Item 7.01 - Regulation FD Disclosure

On March 28, 2017, AXIM Biotechnologies, Inc. issued a press release which announced that the company had entered into a Term Sheet Agreement with a U.S.-based controlled-substances API (Active Pharmaceutical Ingredient) production company to develop a dronabinol-based functional, controlled-release chewing gum product based on the company s intellectual property and technology. The new dronabinol chewing gum product will be bioequivalent to Marinol®, and used to help treat patients with chemotherapy induced nausea and vomiting and AIDS patients experiencing appetite and weight loss. Since its market introductions, Marinol® remains the only FDA approved cannabis-based drug available in the US. AXIM s patented control-release chewing gum largely bypasses the first pass metabolism in the liver and results in decreased side effects for patients.

The information set forth under this Item 7.01, including Exhibit 99.1, is being furnished and, as a result, such information shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the Exchange Act), or otherwise subject to the liabilities of such Section, nor shall such information be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such a filing.

Item 9.01 - Financial Statements and Exhibits
