approves and submits to the Annual General Meeting the below Corporate Governance Report.

1. A brief presentation of the operation of the Board of Directors, and a description of the division of responsibility and duties between the Board and the executive management

Magyar Telekom's Board of Directors (Board or Board of Directors) is the Company's executive body that represents the Company towards third parties and before courts and other authorities. The Board of Directors exercises its rights and performs its obligations as an independent body.

The members of the Board of Directors shall act with due care as it is generally expected from persons in such positions and - unless it is otherwise provided in the Companies Act - must give priority to the interest of the company. The members of the Board shall be liable towards the Company pursuant to the general provisions of the civil law in case of causing damage to the Company through breaching the laws, the Articles of Associations (Articles), the resolutions of the General Meeting (General Meeting) of the Company and their managerial duties. The indemnification liability of the members of the Board towards the Company is joint and severable according to the provisions of the Civil Code on jointly causing damage. If the damage was caused by the resolution of the management as a body, those members are exempted from such liabilities who did not participate in the voting or voted against the resolution in question. The members of the Board of Directors shall bear unlimited and joint liability for those damages that arise from the announcement of false data, rights or facts to the Company Register or the late announcement of the same in addition to failing to file such announcement at all.

The Board of Directors is not an operative management body. In other words, the Board of Directors is not involved in the Company's daily business. The Board acts in all matters that do not fall in the competence of the General Meeting or other corporate bodies. Among other responsibilities, it approves the Company's strategy, business plan, major organizational changes and key transactions, concludes employment agreements with and removes the Chief Executive Officer (CEO) and Chief Officers, and determines the remuneration and target tasks on the basis of which it evaluates their performance.

For the purpose of the operative control and effective day-to-day management of the Company the Board of Directors established the Management Committee the members of which are the Chief Executive Officer, the Chief Human Resources Officer, the Chief Financial Officer (CFO), the Chief Technical Officer, the Chief Strategic and Corporate Development Officer, the Chief Operating Officer Consumer Services Business Unit and the Chief Operating Officer Business Services Business Unit. The Management Committee acts within the scope of competences assigned to it by the Board of Directors. The Management Committee reports to the Board of Directors on the operation and status of Magyar Telekom Group at each Board meeting.

Due to the fact that in line with the above, the Board of Directors delegates several competences to the Management Committee we answered No to several questions in the declaration to this Corporate Governance Report, because in these cases the Company does comply with the given recommendation but based on the decision of the Board of Directors the procedure / decision to comply with the given recommendation is within the Management Committee's scope of competence delegated to it by the Board of Directors.

The detailed rules on the tasks, competences and operation of the Management Committee are contained in the Rules of Procedure approved by the Board of Directors:

6. The presentation of the system of internal controls and the evaluation of the activity in the relevant period. Report on the efficiency and effectiveness of risk management procedures. (Information on where the report on internal controls by the Board of Directors may be viewed by shareholders.)

The presentation of the system of **internal controls**, evaluation of the activity in the relevant period.

Magyar Telekom, as a company registered in the U.S., is subject to the provisions of the Sarbanes-Oxley Act of 2002. As required by section 404 of the Sarbanes-Oxley Act, the management of Magyar Telekom is responsible for establishing and maintaining adequate internal control over financial reporting that ensures the reliability of the financial reports. Our system of internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in conformity with International Financial Reporting Standards (IFRS) as adopted by the European Union. Our internal control system is based on the method established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The management has established and regularly oversees the operation of internal controls over financial reporting that ensure the reliability of the report. The internal control system has been grouped into two levels of documentation:

- The company-level controls include the following (in line with PCAOB Audit Standard No. 5):
- controls related to the control environment
- controls over management override
- the company's risk assessment process
- controls to monitor results of operations
- controls to monitor other controls, including the activities of the internal audit function, the Audit Committee and self-assessment programs
- controls over the period-end reporting process
- policies that address significant business control and risk management practices.
- Transaction Level Controls describe the controls built into our business processes that have been designed and operated to ensure that material misstatements in each significant financial account and disclosure within the financial statements are prevented or detected in a timely manner.

The operation of the internal control system is supported by the independent internal audit function that, beyond tasks regarding the risk based internal audit work plan, contributes to the enhancement of the internal control processes and to the reduction of existing risks through ad-hoc audits. The Supervisory Board and the Audit Committee receives regular reports on the findings of the audits; measures, based on the findings and fulfillment of tasks.

In line with the criteria of the adopted internal control framework, management evaluates the effectiveness of internal control system within each financial year. Management's assessment for 2009 is still in progress, but based on the already available information, we believe that internal control system has been operating effectively to prevent material misstatements in the financial statements.

The Company discloses its report on the internal controls with regard to the reliability of financial reports in the 20-F annual report.

The management and Board of Directors of Magyar Telekom are committed to conduct all business activities of Magyar Telekom Group according to the highest legal and ethical standards. Based on this commitment the Board of Directors established the Corporate compliance program of Magyar Telekom.

The Corporate compliance program is applicable to all bodies, organizations, employees, advisors, agents, representatives as well as to all persons and organizations that work on behalf of the Company or its subsidiary.

The Corporate compliance program of Magyar Telekom ensures that the business activities of the Group are conducted with observing and in compliance with the relevant laws to the outmost extent, according to the highest standards of training and commitment. It requires the realization of guidelines and processes that manage potential compliance risks and implement specific processes in order to report, investigate, monitor and correct suspected or actual lack of compliance.

Risk management policies

Our risk management includes identification, assessment and evaluation of risks, development of necessary action plans, as well as monitoring of performance and results. For risk management to be effective, we must ensure that management take business decisions with full understanding of all relevant risks.

In 1999, we established a formal risk management system. This system has been operating in an integrated way with the risk management system of Deutsche Telekom since 2002.

All material risks related to material internal and external operations, financial and legal compliance and certain other risks are evaluated and managed by a well-defined internal mechanism. A risk management manual and an internal regulation on risk management were prepared. A risk management course was developed for employees responsible for risk management in all organizational areas. Risk items affecting our operations are reviewed quarterly throughout the group. All of our units, departments, subsidiaries and other organizations are obliged to identify and report their operational risks on a quarterly basis. After evaluation of these risks, results are reported to our management, the Board of Directors, the Disclosure Committee, the Audit Committee and to Deutsche Telekom.

Following the enactment of the Sarbanes-Oxley Act, we decided to enhance our risk management procedures. As this new law requires prompt disclosure of all risk items influencing investors' decisions, we complemented our quarterly risk reporting system with a continuous reporting procedure which requires all the organizations of the group to report on a real-time basis any new material fact, information or risk that comes to their knowledge. Information thus submitted is monitored by the risk management area and CFO is notified when a new material risk or information is identified.

There is an effective internal regulation at the Company that covers the responsibilities of each employee in risk monitoring and management. We introduced the requirements of the Sarbanes-Oxley Act, our enhanced reporting and corporate governance obligations and the enhanced risk reporting procedures to our colleagues through e-learning. The personnel scope of the training covered all employees.

7. Information on whether the auditor has carried out any activities not related to auditing

- audit related services,
- training service.

8. A detailed presentation of the company's disclosure policy, and its policy on trading by insiders

Policy in connection with the prohibition of insider trading

The shares of Magyar Telekom are traded on both the Budapest Stock Exchange and New York Stock Exchange. Therefore, the trading of Magyar Telekom securities is regulated by the Hungarian legislation and government (including the Hungarian FSA) as well as the United States legislation and government (including SEC).

With the aim of ensuring compliance with the requirements of the legal environment Magyar Telekom created its own regulation which applies to all organizations of Magyar Telekom and those affiliated companies in which Magyar Telekom has 25% or more direct or indirect ownership or voting rights.

The Hungarian securities laws and United States federal and state securities laws prohibit: (a) the direct or indirect purchase or sale of securities while in possession of inside information and (b) the disclosure of inside information to others who then trade in securities (hereinafter: tip or tipping).

The regulation defines insider information, insider trading as well as the scope of insider persons.

Edgar Filing: Magyar Telekom Plc. - Form 6-K

Magyar Telekom does encourage investment in Magyar Telekom securities by its employees and directors. However, it states some general trading guidelines as well as specific restrictions regarding the timing of trading in Magyar Telekom securities.

Trading guidelines:

- Magyar Telekom strongly recommends that all insider persons refrain from any transactions in Magyar Telekom securities other than during the period beginning on the commencement of the third (3rd) trading day following the release of quarterly or annual financial results and ending ten calendar days later (so called "window period").
- The safest period for trading in Magyar Telekom securities, assuming the absence of inside information, is generally the first few days of the window period. Periods other than window periods are more highly sensitive for transactions in Magyar Telekom securities from the perspective of compliance with applicable securities laws. However, trading in Magyar Telekom securities during a window period should not be considered a "safe harbor."
- Even after inside information is disclosed, sufficient time must pass to permit the market and outside investors to digest the information and make investment decisions before insider persons can trade in Magyar Telekom securities. Even during a window period, any person possessing inside information may not engage in any transactions in Magyar Telekom securities until the commencement of the third trading day after inside information is publicly disclosed.
- Regulatory authorities scrutinize securities trading with special attention. Consequently, before trading in Magyar Telekom securities, you should carefully consider how the authorities, in the future, might view your concluded transactions with special attention.
- Every insider person has the individual responsibility to comply with the relevant internal rules, regardless of whether Magyar Telekom has recommended a window period to that insider person or any other insider person. The guidelines set forth in Magyar Telekom's internal rules are guidelines only, and appropriate judgment should be exercised in connection with any transaction in Magyar Telekom securities.
- An insider person may, from time to time, have to forego a proposed transaction in Magyar Telekom securities even if he or she planned to make the transaction before learning of the inside information and even though the insider person believes he or she may suffer an economic loss or forego anticipated profit by waiting.

In addition to the aforementioned trading guidelines the internal rule also states that specific restriction periods, which are prescribed in the Capital Markets Act also apply to specific categories of insider persons described therein.

Magyar Telekom in its internal rules draws the attention that insider persons, in addition to being forbidden from using inside information to trade in securities for their own advantage, are also prohibited from tipping inside information to an outsider (any person other than a Magyar Telekom employee, officer or director, and includes friends, business associates, spouses or family members), who then trades on that information.

In certain cases transactions must be immediately announced to the authority or to the public by the insider person and/or by the issuer. In order to support compliance with the announcement obligations insider persons shall without delay fill in and send a form if they concluded a transaction with Magyar Telekom shares and Magyar Telekom shall file the necessary announcements and disclosures on behalf of certain insider persons.

9. A detailed demonstration of the methods of exercising shareholders' rights

The holder of each Series A Share shall be entitled to one vote at the General Meeting of the Company and to all such rights attributed to such shareholder by the Companies Act or the Articles. The owner of the security – unless the contrary is proved – shall be the person on whose account the security is registered. The transfer of registered or interim share certificates shall be effective with respect to the Company when the name of the new owner of the shares has been entered in the shareholders' register.
