Subsequent Event Market Conditions

Recent events in the financial sector have resulted in an unusually high degree of volatility in the financial markets and the net asset value of many mutual funds, including to some extent the Fund. Such events occurring subsequent to the date of this report have included, but are not limited to, the secure of the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation by U.S banking regulators, and the bankruptcy filing of Lehman Brothers, and the sales of Merrill Lynch to Bank of America, Washington Mutual to J.P. Morgan Chase, Wachovia to Wells Fargo and the U.S. Government bailout of AIG. These companies represent investment banks with which the Fund may conduct business, and/or whose securities are or may be held by the Fund. The potential investment of the Fund s investments in these issuers, and the financial sector in general, as reflected in the Fund s Schedule of Investment, exposes investors to the negative (for positive) performance resulting from these and other events.

August 31, 2008 (unaudited)

Notes to Schedule of Investments:

*

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing service.

Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security are fair valued, in good faith, pursuant to procedures established by the Board of Trustees or person acting at their discretion pursuant to procedures established by the Board of Trustees, including certain fixed income securities which may be valued with reference to securities whose prices are more readily available. The Fund s investments, including over-the-counter options, are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the last quoted mean price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Prices obtained from independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Exchange traded options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Securities purchased on a when-issued or delayed delivery basis are marked to market daily until settlement at the forward settlement value. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollar using exchange rates obtained from pricing services. As a result, the net asset value (NAV) of the Fund s shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange (NYSE) is closed and the NAV may change on days when an investor is not able to purchase or sell shares. The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold. The Fund s NAV is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the NYSE on each day the NYSE is open for business.

Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$190,210,503, representing 13.4% of total investments. Illiquid security.

These securities generally pay interest at rates which are periodically pre-determined by reference to a base lending rate plus a premium. These base lending rates are generally either the lending rate offered by one or more major European banks, such as the LIBOR or the prime rate offered by one or more major United States banks, or the certificate of deposit rate. These securities are generally considered to be restricted as the Fund is ordinarily contractually obligated to receive approval from the Agent bank and/or borrower prior to disposition. Remaining maturities of Senior Loans may be less than the stated maturities shown as a result of contractual or optional payments by the borrower. Such prepayments cannot be predicted with certainty. The interest rate disclosed reflects the rate in effect on August 31, 2008. 144A Security Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
