HEIDRICK & STRUGGLES INTERNATIONAL, INC. AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (All tables in thousands, except share and per share figures) (Unaudited)

1. Basis of Presentation of Interim Financial Information

The accompanying unaudited Condensed Consolidated Financial Statements of Heidrick & Struggles International, Inc. and subsidiaries (the "Company") have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission ("SEC"). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. Significant items subject to estimates and assumptions include revenue recognition, income taxes, interim effective tax rate and assessment of goodwill and other intangible assets for impairment. Estimates are subject to a degree of uncertainty and actual results could differ from these estimates. These financial statements and notes are to be read in conjunction with the Company's Consolidated Financial Statements and Notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016, as filed with the SEC on March 23, 2017.

2. Summary of Significant Accounting Policies

A complete listing of the Company's significant accounting policies is discussed in Note 2, Summary of Significant Accounting Policies, in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

Recently Issued Financial Accounting Standards

In May 2017, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2017-09, Compensation - Stock Compensation, Scope of Modification Accounting, which is intended to provide clarity and reduce both diversity in practice, cost and complexity when implementing a change in the terms or conditions of a share-based payment award. ASU 2017-09 requires that an entity should account for the effects of a modification unless the fair value, vesting conditions, and whether the award is classified as a liability instrument or an equity instrument remain unchanged in the modification. ASU 2017-09 is effective for interim and annual periods beginning after December 15, 2017 with early adoption permitted. The Company has not yet determined when it will adopt this guidance. The Company is currently evaluating the impact of this accounting guidance. The effect is not known or reasonably estimable at this time.

In March 2017, the FASB issued ASU No. 2017-07, Compensation - Retirement Benefits: Improving the Presentation of Net Periodic Pension Cost and Net Periodic Post-retirement Benefit Cost, which is intended to improve the consistency, transparency and usefulness of net benefit cost disclosures. ASU 2017-07 requires that an employer report the service cost component of net benefit cost in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. Additionally, the other components of net benefit costs are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations. ASU 2017-07 is effective for interim and annual periods beginning after December 15, 2017 with early adoption permitted. The Company has not yet determined when it will adopt this guidance. The Company is currently evaluating the impact of this accounting guidance. The effect is not known or reasonably estimable at this time.

In January 2017, the FASB issued ASU No. 2017-04, Intangibles - Goodwill and Other, which eliminates Step 2 from the goodwill impairment test. Instead, under the amendments in this update, an entity should perform its annual, or

interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. Additionally, an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when measuring the goodwill impairment loss, if applicable. The Board also eliminated the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. An entity is required to disclose the amount of goodwill allocated to each reporting unit with a zero or negative carrying amount of net assets. The Company early adopted ASU 2017-04, during the three months ended June 30, 2017. The Company concluded that ASU 2017-04 is preferable to the current guidance included in ASC 350 due to the simplified process of subsequently measuring goodwill.

In November 2016, the FASB issued ASU No. 2016-18, Statement of Cash Flows: Restricted Cash, which requires that the statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore amounts generally described as restricted cash should be

included with cash and cash equivalents when reconciling the beginning of period and end of period total amounts shown on the statement of cash flows. The Company currently does not include restricted cash amounts in the beginning and ending cash amounts and will change the presentation of the cash flow statement to include restricted cash in the beginning and ending cash totals. The standard is effective for annual reporting periods beginning after December 15, 2017 with early adoption permitted. The Company has not yet determined when it will adopt this guidance. If the Company had adopted the guidance as of June 30, 2017, the beginning and ending balance of cash, cash equivalents and restricted cash for the three months ended June 30, 2017 would have each increased by \$0.6 million in the Condensed Consolidated Statement of Cash Flows.

In August 2016, the Financial Accounting Standards Board ("FASB") issued accounting Standards Update ("ASU") No. 2016-15, Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments, which is intended to reduce diversity in practice as to how certain cash receipts and cash payments should be presented and classified. The standard is effective for interim and annual reporting periods beginning after December 15, 2017 with early adoption permitted. The Company has evaluated the standard and noted the guidance for contingent consideration payments made after a business combination are applicable to the Condensed Consolidated Statements of Cash Flows. The Company currently classifies all contingent consideration payments as financing activities. The impact of this change is not expected to be significant to the classification of these activities on the Consolidated Statements of Cash Flows.

In February 2016, the FASB issued ASU No. 2016-02, Leases, intended to improve financial reporting about leasing transactions. The new guidance will require entities that lease assets to recognize on their balance sheets the assets and liabilities for the rights and obligations created by those leases and to disclose key information about the leasing arrangements. ASU 2016-02 is effective for interim and annual periods beginning after December 15, 2018 with early adoption permitted. The guidance requires lessees and lessors to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. The Company is currently evaluating the impact of this accounting guidance. The effect is not known or reasonably estimable at this time.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments: Recognition and Measurement of Financial Assets and Financial Liabilities, which addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments including the recognition of unrealized changes in fair value within net income. The standard is effective for annual reporting periods beginning after December 15, 2017. The Company is currently evaluating the impact of this accounting guidance. The effect is not known or reasonably estimable at this time.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. The ASU requires that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the Company expects to be entitled in exchange for these goods or services. The guidance is effective for interim and annual reporting periods beginning after December 15, 2017. The guidance permits the use of either of the following transition methods: (i) a full retrospective method reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients or (ii) a retrospective method with the cumulative effect upon initial adoption recognized at the date of initial application (modified retrospective). The Company will adopt the guidance on January 1, 2018 and will apply the modified retrospective method.

The Company is performing its evaluation of ASU No. 2014-09. The Company is paid a retainer for its executive search services equal to approximately one-third of the estimated first year compensation for the position to be filled. If the actual compensation of a placed candidate exceeds the estimated compensation, the Company is often authorized to bill the client for one-third of the excess. The Company currently recognizes revenue associated with the difference between the estimated compensation and actual compensation at the time this amount is considered fixed and determinable. Under ASU 2014-09, the difference between estimated compensation and actual compensation is considered variable consideration. The Company will be required to estimate the amount of variable consideration for

its executive search services at contract inception. The Company is still evaluating the financial impact of this change and if other changes will be required.

The Company is continuing to evaluate the impacts of adoption of this guidance and its preliminary assessments are subject to change.

Reclassifications

Certain prior year amounts have been recast as a result of the change in the Company's operating segments as first reported in the Company's Annual Report on Form 10-K filed on March 23, 2017. The reclassifications had no impact on net income, net cash flows or stockholders' equity.

Earnings per Common Share

Basic earnings per common share is computed by dividing net income by weighted average common shares outstanding for the year. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted. Common equivalent shares are excluded from the determination of diluted earnings per share in periods in which they have an anti-dilutive effect.

The following table sets forth the computation of basic and diluted earnings per share:

	Three Months Ended		Six Months Endo June 30,

3. Allowance for Doubtful Accounts

The activity of the allowance for doubtful accounts is as follows:

Balance at December 31, 2016 \$2,575 Provision charged to income 1,807 Write-offs (936) Foreign currency translation 55 Balance at June 30, 2017 \$3,501

4. Property and Equipment, net

The components of the Company's property and equipment are as follows:

	June 30,	December
	2017	31,
	2017	2016
Leasehold improvements	\$46,853	\$42,891
Office furniture, fixtures and equipment	18,117	16,677

Accumulated depreciation	(56,715)	(54,655)
Property and equipment, net	\$41,491	\$35,099

Depreciation expense for the three months ended June 30, 2017 and 2016 was \$2.7 million and \$2.3 million, respectively. Depreciation expense for the six months ended June 30, 2017 and 2016 was \$4.5 million and \$4.6 million, respectively.

5. Investments

The Company has a U.S. non-qualified deferred compensation plan that consists primarily of U.S. marketable securities and mutual funds, all of which are valued using Level 1 inputs (See Note 6, Fair Value Measurements). The fair value for these investments was \$19.7 million and \$17.3 million as of June 30, 2017 and December 31, 2016, respectively. The aggregate cost basis for these investments was \$14.4 million and \$13.3 million as of June 30, 2017 and December 31, 2016, respectively.

6. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A three-level fair value hierarchy prioritizes the inputs used to measure fair value. The hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs.

The three levels of inputs used to measure fair value are as follows:

Level 1 – Quoted prices in active markets for identical assets and liabilities.

Level 2 – Quoted prices in active markets for similar assets and liabilities, or other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The following tables provide a summary of the fair value measurements at June 30, 2017 and December 31, 2016 for each major category of assets and liabilities measured at fair value on a recurring basis:

Balance at June 30, 2017	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total

7. Acquisitions

On October 1, 2015, the Company acquired Co Company, a UK-based management consulting firm that specializes in organizational development. The former owners of Co Company were eligible to receive additional cash consideration upon the realization of specific revenue and EBITDA Margin milestones achieved over the period October 2015 through December 2018. On August 25, 2016, the Company and the former owners of Co Company entered into a Deed of Amendment (the "Amendment") to the Share Purchase Agreement dated October 1, 2015. The Amendment adjusted the target fee revenue and targeted EBITDA margin for each remaining earn out period taking into consideration the unanticipated acquisitions completed subsequent to the Share Purchase Agreement. The new targets include subsequent acquisitions and took effect retrospectively from January 1, 2016. On June 14, 2017, the Company and the former owners of Co Company entered into an Earn Out Buyout Agreement (the "Buyout Agreement") in accordance with the terms and conditions of the Share Purchase Agreement dated October 1, 2015, as amended by a Deed of Amendment dated August 25, 2016. Pursuant to the Buyout Agreement, in accordance with the Share Purchase Agreement and Deed of Amendment, the Company exercised its right to buy out all of the remaining earnout amounts. The price paid to buy out the Remaining Earn Out Amounts was calculated in accordance with the formula set forth in the Purchase Agreement and resulted in an aggregate buyout payment to the former owners of Co Company of \$2.3 million during the three months ended June 30, 2017.

Net goodwill at June 30, 2017	\$88,336	\$20,148	\$9,382	\$ 6,805	\$ —	\$124,671

In 2017, the Culture Shaping business continued the transition of senior-level personnel which began in 2016, primarily due to planned retirements. The Company has experienced lower than expected consultant productivity during the transition period. Also, the marketplace for culture shaping services has become increasingly more competitive and the business experienced lengthening sales cycles and decision processes within target client organizations. These events led to a decline in the revenue performance of the business and uncertainty around the timing of improving such performance. As a result, the Company identified a triggering event and performed an interim impairment evaluation on the goodwill related to its Culture Shaping reporting unit during the quarter ended June 30, 2017.

During the impairment evaluation process, the Company used a discounted cash flow methodology to estimate the fair value of its Culture Shaping reporting unit. The discounted cash flow approach is dependent on a number of factors, including estimates of future market growth and trends, forecasted revenue and costs, capital investments, appropriate discount rates, certain assumptions to allocate shared costs, assets and liabilities, historical and projected performance of the reporting unit, and the macroeconomic conditions affecting each of the Company's reporting units. The assumptions used in the determination of fair value were (1) a forecast of growth in the near and long term; (2) the discount rate; (3) working capital investments; and (4) other factors.

The Company early adopted ASU No. 2017-04, Intangibles - Goodwill and Other in conjunction with its impairment evaluation during the three months ended June 30, 2017. Under the adopted guidance, Step 2 of the goodwill impairment test is eliminated. Instead, the goodwill impairment test is completed by comparing the fair value of a reporting unit with its carrying amount. An impairment charge is recognized for the amount by which the carrying value of a the reporting unit exceeds its carrying amount, however, the loss recognized is not to exceed the total amount of goodwill allocated to that reporting unit.

Based on the results of the of the impairment evaluation, the Company determined that the goodwill within the Culture Shaping reporting unit was impaired, which resulted in an impairment charge of \$29.3 million to write-off all of the goodwill. The impairment charge is recorded within Impairment charges in the Condensed Consolidated Statements of Comprehensive Income (Loss) for the three and six months ended June 30, 2017. The impairment was non-cash in nature and did not affect our current liquidity, cash flows, borrowing capability or operations; nor did it impact the debt covenants under our credit agreement.

The Company continues to monitor potential triggering events for its other reporting units including changes in the business climate in which it operates, the Company's market capitalization compared to its book value, and the Company's recent operating performance. Any changes in these factors could result in an impairment charge for the Company's reporting units.

The Company's other intangible assets, net by segment, are as follows:

Total other intangible assets, net	\$8,027	\$ 20,690

As discussed above, the Culture Shaping business was impacted by the transition of senior-level personnel, primarily due to planned retirements, and the Company experienced lower than expected consultant productivity. The Company has also experienced lengthening sales cycles and decision processes within target client organizations. Due to the impact of these events on revenue and earnings when compared to actual and forecasted results, and the impact to the revenue and earnings inputs utilized in the fair value assessment of the intangible assets, the Company identified a triggering event for its Culture Shaping intangible assets and performed an impairment evaluation during the three months ended June 30, 2017.

The analysis was conducted in accordance with accounting guidance on fair value measurements taking into consideration Level 3 inputs, primarily consisting of discounted cash flow and replacement cost methodologies. Based on this evaluation, the Company recorded an impairment charge related to its Culture Shaping client relationships, trade name, software and non-compete intangible assets of \$9.9 million during the three months ended June 30, 2017. The impairment charge is recorded within Impairment charges in the Condensed Consolidated Statements of Comprehensive Income (Loss) for the three and six months ended June 30, 2017.

The carrying amount of amortizable intangible assets and the related accumulated amortization are as follows:

10. Line of Credit

On June 30, 2015, the Company entered into a Second Amended and Restated Credit Agreement (the "Restated Credit Agreement"). The Restated Credit Agreement amended and restated the Credit Agreement executed on June 22, 2011 (the "Credit Agreement"). Pursuant to the Restated Credit Agreement, the Company replaced its Revolving Facility and Term Facility ("Existing Facility") with a single senior unsecured revolving line of credit with an aggregate commitment of up to \$100 million, which includes a sublimit of \$25 million for letters of credit, and a \$50 million expansion feature (the "Replacement Facility"). The Replacement Facility will mature on June 30, 2020. Borrowings under the Restated Credit Agreement bear interest at the Company's election at the existing Alternate Base Rate (as defined in the Credit Agreement) or Adjusted LIBOR Rate (as defined in the Credit Agreement) plus a spread as determined by the Company's leverage ratio.

Borrowings under the Replacement Facility may be used for working capital, capital expenditures, Permitted Acquisitions (as defined in the Credit Agreement) and for other general corporate purposes of the Company and its subsidiaries. The obligations under the Replacement Facility are guaranteed by certain of the Company's subsidiaries.

During the three months ended March 31, 2017, the Company borrowed \$40.0 million under the Restated Credit Agreement and elected the Adjusted LIBOR Rate. The Company subsequently repaid \$15.0 million during the three months ended March 31, 2017 and \$25.0 million during the three months ended June 30, 2017.

As of June 30, 2017 and December 31, 2016, the Company had no outstanding borrowings under the Restated Credit Agreement and the Company was in compliance with the financial and other covenants under the Restated Credit Agreement and no event of default existed.

11. Stock-Based Compensation

The Company's 2012 Heidrick & Struggles GlobalShare Program (the "2012 Program") provides for grants of stock options, stock appreciation rights, and other stock-based awards that are valued based upon the grant date fair value of shares. These awards may be granted to directors, selected employees and independent contractors. The 2012 Program originally authorized 1,300,000 shares of Common Stock for issuance pursuant to awards under the plan.

On May 22, 2014, the stockholders of the Company approved an amendment to the 2012 Program to increase the number of shares of Common Stock reserved for issuance under the 2012 Program by 700,000 shares. As of June 30, 2017, 1,744,266 awards have been issued under the 2012 Program and 656,372 shares remain available for future awards, which includes 400,638 forfeited awards. The 2012 Program provides that no awards can be granted after May 24, 2022.

The Company measures its stock-based compensation costs based on the grant date fair value of the awards and recognizes these costs in the financial statements over the requisite service period.

A summary of information with respect to stock-based compensation is as follows:

Performance Stock Units

The Company grants performance stock units to certain of its senior executives. The performance stock units are generally subject to a cliff vesting at the end of a three year period. The vesting will vary between 0%—200% based on the attainment of operating income goals over the three year vesting period. The performance stock units are expensed on a straight-line basis over the three year vesting period.

In 2014, the Company granted market-based performance stock units to the former Chief Executive Officer. The market-based awards vest after a two year service period and if the price of the Company's common stock exceeds specified targets. The fair value of the market-based awards was determined using the Monte-Carlo simulation model. A Monte Carlo simulation model uses stock price volatility and other variables to estimate the probability of satisfying the market conditions and the resulting fair value of the award. Compensation costs related to the market-based awards are recognized regardless of whether the market condition is satisfied, as long as the requisite service has been provided. All of the market-based performance conditions were satisfied such that all 125,000 performance stock units granted to the former Chief Executive Officer vested upon the completion of the two year service period in February

2016.

Performance stock unit activity for the six months ended June 30, 2017:

12. Income Taxes

The Company reported a loss before taxes of \$28.7 million and an income tax benefit of \$10.4 million for the three months ended June 30, 2017. The Company reported income before taxes of \$11.8 million and an income tax provision of \$5.1 million for the three months ended June 30, 2016. The effective tax rates for the three months ended June 30, 2017 and 2016 were 36.2% and 43.2%, respectively. The effective tax rate for the three months ended June 30, 2017 was impacted by the deferred tax effect on the long-lived assets and goodwill impairment (See Note 8, Goodwill and Other Intangible Assets) and the inability to recognize losses in certain jurisdictions. The effective tax rate for the three months ended June 30, 2016 was impacted by the mix of income.

The Company reported a loss before taxes of \$24.6 million and an income tax benefit of \$7.0 million for the six months ended June 30, 2017. The Company reported income before taxes of \$15.8 million and an income tax provision of \$7.8 million for the six months ended June 30, 2016. The effective tax rates for the six months ended June 30, 2017 and 2016 were 28.5% and 49.4%, respectively. The effective tax rate for the six months ended June 30, 2017 was impacted by the non-deductibility of

the employee benefit tax settlement (See Note 16, Commitments and Contingencies), the deferred tax effect on the long-lived assets and goodwill impairment and the inability to recognize losses in certain jurisdictions. The effective tax rate for the six months ended June 30, 2016 was impacted by the mix of income.

The Company estimates that its effective tax rate for the year ended December 31, 2017 will be approximately (18)%. The negative full year effective rate for 2017 is primarily the result of a loss before income taxes due to the Culture Shaping impairment. The forecasted annual effective tax expense is positive primarily due to losses that cannot be benefited for tax purposes and book expenses that are not tax deductible.

13. Changes in Accumulated Other Comprehensive Income

The changes in Accumulated other comprehensive income ("AOCI") by component for the six months ended June 30, 2017 is summarized below:

14. Segment Information

The Company operates its executive search business in the Americas; Europe (which includes Africa); and Asia Pacific (which includes the Middle East) and operates its leadership consulting and culture shaping businesses as separate segments.

For segment purposes, reimbursements of out-of-pocket expenses classified as revenue and other operating income are reported separately and, therefore, are not included in the results of each segment. The Company believes that analyzing trends in revenue before reimbursements (net revenue), analyzing operating expenses as a percentage of net revenue, and analyzing operating income more appropriately reflects its core operations.

The revenue and operating income (loss) by segment are as follows:

15. Guarantees

The Company has issued cash collateralized bank guarantees and letter of credit backed bank guarantees supporting certain obligations, primarily the payment of office lease obligations and business license requirements for certain of its subsidiaries in Europe and Asia Pacific. The bank guarantees were made to secure the respective agreements and are for the terms of the agreements, which extend through 2018. For each bank guarantee issued, the Company would have to perform under the guarantee if the subsidiary defaults on a lease payment. The maximum amount of undiscounted payments the Company would be required to make in the event of default on all outstanding guarantees is approximately \$2.6 million as of June 30, 2017. The Company has not accrued for these arrangements as no event of default exists or is expected to exist.

16. Commitments and Contingencies

Litigation

The Company has contingent liabilities from various pending claims and litigation matters arising in the ordinary course of the Company's business, some of which involve claims for damages that are substantial in amount. Some of these matters are covered by insurance. Based upon information currently available, the Company believes the ultimate resolution of such claims and litigation will not have a material adverse effect on its financial condition, results of operations or liquidity.

UK Employee Benefits Trust

On March 31, 2017, the Company reached a settlement with Her Majesty's Revenue and Customs ("HMRC") in the United Kingdom regarding HMRC's challenge of the tax treatment of certain of the Company's contributions in the United Kingdom to an Employee Benefits Trust between 2002 and 2008. HMRC alleged that the contributions should have been subject to Pay As You Earn tax and Class 1 National Insurance Contributions in the United Kingdom. In connection with the settlement, the Company agreed to pay approximately £5.4 million (equivalent to \$7.0 million at June 30, 2017) related to Pay as You Earn tax, Class 1 National Insurance Contributions, inheritance tax and interest. Concurrently with the HMRC settlement, the Company also reached an agreement with the beneficiaries under the

Employee Benefits Trust for the reimbursement of approximately £2.3 million (equivalent to \$3.0 million at June 30, 2017) beneficiary-owed Pay as You Earn tax and Class 1 National Insurance Contributions. The Company has recorded \$1.5 million related to the Pay as You Earn tax and Class 1 National Insurance Contributions and the respective beneficiary reimbursements as a component of Salaries and employee benefits in the Condensed Consolidated Statements of Comprehensive Income for the six months ended June 30, 2017. Inheritance tax and interest expense of \$2.4 million incurred as a result of the settlement is recorded as a component of Other, net in the Condensed Consolidated Statements of Comprehensive Income for the six months ended June 30, 2017.

During the three months ended June 30, 2017, the Company made payments of approximately £5.4 million (equivalent to \$7.0 million at June 30, 2017) related to the Pay as You Earn tax, and received reimbursement of £2.0 million (equivalent to \$2.6 million at June 30, 2017) from the beneficiaries under the Employee Benefits Trust.

Typically, we are paid a retainer for our executive search services equal to approximately one-third of the estimated first year compensation for the position to be filled. In addition, generally, if the actual compensation of a placed candidate exceeds the estimated

compensation, we often are authorized to bill the client for one-third of the excess. Indirect expenses are calculated as a percentage of the retainer with certain dollar limits per search. We generally bill our clients for our retainer and indirect expenses in one-third increments over a three-month period commencing in the month of a client's acceptance of the contract.

On August 4, 2016, we acquired JCA Group Limited ("JCA Group") a UK-based provider of executive search, succession planning and coaching services.

Leadership Consulting. Leadership consulting works with clients to accelerate performance at the strategic, organization, team and individual leader levels. Our leadership consulting services generate revenue primarily through the professional fees generated for each engagement which are generally based on the size of the project and scope of services. Depending on the terms of the agreement, net revenue from leadership consulting is either recognized proportionally as services are performed or in accordance with the completion of the engagement deliverables. On September 1, 2016, we acquired Philosophy IB, LLP, a leadership, organizational development and management consulting firm. On February 29, 2016, we acquired Decision Strategies International, Inc., which specializes in advising organizations and institutions on strategic planning and decision making in certain operating environments, leadership development and talent strategy.

Culture Shaping. Our culture shaping business uses proprietary technology to analyze and interpret organizational cultures and drivers and partner with clients to administer methods that develop alignment on leadership teams and desired organizational outcomes. Our culture shaping services generate revenue through a combination of professional service and license fees related to the engagement. Net revenue associated with culture shaping consulting is recognized proportionally as services are performed. Net revenue associated with licenses to use culture shaping proprietary materials is typically recognized over the term of the arrangement.

We have announced our intentions to combine our Leadership Consulting and Culture Shaping services to create Heidrick Consulting, a comprehensive offering of the firm's advisory services. We have not yet determined the impact of this change on our reportable segments.

Key Performance Indicators

We manage and assess Heidrick & Struggles' performance through various means, with the primary financial and operational measures including net revenue, operating income, operating margin, Adjusted EBITDA (non-GAAP), and Adjusted EBITDA margin (non-GAAP). Executive Search and Leadership Consulting performance is also measured using consultant headcount and consultant productivity. Specific to Executive Search, confirmation trends and average revenue per search or project are used to measure performance.

Revenue is driven by market conditions and a combination of the number of executive search engagements and leadership consulting and culture shaping projects and the average revenue per search or project. With the exception of compensation expense, incremental increases in revenue do not necessarily result in proportionate increases in costs, particularly operating and administrative expenses, thus potentially improving operating margins.

The number of consultants, confirmation trends, number of searches or projects completed, productivity levels and the average revenue per search or project will vary from quarter to quarter, affecting net revenue and operating margin.

Our Compensation Model

At the Executive Search consultant level there are fixed and variable components of compensation. Individuals are rewarded for their performance based on a system that directly ties a portion of their compensation to the amount of net revenue for which they are responsible. A portion of the reward is based upon individual performance against a series of non-financial measures. Credit towards the variable portion of an Executive Search consultant's compensation is earned by generating net revenue for winning and executing work. Each quarter, we review and update the expected annual performance of all Executive Search consultants and accrue variable compensation accordingly. The amount of variable compensation that is accrued for each Executive Search consultant is based on a tiered payout model. Overall Company performance determines the amount available for total variable compensation. The more net revenue that is generated by the consultant, the higher the percentage credited towards the consultant's variable compensation and thus accrued by our Company as expense. The mix of individual consultants who generate the revenue can significantly affect the total amount of compensation expense recorded, which directly impacts operating margin. As a result, the variable portion of the compensation expense may fluctuate significantly from quarter to quarter. The total variable compensation is discretionary and is based on Company-wide financial targets approved by the Human Resources and Compensation Committee of the Board of Directors.

A portion of our Executive Search consultants' and management cash bonuses is deferred and paid over a three-year vesting period. The compensation expense related to the amounts being deferred is recognized on a graded vesting attribution method over the requisite service period. This service period begins on January 1 of the respective fiscal year and continues through the deferral date, which coincides with our bonus payments in the first quarter of the following year, and for an additional three year vesting period. The deferrals are recorded in Accrued salaries and

employee benefits within both current and non-current liabilities in the Condensed Consolidated Balance Sheets.

Third Quarter 2017 Outlook

We are currently forecasting 2017 third quarter net revenue of between \$148 million and \$158 million. Our 2017 third quarter guidance is based upon, among other things, management's assumptions for the anticipated volume of new executive search confirmations and leadership consulting and culture shaping projects, the current backlog, consultant productivity, consultant retention, the seasonality of our business and average currency rates in June 2017.

Our 2017 guidance is subject to a number of risks and uncertainties, including those discussed under Item 1A - Risk Factors in our 2016 Annual Report on Form 10-K. As such, actual results could vary from these projections.

The increase in total revenue was due primarily to the increase in revenue before reimbursements (net revenue).

Revenue before reimbursements (net revenue). Consolidated net revenue increased \$3.4 million, or 2.3%, to \$152.2 million for the three months ended June 30, 2017 from \$148.9 million for the three months ended June 30, 2016. Executive Search net revenue was \$134.5 million for the three months ended June 30, 2017, an increase of \$3.8 million compared to the three months ended June 30, 2016. Impairment charges. In 2017, the Culture Shaping business continued the transition of senior-level personnel which began in 2016, primarily due to planned retirements. The Company has experienced lower than expected consultant productivity during the transition period. Also, the marketplace for culture shaping services has become increasingly more competitive and the business experienced lengthening sales cycles and decision processes within target client organizations. These events led to a decline in the revenue performance of the business and uncertainty around the timing of improving such performance. As a result, the Company identified a triggering event and performed an interim impairment evaluation on the goodwill and intangible assets related to its Culture Shaping reporting unit during the quarter ended June 30, 2017.

Based on the results of the of the impairment evaluation, the Company determined that the goodwill and intangible assets within the Culture Shaping reporting unit were impaired, which resulted in an impairment charge of \$39.2 million to write-off all of the goodwill and intangible assets. The impairment charge is recorded within Impairment charges in the Condensed Consolidated Statements of Comprehensive Income (Loss) for the three months ended June 30, 2017.
