily a result of the inability of many borrowers to refinance their existing mortgages because of the significant decrease in the equity value of those borrowers' homes. With yield spreads on Agency RMBS at what our Manager views as attractive levels, our Manager believes there will continue to be strong demand for Agency RMBS.

Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with non-Agency RMBS, which are collateralized by non-conforming residential mortgages. While we anticipate mortgage loan delinquencies and credit losses may continue to rise and housing conditions may continue to deteriorate, we believe that current prices for certain non-Agency RMBS offer the potential for attractive risk-adjusted returns. Over time, we believe reform of U.S. Government-sponsored entities will accelerate the demand for private capital into the housing finance sector, and we expect that we will be well positioned to make attractive risk-adjusted investments in new residential-mortgage assets.

The current interest rate environment is characterized by a steep yield curve with the spread between two-year U.S. Treasury Notes and 10-year U.S. Treasury Notes well above the average spread over the last three decades. The Federal Reserve Board has maintained a near-zero target for the federal funds rate. On January 25, 2012, the Federal Open Market Committee released a statement indicating that it would maintain the target range for the federal funds rate at 0% to 0.25% and that it continues to anticipate that economic conditions, including low rates of resource utilization and a subdued outlook for inflation over the medium term, are likely to warrant exceptionally low levels for the federal funds rate at least through 2014, which statement the Federal Open Market Committee reiterated on April 25, 2012. Our Manager believes recent economic data suggest an improvement in U.S. economic growth. However, certain indicators such as high unemployment, low levels of capacity utilization, the current large shadow inventory of non-performing loans, declining home prices in most markets, increased loan defaults and continued stress in the housing and construction markets all point to a muted recovery. We believe this slow growth environment should keep the yield curve relatively steep and promote continued demand for Agency and non-Agency RMBS.

As the capital markets have recovered, commercial banks have re-entered the secured lending market which has quickened the pace of the recovery of asset values in the credit markets. Financing of Agency and non-Agency RMBS is currently widely available through, among other vehicles, repurchase agreements. Haircuts, or the discount attributed to the value of securities sold under repurchase agreements, average between 3% and 10% for Agency RMBS and average between 10% and 50% for non-Agency RMBS, depending on the specific security used as collateral for such repurchase agreements. We intend to use leverage to seek to increase potential returns to our stockholders by

Table of Contents

borrowing against existing assets through repurchase agreements and using the proceeds to acquire additional assets.

Our Manager's views of the current market opportunities are based on its own assessments. There can be no assurance that our investment and financing strategies based on our Manager's views will be able to generate attractive returns for our stockholders.

Our Manager

We will be externally managed and advised by Western Asset Management Company. Established in 1971 and acquired by Legg Mason in 1986, our Manager is a registered investment advisor headquartered in Pasadena, California, that specializes in fixed-income asset management. From offices in Pasadena, Hong Kong, London, Melbourne, New York, São Paulo, Singapore and Tokyo, our Manager's 904 employees provide investment services for a wide variety of global clients, including mutual funds, corporate, public, insurance, health care, union organizations and charitable foundations. Client portfolios range across an equally wide variety of mandates, from money markets to emerging markets. As of December 31, 2011, our Manager had 529 clients, representing 40 countries and 1051 accounts. By concentrating resources on fixed-income, our Manager is able to fully commit to serving clients of all types within the fixed-income sector.

As of December 31, 2011, our Manager and its investment advisory affiliates over which our Manager has operational responsibility, or its supervised affiliates, had approximately \$443 billion in assets under management. As of December 31, 2011, our Manager had a total of \$61.5 billion in assets under management in the asset classes corresponding to Agency RMBS and our potential target assets, of which \$37.6 billion was invested in Agency RMBS, \$13.8 billion in non-Agency RMBS, \$2.4 billion in CMBS and \$7.7 billion in ABS. Our Manager manages these assets using a range of specific strategies and investment vehicles, including mutual and private funds, private commingled vehicles and separately managed accounts. Our Manager's investment professionals and other staff have extensive experience in managing fixed-income assets, including Agency RMBS, non-Agency RMBS, CMBS, ABS and other such instruments.

Our chief investment officer, Stephen P. Fulton, who also serves as the head of our Manager's Agency RMBS team, will, along with two senior portfolio managers from the Agency RMBS team, be primarily responsible for overseeing the management of our assets. The Agency RMBS team works alongside and is able to utilize the resources of our Manager's structured products team, which focuses on managing and evaluating our potential target assets, including non-Agency RMBS, CMBS and ABS. The Agency RMBS team is also able to call on the experience of a number of our Manager's other investment professionals, not specifically dedicated to managing our assets, but with expertise that covers certain aspects of our potential target assets as well as on specialists in derivatives and liquidity who are part of our Manager's broader investment team. The collective team operates under the purview of our Manager's U.S. broad markets committee which sets overall sector allocations for broad market accounts. Our Manager seeks to unite groups of specialists dedicated to different market sectors. The daily interaction among the different teams is designed to develop a consensus approach that draws on the expertise of all team members. Our Manager's overall investment management team consists of 127 investment professionals.

Our investment strategy

Our Manager's investment philosophy, which developed from a singular focus in fixed-income asset management over a variety of credit cycles and conditions, is to provide clients with diversified, tightly controlled, long-term value-oriented portfolios. Through rigorous analysis of all sectors of the fixed-income market, our Manager seeks to identify assets with the greatest risk-adjusted total value potential. In making investment decisions on our behalf, our Manager will incorporate its views on the economic environment and the outlook for the mortgage markets, including relative valuation, supply

Table of Contents

and demand trends, the level of interest rates, the shape of the yield curve, prepayment rates, financing and liquidity, commercial and residential real estate prices, delinquencies, default rates, recovery of various segments of the economy and vintage of collateral, subject to maintaining our REIT qualification and our exemption from registration under the 1940 Act. We expect to benefit from the breadth and depth of our Manager's overall investment philosophy, which focuses on a macroeconomic analysis as well as an in-depth analysis of individual assets and their relative value.

We will rely on our Manager's expertise in asset allocation and identifying attractive assets within our investment strategy. Although our core investment strategy will be focused on Agency RMBS, our Manager's expertise in related investment disciplines such as non-Agency RMBS, CMBS and ABS provides our Manager with both (1) valuable investment insights to our RMBS investment selection and strategy and (2) flexibility to invest in assets other than Agency RMBS opportunistically as market conditions warrant.

We expect to purchase and sell Agency RMBS and our potential target assets. Our Manager does not expect to purchase securities on our behalf with a view to selling them shortly after purchase. However, in order to maximize returns and manage portfolio risk while remaining opportunistic, we may dispose of securities earlier than anticipated or hold securities longer than anticipated depending upon prevailing market conditions, credit performance, availability of leverage or other factors regarding a particular security or our capital position.

Agency RMBS

We expect to focus on investing in Agency RMBS, which are RMBS for which the principal and interest payments are guaranteed by a U.S. Government agency, such as the Government National Mortgage Association, or a U.S. Government-sponsored entity, such as the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation. The Agency RMBS we may acquire could be secured by fixed-rate mortgages, adjustable-rate mortgages or hybrid adjustable-rate mortgages. Fixed-rate mortgages have interest rates that are fixed for the term of the loan and do not adjust. The interest rates on adjustable-rate mortgages generally adjust annually (although some may adjust more frequently) to an increment over a specified interest rate index. Hybrid adjustable-rate mortgages have interest rates that are fixed for a specified period of time (typically three, five, seven or ten years) and, thereafter, adjust to an increment over a specified interest rate index. Adjustable-rate mortgages and hybrid adjustable-rate mortgages generally have periodic and lifetime constraints on how much the loan interest rate can change on any predetermined interest rate reset date.

The types of Agency RMBS we intend to invest in are described below.

Mortgage pass-through certificates. Mortgage pass-through certificates are securities representing interests in "pools" of mortgage loans secured by residential real property where payments of both interest and principal, plus pre-paid principal, on the securities are made monthly to holders of the securities, in effect "passing through" monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer/guarantor and servicers of the securities.

Collateralized Mortgage Obligations, or CMOs. CMOs are securities that are structured from residential pass-through certificates, which receive monthly payments of principal and interest. CMOs divide the cash flows which come from the underlying mortgage pass-through certificates into different classes of securities that may have different maturities and different weighted average lives than the underlying pass-through certificates.

CMOs include stripped securities, which are mortgage-backed securities structured with two or more classes that receive different distributions of principal or interest on a pool of Agency RMBS. Stripped securities include interest only Agency RMBS and inverse interest only Agency RMBS, each of which we may invest in subject to maintaining our qualification as a REIT.

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

Interest Only Agency RMBS. This type of stripped security only entitles the holder to interest payments. The yield to maturity of interest only Agency RMBS is extremely sensitive to the rate of principal payments (particularly prepayments) on the underlying pool of mortgages. If we decide to invest in these types of securities, we anticipate doing so primarily to take advantage of particularly attractive prepayment-related or structural opportunities in the Agency RMBS markets.

Inverse Interest Only Agency RMBS. This type of stripped security has a coupon with an inverse relationship to its index and is subject to caps and floors. Inverse interest only Agency RMBS entitles the holder to interest only payments based on a notional principal balance, which is typically equal to a fixed rate of interest on the notional principal balance less a floating rate of interest on the notional principal balance that adjusts according to an index subject to set minimum and maximum rates. The value of inverse interest only Agency RMBS will generally decrease when its related index rate increases and increase when its related index rate decreases.

TBAs. We may utilize "to-be-announced" forward contracts, or TBAs, in order to invest in Agency RMBS. Pursuant to these TBAs, we would agree to purchase, for future delivery, Agency RMBS with certain principal and interest terms and certain types of underlying collateral, but the particular Agency RMBS to be delivered would not be identified until shortly before the TBA settlement date. Our ability to purchase Agency RMBS through TBAs may be limited by the 75% income and asset tests applicable to REITs. See "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation."

Potential target assets

Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with the types of assets described below.

Non-Agency RMBS. RMBS that are not guaranteed by a U.S. Government agency or U.S. Government-sponsored entity, with an emphasis on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations.

The mortgage loan collateral for non-Agency RMBS consists of residential mortgage loans that do not generally conform to underwriting guidelines issued by a U.S. Government agency or U.S. Government-sponsored entity due to certain factors, including mortgage balances in excess of agency underwriting guidelines, borrower characteristics, loan characteristics and level of documentation, and therefore are not issued or guaranteed by an agency. The mortgage loan collateral may be classified as subprime, Alternative-A or prime depending on the borrower's credit rating. The non-Agency RMBS we may acquire could be secured by fixed-rate mortgages, adjustable-rate mortgages or hybrid adjustable-rate mortgages.

CMBS. Fixed and floating rate CMBS, with an emphasis on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations. We have not established a minimum current rating requirement.

ABS. Debt and equity tranches of securitizations backed by various asset classes including, but not limited to, small balance commercial mortgages, aircrafts, automobiles, credit cards, equipment, manufactured housing, franchises, recreational vehicles and student loans with an emphasis on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations. Investments in ABS generally are not qualifying assets for purposes of the 75% asset test applicable to REITs and generally do not generate qualifying income for purposes of the 75% income test applicable to REITs. As a result, we may be limited in our ability to invest in such assets. See "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation."

Table of Contents

Other Agency MBS. We may also invest in mortgage-backed securities, or MBS, for which the principal and interest payments are guaranteed by a U.S. Government-sponsored entity, but for which the underlying mortgage loans are secured by real property other than single family residences. These may include, but are not limited to the Federal National Mortgage Association's DUS (Delegated Underwriting and Servicing) MBS, the Federal Home Loan Mortgage Corporation's Multifamily Mortgage Participation Certificates and the Government National Mortgage Association's project loan pools, or CMOs structured from such collateral.

Our competitive advantages

We believe that our competitive advantages include the following:

Significant experience of our Manager

Our Manager has utilized Agency RMBS as a vital component within its investment strategy since its inception in 1971 and has managed through several interest rate, housing, and credit cycles. Our Manager has extensive experience managing Agency RMBS strategies as separately-managed accounts, commingled vehicles, and mutual funds. These strategies include Agency RMBS only, the Government National Mortgage Association's RMBS only and several Agency RMBS strategies with varying degrees of non-Agency RMBS exposure. Agency RMBS has also been a significant portion of our Manager's broad market strategies since 1971. Moreover, our Manager has been an active investor in non-Agency RMBS, CMBS and ABS for over 20 years as those markets have developed. Our Manager manages these assets in broad market accounts as well as non-Agency RMBS specific strategies, including commingled funds and mutual funds. Our Manager, in a joint venture with RLJ Companies, LLC, also manages the RLJ Western Asset Public/Private Investment Fund, a master-feeder fund complex participating in the U.S. Treasury's Legacy Securities Public-Private Investment Program and investing entirely in non-Agency RMBS and CMBS. We will have access to our Manager's dedicated Agency RMBS team, which is led by our chief investment officer. In addition, we expect to utilize the resources of our Manager's structured products team, which focuses on our potential target assets, including non-Agency RMBS, CMBS and ABS. We also expect to call on the experience of specialists in derivatives and liquidity who are part of our Manager's broader investment team. In addition, we believe that our Manager's senior management team, which has a long track record and broad experience in managing mortgage-related assets through a variety of credit and interest rate environments, has demonstrated the ability to generate attractive risk-adjusted returns under different market conditions and cycles and will provide us with a competitive advantage.

Extensive strategic relationships

Our Manager and its supervised affiliates maintain extensive long-term relationships with other financial intermediaries, including primary dealers, leading investment banks, brokerage firms, leading mortgage originators and commercial banks. As one of the largest fixed-income investment managers in the world, our Manager has access to deal flow and secondary trading opportunities to which smaller firms do not have access. Additionally, our Manager's size and broad market access are valuable in developing and implementing our investment strategy. We believe these relationships will enhance our ability to source, finance and hedge investment opportunities and, thus, enable us to grow in various credit and interest rate environments. In addition, we believe the contacts our Manager and its supervised affiliates have with numerous investment grade derivative and lending counterparties will assist us in implementing our financing and hedging strategies.

Disciplined investment approach

Our Manager takes a value-oriented approach to managing Agency RMBS. Using that approach, our Manager seeks to optimize yield while adjusting for prepayment and interest rate risk.

Table of Contents

From a macroeconomic perspective, our Manager examines current and forward interest rates, the shape of the yield curve, gross domestic product, or GDP, growth and inflation expectations, regional and local property trends, local employment conditions, national loan modification initiatives and mortgage servicer timelines and techniques. At the security level, our Manager examines borrower and collateral characteristics such as the incentives a homeowner might have to refinance and the level of equity in the home.

Access to our Manager's analytical tools and infrastructure

We expect our Manager to use its analytical and portfolio management modeling tools and processes to seek to generate positive net interest margins for our assets. We will employ a combination of proprietary and third-party tools in an effort to identify investments in the Agency RMBS sector with the most attractive risk-adjusted returns.

Our Manager will analyze macroeconomic factors to seek to determine the appropriate sector mix and strategy for us that will best capitalize on the market knowledge, experience and relationships within our Manager's existing platform. We intend to capitalize on the market knowledge and ready access to data across our target markets that our Manager obtains through these tools and processes and believe that our Manager's sophisticated analysis of both macro and micro economic factors will position us to manage cash flows from Agency RMBS and our potential target assets and make distributions to our stockholders while preserving capital. We believe we will also benefit from our Manager's comprehensive finance and administrative infrastructure, including its risk management and financial reporting operations, as well as its business development, legal and compliance teams.

Alignment of our Manager's interests

We have taken steps to structure our relationship with our Manager so that our interests and those of our Manager are closely aligned. Concurrently with the closing of this offering, we will issue and sell in a private placement an aggregate of 46,043 shares of our common stock (subject to certain adjustments as described in "Summary Concurrent private placements") at \$20.00 per share to our Manager's deferred compensation plan, which will make such investment on behalf of the beneficiaries of the plan, which includes certain executives and other employees of our Manager and its affiliates. These shares will be subject to a two year lock-up agreement with the underwriters that is substantially similar to the 180-day lock-up agreements to be executed by our Manager, our directors and executive officers and the executive officers of our Manager.

In addition, our equity incentive plans will allow us to grant common stock-based awards to our Manager and its employees, including our executive officers, representing up to 3.0% of the total number of issued and outstanding shares of our common stock (on a fully diluted basis) at the time of each award (other than any shares issued or subject to awards made pursuant to one of our equity incentive plans). Upon the completion of this offering, we will grant to our Manager a number of shares of our restricted common stock that is equal to 0.5% of the aggregate number of shares of our common stock sold in this offering (without giving effect to any exercise by the underwriters of their over-allotment option) and units sold in the concurrent private placement to certain institutional accredited investors. One-third of these shares will vest on each of the first, second and third anniversaries of the grant date.

Investment guidelines

Our board of directors will adopt a set of investment guidelines that sets forth our target asset classes and other criteria to be used by our Manager to evaluate specific assets as well as our overall portfolio composition. Our Manager will make determinations as to the percentage of our assets that will be invested in each of our target asset classes, consistent with the investment guidelines adopted by our board of directors and the limits necessary to maintain compliance with REIT tax rules and our

Table of Contents

exemption under the 1940 Act. We expect our Manager's investment decisions will depend on prevailing market conditions and may change over time in response to opportunities available in different interest rate, economic and credit environments. As a result, we cannot predict the percentage of our assets that will be invested in any of our target asset classes at any given time, although we expect to focus on investing in Agency RMBS and expect our capital will be initially deployed, subject to prevailing market conditions, as described in "Use of proceeds." We believe that the diversification of our portfolio of assets, our Manager's extensive experience in investing in Agency RMBS and our potential target assets and the flexibility of our strategy, combined with our Manager's and its supervised affiliates' general investment and advisory expertise and comprehensive finance and administrative infrastructure, will enable us to achieve attractive risk-adjusted returns under a variety of market conditions and economic cycles.

Our investment guidelines may be changed from time to time by our board of directors without the approval of our stockholders. Changes to our investment guidelines may include, without limitation, modification or expansion of the types of assets in which we may invest.

Our financing strategy and leverage

We will fund the acquisition of our assets through the use of leverage from a number of financing sources, subject to maintaining our qualification as a REIT. We intend to finance Agency RMBS and our potential target assets primarily through the use of repurchase agreements.

We intend to use leverage to increase potential returns to our stockholders. We will accomplish this by borrowing against existing assets through repurchase agreements that we intend to enter into upon completion of this offering and the concurrent private placements, and using the proceeds to acquire additional assets. There are no limits on the maximum amount of leverage that we may use, and we are not required to maintain any particular debt-to-equity leverage ratio. We may also change our financing strategy and leverage without the consent of our stockholders.

We initially expect to borrow between five to nine times the amount of our stockholders' equity (calculated in accordance with accounting principles generally accepted in the United States, or U.S. GAAP), although there is no minimum or maximum leverage that our investment policies explicitly require. Depending on the different cost of borrowing funds at different maturities, we will vary the maturities of our borrowed funds to attempt to produce lower borrowing costs and reduce interest rate risk. We intend to enter into collateralized borrowings only with institutions that are rated investment grade by at least one nationally-recognized statistical rating organization.

The leverage that we employ will be specific to each asset class and will be determined based on several factors, including potential asset price volatility, margin requirements, the current cycle for interest rates, the shape of the yield curve, the outlook for interest rates and our ability to use and the effectiveness of interest rate hedges. We analyze both historical volatility and market-driven implied volatility for each asset class in order to determine potential asset price volatility. Our leverage targets attempt to risk-adjust asset classes based on each asset class's potential price volatility. The goal of our leverage strategy is to ensure that, at all times, our investment portfolio's overall leverage ratio is appropriate for the level of risk inherent in the investment portfolio, and that each asset class has individual leverage targets that are appropriate for its potential price volatility.

Risk management

As part of our risk management strategy, our Manager may seek to actively manage the financing, interest rate, credit, prepayment and convexity risks associated with holding a portfolio of Agency RMBS and our potential target assets. We will rely on our Manager's expertise to manage these risks on our behalf and our Manager may incorporate various hedging, asset/liability risk management and credit risk mitigation techniques in order to facilitate our risk management. We may engage in a variety

Table of Contents

of interest rate management techniques that seek on one hand to mitigate the influence of interest rate changes on the values of some of our assets, and on the other hand help us achieve our risk management objectives. Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, we may utilize derivative financial instruments, including, among others, puts and calls on securities or indices of securities, interest rate swaps, interest rate caps, interest rate swaptions (options on interest rate swaps), exchange-traded derivatives, U.S. Treasury securities and options on U.S. Treasury securities and interest rate floors to hedge all or a portion of the interest rate risk associated with the financing of our investment portfolio. We may also purchase interest rate swaps, interest rate swaptions, interest cancellable swaps, interest rate caps, interest rate corridors (long interest rate cap positions combined with short interest rate cap positions; a buyer of a corridor purchases a cap position with a lower strike price while selling a cap position with a higher strike price), Eurodollar futures contracts and options on such contracts, and other interest rate and non-interest rate derivatives, including, but not limited to, total return swaps.

In utilizing leverage and interest rate hedges, our objectives will be to improve risk-adjusted returns and, where possible, to lock in, on a long-term basis, a favorable spread between the yield on our assets and the cost of our financing. However, through the employment of financial leverage in funding our portfolio, mismatches in the maturities of our assets and liabilities can create the risk that we will need to continually renew or otherwise refinance our liabilities. We also retain the risk of potential credit losses on the loans underlying the non-Agency RMBS, CMBS and ABS we may hold. We may seek to manage this risk through our pre-acquisition due diligence process, through the use of non-recourse financing that limits our credit loss exposure to the specific assets that are subject to the non-recourse financing and through the use of derivative financial instruments.

Our Manager expects to actively employ portfolio-wide and security-specific risk measurement and management processes in our daily operations through tools which will include software and services licensed or purchased from third parties, in addition to proprietary systems and analytical methods developed internally. There can be no assurance, however, that these tools and the other risk management techniques described above will protect us from these risks.

In addition, our Manager plans to appoint an investment oversight committee that will be made up of senior investment personnel from our Manager and will be tasked with reviewing, considering and approving our interest rate, hedging and leverage strategies. We expect that the investment oversight committee will meet as frequently as necessary in order for us to make rapid investment decisions. The investment oversight committee will also periodically review our investment portfolio and be available to provide updates to our board of directors in connection with its reviews of our investment performance.

Summary risk factors

An investment in shares of our common stock involves various risks. You should consider carefully the risks discussed below and under the heading "Risk factors" beginning on page 25 of this prospectus before purchasing our common stock. If any of the following risks occurs, our business, financial condition or results of operations could be materially and adversely affected. In that case, the trading price of our common stock could decline and you may lose some or all of your investment.

We have no operating history and may not be able to successfully operate our business or generate sufficient revenue to make or sustain distributions to our stockholders.

We are dependent on our Manager and its key personnel for our success.

There are conflicts of interest in our relationship with our Manager that could result in decisions that are not in the best interests of our stockholders.

Our Manager's management fee is payable regardless of our performance.

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

We may change any of our strategies, policies or procedures without stockholder consent.

We have not yet identified any specific investments we may make with the net proceeds of this offering.

We may pay distributions from offering proceeds, borrowings or the sale of assets to the extent that distributions exceed earnings or cash flow from our operations.

We operate in a highly competitive market for investment opportunities and competition may limit our ability to acquire desirable investments in Agency RMBS and our potential target assets and could also affect the pricing of these securities.

The lack of liquidity in our investments may adversely affect our business.

Adverse developments in the broader residential mortgage market may adversely affect the value of the assets in which we intend to invest.

The mortgage loans underlying the non-Agency RMBS and the CMBS we may acquire will be subject to defaults, foreclosure, timeline extension, fraud and residential/commercial price depreciation and unfavorable modification of loan principal amount, interest rate and amortization of principal, which could result in losses to us.

We may be affected by alleged or actual deficiencies in foreclosure practices of third parties, as well as related delays in the foreclosure process.

We may experience a decline in the market value of our assets.

Some of our portfolio investments will be recorded at fair value and, as a result, there will be uncertainty as to the value of these investments.

An increase in interest rates may cause a decrease in the volume of certain of our assets, which could adversely affect our ability to acquire assets that satisfy our investment objectives and to generate income and make distributions.

Changes in prepayment rates may adversely affect our profitability.

Loss of our exemption from regulation pursuant to the 1940 Act would adversely affect us.

We expect to use leverage in executing our business strategy, which may adversely affect the return on our assets and may reduce cash available for distribution to our stockholders, as well as increase losses when economic conditions are unfavorable.

The federal conservatorship of the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation and related efforts, along with any changes in laws and regulations affecting the relationship between these agencies and the U.S. Government, may adversely affect our business.

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Mortgage loan modification and refinancing programs and future legislative action may adversely affect the value of, and our returns on, Agency RMBS and our potential target assets.

Actions of the U.S. Government, including the U.S. Congress, Federal Reserve, U.S. Treasury and other governmental and regulatory bodies, to stabilize or reform the financial markets may not achieve their intended effect and may adversely affect our business.

We will be subject to the risk that U.S. Government agencies and/or U.S. Government-sponsored entities may not be able to fully satisfy their guarantees of Agency RMBS or that these guarantee obligations may be repudiated, which may adversely affect the value of our assets and our ability to sell or finance these securities.

Table of Contents

If a counterparty to our repurchase transactions defaults on its obligation to resell the underlying security back to us at the end of the transaction term, or if the value of the underlying security has declined as of the end of that term, or if we default on our obligations under the repurchase agreement, we will lose money on our repurchase transactions.

Failure to procure adequate repurchase agreement financing, which generally have short terms, or to renew or replace repurchase agreement financing as it matures, would adversely affect our results of operations.

An increase in our borrowing costs relative to the interest we receive on our assets may adversely affect our profitability and cash available for distribution to our stockholders.

Hedging against interest rate exposure may adversely affect our earnings, which could reduce our cash available for distribution to our stockholders.

Our Manager does not have any experience operating a REIT and we cannot assure you that our Manager's past experience will be sufficient to successfully manage our business as a REIT.

Our board of directors will approve very broad investment guidelines for our Manager and will not approve each investment and financing decision made by our Manager.

The management agreement with our Manager was not negotiated on an arm's-length basis and may not be as favorable to us as if it had been negotiated with an unaffiliated third party and may be costly and difficult to terminate.

The dilutive effect of the warrants, including in certain circumstances, upon future issuances of our common stock, could have an adverse effect on the future market price of our common stock or otherwise adversely affect the interests of our common stockholders.

If we do not qualify as a REIT or if we fail to remain qualified as a REIT, we will be subject to tax as a regular corporation and could face a substantial tax liability, which would reduce the amount of cash available for distribution to our stockholders.

Complying with REIT requirements may cause us to forgo otherwise attractive opportunities.

Table of Contents

Our structure

We were organized as a Delaware corporation on June 3, 2009, but have had no operations since that time. We will be externally managed by our Manager, which is our promoter with respect to this offering. Our Manager's parent company, Legg Mason, is also our promoter with respect to this offering.

The following chart illustrates our expected corporate structure upon completion of this offering and the concurrent private placements. It also illustrates the relative ownership of our common stock by investors in this offering, our Manager and certain institutional accredited investors in the concurrent private placement of units, in each case immediately after the consummation of (i) this offering, assuming that we sell 8,000,000 shares of our common stock herein, (ii) the concurrent private placement of units, assuming we sell 2,231,787 units to certain institutional accredited investors therein, (iii) the concurrent private placement of 46,043 shares to our Manager's deferred compensation plan (equivalent to 0.45% of the aggregate number of shares sold in this offering and units sold in the private placement to certain institutional accredited investors, subject to a maximum of 50,000 shares), and (iv) the grant of 51,159 shares to our Manager pursuant to our Manager Equity Plan upon the completion of this offering (equivalent to 0.5% of the aggregate number of shares sold in this offering and units sold in the concurrent private placement to certain institutional accredited investors). The following chart excludes (i) the 1,200,000 shares of our common stock that are issuable upon exercise of the over-allotment option to be granted to the underwriters, (ii) the approximately 1,115,893 shares of our common stock that are initially issuable upon exercise of the warrants sold in the concurrent private placement to certain institutional accredited investors and (iii) an aggregate of 4,500 shares of our restricted common stock to be granted to our three director nominees pursuant to our Equity Plan upon the completion of this offering.

-
- (1) Consists of (i) 46,043 shares of our common stock to be issued and sold at \$20.00 per share in the concurrent private placement to our Manager's deferred compensation plan and (ii) 51,159 shares of our restricted common stock (equivalent to 0.5% of the aggregate number of shares sold in this offering and units sold in the concurrent private placement to certain institutional accredited investors) that we will grant to our Manager pursuant to our Manager Equity Plan upon the completion of this offering. As our Manager is a wholly-owned subsidiary of Legg Mason, a publicly traded company, the board of directors of Legg Mason has investment control and dispositive power with respect to the shares of common stock held by our Manager.

Table of Contents

Management agreement

We will be externally managed and advised by our Manager. We expect to benefit from the personnel, infrastructure, relationships and experience of our Manager to enhance the growth of our business. All of our officers and two of our directors, James W. Hirschmann III and Gavin L. James, are employees of our Manager. Although our current chief financial officer is an employee of our Manager, we anticipate that in the future we will hire a chief financial officer that is not an employee of our Manager and support staff for such chief financial officer. We do not anticipate having any future employees other than a chief financial officer and support staff for the chief financial officer. Our Manager does not serve us exclusively and is not obligated to dedicate any of its personnel to us, nor is our Manager or its personnel obligated to dedicate any specific portion of its or their time to our business.

Concurrently with the completion of this offering and the concurrent private placements, we will enter into a management agreement with our Manager. Pursuant to the management agreement, our Manager will implement our business strategy and perform certain services for us, subject to oversight by our board of directors. Our Manager will be responsible for, among other duties, (1) performing all of our day-to-day functions, (2) determining investment criteria in conjunction with our board of directors, (3) sourcing, analyzing and executing investments, asset sales and financings, (4) performing asset management duties and (5) performing financial and accounting management.

The initial term of the management agreement will end three years after the closing of this offering, with automatic one-year renewal terms that end on the anniversary of the closing of this offering. Our independent directors will review our Manager's performance annually and, following the initial three-year term, the management agreement may be terminated annually upon the affirmative vote of at least two-thirds of our independent directors based upon: (1) our Manager's unsatisfactory performance that is materially detrimental to us or (2) our determination that any fees payable to our Manager are not fair, subject to our Manager's right to prevent termination based on unfair fees by accepting a reduction of management fees agreed to by at least two-thirds of our independent directors. We will provide our Manager with 180 days prior notice of such termination. Upon such a termination, we will pay our Manager a termination fee as described in the table below. We may also terminate the management agreement at any time, including during the initial term, with 30 days prior notice from our board of directors, without payment of a termination fee, for cause, as defined in the management agreement. Our Manager may terminate the management agreement if we become required to register as an investment company under the 1940 Act, with such termination deemed to occur immediately before such event, in which case we would not be required to pay a termination fee. Our Manager may also decline to renew the management agreement by providing us with 180 days written notice, in which case we would not be required to pay a termination fee.

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

The following table summarizes the fees and expense reimbursements that we will pay to our Manager:

Type	Description	Payment
Management fee	<p>Our Manager will be entitled to a management fee equal to 1.5% per annum, calculated and payable quarterly in arrears, of our stockholders' equity. For purposes of calculating the management fee, our "stockholders' equity" means the sum of the net proceeds from any issuances of our equity securities since inception (allocated on a pro rata daily basis for such issuances during the fiscal quarter of any such issuance), plus our retained earnings, calculated in accordance with U.S. GAAP, at the end of the most recently completed fiscal quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods), less any amount that we pay for repurchases of our shares of common stock, excluding any unrealized gains, losses or other non-cash items that have impacted stockholders' equity as reported in our financial statements prepared in accordance with U.S. GAAP, regardless of whether such items are included in other comprehensive income or loss, or in net income, and excluding one-time events pursuant to changes in U.S. GAAP and certain other non-cash charges after discussions between our Manager and our independent directors and after approval by a majority of our independent directors. However, if our stockholders' equity for any given quarter is negative based on the calculation described above, our Manager will not be entitled to receive any management fee for that quarter.</p> <p>Assuming that we sell 8,000,000 shares of common stock in this offering (which assumes no exercise of the underwriters' over-allotment option), 2,231,787 units in the concurrent private placement to certain institutional accredited investors and 46,043 shares of our common stock in the concurrent private placement to our Manager's deferred compensation plan, the management fee payable to our Manager for the 12-month period beginning on June 1, 2012 (assuming no additional equity is issued within this 12-month period) would be approximately \$3.1 million.</p>	Quarterly in cash.
Expense reimbursement	<p>Reimbursement of operating expenses related to us incurred by our Manager, including legal, accounting, due diligence and other services. We will not reimburse our Manager or its affiliates for the salaries and other compensation of their personnel.</p>	Monthly in cash.

Table of Contents

Type	Description	Payment
Termination fee	Termination fee equal to three times the average annual management fee earned by our Manager during the prior 24-month period prior to such termination, calculated as of the end of the most recently completed fiscal quarter prior to such termination. See "Our Manager and the management agreement Management agreement Term and termination."	Upon termination of the management agreement by us without cause or by our Manager if we materially breach the management agreement.
Equity incentive plans	<p>Our equity incentive plans include provisions for grants of restricted common stock and other equity based awards to our Manager and its employees and to our directors and officers. The total number of shares that may be made subject to awards under our equity incentive plans will be equal to an aggregate of 3.0% of the total number of issued and outstanding shares of our common stock (on a fully diluted basis) at the time of each award (other than any shares issued or subject to awards made pursuant to one of our equity incentive plans). Therefore, if we sell 8,000,000 shares in this offering, 2,231,787 units in the concurrent private placement to certain institutional accredited investors and 46,043 shares of our common stock in the concurrent private placement to our Manager's deferred compensation plan, the number of shares of common stock initially reserved for issuance will be 308,335 shares. See "Management Equity incentive plans" for a further description of the terms of these plans.</p> <p>Upon the completion of this offering and the concurrent private placements, we will grant to our Manager pursuant to our Manager Equity Plan, which is one of our equity incentive plans, a number of shares of our restricted common stock that is equal to 0.5% of the aggregate number of shares of common stock sold in this offering (without giving effect to any exercise by the underwriters of their over-allotment option) and units sold in the concurrent private placement to certain institutional accredited investors. Therefore, if we sell 8,000,000 shares in this offering and 2,231,787 units in such concurrent private placement, we will grant to our Manager 51,159 shares of restricted common stock. One-third of these shares will vest on each of the first, second and third anniversaries of the grant date. Upon the completion of this offering, we will also grant to each of our three director nominees 1,500 shares of restricted common stock, each of which grants will vest in full on the first anniversary of the grant date.</p> <p>See "Management Equity incentive plans" for a further description of the vesting terms of the initial grants of restricted common stock to our Manager and our three director nominees.</p>	Administered by the compensation committee of our board of directors.

Table of Contents

Concurrent private placements

Concurrent private placement to certain institutional accredited investors

Concurrently with, and conditional upon the consummation of, this offering, we will complete a private placement in which we will sell 2,231,787 units to certain institutional "accredited investors" (as defined in paragraphs (1), (2), (3) or (7) of Rule 501(a) of Regulation D under the Securities Act of 1933, as amended, or the Securities Act), each of which is also a "qualified institutional buyer" (as defined in Rule 144A under the Securities Act), provided we sell 8,000,000 shares of our common stock in this offering. Each unit will consist of one share of our common stock and a warrant to purchase 0.5 of a share of our common stock. We refer to the shares of our common stock comprising a part of the units as the private placement shares. The purchase price for each unit is \$20.00 per unit. Each private placement warrant will have an exercise price of \$20.50 per share, subject to adjustment upon the occurrence of customary events triggering an anti-dilution adjustment and certain sales of our common stock and subject to certain limitations on exercise. Based upon the terms of an investment in our units by certain investors, we would sell 2,231,787 units in such private placement to these certain institutional accredited investors if we also sell 8,000,000 shares of our common stock in this offering (excluding any exercise of the underwriters' over-allotment option). If the underwriters of this offering exercise their over-allotment option in full, we would also sell to certain of these institutional accredited investors in the private placement an additional number of units equal to approximately 15.1% of the number of shares issued and sold pursuant to the exercise of the underwriters' over-allotment option.

Based upon the proposed terms of an investment in our units by certain institutional accredited investors in such private placement, if we sell at least 7,798,936 shares in this offering, we would sell (i) 875,000 units, plus (ii) an additional number of units equal to 3.33% of the total number of shares of our common stock issued and outstanding immediately after the consummation of (a) this offering, including any shares issued upon any exercise by the underwriters of their over-allotment option, (b) the private placement to certain institutional accredited investors, (c) the purchase of shares by our Manager's deferred compensation plan as described below, and (d) the grants of shares under our equity incentive plans (collectively, the "concurrent transactions"), plus (iii) an additional number of units equal to 9.8% of the total number of shares of our common stock issued and outstanding immediately after the consummation of the concurrent transactions described above, subject to a maximum of 1,250,000 units. For illustrative purposes only, if we sell a total of 8,500,000 shares in this offering, we will sell 2,308,188 units in the private placement.

Based upon the proposed terms of an investment in our units by certain institutional accredited investors in such private placement to certain institutional accredited investors, (i) if we sell fewer than 7,798,936 shares in this offering, we would sell (a) 875,000 units, plus (b) an additional number of units equal to 9.80% of the total number of shares of our common stock issued and outstanding immediately after the consummation of the concurrent transactions described above, and (ii) if we sell fewer than 5,000,000 shares in this offering, we would sell 875,000 units in such private placement. For illustrative purposes only, if we sell a total of 7,000,000 shares in this offering, we will sell 1,740,109 units in the private placement to certain institutional accredited investors.

Deutsche Bank Securities Inc., one of the underwriters of this offering, served as our placement agent for the private placement of units. Our Manager has agreed to pay our placement agent a placement agent fee of \$0.60 per unit payable with respect to each unit sold to certain institutional accredited investors with which our placement agent has a pre-existing business relationship. No placement agent fee will be payable with respect to units sold to institutional accredited investors with which our Manager has a pre-existing business relationship. Assuming we sell 8,000,000 shares of our common stock in this offering, the placement agent fee payable by our manager to Deutsche Bank Securities Inc. will be approximately \$900,000.

Table of Contents

Concurrent private placement to our Manager's deferred compensation plan

In addition, concurrently with the completion of this offering, we will also issue and sell in a private placement a number of shares of our common stock for \$20.00 per share to our Manager's deferred compensation plan that is equal to 0.45% of the aggregate number of (i) the shares sold in this offering (excluding any shares that would be sold if the underwriters exercise their over-allotment option), and (ii) the units sold in the private placement to certain institutional accredited investors (excluding any additional units that may sold to certain of these investors if the underwriters exercise their over-allotment option), subject to a maximum of 50,000 shares. Therefore, if we sell 8,000,000 shares in this offering and 2,231,787 units in the concurrent private placement to certain institutional accredited investors, we will sell 46,043 shares of our common stock in a concurrent private placement to our Manager's deferred compensation plan. Our Manager's deferred compensation plan will make this investment on behalf of the beneficiaries of this plan, which includes certain executives and other employees of our Manager and its affiliates.

We and our Manager have, and each of our executive officers and directors and each executive officer of our Manager has, agreed with the underwriters to a 180-day lock-up period (subject to extension in certain circumstances), meaning that, until the end of the 180-day lock-up period, we and our Manager, and each of our executive officers and directors and each executive officer of our Manager, will not, subject to certain exceptions, sell or transfer any shares of common stock without the prior consent of Deutsche Bank Securities Inc., J.P. Morgan Securities LLC and Citigroup Global Markets Inc., which are acting as the representatives of the underwriters in this offering. In addition, the shares of common stock to be sold in the private placement to our Manager's deferred compensation plan will be subject to a two year lock-up agreement with the underwriters that is substantially similar to the lock-up agreements to be executed by our Manager, our directors and executive officers and the executive officers of our Manager.

We will enter into a registration rights agreement with the purchasers in the concurrent private placements and our Manager pursuant to which we will agree to register the resale of the shares of common stock comprising a part of the units, the shares of common stock issuable upon exercise of the warrants, the shares of common stock to be sold to our Manager's deferred compensation plan, and any shares of common stock that we will or may grant to our Manager under the Manager Equity Plan, which we collectively refer to as the registrable shares. Pursuant to the registration rights agreement, all holders of the registrable shares and their direct and indirect transferees will have the right to demand that we cause their registrable shares to be registered for resale on a registration statement; however, we will not be required to file such registration statement until 180 days after the consummation of this offering and the concurrent private placements. The registration rights agreement also requires us to file a "shelf registration statement" for the remaining registerable shares as soon as practicable after we become eligible to use Form S-3 and we must maintain the effectiveness of this shelf registration statement until all the registerable shares have been sold under the shelf registration statement or sold pursuant to Rule 144 under the Securities Act. At any time prior to the filing of this shelf registration statement, if we propose to file a registration statement providing for a public offering, the holders of registerable shares may also request to have their shares included on this registration statement pursuant to the registration rights agreement. See "Shares eligible for future sale Registration rights."

Conflicts of interest

Dependence on our Manager and its personnel

We are dependent on our Manager for our day-to-day management. All of our officers and two of our directors, James W. Hirschmann III and Gavin L. James, are employees of our Manager. Although our current chief financial officer is an employee of our Manager, we anticipate that in the future we will hire a chief financial officer that is not an employee of our Manager and support staff for such chief financial officer. We do not anticipate having any future employees other than a chief financial

Table of Contents

officer and support staff for the chief financial officer. Our Manager does not serve us exclusively and is not obligated to dedicate any of its personnel to us. Because our Manager serves other clients in addition to us, it is difficult to estimate the amount of time our Manager or its personnel will allocate to our business. The obligations of our Manager and its officers and personnel to engage in other business activities may reduce the time our Manager and its officers and personnel spend managing us.

Management agreement and fees

Our management agreement with our Manager was negotiated between related parties and its terms, including fees and other amounts payable, may not be as favorable to us as if it had been negotiated at arm's length with an unaffiliated third party.

We have agreed to pay our Manager a management fee that is not tied to our performance. The management fee may not sufficiently incentivize our Manager to generate attractive risk-adjusted returns for us. This could hurt both our ability to make distributions to our stockholders and the market price of our common stock.

Investment allocation policies

Our Manager has an investment allocation policy in place that is designed to treat all of its client accounts fairly and equitably with the goal of providing all clients with the best execution under the circumstances for transactions in fixed-income securities. Our Manager's investment allocation policy provides that no single client is intentionally favored over another and the procedures associated with this policy require our Manager's investment management department to allocate trades in a fair and equitable manner. When possible, in order to minimize transaction costs and seek best execution for all client accounts, transactions may be bunched or blocked together, with securities generally allocated to client accounts on a pro rata basis. According to our Manager's investment allocation policy, investments may be allocated by taking into account factors, including but not limited to investment goals or guidelines, available cash, liquidity requirements, odd lot positions, minimum allocations, existing portfolio holdings compared to target weightings, regulatory and legal restrictions and the tax implications of an investment. Our Manager's investment allocation policy requires that these bunched or blocked trades be allocated on the same day they are executed and requires that all clients receive the same average cost for the transaction.

Our Manager periodically reviews its client accounts to identify situations where a potential conflict may exist, and when appropriate, may design specific procedures to address these situations. The investment allocation policy may be amended by our Manager at any time without our consent. To the extent that our Manager's or our business changes in such a way as to give rise to conflicts not currently addressed by our Manager's investment allocation policy, our Manager may need to refine its investment allocation policy to address such situation. Our independent directors will review our Manager's compliance with its investment allocation policy and the conflicts or potential conflicts of interest surrounding our Manager. In addition, to avoid any actual or perceived conflicts of interest with our Manager, prior to an acquisition of any security structured or issued by an entity managed by our Manager or any of its affiliates or the purchase or sale of any asset from or to an entity managed by our Manager or any of its affiliates, such transaction must be approved by our board of directors, including a majority of our independent directors.

Other clients of our Manager

We do not have any agreement or understanding with our Manager that would give us any priority over any other client of our Manager in opportunities to invest in Agency RMBS or any class of our potential target assets. Accordingly, we may compete for investment opportunities in these asset classes directly with other investment portfolios managed by our Manager. As discussed further below, several investment portfolios managed by our Manager invest primarily in real estate or real estate-related

Table of Contents

assets, including Agency RMBS and our potential target assets and a substantial number of investment portfolios managed by our Manager have exposure to Agency RMBS and our potential target assets. In addition, our Manager may in the future have additional clients that may compete with us for investment opportunities in Agency RMBS and our potential our target assets.

As of December 31, 2011, our Manager had a total of \$443 billion in assets under management. Of this total, \$61.5 billion was invested in Agency RMBS and our potential target assets, of which \$37.6 billion was invested in Agency RMBS, \$13.8 billion in non-Agency RMBS, \$2.4 billion in CMBS and \$7.7 billion in ABS. Our Manager manages a number of portfolios in strategies that invest primarily in real estate or real estate-related assets, including Agency RMBS and our potential target assets. These portfolios include mutual funds, private commingled investment vehicles and separate accounts. As of December 31, 2011, our Manager managed approximately \$2.1 billion in 15 separate accounts and \$5.3 billion in six commingled investment vehicles, which include mutual funds and private commingled investment vehicles, that invest primarily in Agency RMBS and our potential target assets. Of these 21 portfolios, six are included in the commingled investment vehicles for which we have provided further information under "Our Manager and the management agreement Historical performance of our Manager's investments in Agency RMBS and our potential target assets."

Our Manager also manages broad market portfolios that may have a material allocation to real estate or real estate-related assets, including Agency RMBS and our potential target assets, but have not invested primarily in real estate or real estate-related assets. Our Manager's broad market strategies that have exposure to Agency RMBS and our potential target assets but do not invest primarily in real estate or real estate-related assets include the following:

US Core: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$7.2 billion of Agency RMBS and our potential target assets in 51 US Core portfolios.

US Core Full: These portfolios use diversified strategies and cover all sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$30.0 billion of Agency RMBS and our potential target assets in 166 US Core Full portfolios.

US Enhanced Cash: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$1.8 billion of Agency RMBS and our potential target assets in 16 US Enhanced Cash portfolios.

US Index Plus: These portfolios use a synthetic index component that provides exposure to the equity benchmark through the use of derivatives, and a short duration component that employs a long term value-oriented approach utilizing diversified strategies and covering all sectors of the fixed-income market in an attempt to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$0.8 billion of Agency RMBS and our potential target assets in 10 US Index Plus accounts.

US Intermediate: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$2.1 billion of Agency RMBS and our potential target assets in 29 US Intermediate portfolios.

US Limited Duration: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$0.9 billion in 13 US Limited Duration portfolios.

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

Total Return Unconstrained: These portfolios employ an actively managed, diversified fixed-income strategy. As of December 31, 2011, our Manager managed approximately \$1.1 billion of Agency RMBS and our potential target assets in 14 Total Return Unconstrained portfolios.

Global Core Full: These portfolios use diversified strategies and cover all sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$0.5 billion of Agency RMBS and our potential target assets in 18 Global Core Full accounts.

Other business activities of our affiliates

We do not have a policy that expressly prohibits our directors, officers, security holders or affiliates from engaging for their own account in business activities of the types conducted by us. However, subject to our Manager's investment allocation policy, our code of conduct contains a conflicts of interest policy that prohibits our directors, officers and personnel, as well as employees of our Manager who provide services to us, from engaging in any transaction that involves an actual conflict of interest with us.

REIT qualification

We intend to elect and qualify as a REIT commencing with our taxable year ending December 31, 2012. Our qualification as a REIT depends upon our ability to meet on a continuing basis, through actual investment and operating results, various complex requirements under the Internal Revenue Code of 1986, as amended, or the Internal Revenue Code, relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the diversity of ownership of our shares. We believe that we have been organized in conformity with the requirements for qualification and taxation as a REIT under the Internal Revenue Code and that our intended manner of operation will enable us to meet the requirements for qualification and taxation as a REIT.

So long as we qualify as a REIT, we generally will not be subject to U.S. federal income tax on our net taxable income we distribute currently to our stockholders. If we fail to qualify as a REIT in any taxable year and do not qualify for certain statutory relief provisions, we will be subject to U.S. federal income tax at regular corporate rates and may be precluded from qualifying as a REIT for the subsequent four taxable years following the year during which we lost our REIT qualification. Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income or property.

1940 Act exemption

We intend to conduct our business so as not to become regulated as an investment company under the 1940 Act in reliance on the exemption provided by Section 3(c)(5)(C) of the 1940 Act. Section 3(c)(5)(C), as interpreted by the staff of the SEC, requires us to invest at least 55% of our assets in "mortgages and other liens on and interest in real estate," or "qualifying real estate interests," and at least 80% of our assets in qualifying real estate interests plus "real estate-related assets." In satisfying this 55% requirement, based on SEC staff guidance, we may treat Agency RMBS issued with respect to an underlying pool of mortgage loans in which we hold all of the certificates issued by the pool as qualifying real estate interests. The SEC staff has not issued guidance with respect to whole pool Non-Agency RMBS. Accordingly, based on our own judgment and analysis of the SEC's guidance with respect to whole pool Agency RMBS, we may also treat Non-Agency RMBS issued with respect to an underlying pool of mortgage loans in which we hold all of the certificates issued by the pool as qualifying real estate interests. We may also treat whole mortgage loans that we acquire directly as qualifying real estate interests provided that 100% of the loan is secured by real estate when we acquire it and we have the unilateral right to foreclose on the mortgage. We currently intend to treat

Table of Contents

partial pool Agency and Non-Agency RMBS and partial pool CMBS as real estate-related assets. We will treat any interest rate swaps or other derivative hedging transactions we enter into as miscellaneous assets that will not exceed 20% of our total assets. We expect to rely on guidance published by the SEC or its staff or on our analyses of guidance published with respect to other types of assets to determine which assets are qualifying real estate assets and real estate-related assets.

The SEC recently solicited public comment on a wide range of issues relating to Section 3(c)(5)(C), including the nature of the assets that qualify for purposes of the exemption and whether mortgage REITs should be regulated in a manner similar to investment companies. There can be no assurance that the laws and regulations governing the 1940 Act status of REITs, including the guidance of the SEC or its staff regarding this exemption, will not change in a manner that adversely affects our operations. To the extent that the SEC or its staff publishes new or different guidance with respect to these matters, we may be required to adjust our strategy accordingly. In addition, we may be limited in our ability to make certain investments and these limitations could require us to hold assets we might wish to sell or to sell assets we might wish to hold. To the extent that the SEC or its staff provides more specific guidance regarding any of the matters bearing upon the exemption we rely on from the 1940 Act, we may be required to adjust our strategy accordingly. Any additional guidance could provide additional flexibility to us, or it could further inhibit our ability to pursue the strategies we have chosen.

See "Business Operating and regulatory structure 1940 Act exemption" for a further discussion of the exemption from registration under the 1940 Act that we expect to rely on and the treatment of certain of our targeted asset classes for purposes of such exemptions.

Qualification for exemption from registration under the 1940 Act will limit our ability to make certain investments. See "Risk factors Risks related to our business Loss of our exemption from regulation pursuant to the 1940 Act would adversely affect us."

Restrictions on ownership of our common stock

To assist us in complying with the limitations on the concentration of ownership of a REIT imposed by the Internal Revenue Code, among other purposes, our certificate of incorporation prohibits, with certain exceptions, any stockholder from beneficially or constructively owning, applying certain attribution rules under the Internal Revenue Code, more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock, or 9.8% by value or number of shares, whichever is more restrictive, of our outstanding capital stock. Our board of directors may, in its sole discretion, waive the 9.8% ownership limit with respect to a particular stockholder; provided, however, that our board of directors may only waive the 9.8% ownership limit after it is presented with evidence satisfactory to it that such ownership will not then or in the future jeopardize our qualification as a REIT.

Our certificate of incorporation also prohibits any person from, among other things:

beneficially or constructively owning shares of our capital stock that would result in our being "closely held" under Section 856(h) of the Internal Revenue Code, or otherwise cause us to fail to qualify as a REIT; and

transferring shares of our capital stock if such transfer would result in our capital stock being owned by fewer than 100 persons.

In addition, our certificate of incorporation provides that any ownership or purported transfer of our capital stock in violation of the foregoing restrictions will result in the shares so owned or transferred being automatically transferred to a charitable trust for the benefit of a charitable beneficiary and the purported owner or transferee acquiring no rights in such shares. If a transfer to a

Table of Contents

charitable trust would be ineffective for any reason to prevent a violation of the restriction, the transfer resulting in such violation will be void from the time of such purported transfer.

Emerging growth company status

We are an "emerging growth company," as defined in the JOBS Act, and we are eligible to take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not "emerging growth companies" including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved. We have not made a decision whether to take advantage of any or all of these exemptions. If we do take advantage of any of these exemptions, we do not know if some investors will find our common stock less attractive as a result. The result may be a less active trading market for our common stock and our stock price may be more volatile.

In addition, Section 107 of the JOBS Act also provides that an "emerging growth company" can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. In other words, an "emerging growth company" can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. We intend to take advantage of such an extended transition period. Since we will not be required to comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for other public companies, our financial statements may not be comparable to the financial statements of companies that comply with public company effective dates. If we were to elect to comply with these public company effective dates, such election would be irrevocable pursuant to Section 107 of the JOBS Act.

We could remain an "emerging growth company" for up to five years, or until the earliest of (i) the last day of the first fiscal year in which our annual gross revenues exceed \$1 billion, (ii) December 31 of the fiscal year that we become a "large accelerated filer" as defined in Rule 12b-2 under the Exchange Act, which would occur if the market value of our common stock that is held by non-affiliates exceeds \$700 million as of the last business day of our most recently completed second fiscal quarter and we have been publicly reporting for at least 12 months or (iii) the date on which we have issued more than \$1 billion in non-convertible debt during the preceding three-year period.

Our corporate information

Our principal executive offices are located at 385 East Colorado Boulevard, Pasadena, California 91101. Our telephone number is (626) 844-9400. Our website is www.westernassetmcc.com. The contents of our website are not a part of this prospectus. The information on our website is not intended to form a part of or be incorporated by reference into this prospectus.

Table of Contents

The offering

Common stock offered by us	8,000,000 shares (plus up to an additional 1,200,000 shares of our common stock that we may issue and sell upon the exercise of the underwriters' overallotment option).
Common stock to be outstanding after this offering	10,333,489 shares. ⁽¹⁾
Use of proceeds	In this offering, we are offering 8,000,000 shares of our common stock at \$20.00 per share. Assuming no shares are issued pursuant to the underwriters' over-allotment option to purchase up to an additional 1,200,000 shares, this offering would result in gross proceeds of \$160.0 million to us. Concurrently with, and conditional upon the consummation of, this offering, we will also issue and sell (i) 2,231,787 units, with each unit consisting of one share of our common stock and a warrant to purchase 0.5 share of our common stock, to certain institutional accredited investors for \$20.00 per unit, and (ii) 46,043 shares of our common stock, at a price of \$20.00 per share to our Manager's deferred compensation plan in another private placement, in each case subject to certain adjustments as described in "Summary Concurrent private placements." The sale of our securities in these two private placements would result in gross proceeds of \$45.6 million to us. Our Manager has agreed to pay the \$ per share underwriting discount payable with respect to each share sold in this offering and the \$0.60 per unit placement agent fee payable with respect to each unit sold in the concurrent private placement of units to certain institutional accredited investors (other than to investors who have a pre-existing business relationship with our Manager for which there will not be any placement agent fee payable). No placement agent fee or underwriting discount will be payable with respect to the shares of common stock we will sell to our Manager's deferred compensation plan. We currently estimate our expenses attributable to our organization, this offering and the two private placements (other than the underwriting discount and the placement agent fee payable by our Manager) to be \$1.2 million. If the total attributable expenses exceed \$1.2 million, our Manager has agreed to reimburse us for any expenses that exceed this amount. Therefore, we estimate that our aggregate net proceeds from this offering and the two private placements will be \$204.4 million, after deducting estimated organizational and offering expenses payable by us (or \$232.0 million, if the underwriters exercise their overallotment option in full).

(1) Includes (i) 2,231,787 shares of our common stock included in the units to be issued and sold in the concurrent private placement to certain institutional accredited investors, (ii) 46,043 shares of our common stock to be issued and sold in the concurrent private placement to our Manager's deferred compensation plan on behalf of the beneficiaries of this plan, which includes certain executives and other employees of our Manager and its affiliates, with respect to clauses (i) and (ii) above, subject to certain adjustments as described in "Summary Concurrent private placements," (iii) 51,159 shares of our restricted common stock that we will grant to our Manager pursuant to our Manager Equity Plan and (iv) an aggregate of 4,500 shares of our restricted common stock to be granted to our three director nominees pursuant to our Equity Plan, each upon the closing of this offering. Excludes 252,676 shares of our common stock reserved that remain available for future grant under our equity incentive plans after giving effect to the grant of an aggregate of 55,659 shares concurrently with the closing of this offering. See "Management Equity incentive plans."

Table of Contents

We plan to use the net proceeds from this offering and the concurrent private placements to purchase Agency RMBS and our potential target assets, focusing predominantly on Agency RMBS. Subject to prevailing market conditions at the time of purchase, we currently expect that the capital we deploy will be used initially to purchase Agency RMBS and our potential target assets in the following ranges: approximately 85-100% Agency RMBS, approximately 0-15% non-Agency RMBS, approximately 0-5% CMBS and approximately 0-5% ABS. Until appropriate investments can be identified, our Manager may invest these proceeds in interest-bearing short-term investments, including money market accounts and/or funds, that are consistent with our intention to qualify as a REIT and maintain exemption from registration under the 1940 Act. These initial investments, if any, are expected to provide a lower net return than we will seek to achieve from investments in Agency RMBS and our potential target assets. We anticipate that we will be able to identify a sufficient amount of Agency RMBS and our potential target assets within approximately one to two months after the closing of this offering and the concurrent private placements. However, depending on the availability of appropriate investment opportunities and subject to prevailing market conditions, there can be no assurance that we will be able to identify a sufficient amount of investments within this timeframe. See "Use of proceeds."

Distribution policy

We intend to make regular quarterly distributions to holders of our common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its net taxable income and that it pay tax at regular corporate rates to the extent that it annually distributes less than 100% of its net taxable income. We generally intend to pay quarterly dividends to our stockholders in an amount equal to our net taxable income. We plan to pay our first distribution in respect of the period from the closing of this offering through June 30, 2012, which may be prior to the time that we have fully invested the net proceeds from this offering and the concurrent private placements in investments in Agency RMBS.

We cannot assure you that we will make any distributions to our stockholders. Any distributions that we make will be at the discretion of our board of directors and will depend upon, among other things, our actual results of operations. These results and our ability to pay distributions will be affected by various factors, including the net interest and other income from our portfolio, our operating expenses and any other expenditures. For more information, see "Distribution policy."

Ownership and transfer restrictions

To assist us in complying with limitations on the concentration of ownership of a REIT imposed by the Internal Revenue Code, among other purposes, our certificate of incorporation generally prohibits, among other prohibitions, any stockholder from beneficially or constructively owning more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock, or 9.8% by value or number of shares, whichever is more restrictive, of our outstanding capital stock. See "Description of Capital Stock Restrictions on ownership and transfer of our capital stock."

Risk factors

Investing in our common stock involves a high degree of risk. You should carefully read and consider the information set forth under the heading "Risk factors" beginning on page 25 of this prospectus and all other information in this prospectus before investing in our common stock.

Table of Contents

Risk factors

Investing in our common stock involves a high degree of risk. You should carefully consider the following risk factors and all other information contained in this prospectus before purchasing our common stock. If any of the following risks occur, our business, financial condition or results of operations could be materially and adversely affected. In that case, the trading price of our common stock could decline, and you may lose some or all of your investment.

Risks related to our business

We have no operating history and may not be able to successfully operate our business or generate sufficient revenue to make or sustain distributions to our stockholders.

We were organized as a Delaware corporation on June 3, 2009, but have had no operations since that time. We filed a Certificate of Dissolution in Delaware on May 5, 2010 and revoked such dissolution by filing a Certificate of Revocation of Dissolution on March 24, 2011. We have no operating history. We have no assets and will commence operations only upon completion of this offering and the concurrent private placements. We cannot assure you that we will be able to operate our business successfully or implement our operating policies and strategies as described in this prospectus. The results of our operations depend on several factors, including the availability of opportunities for the acquisition of assets, the level and volatility of interest rates, the availability of adequate short and long-term financing, conditions in the financial markets and economic conditions.

We may change any of our strategies, policies or procedures without stockholder consent.

We may change any of our strategies, policies or procedures with respect to investments, acquisitions, growth, operations, indebtedness, capitalization, distributions, financing strategy and leverage at any time without the consent of our stockholders, which could result in an investment portfolio with a different risk profile. A change in our investment strategy may increase our exposure to interest rate risk, default risk and real estate market fluctuations. Furthermore, a change in our asset allocation could result in our making investments in asset categories different from those described in this prospectus. These changes could adversely affect our financial condition, results of operations, the market price of our common stock and our ability to make distributions to our stockholders.

We have not yet identified any specific investments we may make with the net proceeds of this offering.

We have not yet identified any specific investments we may make with the net proceeds of this offering and as a result, you will not be able to evaluate any proposed investments before purchasing shares of our common stock. Additionally, our investments will be selected by our Manager and our stockholders will not have input into such investment decisions. Both of these factors will increase the uncertainty, and thus the risk, of investing in shares of our common stock.

Until appropriate investments can be identified, our Manager may invest the net proceeds of this offering and the concurrent private placements in interest-bearing short-term investments, including money market accounts and/or funds, that are consistent with our intention to qualify as a REIT. These initial investments, if any, are expected to provide a lower net return than we will seek to achieve from investments in Agency RMBS. We anticipate that we will be able to identify a sufficient amount of investments in Agency RMBS within approximately one to two months after the closing of this offering and the concurrent private placements. However, depending on the availability of appropriate investment opportunities and subject to prevailing market conditions, there can be no assurance that we will be able to identify a sufficient amount of investments within this timeframe. See "Use of proceeds." Our Manager intends to conduct due diligence with respect to each investment and suitable investment opportunities may not be immediately available. Even if opportunities are available, there

Table of Contents

can be no assurance that our Manager's due diligence processes will uncover all relevant facts or that any investment will be successful.

Furthermore, you will be unable to evaluate the manner in which the net proceeds of this offering and the concurrent private placements will be invested or the economic merit of our expected investments and, as a result, we may use the net proceeds from these offerings to make investments with which you may not agree. The failure of our management to apply these proceeds effectively or find investments that meet our investment criteria in sufficient time or on acceptable terms could result in unfavorable returns, could cause a material adverse effect on our business, financial condition, liquidity, results of operations and ability to make distributions to our stockholders, and could cause the value of our common stock to decline.

Risks related to our investing strategy

Mortgage loan modification and refinancing programs and future legislative action may adversely affect the value of, and our returns on, Agency RMBS and our potential target assets.

The U.S. Government, through the U.S. Federal Reserve, the Federal Housing Administration, or the FHA, and the Federal Deposit Insurance Corporation, has implemented a number of federal programs designed to assist homeowners, including the Home Affordable Modification Program, or HAMP, which provides homeowners with assistance in avoiding residential mortgage loan foreclosures, the Hope for Homeowners Program, or H4H Program, or HARP, which allows certain distressed borrowers to refinance their mortgages into FHA-insured loans in order to avoid residential mortgage loan foreclosures, and the Home Affordable Refinance Program, which allows borrowers who are current on their mortgage payments to refinance and reduce their monthly mortgage payments at loan-to-value ratios up to 125% (and, in some cases, above 125%) without new mortgage insurance. HAMP, the H4H Program and other loss mitigation programs may involve, among other things, the modification of mortgage loans to reduce the principal amount of the loans (through forbearance and/or forgiveness) and/or the rate of interest payable on the loans, or the extension of payment terms of the loans.

In September 2011, the White House announced they are working on a major plan to allow certain homeowners who owe more on their mortgages than their homes are worth to refinance. In October 2011, the FHFA announced changes to the HARP to expand access to refinancing for qualified individuals and families whose homes have lost value, including increasing the HARP loan-to-value ratio above 125%. However, this would only apply to mortgages guaranteed by the U.S. government-sponsored entities. There are many challenging issues to this proposal, notably the question as to whether a loan with a loan-to-value ratio of 125% qualifies as a mortgage or an unsecured consumer loan. The chances of this initiative's success have created additional uncertainty in the Agency RMBS market, particularly with respect to possible increases in prepayment rates. On January 4, 2012, the U.S. Federal Reserve issued a white paper outlining additional ideas with regard to refinancings and loan modifications. It is likely that loan modifications would result in increased prepayments on some Agency RMBS.

Especially with non-Agency RMBS, a significant number of loan modifications with respect to a given security, including, but not limited to, those related to principal forgiveness and coupon reduction, resulting in increased prepayment rates, could negatively impact the realized yields and cash flows on such security. These loan modification programs, future legislative or regulatory actions, including possible amendments to the bankruptcy laws, which result in the modification of outstanding residential mortgage loans, as well as changes in the requirements necessary to qualify for refinancing mortgage loans with the Federal National Mortgage Association, or FNMA, the Federal Home Loan Mortgage Corporation, or FHLMC, or the Government National Mortgage Association, or GNMA,

Table of Contents

may adversely affect the value of, and the returns on, Agency RMBS and our potential target assets that we may purchase.

Actions of the U.S. Government, including the U.S. Congress, Federal Reserve, U.S. Treasury and other governmental and regulatory bodies, to stabilize or reform the financial markets, or market responses to those actions, may not achieve the intended effect and may adversely affect our business.

In response to the financial issues affecting the banking system and financial markets and going concern threats to commercial banks, investment banks and other financial institutions, the Emergency Economic Stabilization Act, or EESA, was enacted by the U.S. Congress in 2008. There can be no assurance that the EESA or any other U.S. government actions will have a beneficial impact on the financial markets. To the extent the markets do not respond favorably to any such actions by the U.S. government or such actions do not function as intended, our business may not receive the anticipated positive impact from the legislation and such result may have broad adverse market implications.

In July 2010, the U.S. Congress enacted the Dodd Frank Wall Street Reform and Consumer Protection Act, or the Dodd-Frank Act, in part to impose significant investment restrictions and capital requirements on banking entities and other organizations that are significant to U.S. financial markets. For instance, the Dodd-Frank Act will impose significant restrictions on the proprietary trading activities of certain banking entities and subject other systemically significant organizations regulated by the U.S. Federal Reserve to increased capital requirements and quantitative limits for engaging in such activities. The Dodd-Frank Act also seeks to reform the asset-backed securitization market (including the mortgage-backed securities market) by requiring the retention of a portion of the credit risk inherent in the pool of securitized assets and by imposing additional registration and disclosure requirements. Certain of the new requirements and restrictions exempt Agency RMBS, other government issued or guaranteed securities, or other securities. Nonetheless, the Dodd-Frank Act also imposes significant regulatory restrictions on the origination of residential mortgage loans. While the full impact of the Dodd-Frank Act cannot be assessed until all implementing regulations are released, the Dodd-Frank Act's extensive requirements may have a significant effect on the financial markets, and may affect the availability or terms of financing from our lender counterparties and the availability or terms of mortgage-backed securities, both of which may have an adverse effect on our financial condition and results of operations.

In addition, the U.S. Government, Federal Reserve, U.S. Treasury and other governmental and regulatory bodies have taken or are considering taking other actions to address the financial crisis. We cannot predict whether or when such actions may occur or what effect, if any, such actions could have on our business, results of operations and financial condition.

The federal conservatorship of FNMA and FHLMC and related efforts, along with any changes in laws and regulations affecting the relationship between these agencies and the U.S. Government, may adversely affect our business.

The payments of principal and interest we receive on our Agency RMBS, which depend directly upon payments on the mortgages underlying such securities, are guaranteed by FNMA, FHLMC and GNMA. FNMA and FHLMC are U.S. Government-sponsored entities, or GSEs, but their guarantees are not backed by the full faith and credit of the United States. GNMA is part of a U.S. Government agency and its guarantees are backed by the full faith and credit of the United States.

In response to general market instability and, more specifically, the financial conditions of FNMA and FHLMC, in July 2008, the Housing and Economic Recovery Act of 2008, or HERA, established a new regulator for FNMA and FHLMC, the U.S. Federal Housing Finance Agency, or the FHFA. In September 2008, the U.S. Treasury, the FHFA and the U.S. Federal Reserve announced a comprehensive action plan to help stabilize the financial markets, support the availability of mortgage

Table of Contents

financing and protect taxpayers. Under this plan, among other things, the FHFA was appointed as conservator of both FNMA and FHLMC, allowing the FHFA to control the actions of the two GSEs, without forcing them to liquidate, which would be the case under receivership. Importantly, the primary focus of the plan was to increase the availability of mortgage financing by allowing these GSEs to continue to grow their guarantee business without limit, while limiting the size of their retained mortgage and agency security portfolios and requiring that these portfolios be reduced over time.

Although the U.S. Government has committed to support the positive net worth of FNMA and FHLMC through 2012, there can be no assurance that these actions will be adequate for their needs. These uncertainties lead to questions about the availability of, and trading market for, Agency RMBS. Despite the steps taken by the U.S. Government, FNMA and FHLMC could default on their guarantee obligations which would materially and adversely affect the value of our Agency RMBS. Accordingly, if these government actions are inadequate and the GSEs continue to suffer losses or cease to exist, our business, operations and financial condition could be materially and adversely affected.

In addition, the problems faced by FNMA and FHLMC resulting in their being placed into federal conservatorship and receiving significant U.S. Government support have sparked serious debate among federal policy makers regarding the continued role of the U.S. Government in providing liquidity for mortgage loans. The future roles of FNMA and FHLMC could be significantly reduced and the nature of their guarantee obligations could be considerably limited relative to historical measurements. Any such changes to the nature of their guarantee obligations could redefine what constitutes an agency security and could have broad adverse implications for the market and our business, operations and financial condition. If FNMA or FHLMC were eliminated, or their structures were to change radically (*i.e.*, limitation or removal of the guarantee obligation), or their market share reduced because of required price increases or lower limits on the loans they can guarantee, we could be unable to acquire additional Agency RMBS and our existing Agency RMBS could be materially and adversely impacted.

We could be negatively affected in a number of ways depending on the manner in which related events unfold for FNMA and FHLMC. We will rely on our Agency RMBS (as well as non-Agency RMBS) as collateral for our financings under the repurchase agreements that we intend to enter into upon the completion of this offering. Any decline in their value, or perceived market uncertainty about their value, would make it more difficult for us to obtain financing on our Agency RMBS on acceptable terms or at all, or to maintain our compliance with the terms of any financing transactions. Further, the current support provided by the U.S. Treasury to FNMA and FHLMC, and any additional support it may provide in the future, could have the effect of lowering the interest rates we expect to receive from Agency RMBS, thereby tightening the spread between the interest we earn on our Agency RMBS and the cost of financing those assets. A reduction in the supply of Agency RMBS could also negatively affect the pricing of Agency RMBS by reducing the spread between the interest we earn on our investment portfolio of Agency RMBS and our cost of financing that portfolio.

As indicated above, recent legislation has changed the relationship between FNMA and FHLMC and the U.S. Government. Future legislation could further change the relationship between FNMA and FHLMC and the U.S. Government, and could also nationalize, privatize, or eliminate such entities entirely. Any law affecting these GSEs may create market uncertainty and have the effect of reducing the actual or perceived credit quality of securities issued or guaranteed by FNMA or FHLMC. As a result, such laws could increase the risk of loss on our investments in Agency RMBS guaranteed by FNMA and/or FHLMC. It also is possible that such laws could adversely impact the market for such securities and spreads at which they trade. All of the foregoing could materially and adversely affect our financial condition and results of operations.

Table of Contents

We will be subject to the risk that U.S. Government agencies and/or GSEs may not be able to fully satisfy their guarantees of Agency RMBS or that these guarantee obligations may be repudiated, which may adversely affect the value of our assets and our ability to sell or finance these securities.

The interest and principal payments we will receive on the Agency RMBS in which we intend to invest will be guaranteed by FNMA, FHLMC or the GNMA. Unlike the GNMA securities in which we may invest, the principal and interest on securities issued by FNMA and FHLMC are not guaranteed by the U.S. government. All the Agency RMBS in which we intend to invest depend on a steady stream of payments on the mortgages underlying the securities.

As conservator of FNMA and FHLMC, the FHFA may disaffirm or repudiate contracts (subject to certain limitations for qualified financial contracts) that FHLMC or FNMA entered into prior to the FHFA's appointment as conservator if it determines, in its sole discretion, that performance of the contract is burdensome and that disaffirmation or repudiation of the contract promotes the orderly administration of its affairs. The HERA requires the FHFA to exercise its right to disaffirm or repudiate most contracts within a reasonable period of time after its appointment as conservator. FNMA and FHLMC have disclosed that the FHFA has disaffirmed certain consulting and other contracts that these entities entered into prior to the FHFA's appointment as conservator. FHLMC and FNMA have also disclosed that the FHFA has advised that it does not intend to repudiate any guarantee obligation relating to FNMA and FHLMC's mortgage-related securities, because the FHFA views repudiation as incompatible with the goals of the conservatorship. In addition, the HERA provides that mortgage loans and mortgage-related assets that have been transferred to a FHLMC or FNMA securitization trust must be held for the beneficial owners of the related mortgage-related securities, and cannot be used to satisfy the general creditors of FHLMC or FNMA.

If the guarantee obligations of FHLMC or FNMA were repudiated by FHFA, payments of principal and/or interest to holders of Agency RMBS issued by FHLMC or FNMA would be reduced in the event of any borrowers' late payments or failure to pay or a servicer's failure to remit borrower payments to the trust. In that case, trust administration and servicing fees could be paid from mortgage payments prior to distributions to holders of Agency RMBS. Any actual direct compensatory damages owed due to the repudiation of FHLMC or FNMA's guarantee obligations may not be sufficient to offset any shortfalls experienced by holders of Agency RMBS. FHFA also has the right to transfer or sell any asset or liability of FHLMC or FNMA, including its guarantee obligation, without any approval, assignment or consent. If FHFA were to transfer FHLMC or FNMA's guarantee obligations to another party, holders of Agency RMBS would have to rely on that party for satisfaction of the guarantee obligation and would be exposed to the credit risk of that party.

We operate in a highly competitive market for investment opportunities and competition may limit our ability to acquire desirable investments in Agency RMBS and our potential target assets and could also affect the pricing of these securities.

We operate in a highly competitive market for investment opportunities. Our profitability depends, in large part, on our ability to acquire Agency RMBS and our potential target assets at attractive prices. In acquiring these assets, we will compete with a variety of institutional investors, including other REITs, specialty finance companies, public and private funds (including other funds managed by our Manager), commercial and investment banks, commercial finance and insurance companies and other financial institutions. Many of our competitors are substantially larger and have considerably greater financial, technical, marketing and other resources than we do. Several other REITs have recently raised, or are expected to raise, significant amounts of capital, and may have investment objectives that overlap with ours, which may create additional competition for investment opportunities. Some competitors may have a lower cost of funds and access to funding sources that may not be available to us, such as funding from the U.S. Government. Many of our competitors are not subject to the operating constraints associated with REIT tax compliance or maintenance of an exemption from

Table of Contents

the 1940 Act. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, competition for investments in Agency RMBS and our potential target assets may lead to the price of such assets increasing, which may further limit our ability to generate desired returns. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, desirable investments in these assets may be limited in the future and we may not be able to take advantage of attractive investment opportunities from time to time, as we can provide no assurance that we will be able to identify and make investments that are consistent with our investment objectives.

The lack of liquidity in our investments may adversely affect our business.

We expect that the assets that we will acquire will not be publicly traded. A lack of liquidity may result from the absence of a willing buyer or an established market for these assets, as well as legal or contractual restrictions on resale or the unavailability of financing for these assets. In addition, mortgage-related assets generally experience periods of illiquidity, including the recent period of delinquencies and defaults with respect to residential and commercial mortgage loans. The illiquidity of our investments may make it difficult for us to sell such investments if the need or desire arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. Further, we may face other restrictions on our ability to liquidate an investment in a business entity to the extent that we or our Manager has or could be attributed with material, non-public information regarding such business entity. As a result, our ability to vary our portfolio in response to changes in economic and other conditions may be relatively limited, which could adversely affect our results of operations and financial condition.

Adverse developments in the broader residential mortgage market may adversely affect the value of the assets in which we intend to invest.

Since 2007, the residential mortgage market in the United States has experienced a variety of unprecedented difficulties and changed economic conditions, including defaults, credit losses and liquidity concerns. Certain commercial banks, investment banks and insurance companies announced extensive losses from exposure to the residential mortgage market. These losses reduced financial industry capital, leading to reduced liquidity for some institutions. These factors have impacted investor perception of the risk associated with real estate-related assets, including Agency RMBS and other high-quality RMBS assets. As a result, values for RMBS assets, including some Agency RMBS and other AAA-rated RMBS assets, have experienced a certain amount of volatility. Further increased volatility and deterioration in the broader residential mortgage and RMBS markets may adversely affect the performance and market value of the Agency and non-Agency RMBS in which we intend to invest.

We intend to invest in Agency RMBS and non-Agency RMBS. We will need to rely on our securities as collateral for our financings. Any decline in their value, or perceived market uncertainty about their value, would likely make it difficult for us to obtain financing on favorable terms or at all, or maintain our compliance with terms of any financing arrangements already in place. The securities we intend to acquire will be classified for accounting purposes as available-for-sale. All assets classified as available-for-sale will be reported at fair value, based on market prices from third-party sources, with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders' equity. As a result, a decline in fair values may reduce the book value of our assets. Moreover, if the decline in fair value of an available-for-sale security is other-than-temporarily

Table of Contents

impaired, such decline will reduce earnings. If market conditions result in a decline in the fair value of our assets, our financial position and results of operations could be adversely affected.

A prolonged economic recession and further declining real estate values could impair our assets and harm our operations.

The risks associated with our business are more severe during economic recessions and are compounded by declining real estate values. The non-Agency RMBS in which we may invest a part of our capital will be particularly sensitive to these risks. Declining real estate values will likely reduce the level of new mortgage loan originations since borrowers often use appreciation in the value of their existing properties to support the purchase of additional properties. Borrowers will also be less able to pay principal and interest on loans underlying the securities in which we invest if the value of residential real estate weakens further. Further, declining real estate values significantly increase the likelihood that we will incur losses on non-Agency RMBS in the event of default because the value of collateral on the mortgages underlying such securities may be insufficient to cover the outstanding principal amount of the loan. Any sustained period of increased payment delinquencies, foreclosures or losses could adversely affect both our net interest income from non-Agency RMBS in our portfolio, which could have an adverse effect on our financial condition, results of operations and our ability to make distributions to our stockholders.

Our investments in non-Agency RMBS are generally subject to losses.

We may acquire non-Agency RMBS. In general, losses on a mortgaged property securing a mortgage loan included in a securitization will be borne first by the equity holder of the property, then by a cash reserve fund or letter of credit, if any, then by the holder of a mezzanine loan or B-Note, if any, then by the "first loss" subordinated security holder and then by the holder of a higher-rated security. In the event of default and the exhaustion of any equity support, reserve fund, letter of credit, mezzanine loans or B-Notes, and any classes of securities junior to those in which we invest, we will not be able to recover all of our investment in the securities we purchase. In addition, if the underlying mortgage portfolio has been overvalued by the originator, or if the values subsequently decline and, as a result, less collateral is available to satisfy interest and principal payments due on the related non-Agency RMBS. The prices of lower credit quality securities are generally less sensitive to interest rate changes than more highly rated investments, but more sensitive to adverse economic downturns or individual issuer developments.

The mortgage loans underlying the non-Agency RMBS that we may acquire will be subject to defaults, foreclosure timeline extension, fraud and residential price depreciation and unfavorable modification of loan principal amount, interest rate and amortization of principal, which could result in losses to us.

Our potential investments in non-Agency RMBS will be subject to the risks of defaults, foreclosure timeline extension, fraud and home price depreciation and unfavorable modification of loan principal amount, interest rate and amortization of principal, accompanying the underlying residential mortgage loans. The ability of a borrower to repay a mortgage loan secured by a residential property is dependent upon the income or assets of the borrower. A number of factors may impair borrowers' abilities to repay their loans, including:

adverse changes in national and local economic and market conditions;

changes in governmental laws and regulations, fiscal policies and zoning ordinances and the related costs of compliance with laws and regulations, fiscal policies and ordinances;

costs of remediation and liabilities associated with environmental conditions such as indoor mold;

Table of Contents

the potential for uninsured or under-insured property losses;

acts of God, including earthquakes, floods and other natural disasters, which may result in uninsured losses; and

acts of war or terrorism, including the consequences of terrorist attacks, such as those that occurred on September 11, 2001.

In the event of defaults on the residential mortgage loans that underlie our investments in non-Agency RMBS and the exhaustion of any underlying or any additional credit support, we may not realize our anticipated return on our investments and we may incur a loss on these investments. In addition, our investments in non-Agency RMBS will be backed by residential real property but, in contrast to Agency RMBS, their principal and interest will not be guaranteed by a U.S. Government agency or a GSE. The ability of a borrower to repay these loans or other financial assets is dependent upon the income or assets of these borrowers.

We may be affected by alleged or actual deficiencies in foreclosure practices of third parties, as well as related delays in the foreclosure process.

Allegations of deficiencies in servicing and foreclosure practices among several large sellers and servicers of residential mortgage loans that surfaced in 2010 raised various concerns relating to such practices, including the improper execution of the documents used in foreclosure proceedings (so-called "robo signing"), inadequate documentation of transfers and registrations of mortgages and assignments of loans, improper modifications of loans, violations of representations and warranties at the date of securitization and failure to enforce put-backs.

As a result of alleged deficiencies in foreclosure practices, a number of servicers temporarily suspended foreclosure proceedings beginning in the second half of 2010 while they evaluated their foreclosure practices. In late 2010, a group of state attorneys general and state bank and mortgage regulators representing nearly all 50 states and the District of Columbia, along with the U.S. Justice Department and the Department of Housing and Urban Development, began an investigation into foreclosure practices of banks and servicers. The investigations and lawsuits by several state attorneys general led to a proposed settlement agreement in early February 2012 with five of the nation's largest banks, pursuant to which the banks agreed to pay more than \$25 billion to settle claims relating to improper foreclosure practices. The proposed settlement does not prohibit the states, the federal government, individuals or investors in RMBS from pursuing additional actions against the banks and servicers in the future.

The integrity of the servicing and foreclosure processes are critical to the value of the mortgage loan portfolios underlying the RMBS in which we intend to invest, and our financial results could be adversely affected by deficiencies in the conduct of those processes. For example, delays in the foreclosure process that have resulted from investigations into improper servicing practices may adversely affect the values of, and our losses on, the non-Agency RMBS we may acquire. Foreclosure delays may also increase the administrative expenses of the securitization trusts for the non-Agency RMBS, thereby reducing the amount of funds available for distribution to investors. In addition, the subordinate classes of securities issued by the securitization trusts may continue to receive interest payments while the defaulted loans remain in the trusts, rather than absorbing the default losses. This may reduce the amount of credit support available for the senior classes we may own, thus possibly adversely affecting these securities. Additionally, a substantial portion of the proposed \$25 billion settlement is intended to be a "credit" to the banks and servicers for principal write-downs or reductions they may make to certain mortgages underlying RMBS. There remains considerable uncertainty as to how these principal reductions will work and what effect they will have on the value of related RMBS; as a result, there can be no assurance that any such principal reductions will not adversely affect the value of certain of the RMBS in which we intend to invest.

Table of Contents

While we believe that the sellers and servicers would be in violation of their servicing contracts to the extent that they have improperly serviced mortgage loans or improperly executed documents in foreclosure or bankruptcy proceedings, or do not comply with the terms of servicing contracts when deciding whether to apply principal reductions, it may be difficult, expensive, and time consuming for us to enforce our contractual rights. We continue to monitor and review the issues raised by the alleged improper foreclosure practices. While we cannot predict exactly how the servicing and foreclosure matters or the resulting litigation or settlement agreements will affect our business, there can be no assurance that these matters will not have an adverse impact on our results of operations and financial condition.

The commercial mortgage loans underlying the CMBS we may acquire will be subject to defaults, foreclosure timeline extension, fraud and commercial price depreciation and unfavorable modification of loan principal amount, interest rate and amortization of principal, which could result in losses to us.

CMBS are secured by a single commercial mortgage loan or a pool of commercial mortgage loans. Commercial mortgage loans are secured by multifamily or commercial property and are subject to risks of delinquency and foreclosure, and risks of loss that may be greater than similar risks associated with loans made on the security of residential property. The ability of a borrower to repay a loan secured by an income-producing property typically is dependent primarily upon the successful operation of such property rather than upon the existence of independent income or assets of the borrower. If the net operating income of the property is reduced, the borrower's ability to repay the loan may be impaired. Net operating income of an income-producing property can be affected by, among other things,

tenant mix;

success of tenant businesses;

property management decisions;

property location and condition;

competition from comparable types of properties;

changes in laws that increase operating expenses or limit rents that may be charged;

any need to address environmental contamination at the property or the occurrence of any uninsured casualty at the property;

changes in national, regional or local economic conditions and/or specific industry segments;

declines in regional or local real estate values;

declines in regional or local rental or occupancy rates;

increases in interest rates;

real estate tax rates and other operating expenses;

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

changes in governmental rules, regulations and fiscal policies, including environmental legislation; and

acts of God, terrorist attacks, social unrest and civil disturbances.

If our Manager overestimates the loss-adjusted yields of our CMBS investments, we may experience losses.

Our Manager will value our CMBS investments based on loss-adjusted yields, taking into account estimated future losses on the mortgage loans included in the securitization's pool of loans, and the estimated impact of these losses on expected future cash flows. Our Manager's loss estimates may not prove accurate, as actual results may vary from estimates. In the event that our Manager underestimates the pool level losses relative to the price we pay for a particular CMBS investment, we may experience losses with respect to such investment.

Table of Contents

We may not control the special servicing of the mortgage loans included in the CMBS in which we invest and, in such cases, the special servicer may take actions that could adversely affect our interests.

With respect to CMBS in which we invest, overall control over the special servicing of the related underlying mortgage loans will be held by a "directing certificateholder" or a "controlling class representative," which is appointed by the holders of the most subordinate class of CMBS in such series. We may not have the right to appoint the directing certificateholder. In connection with the servicing of the specially serviced mortgage loans, the related special servicer may, at the direction of the directing certificateholder, take actions with respect to the specially serviced mortgage loans that could adversely affect our interests.

The receivables underlying the ABS we may acquire are subject to credit exposure, which could result in losses to us.

ABS are securities backed by various asset classes including auto loans, student loans, credit card loans, equipment loans, floor plan loans and small business loans fully guaranteed as to principal and interest by the U.S. Small Business Administration, or the SBA. ABS remain subject to the credit exposure of the underlying receivables. In the event of increased rates of delinquency with respect to any receivables underlying our ABS, we may not realize our anticipated return on these investments.

We may experience a decline in the market value of our assets.

A decline in the market value of our assets may require us to recognize an "other-than-temporary" impairment against such assets under U.S. GAAP if we were to determine that, with respect to any assets in unrealized loss positions, we do not have the ability and intent to hold such assets to maturity or for a period of time sufficient to allow for recovery to the amortized cost of such assets. If such a determination were to be made, we would recognize unrealized losses through earnings and write down the amortized cost of such assets to a new cost basis, based on the fair market value of such assets on the date they are considered to be other-than-temporarily impaired. Such impairment charges reflect non-cash losses at the time of recognition; subsequent disposition or sale of such assets could further affect our future losses or gains, as they are based on the difference between the sale price received and adjusted amortized cost of such assets at the time of sale.

Some of our portfolio investments will be recorded at fair value and, as a result, there will be uncertainty as to the value of these investments.

Some of our portfolio investments will be in the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable. We will value these investments quarterly at fair value, as determined in accordance with Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosures, which may include unobservable inputs. Because such valuations are subjective, the fair value of certain of our assets may fluctuate over short periods of time and our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. The value of our common stock could be adversely affected if our determinations regarding the fair value of these investments were materially higher than the values that we ultimately realize upon their disposal.

Because we intend to acquire fixed-rate securities, an increase in interest rates on our borrowings may adversely affect our book value.

Increases in interest rates may negatively affect the market value of our assets. Any fixed-rate securities that we invest in generally will be more negatively affected by these increases than adjustable-rate securities. In accordance with accounting rules, we will be required to reduce our book value by the amount of any decrease in the market value of our assets that are classified for accounting

Table of Contents

purposes as available-for-sale. We will be required to evaluate our assets on a quarterly basis to determine their fair value by using third party bid price indications provided by dealers who make markets in these securities or by third-party pricing services. If the fair value of a security is not available from a dealer or third-party pricing service, we will estimate the fair value of the security using a variety of models and analyses, taking into consideration aggregate characteristics including, but not limited to, type of collateral, index, margin, periodic interest rate caps, lifetime interest rate caps, underwriting standards, age and delinquency experience. However, the fair value reflects estimates and may not be indicative of the amounts we would receive in a current market exchange. If we determine that an agency security is other-than-temporarily impaired, we would be required to reduce the value of such agency security on our balance sheet by recording an impairment charge in our income statement and our stockholders' equity would be correspondingly reduced. Reductions in stockholders' equity decrease the amounts that we may borrow to purchase additional assets, which could restrict our ability to increase our net income.

An increase in interest rates may cause a decrease in the volume of certain of our assets, which could adversely affect our ability to acquire assets that satisfy our investment objectives and to generate income and make distributions.

Rising interest rates generally reduce the demand for mortgage loans due to the higher cost of borrowing. A reduction in the volume of mortgage loans originated may affect the volume of Agency RMBS and our potential target assets available to us, which could adversely affect our ability to acquire assets that satisfy our investment objectives. Rising interest rates may also cause our assets that were issued prior to an interest rate increase to provide yields that are below prevailing market interest rates. If rising interest rates cause us to be unable to acquire a sufficient volume of Agency RMBS and our potential target assets with a yield that is above our borrowing cost, our ability to satisfy our investment objectives and to generate income and make distributions may be materially and adversely affected.

The relationship between short-term and longer-term interest rates is often referred to as the "yield curve." Ordinarily, short-term interest rates are lower than longer-term interest rates. If short-term interest rates rise disproportionately relative to longer-term interest rates (a flattening of the yield curve), our borrowing costs may increase more rapidly than the interest income earned on our assets. Because we expect our investments, on average, generally will bear interest based on longer-term rates than our borrowings, a flattening of the yield curve would tend to decrease our net income and the market value of our net assets. Additionally, to the extent cash flows from investments that return scheduled and unscheduled principal are reinvested, the spread between the yields on the new investments and available borrowing rates may decline, which would likely decrease our net income. It is also possible that short-term interest rates may exceed longer-term interest rates (a yield curve inversion), in which event our borrowing costs may exceed our interest income and we could incur operating losses.

Increases in interest rates could adversely affect the value of our investments and cause our interest expense to increase, which could result in reduced earnings or losses and negatively affect our profitability as well as the cash available for distribution to our stockholders.

We will seek to invest in Agency RMBS, and may also invest in non-Agency RMBS, CMBS and ABS. In a normal yield curve environment, an investment in such assets will generally decline in value if long-term interest rates increase. Declines in market value may ultimately reduce earnings or result in losses to us, which may negatively affect cash available for distribution to our stockholders.

A significant risk associated with Agency RMBS and our potential target assets is the risk that both long-term and short-term interest rates will increase significantly. If long-term rates increased significantly, the market value of these investments would decline, and the duration and weighted

Table of Contents

average life of the investments would increase. We could realize a loss if the securities were sold. At the same time, an increase in short-term interest rates would increase the amount of interest owed on any repurchase agreements we may enter into.

Market values of our investments may decline without any general increase in interest rates for a number of reasons, such as increases or expected increases in defaults, or increases or expected increases in voluntary prepayments for those investments that are subject to prepayment risk or widening of credit spreads.

In addition, in a period of rising interest rates, our operating results will depend in large part on the difference between the income from our assets and our financing costs. We anticipate that, in most cases, the income from such assets will respond more slowly to interest rate fluctuations than the cost of our borrowings. Consequently, changes in interest rates, particularly short-term interest rates, may significantly influence our net income. Increases in these rates will tend to decrease our net income and market value of our assets.

Interest rate mismatches between our RMBS backed by ARMs or hybrid ARMs and our borrowings used to fund our purchases of these assets may cause us to suffer losses.

We may fund our RMBS with borrowings that have interest rates that adjust more frequently than the interest rate indices and repricing terms of RMBS backed by adjustable-rate mortgages, or ARMs, or hybrid ARMs. Accordingly, if short-term interest rates increase, our borrowing costs may increase faster than the interest rates on RMBS backed by ARMs or hybrid ARMs adjust. As a result, in a period of rising interest rates, we could experience a decrease in net income or a net loss.

In most cases, the interest rate indices and repricing terms of RMBS backed by ARMs or hybrid ARMs and our borrowings will not be identical, thereby potentially creating an interest rate mismatch between our investments and our borrowings. While the historical spread between relevant short-term interest rate indices has been relatively stable, there have been periods when the spread between these indices was volatile. During periods of changing interest rates, these interest rate index mismatches could reduce our net income or produce a net loss, and adversely affect the level of our dividends and the market price of our common stock.

In addition, RMBS backed by ARMs or hybrid ARMs will typically be subject to lifetime interest rate caps that limit the amount an interest rate can increase through the maturity of the RMBS. However, our borrowings under repurchase agreements typically will not be subject to similar restrictions. Accordingly, in a period of rapidly increasing interest rates, the interest rates paid on our borrowings could increase without limitation while caps could limit the interest rates on these types of RMBS. This problem is magnified for RMBS backed by ARMs or hybrid ARMs that are not fully indexed. Further, some RMBS backed by ARMs or hybrid ARMs may be subject to periodic payment caps that result in a portion of the interest being deferred and added to the principal outstanding. As a result, we may receive less cash income on these types of RMBS than we need to pay interest on our related borrowings. These factors could reduce our net interest income and cause us to suffer a loss during periods of rising interest rates.

Interest rate fluctuations may adversely affect the level of our net income and the value of our assets and common stock.

Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Interest rate fluctuations present a variety of risks, including the risk of a narrowing of the difference between asset yields and borrowing rates, flattening or inversion of the yield curve and fluctuating prepayment rates, and may adversely affect our income and the value of our assets and common stock.

Table of Contents

Increases in interest rates may negatively affect the market value of the fixed-rate mortgages, or FRMs, and hybrid ARMs in which we intend to invest. In accordance with accounting rules, we will be required to reduce our stockholders' equity, or book value, by the amount of any decrease in the market value of our securities that are classified for accounting purposes as available-for-sale. We will be required to evaluate our securities on a quarterly basis to determine their fair value by using third party bid price indications provided by dealers who make markets in these securities or by third-party pricing services. If the fair value of a security is not available from a dealer or third-party pricing service, we will estimate the fair value of the security using a variety of methods including, but not limited to, discounted cash flow analysis, matrix pricing, option-adjusted spread models and fundamental analysis. Aggregate characteristics taken into consideration include, but are not limited to, type of collateral, index, margin, periodic cap, lifetime cap, underwriting standards, age and delinquency experience. However, the fair value reflects estimates and may not be indicative of the amounts we would receive in a current market sale transaction. If we determine that a security is other-than-temporarily impaired, we would be required to reduce the value of such security on our balance sheet by recording an impairment charge in our income statement and our stockholders' equity would be correspondingly reduced. Reductions in stockholders' equity decrease the amounts we may borrow to purchase additional securities, which could restrict our ability to increase our net income. In addition, rising interest rates generally reduce the demand for consumer credit, including mortgage loans, due to the higher cost of borrowing. A reduction in the volume of mortgage loans originated may affect the volume of RMBS available to us, which could affect our ability to acquire assets that satisfy our investment objectives.

Changes in prepayment rates may adversely affect our profitability.

The RMBS assets we intend to acquire are backed by pools of residential mortgage loans. We receive payments, generally, from the payments that are made on these underlying residential mortgage loans. When borrowers prepay their residential mortgage loans at rates that are faster than expected, this results in prepayments that are faster than expected on the related RMBS. These faster than expected payments may adversely affect our profitability.

We may purchase RMBS assets that have a higher interest rate than the then prevailing market interest rate. In exchange for this higher interest rate, we may pay a premium to par value to acquire the asset. In accordance with accounting rules, we will amortize this premium over the expected term of the asset based on our prepayment assumptions. If the asset is prepaid in whole or in part at a faster than expected rate, however, we must expense all or a part of the remaining unamortized portion of the premium that was paid at the time of the purchase, which will adversely affect our profitability.

Prepayment rates generally increase when interest rates fall and decrease when interest rates rise, but changes in prepayment rates are difficult to predict. Prepayments can also occur when borrowers default on their residential mortgages and the mortgages are prepaid from the proceeds of a foreclosure sale of the property, or when borrowers sell the property and use the sale proceeds to prepay the mortgage as part of a physical relocation. Prepayment rates also may be affected by conditions in the housing and financial markets, increasing defaults on residential mortgage loans, which could lead to an acceleration of the payment of the related principal, general economic conditions and the relative interest rates on FRMs and ARMs. While we will seek to manage prepayment risk, in selecting RMBS investments we must balance prepayment risk against other risks, the potential returns of each investment and the cost of hedging our risks. No strategy can completely insulate us from prepayment or other such risks, and we may deliberately retain exposure to prepayment or other risks.

Table of Contents

In addition, a decrease in prepayment rates may adversely affect our profitability. When borrowers prepay their residential mortgage loans at slower than expected rates, prepayments on the RMBS may be slower than expected. These slower than expected payments may adversely affect our profitability. We may purchase RMBS assets that have a lower interest rate than the then prevailing market interest rate. In exchange for this lower interest rate, we may pay a discount to par value to acquire the asset. In accordance with accounting rules, we will accrete this discount over the expected term of the asset based on our prepayment assumptions. If the asset is prepaid at a slower than expected rate, however, we must accrete the remaining portion of the discount at a slower than expected rate. This will extend the expected life of the asset and result in a lower than expected yield on assets purchased at a discount to par.

We are highly dependent on information systems and systems failures could significantly disrupt our business, which may, in turn, negatively affect the market price of our common stock and our ability to make distributions to all stockholders.

Our business is highly dependent on communications and information systems of our Manager. Any failure or interruption of our Manager's systems could cause delays or other problems in our securities trading activities, which could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to make distributions to our stockholders.

Loss of our exemption from regulation pursuant to the 1940 Act would adversely affect us.

We intend to conduct our business so as not to become regulated as an investment company under the 1940 Act in reliance on the exemption provided by Section 3(c)(5)(C) of the 1940 Act. Section 3(c)(5)(C), as interpreted by the staff of the SEC, requires that: (i) at least 55% of our investment portfolio consist of "mortgages and other liens on and interest in real estate," or "qualifying real estate interests," and (ii) at least 80% of our investment portfolio consist of qualifying real estate interests plus "real estate-related assets." In satisfying this 55% requirement, based on SEC staff guidance, we may treat whole pool Agency RMBS as qualifying real estate interests. The SEC staff has not issued guidance with respect to whole pool Non-Agency RMBS. Accordingly, based on our own judgment and analysis of the SEC's guidance with respect to whole pool Agency RMBS, we may also treat Non-Agency RMBS issued with respect to an underlying pool of mortgage loans in which we hold all of the certificates issued by the pool as qualifying real estate interests. We may also treat whole mortgage loans that we acquire directly as qualifying real estate interests provided that 100% of the loan is secured by real estate when we acquire it and we have the unilateral right to foreclose on the mortgage. We currently intend to treat partial pool Agency and Non-Agency RMBS and partial pool CMBS as real estate-related assets. We will treat any interest rate swaps or other derivative hedging transactions we enter into as miscellaneous assets that will not exceed 20% of our total assets. We expect to rely on guidance published by the SEC or its staff or on our analyses of guidance published with respect to other types of assets to determine which assets are qualifying real estate assets and real estate-related assets.

The SEC recently solicited public comment on a wide range of issues relating to Section 3(c)(5)(C), including the nature of the assets that qualify for purposes of the exemption and whether mortgage REITs should be regulated in a manner similar to investment companies. There can be no assurance that the laws and regulations governing the 1940 Act status of REITs, including the guidance of the SEC or its staff regarding this exemption, will not change in a manner that adversely affects our operations. To the extent that the SEC or its staff publishes new or different guidance with respect to these matters, we may be required to adjust our strategy accordingly. In addition, we may be limited in our ability to make certain investments and these limitations could require us to hold assets we might wish to sell or to sell assets we might wish to hold. To the extent that the SEC or its staff

Table of Contents

provides more specific guidance regarding any of the matters bearing upon the exemption we rely on from the 1940 Act, we may be required to adjust our strategy accordingly. Any additional guidance could provide additional flexibility to us, or it could further inhibit our ability to pursue the strategies we have chosen.

The mortgage related investments that we acquire are limited by the provisions of the 1940 Act and the rules and regulations promulgated thereunder. If the SEC determines that any of these securities are not qualifying interests in real estate or real estate-related assets, adopts a contrary interpretation with respect to these securities or otherwise believes we do not satisfy the above exceptions or changes its interpretation of the above exceptions, we could be required to restructure our activities or sell certain of our assets. We may be required at times to adopt less efficient methods of financing certain of our mortgage related investments and we may be precluded from acquiring certain types of higher yielding securities. The net effect of these factors would be to lower our net interest income. If we fail to qualify for an exemption from registration as an investment company or an exclusion from the definition of an investment company, our ability to use leverage would be substantially reduced. Our business will be materially and adversely affected if we fail to qualify for this exemption from regulation pursuant to the 1940 Act. In addition, the loss of our 1940 Act exemption would also permit our Manager to terminate the management agreement, which could result in material adverse effect on our business and results of operations.

The downgrade of the U.S. government's or certain European countries' credit ratings and any future downgrades of the U.S. government's or certain European countries' credit ratings may materially adversely affect our business, financial condition and results of operations.

On August 5, 2011, Standard & Poor's downgraded the U.S. government's credit rating for the first time in history. Because FNMA and FHLMC are in conservatorship of the U.S. government, downgrades to the U.S. government's credit rating could impact the credit risk associated with Agency RMBS and, therefore, decrease the value of the Agency RMBS in which we expect to invest. In addition, the downgrade of the U.S. government's credit rating and the credit ratings of certain European countries has created broader financial turmoil and uncertainty, which has recently weighed heavily on the global banking system. Therefore, the recent downgrade of the U.S. government's credit rating and the credit ratings of certain European countries and any future downgrades of the U.S. government's credit rating or the credit ratings of certain European countries may materially adversely affect our business, financial condition and results of operations.

Certain actions by the U.S. Federal Reserve could cause a flattening of the yield curve, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

On September 21, 2011, the U.S. Federal Reserve announced "Operation Twist," which is a program by which it intends to purchase, by the end of June 2012, \$400 billion of U.S. Treasury securities with remaining maturities between six and 30 years and sell an equal amount of U.S. Treasury securities with remaining maturities of three years or less. The effect of Operation Twist could be a flattening in the yield curve, which could result in increased prepayment rates due to lower long-term interest rates and a narrowing of our net interest margin. Consequently, Operation Twist and any other future securities purchase programs by the U.S. Federal Reserve could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Risks related to financing and hedging

Our strategy involves significant leverage, which may amplify losses.

We expect our leverage will range between five to nine times the amount of our stockholders' equity (calculated in accordance with U.S. GAAP). We will incur this leverage by borrowing against a

Table of Contents

substantial portion of the market value of our assets. By incurring this leverage, we could enhance our returns. Nevertheless, this leverage, which is fundamental to our investment strategy, also creates significant risks.

To the extent that we incur significant leverage, we may incur substantial losses if our borrowing costs increase. Our borrowing costs may increase for any of the following reasons:

short-term interest rates increase;

the market value of our securities decreases;

interest rate volatility increases; or

the availability of financing in the market decreases.

There can be no assurance that our Manager will be able to prevent mismatches in the maturities of our assets and liabilities.

Because we will employ financial leverage in funding our portfolio, mismatches in the maturities of our assets and liabilities can create risk in the need to continually renew or otherwise refinance our liabilities. Our net interest margins will be dependent upon a positive spread between the returns on our asset portfolio and our overall cost of funding. Our Manager expects to actively employ portfolio-wide and security-specific risk measurement and management processes in our daily operations. Our Manager's risk management tools will include software and services licensed or purchased from third parties, in addition to proprietary systems and analytical methods developed internally. There can be no assurance that these tools and the other risk management techniques described above will protect us from asset/liability risks.

We may be subject to margin calls under our master repurchase agreements, which could result in defaults or force us to sell assets under adverse market conditions or through foreclosure.

We intend to enter into master repurchase agreements with various financial institutions and borrow under these master repurchase agreements to finance the acquisition of assets for our investment portfolio. Pursuant to the terms of borrowings under our master repurchase agreements, a decline in the value of the subject assets may result in our lenders initiating margin calls. A margin call means that the lender requires us to pledge additional collateral to re-establish the ratio of the value of the collateral to the amount of the borrowing. The specific collateral value to borrowing ratio that would trigger a margin call is not set in the master repurchase agreements and will not be determined until we engage in a repurchase transaction under these agreements. Our fixed-rate securities generally are more susceptible to margin calls as increases in interest rates tend to more negatively affect the market value of fixed-rate securities. If we are unable to satisfy margin calls, our lenders may foreclose on our collateral. The threat of or occurrence of a margin call could force us to sell our assets, either directly or through a foreclosure, under adverse market conditions. Because of the significant leverage we expect to have, we may incur substantial losses upon the threat or occurrence of a margin call.

If a counterparty to our repurchase transactions defaults on its obligation to resell the underlying security back to us at the end of the transaction term, or if the value of the underlying security has declined as of the end of that term, or if we default on our obligations under the repurchase agreement, we will lose money on our repurchase transactions.

When we engage in repurchase transactions, we will generally sell securities to lenders (repurchase agreement counterparties) and receive cash from these lenders. The lenders will be obligated to resell the same securities back to us at the end of the term of the transaction. Because the cash we receive from the lender when we initially sell the securities to the lender will be less than the value of those securities (this difference is the haircut), if the lender defaults on its obligation to resell the same

Table of Contents

securities back to us we may incur a loss on the transaction equal to the amount of the haircut (assuming there was no change in the value of the securities). We would also lose money on a repurchase transaction if the value of the underlying securities has declined as of the end of the transaction term, as we would have to repurchase the securities for their initial value but would receive securities worth less than that amount. Further, if we default on one of our obligations under a repurchase transaction, the lender can terminate the transaction and cease entering into any other repurchase transactions with us. We expect our repurchase agreements will contain cross-default provisions, so that if a default occurs under any one agreement, the lenders under our other agreements could also declare a default. Any losses we incur on our repurchase transactions could adversely affect our earnings and thus our cash available for distribution to our stockholders.

If a counterparty to one of our swap agreements or TBAs defaults on its obligations, we may incur losses.

If a counterparty to one of the swap agreements or TBAs that we intend to enter into defaults on its obligations under the agreement, we may not receive payments due under the agreement, and thus, we may lose any unrealized gain associated with the agreement. If any such swap agreement hedged a liability, such liability could cease to be hedged upon the default of a counterparty. Additionally, we may also risk the loss of any collateral we have pledged to secure our obligations under a swap agreement if the counterparty becomes insolvent or files for bankruptcy.

Failure to procure adequate repurchase agreement financing, which generally have short terms, or to renew or replace repurchase agreement financing as it matures, would adversely affect our results of operations.

We intend to use repurchase agreement financing as a strategy to increase the return on our investment portfolio. However, we may not be able to achieve our desired leverage ratio for a number of reasons, including if the following events occur:

our lenders do not make repurchase agreement financing available to us at acceptable rates;

certain of our lenders exit the repurchase market;

our lenders require that we pledge additional collateral to cover our borrowings, which we may be unable to do; or

we determine that the leverage would expose us to excessive risk.

We cannot assure you that any, or sufficient, repurchase agreement financing will be available to us on terms that are acceptable to us. In recent years, investors and financial institutions that lend in the securities repurchase market, have tightened lending standards in response to the difficulties and changed economic conditions that have materially adversely affected the RMBS market. These market disruptions have been most pronounced in the non-Agency RMBS market, and the impact has also extended to Agency RMBS, which has made the value of these assets unstable and relatively illiquid compared to prior periods. Any decline in their value, or perceived market uncertainty about their value, would make it more difficult for us to obtain financing on favorable terms or at all, or maintain our compliance with terms of any financing arrangements then in place. Additionally, the lenders from which we may seek to obtain repurchase agreement financing may have owned or financed RMBS that have declined in value and caused the lender to suffer losses as a result of the recent downturn in the residential mortgage market. If these conditions persist, these institutions may be forced to exit the repurchase market, become insolvent or further tighten lending standards or increase the amount of equity capital or haircut required to obtain financing, and in such event, could make it more difficult for us to obtain financing on favorable terms or at all. In the event that we cannot obtain sufficient funding on acceptable terms, there may be a negative impact on the value of our common stock and our ability to make distributions, and you may lose part or all of your investment.

Table of Contents

Furthermore, because we intend to rely primarily on short-term borrowings, our ability to achieve our investment objective will depend not only on our ability to borrow money in sufficient amounts and on favorable terms, but also on our ability to renew or replace on a continuous basis our maturing short-term borrowings. If we are not able to renew or replace maturing borrowings, we will have to sell some or all of our assets, possibly under adverse market conditions. In addition, if the regulatory capital requirements imposed on our lenders change, they may be required to significantly increase the cost of the financing that they provide to us. Our lenders also may revise their eligibility requirements for the types of assets they are willing to finance or the terms of such financings, based on, among other factors, the regulatory environment and their management of perceived risk, particularly with respect to assignee liability.

The repurchase agreement financing may require us to provide additional collateral and may restrict us from leveraging our assets as fully as desired.

We intend to use repurchase agreements to finance acquisitions of Agency RMBS and our potential target assets. If the market value of the asset pledged or sold by us to a financing institution pursuant to a repurchase agreement declines, we may be required by the financing institution to provide additional collateral or pay down a portion of the funds advanced, but we may not have the funds available to do so, which could result in defaults. Posting additional collateral to support our credit will reduce our liquidity and limit our ability to leverage our assets, which could adversely affect our business. In the event we do not have sufficient liquidity to meet such requirements, financing institutions can accelerate repayment of our indebtedness, increase interest rates, liquidate our collateral or terminate our ability to borrow. Such a situation would likely result in a rapid deterioration of our financial condition and possibly necessitate a filing for bankruptcy protection.

Further, financial institutions providing the repurchase facilities may require us to maintain a certain amount of cash uninvested or to set aside non-levered assets sufficient to maintain a specified liquidity position which would allow us to satisfy our collateral obligations. As a result, we may not be able to leverage our assets as fully as we would choose, which could reduce our return on equity. If we are unable to meet these collateral obligations, our financial condition could deteriorate rapidly.

Lenders may require us to enter into restrictive covenants relating to our operations.

When we obtain financing, lenders could impose restrictions on us that would affect our ability to incur additional debt, our capability to make distributions to stockholders and our flexibility to determine our operating policies. Loan documents we execute may contain negative covenants that limit, among other things, our ability to repurchase stock, distribute more than a certain amount of our funds from operations, and employ leverage beyond certain amounts.

Our rights under repurchase agreements may be subject to the effects of the bankruptcy laws in the event of the bankruptcy or insolvency of us or our counterparties under the repurchase agreements.

In the event of our insolvency or bankruptcy, certain repurchase agreements may qualify for special treatment under the U.S. Bankruptcy Code, the effect of which, among other things, would be to allow the lender under the applicable repurchase agreement to avoid the automatic stay provisions of the U.S. Bankruptcy Code and to take possession of and liquidate the assets that we have pledged under their repurchase agreements. In the event of the insolvency or bankruptcy of a lender during the term of a repurchase agreement, the lender may be permitted, under applicable insolvency laws, to repudiate the contract, and our claim against the lender for damages may be treated simply as an unsecured creditor. In addition, if the lender is a broker or dealer subject to the Securities Investor Protection Act of 1970, or an insured depository institution subject to the Federal Deposit Insurance Act, our ability to exercise our rights to recover our securities under a repurchase agreement or to be compensated for any damages resulting from the lender's insolvency may be further limited by those

Table of Contents

statutes. These claims would be subject to significant delay and, if and when received, may be substantially less than the damages we actually incur.

An increase in our borrowing costs relative to the interest that we receive on investments in Agency RMBS and our potential target assets may adversely affect our profitability and cash available for distribution to our stockholders.

As our financings mature, we will be required either to enter into new borrowings or to sell certain of our investments. An increase in short-term interest rates at the time that we seek to enter into new borrowings would reduce the spread between our returns on our assets and the cost of our borrowings. This would adversely affect our returns on our assets, which might reduce earnings and, in turn, cash available for distribution to our stockholders.

We may enter into hedging transactions that could expose us to contingent liabilities in the future.

Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, part of our investment strategy may involve entering into hedging transactions that could require us to fund cash payments in certain circumstances (such as the early termination of the hedging instrument caused by an event of default or other early termination event, or the decision by a counterparty to request margin securities it is contractually owed under the terms of the hedging instrument). The amount due would be equal to the unrealized loss of the open swap positions with the respective counterparty and could also include other fees and charges. These economic losses will be reflected in our results of operations, and our ability to fund these obligations will depend on the liquidity of our assets and access to capital at the time, and the need to fund these obligations could adversely impact our financial condition.

Hedging against interest rate exposure may adversely affect our earnings, which could reduce our cash available for distribution to our stockholders.

Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, we may pursue various hedging strategies to seek to reduce our exposure to adverse changes in interest rates. Our hedging activity would vary in scope based on the level and volatility of interest rates, the type of assets held and other changing market conditions. Interest rate hedging may fail to protect or could adversely affect us because, among other things:

interest rate hedging can be expensive, particularly during periods of rising and volatile interest rates;

available interest rate hedges may not correspond directly with the interest rate risk for which protection is sought;

due to a credit loss, the duration of the hedge may not match the duration of the related liability;

the amount of income that a REIT may earn from hedging transactions (other than hedging transactions that satisfy certain requirements of the Internal Revenue Code or that are done through a taxable REIT subsidiary, or TRS) to offset interest rate losses is limited by U.S. federal tax provisions governing REITs;

the value of derivatives used for hedging may be adjusted from time to time in accordance with accounting rules to reflect changes in fair value. Downward adjustments or "mark-to-market losses," would reduce our stockholders' equity;

Table of Contents

the credit quality of the hedging counterparty owing money on the hedge may be downgraded to such an extent that it impairs our ability to sell or assign our side of the hedging transaction; and

the hedging counterparty owing money in the hedging transaction may default on its obligation to pay.

Our hedging transactions, which would be intended to limit losses, may actually adversely affect our earnings, which could reduce our cash available for distribution to our stockholders.

In addition, hedging instruments involve risk since they often are not traded on regulated exchanges, guaranteed by an exchange or its clearing house, or regulated by any U.S. or foreign governmental authorities. Consequently, there are no requirements with respect to record keeping, financial responsibility or segregation of customer funds and positions. Furthermore, the enforceability of agreements underlying hedging transactions may depend on compliance with applicable statutory and commodity and other regulatory requirements and, depending on the identity of the counterparty, applicable international requirements. The business failure of a hedging counterparty with whom we enter into a hedging transaction would most likely result in its default. Default by a party with whom we enter into a hedging transaction may result in the loss of unrealized profits and force us to cover our commitments, if any, at the then current market price. Although generally we would seek to reserve the right to terminate our hedging positions, it may not always be possible to dispose of or close out a hedging position without the consent of the hedging counterparty and we may not be able to enter into an offsetting contract in order to cover our risk. We cannot assure you that a liquid secondary market will exist for any hedging instruments purchased or sold, and we may be required to maintain a position until exercise or expiration, which could result in losses.

We may fail to qualify for hedge accounting treatment.

We may elect to record any derivative and hedging transactions in accordance with Accounting Standards Codification 815-10, Derivatives and Hedging, or ASC 815-10. Under these standards, we may fail to qualify for hedge accounting treatment for a number of reasons, including if we use instruments that do not meet the ASC 815-10 definition of a derivative (such as short sales), we fail to satisfy ASC 815-10 hedge documentation and hedge effectiveness assessment requirements or our instruments are not highly effective. If we elect to use hedge accounting and we fail to qualify for hedge accounting treatment, our operating results may suffer because losses on the derivatives that we enter into may not be offset by a change in the fair value of the related hedged transaction.

We have limited experience in making critical accounting estimates, and our financial statements may be materially affected if our estimates prove to be inaccurate.

Financial statements prepared in accordance with U.S. GAAP require the use of estimates, judgments and assumptions that affect the reported amounts. Different estimates, judgments and assumptions reasonably could be used that would have a material effect on the financial statements, and changes in these estimates, judgments and assumptions are likely to occur from period to period in the future. Significant areas of accounting requiring the application of management's judgment include, but are not limited to (1) determining the fair value of investment securities and (2) assessing the adequacy of the allowance for loan losses. These estimates, judgments and assumptions are inherently uncertain, and, if they prove to be wrong, then we face the risk that charges to income will be required. In addition, because we have limited operating history in some of these areas and limited experience in making these estimates, judgments and assumptions, the risk of future charges to income may be greater than if we had more experience in these areas. Any such charges could significantly harm our business, financial condition, results of operations and the price of our securities. See "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting

Table of Contents

Policies" for a discussion of the accounting estimates, judgments and assumptions that we believe are the most critical to an understanding of our business, financial condition and results of operations.

Risks associated with our relationship with our Manager

Our Manager does not have any experience operating a REIT and we cannot assure you that our Manager's past experience will be sufficient to successfully manage our business as a REIT.

Our Manager has never operated a REIT. The REIT provisions of the Internal Revenue Code are complex, and any failure to comply with those provisions in a timely manner could prevent us from qualifying as a REIT or force us to pay unexpected taxes and penalties. In such event, our net income would be reduced and we could incur a loss.

Our board of directors will approve very broad investment guidelines for our Manager and will not approve each investment and financing decision made by our Manager.

Our Manager will be authorized to follow very broad investment guidelines. Our board of directors will periodically review our investment guidelines and our investment portfolio but will not, and will not be required to, review all of our proposed investments, except that an investment in a security structured or issued by another entity managed by our Manager must be approved by a majority of our independent directors prior to such investment. In addition, in conducting periodic reviews, our board of directors may rely primarily on information provided to them by our Manager. Furthermore, our Manager may use complex strategies, and transactions entered into by our Manager may be costly, difficult or impossible to unwind by the time they are reviewed by our board of directors. Our Manager will have great latitude within the broad parameters of our investment guidelines in determining the types and amounts of Agency RMBS, non-Agency RMBS, CMBS and ABS investments it may decide are attractive investments for us, which could result in investment returns that are substantially below expectations or that result in losses, which would materially and adversely affect our business operations and results. Further, decisions made and investments and financing arrangements entered into by our Manager may not fully reflect the best interests of our stockholders.

There are conflicts of interest in our relationship with our Manager that could result in decisions that are not in the best interests of our stockholders.

We are subject to conflicts of interest arising out of our relationship with our Manager. All of our officers and two of our directors, James W. Hirschmann III and Gavin L. James, are employees of our Manager. Although our current chief financial officer is an employee of our Manager, we anticipate that in the future we will hire a chief financial officer that is not an employee of our Manager and support staff for such chief financial officer. We do not anticipate having any future employees other than a chief financial officer and support staff for the chief financial officer. Our management agreement with our Manager was negotiated between related parties and its terms, including fees and other amounts payable, may not be as favorable to us as if it had been negotiated at arm's length with an unaffiliated third party. In addition, the obligations of our Manager and its officers and personnel to engage in other business activities may reduce the time our Manager and its officers and personnel spend managing us.

We will compete for investment opportunities directly with other client portfolios managed by our Manager. Clients of our Manager may have investment mandates and objectives that target the same assets as us. A substantial number of client accounts managed by our Manager have exposure to Agency RMBS and our potential target assets and may have similar investment mandates and objectives. In addition, our Manager may have additional clients that compete directly with us for investment opportunities in the future. Our Manager has an investment allocation policy in place that is intended to ensure that no single client is intentionally favored over another and that trades are

Table of Contents

allocated in a fair and equitable manner. We may compete with our Manager or its other clients for investment or financing opportunities sourced by our Manager; however, we may either not be presented with the opportunity or have to compete with our Manager to acquire these investments or have access to these sources of financing. Our Manager and our executive officers may choose to allocate favorable investments to itself or to its or other clients instead of to us. Further, at times when there are turbulent conditions in the mortgage markets or distress in the credit markets or other times when we will need focused support and assistance from our Manager, our Manager's other clients will likewise require greater focus and attention, placing our Manager's resources in high demand. In such situations, we may not receive the level of support and assistance that we may receive if we were internally managed or if our Manager did not act as a manager for other entities. There is no assurance that our Manager's allocation policies that address some of the conflicts relating to our access to investment and financing sources, which are described under "Management Conflicts of interest," will be adequate to address all of the conflicts that may arise.

We have agreed to pay our Manager a management fee that is not tied to our performance. The management fee may not sufficiently incentivize our Manager to generate attractive risk-adjusted returns for us. This could hurt both our ability to make distributions to our stockholders and the market price of our common stock. Furthermore, the compensation payable to our Manager will increase as a result of future issuances of our equity securities, even if the issuances are dilutive to existing stockholders.

Concurrently with this offering, we will also complete a private placement in which we will sell an aggregate of 46,043 shares of our common stock (subject to certain adjustments as described in "Summary Concurrent private placements") at \$20.00 per share to our Manager's deferred compensation plan, which will make such investment on behalf of the beneficiaries of the plan, which includes certain executives and other employees of our Manager and its affiliates. These shares will be subject to a two year lock-up with the underwriters. To the extent these shares are sold, our Manager's interests may be less aligned with our interests.

We are dependent on our Manager and its key personnel for our success.

We have no separate facilities and are completely reliant on our Manager. All of our executive officers and two of our directors are employees of our Manager. Although our current chief financial officer is an employee of our Manager, we anticipate that in the future we will hire a chief financial officer that is not an employee of our Manager and support staff for such chief financial officer. We do not anticipate having any future employees other than a chief financial officer and support staff for the chief financial officer. Our Manager has significant discretion as to the implementation of our investment and operating policies and strategies. Accordingly, we believe that our success will depend to a significant extent upon the efforts, experience, diligence, skill and network of business contacts of the executive officers and key personnel of our Manager. The executive officers and key personnel of our Manager will evaluate, negotiate, close and monitor our investments; therefore, our success will depend on their continued service. The departure of any of the executive officers or key personnel of our Manager could have a material adverse effect on our performance. In addition, we offer no assurance that our Manager will remain our investment manager or that we will continue to have access to our Manager's principals and professionals. The initial term of our management agreement with our Manager only extends until the third anniversary of the closing of this offering, with automatic one-year renewals thereafter. If the management agreement is terminated and no suitable replacement is found to manage us, we may not be able to execute our business plan. Moreover, our Manager is not obligated to dedicate any of its personnel exclusively to us nor is it obligated to dedicate any specific portion of its time to our business, and none of our Manager's personnel are contractually dedicated to us under our management agreement with our Manager.

Table of Contents

The management agreement with our Manager was not negotiated on an arm's-length basis and may not be as favorable to us as if it had been negotiated with an unaffiliated third party and may be costly and difficult to terminate.

Our executive officers and two of our directors are employees of our Manager. Our management agreement with our Manager was negotiated between related parties and its terms, including fees payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party.

Termination of the management agreement with our Manager without cause is difficult and costly. Our independent directors will review our Manager's performance and any fees payable to our Manager annually and, following the initial three-year term, the management agreement may be terminated annually upon the affirmative vote of at least two-thirds of our independent directors based upon: (1) our Manager's unsatisfactory performance that is materially detrimental to us, or (2) our determination that any fees payable to our Manager are not fair, subject to our Manager's right to prevent termination based on unfair fees by accepting a reduction of management fees agreed to by at least two-thirds of our independent directors. We will provide our Manager 180 days prior notice of any such termination. Unless terminated for cause, we will pay our Manager a termination fee equal to three times the average annual management fee earned by our Manager during the prior 24-month period immediately preceding such termination, calculated as of the end of the most recently completed fiscal quarter before the date of termination. This provision increases the effective cost to us of electing not to renew, or defaulting in our obligations under, the management agreement, thereby adversely affecting our inclination to end our relationship with our Manager, even if we believe our Manager's performance is not satisfactory.

Our Manager is only contractually committed to serve us until the third anniversary of the closing of this offering. Thereafter, the management agreement is automatically renewable for one-year terms; provided, however, that our Manager may terminate the management agreement annually upon 180 days prior notice. If the management agreement is terminated and no suitable replacement is found to manage us, we may not be able to execute our business plan.

Pursuant to the management agreement, our Manager will not assume any responsibility other than to render the services called for thereunder and will not be responsible for any action of our board of directors in following or declining to follow its advice or recommendations. Our Manager maintains a contractual as opposed to a fiduciary relationship with us. Under the terms of the management agreement, our Manager, its officers, stockholders, members, managers, directors, personnel, any person controlling or controlled by our Manager and any person providing sub-advisory services to our Manager will not be liable to us, our directors, our stockholders or any partners for acts or omissions performed in accordance with and pursuant to the management agreement, except because of acts constituting bad faith, willful misconduct, gross negligence, or reckless disregard of their duties under the management agreement. In addition, we have agreed to indemnify our Manager, its officers, stockholders, members, managers, directors, personnel, any person controlling or controlled by our Manager and any person providing sub-advisory services to our Manager with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts of our Manager not constituting bad faith, willful misconduct, gross negligence, or reckless disregard of duties, performed in good faith in accordance with and pursuant to the management agreement.

Our Manager's management fee is payable regardless of our performance.

We will pay our Manager a management fee regardless of the performance of our portfolio. Our Manager's entitlement to non-performance-based compensation might reduce its incentive to devote its time and effort to seeking assets that provide attractive risk-adjusted returns for our portfolio. This in turn could hurt both our ability to make distributions to our stockholders and the market price of our common stock.

Table of Contents

Our Manager is subject to extensive regulation as an investment advisor, which could adversely affect its ability to manage our business.

Our Manager is subject to regulation as an investment advisor by various regulatory authorities that are charged with protecting the interests of its clients, including us. Instances of criminal activity and fraud by participants in the investment management industry and disclosures of trading and other abuses by participants in the financial services industry have led the U.S. government and regulators to consider increasing the rules and regulations governing, and oversight of, the U.S. financial system. This activity is expected to result in changes to the laws and regulations governing the investment management industry and more aggressive enforcement of the existing laws and regulations. Our Manager could be subject to civil liability, criminal liability, or sanction, including revocation of its registration as an investment adviser, revocation of the licenses of its employees, censures, fines, or temporary suspension or permanent bar from conducting business, if it is found to have violate any of these laws or regulations. Any such liability or sanction could adversely affect its ability to manage our business.

Our Manager must continually address conflicts between its interests and those of its clients, including us. In addition, the SEC and other regulators have increased their scrutiny of potential conflicts of interest. We believe our Manager has procedures and controls that are reasonably designed to address these issues. However, appropriately dealing with conflicts of interest is complex and difficult and if our Manager fails, or appears to fail, to deal appropriately with conflicts of interest, it could face litigation or regulatory proceedings or penalties, any of which could adversely affect its ability to manage our business.

Risks related to our common stock

There is no public market for our common stock and a market may never develop, which could result in holders of our common stock being unable to monetize their investment.

Our shares of common stock are newly-issued securities for which there is no established trading market. We have applied to list our common stock on the New York Stock Exchange under the symbol "WMC," but there can be no assurance that an active trading market for our common stock will develop. Accordingly, no assurance can be given as to the ability of our stockholders to sell their common stock or the price that our stockholders may obtain for their common stock.

Some of the factors that could negatively affect the market price of our common stock include:

- actual or anticipated variations in our quarterly operating results;
- changes in our earnings estimates or publication of research reports about us or the real estate industry;
- changes in market valuations of similar companies;
- adverse market reaction to any increased indebtedness we incur in the future;
- additions to or departures of our Manager's key personnel;
- actions by our stockholders; and
- speculation in the press or investment community.

Market factors unrelated to our performance could also negatively impact the market price of our common stock. One of the factors that investors may consider in deciding whether to buy or sell our common stock is our distribution rate as a percentage of our stock price relative to market interest rates. If market interest rates increase, prospective investors may demand a higher distribution rate or seek alternative investments paying higher dividends or interest. As a result, interest rate fluctuations

Table of Contents

and conditions in the capital markets can affect the market value of our common stock. For instance, if interest rates rise, it is likely that the market price of our common stock will decrease as market rates on interest-bearing securities increase.

For as long as we are an emerging growth company, we will not be required to comply with certain reporting requirements, including those relating to accounting standards and disclosure about our executive compensation, that apply to other public companies.

In April 2012, President Obama signed into law the Jumpstart Our Business Startups Act, or the JOBS Act. The JOBS Act contains provisions that, among other things, relax certain reporting requirements for "emerging growth companies," including certain requirements relating to accounting standards and compensation disclosure. We are classified as an emerging growth company. For as long as we are an emerging growth company, which may be up to five full fiscal years, unlike other public companies, we will not be required to (1) provide an auditor's attestation report on management's assessment of the effectiveness of our system of internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act, (2) comply with any new or revised financial accounting standards applicable to public companies until such standards are also applicable to private companies under Section 102(b)(1) of the JOBS Act, (3) comply with any new requirements adopted by the Public Company Accounting Oversight Board, or the PCAOB, requiring mandatory audit firm rotation or a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer, (4) comply with any new audit rules adopted by the PCAOB after April 5, 2012 unless the SEC determines otherwise, (5) provide certain disclosure regarding executive compensation required of larger public companies or (6) hold shareholder advisory votes on executive compensation. We cannot predict if investors will find our common stock less attractive if we choose to rely on these exemptions. If some investors find our common stock less attractive as a result of any choices to reduce future disclosure, there may be a less active trading market for our common stock and our stock price may be more volatile.

As noted above, under the JOBS Act, emerging growth companies can delay adopting new or revised accounting standards that have different effective dates for public and private companies until such time as those standards apply to private companies. We intend to take advantage of such extended transition period. Since we will not be required to comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for other public companies, our financial statements may not be comparable to the financial statements of companies that comply with public company effective dates. If we were to elect to comply with these public company effective dates, such election would be irrevocable pursuant to Section 107 of the JOBS Act.

Investing in our common stock may involve a high degree of risk.

The investments that we make in accordance with our investment objectives may result in a high amount of risk when compared to alternative investment options and volatility or loss of principal. Our investments may be highly speculative and aggressive, and therefore an investment in our common stock may not be suitable for someone with lower risk tolerance.

Common stock eligible for future sale may have adverse effects on our share price.

We are offering 8,000,000 shares of our common stock as described in this prospectus. In addition, concurrently with the completion of this offering, we will complete a private placement to certain institutional accredited investors in which we will sell 2,231,787 units, consisting of 2,231,787 shares of our common stock and warrants entitling the holders to purchase up to an additional 1,115,893 shares, and a private placement of 46,043 shares of our common stock to our Manager's deferred compensation plan, in each case subject to certain adjustments as described in "Summary Concurrent private placements." Moreover, under our equity incentive plans, we will be able to issue a number of

Table of Contents

shares of common stock equivalent to 3.0% of our issued and outstanding common stock (on a fully diluted basis) at the time of the award (other than any shares subject to awards made under any of these plans).

We and our Manager have, and each of our executive officers and directors and each executive officer of our Manager has, agreed with the underwriters to a 180-day lock-up period (subject to extension in certain circumstances), meaning that, until the end of the 180-day lock-up period, we and our Manager, and each of our executive officers and directors and each executive officer of our Manager, will not, subject to certain exceptions, sell or transfer any shares of common stock without the prior consent of Deutsche Bank Securities Inc., J.P. Morgan Securities LLC and Citigroup Global Markets Inc., which are acting as the representatives of the underwriters. In addition, the shares of common stock to be sold in the private placement to our Manager's deferred compensation plan will be subject to a two year lock-up agreement with the underwriters that is substantially similar to the lock-up agreements to be executed by our Manager, our directors and executive officers and the executive officers of our Manager. The representatives of the underwriters may, in their sole discretion, at any time from time to time and without notice, waive the terms and conditions of the lock-up agreements to which they are a party. Assuming the underwriters do not exercise their overallotment option to purchase additional shares, approximately 1% of our shares of common stock will be subject to lock-up agreements. When the lock-up periods expire, these shares of common stock will become eligible for sale, in some cases subject to the requirements of Rule 144 under the Securities Act, which are described under "Shares eligible for future sale."

We cannot predict the effect, if any, of future sales of our common stock, or the availability of shares for future sales, on the market price of our common stock. The market price of our common stock may decline significantly when the restrictions on resale (or lock up agreements) by certain of our stockholders lapse. Sales of substantial amounts of common stock or the perception that such sales could occur may adversely affect the prevailing market price for our common stock.

Also, we may issue additional shares in subsequent public offerings or private placements to make new investments or for other purposes. We are not required to offer any such shares to existing stockholders on a preemptive basis. Therefore, it may not be possible for existing stockholders to participate in such future share issuances, which may dilute the existing stockholders' interests in us.

We have not established a minimum distribution payment level and we cannot assure you of our ability to pay distributions in the future.

We intend to pay quarterly distributions and to make distributions to our stockholders in an amount such that we distribute all or substantially all of our net taxable income in each year. We have not established a minimum distribution payment level and our ability to pay distributions may be adversely affected by a number of factors, including the risk factors described in this prospectus. All distributions will be made at the discretion of our board of directors and will depend on our earnings, our financial condition, debt covenants, maintenance of our REIT qualification and other factors as our board of directors may deem relevant from time to time. We believe that a change in any one of the following factors could adversely affect our results of operations and impair our ability to pay distributions to our stockholders:

the profitability of the investment of the net proceeds of this offering and the concurrent private placements;

our ability to make profitable investments;

margin calls or other expenses that reduce our cash flow;

decreases in the value of our portfolio or defaults in our asset portfolio; and

Table of Contents

the fact that anticipated operating expense levels may not prove accurate, as actual results may vary from estimates.

We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions in the future. In addition, some of our distributions may include a return in capital.

Future offerings of debt or equity securities, which would rank senior to our common stock, may adversely affect the market price of our common stock.

If we decide to issue debt or equity securities in the future, which would rank senior to our common stock, it is likely that they will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock and may result in dilution to owners of our common stock. We and, indirectly, our stockholders, will bear the cost of issuing and servicing such securities. Because our decision to issue debt or equity securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus holders of our common stock will bear the risk of our future offerings reducing the market price of our common stock and diluting the value of their stock holdings in us. Furthermore, the compensation payable to our Manager will increase as a result of future issuances of our equity securities, including issuances upon exercise of the warrants, even if the issuances are dilutive to existing stockholders.

The dilutive effect of the warrants, including in certain circumstances, upon future issuances of our common stock, could have an adverse effect on the future market price of our common stock or otherwise adversely affect the interests of our common stockholders.

The warrants, which will be issued in our concurrent private placement to certain institutional accredited investors, will have an initial exercise price of \$20.50 per share (subject to adjustment and limitation on exercise in certain circumstances) and will be exercisable for seven years after the date of the warrants' issuance, or earlier upon notice of redemption by us. The exercise of the warrants in the future would be dilutive to holders of our common stock if our book value per share or the market price of our common stock is higher than the exercise price at the time of exercise. The potential for dilution from the warrants could have an adverse effect on the future market price of our common stock.

Further, the exercise price of the warrants will be adjusted under certain circumstances, including, subject to certain exceptions, if we sell common stock (or other securities convertible into or exchangeable for our common stock) in a public offering or private placement, in each case after the closing of this offering and the concurrent private placements, for cash at a price per share (after deduction of underwriting discounts or placement fees and other expenses incurred by us that are attributable to the offering) that is less than the closing price of our common stock immediately prior to (a) the announcement of the proposed sale in the case of public offerings or (b) the execution of the purchase agreement in the case of private placements. Accordingly, any public offerings or private placements of our common stock we conduct in the future will likely increase the dilutive effect of the warrants.

Risks related to our organization and structure

Our authorized but unissued shares of common and preferred stock may prevent a change in our control.

Our certificate of incorporation authorizes us to issue additional authorized but unissued shares of common or preferred stock. In addition, our board of directors may, without stockholder approval,

Table of Contents

amend our certificate of incorporation to increase the aggregate number of our shares of stock or the number of shares of stock of any class or series that we have authority to issue and classify or reclassify any unissued shares of common or preferred stock and set the preferences, rights and other terms of the classified or reclassified shares. As a result, our board of directors may establish a series of shares of common or preferred stock that could delay or prevent a transaction or a change in control that might involve a premium price for our shares of common stock or otherwise be in the best interest of our stockholders.

Ownership limitations may restrict change of control or business combination opportunities in which our stockholders might receive a premium for their shares.

In order for us to qualify as a REIT for each taxable year after 2012, no more than 50% in value of our outstanding capital stock may be owned, directly or indirectly, by five or fewer individuals during the last half of any calendar year. "Individuals" for this purpose include natural persons, private foundations, some employee benefit plans and trusts, and some charitable trusts. To assist us in maintaining our qualification as a REIT, our certificate of incorporation generally prohibits any person from directly or indirectly owning more than 9.8% in value or in number of shares, whichever is more restrictive, of the outstanding shares of our capital stock or more than 9.8% in value or in number of shares, whichever is more restrictive, of the outstanding shares of our common stock. This ownership limitation could have the effect of discouraging a takeover or other transaction in which holders of our common stock might receive a premium for their shares over the then prevailing market price or which holders might believe to be otherwise in their best interests.

Provisions in our certificate of incorporation, our bylaws and Delaware law may have the effect of preventing or hindering a change in control and adversely affecting the market price of our common stock.

Provisions in our certificate of incorporation and our bylaws and applicable provisions of the Delaware General Corporation Law may make it more difficult and expensive for a third party to acquire control of us even if a change of control would be beneficial to the interests of our stockholders. These provisions could discourage potential takeover attempts and could adversely affect the market price our common stock.

We may pay distributions from offering proceeds, borrowings or the sale of assets to the extent that distributions exceed earnings or cash flow from our operations.

We may pay distributions from offering proceeds, borrowings or the sale of assets to the extent that distributions exceed earnings or cash flow from our operations. Such distributions would reduce the amount of cash we have available for investing and other purposes and could be dilutive to our financial results. In addition, funding our distributions from our net proceeds may constitute a return of capital to our investors, which would have the effect of reducing each stockholder's basis in its shares of common stock.

Tax risks

If we do not qualify as a REIT or fail to remain qualified as a REIT, we will be subject to U.S. federal income tax as a regular corporation and could face a substantial tax liability, which would reduce the amount of cash available for distribution to our stockholders.

We intend to operate in a manner that will allow us to qualify as a REIT commencing with our taxable year ending December 31, 2012. Although we do not intend to request a ruling from the Internal Revenue Service, or the IRS, as to our REIT qualification, we will receive an opinion of our counsel, Skadden, Arps, Slate, Meagher & Flom LLP, with respect to our qualification as a REIT in connection with this offering of common stock. Investors should be aware, however, that opinions of

Table of Contents

counsel are not binding on the IRS or any court. The opinion of Skadden, Arps, Slate, Meagher & Flom LLP will represent only the view of our counsel based on our counsel's review and analysis of existing law and on certain representations as to factual matters and covenants made by us and our Manager, including representations relating to the values of our assets and the sources of our income. The opinion will be expressed as of the date issued. Skadden, Arps, Slate, Meagher & Flom LLP will have no obligation to advise us or the holders of our common stock of any subsequent change in the matters stated, represented or assumed, or of any subsequent change in applicable law. Furthermore, both the validity of the opinion of Skadden, Arps, Slate, Meagher & Flom LLP, and our qualification as a REIT will depend on our satisfaction of certain asset, income, organizational, distribution, stockholder ownership and other requirements on a continuing basis, the results of which will not be monitored by Skadden, Arps, Slate, Meagher & Flom LLP. Our ability to satisfy the asset tests depends upon our analysis of the characterization and fair market values of our assets, some of which are not susceptible to a precise determination, and for which we will not obtain independent appraisals. Our compliance with the REIT income and quarterly asset requirements also depends upon our ability to successfully manage the composition of our income and assets on an ongoing basis. Accordingly, there can be no assurance that the IRS will not contend that our interests in subsidiaries or in securities of other issuers will not cause a violation of the REIT requirements.

If we were to fail to qualify as a REIT in any taxable year, we would be subject to U.S. federal income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates, and dividends paid to our stockholders would not be deductible by us in computing our taxable income. Any resulting corporate tax liability could be substantial and would reduce the amount of cash available for distribution to our stockholders, which in turn could have an adverse impact on the value of our common stock. Unless we were entitled to relief under certain Internal Revenue Code provisions, we also would be disqualified from taxation as a REIT for the four taxable years following the year in which we failed to qualify as a REIT.

Dividends payable by REITs do not qualify for the reduced tax rates available for some dividends.

The maximum tax rate applicable to income from "qualified dividends" payable to domestic stockholders that are individuals, trusts and estates is 15% through the end of 2012. Dividends payable by REITs, however, generally are not eligible for the reduced rates. Although this legislation does not adversely affect the taxation of REITs or dividends payable by REITs, the more favorable rates applicable to regular corporate qualified dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in the stocks of non-REIT corporations that pay dividends, which could adversely affect the value of the stock of REITs, including our common stock.

REIT distribution requirements could adversely affect our ability to execute our business plan.

We generally must distribute annually at least 90% of our net taxable income in order for U.S. federal corporate income tax not to apply to earnings that we distribute. To the extent that we satisfy this distribution requirement, but distribute less than 100% of our net taxable income, we will be subject to U.S. federal corporate income tax on our undistributed net taxable income. In addition, we will be subject to a 4% nondeductible excise tax if the actual amount that we pay out to our stockholders in a calendar year is less than a minimum amount specified under U.S. federal tax laws. We intend to make distributions to our stockholders to comply with the REIT requirements of the Internal Revenue Code.

From time to time, we may generate taxable income greater than our income for financial reporting purposes prepared in accordance with U.S. GAAP, or differences in timing between the recognition of taxable income and the actual receipt of cash may occur. If we do not have other funds available in these situations we could be required to borrow funds on unfavorable terms, sell

Table of Contents

investments at disadvantageous prices or distribute amounts that would otherwise be invested in future acquisitions to make distributions sufficient to enable us to pay out enough of our taxable income to satisfy the REIT distribution requirement and to avoid corporate income tax and the 4% excise tax in a particular year. These alternatives could increase our costs or reduce our equity. Thus, compliance with the REIT requirements may hinder our ability to grow, which could adversely affect the value of our common stock.

Even if we remain qualified as a REIT, we may face other tax liabilities that reduce our cash flow.

Even if we remain qualified for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes, such as mortgage recording taxes. See "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation." Any of these taxes would decrease cash available for distribution to our stockholders. In addition, in order to meet the REIT qualification requirements, or to avert the imposition of a 100% tax that applies to certain gains derived by a REIT from dealer property or inventory, we intend to hold some of our assets through a TRS or other subsidiary corporations that will be subject to corporate-level income tax at regular rates. Any of these taxes would decrease cash available for distribution to our stockholders.

Complying with REIT requirements may cause us to liquidate or forgo otherwise attractive opportunities.

To qualify as a REIT, we must ensure that at the end of each calendar quarter, at least 75% of the value of our assets consists of cash, cash items, government securities and qualified REIT real estate assets, including certain mortgage loans and securities. The remainder of our investments (other than government securities and qualified real estate assets) generally cannot include more than 10% of the outstanding voting securities of any one issuer or more than 10% of the total value of the outstanding securities of any one issuer. In addition, in general, no more than 5% of the value of our total assets (other than government securities and qualified real estate assets) can consist of the securities of any one issuer, and no more than 25% of the value of our total assets can be represented by securities of one or more TRSs. See "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation." If we fail to comply with these requirements at the end of any calendar quarter, we must correct the failure within 30 days after the end of the calendar quarter or qualify for certain statutory relief provisions to avoid losing our REIT qualification and suffering adverse tax consequences. As a result, we may be required to liquidate from our investment portfolio otherwise attractive investments. These actions could have the effect of reducing our income and amounts available for distribution to our stockholders.

In addition to the asset tests set forth above, to qualify as a REIT we must continually satisfy tests concerning, among other things, the sources of our income, the amounts we distribute to our stockholders and the ownership of our stock. We may be unable to pursue investments that would be otherwise advantageous to us in order to satisfy the source-of-income or asset-diversification requirements for qualifying as a REIT. Thus, compliance with the REIT requirements may hinder our ability to make certain attractive investments.

We may be required to report taxable income for certain investments in excess of the economic income we ultimately realize from them.

We may acquire mortgage-backed securities in the secondary market for less than their face amount. In addition, pursuant to our ownership of certain mortgage-backed securities, we may be treated as holding certain debt instruments acquired in the secondary market for less than their face amount. The discount at which such securities or debt instruments are acquired may reflect doubts about their ultimate collectability rather than current market interest rates. The amount of such

Table of Contents

discount will nevertheless generally be treated as "market discount" for U.S. federal income tax purposes. Accrued market discount is reported as income when, and to the extent that, any payment of principal of the mortgage-backed security or debt instrument is made. If we collect less on the mortgage-backed security or debt instrument than our purchase price plus the market discount we had previously reported as income, we may not be able to benefit from any offsetting loss deductions. In addition, pursuant to our ownership of certain mortgage-backed securities, we may be treated as holding distressed debt investments that are subsequently modified by agreement with the borrower. If the amendments to the outstanding debt are "significant modifications" under applicable Treasury regulations, the modified debt may be considered to have been reissued to us at a gain in a debt-for-debt exchange with the borrower. In that event, we may be required to recognize taxable gain to the extent the principal amount of the modified debt exceeds our adjusted tax basis in the unmodified debt, even if the value of the debt or the payment expectations have not changed.

Moreover, some of the mortgage-backed securities that we acquire may have been issued with original issue discount. We will be required to report such original issue discount based on a constant yield method and will be taxed based on the assumption that all future projected payments due on such mortgage-backed securities will be made. If such mortgage-backed securities turn out not to be fully collectable, an offsetting loss deduction will become available only in the later year that uncollectability is provable.

Finally, in the event that mortgage-backed securities or any debt instruments we are treated as holding pursuant to our investments in mortgage-backed securities are delinquent as to mandatory principal and interest payments, we may nonetheless be required to continue to recognize the unpaid interest as taxable income as it accrues, despite doubt as to its ultimate collectability. Similarly, we may be required to accrue interest income with respect to subordinate mortgage-backed securities at the stated rate regardless of whether corresponding cash payments are received or are ultimately collectable. In each case, while we would in general ultimately have an offsetting loss deduction available to us when such interest was determined to be uncollectable, the utility of that deduction could depend on our having taxable income in that later year or thereafter.

Certain apportionment rules may affect our ability to comply with the REIT asset and gross income tests.

The Internal Revenue Code provides that a regular or a residual interest in a real estate mortgage investment conduit, or REMIC, is generally treated as a real estate asset for the purpose of the REIT asset tests, and any amount includible in our gross income with respect to such an interest is generally treated as interest on an obligation secured by a mortgage on real property for the purpose of the REIT gross income tests. If, however, less than 95% of the assets of a REMIC in which we hold an interest consist of real estate assets (determined as if we held such assets), we will be treated as holding our proportionate share of the assets of the REMIC for the purpose of the REIT asset tests and receiving directly our proportionate share of the income of the REMIC for the purpose of determining the amount of income from the REMIC that is treated as interest on an obligation secured by a mortgage on real property. In connection with the recently expanded Agency RMBS-backed HARP loan program in which we may invest, the IRS recently issued guidance providing that, among other things, if a REIT holds a regular interest in an "eligible REMIC," or a residual interest in an "eligible REMIC" that informs the REIT that at least 80% of the REMIC's assets constitute real estate assets, then the REIT may treat 80% of the interest in the REMIC as a real estate asset for the purpose of the REIT income and asset tests. Although the portion of the income from such a REMIC interest that does not qualify for purposes of the REIT 75% gross income test would likely be qualifying income for the purpose of the 95% REIT gross income test, the remaining 20% of the REMIC interest generally would not qualify as a real estate asset, which could adversely affect our ability to satisfy the REIT asset tests. Accordingly, owning such a REMIC interest could adversely affect our ability to qualify as a REIT.

Table of Contents

The "taxable mortgage pool" rules may increase the taxes that we or our stockholders may incur, and may limit the manner in which we effect future securitizations.

Securitizations could result in the creation of taxable mortgage pools for U.S. federal income tax purposes. As a REIT, so long as we own 100% of the equity interests in a taxable mortgage pool, we generally would not be adversely affected by the characterization of the securitization as a taxable mortgage pool. Certain categories of stockholders, however, such as foreign stockholders eligible for treaty or other benefits, stockholders with net operating losses, and certain tax-exempt stockholders that are subject to unrelated business income tax, could be subject to increased taxes on a portion of their dividend income from us that is attributable to the taxable mortgage pool. In addition, to the extent that our stock is owned by tax-exempt "disqualified organizations," such as certain government-related entities and charitable remainder trusts that are not subject to tax on unrelated business income, we may incur a corporate level tax on a portion of our income from the taxable mortgage pool. In that case, we may reduce the amount of our distributions to any disqualified organization whose stock ownership gave rise to the tax. Moreover, we would be precluded from selling equity interests in these securitizations to outside investors, or selling any debt securities issued in connection with these securitizations that might be considered to be equity interests for tax purposes. These limitations may prevent us from using certain techniques to maximize our returns from securitization transactions.

Our ability to invest in and dispose of "to be announced" securities could be limited by our election to be subject to tax as a REIT.

We intend to purchase Agency RMBS through "to-be-announced" forward contracts, or TBAs. In certain instances, rather than take delivery of the Agency RMBS subject to a TBA, we may dispose of the TBA through a dollar roll transaction in which we agree to purchase similar securities in the future at a predetermined price or otherwise, which may result in the recognition of income or gains. We intend to account for dollar roll transactions as purchases and sales of securities. The law is unclear regarding whether TBAs will be qualifying assets for the 75% asset test and whether income and gains from dispositions of TBAs will be qualifying income for the 75% gross income test. Accordingly, our ability to purchase Agency RMBS through TBAs and to dispose of TBAs, through dollar roll transactions or otherwise, could be limited.

The failure of securities subject to repurchase agreements to qualify as real estate assets could adversely affect our ability to qualify as a REIT.

We intend to enter into financing arrangements that are structured as sale and repurchase agreements pursuant to which we would nominally sell certain of our securities to a counterparty and simultaneously enter into an agreement to repurchase these securities at a later date in exchange for a purchase price. Economically, these agreements are financings which are secured by the securities sold pursuant thereto. We believe that we would be treated for REIT asset and income test purposes as the owner of the securities that are the subject of any such sale and repurchase agreement notwithstanding that such agreements may transfer record ownership of the securities to the counterparty during the term of the agreement. It is possible, however, that the IRS could assert that we did not own the securities during the term of the sale and repurchase agreement, in which case we could fail to qualify as a REIT.

Liquidation of assets may jeopardize our REIT qualification.

To qualify as a REIT, we must comply with requirements regarding our assets and our sources of income. If we are compelled to liquidate our investments to repay obligations to our lenders, we may be unable to comply with these requirements, ultimately jeopardizing our qualification as a REIT, or we may be subject to a 100% tax on any resultant gain if we sell assets that are treated as dealer property or inventory.

Table of Contents

Complying with REIT requirements may limit our ability to hedge effectively and may cause us to incur tax liabilities.

The REIT provisions of the Internal Revenue Code substantially limit our ability to hedge our assets and liabilities. Any income from a hedging transaction we enter into to manage risk of interest rate changes with respect to borrowings made or to be made to acquire or carry real estate assets does not constitute "gross income" for purposes of the 75% or 95% gross income tests. To the extent that we enter into other types of hedging transactions, the income from those transactions is likely to be treated as non-qualifying income for purposes of both of the gross income tests. See "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation." As a result of these rules, we intend to limit our use of advantageous hedging techniques or implement those hedges through a domestic TRS. This could increase the cost of our hedging activities because our TRS would be subject to tax on gains or expose us to greater risks associated with changes in interest rates than we would otherwise want to bear. In addition, losses in our TRS will generally not provide any tax benefit, except for being carried forward against future taxable income in the TRS.

Qualifying as a REIT involves highly technical and complex provisions of the Internal Revenue Code.

Qualification as a REIT involves the application of highly technical and complex Internal Revenue Code provisions for which only limited judicial and administrative authorities exist. Even a technical or inadvertent violation could jeopardize our REIT qualification. Our qualification as a REIT will depend on our satisfaction of certain asset, income, organizational, distribution, stockholder ownership and other requirements on a continuing basis. In addition, our ability to satisfy the requirements to qualify as a REIT depends in part on the actions of third parties over which we have no control or only limited influence, including in cases where we own an equity interest in an entity that is classified as a partnership for U.S. federal income tax purposes.

Table of Contents

Forward-looking statements

We make forward-looking statements in this prospectus that are subject to risks and uncertainties. These forward-looking statements include information about possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives. When we use the words "believe," "expect," "anticipate," "estimate," "plan," "continue," "intend," "should," "may" or similar expressions, we intend to identify forward-looking statements. Statements regarding the following subjects, among others, may be forward-looking:

use of proceeds of this offering and the concurrent private placements;

our business and investment strategy;

our projected operating results;

our ability to obtain financing arrangements;

financing and advance rates for Agency RMBS and our potential target assets;

our expected leverage;

general volatility of the securities markets in which we invest and the market price of our common stock;

our expected investments;

interest rate mismatches between Agency RMBS and our potential target assets and our borrowings used to fund such investments;

changes in interest rates and the market value of Agency RMBS and our potential target assets;

factors are described in this prospectus under the headings "Summary," "Risk factors," "Management's discussion and analysis of financial condition and results of operations" and "Business." If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made. New risks and uncertainties arise over time, and it is not possible for us to predict those events or how they may affect us. Except as required by law, we are not obligated to, and do not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

Use of proceeds

In this offering, we are offering 8,000,000 shares of our common stock at \$20.00 per share. Assuming no shares are issued pursuant to the underwriters' over-allotment option to purchase up to an additional 1,200,000 shares, this offering would result in gross proceeds of \$160.0 million to us. Concurrently with, and conditional upon the consummation of, this offering, we will also issue and sell (i) 2,231,787 units, with each unit consisting of one share of our common stock and a warrant to purchase 0.5 share of our common stock, to certain institutional accredited investors for \$20.00 per unit, and (ii) 46,043 shares of our common stock, at a price of \$20.00 per share to our Manager's deferred compensation plan in another private placement, in each case subject to certain adjustments as described in "Summary Concurrent private placements." The sale of our securities in these two private placements would result in gross proceeds of \$45.6 million to us. Our Manager has agreed to pay the \$ per share underwriting discount payable with respect to each share sold in this offering and the \$0.60 per unit placement agent fee payable with respect to each unit sold in the concurrent private placement of units to certain institutional accredited investors (other than to investors who have pre-existing business relationships with our Manager for which there will not be any placement agent fee payable). No placement agent fee or underwriting discount will be payable with respect to the shares of common stock we will sell to our Manager's deferred compensation plan. We currently estimate our expenses attributable to our organization, this offering and the two private placements (other than the underwriting discount and the placement agent fee payable by our Manager) to be \$1.2 million. If the total attributable expenses exceed \$1.2 million, our Manager has agreed to pay us for any expenses that exceed this amount. Therefore, we estimate that our aggregate net proceeds from this offering and the two private placements will be \$204.4 million, after deducting estimated organizational and offering expenses payable by us (or \$232.0 million, if the underwriters exercise their overallotment option in full).

We plan to use the net proceeds from this offering and the concurrent private placements to purchase Agency RMBS and our potential target assets, focusing predominantly on Agency RMBS. Subject to prevailing market conditions at the time of purchase, we currently expect that the capital we deploy will be used initially to purchase Agency RMBS and our potential target assets in the following ranges: approximately 85-100% Agency RMBS, approximately 0-15% non-Agency RMBS, approximately 0-5% CMBS and approximately 0-5% ABS. Until appropriate investments can be identified, our Manager may invest the net proceeds from this offering and the concurrent private placements in interest-bearing short-term investments, including money market accounts and/or funds, that are consistent with our intention to qualify as a REIT and maintain our exemption from registration under the 1940 Act. These initial investments, if any, are expected to provide a lower net return than we will seek to achieve from investments in Agency RMBS and our potential target assets. We anticipate that we will be able to identify a sufficient amount of investments in Agency RMBS and our potential target assets within approximately one to two months after the closing of this offering and the concurrent private placement. However, depending on the availability of appropriate investment opportunities and subject to market prevailing conditions, there can be no assurance that we will be able to identify a sufficient amount of investments within this timeframe.

Prior to the time we have fully used the net proceeds of this offering and the concurrent private placements to acquire Agency RMBS and our potential target assets, we may fund our quarterly distributions out of such net proceeds.

Table of Contents

Distribution policy

We intend to make regular quarterly distributions to holders of our common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its net taxable income and that it pay tax at regular corporate rates to the extent that it annually distributes less than 100% of its net taxable income. We generally intend over time to pay quarterly distributions in an amount equal to our net taxable income. We plan to pay our first distribution in respect of the period from the closing of this offering through June 30, 2012, which may be prior to the time when we have fully invested the net proceeds from this offering and the concurrent private placements in Agency RMBS and our potential target assets.

If we pay a taxable stock distribution, our stockholders would be sent a form that would allow each stockholder to elect to receive its proportionate share of such distribution in all cash or in all stock, and the distribution will be made in accordance with such elections, provided that if the stockholders' elections, in the aggregate, would result in the payment of cash in excess of the maximum amount of cash to be distributed, then cash payments to stockholders who elect to receive cash will be prorated, and the excess of each such stockholder's entitlement in the distribution, less such prorated cash payment, would be paid to such stockholder in shares of our common stock.

To the extent that in respect of any calendar year, cash available for distribution is less than our net taxable income, we could be required to sell assets or borrow funds to make cash distributions or make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities. In addition, prior to the time we have fully invested the net proceeds of this offering and the concurrent private placements, we may fund our quarterly distributions out of such net proceeds, which would reduce the amount of cash we have available for investing and other purposes. We will generally not be required to make distributions with respect to activities conducted through any TRSs. For more information, see "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation."

To satisfy the requirements to qualify as a REIT and generally not be subject to U.S. federal income and excise tax, we intend to make regular quarterly distributions of all or substantially all of our net taxable income to holders of our common stock out of assets legally available therefor. The amount of cash available for distribution will be decreased by any fees or expenses payable by us to our Manager under the management agreement. Any distributions we make will be at the discretion of our board of directors and will depend upon our earnings and financial condition, debt covenants, funding or margin requirements under repurchase agreements, warehouse facilities or other secured and unsecured borrowing agreements, maintenance of our REIT qualification, restrictions under Delaware law, and such other factors as our board of directors deems relevant. Our earnings and financial condition will be affected by various factors, including the net interest and other income from our portfolio, our operating expenses and any other expenditures. For more information regarding risk factors that could materially adversely affect our earnings and financial condition, see "Risk factors."

We anticipate that our distributions generally will be taxable as ordinary income to our stockholders, although a portion of the distributions may be designated by us as qualified dividend income or capital gain, or may constitute a return of capital. We will furnish annually to each of our stockholders a statement setting forth distributions paid during the preceding year and their characterization as ordinary income, return of capital, qualified dividend income or capital gain. For more information, see "U.S. federal income tax considerations Taxation of stockholders Taxation of taxable domestic stockholders."

Table of Contents**Capitalization**

The following table sets forth (1) our actual capitalization at March 31, 2012, and (2) our capitalization as adjusted to reflect the effect of:

The sale of 8,000,000 shares of our common stock in this offering at an assumed offering price of \$20.00 per share;

The concurrent sale of 2,231,787 units at a price of \$20.00 per unit in the concurrent private placement to certain institutional accredited investors;

The concurrent sale of 46,043 shares of our common stock at a price of \$20.00 per share in the concurrent private placement to our Manager's deferred compensation plan, which will make this investment on behalf of the beneficiaries of this plan, which includes certain executives and other employees of our Manager and its affiliates;

the deduction of our estimated organizational and offering expenses of \$1.2 million, which are payable by us; and

the concurrent grant of (i) 51,159 shares of our restricted common stock to our Manager pursuant to the Manager Equity Plan (or 0.5% of the aggregate number of shares sold in this offering and units sold in the concurrent private placement to certain institutional accredited investors) and (ii) an aggregate of 4,500 shares of our restricted common stock to our three director nominees pursuant to the Equity Plan.

You should read this table together with "Use of proceeds" included elsewhere in this prospectus.

	As of March 31, 2012	
	Actual	As Adjusted
Stockholder's equity:		
Common stock, par value \$0.01 per share; 100,000 shares authorized, and 100 shares issued and outstanding, actual and 500,000,000 shares authorized and 10,333,489 shares outstanding, as adjusted ⁽¹⁾	\$ 1	\$ 103,335
Preferred stock, par value \$0.01 per share; 0 shares authorized and 0 shares issued and outstanding, actual and 100,000,000 shares authorized and 0 shares outstanding, as adjusted		
Additional paid in capital ⁽²⁾	999	204,253,265
Total stockholder's equity	\$ 1,000	\$ 204,356,600

(1) Excludes 100 shares of common stock issued to our Manager on March 24, 2011 at \$10.00 per share because we will repurchase these shares at their issue price shortly before the completion of this offering. Does not include (i) the approximately 1,115,893 shares initially issuable upon exercise of the warrants (subject to certain adjustments as described in "Summary Concurrent private placements"), and (ii) the shares of our common stock available for future grants under our equity incentive plans, which is initially expected to be equal to 252,676 shares of our common stock (after deduction of the initial grant of 51,159 shares of restricted common stock to our Manager and an aggregate of 4,500 shares of restricted common stock to our three director nominees).

(2) Additional paid-in-capital, as adjusted has been reduced by estimated offering and organizational expenses payable by us, which we currently estimate to be \$1.2 million. If the total expenses attributable to our organization, this offering and the concurrent private placements (other than the underwriting discount applicable to this offering and the placement agent fee applicable to the concurrent private placement to certain institutional accredited investors) exceed \$1.2 million, our Manager has agreed to pay for any expenses exceeding \$1.2 million. In addition, our Manager has agreed to pay (i) all of the underwriting discounts payable with respect to the shares sold in this offering and (ii) the \$0.60 per unit placement agent fee that will be payable with respect to each unit sold in the concurrent private placement to certain institutional accredited investors (other than to investors who have

a pre-existing business relationship with our Manager for which there will not be any placement agent fee payable).

**Management's discussion and analysis of financial condition
and results of operations**

You should read the following discussion in conjunction with the sections of this prospectus entitled "Risk factors," "Forward-looking statements" and "Business" and our balance sheet dated as of March 31, 2012 and the related notes thereto included elsewhere in this prospectus. This discussion contains forward-looking statements reflecting current expectations that involve risks and uncertainties. Actual results and the timing of events may differ materially from those contained in these forward-looking statements due to a number of factors, including those discussed in the section entitled "Risk factors" and elsewhere in this prospectus.

Overview

Western Asset Mortgage Capital Corporation is focused on investing in, financing and managing primarily in Agency RMBS. Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with non-Agency RMBS, CMBS and ABS. We intend to finance investments in Agency RMBS and our potential target assets primarily through the use of repurchase agreements.

We are organized as a Delaware corporation. We filed a Certificate of Dissolution in Delaware on May 5, 2010 and revoked such dissolution by filing a Certificate of Revocation of Dissolution on March 24, 2011. We intend to elect and qualify to be taxed as a REIT, commencing with our taxable year ending December 31, 2012. We generally will not be subject to U.S. federal income taxes on our taxable income to the extent that we annually distribute all of our net taxable income to stockholders and maintain our intended qualification as a REIT. We also intend to operate our business in a manner that will permit us to maintain our exemption from registration under the 1940 Act.

We will be externally managed and advised by our Manager, an SEC-registered investment advisor and a wholly-owned subsidiary of Legg Mason. Our Manager will be responsible for administering our business activities and our day-to-day operations, subject to the supervision of our board of directors.

Outlook

Our business will be affected by general U.S. residential real estate fundamentals and the overall U.S. economic environment. In particular, our strategy is influenced by the specific characteristics of these markets, including prepayment rates and interest rate levels. We expect the results of our operations to be affected by various factors, many of which are beyond our control. Our results of operations will primarily depend on, among other things, the level of our net interest income, the market value of our investment portfolio and the supply of and demand for mortgage-related securities. Our net interest income, which includes the amortization of purchase premiums and accretion of discounts, will vary primarily as a result of changes in interest rates, borrowing costs, and prepayment speeds on our RMBS investments, which is a measurement of how quickly borrowers pay down the unpaid principal balance on their residential mortgage loans.

The current economic and market outlook are shaped in a significant manner by the unprecedented level of fiscal and monetary stimulus that the U.S. Government and Federal Reserve Board provided in the aftermath of the 2008 credit crisis. The current rate environment is characterized by a steep yield curve with the spread between two-year U.S. Treasury Notes and 10-year U.S. Treasury Notes well above the average spread over the last three decades. The Federal Reserve Board has maintained a near-zero target for the federal funds rate, and has reiterated its commitment to fulfilling the mandate of the second round of quantitative easing, or QE2, implemented at the end of 2010. QE2 was intended to promote higher growth and lower unemployment and to maintain price stability in the U.S. economy through the purchase of \$600 billion in U.S. Treasury securities through June 2011.

Table of Contents

It is our Manager's view that while recent economic data suggests an improvement in U.S. economic growth, the significant mortgage debt burden, run-off of fiscal stimulus and budget discipline at both the U.S. federal and state level will serve as a heavy anchor to real GDP and employment growth in 2012. Although headline inflation data is being pushed higher due to rising commodity costs, we do not believe these input costs will lead to higher core rates due to a plentiful supply of labor preventing wage pressure and low rates of resource utilization. For these reasons, and considering its dual mandate to manage both inflation and unemployment, we believe that the Federal Reserve Board will exercise patience before unwinding any form of QE2 or other monetary stimulus now in effect. We expect this type of muted recovery to keep the yield curve relatively steep and, barring any system shocks to the capital markets, for healthy demand for Agency RMBS to continue.

On September 21, 2011, the U.S. Federal Reserve, in a program dubbed "Operation Twist," announced that they intend to sell \$400 billion shorter term U.S. Treasury securities by the end of June 2012, and reinvest the proceeds to purchase longer term U.S. Treasury securities with a goal of further monetary stimulus. They also announced that they will continue to reinvest principal repayments from agency securities back into agency securities. This program is intended to extend the average maturity of the securities in the U.S. Federal Reserve's portfolio. By reducing the supply of longer term U.S. Treasury securities in the market, this action should put downward pressure on longer term interest rates, including rates on financial assets that investors consider to be close substitutes for longer term U.S. Treasury securities, like certain types of agency securities. The reduction in longer term interest rates, in turn, may contribute to a broad easing in financial market conditions that the U.S. Federal Reserve hopes will provide additional stimulus to support the economic recovery.

We believe investors continue to seek incremental spreads relative to U.S. Treasury Notes in a low yield environment and financial institutions continue to prefer high quality, liquid Agency RMBS. Yield spreads on agency mortgage-backed securities are attractive relative to historical spread levels. Prepayments that are being made at rates less than the historical average should provide opportunity to capture such spread, which we refer to as the carry premium. Non-Agency RMBS continue to be priced to high default and loss severity rates and low prepayment scenarios and offer attractive loss-adjusted yields in the fixed income market.

As the capital markets have recovered, commercial banks have re-entered the secured lending market which has quickened the pace of asset recovery and the return to more normalized credit spreads. Financing of Agency and non-Agency RMBS is currently widely available through, among other vehicles, repurchase agreements. Haircuts, or the discount attributed to the value of securities sold under repurchase agreements, average between 3% and 10% for Agency RMBS and average between 10% and 50% for non-Agency RMBS, depending on the specific security used as collateral for such repurchase agreements.

The U.S. government, through the FHA, the Federal Deposit Insurance Corporation, or FDIC, and the U.S. Treasury, has commenced or proposed implementation of programs designed to provide homeowners with assistance in avoiding residential mortgage loan foreclosures. These loan modification and refinance programs, future U.S. federal, state and/or local legislative or regulatory actions that result in the modification of outstanding mortgage loans, as well as changes in the requirements necessary to qualify for refinancing mortgage loans with FNMA, FHLMC or GNMA, may adversely affect the value of, and the returns on, residential mortgage loans, RMBS, real estate-related securities and various other asset classes in which we may invest. In addition to the foregoing, the U.S. Congress and/or various states and local legislators may enact additional legislation or regulatory action designed to address the current economic crisis or for other purposes that could have a material adverse effect on our ability to execute our business strategies.

In September 2011, the White House announced they are working on a major plan to allow certain homeowners who owe more on their mortgages than their homes are worth to refinance. In October

Table of Contents

2011, the FHFA announced changes to HARP to expand access to refinancing for qualified individuals and families whose homes have lost value, including increasing the HARP loan-to-value ratio above 125%. However, this would only apply to mortgages guaranteed by the U.S. government-sponsored entities. In addition, the expansion does not change the time period which these loans were originated, maintaining the requirement that the loans must have been guaranteed by Fannie Mae or Freddie Mac prior to June 2009. There are many challenging issues to this proposal, notably the question as to whether a loan with a loan-to-value ratio of 125% qualifies as a mortgage or an unsecured consumer loan. The chances of this initiative's success have created additional uncertainty in the agency securities market, particularly with respect to possible increases in prepayment rates.

On January 4, 2012, the U.S. Federal Reserve released a report titled "The U.S. Housing Market: Current Conditions and Policy Considerations" to Congress providing a framework for thinking about certain issues and tradeoffs that policy makers might consider. It is unclear how future legislation may impact the housing finance market and the investing environment for agency securities as the method of reform is undecided and has not yet been defined by the regulators.

Factors impacting our operating results

Prepayment speeds

Prepayment speeds, as reflected by the Constant Prepayment Rate, or CPR, vary according to interest rates, the type of residential mortgage loan, conditions in financial markets and housing markets, availability of residential mortgages, borrowers' credit profile, competition and other factors, none of which can be predicted with any certainty. CPR, expressed as a percentage over a pool of residential mortgages, is the rate at which principal is expected to prepay in the given year (usually the next one). For example, if a certain residential mortgage loan pool has a CPR of 9%, then 9% of the existing pool principal outstanding is expected to prepay over the next year. In general, when interest rates rise, it is relatively less attractive for borrowers to refinance their residential mortgage loans, and as a result, prepayment speeds tend to decrease. When interest rates fall, however, prepayment speeds tend to increase. When house price appreciation is positive, prepayment rates may increase and when house prices depreciate in value, prepayment rates may decline. For RMBS purchased at a premium, as prepayment speeds increase, the amount of income we will earn on these investments will be less than expected because the purchase premium we will pay for the bonds amortizes faster than expected. Conversely, decreases in prepayment speeds result in income greater than expected and can extend the period over which we amortize the purchase premium. For RMBS purchased at a discount, as prepayment speeds increase, the amount of income we will earn will be greater than expected because of the acceleration of the accretion of the discount into interest income. Conversely, decreases in prepayment speeds result in income less than expected and can extend the period over which we accrete the purchase discount into interest income.

Interest rate environment

As indicated above, as interest rates rise, prepayment speeds generally decrease, increasing our interest income. Rising interest rates, however, increase our financing costs which may result in a net negative impact on our net interest income. In addition, if we acquire RMBS collateralized by monthly reset ARMs, and three- and five-year hybrid ARMs, such interest rate increases should result in decreases in our net investment income, as there could be a timing mismatch between the interest rate reset dates on our investment portfolio and the financing costs of these investments. Monthly reset ARMs are ARMs on which coupon rates reset monthly based on indices such as one-month LIBOR. Hybrid ARMs are mortgages that have interest rates that are fixed for an initial period (typically three, five, seven or ten years) and thereafter reset at regular intervals subject to interest rate caps.

Table of Contents

Rising interest rates generally reduce the demand for consumer credit, including residential mortgage loans, due to the higher cost of borrowing. A reduction in the volume of residential mortgage loans originated may affect the volume of Agency and non-Agency RMBS, which could affect our ability to acquire assets that satisfy our investment objectives.

Mortgage-related securities spreads

During the credit market disruptions beginning in the summer of 2007, U.S. Treasury yields declined and yields on RMBS increased, resulting in a historically wide difference between the two yields, or the spread relationship. If fixed income market concerns return, causing mortgage-related security spreads to increase, the value of mortgage-related securities may decline and lenders under our repurchase agreements may require us to post additional collateral for our mortgage-related securities under outstanding repurchase agreements.

Size of investment portfolio

The size of our investment portfolio, as measured by the aggregate unpaid principal balance of our investment portfolio, will also be a key driver of our gross interest income. Generally, as the size of our investment portfolio grows, the amount of interest income that we receive will increase. The larger investment portfolio, however, will drive increased expenses as we will incur additional interest expense to finance the purchase of our investment portfolio.

Critical accounting policies

Our financial statements are prepared in accordance with U.S. GAAP, which requires the use of estimates and assumptions that involve the exercise of judgment and use of assumptions as to future uncertainties. In accordance with SEC guidance, the following discussion addresses the accounting policies that we will apply based on our expectation of our initial operations. Our most critical accounting policies will involve decisions and assessments that could affect our reported assets and liabilities, as well as our reported revenues and expenses. We believe that all of the decisions and assessments upon which our financial statements will be based will be reasonable at the time made and based upon information available to us at that time. We will rely on independent pricing of our assets at each quarter's end to arrive at what we believe to be reasonable estimates of fair market value. We have identified what we believe will be our most critical accounting policies to be the following:

Investments

ASC 320-10, Debt and Equity Securities, requires that at the time of purchase, we designate a security as either held-to-maturity, available-for-sale, or trading depending on our ability and intent to hold such security to maturity. Securities available-for-sale will be reported at fair value, while securities held-to-maturity will be reported at amortized cost. We may sell any of our securities as part of our overall management of our investment portfolio. Accordingly, we will elect to classify substantially all of our securities as available-for-sale. All assets classified as available-for-sale will be reported at fair value, with unrealized gains and losses excluded from net income or loss and reported as a separate component of stockholders' equity. See " Valuation of financial instruments." We do not have an investment portfolio at this time.

For an available-for-sale security, or AFS security, where its fair value has declined below its amortized cost basis, we evaluate the security for other-than-temporary impairment, or OTTI. If we either (i) intend to sell the impaired security, (ii) will more likely than not be required to sell the impaired security before it recovers in value or (iii) do not expect to recover the impaired security's amortized cost basis even if we do not intend to sell the security, then the impairment is deemed an OTTI and we record the entire difference between the security's fair value and its amortized cost in net

Table of Contents

income or loss. Conversely, if one of these three conditions are met, we analyze the expected cash flows, or cost recovery of the security, to determine what, if any, OTTI is recognized through our net income or loss. This analysis includes an assessment of any changes in the regulatory and/or economic environment that might affect the performance of the security.

If we conclude through our analysis that there has been no significant adverse change in our cash flow assumptions for the security, then the impairment is deemed temporary in nature and the associated difference between the security's fair value and its amortized cost basis is recorded as an unrealized loss through other comprehensive income or loss, a component of stockholders' equity. Alternatively, if we conclude that there has been a significant adverse change in our cash flow assumptions for the security, then the impairment is deemed an OTTI and we perform an additional analysis to determine what portion of OTTI, if any, should be recorded through net income or loss. This analysis entails discounting the security's cash flows to a present value using the prior period yield for the security to determine an "expected recoverable value." The difference between this expected recoverable value and the amortized cost basis of the security is deemed to be the "credit" component of the OTTI that is recorded in our net income or loss. The amortized cost of the security is then adjusted to the expected recoverable value, and the difference between this expected recoverable value and the fair value is deemed to be the "non-credit" component of the OTTI that is recorded to other comprehensive income or loss. Future amortization and accretion for the security is computed based upon the new amortized cost basis.

Valuation of financial instruments

ASC Topic 820, Fair Value Measurements and Disclosures, establishes a framework for measuring fair value in accordance with U.S. GAAP and expands financial statement disclosure requirements for fair value measurements. ASC Topic 820 further specifies a hierarchy of valuation techniques, which is based on whether the inputs into the valuation technique are observable or unobservable. The hierarchy is as follows:

Level 1 Valuation techniques in which all significant inputs are quoted prices from active markets for assets or liabilities that are identical to the assets or liabilities being measured.

Level 2 Valuation techniques in which significant inputs include quoted prices from active markets for assets or liabilities that are similar to the assets or liabilities being measured and/or quoted prices from markets that are not active for assets or liabilities that are identical or similar to the assets or liabilities being measured. Also, model-derived valuations in which all significant inputs and significant value drivers are observable in active markets are Level 2 valuation techniques.

Level 3 Valuation techniques in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are valuation technique inputs that reflect our assumptions about the assumptions that market participants would use in pricing an asset or liability.

The level in the fair value hierarchy within which a fair measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

When available, we use quoted market prices to determine the fair value of an asset or liability. If quoted market prices are not available, we will consult independent pricing services or third party broker quotes, provided that there is no ongoing material event that affects the issuer of the securities being valued or the market therefor. If there is such an ongoing event, or if quoted market prices are not available, our pricing officer will determine the fair value of the securities using valuation techniques that use, when possible, current market-based or independently-sourced market parameters, such as interest rates.

Table of Contents

Valuation techniques for RMBS may be based on models that consider the estimated cash flows of each debt tranche of the issuer, establish a benchmark yield, and develop an estimated tranche-specific spread to the benchmark yield based on the unique attributes of the tranche including, but not limited to, the prepayment speed assumptions and attributes of the collateral underlying such securities. To the extent the inputs are observable and timely, the values would be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized as Level 3.

We expect that most of the RMBS that we intend to acquire upon consummation of this offering and the concurrent private placements, along with any related derivative and hedging instruments, will be valued based on the similar-asset valuation approach using Level 2 inputs.

Fair value under U.S. GAAP represents an exit price in the normal course of business, not a forced liquidation price. If we were forced to sell assets in a short period to meet liquidity needs, the prices we receive could be substantially less than their recorded fair values. Furthermore, the analysis of whether it is more likely than not that we will be required to sell securities in an unrealized loss position prior to an expected recovery in value (if any), the amount of such expected required sales, and the projected identification of which securities would be sold is also subject to significant judgment, particularly in times of market illiquidity.

Interest income

AFS securities are carried at their estimated fair values with cumulative unrealized gains and losses reported as a component of accumulated other comprehensive income or loss in our statement of equity. Coupon interest is recognized as interest income when earned and deemed collectible, and the interest method is used to determine an effective yield to amortize purchase premiums, discounts, and fees associated with these securities into income over time. This requires us to project cash flows over the remaining life of each security and make assumptions with regards to interest rates, prepayment rates, the timing and amount of credit losses, and other factors. We review our cash flow projections on an ongoing basis and monitor these projections based on input and analyses received from external sources, internal models, and our own judgment and experience.

Repurchase agreements

We intend to enter into master repurchase agreements with various financial institutions and borrow under these master repurchase agreements to finance the acquisition of assets for our investment portfolio. Repurchase transactions will be treated as collateralized financing transactions and will be carried at their contractual amounts, including accrued interest, as specified in the respective transactions. The economic terms of our borrowings under these master repurchase agreements will not be determined until we engage in a repurchase transaction under such agreements. We will not engage in any repurchase transactions until after the completion of this offering and the concurrent private placements. To the extent our borrowings incur premiums or discounts, and/or debt issue costs, they will be carried at amortized cost and the contractual interest method over the contractual life will be used to determine the effective yield to amortize the purchase premiums, discounts or other costs into income or expense over time.

In instances where we acquire securities through repurchase agreements with the same counterparty from whom the securities were purchased, we will account for the purchase commitment and repurchase agreement on a net basis and record a forward commitment to purchase securities as a derivative instrument if the transaction does not comply with the criteria in ASC 860-10, Transfers and Servicing, for gross presentation. Such forward commitments are recorded at fair value with subsequent changes in fair value recognized in income. Additionally, we will record the cash portion of our investment in securities as a mortgage-related receivable from the counterparty on our balance sheet. If the transaction complies with the criteria for gross presentation in ASC 860-10, we will record the

Table of Contents

assets and the related financing on a gross basis in our statements of financial condition, and the corresponding interest income and interest expense in our statements of operations and comprehensive income (loss).

Derivatives and hedging activities

We may elect to account for derivative financial instruments in accordance with ASC 815-10. ASC 815-10 requires an entity to recognize all derivatives as either assets or liabilities in the balance sheets and to measure those instruments at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives are classified as either hedges of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge) or hedges of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge). Derivatives are used for hedging purposes rather than speculation. We will value derivative financial instruments in accordance with ASC Topic 820. See " Valuation of financial instruments."

In the normal course of business, we may use a variety of derivative financial instruments to manage, or hedge, interest rate risk on our borrowings. These derivative financial instruments must be effective in reducing our interest rate risk exposure in order to qualify for hedge accounting. When the terms of an underlying transaction are modified, or when the underlying hedged item ceases to exist, all changes in the fair value of the derivative instrument are marked-to-market with changes in value included in net income or loss for each period until the derivative instrument matures or is settled. Any derivative instrument used for risk management that does not meet the effective hedge criteria is marked-to-market with the changes in value included in net income.

Income taxes

We intend to elect and qualify to be taxed as a REIT commencing with our taxable year ending December 31, 2012. Accordingly, we will generally not be subject to corporate U.S. federal or state income tax to the extent that we make qualifying distributions to our stockholders, and provided that we satisfy on a continuing basis, through actual investment and operating results, the REIT requirements including certain asset, income, distribution and stock ownership tests. If we fail to qualify as a REIT, and do not qualify for certain statutory relief provisions, we will be subject to U.S. federal, state and local income taxes and may be precluded from qualifying as a REIT for the subsequent four taxable years following the year in which we lost our REIT qualification. Accordingly, our failure to qualify as a REIT could have a material adverse impact on our results of operations and amounts available for distribution to our stockholders.

Our dividends paid deduction for qualifying dividends paid to our stockholders is computed using our taxable income as opposed to net income reported on the financial statements. Taxable income, generally, will differ from net income reported on the financial statements because the determination of taxable income is based on tax provisions and not financial accounting principles.

We may elect to treat certain of our subsidiaries as TRSs. In general, a TRS of ours may hold assets and engage in activities that we cannot hold or engage in directly and generally may engage in any real estate or non-real estate-related business. A TRS is subject to U.S. federal, state and local corporate income taxes.

While a TRS will generate net income, a TRS can declare dividends to us which will be included in our taxable income and necessitate a distribution to our stockholders. Conversely, if we retain earnings at a TRS level, no distribution is required and we can increase book equity of the consolidated entity.

Table of Contents

Warrants

We will account for the warrants comprising a part of the units issued in the concurrent private placement to certain institutional accredited investors in accordance with Accounting Standards Codification 815, Accounting for Derivative Instruments and Hedging Activities, which provides guidance on the specific accounting treatment of a multitude of derivative instruments. In the case of equity related instruments, such instruments or embedded features are accounted for at fair value, using appropriate fair value methodologies. Common provisions such as certain anti-dilution clauses in equity warrants may lead to an accounting treatment of the warrants as a liability, where subsequent changes in fair value are reported in earnings. If warrants qualify for equity treatment, the cost basis of the warrants is accounted for in equity each reporting period.

Share-Based Compensation

We will follow ASC 718, "Compensation - Stock Compensation" with regard to our equity incentive plans. ASC 718 covers a wide range of share-based compensation arrangements including stock options, restricted stock plans, performance based awards, and related other arrangements. ASC 718 requires that compensation cost relating to stock-based payment transactions be recognized in the financial statements at the time of grant or remeasurement date. The costs are measured based on the fair value of the equity or liability instruments issued.

Compensation cost related to restricted common stock to be granted to our directors will be measured at its estimated fair value at the grant date, and will be amortized and expensed over the vesting period on a straight-line basis. Compensation cost related to restricted common stock issued to our Manager will be initially measured at estimated fair value at the grant date, and will be remeasured on subsequent dates to the extent the awards are unvested. We have elected to use the straight-line method to amortize compensation expense for the restricted common stock to be granted to our Manager.

Accounting standards applicable to emerging growth companies

The JOBS Act contains provisions that relax certain requirements for "emerging growth companies," which includes us. For as long as we are an emerging growth company, which may be up to five full fiscal years, unlike other public companies, we will not be required to (i) comply with any new or revised financial accounting standards applicable to public companies until such standards are also applicable to private companies under Section 102(b)(1) of the JOBS Act, (ii) provide an auditor's attestation report on management's assessment of the effectiveness of our system of internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act, (iii) comply with any new requirements adopted by the PCAOB requiring mandatory audit firm rotation or a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer, or (iv) comply with any new audit rules adopted by the PCAOB after April 5, 2012 unless the SEC determines otherwise.

As noted above, under the JOBS Act, emerging growth companies can delay adopting new or revised accounting standards that have different effective dates for public and private companies until such time as those standards apply to private companies. We intend to take advantage of such extended transition period. Since we will not be required to comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for other public companies, our financial statements may not be comparable to the financial statements of companies that comply with public company effective dates. If we were to elect to comply with these public company effective dates, such election would be irrevocable pursuant to Section 107 of the JOBS Act.

Table of Contents

Recent accounting pronouncements

In December 2011, the FASB issued ASU No. 2011-12 Comprehensive Income (Topic 220) *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05* ("ASU No. 2011-12"). In order to defer only those changes in Update 2011-05 that relate to the presentation of reclassification adjustments, the guidance in ASU 2011-12 supersedes certain pending guidance in ASU 2011-05. The amendments are being made to allow the FASB time to deliberate whether to present on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for all periods presented. In the course of FASB's deliberation, entities should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before ASU No. 2011-05. All other requirements in ASU No. 2011-05 are not affected by ASU No. 2011-12, including the requirement to report comprehensive income either in a single continuous financial statement or in two separate but consecutive financial statements. ASU No. 2011-12 is required to be applied for fiscal years, and interim periods within those years, beginning after December 15, 2011. This guidance may increase our disclosures where applicable, but is not expected to have a material impact on our statement of financial condition or results of operations.

In December 2011, the FASB issued ASU No. 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities* ("ASU No. 2011-11") which requires entities to provide enhanced disclosures about financial instruments and derivative instruments that are either presented on a net basis in the balance sheet or subject to an enforceable master netting arrangement or similar agreement including (i) a description of the rights of offset associated with relevant agreements and (ii) both net and gross information, including amounts of financial collateral, for relevant assets and liabilities. The purpose of the update is to enhance comparability between those companies that prepare their financial statements on the basis of U.S. GAAP and those that prepare their financial statements in accordance with International Financial Reporting Standards and enables users of the financial statements to understand the effect or potential effect of the offsetting arrangements on the balance sheet. ASU No. 2011-11 is effective for fiscal years beginning on or after January 1, 2013, and for interim periods within those years. Disclosures are required retrospectively for all comparative periods presented in an entity's financial statements. This guidance may increase our disclosures where applicable, but is not expected to have a material impact on our statement of financial condition or results of operations.

Issued in June 2011, ASU No. 2011-05: *Comprehensive Income (Topic 220) Presentation of Comprehensive Income*, ("ASU No. 2011-05"), which improves the comparability, consistency and transparency of financial reporting and increases the prominence of items reported in other comprehensive income. Current U.S. GAAP allows reporting entities three alternatives for presenting other comprehensive income and its components in financial statements. ASU No. 2011-05 eliminates one of the presentation options whereby the components of other comprehensive income are presented as part of the statement of changes in stockholders' equity. In addition, ASU No. 2011-05 will require consecutive presentation of the statement of net income and other comprehensive income as well as require an entity to present reclassification adjustments on the face of the financial statements from other comprehensive income to net income. The amendments in ASU No. 2011-05 are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. This guidance may increase our disclosures where applicable, but is not expected to have a material impact on our statement of financial condition or results of operations.

In May 2011, the FASB issued Accounting Standards Update 2011-04, *Fair Value Measurements (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The guidance generally clarifies the application of existing requirements on topics including the concepts of highest and best use and valuation premise, measuring the fair value of

Table of Contents

instruments classified in shareholders' equity, and disclosing quantitative information about the unobservable inputs used in the measurements of instruments categorized within Level 3 of the valuation hierarchy. Additionally, the guidance includes changes on topics such as measuring the fair value of financial instruments that are managed within a portfolio and additional disclosure for fair value measurements categorized within the Level 3 of the fair value hierarchy. The amended guidance is effective for public companies for interim and annual periods ending after December 15, 2011. This guidance may increase our disclosures related to fair value measurements when applicable, but is not expected to have a material impact on our statement of financial condition or results of operations.

Issued in April 2011, ASU No. 2011-03 *Transfers and Servicing (Topic 860) Reconsideration of Effective Control for Repurchase Agreements* ("ASU No. 2011-03") is intended to improve the accounting for repurchase agreements ("repos") and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. FASB determined that the criterion pertaining to an exchange of collateral should not be a determining factor in assessing effective control and also concluded that the assessment of effective control should focus on a transferor's contractual rights and obligations with respect to transferred financial assets, not on whether the transferor has the practical ability to perform in accordance with those rights or obligations. FASB also concluded that the remaining criteria are sufficient to determine effective control. Consequently, the amendments remove the transferor's ability criterion from the consideration of effective control for repos and other agreements that both entitle and obligate the transferor to repurchase or redeem financial assets before their maturity. ASU No. 2011-03 is effective for the first interim or annual period beginning on or after December 15, 2011, and will be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. We are currently evaluating the impact that adoption of this ASU will have on our financial statements.

Results of operations

As of the date of this prospectus, we have not commenced any significant operations because we are in our organization stage. We will not commence any significant operations until we have completed this offering and the concurrent private placements. We are not aware of any material trends or uncertainties, other than economic conditions affecting mortgage loans, mortgage-related securities and real estate, generally, that may reasonably be expected to have a material impact, favorable or unfavorable, on revenues or income from the acquisition of real estate-related investments, other than those referred to in this prospectus.

The offering costs to be incurred by us in connection with this offering will be reflected as a reduction of our additional paid-in-capital when it is probable that we will be responsible for such costs and they can be reasonably estimated. Costs incurred that are not directly associated with the completion of this offering will be accrued and expensed as incurred by us.

As of March 31, 2012, our Manager has incurred approximately \$650,000 related to this offering, the concurrent private placements and organization costs. We are responsible for the payment of all offering and organizational expenses (other than the underwriting discount and the placement agent fee applicable to the concurrent private placement to certain institutional accredited investors) to the extent they do not exceed \$1.2 million in the aggregate. Upon completion of this offering and the concurrent private placements, we will be required to reimburse our Manager for these costs from the proceeds of this offering and the concurrent private placements. If the total expenses attributable to our organization, this offering and the concurrent private placements (other than the underwriting discount and the placement agent fee applicable to the concurrent private placement to certain institutional accredited investors) exceed \$1.2 million, our Manager has agreed to pay for any expenses exceeding \$1.2 million. In addition, our Manager has agreed to pay (i) the underwriting discount payable with respect to the shares sold in this offering and (ii) the \$0.60 per unit placement agent fee that will be payable with respect to each unit sold in the concurrent private placement to certain

Table of Contents

institutional accredited investors (other than to investors who have a pre-existing business relationship with our Manager for which there will not be any placement agent fee payable).

Liquidity and capital resources

Liquidity is a measurement of our ability to meet potential cash requirements, including ongoing commitments to pay dividends, fund investments, repay borrowings and other general business needs. Our primary sources of funds for liquidity will consist of the net proceeds from this offering and the concurrent private placements, net cash provided by operating activities, cash from repurchase agreements and other financing arrangements and future issuances of common equity (including issuances of common equity upon the exercise of our warrants, where the holders of such warrants do not elect cashless exercise), preferred equity, convertible securities, trust preferred and/or debt securities. We intend to finance Agency RMBS and our potential target assets primarily through the use of repurchase agreements.

Under repurchase agreements, we may be required to pledge additional assets to our repurchase agreement counterparties (lenders) in the event that the estimated fair value of the existing pledged collateral under such agreements declines and such lenders demand additional collateral which may take the form of additional securities or cash. Generally, repurchase agreements contain a financing rate, term and trigger levels for margin calls and haircuts depending on the types of collateral and the counterparties involved. If the estimated fair value of the investment securities increases due to changes in market interest rates or market factors, lenders may release collateral back to us. Specifically, margin calls may result from a decline in the value of the investments securing our repurchase agreements, prepayments on the residential mortgages securing our RMBS investments and from changes in the estimated fair value of such investments generally due to principal reduction of such investments from scheduled amortization and resulting from changes in market interest rates and other market factors. Counterparties also may choose to increase haircuts based on credit evaluations of our company and/or the performance of the bonds in question. Haircuts, or the discount attributed to the value of securities sold under repurchase agreements, average between 3% and 10% for Agency RMBS and average between 10% and 50% for non-Agency RMBS, depending on the specific security used as collateral for such repurchase agreements. Should prepayment speeds on the residential mortgages underlying our RMBS investments or market interest rates increase, margin calls on our repurchase agreements could result, causing an adverse change in our liquidity position.

Upon repayment of each borrowing under a repurchase agreement, we may use the collateral immediately for borrowing under a new repurchase agreement. We have not at the present time entered into any other commitment agreements under which the lender would be required to enter into new repurchase agreements during a specified period of time.

We believe these identified sources of funds will be adequate for purposes of meeting our short-term (within one year) liquidity and long-term liquidity needs. However, our ability to meet our long-term liquidity and capital resource requirements may require additional financing. Our short-term and long-term liquidity needs include funding future investments, operating costs and distributions to our stockholders. A number of financial institutions, including potential and current repurchase agreement lenders, have tightened their lending standards and reduced their lending overall. If we are unable to obtain or renew our sources of financing or unable to obtain them on attractive terms, it may have an adverse effect on our business and results of operations.

To qualify as a REIT, we generally must distribute annually at least 90% of our net taxable income. These distribution requirements limit our ability to retain earnings and thereby replenish or increase capital for operations.

Table of Contents

Contractual obligations and commitments

We had no contractual obligations as of March 31, 2012. Prior to the completion of this offering and the concurrent private placements, we will enter into a management agreement with our Manager that will become effective upon completion of this offering and the concurrent private placements. Our Manager will be entitled to receive a management fee and the reimbursement of certain expenses. See "Our Manager and the management agreement Management agreement Management fee and expense reimbursements." If, as anticipated, we hire a chief financial officer in the future that is not an employee of our Manager, we will directly compensate such chief financial officer and such chief financial officer's support staff, which will be our only employees, with customary compensation packages, as applicable, including (without limitation) base salaries, cash bonuses and equity compensation. Because our management agreement provides that our Manager is responsible for managing our affairs, our executive officers who are employees of our Manager and not our employees will not receive cash compensation from us for serving as our executive officers. Our Manager will compensate all of our officers and personnel that are employees of our Manager.

Under our equity incentive plans, the administrator of the plans is authorized to approve grants of equity-based awards to our Manager, its personnel and its affiliates, our officers and directors as well as certain other service providers. To date, our board of directors has not approved any grants of equity awards, although we intend to grant certain equity awards upon the completion of this offering. See "Management Equity incentive plans."

We expect to enter into certain contracts that may contain a variety of indemnification obligations, principally with brokers, underwriters and counterparties to repurchase agreements. The maximum potential future payment amount we could be required to pay under these indemnification obligations may be unlimited.

Off-balance sheet arrangements

As of March 31, 2012, we had no off-balance sheet arrangements.

Dividends

We intend to make regular quarterly distributions to holders of our common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its net taxable income and that it pay tax at regular corporate rates to the extent that it annually distributes less than 100% of its net taxable income. We generally intend to pay regular quarterly dividends to our stockholders in an amount equal to our net taxable income. Before we pay any dividend, whether for U.S. federal income tax purposes or otherwise, we must first meet both our operating requirements and debt service on our repurchase agreements and other debt payable. If cash available for distribution to our stockholders is less than our net taxable income, we could be required to sell assets or borrow funds to make cash distributions, or we may make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities.

Inflation

Virtually all of our assets and liabilities will be interest rate sensitive in nature. As a result, interest rates and other factors influence our performance far more so than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our financial statements are prepared in accordance with U.S. GAAP, and our distributions will be determined by our board of directors consistent with our obligation to distribute to our stockholders at least 90% of our net taxable income on an annual basis in order to maintain our REIT qualification; in each case, our activities and balance sheet are measured with reference to historical cost and/or fair market value without considering inflation.

Table of Contents

Quantitative and qualitative disclosures about market risk

The primary components of our market risk are related to interest rate, prepayment and market value risk. While we do not seek to avoid risk completely, we believe the risk can be quantified from historical experience and seek to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Interest rate risk

Interest rate risk is highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations, and other factors beyond our control.

We will be subject to interest rate risk in connection with our investments and our repurchase agreements. Our repurchase agreements will typically be of limited duration and will be periodically refinanced at current market rates. We may mitigate this risk through utilization of derivative contracts, primarily interest rate swap agreements, interest rate caps and interest rate floors.

Interest rate effect on net interest income

Our operating results will depend in large part on differences between the yields earned on our investments and our cost of borrowing and any interest rate hedging activities. A portion of our borrowings may be based on fixed interest rates. We expect that our borrowings under the repurchase agreements we intend to enter into for Agency RMBS and our potential target assets will generally be based on prevailing market interest rates. We will attempt to match fund our borrowings and assets by attempting to use fixed-rate borrowings to finance fixed-rate assets and variable rate borrowings to finance our assets that pay variable rates of interest. However, it will not always be possible to match fund our borrowings and assets in this way.

During periods of rising interest rates, the borrowing costs associated with our variable rate borrowings tend to increase while the income earned on our fixed interest rate investments may remain substantially unchanged, or the income earned on our variable rate assets may reset more slowly than the changes in our borrowing costs. These factors will result in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses. Further, during this portion of the interest rate and credit cycles, defaults could increase and result in credit losses to us, which could adversely affect our liquidity and operating results. Such delinquencies or defaults could also have an adverse effect on the spread between interest-earning assets and interest-bearing liabilities.

Hedging techniques are partly based on assumed levels of prepayments of our RMBS. If prepayments are slower or faster than assumed, the life of the RMBS will be longer or shorter, which would reduce the effectiveness of any hedging strategies we may use and may cause losses on such transactions. Hedging strategies involving the use of derivative securities are highly complex and may produce volatile returns.

Interest rate effects on fair value

Another component of interest rate risk is the effect changes in interest rates will have on the market value of the assets we acquire. We will face the risk that the market value of our assets will increase or decrease at different rates than those of our liabilities, including any hedging instruments.

We will primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

Table of Contents

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change materially. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change materially. In addition, other factors impact the fair value of our interest rate-sensitive investments and any hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, changes in actual interest rates may have a material adverse effect on us.

Prepayment risk

As we receive prepayments of principal on our RMBS investments, premiums paid on such investments will be amortized against interest income. In general, an increase in prepayment rates will accelerate the amortization of purchase premiums, thereby reducing the interest income earned on the RMBS investments. Conversely, discounts on such RMBS investments are accreted into interest income. In general, an increase in prepayment rates will accelerate the accretion of purchase discounts, thereby increasing the interest income earned on the RMBS investments.

Extension risk

If prepayment rates decrease in a rising interest rate environment, the life of the fixed-rate portion of the related RMBS assets could extend beyond the term of the swap agreement or other hedging instrument. This could have a negative impact on our results from operations, as borrowing costs would no longer be fixed after the end of the hedging instrument, while the income earned on the hybrid ARM RMBS would remain fixed. This situation may also cause the market value of our hybrid ARM RMBS to decline, with little or no offsetting gain from the related hedging transactions. In extreme situations, we may be forced to sell assets to maintain adequate liquidity, which could cause us to incur losses.

Market risk

Market value risk

Our available-for-sale securities will be reflected at their estimated fair value with unrealized gains and losses excluded from earnings and reported in other comprehensive income pursuant to Accounting Standards Codification 320, Investments Debt and Equity Securities, or ASC 320. The estimated fair value of these securities fluctuates primarily due to changes in interest rates and other factors. Generally, in a rising interest rate environment, the estimated fair value of these securities would be expected to decrease; conversely, in a decreasing interest rate environment, the estimated fair value of these securities would be expected to increase.

Real estate risk

Residential and commercial property values are subject to volatility and may be affected adversely by a number of factors, including, but not limited to: national, regional and local economic conditions (which may be adversely affected by industry slowdowns and other factors); local real estate conditions (such as an oversupply of housing); changes or continued weakness in specific industry segments; construction quality, age and design; demographic factors; and retroactive changes to building or similar codes. In addition, decreases in property values reduce the value of the collateral and the potential proceeds available to our securities, which could also cause us to suffer losses.

Credit risk

We retain the risk of potential credit losses on the loans underlying the non-Agency RMBS, CMBS and ABS we may hold. We may seek to manage this risk through our pre-acquisition due diligence process, through the use of non-recourse financing that limits our exposure to credit losses to the

Table of Contents

specific assets that are subject to the non-recourse financing and, subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, through the use of derivative financial instruments, including, among others, contracts with respect to the Markit ABX.HE index, a tradeable index referencing a basket of 20 subprime MBS, and the Markit CMBX index, a tradeable index referencing a basket of 25 CMBS. In addition, with respect to any particular target asset, our Manager's investment team will evaluate, among other things, relative valuation, supply and demand trends, shape of yield curves, prepayment rates, delinquency and default rates, recovery of various segments of the economy and vintage of collateral.

Risk management

To the extent consistent with maintaining our REIT qualification, we will seek to manage risk exposure to protect our investment portfolio against the effects of major interest rate changes. We may generally seek to manage this risk by:

relying on our Manager's investment selection process described in this prospectus under "Business Our investment process and analysis";

monitoring and adjusting, if necessary, the reset index and interest rate related to Agency RMBS and our potential target assets and our financings;

attempting to structure our financing agreements to have a range of different maturities, terms, amortizations and interest rate adjustment periods;

using hedging instruments, primarily interest rate swap agreements but also financial futures, options, interest rate cap agreements, floors and forward sales to adjust the interest rate sensitivity of Agency RMBS and our potential target assets and our borrowings; and

actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of Agency RMBS and our potential target assets and the interest rate indices and adjustment periods of our financings.

Table of Contents

Business

Our Company

We are organized as a Delaware corporation focused on investing in, financing and managing primarily residential mortgage-backed securities, or RMBS, for which the principal and interest payments are guaranteed by a U.S. Government agency, such as the Government National Mortgage Association, or GNMA, or a U.S. Government-sponsored entity, or GSE, including the Federal National Mortgage Association, or FNMA, and the Federal Home Loan Mortgage Corporation, or FHLMC. We refer to these types of securities as Agency RMBS. Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with RMBS that are not guaranteed by a U.S. Government agency or GSE, or non-Agency RMBS, commercial mortgage-backed securities, or CMBS, and other asset-backed securities, or ABS. We refer to these assets as our potential target assets. We intend to finance investments in Agency RMBS and our potential target assets primarily through the use of repurchase agreements.

Our objective is to provide attractive risk-adjusted returns to our investors over the long term, primarily through dividends and secondarily through capital appreciation. We intend to achieve this objective by selectively acquiring a diversified investment portfolio of assets designed to produce attractive returns across a variety of market conditions and economic cycles. We intend to construct a diversified investment portfolio by focusing on the relative value of securities within various sectors of the mortgage markets and security selection.

We will be externally managed and advised by our Manager, an investment advisor registered with the U.S. Securities and Exchange Commission, or the SEC, and a wholly-owned subsidiary of Legg Mason, Inc., or Legg Mason (NYSE: LM). Our Manager will be responsible for administering our business activities and day-to-day operations, subject to the supervision and oversight of our board of directors.

We have not made any investments in Agency RMBS or our potential target assets as of the date of this prospectus. We will not commence significant operations until we have completed this offering and the concurrent private placements. We intend to elect and qualify to be taxed as a real estate investment trust, or REIT, for U.S. federal income tax purposes, commencing with our taxable year ending December 31, 2012. We generally will not be subject to U.S. federal income taxes on our net taxable income to the extent that we annually distribute all of our net taxable income to stockholders and maintain our intended qualification as a REIT. We also intend to operate our business in a manner that will permit us to maintain our exemption from registration under the 1940 Act.

Current market opportunities

Since the height of the financial crisis in 2008, there have been a number of proposals put forward regarding the reform of the housing finance market. We believe the most important theme of these proposals, as highlighted in the U.S. Department of Treasury and Department of Housing and Urban Development report to Congress on February 11, 2011, is the reduction of the government's role in, and the return of private capital to, the housing finance market. Several tools intended to encourage investment of private capital were recommended in the U.S. Department of Treasury and Department of Housing and Urban Development report including increasing guarantee fees, decreasing loan limits and tightening underwriting criteria for conforming loans. We believe these recommended changes, some of which have begun to be implemented, such as the tightening of conforming loan limits in October 2011, will reduce the future supply of Agency RMBS, limit mortgage refinancing and associated prepayment risk, and reduce the future volatility of the Agency RMBS market, which we view as positive developments for existing Agency RMBS.

Table of Contents

We believe investors continue to seek incremental spreads relative to U.S. Treasury Notes in a low yield environment and financial institutions continue to prefer high quality, liquid Agency RMBS. In addition, our Manager has observed that the long-standing correlation between the prepayment rates of borrowers and their ability to refinance mortgage loans (as defined by the difference between available rates in the market and the legacy rates being paid by borrowers) has become partially de-linked in the past several years. Our Manager believes this is primarily a result of the inability of many borrowers to refinance their existing mortgages because of the significant decrease in the equity value of those borrowers' homes. With yield spreads on Agency RMBS at what our Manager views as attractive levels, our Manager believes there will continue to be strong demand for Agency RMBS.

Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with non-Agency RMBS, which are collateralized by non-conforming residential mortgages. While we anticipate mortgage loan delinquencies and credit losses may continue to rise and housing conditions may continue to deteriorate, we believe that current prices for certain non-Agency RMBS offer the potential for attractive risk-adjusted returns. Over time, we believe reform of GSEs, such as FNMA and FHLMC, will accelerate the demand for private capital into the housing finance sector, and we expect that we will be well positioned to make attractive risk-adjusted investments in new residential-mortgage assets.

The current interest rate environment is characterized by a steep yield curve with the spread between two-year U.S. Treasury Notes and 10-year U.S. Treasury Notes well above the average spread over the last three decades. The Federal Reserve Board has maintained a near-zero target for the federal funds rate. On January 25, 2012, the Federal Open Market Committee released a statement indicating that it would maintain the target range for the federal funds rate at 0% to 0.25% and that it continues to anticipate that economic conditions, including low rates of resource utilization and a subdued outlook for inflation over the medium term, are likely to warrant exceptionally low levels for the federal funds rate at least through 2014, which statement the Federal Open Market Committee reiterated on April 25, 2012. Our Manager believes recent economic data suggest an improvement in U.S. economic growth. However, certain indicators such as high unemployment, low levels of capacity utilization, the current large shadow inventory of non-performing loans, declining home prices in most markets, increased loan defaults and continued stress in the housing and construction markets all point to a muted recovery. We believe this slow growth environment should keep the yield curve relatively steep and promote continued demand for Agency and non-Agency RMBS.

As the capital markets have recovered, commercial banks have re-entered the secured lending market which has quickened the pace of the recovery of asset values in the credit markets. Financing of Agency and non-Agency RMBS is currently widely available through, among other vehicles, repurchase agreements. Haircuts, or the discount attributed to the value of securities sold under repurchase agreements, average between 3% and 10% for Agency RMBS and average between 10% and 50% for non-Agency RMBS, depending on the specific security used as collateral for such repurchase agreements. We intend to use leverage to seek to increase potential returns to our stockholders by borrowing against existing assets through repurchase agreements and using the proceeds to acquire additional assets.

Our Manager's views of the current market opportunities are based on its own assessments. There can be no assurance that our investment and financing strategies based on our Manager's views will be able to generate attractive returns for our stockholders.

Our Manager

We will be externally managed and advised by Western Asset Management Company. Established in 1971 and acquired by Legg Mason in 1986, our Manager is a registered investment advisor headquartered in Pasadena, California, that specializes in fixed-income asset management. From offices

Table of Contents

in Pasadena, Hong Kong, London, Melbourne, New York, São Paulo, Singapore and Tokyo, our Manager's 904 employees provide investment services for a wide variety of global clients, including mutual funds, corporate, public, insurance, health care, union organizations and charitable foundations. Client portfolios range across an equally wide variety of mandates, from money markets to emerging markets. As of December 31, 2011, our Manager had 529 clients, representing 40 countries and 1051 accounts. By concentrating resources on fixed-income, our Manager is able to fully commit to serving clients of all types within the fixed-income sector.

As of December 31, 2011, our Manager and its investment advisory affiliates over which our Manager has operational responsibility, or its supervised affiliates, had approximately \$443 billion in assets under management. As of December 31, 2011, our Manager had a total of \$61.5 billion in assets under management in the asset classes corresponding to Agency RMBS and our potential target assets, of which \$37.6 billion was invested in Agency RMBS, \$13.8 billion in non-Agency RMBS, \$2.4 billion in CMBS and \$7.7 billion in ABS. Our Manager manages these assets using a range of specific strategies and investment vehicles, including mutual and private funds, private commingled vehicles and separately managed accounts. Our Manager's investment professionals and other staff have extensive experience in managing fixed-income assets, including Agency RMBS, non-Agency RMBS, CMBS, ABS and other such instruments.

Our chief investment officer, Stephen P. Fulton, who also serves as the head of our Manager's Agency RMBS team of five investment professionals averaging 18 years of experience, will, along with two senior portfolio managers from the Agency RMBS team, be primarily responsible for overseeing the management of our assets. The Agency RMBS team works alongside and is able to utilize the resources of our Manager's structured products team, which is made up of 16 investment professionals averaging 12 years of experience and focuses on managing and evaluating our potential target assets, including non-Agency RMBS, CMBS and ABS. The Agency RMBS team is also able to call on the experience of a number of our Manager's other investment professionals, not specifically dedicated to managing our assets, but with expertise that covers certain aspects of our potential target assets as well as on specialists in our derivatives team, comprised of four investment professionals averaging 13 years of experience, and our liquidity team, comprised of 11 investment professionals averaging 23 years of experience, who are part of our Manager's broader investment team. The collective team operates under the purview of our Manager's U.S. broad markets committee which sets overall sector allocations for broad market accounts. Our Manager seeks to unite groups of specialists dedicated to different market sectors. The daily interaction among the different teams is designed to develop a consensus approach that draws on the expertise of all team members. Our Manager's overall investment management team consists of 127 investment professionals.

Our Manager's investment process is based on a team approach using a combination of security-level research and macroeconomic analysis. Our Manager's investment style starts with developing a global investment outlook, as a part of which our Manager engages in forecasting economic growth, interest rates and inflation. However, rather than selecting precise targets, our Manager restricts its forecasting to long-term trends, focusing on factors such as economic growth, interest rates and inflation. Investment strategies are then driven by the difference between our Manager's reading of the underlying fundamentals and the macroeconomic trends that have been generally priced into securities by the market. Using a disciplined investment approach, our Manager will set targets for asset allocation and duration for each sector of the fixed-income market. This view is then weighed carefully against expectations already priced into the markets in order to arrive at an investment strategy and portfolio structure. Each of our Manager's sector teams is tasked with choosing the issues and issuers for a particular sector. Factors that are taken into consideration in evaluating specific securities include relative credit strength, liquidity, issue structure, event risk, covenant protection and market valuation, focusing on the selection of individual assets based upon a fundamental analysis of the asset and an evaluation of the asset's relative value. In addition, with respect to any particular target asset, our Manager's investment team will evaluate, among other things,

Table of Contents

relative valuation, supply and demand trends, shape of yield curves, prepayment rates, delinquency and default rates, recovery of various segments of the economy and vintage of collateral.

We also expect to benefit from our Manager's portfolio management, finance and administration functions, which will address securities valuation, risk management, legal, compliance, investor relations and operational matters, trade allocation and execution and information technologies in connection with the performance of its duties. We expect that our Manager and its affiliates will continue to manage their existing portfolios and provide management services to their other clients.

Our investment strategy

Our Manager's investment philosophy, which developed from a singular focus in fixed-income asset management over a variety of credit cycles and conditions, is to provide clients with diversified, tightly controlled, long-term value-oriented portfolios. Through rigorous analysis of all sectors of the fixed-income market, our Manager seeks to identify assets with the greatest risk-adjusted total value potential. In making investment decisions on our behalf, our Manager will incorporate its views on the economic environment and the outlook for the mortgage markets, including relative valuation, supply and demand trends, the level of interest rates, the shape of the yield curve, prepayment rates, financing and liquidity, commercial and residential real estate prices, delinquencies, default rates, recovery of various segments of the economy and vintage of collateral, subject to maintaining our REIT qualification and our exemption from registration under the 1940 Act. We expect to benefit from the breadth and depth of our Manager's overall investment philosophy, which focuses on a macroeconomic analysis as well as an in-depth analysis of individual assets and their relative value.

We will rely on our Manager's expertise in asset allocation and identifying attractive assets within our investment strategy. Although our core investment strategy will be focused on Agency RMBS, our Manager's expertise in related investment disciplines such as non-Agency RMBS, CMBS, and ABS provides our Manager with both (1) valuable investment insights to our RMBS investment selection and strategy and (2) flexibility to invest in assets other than Agency RMBS opportunistically as market conditions warrant.

We expect to purchase and sell Agency RMBS and our potential target assets. Our Manager does not expect to purchase securities on our behalf with a view to selling them shortly after purchase. However, in order to maximize returns and manage portfolio risk while remaining opportunistic, we may dispose of securities earlier than anticipated or hold securities longer than anticipated depending upon prevailing market conditions, credit performance, availability of leverage or other factors regarding a particular security or our capital position.

Agency RMBS

Residential mortgage-backed securities in which we intend to invest include mortgage pass-through securities and CMOs for which the principal and interest payments are guaranteed by a U.S. Government agency such as GNMA or a GSE such as FNMA or FHLMC. We refer to these types of securities as Agency RMBS. The Agency RMBS we acquire could be secured by FRMs, ARMs, or hybrid ARMs. FRMs have interest rates that are fixed for the term of the loan and do not adjust. The interest rates on ARMs generally adjust annually (although some may adjust more frequently) to an increment over a specified interest rate index. Hybrid ARMs have interest rates that are fixed for a specified period of time (typically three, five, seven or ten years) and, thereafter, adjust to an increment over a specified interest rate index. ARMs and hybrid ARMs generally have periodic and lifetime constraints on how much the loan interest rate can change on any predetermined interest rate reset date. Relative value analysis, including consideration of current market conditions, will determine our allocation to FRMs, ARMs and hybrid ARMs.

Table of Contents

Subject to prevailing market conditions at the time of purchase, we currently expect that the capital we deploy will be used initially to purchase approximately 85-100% Agency RMBS, with the remainder, if any, being allocated among our potential target assets as described below under " Our potential target assets."

Mortgage pass-through certificates. Mortgage pass-through certificates are securities representing interests in "pools" of mortgage loans secured by residential real property where payments of both interest and principal, plus pre-paid principal, on the securities are made monthly to holders of the securities, in effect "passing through" monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer/guarantor and servicers of the securities.

Collateralized mortgage obligations. CMOs are securities that are structured from mortgage pass-through certificates, which receive monthly payments of principal and interest or payments of principal or interest only. CMOs divide the cash flows which come from the underlying mortgage pass-through certificates into different classes of securities that may have different maturities and different weighted average lives than the underlying pass-through certificates. CMOs can re-distribute the risk characteristics of pass-through certificates to better satisfy the demands of various investor types. These risk characteristics would include average life variability, prepayment volatility, floating versus fixed interest rate and payment and interest rate risk. Monthly payments of principal, including prepayments, are generally first returned to investors holding the shortest maturity class; investors holding the longer maturity classes receive principal only after the first class has been retired.

CMOs include stripped securities, which are mortgage-backed securities structured with two or more classes that receive different distributions of principal or interest on a pool of Agency RMBS. Stripped securities include interest only Agency RMBS and inverse interest only Agency RMBS, each of which we may invest in subject to maintaining our qualification as a REIT.

Interest Only Agency RMBS. This type of stripped security only entitles the holder to interest payments. The yield to maturity of interest only Agency RMBS is extremely sensitive to the rate of principal payments (particularly prepayments) on the underlying pool of mortgages. If we decide to invest in these types of securities, we anticipate doing so primarily to take advantage of particularly attractive prepayment-related or structural opportunities in the Agency RMBS markets.

Inverse Interest Only Agency RMBS. This type of stripped security has a coupon with an inverse relationship to its index and is subject to caps and floors. Inverse interest only Agency RMBS entitles the holder to interest only payments based on a notional principal balance, which is typically equal to a fixed rate of interest on the notional principal balance less a floating rate of interest on the notional principal balance that adjusts according to an index subject to set minimum and maximum rates. The value of inverse interest only Agency RMBS will generally decrease when its related index rate increases and increase when its related index rate decreases.

The types of mortgage pass-through certificates in which we may invest, or which may comprise the CMOs in which we may invest, include, but are not limited to, the following.

FHLMC certificates

FHLMC is a shareholder-owned, federally-chartered corporation created pursuant to an act of the U.S. Congress on July 24, 1970. The principal activity of FHLMC currently consists of the purchase of mortgage loans or participation interests in mortgage loans and the resale of the loans and participations in the form of guaranteed mortgage-backed securities. FHLMC guarantees to each holder of FHLMC certificates the timely payment of interest at the applicable pass-through rate and principal on the holder's pro rata share of the unpaid principal balance of the related mortgage loans. The obligations of FHLMC under its guarantees are solely those of FHLMC and are not backed by the

Table of Contents

full faith and credit of the United States. If FHLMC were unable to satisfy its obligations, distributions to holders of FHLMC certificates would consist solely of payments and other recoveries on the underlying mortgage loans and, accordingly, defaults and delinquencies on the underlying mortgage loans would adversely affect monthly distributions to holders of FHLMC certificates. (In September 2008, FHLMC was placed into the conservatorship of the U.S. Government and has been receiving significant support from the U.S. Government.)

FHLMC certificates are backed by pools of single-family mortgage loans or multi-family mortgage loans. These underlying mortgage loans may have original terms to maturity of up to 40 years. FHLMC certificates may be issued under cash programs (composed of mortgage loans purchased from a number of sellers) or guarantor programs (composed of mortgage loans acquired from one seller in exchange for certificates representing interests in the mortgage loans purchased).

FNMA certificates

FNMA is a shareholder-owned, federally-chartered corporation organized and existing under the Federal National Mortgage Association Charter Act, created in 1938 and rechartered in 1968 by Congress as a stockholder owned company. FNMA provides funds to the mortgage market primarily by purchasing home mortgage loans from local lenders, thereby replenishing their funds for additional lending. FNMA guarantees to the registered holder of a FNMA certificate that it will distribute amounts representing scheduled principal and interest on the mortgage loans in the pool underlying the FNMA certificate, whether or not received, and the full principal amount of any such mortgage loan foreclosed or otherwise finally liquidated, whether or not the principal amount is actually received. The obligations of FNMA under its guarantees are solely those of FNMA and are not backed by the full faith and credit of the United States. If FNMA were unable to satisfy its obligations, distributions to holders of FNMA certificates would consist solely of payments and other recoveries on the underlying mortgage loans and, accordingly, defaults and delinquencies on the underlying mortgage loans would adversely affect monthly distributions to holders of FNMA certificates. (In September 2008, FNMA was placed into the conservatorship of the U.S. Government and has been receiving significant support from the U.S. Government).

FNMA certificates may be backed by pools of single-family or multi-family mortgage loans. The original term to maturity of any such mortgage loan generally does not exceed 40 years. FNMA certificates may pay interest at a fixed rate or an adjustable rate. Each series of FNMA ARM certificates bears an initial interest rate and margin tied to an index based on all loans in the related pool, less a fixed percentage representing servicing compensation and FNMA's guarantee fee. The specified index used in different series has included the Treasury Index, the 11th District Cost of Funds Index published by the Federal Home Loan Bank of San Francisco, LIBOR and other indices. Interest rates paid on fully-indexed FNMA ARM certificates equal the applicable index rate plus a specified number of percentage points. The majority of series of FNMA ARM certificates issued to date have evidenced pools of mortgage loans with monthly, semi-annual or annual interest rate adjustments. Adjustments in the interest rates paid are generally limited to an annual increase or decrease of either 1.00% or 2.00% and to a lifetime cap of 5.00% or 6.00% over the initial interest rate.

GNMA certificates

GNMA is a wholly-owned corporate instrumentality of the United States within the Department of Housing and Urban Development, or HUD. The National Housing Act of 1934, or the Housing Act, authorizes GNMA to guarantee the timely payment of the principal of and interest on certificates which represent an interest in a pool of mortgages insured by the FHA or partially guaranteed by the Department of Veterans Affairs and other loans eligible for inclusion in mortgage pools underlying GNMA certificates. Section 306(g) of the Housing Act provides that the full faith and credit of the

Table of Contents

United States is pledged to the payment of all amounts which may be required to be paid under any guaranty by GNMA.

At present, most GNMA certificates are backed by single-family mortgage loans. The interest rate paid on GNMA certificates may be a fixed rate or an adjustable rate. The interest rate on GNMA certificates issued under GNMA's standard ARM program adjusts annually in relation to the Treasury Index. Adjustments in the interest rate are generally limited to an annual increase or decrease of 1.00% and to a lifetime cap of 5.00% over the initial coupon rate.

TBAs

We may utilize "to-be-announced" forward contracts, or TBAs, in order to invest in Agency RMBS. Pursuant to these TBAs, we would agree to purchase, for future delivery, Agency RMBS with certain principal and interest terms and certain types of underlying collateral, but the particular Agency RMBS to be delivered would not be identified until shortly before the TBA settlement date. Our ability to purchase Agency RMBS through TBAs may be limited by the 75% income and asset tests applicable to REITs. See "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation."

Our potential target assets

Although our core investment strategy will be focused on Agency RMBS, we may opportunistically supplement our portfolio with the types of assets described below. Subject to prevailing market conditions at the time of purchase, we currently expect that the capital we deploy will be used initially to purchase our potential target assets in the following ranges: approximately 0-15% non-Agency RMBS, approximately 0-5% CMBS and approximately 0-5% ABS.

Non-Agency RMBS

Non-Agency RMBS are residential mortgage-backed securities that are not issued or guaranteed by a U.S. Government agency or GSE. Like Agency RMBS, non-Agency RMBS represent interests in "pools" of mortgage loans secured by residential real property.

The mortgage loan collateral for non-Agency RMBS consists of residential mortgage loans that do not generally conform to underwriting guidelines issued by a federally chartered corporation, such as FNMA or FHLMC, or an agency of the U.S. Government, such as GNMA, due to certain factors, including mortgage balances in excess of agency underwriting guidelines, borrower characteristics, loan characteristics and level of documentation, and therefore are not issued or guaranteed by an agency. Senior RMBS typically are rated by at least one nationally recognized statistical rating organization, such as Moody's Investors Service, Inc., or Moody's, Standard & Poor's, or S&P, or Fitch, Inc., and are or were at the time of issuance AAA-rated by at least one of these rating agencies, although such ratings may have been subsequently downgraded.

The non-Agency RMBS we acquire could be secured by FRMs, ARMs, or hybrid ARMs. Relative value analysis, including consideration of current market conditions, will determine our allocation to FRMs, ARMs and hybrid ARMs.

Our allocation of our non-Agency RMBS collateralized by FRMs, ARMs or hybrid ARMs will depend on various factors including, but not limited to, relative value, expected future prepayment trends, home price appreciation trends, supply and demand, availability of financing, expected future interest rate volatility and the overall state of the non-Agency RMBS secondary market. Borrowers of the underlying loans that secure the non-Agency RMBS assets we may purchase can be divided into prime, Alternative-A and subprime borrowers based on their credit rating.

Table of Contents

CMBS

CMBS are securities backed by obligations (including certificates of participation in obligations) that are principally secured by commercial mortgages on real property or interests therein having a multifamily or commercial use, such as regional malls, other retail space, office buildings, industrial or warehouse properties, hotels, apartments, nursing homes and senior living facilities. Our emphasis will be on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations. We have not established a minimum current rating requirement.

CMBS are typically issued in multiple tranches whereby the more senior classes are entitled to priority distributions from the trust's income to make specified interest and principal payments on such tranches. Losses and other shortfalls from expected amounts to be received on the mortgage pool are borne by the most subordinate classes, which receive principal payments only after the more senior classes have received all principal payments to which they are entitled. The credit quality of CMBS depends on the credit quality of the underlying mortgage loans, which is a function of factors such as the principal amount of loans relative to the value of the related properties; the cash flow produced by the property; the mortgage loan terms, such as amortization; market assessment and geographic location; construction quality of the property; and the creditworthiness of the borrowers.

ABS

ABS are securities backed by various asset classes including auto loans, student loans, credit card loans, equipment loans, floor plan loans and small business loans fully guaranteed as to principal and interest by the SBA. ABS remain subject to the credit exposure of the underlying receivables. Our emphasis will be on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations. We have not established a minimum current rating requirement. Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, we may acquire debt tranches from these securitizations.

Other Agency MBS

We may also invest in mortgage-backed securities, or MBS, for which the principal and interest payments are guaranteed by a GSE, but for which the underlying mortgage loans are secured by real property other than single family residences. These may include, but are not limited to FNMA DUS (Delegated Underwriting and Servicing) MBS, FHLMC Multifamily Mortgage Participation Certificates, and GNMA project loan pools, or CMOs structured from such collateral.

Our competitive advantages

We believe that our competitive advantages include the following:

Significant experience of our Manager

Our Manager has utilized Agency RMBS as a vital component within its investment strategy since its inception in 1971 and has managed through several interest rate, housing, and credit cycles. Our Manager has extensive experience managing Agency RMBS strategies as separately-managed accounts, commingled vehicles, and mutual funds. These strategies include Agency RMBS only, GNMA RMBS only and several Agency RMBS strategies with varying degrees of non-Agency RMBS exposure. Agency RMBS has also been a significant portion of our Manager's broad market strategies since 1971. Moreover, our Manager has been an active investor in non-Agency RMBS, CMBS and ABS for over 20 years as those markets have developed. Our Manager manages these assets in broad market accounts as well as non-Agency RMBS specific strategies, including commingled funds and mutual

Table of Contents

funds. Our Manager, in a joint venture with RLJ Companies, LLC, also manages the RLJ Western Asset Public/Private Investment Fund, a master-feeder fund complex participating in the U.S. Treasury's Legacy Securities Public-Private Investment Program and investing entirely in non-Agency RMBS and CMBS. We will have access to our Manager's dedicated Agency RMBS team, which is led by our chief investment officer. In addition, we expect to utilize the resources of our Manager's structured products team, which focuses on our potential target assets, including non-Agency RMBS, CMBS and ABS. We also expect to call on the experience of specialists in derivatives and liquidity who are part of our Manager's broader investment team. In addition, we believe that our Manager's senior management team, which has a long track record and broad experience in managing mortgage-related assets through a variety of credit and interest rate environments, has demonstrated the ability to generate attractive risk-adjusted returns under different market conditions and cycles and will provide us with a competitive advantage.

Extensive strategic relationships

Our Manager and its supervised affiliates maintain extensive long-term relationships with other financial intermediaries, including primary dealers, leading investment banks, brokerage firms, leading mortgage originators and commercial banks. As one of the largest fixed-income investment managers in the world, our Manager has access to deal flow and secondary trading opportunities to which smaller firms do not have access. Additionally, our Manager's size and broad market access are valuable in developing and implementing our investment strategy. We believe these relationships will enhance our ability to source, finance and hedge investment opportunities and, thus, enable us to grow in various credit and interest rate environments. In addition, we believe the contacts our Manager and its supervised affiliates have with numerous investment grade derivative and lending counterparties will assist us in implementing our financing and hedging strategies.

Disciplined investment approach

Our Manager takes a value-oriented approach to managing Agency RMBS. Using that approach, our Manager seeks to optimize yield while adjusting for prepayment and interest rate risk.

From a macroeconomic perspective, our Manager examines current and forward interest rates, the shape of the yield curve, gross domestic product, or GDP, growth and inflation expectations, regional and local property trends, local employment conditions, national loan modification initiatives and mortgage servicer timelines and techniques. At the security level, our Manager examines borrower and collateral characteristics such as the incentives a homeowner might have to refinance and the level of equity in the home.

Access to our Manager's analytical tools and infrastructure

We expect our Manager to use its analytical and portfolio management modeling tools and processes to seek to generate positive net interest margins for our assets. We will employ a combination of proprietary and third-party tools in an effort to identify investments in the Agency RMBS sector with the most attractive risk-adjusted returns.

Our Manager will analyze macroeconomic factors to seek to determine the appropriate sector mix and strategy for us that will best capitalize on the market knowledge, experience and relationships within our Manager's existing platform. We intend to capitalize on the market knowledge and ready access to data across our target markets that our Manager obtains through these tools and processes and believe that our Manager's sophisticated analysis of both macro and micro economic factors will position us to manage cash flows from Agency RMBS and our potential target assets and make distributions to our stockholders while preserving capital. We believe we will also benefit from our Manager's comprehensive finance and administrative infrastructure, including its risk management and financial reporting operations, as well as its business development, legal and compliance teams.

Table of Contents

Alignment of our Manager's interests

We have taken steps to structure our relationship with our Manager so that our interests and those of our Manager are closely aligned. Concurrently with the closing of this offering, we will issue and sell in a private placement an aggregate of 46,043 shares of our common stock (subject to certain adjustments as described in "Summary Concurrent private placements") at \$20.00 per share to our Manager's deferred compensation plan, which will make such investment on behalf of the beneficiaries of the plan, which includes certain executives and other employees of our Manager and its affiliates. These shares will be subject to a two year lock-up agreement with the underwriters that is substantially similar to the 180-day lock-up agreements to be executed by our Manager, our directors and executive officers and the executive officers of our Manager.

In addition, our equity incentive plans will allow us to grant common stock-based awards to our Manager and its employees, including our executive officers, representing up to 3.0% of the total number of issued and outstanding shares of our common stock (on a fully diluted basis) at the time of each award (other than any shares issued or subject to awards made pursuant to one of our equity incentive plans). Upon the completion of this offering, we will grant to our Manager a number of shares of our restricted common stock that is equal to 0.5% of the aggregate number of shares of our common stock sold in this offering (without giving effect to any exercise by the underwriters of their over-allotment option) and units sold in the concurrent private placement to certain institutional accredited investors. One-third of these shares will vest on each of the first, second and third anniversaries of the grant date.

Our investment process and analysis

General

Our Manager's strategic goal is to add value to client portfolios while adhering to a disciplined risk control process. Our Manager's investment philosophy combines traditional analysis with innovative technology applied to all sectors of the market. Our Manager believes inefficiencies exist in the fixed-income markets and attempts to add incremental value by exploiting these inefficiencies across all eligible market sectors. Our Manager's management style emphasizes the use of multiple strategies and active sector rotation and issue selection, while constraining overall interest rate risk.

Our Manager's fixed-income discipline emphasizes a team approach that unites groups of specialists dedicated to different market sectors. The investment responsibilities of each sector group are distinct, yet results are derived from the constant interaction that unites the specialty groups into a cohesive investment management team. The sector teams are comprised of our Manager's senior portfolio managers and research analysts who are highly skilled and experienced in each major area of the fixed-income market. They exchange views on a daily basis and periodically meet more formally to review our Manager's economic outlook and investment strategy. This structure seeks to generate an investment consensus that draws on the expertise of all team members.

Members of our Manager's U.S. and Global Broad Market Strategy Committees continually analyze the broad economic environment to determine its potential impact on sector performance. This group studies historical yield spreads, identifies the fundamental factors that influence yield spread relationships and relates these findings to our Manager's projections to determine attractive alternatives.

Our Manager's analysts continually augment this process by providing detailed analyses of specific sectors. In particular, mortgage analysis includes the use of external research which integrates the components of prepayment, housing turnover, default and refinancing.

Table of Contents

Issue selection

Agency RMBS. Our Manager takes a value-oriented approach to managing Agency RMBS. Using that approach, our Manager seeks to optimize yield while adjusting for prepayment and interest rate risk. Our Manager has historically focused its Agency RMBS investing almost exclusively on pass-through securities and CMOs for which the underlying collateral is FRMs or hybrid ARMs. Our Manager believes that hedging the embedded prepayment option and the changing effective duration of these securities to achieve a stable leveraged return profile can be an effective investment strategy. Our Manager believes that many of the financial models that predict prepayments and value mortgages have historically underestimated the changing nature of the refinancing process. These models have underestimated prepayments during periods of time when yields are falling or the availability of credit is increasing, and overestimated prepayments when rates are stable to rising or credit is tightening. Our Manager structures its Agency RMBS investment portfolio based on a conservative approach to the convexity (the measure of the sensitivity of the duration of a bond to changes in interest rates) of the mortgage market and conducts hedging strategies consistent with this outlook. Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, our Manager may utilize derivative financial instruments to hedge all or a portion of the interest rate risk associated with the financing of our investment portfolio. Specifically, our Manager may, subject to maintaining our qualification as a REIT, seek to hedge our exposure to potential interest rate mismatches between the interest that we earn on our investments and our borrowing costs caused by fluctuations in short-term interest rates. In utilizing leverage and interest rate hedges, our Manager seeks to improve risk-adjusted returns and, where possible, to lock in, on a long-term basis, a favorable spread between the yield on our assets and the cost of our financing.

Non-Agency RMBS. A key element of the non-Agency RMBS investment process is the forecast of expected losses due to defaults on the underlying non-Agency RMBS loan collateral. The level of losses is dependent on the quantity of loans which default and the loss severity upon liquidation of defaulted loans. Our Manager has developed a number of proprietary tools to analyze residential mortgage loan defaults and loss severities. These tools encompass home price models, default models, and loan loss severity models. When projecting future performance, many assumptions have to be made. Our Manager uses in-house quantitative research from loan level data to project mortgage pool cash flows, analyze security structures, and ultimately assess the risk in its non-Agency RMBS positions. Our Manager also makes qualitative adjustments to reflect the current state of the housing market, securities market liquidity, and potential implications of policy changes and macroeconomic conditions.

Our Manager's approach to asset acquisition and ongoing surveillance of risk follows similar methodologies. Our Manager uses raw loan level data and loan level time-series in conjunction with economic variables to develop projections of characteristic specific borrower behavior trends. The end result of this research is to produce top line cash flow assumptions that can be applied to each mortgage pool evaluated, and includes default rates, delinquency rolling rates, delinquency curing rates, loss severities, payment velocities, and voluntary prepayments. These variables are analyzed and stratified across various loan level risk factors, including the following: loan status (current, delinquent, foreclosed, bankrupt, real estate owned); credit score; loan payment history; loan-to-value ratio, borrower equity, and home price appreciation/depreciation from origination; loan age and seasoning; geography at the state, metropolitan statistical area, county, and zip code level; loan originator and servicer; payment and interest rate reset shock; and documentation, loan purpose, occupancy, and additional loan terms.

Given the existing housing environment, our Manager currently believes home price declines and negative equity will be the primary drivers of default risk. The default rate models our Manager has developed are utilized to project residential loan defaults on prime, Alternative-A, and subprime collateral. The strength of the housing market is an important factor in projecting the rate of defaults

Table of Contents

as the amount of positive or negative equity can be a significant factor in the decision of a borrower to default on a loan.

The loss severity models assist our Manager in predicting loss severity and recovery rates if borrowers default on their loans. The loss severity models are based on a number of factors including but not limited to the costs of foreclosing and liquidating loans, the loan-to-value ratio of the loan and the cumulative amount of home price appreciation or depreciation since the loan was originated. Voluntary prepayment speeds are determined considering, among other things, historical loan-level detail from other home price depreciation environments, such as California in the early 90s and, more recently, the Midwestern United States. Updated borrower information, loan-to-value data and refinance incentive factor heavily in our Manager's calculations.

Our Manager scores and forecasts an equilibrium home price level for zip codes throughout the country. This home price appreciation/depreciation forecast is constructed using numerous data such as inflation, personal income growth and unemployment. By combining the loan level analysis and the home price appreciation forecasts, our Manager generates default, loss, and recovery expectations for a given pool of loans.

The housing, default rate, and loss severity models listed above in addition to other proprietary tools enable our Manager to project prepayment, delinquency, default, and loss severity rates on residential loan pools backing non-Agency RMBS. These assumptions, in conjunction with the payment structure and credit enhancement of the non-Agency RMBS transactions allow our Manager to project bond cashflows, yields, yield spreads, and projected returns across a number of scenarios. This level and variability of these cashflows, yields, yield spreads, and projected returns serve as the basis of our Manager's relative value framework and asset acquisition process.

Our Manager provides ongoing surveillance of non-Agency RMBS which is utilized in our relative value framework and decisions to sell holdings. As updated security and loan information becomes available including the level of credit enhancement, the paydown of securities, delinquency rates, prepayment rates, default rates, and loss severities, this data is tracked by our Manager. This updated data along with changes in the housing, economic, and interest rate environment serve as the basis for updated projections. As projections of bond cashflows, yields, yield spreads, and returns are updated based on this new information, our Manager's appraisal of overall risk level for each non-agency RMBS is updated. This process serves as the basis for our Manager's asset disposition process.

CMBS. Our Manager has been an active participant in the CMBS market since its inception. Our Manager was a significant investor in the Resolution Trust Corporation programs to securitize loans acquired from failed financial institutions. Our Manager invests across the capital structure in large diverse conduit deals, single borrower and single property deals as well one-off deals such as credit tenant lease transactions. The level of analysis for different securities will vary based on the risk profile of the investment being evaluated. To manage risk appropriately for troubled CMBS, our Manager evaluates the potential for losses based on both the structure of the security or loan, as well as how the cash flows and values of the underlying properties will contribute to potential defaults and ultimate recoveries. Specifically, our Manager evaluates the following as a part of this process:

The market/metropolitan statistical area dynamics (potential for growth/contraction; future demand for commercial space; changing demographics; and impact of home price depreciation and decreased consumer spending);

Current cash flows of the underlying properties (stability of tenants; property rents versus market rents; true cash flow versus pro forma assumptions; and market demand drivers);

Broad market metrics (changes in capitalization rates; ability to obtain financing; and new construction and available space coming on line);

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

Default factors (understand borrower's motivations; amount of true equity held by the borrower; ability to cover debt service coverage ratio, both current and projected; and tax implications to borrower); and

Potential severities (effectiveness, timing and costs of various work out strategies such as loan modifications, note sales, foreclosures or discounted payoffs); complications relating from loan structure (such as B notes, mezzanine debt and pari passu loans); and ultimate impact on loan or bond structure).

ABS. Our Manager evaluates ABS securities by evaluating collateral characteristics, timing of cash flows, strength of issuer and servicer, structural features as well as overall macro economic conditions. The analysis for any specific ABS asset will vary depending on the perceived drivers of risk. Some default and severity related factors our Manager reviews include (to the extent relevant for that asset type):

Unemployment and other economic conditions;

Personal bankruptcy legislation;

Other legislation (including SBA and student loan related);

Used car and equipment prices (for auto and equipment related transactions);

Historical issuer performance;

Issuer quality and creditworthiness;

Servicer quality and creditworthiness;

Health of manufacturer (for any hard asset);

Borrower quality (including FICO for individuals); and

Composition and diversity of the receivables pool.

Our Manager also evaluates principal and interest waterfalls, as well as the various type of credit enhancement available to protect a given class of bonds. Our Manager stresses defaults and severities under various scenarios and also evaluates performance under a range of cash flow scenarios.

Investment sourcing

We expect our Manager to take advantage of the broad network of relationships it has established to identify investment opportunities. Our Manager and its supervised affiliates have extensive long-term relationships with financial intermediaries, including primary dealers, leading investment banks, brokerage firms, leading mortgage originators and commercial banks.

Investing in, and sourcing financing for, Agency RMBS, non-Agency RMBS, CMBS, ABS and Agency MBS is highly competitive. Although our Manager competes with many other investment managers for profitable investment opportunities in fixed-income asset classes and related investment opportunities and sources of financing, we believe that a combination of our Manager's experience, together with the vast

resources and relationships of our Manager, will provide us with a significant advantage in identifying and capitalizing on attractive opportunities.

Investment guidelines

Our board of directors will adopt a set of investment guidelines that sets forth our target asset classes and other criteria to be used by our Manager to evaluate specific assets as well as our overall portfolio composition. Our Manager will make determinations as to the percentage of our assets that will be invested in each of our target asset classes, consistent with the investment guidelines adopted by

Table of Contents

our board of directors and the limits necessary to maintain compliance with REIT tax rules and our exemption under the 1940 Act. We expect our Manager's investment decisions will depend on prevailing market conditions and may change over time in response to opportunities available in different interest rate, economic and credit environments. As a result, we cannot predict the percentage of our assets that will be invested in any of our target asset classes at any given time, although we expect to focus on investing in Agency RMBS and expect our capital will be initially deployed, subject to prevailing market conditions, as described above under " Agency RMBS" and " Our potential target assets." We believe that the diversification of our portfolio of assets, our Manager's extensive experience in investing in Agency RMBS and our potential target assets and the flexibility of our strategy, combined with our Manager's and its supervised affiliates' general investment and advisory expertise and comprehensive finance and administrative infrastructure, will enable us to achieve attractive risk-adjusted returns under a variety of market conditions and economic cycles.

Our board of directors will adopt the following investment guidelines:

no investment shall be made that would cause us to fail to qualify as a REIT;

no investment shall be made that would cause us to be regulated as an investment company under the 1940 Act;

our investments will be focused on Agency RMBS, which may be opportunistically supplemented with our other potential target assets; and

until appropriate investments can be identified, our Manager may invest the proceeds of this and any future offerings of our securities in interest-bearing, short-term investments, including money market accounts and/or funds, that are consistent with our intention to qualify as a REIT and maintain exemption from registration under the 1940 Act.

These investment guidelines may be changed from time to time by our board of directors without the approval of our stockholders. Changes to our investment guidelines may include, without limitation, modification or expansion of the types of assets in which we may invest.

Our financing strategy and leverage

We will fund the acquisition of our assets through the use of leverage from a number of financing sources, subject to maintaining our qualification as a REIT. We intend to finance investments in Agency RMBS and our potential target assets primarily through the use of repurchase agreements.

We intend to use leverage to increase potential returns to our stockholders. We will accomplish this by borrowing against existing mortgage-backed securities through repurchase agreements that we intend to enter into upon completion of this offering and the concurrent private placements, and using the proceeds to acquire additional assets. There are no limits on the maximum amount of leverage that we may use, and we are not required to maintain any particular debt-to-equity leverage ratio. We may also change our financing strategy and leverage without the consent of stockholders.

We initially expect to borrow between five to nine times the amount of our stockholders' equity (calculated in accordance with U.S. GAAP), although there is no minimum or maximum leverage that our investment policies explicitly require. Depending on the different cost of borrowing funds at different maturities, we will vary the maturities of our borrowed funds to attempt to produce lower borrowing costs and reduce interest rate risk. We intend to enter into collateralized borrowings only with institutions that are rated investment grade by at least one nationally-recognized statistical rating organization.

The leverage that we employ will be specific to each asset class and will be determined based on several factors, including potential asset price volatility, margin requirements, the current cycle for interest rates, the shape of the yield curve, the outlook for interest rates and our ability to use and the

Table of Contents

effectiveness of interest rate hedges. We analyze both historical volatility and market-driven implied volatility for each asset class in order to determine potential asset price volatility. Our leverage targets attempt to risk-adjust asset classes based on each asset class's potential price volatility. The goal of our leverage strategy is to ensure that, at all times, our investment portfolio's overall leverage ratio is appropriate for the level of risk inherent in the investment portfolio, and that each asset class has individual leverage targets that are appropriate for its potential price volatility.

Repurchase agreements

We intend to use repurchase agreements to finance the purchase of Agency RMBS and our potential target assets. Repurchase agreements are financings pursuant to which we will sell our assets to the repurchase agreement counterparty, the buyer, for an agreed upon price with the obligation to repurchase these assets from the buyer at a future date and at a price higher than the original purchase price. The amount of financing we will receive under a repurchase agreement is limited to a specified percentage of the estimated market value of the assets we sell to the buyer. The difference between the sale price and repurchase price is the interest expense of financing under a repurchase agreement. Under repurchase agreement financing arrangements, the buyer, or lender, could require us to provide additional cash collateral to re-establish the ratio of value of the collateral to the amount of borrowing. Haircuts, or the discount attributed to the value of securities sold under repurchase agreements, average between 3% and 10% for Agency RMBS and average between 10% and 50% for non-Agency RMBS, depending on the specific security used as collateral for such repurchase agreements. A significant decrease in advance rate or an increase in the haircut could result in the borrower having to sell securities in order to meet any additional margin requirements by the lender, regardless of market condition. We expect to mitigate our risk of margin calls by employing a prudent amount of leverage that is below what could be used under current advance rates.

We plan to leverage our Manager's and its supervised affiliates' existing relationships with financial intermediaries, including primary dealers, leading investment banks, brokerage firms, commercial banks and other repurchase agreement counterparties to execute repurchase agreements for certain Agency RMBS and our potential target assets.

To the extent that we invest in Agency RMBS through TBAs in the future, we may enter into dollar roll transactions using TBAs in which we would sell a TBA and simultaneously purchase a similar, but not identical, TBA. Our ability to enter into dollar roll transactions with respect to TBAs may be limited by the 75% gross income test applicable to REITs. See "U.S. federal income tax considerations Taxation of Western Asset Mortgage Capital Corporation Income tests."

Other financing

Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, we may in the future use other funding sources to acquire our assets, including warehouse facilities, securitizations and other secured and unsecured forms of borrowing.

Our interest rate hedging and risk management strategy

Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, we may, from time to time, utilize derivative financial instruments to hedge the interest rate risk associated with our borrowings. Under the U.S. federal income tax laws applicable to REITs, we generally will be able to enter into certain transactions to hedge indebtedness that we may incur, or plan to incur, to acquire or carry real estate assets, although our total gross income from interest rate hedges that do not meet this requirement and other non-qualifying sources generally must not exceed 5% of our gross income.

Table of Contents

Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, we may also engage in a variety of interest rate management techniques that seek on one hand to mitigate the influence of interest rate changes on the values of some of our assets and on the other hand help us achieve our risk management objectives. The U.S. federal income tax rules applicable to REITs may require us to implement certain of these techniques through a domestic TRS that is fully subject to U.S. federal corporate income taxation. Our interest rate management techniques may include:

interest rate swap agreements, interest rate cap agreements, exchange-traded derivatives and swaptions;

puts and calls on securities or indices of securities;

Eurodollar futures contracts and options on such contracts;

U.S. Treasury securities and options on U.S. Treasury securities; and

other similar transactions.

We may attempt to reduce interest rate risks and to minimize exposure to interest rate fluctuations through the use of match funded financing structures, when appropriate, whereby we may seek (1) to match the maturities of our debt obligations with the maturities of our assets and (2) to match the interest rates on our assets with like-kind debt (i.e., we may finance floating rate assets with floating rate debt and fixed-rate assets with fixed-rate debt), directly or through the use of interest rate swap agreements, interest rate cap agreements, or other financial instruments, or through a combination of these strategies. We expect these instruments will allow us to minimize, but not eliminate, the risk that we have to refinance our liabilities before the maturities of our assets and to reduce the impact of changing interest rates on our earnings.

Risk management is a component of our strategy to deliver consistent risk-adjusted returns to our stockholders. Because we intend to acquire primarily fixed-income securities, losses from credit defaults, interest rate volatility or other risks can meaningfully reduce or eliminate our distributions to stockholders. In addition, because we expect to employ financial leverage in funding our portfolio, mismatches in the maturities of our assets and liabilities may create the need to renew or otherwise refinance our liabilities. Our net interest margins will be dependent upon a positive spread between the returns on our asset portfolio and our overall cost of funding. In order to minimize the risks to us, we expect to employ security-specific risk measurement and management processes. Our risk management tools include software and services licensed or purchased from third parties, in addition to proprietary systems and analytical methods developed by our Manager. There can be no guarantee that these tools and the other risk management techniques described above will protect us from market risks.

Policies with respect to certain other activities

If our board of directors determines that additional funding is required, we may raise such funds through additional offerings of equity or debt securities or the retention of cash flow (subject to REIT distribution requirements) or a combination of these methods. In the event that our board of directors determines to raise additional equity capital, it has the authority, without stockholder approval, to issue additional common stock or preferred stock in any manner and on such terms and for such consideration as it deems appropriate, at any time.

In addition, we may borrow money to finance the acquisition of investments. We intend to use traditional forms of financing, such as repurchase agreements. Our investment guidelines and our portfolio and leverage are periodically reviewed by our board of directors as part of their oversight of our Manager.

Table of Contents

As of the date of this prospectus, we do not intend to offer equity or debt securities in exchange for property. Though we have no current intention to do so, we may in the future repurchase or otherwise reacquire our shares.

As of the date of this prospectus, we do not intend to invest in the securities of other REITs, other entities engaged in real estate activities or securities of other issuers for the purpose of exercising control over such entities.

We engage in the purchase and sale of investments. We may make loans to third parties in the ordinary course of business for investment purposes. As of the date of this prospectus, we do not intend to underwrite the securities of other issuers.

We intend to furnish our stockholders with annual reports containing consolidated financial statements audited by our independent certified public accountants and file quarterly reports with the SEC containing unaudited consolidated financial statements for each of the first three quarters of each fiscal year.

Our board of directors may change any of these policies without prior notice to you or a vote of our stockholders.

Risk management

As part of our risk management strategy, our Manager may, subject to maintaining our qualification as a REIT, seek to actively manage the financing, interest rate, credit, prepayment and convexity risks associated with holding a portfolio of Agency RMBS and our potential target assets.

Interest rate hedging

Subject to maintaining our qualification as a REIT and exemption from registration under the 1940 Act, we may engage in a variety of interest rate management techniques that seek on one hand to mitigate the influence of interest rate changes on the values of some of our assets and on the other hand help us achieve our risk management objectives. We may utilize derivative financial instruments, including, among others, puts and calls on securities or indices of securities, interest rate swaps, interest rate caps, interest rate swaptions, exchange-traded derivatives, U.S. Treasury securities and options on U.S. Treasury securities and interest rate floors to hedge all or a portion of the interest rate risk associated with the financing of our investment portfolio. Specifically, we may hedge our exposure to potential interest rate mismatches between the interest that we earn on our investments and our borrowing costs caused by fluctuations in short-term interest rates. We may also purchase interest rate swaps, interest rate swaptions, interest cancelable swaps, interest rate caps, interest rate corridors, eurodollar futures contracts and options on such contracts, and other interest rate and non-interest rate derivatives, including, but not limited to, total return swaps. In utilizing leverage and interest rate hedges, our objectives will be to improve risk-adjusted returns and, where possible, to lock in, on a long-term basis, a favorable spread between the yield on our assets and the cost of our financing. We will rely on our Manager's expertise to manage these risks on our behalf. We may implement part of our hedging strategy through a TRS, which will be subject to U.S. federal, state and, if applicable, local income tax.

Asset/liability risk management

Because we will employ financial leverage in funding our portfolio, mismatches in the maturities of our assets and liabilities can create the risk that we will need to continually renew or otherwise refinance our liabilities. Our net interest margins will be dependent upon a positive spread between the returns on our asset portfolio and our overall cost of funding. Our Manager expects to actively employ portfolio-wide and security-specific risk measurement and management processes in our daily

Table of Contents

operations. Our Manager's risk management tools will include software and services licensed or purchased from third parties, in addition to proprietary systems and analytical methods developed internally. There can be no assurance, however, that these tools and the other risk management techniques described above will protect us from asset/liability risks.

Credit risk

We retain the risk of potential credit losses on the loans underlying the non-Agency RMBS, CMBS and ABS we may hold. We may seek to manage this risk through our pre-acquisition due diligence process, through the use of non-recourse financing that limits our exposure to credit losses to the specific assets that are subject to the non-recourse financing and through the use of derivative financial instruments, including, among others, contracts with respect to the Markit ABX.HE index and the Markit CMBX index. In addition, with respect to any particular target asset, our Manager's investment team will evaluate, among other things, relative valuation, supply and demand trends, shape of yield curves, prepayment rates, delinquency and default rates, recovery of various segments of the economy and vintage of collateral.

Investment oversight committee

Our Manager plans to appoint an investment oversight committee that will be made up of senior investment personnel from our Manager and will be tasked with reviewing, considering and approving our interest rate, hedging and leverage strategies. Initially, we expect the investment oversight committee to be composed of our chief investment officer and senior members of the Agency MBS team, as well as one of our Manager's senior generalist portfolio managers, senior portfolio managers from our Manager's liquidity trading desk and derivatives trading desk and senior personnel from our Manager's portfolio and quantitative analytics team. We expect that the investment oversight committee will meet as frequently as necessary in order for us to make rapid investment decisions. The investment oversight committee will also periodically review our investment portfolio and be available to provide updates to our board of directors in connection with its reviews of our investment performance.

Operating and regulatory structure

REIT qualification

We intend to elect and qualify as a REIT commencing with our taxable year ending December 31, 2012. Our qualification as a REIT depends upon our ability to meet on a continuing basis, through actual investment and operating results, various complex requirements under the Internal Revenue Code of 1986, as amended, or the Internal Revenue Code, relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the diversity of ownership of our shares. We believe that we have been organized in conformity with the requirements for qualification and taxation as a REIT under the Internal Revenue Code, and that our intended manner of operation will enable us to meet the requirements for qualification and taxation as a REIT.

So long as we qualify as a REIT, we generally will not be subject to U.S. federal income tax on our net taxable income we distribute currently to our stockholders. If we fail to qualify as a REIT in any taxable year and do not qualify for certain statutory relief provisions, we will be subject to U.S. federal income tax at regular corporate rates for the taxable year in which our REIT qualification is lost, and we may be precluded from qualifying as a REIT for the subsequent four taxable years following the year during which we lost our REIT qualification. Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income or property and our domestic TRSs will be subject to regular corporate income tax.

Table of Contents

1940 Act exemption

We intend to conduct our business so as not to become regulated as an investment company under the 1940 Act, in reliance on the exemption provided by Section 3(c)(5)(C) of the 1940 Act. Section 3(c)(5)(C), as interpreted by the staff of the SEC, requires us to invest at least 55% of our assets in "mortgages and other liens on and interest in real estate" or "qualifying real estate interests" and at least 80% of our assets in qualifying real estate interests and "real estate-related assets." In satisfying this 55% requirement, based on SEC staff guidance, we may treat Agency RMBS issued with respect to an underlying pool of mortgage loans in which we hold all of the certificates issued by the pool as qualifying real estate interests. The SEC staff has not issued guidance with respect to whole pool Non-Agency RMBS. Accordingly, based on our own judgment and analysis of the SEC's guidance with respect to whole pool Agency RMBS, we may also treat Non-Agency RMBS issued with respect to an underlying pool of mortgage loans in which we hold all of the certificates issued by the pool as qualifying real estate interests. We may also treat whole mortgage loans that we acquire directly as qualifying real estate interests provided that 100% of the loan is secured by real estate when we acquire it and we have the unilateral right to foreclose on the mortgage. We currently intend to treat partial pool Agency and Non-Agency RMBS and partial pool CMBS as real estate-related assets. We will treat any interest rate swaps or other derivative hedging transactions we enter into as miscellaneous assets that will not exceed 20% of our total assets. We expect to rely on guidance published by the SEC or its staff or on our analyses of guidance published with respect to other types of assets to determine which assets are qualifying real estate assets and real estate-related assets.

The SEC recently solicited public comment on a wide range of issues relating to Section 3(c)(5)(C), including the nature of the assets that qualify for purposes of the exemption and whether mortgage REITs should be regulated in a manner similar to investment companies. There can be no assurance that the laws and regulations governing the 1940 Act status of REITs, including the guidance of the SEC or its staff regarding this exemption, will not change in a manner that adversely affects our operations. To the extent that the SEC or its staff publishes new or different guidance with respect to these matters, we may be required to adjust our strategy accordingly. In addition, we may be limited in our ability to make certain investments and these limitations could require us to hold assets we might wish to sell or to sell assets we might wish to hold. To the extent that the SEC or its staff provides more specific guidance regarding any of the matters bearing upon the exemption we rely on from the 1940 Act, we may be required to adjust our strategy accordingly. Any additional guidance could provide additional flexibility to us, or it could further inhibit our ability to pursue the strategies we have chosen.

The mortgage-related investments that we acquire are limited by the provisions of the 1940 Act and the rules and regulations promulgated thereunder. We also may be required at times to adopt less efficient methods of financing certain of our mortgage-related investments and we may be precluded from acquiring certain types of mortgage-related investments. This exemption also prohibits us from issuing redeemable securities. If we fail to qualify for an exemption from registration as an investment company under the 1940 Act or an exclusion from the definition of an investment company, our ability to use leverage would be substantially reduced, and we would not be able to conduct our business as described in this prospectus.

Competition

Our net income will depend, in large part, on our ability to acquire assets at favorable spreads over our borrowing costs. In acquiring Agency RMBS, we will compete with other REITs, specialty finance companies, savings and loan associations, banks, mortgage bankers, insurance companies, mutual funds, institutional investors, investment banking firms, financial institutions, governmental bodies and other entities. See "Management's discussion and analysis of financial condition and results of operations Factors impacting our operating results." In addition, there are numerous REITs with

Table of Contents

similar asset acquisition objectives, including a number that have been recently formed, and others may be organized in the future. These other REITs will increase competition for the available supply of mortgage assets suitable for purchase. Many of our anticipated competitors are significantly larger than we are, have access to greater capital and other resources and may have other advantages over us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than we can. Current market conditions may attract more competitors, which may increase the competition for sources of financing. An increase in the competition for sources of funding could adversely affect the availability and cost of financing, and thereby adversely affect the market price of our common stock. See "Management's discussion and analysis of financial condition and results of operations Factors impacting our operating results."

In the face of this competition, we expect to have access to our Manager's professionals and their industry expertise, which may provide us with a competitive advantage and help us assess investment risks and determine appropriate pricing for certain potential investments. We expect that these relationships will enable us to compete more effectively for attractive investment opportunities. In addition, we believe that current market conditions may have adversely affected the financial condition of certain competitors. Thus, not having a legacy portfolio may also enable us to compete more effectively for attractive investment opportunities. However, we may not be able to achieve our business goals or expectations due to the competitive risks that we face. For additional information concerning these competitive risks, see "Risk factors Risks related to our business We operate in a highly competitive market for investment opportunities and competition may limit our ability to acquire desirable investments in Agency RMBS and our potential target assets and could also affect the pricing of these securities."

Staffing

We will be managed by our Manager pursuant to the management agreement between our Manager and us. Upon completion of this offering, all of our officers and two of our directors, James W. Hirschmann III and Gavin L. James, will be employees of our Manager. We anticipate that in the future we will hire a chief financial officer that is not an employee of our Manager and support staff for such chief financial officer. See "Our Manager and the management agreement Management agreement."

Legal proceedings

Neither we nor, to our knowledge, our Manager are currently subject to any legal proceedings which we or our Manager consider to be material.

Table of Contents**Management****Our directors, director nominees and executive officers**

Currently, Messrs. Hirschmann and James are our only directors. Immediately following the pricing of this offering, our board of directors is expected to be comprised of five members, two of which will be executive officers of our Manager. Our directors will each be elected to serve a term of one year. Our bylaws provide that a majority of the entire board of directors may at any time increase or decrease the number of directors. However, unless our bylaws are amended, the number of directors may never be less than the minimum number required by the General Corporation Law of the State of Delaware, or the DGCL, or more than 15.

The following sets forth certain information with respect to our directors, director nominees and executive officers:

Name	Age	Position Held with Us
James W. Hirschmann III	51	Chairman of the Board
Gavin L. James	51	President, Chief Executive Officer and Director
Edward D. Fox*	64	Director Nominee
M. Christian Mitchell*	57	Director Nominee
Richard W. Roll*	72	Director Nominee
Travis Carr	42	Chief Operating Officer
Bruce D. Alberts	51	Interim Chief Financial Officer
Stephen P. Fulton	54	Chief Investment Officer

*

We expect that our board of directors will determine that this director is independent for purposes of the New York Stock Exchange, or the NYSE, corporate governance listing requirements.

Set forth below is biographical information for our directors, director nominees and executive officers.

Directors and director nominees

James W. Hirschmann III has been the chairman of our board of directors since July 2009. He has also served as the chief executive officer of our Manager since 1999. Mr. Hirschmann serves on our Manager's board of directors and chairs our Manager's global strategy committee. Mr. Hirschmann has worked at our Manager since 1989. Mr. Hirschmann also served as the president of our Manager's parent company, Legg Mason, from May 2006 to April 2007. Mr. Hirschmann received a BS from Widener University. The board believes Mr. Hirschmann is qualified to serve as a director because of his experience as chief executive officer and member of the board of directors of our Manager and his experience in the financial and investment management industry.

Gavin L. James has been our president, chief executive officer and director since July 2011 and has over 30 years of investment experience. He is also the director of portfolio operations at our Manager since July 2009. Mr. James also serves as a member of our Manager's global strategy committee and as a member of the management committee of our Pasadena office. Prior to that he served as our Manager's director of global client service and marketing from 2002 to July 2009 and has worked at our Manager since 1998. Mr. James was senior portfolio manager of J.P. Morgan Investment Management from 1990 to 1998. He was also head of fixed income sales and trading for Mellon Bank from 1987 to 1990. Prior to joining Mellon Bank, Mr. James was a cross market trader for Drexel Burnham Lambert from 1981 to 1987. Mr. James received a BA from Kingston College in London.

Table of Contents

The board believes Mr. James is qualified to serve as a director because of his experience in the management of our Manager and his experience in the financial industry.

Edward D. Fox will join our board of directors upon consummation of this offering as an independent member of our board of directors. Mr. Fox has served as chairman and chief executive officer of Vantage Property Investors, LLC, a private real estate investment and development company since January 2003. Mr. Fox was chairman and chief executive officer of Center Trust, a real estate investment trust, from 1998 to January 2003 when Center Trust was acquired by Pan Pacific Retail Properties. Mr. Fox co-founded and served as the chairman of Commonwealth Partners, a fully integrated real estate operating company, from 1995 through October 2003. Prior to forming Commonwealth Partners, Mr. Fox was a senior partner with Maguire Thomas Partners, a national full-service real estate operating company. A certified public accountant, Mr. Fox started his career in public accounting specializing in real estate transactions. Mr. Fox is a director of Thomas Properties Group, Inc., a full-service real estate operating company. Mr. Fox also serves as co-chairman on the Dean's advisory council for the USC School of Architecture, a director of the Orthopaedic Hospital Foundation and on the board of trustees of its foundation and a director of the Los Angeles Boy Scouts. He is a member of the Urban Land Institute and the American Institute of Certified Public Accountants. He received a bachelor's degree in accounting and a master's degree in business, both with honors, from the University of Southern California. The board believes Mr. Fox is qualified to serve as a director due to the depth of his experience in the real estate industry, his previous management experience in both real estate operating companies and real estate investment trusts and his experience on public and private boards.

M. Christian Mitchell will join our board of directors upon consummation of this offering as an independent member of our board of directors. Mr. Mitchell retired from Deloitte & Touche LLP in 2003, where he was the national managing partner of the mortgage, banking and finance companies practice. During his 26-year career at Deloitte, he also served as regional managing partner for various practices including audit, enterprise risk services and financial services. He is a director of Marshall & Stevens, a Los Angeles-based national valuation consulting firm, of Special Value Opportunities Fund LLC, a registered investment fund managed by Tennenbaum Capital Partners, LLC, of Reis, Inc., a New York-based real estate information company, and of Grandpoint Capital, a Los Angeles-based bank holding company. Mr. Mitchell previously served as an adjunct professor of accounting at the University of Redlands and is the chapter president of the National Association of Corporate Directors, Southern California, and is designated a NACD Governance Fellow. Mr. Mitchell received a BS from the University of Alabama. The board believes Mr. Mitchell is qualified to serve as a director because of his extensive experience in the real estate and mortgage industry, his professional and educational background in accounting and finance and his previous experience serving on corporate boards. In 2011, Mr. Mitchell was named "one of the 100 most influential people in corporate governance" by Directorship magazine.

Richard Roll will join our board of directors upon consummation of this offering as an independent member of our board of directors. Mr. Roll has been a professor at the Anderson Graduate School of Management at the University of California, Los Angeles, or UCLA, since 1976, where he holds the Joel Freid Chair in Applied Finance, and is the principal of the consulting firm, Compensation Valuation, Inc., which he founded in 2003. He was the managing director of WP Capital Management, a fixed-income investment management firm from 1992 to 1995, and he was co-chairman of the board of directors for Roll and Ross Asset Management Corporation, a quantitative investment management firm, from 1985 through 2003. Mr. Roll also served as a vice-president at Goldman, Sachs & Co. from 1985 to 1987. Mr. Roll has a BAE from Auburn University, an MBA from the University of Washington and a PhD from the University of Chicago. The board believes Mr. Roll is qualified to serve as a director based on his academic and professional career focusing on the investment management and finance and his experience serving on corporate boards.

Table of Contents

Executive officers

In addition to Mr. James, the following individuals serve as our executive officers.

Bruce D. Alberts has been our interim chief financial officer since March 2011. He will serve as chief financial officer until we appoint a permanent chief financial officer. Mr. Alberts has been our Manager's chief financial officer since 1999. He also serves as a member of our Manager's global strategy committee and chairs our Manager's management committee. Mr. Alberts is a certified public accountant and a certified valuation analyst. Mr. Alberts received a BA from the University of California, Santa Barbara and an MBA from the Anderson Graduate School of Management at UCLA.

Travis Carr has been our chief operating officer since July 2011 and has over 18 years of investment experience. He has also served as a product specialist and head of mortgage-related business efforts at our Manager since 2000. Prior to joining our Manager, Mr. Carr was a senior associate for Pacific Investment Management Company from 1997 to 2000. He was also a secondary market analyst for Royal Thrift and Loan Company from 1994 to 1997. Mr. Carr was a mortgage broker for Home State Financial Corp. from 1993 to 1994. Mr. Carr is a CFA charter holder. He received his BA from UCLA.

Stephen P. Fulton has been our chief investment officer since March 2011 and has over 28 years of investment experience. Mr. Fulton has served as head of Agency RMBS since March 2010 and is a member of the U.S. Broad Markets Committee. Prior to that Mr. Fulton served as a product specialist focusing on Agency RMBS for our Manager from 2000 to 2010. Prior to joining our Manager, Mr. Fulton worked in MBS sales at Greenwich Capital Markets, Inc. as senior vice president of fixed income sales and as a member of their fixed income executive committee from 1996 to 1999. Prior to 1996, he was senior vice president of fixed income sales for Lehman Brothers Holdings Inc. from 1994 to 1996. Mr. Fulton also worked at J.P. Morgan Securities as director of Fixed Income Sales and a member of the Fixed Income Management committee from 1992 to 1994. Mr. Fulton was vice president of fixed income sales for The Goldman Sachs Group, Inc. from 1985 to 1992. Mr. Fulton also worked at Gibraltar Savings as the head of mortgage portfolio management and asset/liability Management from 1983 to 1985. Mr. Fulton received an MBA from the Amos Tuck School at Dartmouth College and a BA from UCLA.

Corporate governance Board of directors and committees

Our business is managed by our Manager, subject to the supervision and oversight of our board of directors, which has established investment guidelines described under "Business Investment guidelines" for our Manager to follow in its day-to-day management of our business. A majority of our board of directors is "independent," as determined by the requirements of the NYSE and the regulations of the SEC. Our directors keep informed about our business by attending meetings of our board of directors and its committees and through supplemental reports and communications. Our independent directors meet regularly in executive sessions without the presence of our corporate officers or non-independent directors.

Upon completion of this offering, our board of directors will form an audit committee, a compensation committee and a nominating and corporate governance committee and adopt charters for each of these committees. Each of these committees will have three directors. As permitted under the Securities Exchange Act of 1934, as amended, or the Exchange Act, and the rules of the NYSE, the audit committee will be composed of a majority of independent directors for up to one year from the effectiveness of the registration statement of which this prospectus is a part, and thereafter will be composed exclusively of independent directors. Each of the compensation committee and the nominating and corporate governance committee will be composed exclusively of independent directors, as defined by the listing standards of the NYSE. Moreover, the compensation committee will be composed exclusively of individuals intended to be, to the extent provided by Rule 16b-3 of the

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

Exchange Act, non-employee directors and will, at such times as we are subject to Section 162(m) of the Internal Revenue Code, qualify as outside directors for purposes of Section 162(m) of the Internal Revenue Code.

Audit committee

The audit committee will initially be comprised of Messrs. Fox, Mitchell and Roll, each of whom are "financially literate" under the rules of the NYSE. Each of Messrs. Fox, Mitchell and Roll will be an independent director. Mr. Mitchell will chair our audit committee and serve as our audit committee financial expert, as that term is defined by the SEC.

The audit committee assists our board of directors in overseeing:

our financial reporting, auditing and internal control activities, including the integrity of our financial statements;

our compliance with legal and regulatory requirements;

the independent auditor's qualifications and independence; and

the performance of our internal audit function and independent auditor.

The audit committee is also responsible for engaging our independent registered public accounting firm, reviewing with the independent registered public accounting firm the plans and results of the audit engagement, approving professional services provided by the independent registered public accounting firm, reviewing the independence of the independent registered public accounting firm, considering the range of audit and non-audit fees and reviewing the adequacy of our internal accounting controls.

Compensation committee

The compensation committee will be comprised of Messrs. Fox, Mitchell and Roll, each of whom will be an independent director. Mr. Roll will chair our compensation committee.

The compensation committee will be responsible for:

annually reviewing and approving the corporate goals and objectives relevant to the compensation, if any, we pay our chief executive officer, evaluating our chief executive officer's performance in light of such goals and objectives and, either as a committee or together with our independent directors (as directed by our board of directors), determining and approving the compensation, if any, we pay to our chief executive officer based on such evaluation;

annually reviewing and approving the corporate goals and objectives relevant to the compensation, if any, we pay to our chief financial officer and our other executive officers, evaluating the performance of our chief financial officer and our other executive officers in light of such goals and objectives and, either as a committee or together with our independent directors (as directed by our board of directors), determining and approving the compensation, if any, we pay to our chief financial officer and our other executive officers based on such evaluation;

overseeing our equity incentive plans; and

determining from time to time the remuneration for our non-executive directors.

The compensation committee is also responsible for reviewing and discussing the compensation discussion and analysis that we will include in our annual proxy statement filed with the SEC, and to approve the compensation committee report for inclusion in such filings, as

required by the rules of the SEC.

Table of Contents

Nominating and corporate governance committee

The nominating and corporate governance committee will be comprised of Messrs. Fox, Mitchell and Roll, each of whom will be an independent director. Mr. Fox will chair our nominating and corporate governance committee.

The nominating and corporate governance committee will be responsible for:

providing counsel to our board of directors with respect to the organization, function and composition of our board of directors and its committees;

overseeing the self-evaluation of our board of directors and our board of director's evaluation of management;

periodically reviewing and, if appropriate, recommending to our board of directors changes to our corporate governance policies and procedures; and

identifying and recommending to the board of directors potential director candidates for nomination.

Executive and director compensation

Director Compensation

Executive Directors

A member of our board of directors who is also an employee of our Manager or any of our or its affiliates is referred to as an executive director. Executive directors will not receive cash compensation for serving on our board of directors. However, we may grant equity incentive awards to executive directors pursuant to one of our equity incentive plans. The purpose of any such grants will be to encourage their respective individual efforts toward our continued success, long-term growth and profitability and to reward and retain them.

Independent Directors

We have not made any payments to any of our directors or director nominees to date. Each independent director will receive an annual cash retainer of \$50,000 in quarterly payments in arrears. In addition, each independent director will receive an annual retainer of \$30,000 in the form of restricted shares of our common stock. The first installment of restricted stock will be granted upon completion of this offering, with subsequent grants made immediately following our annual stockholders' meeting, in each case vesting in full on the first anniversary of the grant date, subject to continuing service on our board of directors on the vesting date. Any new independent director who joins our board of directors in the future will be granted restricted shares of our common stock that will vest in full on the first anniversary of the grant date, provided that such director continues to serve on our board of directors as of the applicable vesting date. We will also reimburse our directors for reasonable out-of-pocket expenses incurred in connection with performance of their duties as directors, including, without limitation, travel expenses in connection with their attendance at full board and committee meetings. In addition, the chair of our audit committee will be paid an annual cash retainer of \$10,000, and the chairs of our compensation committee and our nominating and corporate governance committee each will be paid an annual cash retainer of \$5,000, in each case in addition to the annual retainer of \$80,000 paid in cash and restricted shares of our common stock.

Executive compensation

We will pay our Manager the fees described in "Our Manager and the management agreement Management agreement Management fee and expense reimbursements." If, as anticipated, we hire a

Table of Contents

chief financial officer in the future that is not an employee of our Manager, we will directly compensate such chief financial officer and such chief financial officer's support staff, which will be our only employees, with customary compensation packages, as applicable, including (without limitation) base salaries, cash bonuses and equity compensation. Because our management agreement provides that our Manager is responsible for managing our affairs, our executive officers who are employees of our Manager and not our employees will not receive cash compensation from us for serving as our executive officers.

Our Manager currently employs and compensates each of our executive officers. We will adopt equity incentive plans pursuant to which we may make awards based on our common stock to: (a) our Manager and its affiliates, (b) employees of our Manager who provide services to us, including, but not limited to, our current executive officers, (c) any executive officers that we may directly employ in the future, and (d) our independent directors, none of whom are employed by or affiliated with our Manager. These awards will be made to encourage the efforts of our Manager and these individuals toward our continued success, long-term growth and profitability and to attract, reward and to retain key personnel. See " Equity incentive plans" below for a detailed description of our equity incentive plans.

Upon completion of this offering, we intend to grant our Manager an equity incentive award under our Manager Equity Plan. In the future, we may make additional equity incentive awards to our Manager to encourage its efforts toward our continued success, long-term growth and profitability. In addition, we may grant awards under our equity incentive plans directly to our executive officers, even if they are directly employed by our Manager, and other employees of our Manager who provide services to us, in order to encourage their respective individual efforts toward our continued success, long-term growth and profitability and to reward and retain them.

Equity incentive plans

Prior to the completion of this offering and the concurrent private placements, we will adopt two equity incentive plans under which our directors and officers and our Manager and its employees, respectively, will be eligible to receive common stock-based awards. The aggregate number of shares that may be made subject to awards under these equity incentive plans will be equal to 3.0% of the total number of issued and outstanding shares of our common stock (on a fully diluted basis) at the time of each award (other than any shares issued or subject to awards made pursuant to one of our equity incentive plans). Therefore, if we sell 8,000,000 shares of our common stock in this offering, 2,231,787 units in the concurrent private placement to certain institutional accredited investors and 46,043 shares of our common stock in the concurrent private placement to our Manager's deferred compensation plan, the number of shares of common stock initially reserved for issuance will be 308,335 shares.

Equity Plan

Prior to the completion of this offering and the concurrent private placement, we will adopt the Western Asset Mortgage Capital Corporation Equity Plan, or the Equity Plan, which will provide for the issuance of equity-based awards, including incentive stock options and non-qualified stock options, stock appreciation rights, restricted stock, restricted stock units, unrestricted stock awards and other awards based on our common stock to our directors and officers. Incentive stock options may be granted only to our employees. Shares of common stock to be issued to our independent directors in respect of their annual fees paid in restricted stock will be issued under this plan.

The Equity Plan will be administered by our board of directors, which may delegate its authority to the compensation committee of our board of directors. The plan administrator will have the full authority to (1) grant awards; (2) determine the persons to whom and the time or times at which

Table of Contents

awards will be granted; (3) determine the type and number of awards to be granted, the number of shares of common stock to which an award may relate and the terms, conditions, restrictions and performance criteria relating to any award; (4) determine whether, to what extent, and under what circumstances an award may be settled, cancelled, forfeited, exchanged, or surrendered; (5) make adjustments in the terms and conditions of awards; (6) construe and interpret the Equity Plan and any award; (7) prescribe, amend and rescind rules and regulations relating to the Equity Plan; (8) determine the terms and provisions of the award agreements; and (9) make all other determinations deemed necessary or advisable for the administration of the Equity Plan. In connection with this authority, the plan administrator may, among other things, establish performance goals that must be met in order for awards to be granted or to vest, or for the restrictions on any such awards to lapse. Except as provided below with respect to equitable adjustments, the plan administrator may not take any action that would have the effect of reducing the exercise or purchase price of any award granted under the Equity Plan without first obtaining the consent of our stockholders.

The maximum number of shares that may be made subject to awards under the Equity Plan will be equal to 3.0% percent of the number of shares of our common stock (on a fully diluted basis) at the time of each award (other than any shares issued or subject to awards made pursuant to one of our equity incentive plans), less any shares of common stock issued or subject to awards granted under our Manager Equity Plan. To the extent required to comply with the requirements of Section 162(m) of the Internal Revenue Code, the aggregate number of shares of our common stock subject to awards awarded to any one participant during any calendar year may not, subject to adjustment, exceed the total number of shares of common stock reserved for issuance under our two equity incentive plans. All shares of common stock reserved for issuance under the Equity Plan may be made subject to awards of incentive stock options. If any shares subject to an award granted under the Equity Plan are forfeited, cancelled, exchanged or surrendered or if an award terminates or expires without a distribution of shares to the participant, or if shares of our common stock are surrendered or withheld by us as payment of either the exercise price of an award and/or withholding taxes in respect of an award, the shares of common stock with respect to such award will again be available for awards under the Equity Plan. Upon the exercise of any award granted in tandem with any other award, the related award will be cancelled to the extent of the number of shares of common stock as to which the award is exercised and, notwithstanding the foregoing, that number of shares will no longer be available for awards under the Equity Plan.

In the event that the plan administrator determines that any dividend or other distribution (whether in the form of cash, common stock, or other property), recapitalization, stock split, reverse split, reorganization, merger, consolidation, spin-off, combination, repurchase, share exchange or other similar corporate transaction or event, affects our common stock such that an adjustment is appropriate in order to prevent dilution or enlargement of the rights of participants under the Equity Plan, then the plan administrator will make equitable changes or adjustments to: (i) the number and kind of shares of common stock or other property (including cash) that may thereafter be issued in connection with awards; (ii) the number and kind of shares of common stock or other property (including cash) issued or issuable in respect of outstanding awards; (iii) the exercise price, base price or purchase price relating to any award and (iv) the performance criteria, if any, applicable to outstanding awards. In addition, the plan administrator may determine that any equitable adjustment may be accomplished by making a payment to the award holder, in the form of cash or other property (including but not limited to shares of our common stock).

Each stock option and stock appreciation right granted under the Equity Plan will have a term of no longer than 10 years, and will have an exercise price that is no less than 100% of the fair market value of our common stock on the date of grant of the award. No stock option and stock appreciation right may be exercised unless (1) the participant is then providing services to us and (2) the participant has continuously maintained such relationship since the date of grant; provided, that the award

Table of Contents

agreement may contain provisions extending the exercisability of stock options or stock appreciation rights, in the event of specified terminations of service, to a date not later than the expiration date of such stock option stock appreciation right. The exercise price for stock option may generally be paid in cash or by an exchange of common stock previously owned by the participant, through a "broker cashless exercise" procedure approved by the plan administrator or a combination of the above, in any case in an amount having a combined value equal to such exercise price. The other terms of stock options and stock appreciation rights granted by us under the Equity Plan will be determined by the plan administrator. Stock appreciation rights may be granted alone or in tandem with another award.

The plan administrator will determine the terms and conditions of each grant of restricted stock or restricted stock units under the Equity Plan. Restricted stock units confer on the participant the right to receive cash, common stock or other property, as determined by the plan administrator, having a value equal to the number of shares of our common stock that are subject to the award. Unless otherwise determined by the plan administrator, holders of restricted stock will have all of the rights of a stockholder including, without limitation, the right to vote restricted stock and the right to receive dividends and distributions thereon. Unless otherwise determined by the plan administrator, (1) dividends and distributions paid on awards of restricted stock will be paid at the dividend or distribution payment date, provided that such payments may be deferred to such date as determined by the plan administrator, and in any event will be payable in cash or in shares of common stock having a fair market value equal to the amount of such dividends and distributions and (2) common stock distributed in connection with a stock split or stock dividend, and other property distributed as a dividend or distribution, will be subject to restrictions and a risk of forfeiture to the same extent as the awards of restricted stock to which such dividend or distribution relates. The plan administrator is authorized to grant to holders of restricted stock units the right to receive dividend equivalents and distribution equivalents for the period prior to settlement of the restricted stock unit. Dividend equivalents or distribution equivalents may be paid currently or credited to an account for the holder of restricted stock units, may be settled in cash or common stock, and may be subject to such conditions, restrictions and contingencies as the plan administrator may establish. Unless otherwise determined by the plan administrator, any such dividend equivalents or distribution equivalents will be paid or credited, as applicable, on the dividend or distribution payment date to the holders of restricted stock units as though each such restricted stock unit were a share of outstanding common stock. Upon termination of service to us during the applicable restriction period, awards of restricted stock and restricted stock units and any accrued but unpaid dividends or distributions or, in the case of restricted stock units, dividend equivalents and distribution equivalents, that are then subject to restrictions will be forfeited; provided, that the plan administrator may provide or may determine in any individual case, that restrictions or forfeiture conditions relating to awards of restricted stock and restricted stock units will be waived in whole or in part in the event of a termination.

The plan administrator may determine to make grants of our common stock that are not subject to any restrictions or a substantial risk of forfeiture or to grant other stock-based awards to eligible participants, the terms and conditions of which will be determined by the plan administrator at the time of grant.

The Equity Plan will automatically expire on the 10th anniversary of the date on which it was adopted. Our board of directors may terminate, amend, modify or suspend the Equity Plan at any time, subject to stockholder approval as required by law or stock exchange rules. The plan administrator may amend the terms of any outstanding award under the Equity Plan at any time. No amendment or termination of the Equity Plan or any outstanding award may adversely affect any of the rights of an award holder without the holder's consent.

Prior to the completion of this offering and the concurrent private placements, we will not issue any equity-based compensation under the Equity Plan. Effective as of the completion of this offering and concurrent private placement, we will grant awards of an aggregate of 4,500 shares of our

Table of Contents

restricted common stock under the Equity Plan to our three director nominees, as set forth in the table below. With respect to the grants to our director nominees, each grant will vest in full on the first anniversary of the grant date, provided that such director continues to serve on our board of directors as of the applicable vesting date. The grantees will be entitled to receive dividends and distributions that become payable on the shares during the restricted period. If the grantee's services to us terminate for any reason prior to the date on which the shares become vested, any unvested shares will be immediately forfeited, except that if the grantee's service is terminated other than for Cause (as defined in the Equity Plan) or because such individual retires, dies or becomes disabled, any then unvested shares of restricted stock will become immediately vested.

Name of Grantee and Title	Number of Shares of Restricted Stock
Edward D. Fox, Director Nominee	1,500
M. Christian Mitchell, Director Nominee	1,500
Richard W. Roll, Director Nominee	1,500

Manager Equity Plan

Prior to the completion of this offering and the concurrent private placements, we will adopt the Western Asset Mortgage Capital Corporation Manager Equity Plan, or the Manager Equity Plan, which will provide for the issuance of equity-based awards, including stock options, stock appreciation rights, restricted stock, restricted stock units, unrestricted stock awards and other awards based on our common stock to our Manager, employees of our Manager and affiliates of our Manager, who may or may not be eligible to be granted awards under our Equity Plan, or entities owned by our Manager, its executives and employees.

The Manager Equity Plan will be administered by our board of directors, which may delegate its authority to the compensation committee of our board of directors. The plan administrator will have the full authority (1) grant awards; (2) determine the persons to whom and the time or times at which awards will be granted; (3) determine the type and number of awards to be granted, the number of shares of common stock to which an award may relate and the terms, conditions, restrictions and performance criteria relating to any award; (4) determine whether, to what extent, and under what circumstances an award may be settled, cancelled, forfeited, exchanged, or surrendered; (5) make adjustments in the terms and conditions of awards; (6) construe and interpret the Manager Equity Plan and any award; (7) prescribe, amend and rescind rules and regulations relating to the Manager Equity Plan; (8) determine the terms and provisions of the award agreements; and (9) make all other determinations deemed necessary or advisable for the administration of the Manager Equity Plan. In connection with this authority, the plan administrator may, among other things, establish performance goals that must be met in order for awards to be granted or to vest, or for the restrictions on any such awards to lapse.

Our Manager may make awards to its directors, officers, employees, advisors or consultants, or those of its affiliates, which are in the form of or based on the shares of our common stock acquired by our Manager under the Manager Equity Plan, in which case, our Manager will make all determinations concerning the eligible persons who may receive such awards, which form the awards will take, and the terms and conditions of the awards.

Except as provided below with respect to equitable adjustments, the plan administrator may not take any action that would have the effect of reducing the exercise or purchase price of any award granted under the Manager Equity Plan without first obtaining the consent of our stockholders.

The maximum number of shares that may be made subject to awards under the Manager Equity Plan will be equal to 3.0% percent of the number of shares of our common stock (on a fully diluted basis) at the time of each award (other than any shares issued or subject to awards made pursuant to

Table of Contents

one of our equity incentive plans), less any shares of common stock issued or subject to awards granted under our Equity Plan. To the extent required to comply with the requirements of Section 162(m) of the Internal Revenue Code, the aggregate number of shares of our common stock subject to awards awarded to any one participant during any calendar year may not, subject to adjustment, exceed the total number of shares of common stock reserved for issuance under our two equity incentive plans. All shares of common stock reserved for issuance under the Manager Equity Plan may be made subject to awards of incentive stock options. If any shares subject to an award granted under the Manager Equity Plan are forfeited, cancelled, exchanged or surrendered or if an award terminates or expires without a distribution of shares to our Manager, or if shares of our common stock are surrendered or withheld by us as payment of the exercise price of an award, the shares of common stock with respect to such award will again be available for awards under the Manager Equity Plan. Upon the exercise of any award granted in tandem with any other award, the related award will be cancelled to the extent of the number of shares of common stock as to which the award is exercised and, notwithstanding the foregoing, that number of shares will no longer be available for award under the Manager Equity Plan.

In the event that the plan administrator determines that any dividend or other distribution (whether in the form of cash, common stock, or other property), recapitalization, stock split, reverse split, reorganization, merger, consolidation, spin-off, combination, repurchase, share exchange or other similar corporate transaction or event, affects our common stock such that an adjustment is appropriate in order to prevent dilution or enlargement of the rights of participants under the Manager Equity Plan, then the plan administrator will make equitable changes or adjustments to: (i) the number and kind of shares of common stock or other property (including cash) that may thereafter be issued in connection with awards; (ii) the number and kind of shares of common stock or other property (including cash) issued or issuable in respect of outstanding awards; (iii) the exercise price, base price or purchase price relating to any award and (iv) the performance criteria, if any, applicable to outstanding awards. In addition, the plan administrator may determine that any equitable adjustment may be accomplished by making a payment to the award holder, in the form of cash or other property (including but not limited to shares of our common stock).

Each stock option and stock appreciation right granted under the Manager Equity Plan will have a term of no longer than 10 years, and will have an exercise price that is no less than 100% of the fair market value of our common stock on the date of grant of the award. The exercise price for stock option may generally be paid in cash or by an exchange of common stock previously owned by the participant, through a "broker cashless exercise" procedure approved by the plan administrator or a combination of the above, in any case in an amount having a combined value equal to such exercise price. The other terms of stock options and stock appreciation rights granted under the Manager Equity Plan will be determined by the plan administrator. Stock appreciation rights may be granted alone or in tandem with another award.

The plan administrator will determine the terms and conditions of each grant of restricted stock or restricted stock units under the Manager Equity Plan. Restricted stock units confer on the participant the right to receive cash, common stock or other property, as determined by the plan administrator, having a value equal to the number of shares of our common stock that are subject to the award. Unless otherwise determined by the plan administrator, holders of restricted stock will have all of the rights of a stockholder including, without limitation, the right to vote restricted stock and the right to receive dividends and distributions thereon. Unless otherwise determined by the plan administrator, (1) dividends and distributions paid on awards of restricted stock will be paid at the dividend or distribution payment date, provided that such payments may be deferred to such date as determined by the plan administrator, and in any event will be payable in cash or in shares of common stock having a fair market value equal to the amount of such dividends and distributions and (2) common stock distributed in connection with a stock split or stock dividend, and other property distributed as a dividend or distribution, will be subject to restrictions and a risk of forfeiture to the same extent as the

Table of Contents

awards of restricted stock to which such dividend or distribution relates. The plan administrator is authorized to grant to holders of restricted stock units the right to receive dividend equivalents and distribution equivalents for the period prior to settlement of the restricted stock unit. Dividend equivalents or distribution equivalents may be paid currently or credited to an account for the holder of restricted stock units, may be settled in cash or common stock, and may be subject to such conditions, restrictions and contingencies as the plan administrator may establish. Unless otherwise determined by the plan administrator, any such dividend equivalents or distribution equivalents will be paid or credited, as applicable, on the dividend or distribution payment date to the holders of restricted stock units as though each such restricted stock unit were a share of outstanding common stock.

The plan administrator may determine to make grants of our common stock that are not subject to any restrictions or a substantial risk of forfeiture or to grant other stock-based awards to our Manager, the terms and conditions of which will be determined by the plan administrator at the time of grant.

If the management agreement with our Manager (1) is terminated by us for cause or (2) expires following our Manager's issuance of a termination notice for a termination without cause (as described herein under "Our Manager and the management agreement Management agreement Term and termination"), all unvested awards then held by our Manager and all accrued and unpaid dividends or dividend equivalents related to such awards will be immediately cancelled and forfeited without consideration. If the management agreement expires or is terminated for any other reason, any award then held by our Manager that was not previously vested will become fully vested and/or payable, and any performance conditions imposed with respect to such award will be deemed to be fully achieved. Unless otherwise determined by the plan administrator, all unvested awards then held by a holder who is not our Manager and who ceases to provide services to our Manager will be immediately cancelled and forfeited without consideration. The terms of award agreements will set forth the terms under which a stock option or stock appreciation right may remain exercisable following such a termination of service with our Manager.

The Manager Equity Plan will automatically expire on the 10th anniversary of the date on which it was adopted. Our board of directors may terminate, amend, modify or suspend the Manager Equity Plan at any time, subject to stockholder approval as required by law or stock exchange rules. The plan administrator may amend the terms of any outstanding award under the Manager Equity Plan at any time. No amendment or termination of the Manager Equity Plan or any outstanding award may adversely affect any of the rights of an award holder without the holder's consent.

Prior to the completion of this offering and the concurrent private placements, we will not issue any equity-based compensation under the Manager Equity Plan. Effective as of the completion of this offering and the concurrent private placements, we will grant to our Manager a number of shares of our restricted common stock that is equal to 0.5% of the aggregate number of shares of common stock sold in this offering (without giving effect to any exercise by the underwriters of their over-allotment option) and units sold in the concurrent private placement to certain institutional accredited investors. Therefore, if we sell 8,000,000 shares of common stock in this offering and 2,231,787 units in such concurrent private placement, we will grant to our Manager 51,159 shares of restricted common stock. One-third of these shares will vest on each of the first, second and third anniversaries of the grant date.

Code of conduct

Our board of directors has established a code of conduct that applies to our directors, officers and employees. Any such director, officer or employee who is also subject to our Manager's code of conduct will, in the event of a conflict in policy, be held to the more restrictive provision. Among other matters, our code of conduct is designed to deter wrongdoing and to promote:

honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;

Table of Contents

full, fair, accurate, timely and understandable disclosure in our SEC reports and other public communications;

compliance with applicable governmental laws, rules and regulations;

prompt internal reporting of violations of the code to appropriate persons identified in the code; and

accountability for adherence to the code.

Waivers of any provisions of the code of conduct may be granted in writing by our chief executive officer, except that any waiver sought by one of our directors or executive officers may be granted only by the nominating and corporate governance committee of our board of directors. In considering any request for a waiver, the chief executive officer will consult with appropriate senior management, our legal and compliance department and/or external legal advisors, as appropriate under the circumstances. Any changes to or waivers of the code of conduct will, to the extent required, be disclosed as required by applicable rules and regulations of the SEC and the NYSE.

Conflicts of interest

Dependence on our Manager and its personnel

We are dependent on our Manager for our day-to-day management. All of our officers and two of our directors, James W. Hirschmann III and Gavin L. James, are employees of our Manager. Although our current chief financial officer is an employee of our Manager, we anticipate that in the future we will hire a chief financial officer that is not an employee of our Manager and support staff for such chief financial officer. We do not anticipate having any future employees other than a chief financial officer and support staff for the chief financial officer. Our Manager does not serve us exclusively and is not obligated to dedicate any of its personnel to us. Because our Manager serves other clients in addition to us, it is difficult to estimate the amount of time our Manager or its personnel will allocate to our business. The obligations of our Manager and its officers and personnel to engage in other business activities may reduce the time our Manager and its officers and personnel spend managing us.

Management agreement and fees

Our management agreement with our Manager was negotiated between related parties and its terms, including fees and other amounts payable, may not be as favorable to us as if it had been negotiated at arm's length with an unaffiliated third party.

We have agreed to pay our Manager a management fee that is not tied to our performance. The management fee may not sufficiently incentivize our Manager to generate attractive risk-adjusted returns for us. This could hurt both our ability to make distributions to our stockholders and the market price of our common stock.

Investment allocation policies

Our Manager has an investment allocation policy in place that is designed to treat all of its client accounts fairly and equitably with the goal of providing all clients with the best execution under the circumstances for transactions in fixed-income securities. Our Manager's investment allocation policy provides that no single client is intentionally favored over another and the procedures associated with this policy require our Manager's investment management department to allocate trades in a fair and equitable manner. When possible, in order to minimize transaction costs and seek best execution for all client accounts, transactions may be bunched or blocked together, with securities generally allocated to client accounts on a pro rata basis. According to our Manager's investment allocation policy, investments may be allocated by taking into account factors, including but not limited to investment

Table of Contents

goals or guidelines, available cash, liquidity requirements, odd lot positions, minimum allocations, existing portfolio holdings compared to target weightings, regulatory and legal restrictions and the tax implications of an investment. Our Manager's investment allocation policy requires that these bunched or blocked trades be allocated on the same day they are executed and requires that all clients receive the same average cost for the transaction.

Our Manager periodically reviews its client accounts to identify situations where a potential conflict may exist, and when appropriate, may design specific procedures to address these situations. The investment allocation policy may be amended by our Manager at any time without our consent. To the extent that our Manager's or our business changes in such a way as to give rise to conflicts not currently addressed by our Manager's investment allocation policy, our Manager may need to refine its investment allocation policy to address such situation. Our independent directors will review our Manager's compliance with its investment allocation policy and the conflicts or potential conflicts of interest surrounding our Manager. In addition, to avoid any actual or perceived conflicts of interest with our Manager, prior to an acquisition of any security structured or issued by an entity managed by our Manager or any of its affiliates or the purchase or sale of any asset from or to an entity managed by our Manager or any of its affiliates, such transaction must be approved by our board of directors, including a majority of our independent directors.

Other clients of our Manager

We do not have any agreement or understanding with our Manager that would give us any priority over any other client of our Manager in opportunities to invest in Agency RMBS or any class of our potential target assets. Accordingly, we may compete for investment opportunities in these asset classes directly with other investment portfolios managed by our Manager. As discussed further below, several investment portfolios managed by our Manager invest primarily in real estate or real estate-related assets, including Agency RMBS and our potential target assets and a substantial number of investment portfolios managed by our Manager have exposure to Agency RMBS and our potential target assets. In addition, our Manager may in the future have additional clients that may compete with us for investment opportunities in Agency RMBS and our potential our target assets.

As of December 31, 2011, our Manager had a total of \$443 billion in assets under management. Of this total, \$61.5 billion was invested in Agency RMBS and our potential target assets, of which \$37.6 billion was invested in Agency RMBS, \$13.8 billion in non-Agency RMBS, \$2.4 billion in CMBS and \$7.7 billion in ABS. Our Manager manages a number of portfolios in strategies that invest primarily in real estate or real estate-related assets, including Agency RMBS and our potential target assets. These portfolios include mutual funds, private commingled investment vehicles and separate accounts. As of December 31, 2011, our Manager managed approximately \$2.1 billion in 15 separate accounts and \$5.3 billion in six commingled investment vehicles, which include mutual funds and private commingled investment vehicles, that invest primarily in Agency RMBS and our potential target assets. Of these 21 portfolios, six are included in the commingled investment vehicles for which we have provided further information under "Our Manager and the management agreement - Historical performance of our Manager's investments in Agency RMBS and our potential target assets."

Our Manager also manages broad market portfolios that may have a material allocation to real estate or real estate-related assets, including Agency RMBS and our potential target assets, but have not invested primarily in real estate or real estate-related assets. Our Manager's broad market strategies that have exposure to Agency RMBS and our potential target assets but do not invest primarily in real estate or real estate-related assets include the following:

US Core: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011,

Table of Contents

our Manager managed approximately \$7.2 billion of Agency RMBS and our potential target assets in 51 US Core portfolios.

US Core Full: These portfolios use diversified strategies and cover all sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$30.0 billion of Agency RMBS and our potential target assets in 166 US Core Full portfolios.

US Enhanced Cash: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$1.8 billion of Agency RMBS and our potential target assets in 16 US Enhanced Cash portfolios.

US Index Plus: These portfolios use a synthetic index component that provides exposure to the equity benchmark through the use of derivatives, and a short duration component that employs a long term value-oriented approach utilizing diversified strategies and covering all sectors of the fixed-income market in an attempt to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$0.8 billion of Agency RMBS and our potential target assets in 10 US Index Plus accounts.

US Intermediate: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$2.1 billion of Agency RMBS and our potential target assets in 29 US Intermediate portfolios.

US Limited Duration: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$0.9 billion in 13 US Limited Duration portfolios.

Total Return Unconstrained: These portfolios employ an actively managed, diversified fixed-income strategy. As of December 31, 2011, our Manager managed approximately \$1.1 billion of Agency RMBS and our potential target assets in 14 Total Return Unconstrained portfolios.

Global Core Full: These portfolios use diversified strategies and cover all sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, our Manager managed approximately \$0.5 billion of Agency RMBS and our potential target assets in 18 Global Core Full accounts.

Other business activities of our affiliates

We do not have a policy that expressly prohibits our directors, officers, security holders or affiliates from engaging for their own account in business activities of the types conducted by us. However, subject to our Manager's investment allocation policy, our code of conduct contains a conflicts of interest policy that prohibits our directors, officers and personnel, as well as employees of our Manager who provide services to us, from engaging in any transaction that involves an actual conflict of interest with us.

Table of Contents

Our Manager and the management agreement

General

We will be externally managed and advised by our Manager. All of our officers and two of our directors, James W. Hirschmann III and Gavin L. James, are employees of our Manager. Our Manager will be entitled to receive a management fee and the reimbursement of certain expenses pursuant to the management agreement. The executive offices of our Manager are located at 385 East Colorado Boulevard, Pasadena, California 91101, and the telephone number of our Manager's executive offices is (626) 844-9400.

Executive officers of our Manager

The following sets forth certain information with respect to each of the executive officers of our Manager:

Executive Officer	Age	Position Held with Our Manager
James W. Hirschmann III	51	Director and Chief Executive Officer
Bruce D. Alberts	51	Chief Financial Officer
Brett B. Canon	50	Director of Risk Management and Operations
James J. Flick	52	Director of Client Service and Marketing
Gavin L. James	51	Director of Portfolio Operations
Charles A. Ruys de Perez	54	General Counsel and Secretary

Set forth below is biographical information for the officers of our Manager. See "Management Our directors, director nominees and executive officers" for biographical information regarding Messrs. Hirschmann, James and Alberts.

Brett B. Canon has served as our Manager's director of risk management and operations since September 2006. Prior to that he served as our Manager's director of operations from 2000 to 2006. Mr. Canon is a certified public accountant. He received a BS from California State University, Northridge.

James J. Flick has served as our Manager's director of global client service and marketing since July 2009, and a member of our Manager's global strategy committee since July 2009. From 1998 to July 2009, Mr. Flick served as a senior portfolio manager for our Manager. Prior to joining our Manager, Mr. Flick was a portfolio manager at Transamerica Investment Services from 1996 to 1998. Mr. Flick has a MBA from the University of Chicago and a BS from Ohio State University.

Charles A. Ruys de Perez has served as the secretary and general counsel of our Manager since March 2007. Prior to joining our Manager, Mr. Ruys de Perez served as a managing director and chief compliance officer at Putnam Investments from 2004 to 2007. Mr. Ruys de Perez received a BA from Yale University and a JD from Harvard Law School.

Other key personnel of our Manager

Our chief investment officer, Mr. Fulton, who also serves as the head of our Manager's Agency RMBS team, will, along with two senior portfolio managers from the Agency RMBS team, be primarily responsible for overseeing the management of our assets. The Agency RMBS team works alongside and is able to utilize the resources of our Manager's structured products team, which focuses on managing and evaluating our potential target assets, including non-Agency RMBS, CMBS and ABS. The Agency RMBS team is also able to call on the experience of a number of our Manager's other investment professionals, not specifically dedicated to managing our assets, but with expertise that covers certain aspects of our potential target assets as well as on specialists in derivatives and liquidity who are part of our Manager's broader investment team. The collective team operates under the purview of our Manager's U.S. broad markets committee which sets overall sector allocations for broad market accounts. Our Manager seeks to unite groups of specialists dedicated to different market

Table of Contents

sectors. The daily interaction among the different teams is designed to develop a consensus approach that draws on the expertise of all team members. Our Manager's overall investment management team consists of 127 investment professionals.

The senior members of our Agency RMBS team, in addition to Mr. Fulton, are Sean O. Johnson and Bonnie M. Wongtrakool.

Sean O. Johnson is a portfolio manager at our Manager and focuses on Agency RMBS. Mr. Johnson has been in his current role since June 2010. Prior to that, Mr. Johnson served as a research analyst focusing on Agency RMBS for our Manager from 1995 to June 2010. Prior to joining our Manager in 1995, Mr. Johnson was a portfolio analyst at Pacific Investment Management Co. from 1993 to 1995. Mr. Johnson is a chartered financial analyst. He received a BS from the University of Southern California.

Bonnie M. Wongtrakool is a portfolio manager at our Manager focusing on Agency RMBS. Ms. Wongtrakool has been in her current role since June 2010. Prior to that, Ms. Wongtrakool served as a research analyst focusing on Agency RMBS for our Manager from 2003 to June 2010. Prior to joining our Manager in 2003, Ms. Wongtrakool worked at Mercer Management Consulting from 2000 to 2003. Ms. Wongtrakool is a CFA charterholder, received a BA from Harvard College and a JD from Harvard Law School.

Management agreement

Prior to the completion of this offering and the concurrent private placements, we will enter into a management agreement with our Manager that will become effective upon completion of this offering and the concurrent private placement, pursuant to which it will provide for the day-to-day management of our operations and our investments. The management agreement will require our Manager to manage our business affairs in conformity with the investment guidelines and other policies that are approved and monitored by our board of directors. Our Manager's role as Manager will be under the supervision and direction of our board of directors.

Management services

Our Manager will be responsible for (1) the selection, purchase and sale of our portfolio investments, (2) our financing activities, and (3) providing us with investment advisory services. Our Manager will be responsible for our day-to-day operations and will perform (or will cause to be performed) such services and activities relating to our assets and operations as may be appropriate, which may include, without limitation, the following:

serving as our consultant with respect to the periodic review of the investment guidelines and other parameters for our investments, financing activities and operations, which review will occur no less often than annually, any modification to which will be approved by a majority of our independent directors;

investigating, analyzing and selecting possible investment opportunities and acquiring, financing, retaining, selling, restructuring or disposing of investments consistent with the investment guidelines;

with respect to prospective purchases, sales or exchanges of investments, conducting negotiations on our behalf with sellers, purchasers and brokers and, if applicable, their respective agents and representatives;

negotiating, entering into and executing, on our behalf, repurchase agreements, interest rate agreements, swap agreements, brokerage agreements, resecuritizations, securitizations, warehouse facilities and other agreements and instruments required for us to conduct our business;

engaging and supervising, on our behalf and at our expense, independent contractors that provide investment banking, securities brokerage, mortgage brokerage, other financial services,

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

due diligence services, underwriting review services, legal and accounting services, custodial services and all other services (including transfer agent and registrar services) as may be required relating to our operations or investments (or potential investments);

coordinating and managing operations of any joint venture or co-investment interests held by us and conducting all matters with the joint venture or co-investment partners;

providing executive and administrative personnel, office space and office services required in rendering services to us;

administering the day-to-day operations and performing and supervising the performance of such other administrative functions necessary to our management as may be agreed upon by our Manager and our board of directors, including, without limitation, the collection of revenues and the payment of our debts and obligations and maintenance of appropriate computer services to perform such administrative functions;

communicating on our behalf with the holders of any of our equity or debt securities as required to satisfy the reporting and other requirements of any governmental bodies or agencies or trading exchanges or markets and to maintain effective relations with such holders;

counseling us in connection with policy decisions to be made by our board of directors;

evaluating and recommending to our board of directors hedging strategies and engaging in hedging activities on our behalf, consistent with our qualification as a REIT and with our investment guidelines;

counseling us regarding the maintenance of our qualification as a REIT and monitoring compliance with the various REIT qualification tests and other rules set out in the Internal Revenue Code and U.S. Treasury regulations thereunder and using commercially reasonable efforts to cause us to qualify for taxation as a REIT;

counseling us regarding the maintenance of our exemption from the status of an investment company required to register under the 1940 Act, monitoring compliance with the requirements for maintaining such exemption and using commercially reasonable efforts to cause us to maintain such exemption from such status;

furnishing reports and statistical and economic research to us regarding our activities and services performed for us;

monitoring the operating performance of our investments and providing periodic reports with respect thereto to our board of directors, including comparative information with respect to such operating performance and budgeted or projected operating results;

investing and reinvesting any moneys and securities of ours (including investing in short-term investments pending investment in other investments, payment of fees, costs and expenses, or payments of dividends or distributions to our stockholders and partners) and advising us as to our capital structure and capital raising;

causing us to retain qualified accountants and legal counsel, as applicable, to assist in developing appropriate accounting procedures and systems, internal controls and other compliance procedures and testing systems with respect to financial reporting obligations and compliance with the provisions of the Internal Revenue Code applicable to REITs and, if applicable, TRSs, and to conduct quarterly compliance reviews with respect thereto;

assisting us in qualifying to do business in all applicable jurisdictions and to obtain and maintain all appropriate licenses;

assisting us in complying with all regulatory requirements applicable to us in respect of our business activities, including assisting in the preparation of all financial statements required under applicable regulations and contractual undertakings and all reports and documents, if any,

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

required under the Exchange Act or the Securities Act, or by the NYSE or other stock exchange requirements, as applicable;

assisting us in taking all necessary action to enable us to make required tax filings and reports, including soliciting information from stockholders to the extent required by the provisions of the Internal Revenue Code applicable to REITs;

placing, or arranging for the placement of, all orders pursuant to our Manager's investment determinations for us either directly with the issuer or with a broker or dealer (including any affiliated broker or dealer);

handling and resolving all claims, disputes or controversies (including all litigation, arbitration, settlement or other proceedings or negotiations) in which we may be involved or to which we may be subject arising out of our day-to-day operations (other than with our Manager or its supervised affiliates), subject to such limitations or parameters as may be imposed from time to time by the board of directors;

using commercially reasonable efforts to cause expenses incurred by us or on our behalf to be commercially reasonable or commercially customary and within any budgeted parameters or expense guidelines set by our board of directors from time to time;

advising us with respect to and structuring long-term financing vehicles for our portfolio of assets, and offering and selling securities publicly or privately in connection with any such structured financing, in each case consistent with our investment guidelines;

serving as our consultant with respect to decisions regarding any of our financings, hedging activities or borrowings undertaken by us, including (1) assisting us in developing criteria for debt and equity financing that is specifically tailored to our investment objectives, and (2) advising us with respect to obtaining appropriate financing for our investments;

providing us with portfolio management;

arranging marketing materials, advertising, industry group activities (such as conference participations and industry organization memberships) and other promotional efforts designed to promote our business;

maintaining our website;

performing such other services as may be required from time to time for management and other activities relating to our assets and business as our board of directors shall reasonably request or our Manager shall deem appropriate under the particular circumstances; and

using commercially reasonable efforts to cause us to comply with all applicable laws.

Liability and indemnification

Pursuant to the management agreement, our Manager will not assume any responsibility other than to render the services called for thereunder in good faith and will not be responsible for any action of our board of directors in following or declining to follow its advice or recommendations, including as set forth in our investment guidelines. Our Manager maintains a contractual as opposed to a fiduciary relationship with us, although our officers who are also employees of our Manager will have a fiduciary duty to us under the DGCL as our officers. Under the terms of the management agreement, our Manager, and its affiliates and their officers, stockholders, members, managers, directors and personnel and any person providing sub-advisory services to our Manager will not be liable to us, our directors or our stockholders

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

for acts or omissions performed in accordance with and pursuant to the management agreement, except because of acts constituting bad faith, willful misconduct, gross negligence, or reckless disregard of their duties under the management agreement, as determined by a final non-appealable order of a court of competent jurisdiction. We have agreed to indemnify our Manager and its officers, stockholders, members, managers, directors and personnel and any person

Table of Contents

providing sub-advisory services to our Manager with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts or omissions of such parties not constituting bad faith, willful misconduct, gross negligence, or reckless disregard of duties, performed in good faith in accordance with and pursuant to the management agreement. Our Manager has agreed to indemnify us, our directors and officers, personnel, agents and any persons controlling or controlled by us with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts or omissions of our Manager constituting bad faith, willful misconduct, gross negligence or reckless disregard of its duties under the management agreement or any claims by our Manager's personnel relating to the terms and conditions of their employment by our Manager. Our Manager will not be liable for trade errors that may result from ordinary negligence, such as errors in the investment decision making process (such as a transaction that was effected in violation of our investment guidelines) or in the trade process (such as a buy order that was entered instead of a sell order, or the wrong purchase or sale of security, or a transaction in which a security was purchased or sold in an amount or at a price other than the correct amount or price). Notwithstanding the foregoing, our Manager carries errors and omissions and other customary insurance and will name us as an insured under those policies upon the completion of this offering.

Management team

Pursuant to the terms of the management agreement our Manager is required to provide us with our management team, which may include a chief executive officer and a chief investment officer, or similar positions, along with appropriate support personnel to provide the management services to be provided by our Manager to us. None of the officers or employees of our Manager will be dedicated exclusively to us.

Because our management agreement provides that our Manager is responsible for managing our affairs, all of our officers who are employees of our Manager do not receive cash compensation from us for serving as our executive officers. Instead we will pay our Manager the fees described in " Management fee and expense reimbursements."

Our Manager is required to refrain from any action that, in its sole judgment made in good faith, (1) is not in compliance with the investment guidelines, (2) would adversely and materially affect our qualification as a REIT under the Internal Revenue Code or our status as an entity exempted or excluded from investment company status under the 1940 Act or (3) would violate any law, rule or regulation of any governmental body or agency having jurisdiction over us or of any exchange on which our securities may be listed or that would otherwise not be permitted by our certificate of incorporation or bylaws. If our Manager is ordered to take any action by our board of directors, our Manager will promptly notify our board of directors if it is our Manager's judgment that such action would adversely and materially affect such status or violate any such law, rule or regulation or our certificate of incorporation or bylaws. Neither our Manager nor any affiliate of our Manager will be liable to us, our board of directors or our stockholders, for any act or omission by our Manager or any of its affiliates, except as provided in the management agreement.

Term and termination

The management agreement may be amended, supplemented or modified by agreement between us and our Manager. The initial term of the management agreement expires on the third anniversary of the closing of this offering and will be automatically renewed for a one-year term each anniversary date thereafter unless previously terminated as described below. Our independent directors will review our Manager's performance and any fees payable to our Manager annually and, following the initial term, the management agreement may be terminated annually upon the affirmative vote of at least two-thirds of our independent directors, based upon (1) our Manager's unsatisfactory performance that is materially detrimental to us or (2) our determination that any fees payable to our Manager are not fair, subject to our Manager's right to prevent such termination due to unfair fees by accepting a

Table of Contents

reduction of management fees agreed to by at least two-thirds of our independent directors. We will provide our Manager 180 days prior notice of any such termination. Unless terminated for cause, we will pay our Manager a termination fee equal to three times the average annual management fee earned by our Manager during the prior 24-month period immediately preceding the date of termination, calculated as of the end of the most recently completed fiscal quarter prior to the date of termination.

We may also terminate the management agreement at any time, including during the initial term, without the payment of any termination fee, with 30 days prior written notice from our board of directors for cause, which will be determined by a majority of our independent directors, which is defined as:

our Manager's continued material breach of any provision of the management agreement (including our Manager's failure to comply with our investment guidelines) following a period of 30 days after written notice thereof (or 45 days after written notice of such breach if our Manager, under certain circumstances, has taken steps to cure such breach within 30 days of the written notice);

our Manager's fraud, misappropriation of funds, or embezzlement against us;

our Manager's gross negligence in the performance of its duties under the management agreement;

the occurrence of certain events with respect to the bankruptcy or insolvency of our Manager, including an order for relief in an involuntary bankruptcy case or our Manager authorizing or filing a voluntary bankruptcy petition;

our Manager is convicted (including a plea of nolo contendere) of a felony; or

the dissolution of our Manager.

Our Manager may assign the management agreement in its entirety or delegate certain of its duties under the management agreement to any of its supervised affiliates without the approval of our independent directors if such assignment or delegation does not require our approval under the Investment Advisers Act of 1940, as amended, or the Advisers Act. Under the Advisers Act, the management agreement shall terminate automatically without the payment of any termination fee in the event that the Manager assigns the management agreement, in whole or in part, unless such assignment is consented to in writing by us with the consent of a majority of our independent directors.

Our Manager may terminate the management agreement if we become required to register as an investment company under the 1940 Act, with such termination deemed to occur immediately before such event, in which case we would not be required to pay a termination fee. Our Manager may decline to renew the management agreement by providing us with 180 days written notice, in which case we would not be required to pay a termination fee. In addition, if we default in the performance of any material term of the agreement and the default continues for a period of 30 days after written notice to us, our Manager may terminate the management agreement upon 60 days' written notice. If the management agreement is terminated by our Manager upon our breach, we would be required to pay our Manager the termination fee described above.

We may not assign our rights or responsibilities under the management agreement without the prior written consent of our Manager, except in the case of assignment to another REIT or other organization that is our successor (by merger, consolidation, purchase of assets or other transaction), in which case such successor organization will be bound under the management agreement and by the terms of such assignment in the same manner as we are bound under the management agreement.

Table of Contents

Management fee and expense reimbursements

We do not expect to maintain a separate office or to directly employ personnel other than the chief financial officer we anticipate hiring in the future and support staff for the chief financial officer. Instead, we will rely on the facilities and resources of our Manager to manage our day-to-day operations.

Management fee

Our Manager will be entitled to a management fee in an amount equal to 1.5% per annum, calculated and payable quarterly in arrears, of our stockholders' equity. For purposes of calculating the management fee, our "stockholders' equity" means the sum of the net proceeds from any issuances of our equity securities since inception (allocated on a pro rata daily basis for such issuances during the fiscal quarter of any such issuance), plus our retained earnings, calculated in accordance with accounting principles generally accepted in the United States, or U.S. GAAP, at the end of the most recently completed fiscal quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods), less any amount that we pay for repurchases of our shares of common stock, excluding any unrealized gains, losses or other non-cash items that have impacted stockholder's equity as reported in our financial statements prepared in accordance with U.S. GAAP, regardless of whether such items are included in other comprehensive income or loss, or in net income, and excluding one-time events pursuant to changes in U.S. GAAP and certain other non-cash charges after discussions between our Manager and our independent directors and after approval by a majority of our independent directors. However, if our stockholders' equity for any given quarter is negative based on the calculation described above, our Manager will not be entitled to receive any management fee for that quarter. Assuming that we sell 8,000,000 shares of common stock in this offering (which assumes no exercise of the underwriters' over-allotment option), 2,231,787 units in the concurrent private placement to certain institutional accredited investors and 46,043 shares of our common stock in the concurrent private placement to our Manager's deferred compensation plan, the management fee payable to our Manager for the 12-month period beginning on June 1, 2012 (assuming no additional equity is issued within this 12-month period) would be approximately \$3.1 million. Our Manager will use the proceeds from its management fee in part to pay compensation to its officers and personnel who, notwithstanding that certain of them also are our officers, receive no cash compensation directly from us. The management fee is payable independent of the performance of our portfolio.

The management fee of our Manager shall be calculated and delivered to us within 30 days after the end of each quarter. We are obligated to pay the management fee in cash within five business days after delivery to us of the written statement of our Manager setting forth the computation of the management fee for such quarter.

As a component of our Manager's compensation, we will issue stock-based compensation to our Manager under our Manager Equity Plan. See "Management Equity incentive plans Manager Equity Plan."

Reimbursement of expenses

We will be required to reimburse our Manager for the expenses described below. Expense reimbursements to our Manager are made in cash on a monthly basis following the end of each month. Our reimbursement obligation is not subject to any dollar limitation. Because our Manager's personnel perform certain legal, accounting, due diligence tasks and other services that outside professionals or outside consultants otherwise would perform, our Manager is paid or reimbursed for the documented cost of performing such tasks, provided that such costs and reimbursements are in amounts which are no greater than those which would be payable to outside professionals or consultants engaged to perform such services pursuant to agreements negotiated on an arm's-length basis.

Edgar Filing: Western Asset Mortgage Capital Corp - Form S-11/A

Table of Contents

We also pay all operating expenses, except those specifically required to be borne by our Manager under the management agreement. The expenses required to be paid by us include, but are not limited to:

expenses in connection with the issuance and transaction costs incident to the acquisition, disposition and financing of our investments;

costs of legal, tax, accounting, consulting, auditing, administrative and other similar services rendered for us by providers retained by our Manager or, if provided by our Manager's personnel, in amounts that are no greater than those that would be payable to outside professionals or consultants engaged to perform such services pursuant to agreements negotiated on an arm's-length basis;

the compensation and expenses of our directors (excluding those directors who are officers of our Manager) and the cost of liability insurance to indemnify our directors and officers;

costs associated with the establishment and maintenance of any of our credit facilities, other financing arrangements or other indebtedness of ours (including commitment fees, accounting fees, legal fees, closing and other similar costs) or any of our securities offerings;

expenses connected with communications to holders of our securities and other bookkeeping and clerical work necessary in maintaining relations with holders of such securities and in complying with the continuous reporting and other requirements of governmental bodies or agencies, including, without limitation, all costs of preparing and filing required reports with the SEC, the costs payable by us to any transfer agent and registrar in connection with the listing and/or trading of our securities on any exchange, the fees payable by us to any such exchange in connection with its listing, costs of preparing, printing and mailing our annual report to our stockholders and proxy materials with respect to any meeting of our stockholders;

costs associated with any computer software or hardware, electronic equipment or purchased information technology services from third-party vendors that is used for us;

expenses incurred by directors, officers, personnel and agents of our Manager for travel on our behalf, and other out-of-pocket expenses incurred by directors, officers, personnel and agents of our Manager in connection with the purchase, financing, refinancing, sale or other disposition of an investment or establishment and maintenance of any of our repurchase agreements, securitizations or any of our securities offerings;

costs and expenses incurred with respect to market information systems and publications, research publications and materials, and settlement, clearing and custodial fees and expenses;

compensation and expenses of our custodian and transfer agent, if any;

the costs of maintaining compliance with all U.S. federal, state and local rules and regulations or any other regulatory agency;

all taxes and license fees;

all insurance costs incurred in connection with the operation of our business, except for the costs attributable to the insurance that our Manager elects to carry for itself and its personnel;

costs and expenses incurred in contracting with third parties, including affiliates of our Manager, for the servicing and special servicing of our assets;

all other costs and expenses relating to our business and investment operations, including, without limitation, the costs and expenses of acquiring, owning, protecting, maintaining, developing and disposing of investments, including appraisal, reporting, audit and legal fees;

expenses relating to any office(s) or office facilities, including but not limited to disaster backup recovery sites and facilities, maintained for us or our investments separate from the office or offices of our Manager;

Table of Contents

expenses connected with the payments of interest, dividends or distributions in cash or any other form authorized or caused to be made by our board of directors to or on account of holders of our securities, including, without limitation, in connection with any dividend reinvestment plan;

expenses related to litigation and other legal matters involving us, including the fees and expenses of outside counsel;

any judgment or settlement of pending or threatened proceedings (whether civil, criminal or otherwise) against us or against any trustee, director, partner, member or officer of us in his capacity as such for which we are required to indemnify such trustee, director, partner, member or officer by any court or governmental agency; and

all other expenses actually incurred by our Manager (except as otherwise specified in the management agreement) that are reasonably necessary for the performance by our Manager of its duties and functions under the management agreement.

We will not reimburse our Manager or its affiliates for the salaries and other compensation of its personnel.

In addition, we may be required to pay our pro rata portion of rent, telephone, utilities, office furniture, equipment, machinery and other office, internal and overhead expenses of our Manager and its affiliates required for our operations.

Conflicts of interest policy

To avoid any actual or perceived conflicts of interest with our Manager, the management agreement provides that (i) an investment in any security structured or managed by our Manager or (ii) any sale of our assets to our Manager and its affiliates will require the proper approval of our board of directors, including a majority of our independent directors. Our independent directors expect to establish in advance parameters within which our Manager and its affiliates may act as our counterparty and provide broker, dealer and lending services to us in order to enable transactions to occur in an orderly and timely manner.

Licensing

The management agreement will include terms governing our use of the "Western Asset" name and logo.

Grants of equity compensation to our Manager, its personnel and affiliates and to our officers and directors

Under our equity incentive plans, the plan administrator is authorized to approve grants of equity-based awards to our Manager and to our officers and directors. Future equity awards may be made to our officers or directors and to our Manager under our equity incentive plans. See "Management Equity incentive plans."

Historical performance of our Manager's investments in Agency RMBS and our potential target assets

Our Manager has utilized Agency RMBS as a vital component within its investment strategy since its inception in 1971 and has been an active investor in non-Agency RMBS, CMBS and ABS since the inception of these markets through several housing and credit cycles. As of December 31, 2011, our Manager had a total of \$61.5 billion in assets under management in the asset classes corresponding to Agency RMBS and our potential target assets, of which \$37.6 billion was invested in Agency RMBS, \$13.8 billion in non-Agency RMBS, \$2.4 billion in CMBS and \$7.7 billion in ABS.

Table of Contents

Our Manager manages these assets using a range of strategies and investment vehicles, including mutual and private funds, private commingled vehicles and separately managed accounts. Most of these assets are managed in broad market portfolios that may have a material allocation to real estate or real estate-related assets, including Agency RMBS and our potential target assets, but have not invested primarily in real estate or real estate-related assets. Our Manager's broad market strategies that have exposure to Agency RMBS and our potential target assets but do not invest primarily in real estate or real estate-related assets include:

US Core: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, US Core portfolios had exposure to Agency RMBS, corporate debt rated as investment grade, or investment grade corporates, corporate debt rated as below investment grade, or high yield securities, securities issued by the U.S. Treasury, debt issued by an agency of the U.S. government, CMBS, ABS, cash and money market securities. As of December 31, 2011, our Manager managed approximately \$7.2 billion of Agency RMBS and our potential target assets in 51 US Core portfolios, which include mutual funds, private commingled vehicles and separate accounts.

US Core Full: These portfolios use diversified strategies and cover all sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, US Core Full portfolios invested in Agency RMBS; investment grade corporates; securities issued by the U.S. Treasury; debt issued by an agency of the U.S. Government; CMBS; ABS; high yield securities; securities issued in denominations other than U.S. dollars, or non-dollar securities; securities issued by companies or sovereigns in emerging markets, or emerging markets securities; and cash and money market securities. As of December 31, 2011, our Manager managed approximately \$30.0 billion of Agency RMBS and our potential target assets in 166 US Core Full portfolios, which include mutual funds, private commingled vehicles and separate accounts.

US Enhanced Cash: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, US Enhanced Cash portfolios invested in Agency RMBS, investment grade corporates, debt issued by an agency of the U.S. Government, CMBS, ABS, high yield securities, non-dollar securities, cash and money market securities. As of December 31, 2011, our Manager managed approximately \$1.8 billion of Agency RMBS and our potential target assets in 16 US Enhanced Cash portfolios, which include mutual funds, private commingled vehicles and separate accounts.

US Index Plus: These portfolios use a synthetic index component that provides exposure to the equity benchmark through the use of derivatives, and a short duration component that employs a long term value-oriented approach utilizing diversified strategies and covering all sectors of the fixed-income market in an attempt to add value while minimizing risk. As of December 31, 2011, US Index Plus portfolios invested in Agency RMBS, investment grade corporates, debt issued by an agency of the U.S. Government, ABS, high yield securities and cash and money market securities. As of December 31, 2011, our Manager managed approximately \$0.8 billion of Agency RMBS and our potential target assets in 10 US Index Plus accounts, including private commingled vehicles and separate accounts.

US Intermediate: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, US Intermediate portfolios invested in Agency RMBS, investment grade corporates, securities issued by the U.S. Treasury, debt issued by an agency of the U.S. Government, ABS, high yield securities, cash and money market securities. As of December 31, 2011, our Manager managed approximately \$2.1 billion of Agency RMBS and our potential target assets in 29 US Intermediate portfolios, which include mutual funds, private commingled vehicles and separate accounts.

Table of Contents

US Limited Duration: These portfolios use diversified strategies and cover all investment-grade sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, US Limited Duration portfolios invested in Agency RMBS, investment grade corporates, securities issued by the U.S. Treasury, debt issued by an agency of the U.S. Government, CMBS, ABS, high yield securities, non-dollar securities and cash and money market securities. As of December 31, 2011, our Manager managed approximately \$0.9 billion in 13 US Limited Duration portfolios, which include mutual funds, private commingled vehicles and separate accounts.

Total Return Unconstrained: These portfolios employ an actively managed, diversified fixed-income strategy. Portfolio construction is based on our Manager's fundamental view of the fixed-income markets and is independent of broad market benchmarks. Portfolios in the Total Return Unconstrained strategy may opportunistically utilize investments in high yield, emerging markets and non-dollar securities. As of December 31, 2011, Total Return Unconstrained portfolios invested in Agency RMBS, investment grade corporates, debt issued by an agency of the U.S. Government, ABS, high yield securities, non-dollar securities, emerging markets securities and cash and money market securities. As of December 31, 2011, our Manager managed approximately \$1.1 billion of Agency RMBS and our potential target assets in 14 Total Return Unconstrained portfolios, which include mutual funds, private commingled vehicles and separate accounts.

Global Core Full: These portfolios use diversified strategies and cover all sectors of the fixed-income market in seeking to add value while minimizing risk. As of December 31, 2011, Global Core Full portfolios invested in Agency RMBS, investment grade corporates, debt issued by a foreign government, debt issued by an agency of the U.S. Government, ABS, high yield securities, non-dollar securities and cash and money market securities. As of December 31, 2011, our Manager managed approximately \$0.5 billion of Agency RMBS and our potential target assets in 18 Global Core Full accounts, including mutual funds, private commingled vehicles and separate accounts.

Our Manager also manages a number of portfolios in strategies that do invest primarily in real estate or real estate-related assets, including Agency RMBS and our potential target assets. These portfolios include mutual funds, private commingled investment vehicles and separate accounts. Our Manager began managing its first portfolio that invests primarily in Agency RMBS and our potential target assets in December 2004. Since that time, our Manager has managed from \$1.1 billion to \$14.9 billion in up to 32 portfolios that primarily invest in Agency RMBS and our potential target assets. Of these 32 portfolios, (i) 23 are or have been separate accounts managed on behalf of private institutional clients, 15 of which are currently active, (ii) seven are or have been commingled investment vehicles further described below, six of which are currently active, (iii) one was merged into one of the seven commingled investment vehicles further described below in February 2007, and (iv) one was merged into another commingled investment vehicle with a broad market investment strategy in 2007. As of December 31, 2011, our Manager managed approximately \$2.1 billion in the 15 separate accounts and \$5.3 billion in the six commingled investment vehicles that invest primarily in Agency RMBS and our potential target assets. The seven portfolios referred to above that are or have been commingled investment vehicles are as follows:

Western Asset Mortgage Backed Securities Portfolio, LLC, or the MBS Fund;

Western Asset Opportunistic Structured Securities Portfolio, LLC, or the Structured Securities Fund;

Smash Series M Fund, or the Smash Fund;

Legg Mason Western Asset Mortgage Backed Securities Fund, or the Mortgage Backed Securities Fund;

Western Asset Mortgage Defined Opportunity Fund Inc., or the DMO Fund;

Table of Contents

LMP Variable Government Fund; and

RLJ Western Asset Public/Private Master Fund, L.P., or the Public/Private Master Fund.

Additional disclosure on each of these seven funds is provided below.

There are significant differences between our investment policies and the investment policies of the portfolios discussed below. Accordingly, the performance of these portfolios is not necessarily indicative of our potential performance.

The MBS Fund. The MBS Fund is a private investment vehicle organized as a Delaware limited liability company. Our Manager has managed the MBS Fund since the MBS Fund's inception on December 2, 2004. At December 31, 2011, the MBS Fund had total net assets of \$2.7 billion. The MBS Fund purchases its investment assets using its own funds and does not borrow to make investments although it may use short-term borrowings to facilitate settlement. The MBS Fund invests primarily in RMBS with an emphasis on Agency RMBS. At December 31, 2011, 72% of the MBS Fund's market value was composed of Agency RMBS. Including economic exposure from derivatives, the MBS Fund has 79% exposure to Agency RMBS. The MBS Fund may also invest, from time to time, in our other target assets, including non-Agency RMBS, CMBS and ABS. In addition to Agency RMBS and our potential target assets, the MBS Fund also invests in debt issued by the U.S. Treasury or a U.S. government agency and in corporate debt. In contrast to the MBS Fund, we do not expect to invest in U.S. Treasuries, agencies or corporate debt in any material amounts.

The MBS Fund produced annualized gross returns of 6.10%, 12.80%, 6.91% and 6.19% respectively on a one year basis, three year basis, five year basis and since December 1, 2004 (as of December 31, 2011). The fiscal year for the MBS Fund ends December 31. The returns of the MBS Fund are detailed in the table below. The MBS Fund does not charge investment advisory fees. Gross performance is derived by adding the MBS Fund's expense ratio to the net performance of the MBS Fund. Net performance is calculated using the MBS Fund's net asset value, which takes into account the MBS Fund's total expense ratio. Actual fees will vary by account, depending on investment mandate, services provided to the client and other factors.

The economic downturn and the disruption of the financial markets in 2007 and 2008 had a negative impact on the prices of structured products in the MBS Fund, particularly non-Agency RMBS, in which the MBS Fund had approximately 28% of its value invested as of December 31, 2007. A decrease in home prices and an increase in unemployment rates caused default and loss rates of collateral backing non-Agency RMBS to rise to levels much higher than projected at the time of issuance of these securities. A number of factors, including reduced liquidity, the unavailability of financing in the capital markets, downgrades of RMBS by credit agencies and general risk aversion by investors caused many holders to sell these securities at distressed levels, putting additional pressure on prices. These market impacts adversely affected the prices of non-Agency RMBS in the MBS Fund managed by our Manager during this time period. To a lesser degree, these factors also led to a decrease in the prices of CMBS and ABS held in the MBS Fund. Together, these price decreases principally contributed to the negative performance of the MBS Fund in 2008. As the economic recovery has progressed, prices of these securities have improved and this price improvement has been reflected in the positive performance of the MBS Fund from 2009 forward.

MBS Fund (net)	6.06%	12.77%	6.88%	6.16%

Calendar Yearly Returns	2011	2010	2009	2008	2007
MBS Fund (gross)	6.10%	14.59%	18.05%	-6.80%	4.41%
MBS Fund (net)	6.06%	14.56%	18.02%	-6.82%	4.39%

The Structured Securities Fund. The Structured Securities Fund is a private investment vehicle organized as a Delaware limited liability company. Our Manager has managed the Structured Securities Fund since its inception on July 27, 2007. At December 31, 2011, the Structured Securities Fund had total net assets of \$375 million. The Structured Securities Fund purchases its investment assets using its own funds and does not borrow to make investments although it may use short-term borrowings to facilitate settlement. The Structured Securities Fund invests almost exclusively in non-Agency RMBS. At December 31, 2011, 85% of the Structured Securities Fund was comprised of non-Agency RMBS. The Structured Securities Fund also invests from time to time in ABS and CMBS. The investment guidelines for the Structured Securities Fund permit investments in Agency RMBS, but at December 31, 2011, the Structured Securities Fund had \$0 in investments in Agency RMBS.

The Structured Securities Fund produced gross annualized returns of -2.29%, 17.30% and 3.68% respectively on a one year basis, three year basis and since inception on July 27, 2007 (as of December 31, 2011). The fiscal year for the Structured Securities Fund ends December 31. The returns of the Structured Securities Fund are detailed in the table below. The Structured Securities Fund does not charge investment advisory fees. Gross performance is derived by adding the Structured Securities Fund's expense ratio to the net performance of the Structured Securities Fund. Net performance is calculated using the Structured Securities Fund's net asset value, which takes into account the Structured Securities Fund's total expense ratio. Actual fees will vary by account, depending on investment mandate, services provided to the client and other factors.

The economic downturn and the disruption of the financial markets in 2007 and 2008 had a negative impact on the prices of structured products in the Structured Securities Fund, particularly non-Agency RMBS, in which the Structured Securities Fund had approximately 52% of its assets invested as of December 31, 2007. A decrease in home prices and an increase in unemployment rates caused default and loss rates of collateral backing non-Agency RMBS to rise to levels much higher than projected at the time of issuance of these securities. A number of factors, including reduced liquidity, the unavailability of financing in the capital markets, downgrades of RMBS by credit agencies and general risk aversion by investors caused many holders to sell these securities at distressed levels, putting additional pressure on prices. These market impacts adversely affected the prices of the non-Agency RMBS held in the Structured Securities Fund. Because of the Structured Securities Fund's significant exposure to non-Agency RMBS, these price decreases greatly contributed to the negative performance in the Structured Securities Fund in 2008. As the economic recovery began in 2009 and 2010, the prices of these securities improved, leading to positive performance in the Structured Securities Fund in 2009 and 2010.

The non-Agency RMBS markets faced additional pressures in 2011, in part due to a general weakening of the financial markets due to a number of macroeconomic factors, including unrest in the Middle East and Northern Africa, the earthquake and tsunami in Japan, the downgrade of the U.S. government's credit-rating and concerns regarding certain European governments' credit ratings.

Table of Contents

During the middle part of 2011, the non-Agency RMBS markets also had significant additional supply, as the Federal Reserve Bank of New York took actions to sell its stake in Maiden Lane II LLC, a portfolio of RMBS, in the open market. While most sectors of the fixed income markets rallied during the fourth quarter of 2011, non-agency RMBS markets did not generally see price improvement over this time period due in significant part to fears of potentially significant sales of non-Agency RMBS from de-leveraging European banks and hedge funds seeking to meet year-end redemptions. At the same time, many broker-dealers reduced their inventory of non-Agency RMBS due to year-end risk limits and European market uncertainty. The combination of these factors led to less liquidity in the non-Agency RMBS markets and lower non-Agency RMBS prices. Because of the Structured Securities Fund's allocation to non-Agency RMBS (approximately 90% of market value at December 31, 2010 and 85% of market value at December 31, 2011), the performance of the Structured Securities Fund was negative in 2011.
