Form 10-Q

August 09, 2013

[Table of Contents](#)

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2013

or

o Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 0-24649

REPUBLIC BANCORP, INC.

(Exact name of registrant as specified in its charter)

Kentucky

(State of other jurisdiction of incorporation or organization)

61-0862051

(I.R.S. Employer Identification No.)

601 West Market Street, Louisville, Kentucky

(Address of principal executive offices)

40202

(Zip Code)

(502) 584-3600

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

The number of shares outstanding of the registrant's Class A Common Stock and Class B Common Stock, as of July 31, 2013, was 18,522,139 and 2,260,095 respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2013 AND 2012 (UNAUDITED) AND DECEMBER 31, 2012

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation The consolidated financial statements include the accounts of Republic Bancorp, Inc. (the Parent Company) and its wholly-owned subsidiaries: Republic Bank & Trust Company (RB&T) and Republic Bank (RB) (collectively referred together as the Bank), and Republic Invest Co. The consolidated financial statements also include the wholly-owned subsidiaries of RB&T: Republic Financial Services, LLC, TRS RAL Funding, LLC and Republic Insurance Agency, LLC. Republic Bancorp Capital Trust (RBCT) is a Delaware statutory business trust that is a wholly-owned unconsolidated finance subsidiary of Republic Bancorp, Inc. All companies are collectively referred to as Republic or the Company. All significant intercompany balances and transactions are eliminated in consolidation.

Republic Invest Co. and its subsidiary, Republic Capital LLC, were dissolved in April 2013 in connection with the full repayment by RB&T of intragroup subordinated debentures issued by Republic Capital LLC in a 2004 intragroup trust preferred transaction.

The inactive subsidiaries of RB&T: Republic Financial Services, LLC, TRS RAL Funding, LLC and Republic Insurance Agency, LLC were dissolved in the second quarter of 2013.

In May 2013, management requested regulatory approval to merge RB&T and RB under one national bank charter. With the approved internal merger, the Bank would operate with the name Republic Bank, National Association (RBNA) with the Office of the Comptroller of the Currency (OCC) as its primary regulator. The OCC is currently the primary regulator of RB, with RB&T currently regulated by the Federal Deposit Insurance Corporation (FDIC) and the Kentucky Department of Financial Institutions (KDFI).

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, the financial statements do not include all of the information and footnotes required by U.S. generally accepted accounting principles (GAAP) for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation have been included. Operating results for the three and six months ended June 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. For further information, refer to the consolidated financial statements and footnotes thereto included in Republic s Form 10-K for the year ended December 31, 2012.

As of June 30, 2013, the Company was divided into three distinct business operating segments: Traditional Banking, Mortgage Banking and Republic Processing Group (RPG). During the second quarter of 2012, the Company realigned the previously reported Tax Refund Solutions (TRS) segment as a division of the newly formed RPG segment. Along with the TRS division, Republic Payment Solutions (RPS) and Republic Credit Solutions (RCS) also operate as divisions of the RPG segment.

Traditional Banking and Mortgage Banking (collectively Core Banking)

Republic operates 44 banking centers, primarily in the retail banking industry, and conducts its Core Banking operations predominately in metropolitan Louisville, Kentucky; Central Kentucky; Northern Kentucky; Southern Indiana; metropolitan Tampa, Florida; metropolitan Cincinnati, Ohio; metropolitan Nashville, Tennessee; metropolitan Minneapolis, Minnesota and through an Internet banking delivery channel.

Core Banking results of operations are primarily dependent upon net interest income, which represents the difference between the interest income and fees on interest-earning assets and the interest expense on interest-bearing liabilities. Principal interest-earning Core Banking assets represent investment securities and real estate, commercial and consumer loans. Interest-bearing liabilities primarily consist of interest-bearing deposit accounts, securities sold under agreements to repurchase, as well as short-term and long-term borrowing sources. In June 2011 the Bank began offering its warehouse lending product. With this product, the Bank provides short-term, revolving credit facilities to mortgage bankers across the nation. These credit facilities are secured by single family, first lien residential real estate loans.

Table of Contents

Other sources of Core Banking income include service charges on deposit accounts, debit card interchange fee income, title insurance commissions, fees charged to customers for trust services and revenue generated from Mortgage Banking activities. Mortgage Banking activities represent both the origination and sale of loans in the secondary market and the servicing of loans for others, primarily the Federal Home Loan Mortgage Corporation (Freddie Mac or FHLMC).

Core Banking operating expenses consist primarily of salaries and employee benefits, occupancy and equipment expenses, communication and transportation costs, data processing, debit card interchange expenses, marketing and development expenses, FDIC insurance expense, and various general and administrative costs. Core Banking results of operations are significantly impacted by general economic and competitive conditions, particularly changes in market interest rates, government laws and policies and actions of regulatory agencies.

Republic Processing Group

Nationally, through RB&T, RPG facilitates the receipt and payment of federal and state tax refunds under the TRS division, primarily through refund transfers (RT s). RTs are products whereby a tax refund is issued to the taxpayer after RB&T has received the refund from the federal or state government. There is no credit risk or borrowing cost for RB&T associated with these products because they are only delivered to the taxpayer upon receipt of the tax refund directly from the governmental paying authority. Fees earned on RTs, net of rebates, are the primary source of revenue for the TRS division and the RPG segment, and are reported as non-interest income under the line item Net refund transfer fees.

The TRS division historically originated and obtained a significant source of revenue from Refund Anticipation Loans (RAL s), but terminated this product effective April 30, 2012. RALs were short-term consumer loans offered to taxpayers that were secured by the customer s anticipated tax refund, which represented the source of repayment. The fees earned on RALs for the applicable reporting period in 2012 are reported as interest income under the line item Loans, including fees .

Nationally, through RB, the RPS division is an issuing bank offering general purpose reloadable prepaid debit cards through third party program managers. Nationally, through RB&T, the RCS division is preparing to pilot short-term consumer credit products on-line.

Reclassifications and recasts Certain amounts presented in prior periods have been reclassified to conform to the current period presentation. These reclassifications had no impact on previously reported prior periods net income. Additionally, as discussed in Footnote 2 2012 *Acquisitions of Failed Banks*, during the first quarter of 2013 the Bank posted adjustments to the First Commercial Bank (FCB) acquired assets in the determination of acquisition day fair values, or (day-one) fair values, which resulted in a \$1.3 million increase to the bargain purchase gain presented.

Table of Contents

2. 2012 ACQUISITIONS OF FAILED BANKS

OVERVIEW

During 2012, the Bank acquired two failed institutions in FDIC-assisted transactions. The Bank acquired certain assets and assumed certain liabilities of Tennessee Commerce Bank (TCB) during the first quarter of 2012 and First Commercial Bank (FCB) during the third quarter of 2012. The Bank did not raise capital to complete either of these acquisitions.

The Bank determined that the acquisitions of these failed banks constituted business acquisitions as defined by Accounting Standards Codification (ASC) Topic 805, *Business Combinations*. Accordingly, the assets acquired and liabilities assumed have been presented at their estimated fair values, as required. Fair values are determined over a measurement period based on the requirements of ASC Topic 820, *Fair Value Measurements and Disclosures*. The measurement period for day-one fair values begins on the acquisition date and ends the earlier of: (a) the day management believes it has all the information necessary to determine day-one fair values; or (b) one year following the acquisition date. In many cases, the determination of these day-one fair values requires management to make material estimates about discount rates, future expected cash flows, market conditions and other future events that are highly subjective in nature and subject to recast adjustments, which are retrospective adjustments to reflect new information existing at the acquisition date affecting day-one fair values. More specifically, recast adjustments for loans and other real estate owned are made as market value data, such as appraisals, are received by the Bank. Increases or decreases to day-one fair values have been reflected with a corresponding increase or decrease to goodwill or bargain purchase gain.

Tennessee Commerce Bank

On January 27, 2012, the Bank acquired specific assets and assumed substantially all of the deposits and specific other liabilities of TCB, headquartered in Franklin, Tennessee from the FDIC, as receiver for TCB, pursuant to the terms of a Purchase and Assumption Agreement (P&A) Whole Bank; All Deposits entered into among RB&T, the FDIC as receiver of TCB and the FDIC. On January 30, 2012, TCB's sole location re-opened as a division of RB&T.

The Bank acquired approximately \$221 million in notional assets from the FDIC as receiver for TCB. In addition, the Bank also recorded a receivable from the FDIC for approximately \$785 million, which represented the net difference between the assets acquired and the liabilities assumed, adjusted for the discount the Bank received for the acquisition. The FDIC paid approximately \$771 million of this receivable on January 30, 2012 with the remaining \$14 million paid on February 15, 2012.

During the first quarter of 2012, the Bank recorded an initial bargain purchase gain of \$27.9 million as a result of the TCB acquisition. The bargain purchase gain was realized because the overall price paid by the Bank was substantially less than the fair value of the TCB assets acquired and liabilities assumed in the acquisition. In the second and third quarters of 2012, the Bank posted adjustments to the acquired assets for its FDIC-assisted acquisition in the determination of day-one fair values and recorded a net decrease to the bargain purchase gain of \$285,000, as additional information relative to the day-one fair values became available.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Information obtained subsequent to January 27, 2012 and through September 30, 2012 was considered in forming TCB estimates of cash flows and collateral values as of the January 27, 2012 acquisition date, i.e., TCB's day-one fair values. Day-one fair values for TCB were considered final as of September 30, 2012, which is the date the Bank believed it had received all the information necessary to determine TCB's day-one fair values.

Table of Contents

A summary of the assets acquired and liabilities assumed in the TCB acquisition, including 2012 recast adjustments, follows:

On January 27, 2012, the Bank did not immediately acquire the TCB banking facility, including outstanding lease agreements and furniture, fixtures and equipment. During the third quarter of 2012, the Bank renegotiated a new lease with the landlord related to the sole banking facility and acquired all related data processing equipment and fixed assets totaling approximately \$573,000.

First Commercial Bank

On September 7, 2012, the Bank acquired specific assets and assumed substantially all of the liabilities of FCB, headquartered in Bloomington, Minnesota from the FDIC, as receiver for FCB, pursuant to the terms of a Purchase and Assumption Agreement – Whole Bank; All Deposits, entered into among RB&T, the FDIC as receiver of FCB and the FDIC. On September 10, 2012, FCB's sole location re-opened as a division of RB&T.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The Bank acquired approximately \$215 million in notional assets from the FDIC as receiver for FCB. In addition, the Bank also recorded a receivable from the FDIC for approximately \$64 million, which represented the net difference between the assets acquired and the liabilities assumed adjusted for the discount the Bank received for the acquisition. The FDIC paid substantially all of this receivable to the Bank on September 10, 2012.

During the third quarter of 2012, the Bank recorded an initial bargain purchase gain of \$27.1 million as a result of the FCB acquisition. The bargain purchase gain was realized because the overall price paid by the Bank was substantially less than the fair value of the FCB assets acquired and liabilities assumed in the acquisition. During the fourth quarter of 2012, the Bank posted adjustments to the acquired assets for its FDIC-assisted acquisition in the determination of day-one fair values and recorded a net increase to the bargain purchase gain of \$712,000, as additional information relative to the day-one fair values became available. During the first quarter of 2013, the Bank posted an additional increase of \$1.3 million to the bargain purchase gain.

Table of Contents

Information obtained subsequent to September 7, 2012 and through March 31, 2013 was considered in forming FCB estimates of cash flows and collateral values as of the September 7, 2012 acquisition date, i.e., FCB's day-one fair values.

While a future recast of the FCB bargain purchase gain is possible through September 7, 2013, management does not currently anticipate additional future adjustments to the FCB bargain purchase gain, as a significant amount of information was considered available to management regarding the assets and liabilities in the acquisition and a significant amount of the assets acquired were resolved in some manner through March 31, 2013. As a result, management considered the measurement period for the FCB day-one fair values to be closed as of March 31, 2013 but reserves the right to make future adjustments if material information that existed as of the acquisition date becomes available prior to September 7, 2013.

A summary of the assets acquired and liabilities assumed in the FCB acquisition, including recast adjustments, follows:

On September 7, 2012, the Bank did not immediately acquire the FCB banking facility, including outstanding lease agreements and furniture, fixtures and equipment. The Bank acquired all data processing equipment and fixed assets totaling approximately \$328,000 during the fourth quarter of 2012. During the first quarter of 2013, the Bank renegotiated a new lease with the landlord related to the sole banking facility and acquired all related data processing equipment and fixed assets totaling approximately \$233,000.

Table of Contents

FAIR VALUE METHODS ASSOCIATED WITH THE 2012 ACQUISITIONS OF FAILED BANKS

The following is a description of the methods used to determine the fair values of significant assets and liabilities at the respective acquisition dates as presented throughout:

Cash and Due from Banks and Interest-bearing Deposits in Banks The carrying amount of these assets, adjusted for any cash items deemed uncollectible by management, was determined to be a reasonable estimate of fair value based on their short-term nature.

Investment Securities Investment securities were acquired at fair value from the FDIC. The fair values provided by the FDIC were reviewed and considered reasonable based on management's understanding of the marketplace. Federal Home Loan Bank (FHLB) stock was acquired at cost, as it is not practicable to determine its fair value given restrictions on its marketability.

With the TCB acquisition, the Bank acquired \$43 million in securities at fair value. The majority of the securities acquired were subsequently sold or called during the first quarter of 2012 with the Bank realizing a net gain on the corresponding transactions of approximately \$56,000. The Bank sold these securities because management determined that the acquired securities did not fit within the Bank's traditional investment strategies.

With the FCB acquisition, the Bank acquired \$12 million in securities at fair value. The nature of these securities acquired were consistent with the Bank's existing investment portfolio and the Bank elected not to sell these securities.

Loans Fair values for loans were based on a discounted cash flow methodology that considered factors including the type of loan and related collateral, classification status, fixed or variable interest rate, term of loan and whether or not the loan was amortizing, and a discount rate reflecting current market rates for new originations of comparable loans adjusted for the risk inherent in the cash flow estimates.

Certain loans that were deemed to be collateral dependent were valued based on the fair value of the underlying collateral. These estimates were based on the most recently available real estate appraisals with certain adjustments made based on the type of property, age of appraisal, current status of the property and other related factors to estimate the current value of the collateral.

With the TCB acquisition, the Bank purchased approximately \$99 million in loans with a recasted fair value of approximately \$74 million. During 2012, the FDIC repurchased approximately \$20 million of TCB loans at a price of par less the original discount of \$3 million that the Bank received when it purchased the loans. Loans repurchased by the FDIC were valued at the contractual amount reduced by the applicable discount.

With the FCB acquisition, the Bank purchased approximately \$172 million in loans with a recasted fair value of approximately \$130 million.

Table of Contents

Core Deposit Intangible In its assumption of the deposit liabilities for the 2012 acquisitions, the Bank believed that the customer relationships associated with these deposits had intangible value, although this value was anticipated to be modest given the nature of the deposit accounts and the anticipated rapid account run-off since acquired. The Bank recorded core deposit intangible assets of \$64,000 and \$559,000 related to the TCB and FCB acquisitions. The fair value of these intangible assets were estimated based on a discounted cash flow methodology that gave appropriate consideration to type of deposit, deposit retention, cost of the deposit base and net maintenance cost attributable to customer deposits.

Other Real Estate Owned (OREO) OREO is presented at fair value, which is the estimated value that management expects to receive when the property is sold, net of related costs to sell. These estimates were based on the most recently available real estate appraisals, with certain adjustments made based on the type of property, age of appraisal, current status of the property and other related factors to estimate the current value of the property.

The Bank acquired \$14 million in OREO related to the TCB acquisition, which was initially reduced by a \$3 million fair value adjustment as of January 27, 2012. Subsequent to the first quarter, the Bank posted a net negative recast adjustment of \$1 million to OREO to mark several properties to market based on appraisals received.

The Bank acquired \$19 million in OREO related to the FCB acquisition, which was initially reduced by an \$8 million fair value adjustment as of September 7, 2012. During the fourth quarter of 2012 and the first quarter of 2013, the Bank posted net positive recast adjustments of \$289,000 and \$1.1 million to OREO to mark several properties to market based on appraisals received.

FHLB Advances The Bank acquired \$3 million in FHLB advances related to the FCB acquisition. The advances were marked to market as of the acquisition date based on early prepayment payoffs (including penalties) received from the FHLB. The Bank paid off the advances during the third quarter of 2012 at no additional loss beyond the fair value adjustment as of their date of acquisition.

Deposits The fair values used for the demand and savings deposits that comprise the acquisition accounts acquired, by definition, equal the amount payable on demand at the acquisition date. The fair values for time deposits are estimated using a discounted cash flow calculation that applies interest rates currently being offered to the interest rates embedded on such time deposits.

The Bank assumed \$947 million in deposits at estimated fair value in connection with the TCB acquisition. As permitted by the FDIC, within seven days of the acquisition date, RB&T had the option to disclose to TCB's deposit customers that it was repricing the acquired deposit portfolios. In addition, depositors had the option to withdraw funds without penalty. The Bank chose to reprice all of the acquired TCB interest-bearing deposits, including transaction, time and brokered deposits with an effective date of January 28, 2012. This re-pricing triggered significant time and brokered deposit run-off consistent with management's expectations. Through June 30, 2013, approximately 97% of the assumed TCB interest-bearing deposit account balances had exited the Bank, with no penalty on the applicable time and brokered deposits. At June 30, 2013, the Bank had \$26 million of deposits associated with TCB.

Table of Contents

The Bank assumed \$196 million in deposits at estimated fair value in connection with the FCB acquisition. The Bank chose to re-price all of the acquired FCB time deposits with an effective date of October 1, 2012. This re-pricing triggered certificate of deposit run-off consistent with management's expectations. Through June 30, 2013, approximately 81% of the assumed interest-bearing deposit account balances had exited the Bank, with no penalty on the applicable time and brokered deposits. At June 30, 2013, the Bank had \$38 million of deposits associated with the FCB acquisition.

The composition of deposits assumed at fair value as of the respective acquisition dates follows:

Table of Contents

During the three and six months ended June 30, 2013, there were no sales or calls of securities available for sale.

During the six months ended June 30, 2012, the Bank recognized net securities gains in earnings for securities available for sale as follows:

- The Bank sold six available for sale securities acquired in the TCB acquisition with an amortized cost of \$35 million, resulting in a pre-tax gain of \$53,000 during the first quarter of 2012.
- The Bank realized \$3,000 in pre-tax gains related to unamortized discount accretion on \$10 million of callable U.S. Government agencies that were called during the first quarter of 2012 before their maturity.

The tax provision related to the Bank's realized gains totaled \$0 and \$20,000 for the three and six months ended June 30, 2012, respectively.

The amortized cost and fair value of the investment securities portfolio by contractual maturity at June 30, 2013 follows. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations whether or not there are associated call or prepayment penalties. Securities not due at a single maturity date are detailed separately.

June 30, 2013 (in thousands)	Securities available for sale		Securities held to maturity	
	Amortized Cost	Fair Value	Carrying Value	Fair Value
Due in one year or less	\$ 1,007	\$ 1,007	\$	\$
Due from one year to five years	46,666	46,981	2,348	2,337
Due from five years to ten years	12,524	12,499	5,000	4,892
Due beyond ten years				
Private label mortgage backed security	5,216	5,641		
Mortgage backed securities - residential	144,733	150,055	524	567
Collateralized mortgage obligations	204,093	204,148	47,297	47,908
Total securities	\$ 414,239	\$ 420,331	\$ 55,169	\$ 55,704

Corporate Bonds

During the quarter ended June 30, 2013, the Bank purchased \$20 million in floating rate corporate bonds with an initial weighted average yield of 1.36%. The bonds, which have a weighted average life of 7 years, were rated investment grade by accredited rating agencies as of their respective purchase dates. The total fair value of the Bank's corporate bonds represented 4% of the Bank's investment portfolio as of June 30, 2013.

Mortgage backed Securities

At June 30, 2013, with the exception of the \$5.6 million private label mortgage backed security, all other mortgage backed securities held by the Bank were issued by U.S. government-sponsored entities and agencies, primarily Freddie Mac (FHLMC) and Fannie Mae (FNMA), institutions that the government has affirmed its commitment to support. At June 30, 2013 and December 31, 2012, there were gross unrealized/unrecognized losses of \$1.6 million and \$130,000 related to available for sale mortgage backed securities. Because the decline in fair value of these mortgage backed securities is attributable to changes in interest rates and illiquidity, and not credit quality, and because the Bank does not have the intent to sell these mortgage backed securities, and it is likely that it will not be required to sell the securities before their anticipated recovery, management does not consider these securities to be other-than-temporarily impaired.

At June 30, 2013 and December 31, 2012, there were no holdings of securities of any one issuer, other than the U.S. Government and its agencies, in an amount greater than 10% of stockholders' equity.

Table of ContentsMarket Loss Analysis

Securities with unrealized losses at June 30, 2013 and December 31, 2012, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, are as follows:

At June 30, 2013, the Bank's security portfolio consisted of 157 securities, 24 of which were in an unrealized loss position. At December 31, 2012, the Bank's security portfolio consisted of 153 securities, seven of which were in an unrealized loss position.

Table of Contents

Other-than-temporary impairment (OTTI)

Unrealized losses for all investment securities are reviewed to determine whether the losses are other-than-temporary. Investment securities are evaluated for OTTI on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation to determine whether a decline in their value below amortized cost is other-than-temporary. In conducting this assessment, the Bank evaluates a number of factors including, but not limited to:

- The length of time and the extent to which fair value has been less than the amortized cost basis;
- The Bank's intent to hold until maturity or sell the debt security prior to maturity;
- An analysis of whether it is more likely than not that the Bank will be required to sell the debt security before its anticipated recovery;
- Adverse conditions specifically related to the security, an industry, or a geographic area;
- The historical and implied volatility of the fair value of the security;
- The payment structure of the security and the likelihood of the issuer being able to make payments;
- Failure of the issuer to make scheduled interest or principal payments;
- Any rating changes by a rating agency; and
- Recoveries or additional decline in fair value subsequent to the balance sheet date.

The term other-than-temporary is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value are not necessarily favorable, or that there is a general lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized for the anticipated credit losses.

The Bank owns one private label mortgage backed security with a total carrying value of \$5.6 million at June 30, 2013. This security, with an average remaining life currently estimated at four years, is mostly backed by Alternative A first lien mortgage loans, but also has an insurance wrap or guarantee as an added layer of protection to the security holder. This asset is illiquid, and as such, the Bank determined it to be a Level 3 security in accordance with ASC Topic 820, *Fair Value Measurements and Disclosures*. Based on this determination, the Bank utilized an income valuation model (present value model) approach, in determining the fair value of the security. This approach is beneficial for positions that are not traded in active markets or are subject to transfer restrictions, and/or where valuations are adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used. Management's best estimate consists of both internal and external support for this investment.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

See additional discussion regarding the Bank's private label mortgage backed security under Footnote 7 Fair Value in this section of the filing.

Pledged Investment Securities

Investment securities pledged to secure public deposits, securities sold under agreements to repurchase and securities held for other purposes, as required or permitted by law are as follows:

(in thousands)	June 30, 2013		December 31, 2012	
Carrying amount	\$	184,001	\$	334,560
Fair value		184,480		334,843

Table of Contents**4. LOANS AND ALLOWANCE FOR LOAN LOSSES**

2012 Acquisitions of Failed Banks

The contractual amount of the loans purchased in the TCB transaction decreased from \$79 million as of the acquisition date to \$34 million as of June 30, 2013. The carrying value of the loans purchased in the TCB transaction was \$57 million as of the acquisition date compared to \$27 million as of June 30, 2013.

The contractual amount of the loans purchased in the FCB transaction decreased from \$172 million as of the acquisition date to \$109 million as of June 30, 2013. The carrying value of the loans purchased in the FCB transaction was \$130 million as of the acquisition date compared to \$84 million as of June 30, 2013.

The composition of TCB and FCB loans outstanding at June 30, 2013 and December 31, 2012 follows:

June 30, 2013 (in thousands)	Tennessee Commerce Bank	First Commercial Bank	Total Acquired Banks

Total rated loans	\$ 1,053,396	\$ 48,458	\$ 36,304	\$	\$ 87,033	\$ 1,160	\$ 1,226,351

* - *Purchased Credit Impaired loans - Group 1 (PCI-1) are performing in accordance with management's day-one performance expectations and are considered equivalent to the Bank's Special Mention/Watch classification.*

** - *Purchased Credit Impaired loans - Group 2 (PCI-2) represent former PCI-1 loans downgraded subsequent to day-one. PCI-2 loans are generally considered impaired and could require loan loss provisions.*

*** - *The above tables exclude all non-classified residential real estate and consumer loans at the respective period ends. The tables also exclude most non-classified small commercial and commercial real estate relationships totaling \$100,000 or less. These loans are not rated since they are accruing interest and not past due 80 days or more.*

Provision for loan losses - Traditional Banking	1,045	831	1,019	3,962
Provision for loan losses - Refund Anticipation Loans	(140)	(365)	(739)	7,674
Total provision for loan losses	905	466	280	11,636
Allowance for loan losses at end of period	\$ 22,491	\$ 22,510	\$ 22,491	\$ 22,510

The Bank's allowance calculation has historically included specific allowance allocations for qualitative factors such as:

- Changes in nature, volume and seasoning of the loan portfolio;
- Changes in experience, ability and depth of lending management and other relevant staff;
- Changes in the quality of the Bank's loan review system;
- Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;
- Changes in the volume and severity of past due, non-accrual and classified loans;

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

- Changes in the value of underlying collateral for collateral-dependent loans;
- Changes in international, national, regional, and local economic and business conditions and developments that affect the collectibility of the loan portfolio, including the condition of various market segments;
- The existence and effect of any concentrations of credit, and changes in the level of such concentrations; and
- The effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the institution's existing portfolio.

Table of Contents**Non-performing Loans and Non-performing Assets**

Detail of non-performing loans and non-performing assets follows:

(dollars in thousands)	June 30, 2013	December 31, 2012
Loans on non-accrual status(1)	\$ 21,922	\$ 18,506
Loans past due 90 days-or-more and still on accrual(2)	2,159	3,173
Total non-performing loans	24,081	21,679
Other real estate owned	15,248	26,203
Total non-performing assets	\$ 39,329	\$ 47,882

Credit Quality Ratios:

Non-performing loans to total loans	0.92%	0.82%
Non-performing assets to total loans (including OREO)	1.49%	1.79%
Non-performing assets to total assets	1.19%	1.41%

(1) Loans on non-accrual status include impaired loans.

(2) All loans 90 days past due and still accruing are PCI loans accounted for under ASC 310-30.

Non-performing loans and non-performing asset balances related to the 2012 acquisitions, and included in the tables above at June 30, 2013 and December 31, 2012, are presented below:

June 30, 2013 (dollars in thousands)	Tennessee Commerce Bank	First Commercial Bank	Total Acquired Banks
Loans on non-accrual status(1)	\$ 21	\$	\$ 21
Loans past due 90 days-or-more and still on accrual(2)	250	1,909	2,159
Total non-performing loans	271	1,909	2,180
Other real estate owned	590	5,523	6,113
Total non-performing assets	\$ 861	\$ 7,432	\$ 8,293

Credit Quality Ratios - Acquired Banks:

Non-performing loans to total loans	1.95%
Non-performing assets to total loans (including OREO)	7.04%
Non-performing assets to total assets	7.04%

- (1) *Loans on non-accrual status include impaired loans.*
- (2) *All loans 90 days past due and still accruing are PCI loans accounted for under ASC 310-30.*

Table of Contents

December 31, 2012 (dollars in thousands)	Tennessee Commerce Bank	First Commercial Bank	Total Acquired Banks
Loans on non-accrual status	\$	\$	\$
Loans past due 90-days-or-more and still on accrual	801	2,372	3,173
Total non-performing loans	801	2,372	3,173
Other real estate owned	2,100	12,398	14,498
Total non-performing assets	\$ 2,901	\$ 14,770	\$ 17,671

Credit Quality Ratios - Acquired Banks:

Non-performing loans to total loans	2.29%
Non-performing assets to total loans (including OREO)	11.54%
Non-performing assets to total assets	8.73%

See additional discussion regarding the TCB and FCB acquisitions under Footnote 2 2012 Acquisitions of Failed Banks in this section of the filing.

The following table presents the recorded investment in non-accrual loans and loans past due over 90 days still on accrual by class of loans:

(in thousands)	Non-Accrual Loans		Loans Past Due 90-Days-or-More and Still Accruing Interest	
	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012
Residential real estate:				
Owner occupied	\$ 8,757	\$ 9,298	\$ 111	\$ 730
Non owner occupied	2,361	1,376		
Commercial real estate	8,742	3,756	441	712
Commercial real estate - purchased whole loans				
Real estate construction	468	1,777		531
Commercial	323	334	1,607	1,200
Warehouse lines of credit				
Home equity	1,148	1,868		
Consumer:				
Credit cards				
Overdrafts				
Other consumer	123	97		
Total	\$ 21,922	\$ 18,506	\$ 2,159	\$ 3,173

Non-accrual loans and loans past due 90-days-or-more and still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans. Non-accrual loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and held current for six consecutive months and future payments are reasonably assured. TDRs on non-accrual are reviewed for return to accrual status on an individual basis, with additional consideration given to the modification terms. Loans 90-days-or-more past due and still on accrual are generally only PCI loans accounted for under Accounting Standards Codification (ASC) Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*.

* - All loans greater than 90 days past due or more, excluding purchased credit impaired loans, as of June 30, 2013 and December 31, 2012 were on non-accrual status.

See additional discussion regarding the TCB and FCB acquisitions under Footnote 2 2012 Acquisitions of Failed Banks in this section of the filing.

Table of Contents**Impaired Loans**

The Bank defines impaired loans as follows:

- All loans internally classified as Substandard, Doubtful or Loss;
- All loans on non-accrual status and loans past due over 90 days still on accrual;
- All retail and commercial troubled debt restructurings (TDRs). TDRs are loans for which the terms have been modified resulting in a concession, and for which the borrower is experiencing financial difficulties;
- All loans classified as PCI-2; and
- Any other situation where the collection of total amount due for a loan is improbable or otherwise meets the definition of impaired.

Information regarding the Bank's impaired loans follows:

(in thousands)	June 30, 2013	December 31, 2012
Loans with no allocated allowance for loan losses	\$ 40,312	\$ 36,325
Loans with allocated allowance for loan losses	69,672	69,382
Total impaired loans	\$ 109,984	\$ 105,707
Amount of the allowance for loan losses allocated	\$ 6,040	\$ 8,531

Approximately \$27 million, or 25%, of impaired loans at June 30, 2013 were loans acquired in the Bank's 2012 acquisitions. Substantially all of these loans became classified as impaired through a modification of the original loan, which the Bank deemed to be a TDR. *See additional discussion regarding the TCB and FCB acquisitions under Footnote 2 2012 Acquisitions of Failed Banks in this section of the filing.*

Table of Contents

The following tables present the balance in the allowance for loan losses and the recorded investment in loans by portfolio class based on impairment method as of June 30, 2013 and December 31, 2012:

Table of Contents**Troubled Debt Restructurings**

A TDR is the situation where, due to a borrower's financial difficulties, the Bank grants a concession to the borrower that the Bank would not otherwise have considered. In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Bank's internal underwriting policy.

All TDRs are considered Impaired loans, including loans acquired in acquisitions of failed banks and subsequently restructured. The majority of the Bank's commercial related and construction TDRs involve a restructuring of loan terms such as a reduction in the payment amount to require only interest and escrow (if required) and/or extending the maturity date of the loan. The substantial majority of the Bank's residential real estate TDRs involve reducing the client's loan payment through a rate reduction for a set period of time based on the borrower's ability to service the modified loan payment.

Management determines whether to classify a TDR as non-performing based on its accrual status prior to modification. Non-accrual loans modified as TDRs remain on non-accrual status and continue to be reported as non-performing loans for a minimum of six months. Accruing loans modified as TDRs are evaluated for non-accrual status based on a current evaluation of the borrower's financial condition and ability and willingness to service the modified debt. At June 30, 2013 and December 31, 2012, \$14 million and \$17 million of TDRs were also non-accrual loans.

Detail of TDRs differentiated by loan type and accrual status follows:

June 30, 2013 (in thousands)	Troubled Debt Restructurings on Non-Accrual Status	Troubled Debt Restructurings on Accrual Status	Total Troubled Debt Restructurings
Residential real estate	\$ 6,757	\$ 37,869	\$ 44,626

Total residential TDRs	36,125	8,501	44,626
Commercial related and construction loans:			
Interest only payments	616		616
Rate reduction	17,152	6,691	23,843
Principal deferral	25,326	491	25,817
Bankruptcies		233	233
Total commercial TDRs	43,094	7,415	50,509
Total troubled debt restructurings	\$ 79,219	\$ 15,916	\$ 95,135
December 31, 2012 (in thousands)	Troubled Debt Restructurings Performing to Modified Terms	Troubled Debt Restructurings Not Performing to Modified Terms	Total Troubled Debt Restructurings
Residential real estate loans (including home equity loans):			
Interest only payments	\$ 813	\$ 624	\$ 1,437
Rate reduction	24,779	4,004	28,783
Principal deferral	8,634	2,230	10,864
Bankruptcies	2,224	1,093	3,317
Total residential TDRs	36,450	7,951	44,401
Commercial related and construction loans:			
Interest only payments	689	1,742	2,431
Rate reduction	22,918	2,966	25,884
Principal deferral	19,841	194	20,035
Bankruptcies		252	252
Total commercial TDRs	43,448	5,154	48,602
Total troubled debt restructurings	\$ 79,898	\$ 13,105	\$ 93,003

As of June 30, 2013 and December 31, 2012, 83% and 86% of the Bank's TDRs were performing according to their modified terms. The Bank had provided \$5 million and \$7 million of specific reserve allocations to customers whose loan terms have been modified in TDRs as of June 30, 2013 and December 31, 2012. Specific reserve allocations are generally assessed prior to loans being modified as a TDR, as most of these loans migrate from the Bank's internal watch list and have been specifically provided for or reserved for as part of the Bank's normal loan loss provisioning methodology. The Bank had no commitments to lend any additional material amounts to its existing TDR relationships at June 30, 2013 and December 31, 2012.

Table of Contents

A summary of the categories of TDR loan modifications that occurred during the six months ended June 30, 2013 follows:

June 30, 2013 (in thousands)	Troubled Debt Restructurings Performing to Modified Terms	Troubled Debt Restructurings Not Performing to Modified Terms	Total Troubled Debt Restructurings
Residential real estate loans (including home equity loans):			
Interest only	\$ 64	\$ 64	\$ 64
Rate reduction	1,758	641	2,399
Principal deferral	460	293	753
Bankruptcies	2,885	1,243	4,128
Total residential TDRs	5,167	2,177	7,344
Commercial related and construction loans:			
Interest only	141		141
Principal deferral	8,339		8,339
Total commercial TDRs	8,480		8,480
Total troubled debt restructurings	\$ 13,647	\$ 2,177	\$ 15,824

The table above is inclusive of loans which were TDRs at the end of the previous year and were re-modified during the current year.

As of June 30, 2013, 86% of the Bank's TDRs that occurred during 2013 were performing according to their modified terms. The Bank has provided \$869,000 in specific reserve allocations to customers whose loan terms were modified in TDRs during 2013. As stated above, specific reserves are generally assessed prior to loans being modified as a TDR, as most of these loans migrate from the Bank's internal watch list and have been specifically reserved for as part of the Bank's normal reserving methodology.

There was no change between the pre and post modification loan balances at June 30, 2013 and December 31, 2012.

Table of Contents

The following table presents loans by class modified as troubled debt restructurings within the past twelve months for which there was a subsequent payment default:

6. FEDERAL HOME LOAN BANK (FHLB) ADVANCES

At June 30, 2013 and December 31, 2012, FHLB advances were as follows:

(dollars in thousands)	June 30, 2013	December 31, 2012
Fixed interest rate advances with a weighted average interest rate of 2.17% due through 2023	\$ 492,044	\$ 442,600
Putable fixed interest rate advances with a weighted average interest rate of 4.39% due through 2017(1)	100,000	100,000
Total FHLB advances	\$ 592,044	\$ 542,600

(1) - Represents putable advances with the FHLB. These advances have original fixed rate periods ranging from one to five years with original maturities ranging from three to ten years if not put back to the Bank earlier by the FHLB. At the end of their respective fixed rate periods and on a quarterly basis thereafter, the FHLB has the right to require payoff of the advances by the Bank at no penalty. Based on market conditions at this time, the Bank does not believe that any of its putable advances are likely to be put back to the Bank in the short-term by the FHLB.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Each FHLB advance is payable at its maturity date, with a prepayment penalty for fixed rate advances that are paid off earlier than maturity. FHLB advances are collateralized by a blanket pledge of eligible real estate loans. At June 30, 2013, Republic had available collateral to borrow an additional \$316 million from the FHLB. In addition to its borrowing line with the FHLB, Republic also had unsecured lines of credit totaling \$196 million available through various other financial institutions.

Table of Contents

Aggregate future principal payments on FHLB advances, based on contractual maturity dates are detailed below:

Year	(in thousands)	
2013	\$	35,000
2014		178,000
2015		25,000
2016		82,000
2017		125,000
Thereafter		147,044
Total	\$	592,044

The following table illustrates real estate loans pledged to collateralize advances and letters of credit with the FHLB:

(in thousands)	June 30, 2013	December 31, 2012
First lien, single family residential real estate	\$ 1,122,223	\$ 1,053,946
Home equity lines of credit	107,157	116,043
Multi-family commercial real estate	9,085	11,695

Table of Contents

7. FAIR VALUE

Fair value represents the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Bank used the following methods and significant assumptions to estimate the fair value of each type of financial instrument:

Securities available for sale: For all securities available for sale, excluding the Bank's private label mortgage backed security, fair value is typically determined by matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities, but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs). With the exception of the private label mortgage backed security, all securities available for sale are classified as Level 2 in the fair value hierarchy.

The Bank's private label mortgage backed security remains extremely illiquid, and as such, the Bank classifies this security as a Level 3 security in accordance with ASC Topic 820, *Fair Value Measurements and Disclosures*. Based on this determination, the Bank utilized an income valuation model (present value model) approach, in determining the fair value of this security.

Mortgage loans held for sale: The fair value of mortgage loans held for sale is determined using quoted secondary market prices. Mortgage loans held for sale are classified as Level 2 in the fair value hierarchy.

Derivative instruments: Mortgage Banking derivatives used in the ordinary course of business primarily consist of mandatory forward sales contracts (forward contracts) and rate lock loan commitments. The fair value of the Bank's derivative instruments is primarily measured by obtaining pricing from broker-dealers recognized to be market participants. The pricing is derived from market observable inputs that can generally be verified and do not typically involve significant judgment by the Bank. Forward contracts and rate lock loan commitments are

classified as Level 2 in the fair value hierarchy.

Impaired Loans: At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value generally receive specific allocations of the allowance for loan losses for anticipated selling costs of the underlying collateral. For collateral dependent loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 fair value classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

Table of Contents

Other Real Estate Owned: Assets acquired through or instead of loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Appraisals for both collateral-dependent impaired loans and other real estate owned are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Bank. Once the appraisal is received, a member of the Bank's Credit Administration Department reviews the assumptions and approaches utilized in the appraisal, as well as the overall resulting fair value in comparison with independent data sources, such as recent market data or industry-wide statistics. On an annual basis, the Bank compares the actual selling price of collateral that has been sold to the most recent appraised value to determine what additional adjustment, if any, should be made to the appraisal value to arrive at an estimated fair value.

Mortgage Servicing Rights: On a monthly basis, mortgage servicing rights are evaluated for impairment based upon the fair value of the rights as compared to carrying amount. If the carrying amount of an individual tranche exceeds fair value, impairment is recorded on that tranche so that the servicing asset is carried at fair value. The valuation model utilizes assumptions that market participants would use in estimating future net servicing income and that can generally be validated against available market data (Level 2).

Table of Contents

Assets and liabilities measured at fair value on a **recurring basis**, including financial assets and liabilities for which the Bank has elected the fair value option, are summarized below:

(in thousands)	Fair Value Measurements at June 30, 2013 Using:				Total Fair Value		
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

	\$	\$	47	\$	\$	47	
Rate lock loan commitments							
			833			833	
Mortgage loans held for sale							
			10,614			10,614	

There were no transfers into or out of Level 1, 2 or 3 assets during the three and six months ended June 30, 2013 and 2012. All transfers between levels, if applicable, would be generally recognized at the end of each quarter.

Table of Contents

The table below presents a reconciliation of the Bank's private label mortgage backed security. This is the only asset that was measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the periods ended June 30, 2013 and 2012:

(in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Balance, beginning of period	\$ 5,688	\$ 4,520	\$ 5,687	\$ 4,542
Total gains or losses included in earnings:				
Net change in unrealized gain/(loss)	238	59	422	37
Principal paydowns	(285)		(468)	
Balance, end of period	\$ 5,641	\$ 4,579	\$ 5,641	\$ 4,579

The Bank's single private label mortgage backed security is supported by analysis prepared by an independent third party. The third party's approach to determining fair value involved the following steps: 1) detailed collateral analysis of the underlying mortgages, including consideration of geographic location, original loan-to-value and the weighted average Fair Isaac Corporation (FICO) score of the borrowers; 2) collateral performance projections for each pool of mortgages underlying the security (probability of default, severity of default, and prepayment probabilities) and 3) discounted cash flow modeling.

There were no transfers into or out of Level 3 assets during the three and six months ended June 30, 2013 and 2012.

See Footnote 3 Investment Securities for additional detail regarding the private label mortgage backed security in this section of the filing.

The following table presents quantitative information about recurring Level 3 fair value measurements at June 30, 2013 and December 31, 2012:

June 30, 2013 (dollars in thousands)	Fair Value	Valuation Technique	Unobservable Inputs	Range
Private label mortgage backed security	\$ 5,641	Discounted cash flow	Constant prepayment rate	0.5% - 7%
			Probability of default	3% - 6.50%
			Loss severity	60% - 85%
December 31, 2012 (dollars in thousands)	Fair Value	Valuation Technique	Unobservable Inputs	Range
Private label mortgage backed security	\$ 5,687	Discounted cash flow	Constant prepayment rate	1% - 6%
			Probability of default	3.50% - 7%

Loss severity

60% - 70%

The significant unobservable inputs in the fair value measurement of the Bank's single private label mortgage backed security are prepayment rates, probability of default and loss severity in the event of default. Significant fluctuations in any of those inputs in isolation would result in a significantly lower/higher fair value measurement.

Table of Contents

Assets measured at fair value on a **non-recurring basis** are summarized below:

(in thousands)	Fair Value Measurements at June 30, 2013 Using:				Total Fair Value
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

* - Impaired loan balances exclude TDRs measured for impairment using the present value of future cash flows.

** - Mortgage Servicing Rights at fair value only include those tranches which were considered impaired at the reported period end.

Table of Contents

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a **non-recurring basis** at June 30, 2013 and December 31, 2012:

June 30, 2013 (dollars in thousands)	Fair Value	Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Impaired loans - commercial real estate	\$ 7,127	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	13% - 22% (17%)
Impaired loans - residential real estate	\$ 1,005	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	10% - 76% (14%)
Impaired loans - commercial	\$ 49	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	12% (12%)
Other real estate owned - residential	\$ 153	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	13% - 60% (35%)
Other real estate owned - commercial real estate	\$ 260	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	4% (4%)
Other real estate owned - real estate construction	\$ 635	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	26% - 47% (39%)
	\$ 4,273	Income approach	Adjustments for differences between net operating income expectations	14% (14%)

Table of Contents

December 31, 2012 (dollars in thousands)	Fair Value	Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Impaired loans - commercial real estate	\$ 15,230	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	0% - 50% (18%)
	\$ 1,940	Income approach	Adjustments for differences between net operating income expectations	12% - 12% (12%)
Impaired loans - residential real estate	\$ 2,873	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	2% - 60% (17%)
Impaired loans - commercial	\$ 182	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	0% - 50% (44%)
Other real estate owned - residential	\$ 1,195	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	4% - 71% (14%)
Other real estate owned - commercial real estate	\$ 1,219	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	1% - 33% (16%)
Other real estate owned - real estate construction	\$ 663	Sales comparison approach	Adjustments determined by Management for differences between the comparable sales	1% - 54% (35%)
	\$ 4,498	Income approach	Adjustments for differences between net operating income expectations	25% - 25% (25%)

The following section details impairment charges recognized during the period:

Investment Securities

During 2013 and 2012, the Bank did not realize any further impairment losses related to its single Level 3 private label mortgage backed security. See Footnote 3 *Investment Securities* for additional detail regarding the private label mortgage backed security in this section of the filing.

Table of Contents**Impaired Loans**

Collateral dependent impaired loans are measured for impairment using the fair market value for reasonable disposition of the underlying collateral. The Bank's practice is to obtain new or updated appraisals on the loans subject to the initial impairment review and then to evaluate the need for an update to this value on an as necessary or possibly annual basis thereafter (depending on the market conditions impacting the value of the collateral). The Bank will discount the appraisal amount, as necessary for selling costs and past due real estate taxes. If a new or updated appraisal is not available at the time of a loan's impairment review, the Bank may apply a discount to the existing value of an old appraisal to reflect the property's current estimated value if it is believed to have deteriorated in either: (i) the physical or economic aspects of the subject property or (ii) material changes in market conditions. The review may result in an increase in the allowance for loan loss or in a partial charge-off of the loan. Impaired loans that are collateral dependent are classified within Level 3 of the fair value hierarchy when impairment is determined using this fair value method.

Impaired loans, which are measured for impairment using the fair value of the collateral for collateral dependent loans are as follows:

(in thousands)	June 30, 2013		December 31, 2012	
Carrying amount of loans measured at fair value	\$	8,181	\$	23,070
Estimated selling costs considered in carrying amount		1,114		1,839
Valuation allowance		(1,114)		(4,684)
Total fair value	\$	8,181	\$	20,225

Other Real Estate Owned

Other real estate owned, which is carried at the lower of cost or fair value, is periodically assessed for impairment based on fair value at the reporting date. Fair value is determined from external appraisals using judgments and estimates of external professionals. Many of these inputs are not observable and, accordingly, these measurements are classified as Level 3. The fair value of the Bank's individual other real estate owned properties exceeded their carrying value at June 30, 2013 and December 31, 2012.

Details of other real estate owned carrying value and write downs follows:

(in thousands)	June 30, 2013		December 31, 2012	
Carrying value of other real estate owned	\$	15,248	\$	26,203

(in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Other real estate owned write-downs	\$	518	\$	115
			\$	884
			\$	341

Table of Contents**Mortgage Servicing Rights**

MSRs are carried at lower of cost or fair value with fair value determined by MSR tranche. One of 23 tranches was carried at fair value at June 30, 2013. Nine of 21 tranches were carried at fair value at December 31, 2012. Details of the tranches carried at fair value follow:

(in thousands)	June 30, 2013		December 31, 2012	
Outstanding balance	\$	716	\$	3,829
Valuation allowance		(33)		(345)
Fair value	\$	683	\$	3,484

(in thousands)	Three Months Ended June 30,			Six Months Ended June 30,				
	2013	2012	2013	2012	2012	2012		
Charge (credit) to mortgage banking income due to impairment evaluation	\$	(160)	\$	(42)	\$	(312)	\$	(31)

Mortgage Loans Held for Sale

The Bank has elected the fair value option for mortgage loans held for sale. These loans are intended for sale and the Bank believes that the fair value is the best indicator of the resolution of these loans. Interest income is recorded based on the contractual terms of the loan and in accordance with Bank policy for such instruments. None of these loans were 90 days or more past due nor on nonaccrual as of June 30, 2013 and December 30, 2012.

As of June 30, 2013 and December 31, 2012, the aggregate fair value, contractual balance (including accrued interest), and gain or loss was as follows:

(in thousands)	June 30, 2013		December 31, 2012	
Aggregate fair value	\$	24,174	\$	10,614
Contractual balance		23,710		10,037
Gain		464		577

The total amount of gains and losses from changes in fair value included in earnings for the three and six months ended June 30, 2013 and 2012 for mortgage loans held for sale are presented in the following table:

Three Months Ended June 30,	Six Months Ended June 30,

Table of Contents

Fair value estimates are based on existing on and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of the Bank's estimates.

The assumptions used in the estimation of the fair value of the Company's financial instruments are explained below. Where quoted market prices are not available, fair values are based on estimates using discounted cash flow and other valuation techniques. Discounted cash flows can be significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. The following fair value estimates cannot be substantiated by comparison to independent markets and should not be considered representative of the liquidation value of the Company's financial instruments, but rather a good-faith estimate of the fair value of financial instruments held by the Company. Certain financial instruments and all nonfinancial instruments are excluded from disclosure requirements.

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

Cash and cash equivalents The carrying amounts of cash and short-term instruments approximate fair values and are classified as Level 1.

Mortgage loans held for sale The fair value of loans held for sale is estimated based upon binding contracts and quotes from third party investors resulting in a Level 2 classification.

Loans, net of allowance for loan losses The fair value of loans is calculated using discounted cash flows by loan type resulting in a Level 3 classification. The discount rate used to determine the present value of the loan portfolio is an estimated market rate that reflects the credit and interest rate risk inherent in the loan portfolio without considering widening credit spreads due to market illiquidity. The estimated maturity is based on the Bank's historical experience with repayments adjusted to estimate the effect of current market conditions. The allowance for loan losses is considered a reasonable discount for credit risk. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

Federal Home Loan Bank stock It is not practical to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Accrued interest receivable/payable The carrying amounts of accrued interest, due to their short-term nature, approximates fair value resulting in a Level 2 classification.

Deposits Fair values for certificates of deposit have been determined using discounted cash flows. The discount rate used is based on estimated market rates for deposits of similar remaining maturities and are classified as Level 2. The carrying amounts of all other deposits, due to their short-term nature, approximate their fair values and are also classified as Level 2.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Securities sold under agreements to repurchase The carrying amount for securities sold under agreements to repurchase generally maturing within ninety days approximates its fair value resulting in a Level 2 classification.

Federal Home Loan Bank advances The fair value of the FHLB advances is obtained from the FHLB and is calculated by discounting contractual cash flows using an estimated interest rate based on the current rates available to the Company for debt of similar remaining maturities and collateral terms resulting in a Level 2 classification.

Subordinated note The fair value for subordinated debentures is calculated using discounted cash flows based upon current market spreads to LIBOR for debt of similar remaining maturities and collateral terms resulting in a Level 2 classification.

The fair value estimates presented herein are based on pertinent information available to management as of the respective period ends. Although management is not aware of any factors that would dramatically affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date and, therefore, estimates of fair value may differ significantly from the amounts presented.

Table of Contents**8. MORTGAGE BANKING ACTIVITIES**

Activity for mortgage loans held for sale was as follows:

June 30, (in thousands)	2013		2012	
Balance, January 1	\$	10,614	\$	4,392
Origination of mortgage loans held for sale		208,094		100,418
Proceeds from the sale of mortgage loans held for sale		(199,942)		(104,439)
Net gain on sale of mortgage loans held for sale		5,408		3,722
Balance, June 30	\$	24,174	\$	4,093

Mortgage Banking activities primarily include residential mortgage originations and servicing. The following table presents the components of Mortgage Banking income:

(in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net gain realized on sale of mortgage loans held for sale	\$ 3,439	\$ 1,642	\$ 5,677	\$ 3,185
Net change in fair value recognized on loans held for sale	(247)	(5)	(113)	52
Net change in fair value recognized on rate lock commitments	(1,521)	579	(388)	523
Net change in fair value recognized on forward contracts	453	(182)	232	(38)
Net gain recognized	2,124	2,034	5,408	3,722
Loan servicing income	546	599	1,092	1,235
Amortization of mortgage servicing rights	(650)	(712)	(1,358)	(1,671)
Change in mortgage servicing rights valuation allowance	160	42	312	31
Net servicing income recognized	56	(71)	46	(405)
Total Mortgage Banking income	\$ 2,180	\$ 1,963	\$ 5,454	\$ 3,317

Activity for capitalized mortgage servicing rights was as follows:

June 30, (in thousands)	2013		2012	
Balance, January 1	\$	4,777	\$	6,087
Additions		1,574		904

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Amortized to expense		(1,358)		(1,671)
Change in valuation allowance		312		31
Balance, June 30	\$	5,305	\$	5,351

Table of Contents

Activity for the valuation allowance for capitalized mortgage servicing rights was as follows:

June 30, (in thousands)	2013	2012
Balance, January 1	\$ (345)	\$ (203)
Additions		(11)
Reductions credited to operations	312	42
Balance, June 30	\$ (33)	\$ (172)

Other information relating to mortgage servicing rights follows:

(dollars in thousands)	June 30, 2013	December 31, 2012
Fair value of mortgage servicing rights portfolio	\$ 6,861	\$ 5,446
Prepayment speed range	123% - 550%	112% - 550%
Discount rate	9%	9%
Weighted average default rate	1.50%	1.50%
Weighted average life in years	5.51	3.89

Mortgage Banking derivatives used in the ordinary course of business primarily consist of mandatory forward sales contracts and rate lock loan commitments. Mandatory forward contracts represent future commitments to deliver loans at a specified price and date and are used to manage interest rate risk on loan commitments and mortgage loans held for sale. Rate lock loan commitments represent commitments to fund loans at a specific rate. These derivatives involve underlying items, such as interest rates, and are designed to transfer risk. Substantially all of these instruments expire within 90 days from the date of issuance. Notional amounts are amounts on which calculations and payments are based, but which do not represent credit exposure, as credit exposure is limited to the amounts required to be received or paid.

Mandatory forward contracts also contain an element of risk in that the counterparties may be unable to meet the terms of such agreements. In the event the counterparties fail to deliver commitments or are unable to fulfill their obligations, the Bank could potentially incur significant additional costs by replacing the positions at then current market rates. The Bank manages its risk of exposure by limiting counterparties to those banks and institutions deemed appropriate by management and the Board of Directors. The Bank does not expect any counterparty to default on their obligations and therefore, the Bank does not expect to incur any cost related to counterparty default.

The Bank is exposed to interest rate risk on loans held for sale and rate lock loan commitments. As market interest rates fluctuate, the fair value of mortgage loans held for sale and rate lock commitments will decline or increase. To offset this interest rate risk, the Bank enters into derivatives such as mandatory forward contracts to sell loans. The fair value of these mandatory forward contracts will fluctuate as market interest rates fluctuate, and the change in the value of these instruments is expected to largely, though not entirely, offset the change in fair value of loans held for sale and rate lock commitments. The objective of this activity is to minimize the exposure to losses on rate loan lock commitments and loans held for sale due to market interest rate fluctuations. The net effect of derivatives on earnings will depend on risk management activities and a variety of other factors, including market interest rate volatility, the amount of rate lock commitments that close, the ability to fill the forward contracts before expiration, and the time period required to close and sell loans.

Table of Contents

The following table includes the notional amounts and fair values of mortgage loans held for sale and mortgage banking derivatives as of the period ends presented:

(in thousands)	June 30, 2013		December 31, 2012	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Included in Mortgage loans held for sale:				
Mortgage loans held for sale	\$ 23,710	\$ 24,174	\$ 10,037	\$ 10,614
Included in other assets:				
Rate lock loan commitments	\$ 70,447	\$ 446	\$ 48,308	\$ 833
Mandatory forward contracts	44,247	279	36,675	47
Total included in other assets	\$ 114,694	\$ 725	\$ 84,983	\$ 880

Table of Contents**9. OFF BALANCE SHEET RISKS, COMMITMENTS AND CONTINGENT LIABILITIES**

The Bank, in the normal course of business, is party to financial instruments with off balance sheet risk. These financial instruments primarily include commitments to extend credit and standby letters of credit. The contract or notional amounts of these instruments reflect the potential future obligations of the Bank pursuant to those financial instruments. Creditworthiness for all instruments is evaluated on a case by case basis in accordance with the Bank's credit policies. Collateral from the customer may be required based on the Bank's credit evaluation of the customer and may include business assets of commercial customers, as well as personal property and real estate of individual customers or guarantors.

The Bank also extends binding commitments to customers and prospective customers. Such commitments assure the borrower of financing for a specified period of time at a specified rate. The risk to the Bank under such loan commitments is limited by the terms of the contracts. For example, the Bank may not be obligated to advance funds if the customer's financial condition deteriorates or if the customer fails to meet specific covenants. An approved but unfunded loan commitment represents a potential credit risk once the funds are advanced to the customer. Unfunded loan commitments also represent liquidity risk since the customer may demand immediate cash that would require funding and interest rate risk as market interest rates may rise above the rate committed. In addition, since a portion of these loan commitments normally expire unused, the total amount of outstanding commitments at any point in time may not require future funding. Loan commitments generally have open-ended maturities and variable rates.

The table below presents the Bank's commitments, exclusive of Mortgage Banking loan commitments for each period ended:

(in thousands)	June 30, 2013	December 31, 2012
Unused warehouse lines of credit	\$ 175,310	\$ 113,924
Unused home equity lines of credit	224,688	232,719
Unused loan commitments - other	176,206	163,523
Standby letters of credit	10,294	16,985
FHLB letters of credit	11,683	11,908
Total commitments	\$ 598,181	\$ 539,059

Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The terms and risk of loss involved in issuing standby letters of credit are similar to those involved in issuing loan commitments and extending credit. In addition to credit risk, the Bank also has liquidity risk associated with standby letters of credit because funding for these obligations could be required immediately. The Bank does not deem this risk to be material.

At June 30, 2013 and December 31, 2012, the Bank had letters of credit from the FHLB issued on behalf of two RB&T clients. These letters of credit were used as credit enhancements for client bond offerings and reduced RB&T's available borrowing line at the FHLB. The Bank uses a blanket pledge of eligible real estate loans to secure these letters of credit.

Table of Contents

On August 1, 2011, a lawsuit was filed in the U.S. District Court for the Western District of Kentucky styled *Brenda Webb vs. Republic Bank & Trust Company d/b/a Republic Bank*, Civil Action No. 3:11-CV-00423-TBR. The Complaint was brought as a putative class action and seeks monetary damages, restitution and declaratory relief allegedly arising from the manner in which RB&T assessed overdraft fees. In the Complaint, the Plaintiff pleads six claims against RB&T alleging: breach of contract and breach of the covenant of good faith and fair dealing (Count I), unconscionability (Count II), conversion (Count III), unjust enrichment (Count IV), violation of the Electronic Funds Transfer Act and Regulation E (Count V), and violations of the Kentucky Consumer Protection Act, (Count VI). RB&T filed a Motion to Dismiss the case on January 12, 2012. In response, Plaintiff filed her Motion to Amend the Complaint on February 23, 2012. In Plaintiff's proposed Amended Complaint, Plaintiff acknowledged disclosure of the Overdraft Honor Policy and did not seek to add any claims to the Amended Complaint. However, Plaintiff divided the breach of contract and breach of the covenant of good faith and fair dealing claims into two counts (Counts One and Two). In the original Complaint, those claims were combined in Count One. RB&T filed its objection to Plaintiff's Motion to Amend. On June 16, 2012, the District Court denied the Plaintiff's Motion to Amend concluding that the Plaintiff lacked the ability to automatically amend the complaint as of right. However, the Court held that the Plaintiff could be permitted to amend if the Plaintiff could first demonstrate that her amendment would not be futile and that the Plaintiff had standing to sue despite RB&T's offer of judgment. The Court declined to rule on that issue at that time and ordered the case stayed pending a decision by the U.S. Court of Appeals for the Sixth Circuit in a case on appeal with the same standing issue. The Sixth Circuit ruled on June 11, 2013 and concluded that the offer of judgment did not moot the matter before it only because the offer of judgment in question did not afford the plaintiff complete relief. The District Court lifted the stay of this matter on June 14, 2013 and permitted Plaintiff to file her Amended Complaint. Plaintiff filed her Amended Complaint on June 21, 2013 and brought six claims: breach of contract and breach of the covenant of good faith and fair dealing (Counts I & II), unconscionability (Count III), conversion (Count IV), unjust enrichment (Count V), violation of the Electronic Funds Transfer Act, (Count VI) and violation of the Kentucky Consumer Protection Act (Count VII). RB&T filed its Motion to Dismiss the Amended Complaint on July 15, 2013. Plaintiff has not yet responded to the Motion to Dismiss.

10. EARNINGS PER SHARE

Class A and Class B shares participate equally in undistributed earnings. The difference in earnings per share between the two classes of common stock results solely from the 10% per share cash dividend premium paid on Class A Common Stock over that paid on Class B Common Stock.

A reconciliation of the combined Class A and Class B Common Stock numerators and denominators of the earnings per share and diluted earnings per share computations is presented below:

(in thousands, except per share data)	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net income	\$ 6,119	\$ 9,578	\$ 19,475	\$ 92,050
Weighted average shares outstanding	20,782	20,958	20,823	20,957
Effect of dilutive securities	76	59	72	77
Average shares outstanding including dilutive securities	20,858	21,017	20,895	21,034
Basic earnings per share:				
Class A Common Share	\$ 0.30	\$ 0.46	\$ 0.94	\$ 4.40
Class B Common Share	0.28	0.44	0.91	4.37
Diluted earnings per share:				

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Class A Common Share	\$	0.30	\$	0.46	\$	0.94	\$	4.38
Class B Common Share		0.28		0.44		0.90		4.35

Table of Contents

Stock options excluded from the detailed earnings per share calculation because their impact was antidilutive are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Antidilutive stock options	122,450	232,550	128,450	220,550

11. SEGMENT INFORMATION

Reportable segments are determined by the type of products and services offered and the level of information provided to the chief operating decision maker, who uses such information to review performance of various components of the business (such as branches and subsidiary banks), which are then aggregated if operating performance, products/services, and customers are similar.

As of June 30, 2013, the Company was divided into three distinct business operating segments: Traditional Banking, Mortgage Banking and Republic Processing Group (RPG). During 2012, the Company realigned the previously reported Tax Refund Solutions (TRS) segment as a division of the newly formed RPG segment. Along with the TRS division, Republic Payment Solutions (RPS) and Republic Credit Solutions (RCS) also operate as divisions of the newly formed RPG segment.

Nationally, through RB&T, RPG facilitates the receipt and payment of federal and state tax refund products under the TRS division. Nationally, through RB, the RPS division is an issuing bank offering general purpose reloadable prepaid debit cards through third party program managers. Nationally, through RB&T, the RCS division is preparing to pilot short-term consumer credit products on-line.

For the projected near-term, as the prepaid card and consumer credit programs are being established, the operating results of these divisions are expected to be immaterial to the Company s overall results of operations and will be reported as part of the RPG business operating segment. The RPS and RCS divisions will not be reported as separate business operating segments until such time, if any, that they become material to the Company s overall results of operations.

Loans, investments and deposits provide the majority of the net revenue from Traditional Banking operations, while servicing fees and loan sales provide the majority of revenue from Mortgage Banking operations. Prior to 2013, RAL fees and net RT fees provided the majority of the revenue for RPG. In 2013, net RT fees has provided, and is expected to continue to provide going forward, the majority of revenues for RPG as the Company no longer offers RALs. All Company operations are domestic.

The accounting policies used for Republic s reportable segments are the same as those described in the summary of significant accounting policies. Segment performance is evaluated using operating income. Goodwill is not allocated. Income taxes which are not segment specific are allocated based on income before income tax expense. Transactions among reportable segments are made at fair value.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

12. SUBSEQUENT EVENT

RB&T entered into a Purchase and Assumption Agreement (the Agreement) dated July 11, 2013, with H&R Block Bank (HRBB) and its sole shareholder Block Financial LLC. Pursuant to the Agreement, RB&T will acquire certain assets and assume certain liabilities, including all of the deposits of HRBB (the P&A Transaction).

All of the assets acquired and all of the liabilities assumed by RB&T as part of the P&A Transaction will be transferred at a price equal to HRBB's book value. As part of the P&A Transaction, RB&T will acquire HRBB non-cash assets projected to be approximately \$3 million at closing. In addition, RB&T will assume approximately \$470 million in projected customer deposits. The net amount of projected deposits less projected non-cash assets, estimated at approximately \$467 million, will be paid in cash by HRBB to RB&T at closing. RB&T will not acquire HRBB's sole banking center location in Kansas City, Missouri. In connection with the P&A Transaction, RB&T will also not acquire any of HRBB's existing intercompany contracts with H&R Block that allow HRBB to offer various H&R Block-branded financial services products to H&R Block's clients.

The completion of the P&A Transaction is subject to multiple regulatory approvals for all parties, as well as the completion of a new Joint Marketing Master Services Agreement (MSA) and a related Receivables Purchase Agreement (RPA) among RB&T and affiliates of H&R Block, Inc. The Agreement requires that all regulatory approvals must be received by September 30, 2013 in order for the P&A Transaction to occur in 2013. If any regulatory approvals are obtained after September 30, 2013, the Agreement requires that the P&A Transaction will occur between April 30, 2014 and June 18, 2014.

The parties to the Agreement submitted their respective applications for the P&A Transaction to their respective regulators on July 15, 2013, which gives the parties 77 days to receive regulatory approval under the terms of the Agreement in order for the P&A transaction to be completed in 2013. The Office of the Comptroller of the Currency (OCC) is considering RB&T's application for the P&A Transaction along with RB&T's earlier May 2013 application regarding an internal merger of RB&T and RB which includes a conversion to a national bank charter. There can be no assurance that all regulatory approvals will be obtained by all parties to the P&A Transaction within the 77 day time frame, if at all.

RB&T and affiliates of H&R Block, Inc. are currently in separate contract negotiations to enter into a new MSA and a related RPA. Pursuant to the anticipated MSA, RB&T would replace HRBB as the bank that offers H&R Block-branded financial services products to H&R Block's clients. Consistent with the framework of its existing Electronic Return Originator Oversight Plan, RB&T's responsibilities under the anticipated MSA will include, among other things, audit, compliance and third party oversight. Similar to its existing arrangement with HRBB, under the anticipated MSA affiliates of H&R Block, Inc. will provide the sales, marketing, servicing and primary information systems infrastructure for the H&R Block-branded financial services products to be offered to H&R Block's clients. As compared to the H&R Block-branded financial services products offered today by HRBB, RB&T does not anticipate material changes to the products offered, or the terms and conditions of the products it will offer, under the new MSA.

Pursuant to the anticipated RPA, a portion of the loans originated by RB&T under the MSA are expected to be participated to an H&R Block affiliate. There can be no assurance that the parties will successfully negotiate and execute the MSA and the RPA, nor can there be any assurance with respect to the final terms and conditions of these agreements.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

In addition to the positive impact to RB&T's and the Company's overall earnings, the P&A Transaction and the anticipated MSA and RPA, if completed, are expected to impact the liquidity position of RB&T and the capital positions of RB&T and the Company, as a whole. More specifically, the cash received from the P&A Transaction, if completed, is expected to have a positive impact to the overall liquidity position of RB&T, although it would negatively impact RB&T's and the Company's Tier I leverage ratio. Similarly, the resulting growth in RB&T's and the Company's assets from the cash received in connection with the MSA during the first quarter of each year is expected to negatively impact RB&T's and the Company's first quarter Tier 1 Leverage Ratio. Neither RB&T's nor the Company's Tier 1 Leverage Ratios, however, are expected to fall below "well-capitalized" under regulatory guidelines. If RB&T became at risk to drop below the regulatory minimum to be well-capitalized for its Tier 1 Leverage Ratio, RB&T's holding company has available approximately \$120 million of funds on deposit at RB&T that it could contribute to RB&T in the form of Tier 1 common equity. Management believes the impact of the P&A Transaction and the anticipated MSA and RPA to the risk-based capital ratios of RB&T and the Company will be minimal as the substantial majority of asset growth resulting from the transactions will be from cash.

See the Company's Form 8-K filed with the Securities and Exchange Commission on July 11, 2013 for additional information on the Agreement and the ongoing contract negotiations for the MSA.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Management's Discussion and Analysis of Financial Condition and Results of Operations of Republic Bancorp, Inc. (Republic or the Company) analyzes the major elements of Republic's consolidated balance sheets and statements of income. Republic, a bank holding company headquartered in Louisville, Kentucky, is the parent company of Republic Bank & Trust Company, (RB&T), Republic Bank (RB) (collectively referred together as the Bank), and Republic Invest Co. The consolidated financial statements also include the wholly-owned subsidiaries of RB&T: Republic Financial Services, LLC; TRS RAL Funding, LLC; and Republic Insurance Agency, LLC. Republic Bancorp Capital Trust is a Delaware statutory business trust that is a 100%-owned unconsolidated finance subsidiary of Republic Bancorp, Inc. Management's Discussion and Analysis of Financial Condition and Results of Operations of Republic should be read in conjunction with Part I Item 1 *Financial Statements*.

As used in this filing, the terms Republic, the Company, we, our and us refer to Republic Bancorp, Inc., and, where the context requires, Republic Bancorp, Inc. and its subsidiaries; and the term the Bank refers to the Company's subsidiary banks: RB&T and RB.

Republic and its subsidiaries operate in a heavily regulated industry. These regulatory requirements can and do affect the Company's results of operations and financial condition.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by the forward-looking statements. Actual results may differ materially from those expressed or implied as a result of certain risks and uncertainties, including, but not limited to: changes in political and economic conditions; interest rate fluctuations; competitive product and pricing pressures; equity and fixed income market fluctuations; personal and corporate customers' bankruptcies; inflation; recession; acquisitions and integrations of acquired businesses; technological changes; changes in law and regulations or the interpretation and enforcement thereof; changes in fiscal, monetary, regulatory and tax policies; monetary fluctuations; success in gaining regulatory approvals when required; as well as other risks and uncertainties reported from time to time in the Company's filings with the Securities and Exchange Commission (SEC) included under Part 1 Item 1A *Risk Factors* of the Company 2012 Annual Report on Form 10-K.

Broadly speaking, forward-looking statements include:

- projections of revenue, income, expenses, losses, earnings per share, capital expenditures, dividends, capital structure or other financial items;
- descriptions of plans or objectives for future operations, products or services;
- forecasts of future economic performance; and
- descriptions of assumptions underlying or relating to any of the foregoing.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The Company may make forward-looking statements discussing management's expectations about various matters, including:

- loan delinquencies; non-performing, classified, or impaired loans; and troubled debt restructurings (TDR s);
- further developments in the Bank's ongoing review of and efforts to resolve possible problem credit relationships, which could result in, among other things, additional provision for loan losses;
- deteriorating credit quality, including changes in the interest rate environment and reducing interest margins;
- future credit losses and the overall adequacy of the allowance for loan losses;
- potential write-downs of other real estate owned (OREO);
- potential recast adjustments to acquisition day fair values (day-one fair values);
- future short-term and long-term interest rates and the respective impact on net interest margin, net interest spread, net income, liquidity and capital;
- the future impact of Company strategies to mitigate interest rate risk;
- future long-term interest rates and their impact on the demand for Mortgage Banking products and warehouse lines of credit;
- the future value of mortgage servicing rights;
- the future operating performance of the Tax Refund Solutions (TRS) division;
- future Refund Transfers (RTs) volume for TRS;
- the future net revenues associated with RTs at TRS;

Table of Contents

- the future financial performance of Republic Payment Solutions (RPS);
- the future financial performance of Republic Credit Solutions (RCS);
- the potential impairment of investment securities;
- the extent to which regulations written and implemented by the Federal Bureau of Consumer Financial Protection, and other federal, state and local governmental regulation of consumer lending and related financial products and services may limit or prohibit the operation of the Company s business;
- financial services reform and other current, pending or future legislation or regulation that could have a negative effect on the Company s revenue and businesses: including Basel III capital reforms; the Dodd-Frank Act; and legislation and regulation relating to overdraft fees (and changes to the Bank s overdraft practices as a result thereof), debit card interchange fees, credit cards, and other bank services;
- the impact of new accounting pronouncements;
- legal and regulatory matters including results and consequences of regulatory guidance, litigation, administrative proceedings, rule-making, interpretations, actions and examinations;
- the future impact of Company reorganizations, including but not limited to a prospective internal merger of RB&T and RB;
- future capital expenditures;
- the strength of the U.S. economy in general and the strength of the local economies in which the Company conducts operations;
- the Bank s ability to maintain current deposit and loan levels at current interest rates;
- the Company s ability to successfully implement strategic plans, including but not limited to those related to the acquisition of two failed banks in 2012 and the acquisition of certain assets and assumption of all deposits of H&R Block Bank (the P&A Transaction);
- the ability of all parties to the July 11, 2013 Purchase & Assumption Agreement (the Agreement) to obtain regulatory approval in order to complete the related P&A Transaction within projected timeframes, if at all; and
- the ability of RB&T and affiliates of H&R Block, Inc. to negotiate a Joint Marketing Master Services Agreement (MSA) and a related Receivables Purchase Agreement (RPA).

Forward-looking statements discuss matters that are not historical facts. As forward-looking statements discuss future events or conditions, the statements often include words such as anticipate, believe, estimate, expect, intend, plan, project, target, can, could, may, similar expressions. Do not rely on forward-looking statements. Forward-looking statements detail management s expectations regarding the future and are not guarantees. Forward-looking statements are assumptions based on information known to management only as of the date the statements are made and management may not update them to reflect changes that occur subsequent to the date the statements are made.

See additional discussion under Part I Item 1 Business and Part I Item 1A Risk Factors of the Company s 2012 Annual Report on Form 10-K.

Table of Contents

RECENT DEVELOPMENTS

H&R Block Bank Purchase and Assumption Agreement

RB&T entered into a Purchase and Assumption Agreement (the Agreement) dated July 11, 2013, with H&R Block Bank (HRBB) and its sole shareholder Block Financial LLC. Pursuant to the Agreement, RB&T will acquire certain assets and assume certain liabilities, including all of the deposits of HRBB (the P&A Transaction).

All of the assets acquired and all of the liabilities assumed by RB&T as part of the P&A Transaction will be transferred at a price equal to HRBB's book value. As part of the P&A Transaction, RB&T will acquire HRBB non-cash assets projected to be approximately \$3 million at closing. In addition, RB&T will assume approximately \$470 million in projected customer deposits. The net amount of projected deposits less projected non-cash assets, estimated at approximately \$467 million, will be paid in cash by HRBB to RB&T at closing. RB&T will not acquire HRBB's sole banking center location in Kansas City, Missouri. In connection with the P&A Transaction, RB&T will also not acquire any of HRBB's existing intercompany contracts with H&R Block that allow HRBB to offer various H&R Block-branded financial services products to H&R Block's clients.

The completion of the P&A Transaction is subject to multiple regulatory approvals for all parties, as well as the completion of a new Joint Marketing Master Services Agreement (MSA) and a related Receivables Purchase Agreement (RPA) among RB&T and affiliates of H&R Block, Inc. The Agreement requires that all regulatory approvals must be received by September 30, 2013 in order for the P&A Transaction to occur in 2013. If any regulatory approvals are obtained after September 30, 2013, the Agreement requires that the P&A Transaction will occur between April 30, 2014 and June 18, 2014.

The parties to the Agreement submitted their respective applications for the P&A Transaction to their respective regulators on July 15, 2013, which gives the parties 77 days to receive regulatory approval under the terms of the Agreement in order for the P&A transaction to be completed in 2013. The Office of the Comptroller of the Currency (OCC) is considering RB&T's application for the P&A Transaction along with RB&T's earlier May 2013 application regarding an internal merger of RB&T and RB which includes a conversion to a national bank charter. There can be no assurance that all regulatory approvals will be obtained by all parties to the P&A Transaction within the 77 day time frame, if at all.

RB&T and affiliates of H&R Block, Inc. are currently in separate contract negotiations to enter into a new MSA and a related RPA. Pursuant to the anticipated MSA, RB&T would replace HRBB as the bank that offers H&R Block-branded financial services products to H&R Block's clients. Consistent with the framework of its existing Electronic Return Originator Oversight Plan, RB&T's responsibilities under the anticipated MSA will include, among other things, audit, compliance and third party oversight. Similar to its existing arrangement with HRBB, under the anticipated MSA affiliates of H&R Block, Inc. will provide the sales, marketing, servicing and primary information systems infrastructure for the H&R Block-branded financial services products to be offered to H&R Block's clients. As compared to the H&R Block-branded financial services products offered today by HRBB, RB&T does not anticipate material changes to the products offered, or the terms and conditions of the products it will offer, under the new MSA.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Pursuant to the anticipated RPA, a portion of the loans originated by RB&T under the MSA are expected to be participated to an H&R Block affiliate. There can be no assurance that the parties will successfully negotiate and execute the MSA and the RPA, nor can there be any assurance with respect to the final terms and conditions of these agreements.

On a go-forward basis, the Company estimates the combined financial impact of the Agreement, the MSA and RPA, if all are completed, to be accretive to the Company's diluted earnings per Class A and Class B share by approximately \$0.57 to \$0.75 per year. The largest benefit is expected to occur in the first quarter of each calendar year, coinciding with the tax season. The actual results will vary depending upon a number of factors, including the volumes of RB&T's H&R Block-branded financial services products sold.

Table of Contents

In addition to the positive impact to RB&T's and the Company's overall earnings, the P&A Transaction and the anticipated MSA and RPA, if completed, are expected to impact the liquidity position of RB&T and the capital positions of RB&T and the Company, as a whole. More specifically, the cash received from the P&A Transaction, if completed, is expected to have a positive impact to the overall liquidity position of RB&T, although it would negatively impact RB&T's and the Company's Tier I leverage ratio. Similarly, the resulting growth in RB&T's and the Company's assets from the cash received in connection with the MSA during the first quarter of each year is expected to negatively impact RB&T's and the Company's first quarter Tier 1 Leverage Ratio. Neither RB&T's nor the Company's Tier 1 Leverage Ratios, however, are expected to fall below well-capitalized under regulatory guidelines. If RB&T became at risk to drop below the regulatory minimum to be well-capitalized for its Tier 1 Leverage Ratio, RB&T's holding company has available approximately \$120 million of funds on deposit at RB&T that it could contribute to RB&T in the form of Tier 1 common equity. Management believes the impact of the P&A Transaction and the anticipated MSA and RPA to the risk-based capital ratios of RB&T and the Company will be minimal as the substantial majority of asset growth resulting from the transactions will be from cash.

The Company is not likely to complete additional acquisitions while it seeks to obtain regulatory approval for the P&A Transaction.

For additional information on the Agreement and the ongoing contract negotiations for the MSA, see Republic's Form 8-K filed with the Securities and Exchange Commission on July 11, 2013.

Internal Conversion and Merger

In May, 2013, the Company requested regulatory approval to merge RB&T and RB and convert to one national bank charter. With the approved internal merger, the Bank would operate with the name Republic Bank, National Association (RBNA) with the OCC as its primary regulator. The OCC is currently the primary regulator of RB, with RB&T currently regulated by the Federal Deposit Insurance Corporation (FDIC) and the Kentucky Department of Financial Institutions (KDFI).

Table of Contents**BUSINESS SEGMENT COMPOSITION**

As of June 30, 2013, the Company was divided into three distinct business operating segments: Traditional Banking, Mortgage Banking and Republic Processing Group (RPG). During 2012, the Company realigned the previously reported TRS segment as a division of the newly formed RPG segment. Along with the TRS division, Republic Payment Solutions (RPS) and Republic Credit Solutions (RCS) also operate as divisions of the newly formed RPG segment. The RPS and RCS divisions are considered immaterial for segment reporting. Net income, total assets and net interest margin by segment for the three and six months ended June 30, 2013 and 2012 are presented below:

(in thousands)	Three Months Ended June 30, 2013			
	Traditional Banking	Mortgage Banking	Republic Processing Group	Total Company
Net income	\$ 6,010	\$ 971	\$ (862)	\$ 6,119
Segment assets	3,277,181	29,891	9,993	3,317,065
Net interest margin	3.57%	NM	NM	3.56%

(in thousands)	Three Months Ended June 30, 2012			
	Traditional Banking	Mortgage Banking	Republic Processing Group	Total Company
Net income	\$ 6,480	\$ 718	\$ 2,380	\$ 9,578

For expanded segment financial data see Footnote 11 Segment Information of Part I Item 1 Financial Statements.

Table of Contents

(I) Traditional Banking segment

As of June 30, 2013, in addition to an Internet delivery channel, Republic had 44 full-service banking centers with locations as follows:

- Kentucky 34
- Metropolitan Louisville 20
- Central Kentucky 11
- Elizabethtown 1
- Frankfort 1
- Georgetown 1
- Lexington 5
- Owensboro 2
- Shelbyville 1
- Northern Kentucky 3
- Covington 1
- Florence 1
- Independence 1
- Southern Indiana 3
- Floyds Knobs 1
- Jeffersonville 1
- New Albany 1
- Metropolitan Tampa, Florida 4
- Metropolitan Cincinnati, Ohio 1
- Metropolitan Nashville, Tennessee 1

- Metropolitan Minneapolis, Minnesota 1

Republic's corporate headquarters are located in Louisville, which is the largest city in Kentucky by population size.

(II) Mortgage Banking segment

Mortgage Banking activities primarily include 15-, 20- and 30-year fixed-term single family, first lien residential real estate loans that are sold into the secondary market, primarily to the Federal Home Loan Mortgage Corporation (FHLMC or Freddie Mac). The Bank typically retains servicing on loans sold into the secondary market. Administration of loans with servicing retained by the Bank includes collecting principal and interest payments, escrowing funds for property taxes and insurance and remitting payments to secondary market investors. A fee is received by the Bank for performing these standard servicing functions.

(III) Republic Processing Group segment

Nationally, through RB&T, RPG facilitates the receipt and payment of federal and state tax refund products under its TRS division. Nationally, through RB, the RPS division is an issuing bank offering general purpose reloadable prepaid debit cards through third party program managers. Nationally, through RB&T, the RCS division is preparing to pilot short-term consumer credit products on-line.

Table of Contents

OVERVIEW (Three Months Ended June 30, 2013 Compared to Three Months Ended June 30, 2012)

Net income for the three months ended June 30, 2013 was \$6.1 million, representing a decrease of \$3.5 million, or 36%, compared to the same period in 2012. Diluted earnings per Class A Common Share decreased to \$0.30 for the quarter ended June 30, 2013 compared to \$0.46 for the same period in 2012.

General highlights by segment for the quarter ended June 30, 2013 consisted of the following:

Traditional Banking segment

- Net income decreased \$470,000, or 7%, for the second quarter of 2013 compared to the same period in 2012.
- Net interest income increased \$516,000, or 2%, for the second quarter of 2013 to \$28.6 million. The Traditional Banking segment net interest margin was 3.57% for the second quarter of 2013.
- Provision for loan losses was \$1.0 million for the quarter ended June 30, 2013 compared to \$831,000 for the same period in 2012.
- Total non-interest income increased \$720,000, or 12%, for the second quarter of 2013 compared to the same period in 2012.
- Total non-interest expenses increased \$1.9 million, or 8%, during the second quarter of 2013 compared to the second quarter of 2012.
- Total non-performing loans to total loans for the Traditional Banking segment was 0.92% at June 30, 2013, compared to 0.82% at December 31, 2012 and 0.90% at June 30, 2012.

Mortgage Banking segment

- Within the Mortgage Banking segment, mortgage banking income increased \$217,000, or 11%, during the second quarter of 2013 compared to the same period in 2012.

- Mortgage banking income was positively impacted by an increase in secondary market loan volume during the second quarter of 2013 compared to the same period in 2012, as the Bank initiated a \$0 closing cost promotion at the beginning of 2013.

- While long-term interest rates at June 30, 2013 were relatively low as compared to historical levels, significant increases in these rates during the latter part of the second quarter of 2013 negatively impacted new loan application volume. The rise in interest rates is expected to continue to negatively impact future loan application volume during the remainder of 2013 and beyond.

Republic Processing Group segment

- Net income decreased \$3.2 million for the second quarter of 2013 compared to the same period in 2012.

- RB&T permanently discontinued the offering of its RAL product effective April 30, 2012.

- As previously disclosed, net income at RPG was significantly negatively impacted during the second quarter and first six months of 2013 from the unilateral terminations by Liberty Tax Service (Liberty) and Jackson Hewitt Tax Service (JHI) of their contracts with RB&T.

- Due to recoveries of prior year RAL losses, RPG recorded a credit to the provision for loan losses of \$140,000 for the second quarter of 2013, compared to a net credit of \$365,000 for the same period in 2012.

- Non-interest income was \$1.9 million for the second quarter of 2013 compared to \$6.2 million for the same period in 2012.

- Non-interest expenses were \$3.4 million for the second quarter of 2013 compared to \$2.9 million for the same period in 2012.

Table of Contents

RESULTS OF OPERATIONS (Three Months Ended June 30, 2013 Compared to Three Months Ended June 30, 2012)

Net Interest Income

Banking operations are significantly dependent upon net interest income. Net interest income is the difference between interest income on interest-earning assets, such as loans and investment securities and the interest expense on liabilities used to fund those assets, such as interest-bearing deposits, securities sold under agreements to repurchase and Federal Home Loan Bank (FHLB) advances. Net interest income is impacted by both changes in the amount and composition of interest-earning assets and interest-bearing liabilities, as well as market interest rates.

Total Company net interest income increased \$455,000, or 2%, for the second quarter of 2013 compared to the same period in 2012. The total Company net interest margin increased three basis points from 3.53% for the second quarter of 2012 to 3.56% for the second quarter of 2013. The most significant components affecting the total Company's net interest income by business segment were as follows:

Traditional Banking segment

Net interest income within the Traditional Banking segment increased \$516,000, or 2%, for the quarter ended June 30, 2013 compared to the same period in 2012. The Traditional Banking net interest margin was 3.57% for both periods. The increase in net interest income and maintenance of the Bank's net interest margin during 2013 was primarily attributable to the following factors:

- As discussed in more detail within the *Loan Portfolio* section of this filing, the Bank began offering its Mortgage Warehouse Lending product during June of 2011. During the quarter ended June 30, 2013, the Mortgage Warehouse Lending portfolio had average loans outstanding of \$147 million achieving an average yield of 4.55% as compared to average loans outstanding of \$55 million with an average yield of 4.60% during the second quarter of 2012. As a result, interest income on warehouse lines of credit increased \$1.0 million during the second quarter of 2013 compared to the second quarter of 2012. These loans are revolving lines of credit with a term of 364 days, contain interest rate floors and adjust monthly with one month LIBOR.
- As part of its 2012 acquisition of TCB, RB&T acquired loans, net of loans put back to the FDIC, with a fair value of approximately \$57 million and an initial projected effective yield of 7.94%. The Bank accreted \$556,000 to earnings during the second quarter of 2013 from discounts on its acquired TCB portfolio compared to \$146,000 for the same period in 2012. *See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.*
- As part of its 2012 acquisition of FCB, RB&T acquired loans with a fair value of approximately \$128 million and an initial projected effective yield of 7.36%. The Bank accreted \$1.2 million to earnings during the second quarter of 2013 from discounts on its acquired FCB portfolio with no similar accretion occurring during the second quarter of 2012, as the acquisition occurred during the third quarter of 2012. *See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1*

Financial Statements.

The total discount accretion of \$1.8 million during the second quarter of 2013 that resulted from the TCB and FCB acquisitions positively impacted the Company's second quarter net interest margin by 22 basis points. Management projects accretion of discount that resulted from the 2012 acquisitions to be \$784,000 for the remainder of 2013. The accretion estimate for the remainder of 2013 could be positively impacted by positive workout arrangements in which RB&T receives loan payoffs for an amount greater than their respective carrying values.

Table of Contents

Exclusive of the positive impact on net interest income received by the Company for its warehouse lines of credit and its 2012 acquisitions, the Traditional Banking segment continues to experience downward repricing in its loan and investment portfolios resulting from ongoing paydowns and early payoffs. This downward repricing is expected to continue to cause compression in Republic's net interest income and net interest margin in the future. Additionally, because the FFTR (the index which many of the Bank's short-term deposit rates track) has remained at a target range between 0.00% and 0.25%, no future FFTR decreases from the Federal Open Markets Committee of the FRB are possible, exacerbating the compression to the Bank's net interest income and net interest margin caused by its repricing loans and investments. The Bank is unable to determine the ultimate negative impact to the Bank's net interest spread and margin in the future because several factors remain unknown, such as future demand for its financial products and the overall future need for liquidity, among many other factors.

For additional information on the potential future effect of changes in short-term interest rates on Republic's net interest income, see the table titled "Traditional Banking Interest Rate Sensitivity for 2013" in this section of the filing.

Republic Processing Group segment

Net interest income within the RPG segment decreased \$153,000 for the second quarter of 2013 compared to the same period in 2012. The decrease in net interest income at RPG was the direct result of the Company's discontinuation of the RAL product effective April 30, 2012.

Table 1 provides detailed total Company information as to average balances, interest income/expense and rates by major balance sheet category for the quarters ended June 30, 2013 and 2012. Table 2 provides an analysis of total Company changes in net interest income attributable to changes in rates and changes in volume of interest-earning assets and interest-bearing liabilities for the same periods.

Net interest spread	3.30%	3.21%
Net interest margin	3.56%	3.53%

(1) For purpose of this calculation, the fair market value adjustment on investment securities resulting from FASB ASC Topic 320, Investments - Debt and Equity Securities, is included as a component of other assets.

(2) The amount of loan fee income included in total interest income was \$3.0 million and \$1.3 million for the three months ended June 30, 2013 and 2012.

(3) Average balances for loans include the principal balance of non-accrual loans and loans held for sale.

(4) The Refund Anticipation Loan product was discontinued effective April 30, 2012.

Table of Contents

Table 2 illustrates the extent to which changes in interest rates and changes in the volume of total Company interest-earning assets and interest-bearing liabilities impacted Republic's interest income and interest expense during the periods indicated. Information is provided in each category with respect to (i) changes attributable to changes in volume (changes in volume multiplied by prior rate), (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume) and (iii) net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Provision for Loan Losses (Three Months Ended June 30, 2013 Compared to Three Months Ended June 30, 2012)

The Company recorded a provision for loan losses of \$905,000 for the second quarter 2013, compared to \$466,000 for the same period in 2012. The significant components comprising the Company's increased provision for loan losses by business segment were as follows:

Traditional Banking segment

The Traditional Banking provision for loan losses during the second quarter of 2013 was \$1.0 million, a \$214,000 increase from the \$831,000 recorded during the second quarter of 2012. Annualized Traditional Bank net loan charge offs to average loans were 0.33% for the second quarter of 2013 compared to 0.28% for the same period in 2012. The Bank posted loss provisions for its purchased credit impaired loans (PCI) of \$746,000 during the second quarter of 2013. These provisions reflect probable shortfalls in cash flows below day-one estimates for these loans. No analogous provisions were made during 2012 as the acquisition was still within its day-one measurement period.

As a percentage of total loans, the Traditional Banking allowance for loan losses decreased to 0.86% at June 30, 2013 compared to 0.90% at December 31, 2012 and 0.92% at June 30, 2012. The Company believes, based on information presently available, that it has adequately provided for loan losses at June 30, 2013.

See the section titled Asset Quality in this section of the filing under Comparison of Financial Condition at June 30, 2013 and December 31, 2012 for additional discussion regarding the Company's provision for loan losses, classified assets, allowance for loan losses, non-performing loans, delinquent loans, impaired loans and TDRs.

Republic Processing Group segment

The Company ceased offering the RAL product effective April 30, 2012. As a result, RPG had no RAL losses during the second quarter of 2013. During the second quarter 2013, the Company recorded a credit of \$140,000 to provision expense for recoveries of prior period losses. During the second quarter of 2012, the Company recorded a net credit of \$365,000 in RAL recoveries.

Table of Contents

An analysis of changes in the allowance for loan losses and selected credit quality ratios follows:

Table of Contents

Non-interest Income (Three Months Ended June 30, 2013 Compared to Three Months Ended June 30, 2012)

Non-interest income decreased \$3.3 million, or 23%, for the second quarter of 2013 compared to the same period in 2012. The most significant components comprising the total Company's change in non-interest income by business segment were as follows:

Traditional Banking segment

Traditional Banking segment non-interest income increased \$720,000, or 12%, for the second quarter of 2013 compared to the same period in 2012 as the Bank experienced increases in service charges on deposits and gains on sale of Other Real Estate Owned (OREO).

Service charges on deposit accounts increased from \$3.3 million for the second quarter of 2012 to \$3.5 million for the same period in 2013. The Bank earns a substantial majority of its fee income related to its overdraft service program from the per item fee it assesses its customers for each insufficient funds check or electronic debit presented for payment. The total net per item fees included in service charges on deposits for the second quarter of 2013 and 2012 were \$2.0 million and \$1.8 million. The total net daily overdraft charges included in interest income for the second quarter of 2013 and 2012 were \$410,000 and \$401,000.

Net gains on the sale of OREO increased \$752,000 from \$283,000 for the second quarter of 2012 to \$1.0 million for the same period in 2013, with \$965,000 of the 2013 gains related to assets acquired in the 2012 acquisitions of failed banks.

Republic Processing Group segment

RPG non-interest income decreased \$4.3 million, or 70%, during the second quarter of 2013 compared to the same period in 2012. The decrease was the result of pricing pressures via revenue sharing driven by increased competition resulting from the elimination of the RAL product and the previously disclosed termination of RB&T's contracts with Liberty and JHI.

With regard to the TRS business division of the RPG segment, TRS faces direct competition for RT market share from independently-owned processing groups partnered with banks. Independent processing groups that were unable to offer RAL products were, historically, at a competitive disadvantage to banks who could offer RALs. With RB&T's resolution of its differences with the FDIC through a Stipulation Agreement and Consent Order (collectively, the FDIC Agreement), RB&T discontinued RALs effective April 30, 2012. Without the ability to originate RALs, RB&T continues to face increased competition in the RT marketplace. In addition to the loss of volume resulting from additional competitors, RB&T has incurred substantial pressure on its profit margin for RT products via revenue sharing arrangements with its various partners.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Furthermore, management believes that the FDIC Agreement also negatively impacts RB&T's ability to originate RT products. As previously disclosed, the FDIC Agreement contains a provision for an Electronic Return Originator (ERO) Plan to be administered by RB&T. The ERO Plan places additional oversight and training requirements on RB&T and its tax preparation partners that may not currently be required by regulators for RB&T's competitors in the tax business. These additional requirements make attracting new relationships, retaining existing relationships, and maintaining profit margin for RTs more difficult for RB&T. Management estimates net RT revenues could continue to be reduced beyond 2013 if these competitive disadvantages remain in place.

In addition to the reduced profit margin the Company experienced with its RT volume during 2013 due to the factors noted above, the Company also experienced a significant decrease in RT volume as a result of the termination of the Company's contracts with JHI and Liberty. As previously disclosed in a Form 8-K filed on August 29, 2012, JHI unilaterally terminated its contract with RB&T on August 27, 2012. In addition, as previously disclosed in a Form 8-K filed on September 19, 2012, Liberty unilaterally terminated its contract with RB&T on September 18, 2012. On a combined basis, these contracts represented approximately 53% of RB&T's 2012 RT volume.

Republic believes that JHI and Liberty breached their agreements with RB&T by terminating without cause. RB&T is engaged in binding arbitration with JHI through a final arbitration hearing that occurred on July 26, 2013 with a decision anticipated in the third quarter of 2013. Pursuant to the terms of their agreement, RB&T and Liberty are engaged in mediation in an attempt to settle RB&T's claim of breach of contract by Liberty. If the parties fail to settle the claim, the agreement requires that upon demand by one of the parties, they will engage in binding arbitration.

Table of Contents

Mortgage Banking segment

Within the Mortgage Banking segment, mortgage banking income increased \$217,000, or 11%, during the second quarter of 2013 compared to the same period in 2012.

Mortgage banking income was positively impacted by an increase in secondary market loan volume during the second quarter of 2013 compared to the same period in 2012. The increased secondary market loan volume resulted from favorable low long term interest rates and the Bank's \$0 closing cost promotion, which began in January 2013. Altogether, Republic originated secondary market loans totaling \$124 million during the second quarter of 2013 as compared to \$46 million during the second quarter of 2012. Approximately 31% of the second quarter 2013 originated loans were for purchase transactions, while 69% were to refinance an existing loan at Republic or another financial institution.

While long-term interest rates at June 30, 2013 were relatively low as compared to historical levels, significant increases in these rates during the latter part of the second quarter of 2013 negatively impacted new loan application volume. The rise in interest rates is expected to continue to negatively impact future loan application volume during the remainder of 2013 and beyond.

Non-interest Expenses (Three Months Ended June 30, 2013 Compared to Three Months Ended June 30, 2012)

Total Company non-interest expenses increased \$2.2 million, or 8%, during the second quarter of 2013 compared to the same period in 2012. The most significant components comprising the increase in non-interest expense by business segment were as follows:

Traditional Banking segment

For the second quarter of 2013 compared to the same period in 2012, Traditional Banking non-interest expenses increased \$1.9 million, or 8%.

Salaries and benefits during the second quarter of 2013 increased \$1.1 million over the same period in 2012. Contributing to the Bank's rise in salaries and benefits was an increase in the Traditional Banking segment's full time equivalent employees (FTEs), which rose from 680 at June 30, 2012 to 735 at June 30, 2013. The increase in the Bank's FTEs was the result of retaining employees at the acquired banks and the hiring of additional employees to support the acquired operations and the Bank's long-term strategic growth plans.

Data processing expense decreased \$441,000 during the second quarter of 2013 compared to the same period in 2012 primarily due to \$301,000 in TCB-related conversion costs that were incurred during the second quarter of 2012.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Other real estate owned expense increased \$398,000 from \$551,000 during the second quarter of 2012 to \$949,000 during the second quarter of 2013 primarily due to expenses attributable to properties acquired in the 2012 acquisitions of failed banks.

See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.

Table of Contents

Republic Processing Group segment

For the second quarter of 2013 compared to the same period in 2012, RPG non-interest expenses increased \$412,000, or 14%.

Salaries and employee benefits during the second quarter of 2013 decreased \$365,000 compared to the second quarter of 2012, as the second quarter of 2013 reflected lower contract labor staffing costs.

Legal expense at RPG increased \$692,000 for the second quarter of 2013 compared to the same period in 2012. The increase in legal expense was directly related to ongoing costs associated with the Company's contract termination disputes with JHI and Liberty. Continued elevated legal expenses related to the JHI and Liberty contract disputes as well as the on-going negotiation of the MSA and RPA are expected for the remainder of 2013 with no projected offsetting revenues.

Supplies expense decreased \$340,000 related primarily to a reduction in costs resulting from the elimination of the RAL product and the year-to-year decline in RT volume.

OVERVIEW (Six Months Ended June 30, 2013 Compared to Six Months Ended June 30, 2012)

Net income for the six months ended June 30, 2013 was \$19.5 million, representing a decrease of \$72.6 million, or 79%, compared to the same period in 2012. Diluted earnings per Class A Common Share decreased to \$0.94 for the six months ended June 30, 2013 compared to \$4.38 for the same period in 2012.

Within the Company's Traditional Banking segment, comparability of net income for the first six months of 2013 to the same period in 2012 was significantly impacted by a \$27.8 million prior year bargain purchase gain recorded from the acquisition of TCB in an FDIC-assisted transaction. There were no FDIC-assisted acquisitions during the six months ended June 30, 2013. Management believes that opportunities for FDIC-assisted transactions that fit within the Company's strategic plan have declined in 2013 as compared to 2012. As a result of the decline in FDIC-assisted acquisition opportunities, management also believes that the pricing for the transactions that do become available will be less favorable, as competition increases for these limited opportunities.

In the Company's RPG segment, net income for the first six months of 2013 was \$4.3 million, a decline of \$60.0 million from the same period in 2012. RPG net income was significantly impacted by the previously disclosed elimination of the RAL product and the termination of RB&T's contracts with Liberty and JHI during the third quarter of 2012. The RAL product, eliminated effective April 30, 2012, generated \$45.2 million in revenues during the first six months of 2012 and helped the Company maintain a competitive advantage related to RT revenues. With the elimination of RALs and the termination of the Liberty and JHI contracts during the third quarter of 2012, both the volume and the Company's share of the revenue for the RT product were significantly reduced in 2013. RT revenues for the first six months of 2013 were \$13.7 million, a decrease of \$64.2 million, or 82%, from the same period in 2012.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The TRS segment of RPG derives substantially all of its revenues during the first and second quarters of the year and historically operates at a net loss during the second half of the year, as the Company prepares for the upcoming tax season.

General highlights by segment for the six months ended June 30, 2013 consisted of the following:

Traditional Banking segment

- Net income decreased \$14.3 million, or 53%, for the first six months of 2013 compared to the same period in 2012 with the previously mentioned pre-tax \$27.8 million bargain purchase gain in 2012 on the FDIC assisted acquisition of TCB substantially affecting prior year's comparability.
- Net interest income increased \$1.6 million, or 3%, for the first six months of 2013 to \$57.6 million. The Traditional Banking segment net interest margin remained at 3.58%.
- Provision for loan losses was \$1.0 million for the six months ended June 30, 2013 compared to \$4.0 million for the same period in 2012.
- Total non-interest income decreased \$26.1 million, or 66%, for the first six months of 2013 compared to the same period in 2012 primarily due to the previously discussed \$27.8 million bargain purchase gain.

Table of Contents

- Total non-interest expense decreased \$9,000 during the first six months of 2013 compared to the same period in 2012.
- Total non-performing loans to total loans for the Traditional Banking segment was 0.92% at June 30, 2013, compared to 0.82% at December 31, 2012 and 0.90% at June 30, 2012.
- The Bank's Warehouse Lending portfolio had \$178 million in loans outstanding at June 30, 2013 compared to \$217 million at December 31, 2012 and \$89 million at June 30, 2012.
- Gross loans declined by \$31 million, or 1%, from December 31, 2012 to June 30, 2013.
- Total deposits declined by \$11 million, or less than 1%, from December 31, 2012 to June 30, 2013.

Mortgage Banking segment

- Within the Mortgage Banking segment, mortgage banking income increased \$2.1 million, or 64%, during the first six months of 2013 compared to the same period in 2012.
- Mortgage banking income was positively impacted by an increase in secondary market loan volume during the first six months of 2013 compared to the same period in 2012 as the Bank initiated a \$0 closing cost promotion at the beginning of 2013 while interest rates remained at historically low levels during much of the first half of 2013.
- While long-term interest rates at June 30, 2013 were relatively low as compared to historical levels, significant increases in these rates during the latter part of the second quarter of 2013 negatively impacted new loan application volume. The rise in interest rates is expected to continue to negatively impact future loan application volume during the remainder of 2013 and beyond.

Republic Processing Group segment

- The total dollar volume of tax refunds processed during the first six months of 2013 decreased \$7.0 billion, or 66%, from the same period in 2012.

- Net income decreased \$60.0 million for the first six months of 2013 compared to the same period in 2012.
- RB&T permanently discontinued the offering of its RAL product effective April 30, 2012. Total RAL dollar volume was \$795 million during the 2012 tax season. Total net interest income on the RAL product was \$45.4 million during the 2012 tax season.
- RPG recorded a credit to its provision for loan losses of \$739,000 for the first six months of 2013, compared to a \$7.7 million charge for the same period in 2012.
- RPG posted non-interest income of \$14.4 million for the first six months of 2012 compared to \$78.1 million for the same period in 2012.
- Liberty and JHI unilaterally terminated their contracts with RPG's TRS division during the third quarter of 2012 and as a result, Republic processed no business during the first six months of 2013 from either of these tax service providers. On a combined basis, these contracts represented approximately 53% of the Company's 2012 RT volume.

RESULTS OF OPERATIONS (Six Months Ended June 30, 2013 Compared to Six Months Ended June 30, 2012)

Net Interest Income

Banking results of operations are primarily dependent upon net interest income. Net interest income is the difference between interest income on interest-earning assets, such as loans and investment securities and the interest expense on liabilities used to fund those assets, such as interest-bearing deposits, securities sold under agreements to repurchase and FHLB advances. Net interest income is impacted by both changes in the amount and composition of interest-earning assets and interest-bearing liabilities, as well as market interest rates.

Table of Contents

Total Company net interest income decreased \$43.6 million, or 43%, for the first six months of 2013 compared to the same period in 2012 with the decrease attributable to the elimination of the RAL product, effective April 30, 2012. The total Company net interest margin decreased 217 basis points to 3.56% for the same period. The most significant components affecting the total Company's net interest income by business segment were as follows:

Traditional Banking segment

Net interest income within the Traditional Banking segment increased \$1.6 million, or 3%, for the first six months of 2013 compared to 2012. The Traditional Banking net interest margin remained at 3.58%. The increase in net interest income and maintenance of the Bank's net interest margin during 2013 was primarily attributable to the following factors:

- As discussed in more detail within the *Loan Portfolio* section of this filing, the Bank began offering its Mortgage Warehouse Lending product during June of 2011. During the six months ended June 30, 2013, the Mortgage Warehouse Lending portfolio had average loans outstanding of \$147 million achieving an average yield of 4.54% as compared to average loans outstanding of \$48 million with an average yield of 4.45% during the first six months of 2012. As a result, interest income on warehouse lines of credit increased \$2.3 million during the first six months of 2013 compared to the same period in 2012. These loans are revolving lines of credit with a term of 364 days, contain interest rate floors and adjust monthly with one month LIBOR.
- As part of its acquisition of TCB, RB&T acquired loans, net of loans put back to the FDIC, with a fair value of approximately \$57 million and an initial projected effective yield of 7.94%. The Bank accreted \$1.6 million to earnings during the first six months of 2013 from discounts on its acquired TCB portfolio compared to \$168,000 for the same period in 2012. *See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.*
- As part of its acquisition of FCB, RB&T acquired loans with a fair value of approximately \$128 million and an initial projected effective yield of 7.36%. The Bank accreted \$1.7 million to earnings during the first six months of 2013 from discounts on its acquired FCB portfolio with no similar accretion occurring during the first six months of 2012, as the acquisition occurred during the third quarter of 2012. *See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.*

The total discount accretion of \$3.3 million during the first six months of 2013 that resulted from the TCB and FCB acquisitions positively impacted the Company's YTD net interest margin by 20 basis points. Management projects accretion of discount that resulted from the 2012 acquisitions to be \$784,000 for the remainder of 2013. The accretion estimate for the remainder of 2013 could be positively impacted by positive workout arrangements in which RB&T receives loan payoffs for an amount greater than their respective carrying values.

Exclusive of the positive impact on net interest income received by the Company for its warehouse lines of credit and its 2012 acquisitions, the Traditional Banking segment continues to experience downward repricing in its loan and investment portfolios resulting from ongoing paydowns and early payoffs. This downward repricing is expected to continue to cause compression in Republic's net interest income and net interest margin in the future. Additionally, because the FFTR (the index which many of the Bank's short-term deposit rates track) has remained at a target range between 0.00% and 0.25%, no future FFTR decreases from the Federal Open Markets Committee of the FRB are possible,

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

exacerbating the compression to the Bank's net interest income and net interest margin caused by its repricing loans and investments. The Bank is unable to precisely determine the ultimate negative impact to the Bank's net interest spread and margin in the future because several factors remain unknown at this time, such as future demand for its financial products and the overall future need for liquidity, among many other factors.

For additional information on the potential future effect of changes in short-term interest rates on Republic's net interest income, see the table titled "Traditional Banking Interest Rate Sensitivity for 2013" in this section of the filing.

Table of Contents

Republic Processing Group segment

Net interest income within the RPG segment decreased \$45.3 million for the six months ended June, 30 2013 compared to the same period in 2012. The decrease in net interest income at RPG was the result of the Company's discontinuation of the RAL product effective April 30, 2012.

Table 4 provides detailed total Company information as to average balances, interest income/expense and rates by major balance sheet category for the six month periods ended June 30, 2013 and 2012. Table 5 provides an analysis of total Company changes in net interest income attributable to changes in rates and changes in volume of interest-earning assets and interest-bearing liabilities for the same periods.

Net interest spread	3.29%	5.42%
Net interest margin	3.56%	5.73%

(1) *For purpose of this calculation, the fair market value adjustment on investment securities resulting from FASB ASC Topic 320, Investments Debt and Equity Securities, is included as a component of other assets.*

(2) *The amount of loan fee income included in total interest income was \$5.6 million and \$47.3 million for the six months ended June 30, 2013 and 2012.*

(3) *Average balances for loans include the principal balance of non-accrual loans and loans held for sale.*

(4) *The Refund Anticipation Loan product was discontinued effective April 30, 2012.*

Table of Contents

Table 5 illustrates the extent to which changes in interest rates and changes in the volume of total Company interest-earning assets and interest-bearing liabilities impacted Republic's interest income and interest expense during the periods indicated. Information is provided in each category with respect to (i) changes attributable to changes in volume (changes in volume multiplied by prior rate), (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume) and (iii) net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Table of Contents

Provision for Loan Losses (Six Months Ended June 30, 2013 Compared to Six Months Ended June 30, 2012)

The Company recorded a provision for loan losses of \$280,000 for the first six months 2013, compared to a provision of \$11.6 million for the same period in 2012. The significant components comprising the Company's decreased provision for loan losses by business segment were as follows:

Traditional Banking segment

The Traditional Banking provision for loan losses during the first six months of 2013 was \$1.0 million, a \$3.0 million decline from the \$4.0 million recorded during the first six months of 2012. The significant components comprising the Traditional Bank's decreased provision for loan losses were as follows:

- The Bank posted loss provisions for its PCI of \$766,000 during the first six months of 2013. These provisions reflect probable shortfalls in cash flows below day-one estimates for these loans. No analogous provisions were made during 2012, as the acquisition was still within its day-one measurement period.
- The Bank posted a \$3.2 million net reduction in provision for loan losses associated with Substandard loans. During the first six months of 2013 the Bank had no significant impairment charges for individually evaluated large relationships compared to 2012 when the Bank experienced \$1.0 million in provision expense for four large classified real estate secured credits.

As a percentage of total loans, the Traditional Banking allowance for loan losses decreased to 0.86% at June 30, 2013 compared to 0.90% at December 31, 2012 and 0.92% at June 30, 2012. The Company believes, based on information presently available, that it has adequately provided for loan losses at June 30, 2013.

See the section titled Asset Quality in this section of the filing under Comparison of Financial Condition at June 30, 2013 and December 31, 2012 for additional discussion regarding the Company's provision for loan losses, classified assets, allowance for loan losses, non-performing loans, delinquent loans, impaired loans and TDRs.

Republic Processing Group segment

The Company ceased offering the RAL product effective April 30, 2012. As a result, RPG had no RAL losses during the six months ended June 30, 2013. During the six months ended June 30, 2013, the Company recorded a credit of \$739,000 to provision expense for recoveries of prior period losses. During the six months ended June 30, 2012, the Company recorded a provision of \$7.7 million for RAL losses.

Table of Contents

An analysis of changes in the allowance for loan losses and selected ratios follows:

Table of Contents

Non-interest Income (Six Months Ended June 30, 2013 Compared to Six Months Ended June 30, 2012)

Total Company non-interest income decreased \$87.6 million, or 72%, for the first six months of 2013 compared to the same period in 2012. The most significant components comprising the total Company's change in non-interest income by business segment were as follows:

Traditional Banking segment

Traditional Banking segment non-interest income decreased \$26.1 million, or 66%, for the first six months of 2013 compared to the same period in 2012.

Service charges on deposit accounts decreased \$17,000 during the first six months of 2013 compared to the same period in 2012. The decrease in service charges was primarily the result of a decline in monthly below balance fee income. The Bank earns a substantial majority of its fee income related to its overdraft service program from the per item fee it assesses its customers for each insufficient funds check or electronic debit presented for payment. The total net per item fees included in service charges on deposits for the first six months of 2013 and 2012 were \$3.8 million and \$3.6 million. The total net daily overdraft charges included in interest income for the first six months of 2013 and 2012 was \$797,000 and \$804,000, respectively.

During the first six months of 2012, the Company recorded an initial bargain purchase gain of \$27.8 million as a result of the TCB acquisition. The bargain purchase gain was realized because the overall price paid by RB&T was substantially less than the fair value of the TCB assets acquired and liabilities assumed in the transaction.

See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.

Mortgage Banking segment

Within the Mortgage Banking segment, mortgage banking income increased \$2.1 million, or 64%, during the first six months of 2013 compared to the same period in 2012.

Mortgage banking income was positively impacted by an increase in secondary market loan volume during the first six months of 2013 compared to the same period in 2012 as the Bank initiated a \$0 closing cost promotion at the beginning of 2013 while interest rates remained at historically low levels during much of the first half of 2013. As a result of these factors, Republic originated secondary market loans totaling \$208 million during the first half of 2013 compared to \$100 million during the same period in 2012.

While long-term interest rates at June 30, 2013 were relatively low as compared to historical levels, significant increases in these rates during the latter part of the second quarter of 2013 negatively impacted new loan application volume. The rise in interest rates is expected to continue to negatively impact future loan application volume during the remainder of 2013 and beyond.

Republic Processing Group segment

RPG non-interest income decreased \$63.7 million, or 82%, during the first six months of 2013 compared to the same period in 2012. The decrease was the result of pricing pressures via revenue sharing driven by increased competition resulting from the elimination of the RAL product and the previously disclosed termination of RB&T's contracts with Liberty and JHI.

For additional discussion of non-interest income related to RPG, see the quarterly non-interest income discussion for the RPG business segment.

Non-interest Expenses (Six Months Ended June 30, 2013 Compared to Six Months Ended June 30, 2012)

Total Company non-interest expenses declined \$7.6 million, or 11%, during the first six months of 2013 compared to the same period in 2012. RPG non-interest expenses declined \$7.3 million while the Traditional Banking segment and Mortgage Banking segment decreased a total of \$300,000 for the first six months of 2013 compared to the same period in 2012. The most significant components comprising the decrease in total Company non-interest expense by business segment were as follows:

Table of Contents

Traditional Banking segment

Salaries and benefits increased \$2.3 million for the first six months of 2013. Contributing to the Bank's rise in salaries and benefits was an increase in the Traditional Banking segment's full time equivalent employees (FTEs), which rose from 680 at June 30, 2012 to 735 at June 30, 2013. The increase in the Bank's FTEs was the result of retaining employees at the acquired banks and the hiring of additional employees to support the acquired bank's operations and the Bank's long-term growth plans.

During the first quarter of 2012, the Bank prepaid \$81 million in FHLB advances that were originally scheduled to mature between October 2012 and May 2013. These advances had a weighted average cost of 3.56%. The Bank incurred a \$2.4 million early termination penalty in connection with this prepayment.

Data processing expense decreased \$867,000 during the first six months of 2013 compared to the same period in 2012 primarily due to \$607,000 in 2012 TCB-related data processing costs and internet banking enhancements.

Contributions expense decreased \$565,000 during the first six months of 2013 compared to the same period in 2012 due to the first quarter 2012 contribution to the Republic Bank Foundation.

Audit and professional fees decreased \$276,000 during the first six months of 2013 compared to 2012 primarily due to the 2012 TCB acquisition and the respective external audit, valuation and tax consulting services required as part of the acquisition.

OREO expense increased \$684,000 during the six months of 2013 compared to the same period in 2012 consistent with the increase in foreclosed properties from RB&T's 2012 acquisitions of failed banks.

See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.

Bank Franchise tax expense represents taxes paid to different state taxing authorities based on capital. The substantial majority of the Company's Bank Franchise expense is paid to the commonwealth of Kentucky. Bank Franchise expense related to the Traditional Bank increased \$300,000 during the first six months of 2013 compared to 2012 primarily due to an increase in capital associated with continued strong earnings and the higher capital base at the Bank.

Republic Processing Group segment

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Salaries and employee benefits decreased \$2.3 million, or 38%, for the first six months of 2013 compared to the same period in 2012. The first six months of 2013 reflected lower contract labor staffing costs and reduced bonus accruals tied to the expected shortfall in TRS gross operating profit for the year as compared to its goal.

Legal expense at RPG was \$851,000 for the first six months of 2013 compared to \$33,000 for the same period in 2012. The increase in legal expense was directly related to ongoing costs associated with the Company's disagreement with JHI and Liberty regarding the termination of its contracts with these vendors. Continued elevated legal expenses related to the JHI and Liberty contract disputes as well as the on-going negotiation of the MSA and RPA are expected for the remainder of 2013 with no projected offsetting revenues.

The following expenses and their related decreases were a function of the elimination of the RAL product and the decline in RT volume year over year:

- Charitable contributions decreased \$1.9 million;
- Occupancy and equipment expense decreased \$581,000;
- Communication and transportation expenses decreased \$1.5 million;
- Supplies expense decreased \$849,000;
- Bank franchise taxes decreased \$364,000;
- FDIC insurance expense decreased \$98,000; and
- Audit and professional fees decreased \$624,000.

Table of Contents

COMPARISON OF FINANCIAL CONDITION AT JUNE 30, 2013 AND DECEMBER 31, 2012

Cash and Cash Equivalents

Cash and cash equivalents include cash, deposits with other financial institutions with original maturities less than 90 days and federal funds sold. Republic had \$98 million in cash and cash equivalents at June 30, 2013 compared to \$138 million at December 31, 2012. The Bank's restricted cash includes \$2 million in a money market account as collateral to secure settlement obligations related to the RPG segment's prepaid card program as of June 30, 2013. No similar collateral was maintained as of December 31, 2012.

For cash held at the Federal Reserve Bank (FRB), the Bank earns a yield of 0.25%. For all other cash held within the Bank's branch and ATM networks, the Bank does not earn interest. Due to ongoing contraction within the Bank's net interest margin, management is anticipating it will maintain a general strategy during 2013 to keep minimal amounts of cash on its balance sheet, within Board approved policy limits.

Securities Available for Sale

Securities available for sale primarily consists of U.S. Treasury securities and U.S. Government agency obligations, including agency mortgage backed securities (MBSs) and agency collateralized mortgage obligations (CMOs). The agency MBSs primarily consist of hybrid mortgage investment securities, as well as other adjustable rate mortgage investment securities, underwritten and guaranteed by Ginnie Mae (GNMA), Freddie Mac (FHLMC) and Fannie Mae (FNMA). Agency CMOs held in the investment portfolio are substantially all floating rate securities that adjust monthly. The Bank uses a portion of the investment securities portfolio as collateral to Bank clients for securities sold under agreements to repurchase (repurchase agreements). The remaining eligible securities that are not pledged to secure client repurchase agreements may be pledged to the Federal Home Loan Bank as collateral for the Bank's borrowing line. Strategies for the investment securities portfolio may be influenced by economic and market conditions, loan demand, deposit mix and liquidity needs.

In order to mitigate contraction within its net interest margin and improve its overall risk position relative to a rise in interest rates, the Bank purchased \$20 million in floating rate corporate bonds with an initial weighted average yield of 1.36% during the quarter ending June 30, 2013. The purchased bonds have a weighted average life of 7 years, were rated investment grade by accredited ratings agencies as of the respective purchase dates, and overall represented 4% of the Bank's investment portfolio as of June 30, 2013.

While management does not consider the \$20 million of corporate bonds purchased to be material relative to the Bank's overall balance sheet structure, these purchases do represent a deviation from the Bank's historical purchase patterns of primarily US Government or US Government agency backed securities. Management does not anticipate material future purchases of corporate bonds, however, the future timing and amount of corporate bond purchases, if any, will be based on various factors including, but not limited to, the Bank's earnings, liquidity, interest rate risk, and capital positions at the time.

Table of Contents

Loan Portfolio

Net loans, primarily consisting of secured real estate loans, decreased by \$31 million, or 1% during 2013 to \$2.6 billion at June 30, 2013.

In June 2011, the Bank began offering warehouse lines of credit and had \$178 million in outstanding loans from \$353 million in committed lines of credit at June 30, 2013. Through these credit lines, the Bank provides short-term, revolving credit facilities to mortgage bankers across the nation. These credit facilities are secured by single family, first lien residential real estate loans. The credit facility enables mortgage banking customers to close single family, first lien residential real estate loans in their own name and temporarily fund their inventory of these closed loans until the loans are sold to investors approved by the Bank. These individual loans are expected to remain on the warehouse line for an average of 15 to 30 days. Interest income and loan fees are accrued for each individual loan during the time the loan remains on the warehouse line and are collected when the loan is sold to the secondary market investor. The Bank receives the sale proceeds of each loan directly from the investor and applies the funds to pay off the warehouse advance and related accrued interest and fees. The remaining proceeds are credited to the mortgage banking customer. As of December 31, 2012, the Bank had \$217 million of outstanding loans from total committed credit lines of \$331 million. The decrease in the outstanding balances of warehouse loans was primarily due to the rise in long-term interest rates during the latter part of the second quarter of 2013, which negatively impacted refinance volume among the Bank's mortgage warehouse clients.

The Bank's warehouse lending business is significantly influenced by the volume and composition of residential mortgage purchase and refinance transactions among the Bank's mortgage banking clients. For the six months ended June 30, 2013, the Bank's warehouse volume consisted of 53% purchase transactions in which the mortgage company's borrower was purchasing a new residence, and 47% refinance transactions, in which the mortgage company's client was refinancing an existing mortgage loan. Purchase volume is driven by a number of factors, including but not limited to, the overall economy, the housing market and long-term residential mortgage interest rates; while refinance volume is primarily driven by long-term residential mortgage interest rates. The Bank's warehouse lending business has benefited from recent low or declining long-term residential mortgage rates which have incentivized a high volume of borrowers to refinance their mortgages. Long term interest rates began rising rapidly, however, in May of 2013. These increases in long-term residential mortgage interest rates have and will likely continue to decrease refinance activity and, without an equivalent increase in purchases and/or growth in the Bank's warehouse client base, will likely have an adverse impact on the Bank's warehouse loans outstanding for the remainder of 2013.

In an effort to grow its loan portfolio and further combat net interest margin compression, the Company began offering a 15-year fixed-rate commercial real estate (CRE) loan during the first quarter of 2013. The initial offering rate on these loans was 3.50% when the program was started in January of 2013, but was later adjusted to 3.79% in February 2013 and 3.95% in June 2013, consistent with the market demand and interest rate environment. During the six months ended June 30, 2013 the Company closed approximately \$58 million of these loans with a weighted average rate of approximately 3.55%. Because the majority of these loans were closed in the mid to late second quarter timeframe, they had minimal impact on the Company's net interest income for the second quarter and first six months of 2013. The Company's pipeline of these loans that were in process and still being underwritten at June 30, 2013 was approximately \$74 million. To mitigate its risk of rising interest rates to fund these longer-term loans, the Company borrowed \$50 million from the Federal Home Loan Bank with a weighted average rate of 1.50% and a weighted average life of approximately 7 years.

As rates rose dramatically during May and June of 2013, the Bank ceased accepting new loan applications for its 15-year promotional CRE product and began promoting a 10/1 Adjustable Rate Mortgage (ARM) product with an offering rate of 4.49% to its CRE clients. The maximum amortization period for the 10/1 ARM promotional product is 20 years for owner occupied borrowers and 15 years for non-owner occupied borrowers. Due to the relative newness of 10/1 ARM product, the Bank only had \$2 million of 10/1 applications in underwriting as of June 30, 2013.

2012 Acquisitions of Failed Banks:

The contractual amount of the loans associated with the TCB transaction decreased from \$42 million as of the December 31, 2012 to \$34 million as of June 30, 2013. The carrying value of the loans purchased in the TCB transaction was \$31 million at December 31, 2012 compared to \$27 million as of June 30, 2013.

Table of Contents

The contractual amount of the loans associated with the FCB transaction decreased from \$139 million as of December 31, 2012 to \$109 million as of June 30, 2013. The carrying value of the loans purchased in the FCB transaction was \$108 million as of December 31, 2012 compared to \$84 million as of June 30, 2013.

Asset Quality

The composition of loans classified within the allowance for loan losses follows:

Table 7 Classified Assets

(in thousands)	June 30, 2013	December 31, 2012
Loss	\$	\$
Doubtful		
Substandard	32,942	36,304
Special Mention/Watch	40,755	48,458
Purchased Credit Impaired Loans Group 1	55,130	87,033
Purchased Credit Impaired Loans Group 2	8,333	1,160
Total Classified Loans	\$ 137,160	\$ 172,955

Purchased loans accounted for under Accounting Standards Codification (ASC) Topic 310-20, *Nonrefundable Fees and Other Costs*, are accounted for as are any other Bank-originated loan, potentially becoming nonaccrual or impaired, as well as being risk rated under the Bank's standard practices and procedures. In addition, purchased loans accounted for under ASC Topic 310-20 are considered in the determination of the required allowance for loan and lease losses.

Related to PCI loans accounted for under ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, management separately monitors this portfolio and on a quarterly basis reviews the loans contained within this portfolio against the factors and assumptions used in determining the day-one fair values. In addition to its quarterly evaluation, a loan is typically reviewed when it is modified or extended, or when material information becomes available to the Bank that provides additional insight regarding the loan's performance, the status of the borrower, or the quality or value of the underlying collateral.

To the extent that a PCI loan is performing in accordance with management's performance expectation established in conjunction with the determination of the day-one fair values, such loan is classified in the Purchased Credit Impaired Loans Group 1 (PCI-1) category within the Bank's classified loans, which is the equivalent of a Special Mention/Watch classification for the Bank's originated loans. Any improvement in the expected performance of a PCI-1 loan would result in an adjustment to accretible yield, which would have a positive impact on interest income.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

PCI-1 loans may include loans that qualify as TDRs, and therefore are considered impaired under the applicable TDR accounting standards. These TDRs within the PCI-1 category, however, will not be automatically downgraded to Purchased Credit Impaired Group 2 (PCI-2) loans and will not require an additional provision for loan losses if their restructured cash flows are within management's initial expectations when the loans were booked at fair value as of the date of acquisition. At June 30, 2013 and December 31, 2012, there were approximately \$2 million and \$3 million in PCI loans past due 90 days or more and still on accrual status.

To the extent that a PCI-1 loan's performance deteriorates from management's expectation established in conjunction with the determination of the day-one fair values, such a loan would be classified a PCI-2 loan. PCI-2 loans would generally be considered impaired and could require loan loss provisions. Any improvement in the expected performance of a PCI-2 loan would result in a reversal of the provision for loan losses to the extent of prior charges and then an adjustment to accretable yield, which would have a positive impact on interest income.

See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.

Table of Contents

The Bank maintains an allowance for probable incurred credit losses inherent in the Bank's loan portfolio, which includes overdrawn deposit accounts. Management evaluates the adequacy of the allowance for the loan losses on a monthly basis and presents and discusses the analysis with the Audit Committee and the Board of Directors on a quarterly basis.

The allowance for loan loss consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component is based on historical loss experience with potential adjustments for qualitative factors. For the impact on the allowance for loan losses of loans acquired in the acquisitions of failed banks, see additional discussion under *Footnote 2 2012 Acquisitions of Failed Banks* of Part 1 Item 1 Financial Statements.

A loan is impaired when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loans that meet the following classifications are considered impaired:

- All loans internally classified as Substandard, Doubtful or Loss;
- All loans on non-accrual status and loans past due over 90 days still on accrual;
- All retail and commercial troubled debt restructurings (TDRs). TDRs are loans for which the terms have been modified resulting in a concession, and for which the borrower is experiencing financial difficulties;
- All loans classified as PCI-2; and
- Any other situation where the collection of total amount due for a loan is improbable or otherwise meets the definition of impaired.

The Bank maintains a list of classified commercial, commercial real estate loans and large single family residential and home equity loans. The Bank reviews and monitors these classified loans on a regular basis. Generally, loans are designated as classified to ensure more frequent monitoring. Classified loans are reviewed to ensure proper earning status and management strategy. If it is determined that there is serious doubt as to performance in accordance with original terms of the contract, then the loan is generally downgraded and often placed on non-accrual status.

Loans, including impaired loans, but excluding consumer and PCI loans, are typically placed on non-accrual status when the loans become past due 80 days or more as to principal or interest, unless the loans are adequately secured and in the process of collection. Past due status is based on how recent payments have been received. When loans are placed on non-accrual status, all unpaid interest is reversed from interest income and accrued interest receivable. These loans remain on non-accrual status until the borrower demonstrates the ability to become and remain current or the loan or a portion of the loan is deemed uncollectible and is charged off. Consumer loans are reviewed periodically and generally charged off when the loans reach 120 days past due or at any earlier point the loan is deemed uncollectible. PCI loans are separately monitored and reviewed at least quarterly against the factors and assumptions used in determining the day-one fair values. PCI loans would be placed on non-accrual when management determines that based on estimated cash flow, the Bank will be unable to accrete any yield on such loan. PCI loans may also be placed on non-accrual if management cannot reasonably estimate future cash flows on such loans.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Impairment is measured on a loan by loan basis by evaluating either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral-dependent.

In addition to obtaining appraisals at the time of loan origination, the Bank updates appraisals for collateral-dependent loans with potential impairment. Updated appraisals for collateral-dependent commercial related loans exhibiting an increased risk of loss are typically obtained within one year of the last appraisal. Collateral values for past due residential mortgage loans and home equity loans are generally updated prior to a loan becoming 90 days delinquent, but no more than 180 days past due. When determining the allowance amount, to the extent updated collateral values cannot be obtained due to the lack of recent comparable sales or for other reasons, the Bank discounts the valuation of the collateral primarily based on the age of the appraisal and the real estate market conditions of the location of the underlying collateral.

The general component of the allowance for loan losses covers loans collectively evaluated for impairment and is based on historical loss experience with potential adjustments for current relevant qualitative factors. The historical loss experience is determined by loan performance and class and is based on the actual loss history experienced by the Bank. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans, are included in the general component unless classified as TDRs.

Table of Contents

For Pass rated or nonrated loans, management evaluates the loan portfolio by reviewing the historical loss rate for each respective loan class. Management evaluates the following historical loss rate scenarios:

- Rolling four quarter average
- Rolling eight quarter average
- Rolling twelve quarter average
- Rolling sixteen quarter average
- Current year to date historical loss factor (average)
- Prior annual three year historical loss factors
- Peer group data

Currently, management has assigned a greater emphasis to the higher of the rolling eight, twelve, or sixteen quarter averages when determining its historical loss factors for its Pass rated and nonrated loans.

Historical loss rates for non-performing loans, which are not individually evaluated for impairment, are analyzed using loss migration analysis by loan class of prior year net charge-off results.

Loan classes are evaluated utilizing subjective factors in addition to the historical loss calculations to determine a loss allocation for each of those classes. Management assigns risk multiples to certain classes to account for qualitative factors such as:

- Changes in nature, volume and seasoning of the loan portfolio;
- Changes in experience, ability, and depth of lending management and other relevant staff;
- Changes in the quality of the Bank's loan review systems;
- Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;
- Changes in the volume and severity of past due, nonaccrual and classified loans;
- Changes in the value of underlying collateral for collateral-dependent loans;

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

- Changes in international, national, regional, and local economic and business conditions and developments that affect the collectibility of the loan portfolio, including the condition of various market segments;
- The existence and effect of any concentrations of credit, and changes in the level of such concentrations; and
- The effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the institution's existing portfolio.

As this analysis, or any similar analysis, is an imprecise measure of loss, the allowance is subject to ongoing adjustments. Therefore, management will often take into account other significant factors that may be necessary or prudent in order to reflect probable incurred losses in the total loan portfolio.

Allowance for Loan Losses

The Bank's allowance for loan losses decreased \$1.2 million, or 5%, during the first six months of 2013 to \$23 million at June 30, 2013. As a percent of total loans, the traditional banking allowance for loan losses decreased to 0.86% at June 30, 2013 compared to 0.90% at December 31, 2012.

Notable fluctuations in the allowance for loan losses were as follows:

- The Bank increased its purchased credit impaired loans (PCI) reserves by \$766,000 during the first six months of 2013. These provisions reflect probable shortfalls in cash flows below day-one estimates for these loans. No analogous provisions were made during 2012 as the acquisition was still within its day-one measurement period.
- The Bank charged off approximately \$1.9 million in loan balances during 2013 that were previously allocated for within the allowance for loan losses.

Table of Contents**Non-performing Loans**

Non-performing loans include loans on non-accrual status and loans 90 days or more past due and still accruing. Impaired loans that are not placed on non-accrual status are not included as non-performing loans. The non-performing loan category includes impaired loans totaling approximately \$24 million at June 30, 2013, with approximately \$14 million of these loans also reported as TDRs. The non-performing loan category includes impaired loans totaling approximately \$18 million at December 31, 2012, with approximately \$10 million of these loans also reported as TDRs.

Non-performing loans to total loans increased to 0.92% at June 30, 2013, from 0.82% at December 31, 2012, as the total balance of non-performing loans increased by over \$2 million during the six months ended June 30, 2013. The increase in non-performing loans was concentrated within the non-accrual category. The increase in non-accrual loans resulted from discussions between the Bank and its anticipated new federal regulator, the OCC, regarding the OCC's interpretation of the interagency regulatory guidelines regarding the timing of charge-offs and the resulting impact of those charge-offs to nonaccrual loans. These discussions lead the Bank to record partial charge-offs during the second quarter of 2013 of \$735,000 for \$8.9 million of loans the Bank already had graded as substandard. All \$735,000 of these partial charge-offs had been fully reserved for in a previous period. In addition, as a result of these partial charge-offs, the Bank also moved approximately \$7 million of its substandard loans that were in an accrual status to a non-accrual status during the second quarter of 2013 despite the fact that these loans were paid current as of June 30, 2013.

The following table details the Bank's non-performing loans and non-performing assets and select credit quality ratios:

Table 8 Non-performing Loans and Non-performing Assets Summary

dollars in thousands)	June 30, 2013	December 31, 2012
Loans on non-accrual status (1)	\$ 21,922	\$ 18,506
Loans past due 90 days or more and still on accrual (2)	2,159	3,173
Total non-performing loans	24,081	21,679
Other real estate owned	15,248	26,203
Total non-performing assets	\$ 39,329	\$ 47,882
Credit Quality Ratios - Total Company		
Non-performing loans to total loans	0.92%	0.82%
Non-performing assets to total loans (including OREO)	1.49%	1.79%
Non-performing assets to total assets	1.19%	1.41%
Credit Quality Ratios - Acquired Banks		
Non-performing loans to total loans	1.95%	2.29%
Non-performing assets to total loans (including OREO)	7.04%	11.54%
Non-performing assets to total assets	7.04%	8.73%

(1) Loans on non-accrual status include impaired loans. See Footnote 4 Loans and Allowance for Loan Losses of Part I Item 1 Financial Statements for additional discussion regarding impaired loans.

(2) *All loans 90 days past due and still accruing are PCI loans accounted for under ASC 310-30.*

Approximately \$11 million, or 47%, of the Bank's total non-performing loans at June 30, 2013 was concentrated in the residential real estate category with the underlying collateral predominantly located in the Bank's primary market area of Kentucky. The Bank does not consider any of these loans to be sub-prime. The Bank's non-performing residential real estate concentration was \$11 million, or 53%, as of December 31, 2012.

Table of Contents

Approximately \$10 million, or 40%, of the Bank's total non-performing loans was concentrated in the commercial real estate and real estate construction loan portfolios as of June 30, 2013. These loans are secured primarily by commercial properties. In addition to the primary collateral, the Bank also obtained in many cases, at the time of origination, personal guarantees from the principal borrowers and secured liens on the guarantors' primary residences. The Bank's non-performing commercial and construction real estate concentration was \$7 million, or 31%, as of December 31, 2012.

The composition of the Bank's non-performing loans follows:

Table 9 Non-performing Loan Composition

(in thousands)	June 30, 2013	December 31, 2012

Table of Contents

Approximately \$12 million in non-performing loans at December 31, 2012, were removed from the non-performing loan classification during the first six months of 2013. Approximately \$2 million, or 15%, of these loans were removed from the non-performing category because they were charged-off. Approximately \$3 million, or 24%, in loan balances were transferred to OREO with \$3 million, or 25%, refinanced at other financial institutions. The remaining \$4 million, or 36%, were returned to accrual status for performance reasons, such as six consecutive months of performance. Of the \$4 million returned to accrual status, one relationship of approximately \$2 million accounted for 43% of the total amount returned to accrual status.

The following tables detail the activity of the Bank's non-performing loans:

Table 12 Rollforward of Non-performing Loan Activity

(in thousands)	2013	2012
Non-performing loans at January 1,	\$ 21,679	\$ 23,306
Loans added to non-performing status	14,098	8,466
Acquired bank loans added to non-performing status	857	936
Loans removed from non-performing status	(11,972)	(10,468)
Principal paydowns	(581)	(371)
Non-performing loans at June 30,	\$ 24,081	\$ 21,869

Table 13 Detail of Loans Removed from Non-Performing Status

(in thousands)	2013	2012
Loans charged-off	\$ (1,751)	\$ (1,799)
Loans transferred to OREO	(2,906)	(4,082)
Loans refinanced at other institutions	(3,037)	(1,909)
Loans returned to accrual status	(4,278)	(2,678)
Total loans removed from non-performing status	\$ (11,972)	\$ (10,468)

Based on the Bank's review of the large individual non-performing commercial credits, as well as its migration analysis for its residential real estate and home equity non-performing portfolio, management believes that its reserves as of June 30, 2013, are adequate to absorb probable losses on non-performing loans.

Delinquent Loans

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Delinquent loans to total loans decreased to 0.62% at June 30, 2013, from 0.79% at December 31, 2012, as the total balance of delinquent loans decreased by almost \$5 million for the same period. With the exception of PCI loans, generally all traditional bank loans 90 days past due or more as of June 30, 2013 and December 31, 2012 were on non-accrual status.

Table of Contents

The composition of the Bank's past due loans follows:

Table of Contents

Approximately \$12 million in delinquent loans at December 31, 2012, were removed from delinquent status as of June 30, 2013. Approximately \$1 million, or 10%, of these loans were removed from the delinquent category because they were charged-off. Approximately \$4 million, or 33%, in loan balances were transferred to OREO with \$4 million, or 31%, refinanced at other financial institutions. The remaining \$3 million, or 26%, in delinquent loans paid current in 2013.

The Bank had \$112 million in loans outstanding related to the 2012 acquisitions of failed banks at June 30, 2013, with approximately \$3 million of the purchased loans (accounted for under both ASC Topic 310-20 and ASC Topic 310-30) past due 30 days or more.

See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 *2012 Acquisitions of Failed Banks* of Part I Item 1 *Financial Statements*.

Total loans removed from delinquent status	\$ (12,341)	\$ (15,986)

Impaired Loans and Troubled Debt Restructurings

The Bank's policy is to charge off all or that portion of its investment in an impaired loan upon a determination that it is probable the full amount will not be collected. Impaired loans totaled \$110 million at June 30, 2013 compared to \$106 million at December 31, 2012. Impaired loans from the 2012 acquisitions of failed banks totaled \$27 million at June 30, 2013 compared to \$18 million at December 31, 2012.

A TDR is the situation where, due to a borrower's financial difficulties, the Bank grants a concession to the borrower that the Bank would not otherwise have considered. The majority of the Bank's TDRs involve a restructuring of loan terms such as a temporary reduction in the payment amount to require only interest and escrow (if required) and/or extending the maturity date of the loan. Non-accrual loans modified as TDRs remain on non-accrual status and continue to be reported as non-performing loans. Accruing loans modified as TDRs are evaluated for non-accrual status based on a current evaluation of the borrower's financial condition, and ability and willingness to service the modified debt. As of June 30, 2013, the Bank had \$95 million in TDRs, of which \$14 million were also on non-accrual status. As of December 31, 2012, the Bank had \$93 million in TDRs, of which \$17 million were also on non-accrual status.

Table of Contents

The composition of the Bank's impaired loans follows:

Table 18 Impaired Loan Composition

(in thousands)	June 30, 2013	December 31, 2012
Troubled debt restructurings	\$ 95,135	\$ 93,003
Classified impaired loans (which are not TDRs)	14,849	12,704
Total impaired loans	\$ 109,984	\$ 105,707

See Footnote 4 *Loans and Allowance for Loan Losses* of Part I Item 1 *Financial Statements* for additional discussion regarding impaired loans and TDRs.

Other Real Estate Owned

The composition of the Bank's OREO follows:

Table 19 Other Real Estate Owned Composition

(in thousands)	June 30, 2013	December 31, 2012
Residential real estate	\$ 3,511	\$ 6,281
Commercial real estate	2,372	7,693
Real estate construction	9,365	12,229
Total other real estate owned	\$ 15,248	\$ 26,203

The composition of the Bank's other real estate stratified by the number of properties within a specific value range follows:

Table 20 Stratification of Other Real Estate Owned

Number of Properties and Carrying Value Range

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Table 21 Rollforward of Other Real Estate Owned Activity

(in thousands)	2013	2012
Balance, January 1,	\$ 26,203	\$ 10,956
OREO acquired from failed bank acquisitions at fair value		9,830
Transfer from loans to OREO	4,242	12,078
Proceeds from sale	(15,624)	(14,597)
Net gain on sale	1,311	419
Writedowns	(884)	(341)
Balance, June 30,	\$ 15,248	\$ 18,345

The fair value of OREO represents the estimated value that management expects to receive when the property is sold, net of related costs to sell. These estimates are based on the most recently available real estate appraisals, with certain adjustments made based on the type of property, age of appraisal, current status of the property and other related factors to estimate the current value of the property.

Approximately \$6 million of the OREO balance at June 30, 2013 related to the 2012 acquisitions of failed banks and relates predominantly to commercial real estate and real estate construction loans. *See additional discussion regarding the 2012 acquisitions of failed banks under Footnote 2 2012 Acquisitions of Failed Banks of Part I Item 1 Financial Statements.*

Approximately \$9 million of the OREO balance at June 30, 2013 related to loans transferred to OREO in connection with the Banks traditional lending markets. Approximately \$3 million of this balance was tied to retail residential real estate properties, \$5 million to construction real estate, with the remaining \$814,000 tied to commercial real estate. Approximately 47%, or \$4 million, of the construction balance related to one land development property added during the first six months of 2012 located in the Bank's greater Louisville, Kentucky market.

Deposits

Total Company deposits decreased \$12 million, or less than 1%, from December 31, 2012 to \$2 billion at June 30, 2013. Total Company interest-bearing deposits decreased \$21 million, or 1% and total Company non-interest bearing deposits increased \$9 million, or 2%. Deposits related to the 2012 acquisitions of failed banks totaled \$64 million at June 30, 2013. Former TCB deposits consisted of non-interest bearing of \$4 million in interest-bearing deposits and \$22 million in non-interest bearing deposits, while former FCB deposits consisted of \$32 million in

interest-bearing deposits and \$6 million in non-interest bearing deposits.

Excluding non-interest bearing deposits associated with the 2012 acquisitions of failed banks, non-interest bearing deposits increased \$10 million, or 2%, during 2013.

Table of Contents

During most of 2012, non-interest bearing accounts, in general, remained an attractive product offering to clients due to the unlimited FDIC insurance feature. This unlimited guaranty by the FDIC expired on December 31, 2012. Management does not believe that the expiration of the unlimited FDIC insurance guaranty had an immediate negative impact on the Bank's non-interest bearing deposit balances, however, at this time, management cannot predict the future impact that may yet occur.

Excluding interest-bearing deposits associated with the 2012 acquisitions of failed banks, interest-bearing deposits increased \$26 million, or 2%, during 2013. Substantially all of the increase in interest-bearing deposits represented a transfer by one account out of a repurchase agreement into the NOW category of deposits. At this time, management is uncertain as to the long-term nature of this large deposit.

See additional discussion regarding the 2012 acquisitions under Footnote 2 2012 Acquisitions of Failed Banks in this section of the filing under Part I Item 1 Financial Statements.

Securities Sold Under Agreements to Repurchase and Other Short-term Borrowings

Securities sold under agreements to repurchase and other short-term borrowings decreased \$122 million, or 49%, during the first six months of 2013. Approximately \$32 million of this decline was related to the previously discussed transfer into deposits by one customer relationship. Approximately \$24 million of the decrease in repurchase agreements was due to a change in ownership of the account holder, with the new account owner transferring the funds to another financial institution during the first quarter. The remaining decrease was related to customary account fluctuations as these balances are subject to large fluctuations on a daily basis. The substantial majority of these accounts are indexed to immediately repricing indices such as the Fed Funds Target Rate.

Federal Home Loan Bank Advances

FHLB advances increased \$49 million, or 9%, from December 31, 2012 to \$592 million at June 30, 2013. During the first six months of 2013, the Bank borrowed \$50 million in FHLB advances primarily to fund and mitigate the Bank's interest rate risk for its 15-year fixed commercial loan product initiative. These advances had a weighted average rate of 1.50% and a weighted average life of 7 years.

In addition to using FHLB advances as a funding source, the Bank also utilizes longer-term FHLB advances as an interest rate risk management tool. Overall use of these advances during a given year is dependent upon many factors including asset growth, deposit growth, current earnings, and expectations of future interest rates, among others. With many of the Bank's expected loan originations during 2013 having repricing terms longer than five years, management will likely elect to borrow additional funds during the year to mitigate its risk of future increases in market interest rates. Whether the Bank ultimately does so, and how much in advances it extends out, will be dependent upon circumstances at that time. If the Bank does obtain longer-term FHLB advances for interest rate risk mitigation, it will have a negative impact on then current earnings. The amount of the negative impact will be dependent upon the dollar amount, coupon and final maturity of the advances obtained.

Liquidity

The Bank had a loan to deposit ratio (excluding brokered deposits) of 141% at June 30, 2013 and 143% at December 31, 2012. At June 30, 2013 and December 31, 2012, the Bank had cash and cash equivalents on-hand of \$98 million and \$138 million. In addition, the Bank had available collateral to borrow an additional \$316 million and \$472 million from the FHLB at June 30, 2013 and December 31, 2012. In addition to its borrowing line with the FHLB, RB&T also had unsecured lines of credit totaling \$196 million available through various other financial institutions as of June, 30 2013.

Table of Contents

The Bank maintains sufficient liquidity to fund routine loan demand and routine deposit withdrawal activity. Liquidity is managed by maintaining sufficient liquid assets in the form of investment securities. Funding and cash flows can also be realized by the sale of securities available for sale, principal paydowns on loans and MBSs and proceeds realized from loans held for sale. The Bank's liquidity is impacted by its ability to sell certain investment securities, which is limited due to the level of investment securities that are needed to secure public deposits, securities sold under agreements to repurchase, FHLB borrowings, and for other purposes, as required by law. At June 30, 2013 and December 31, 2012, these pledged investment securities had a fair value of \$184 million and \$335 million. Republic's banking centers and its website, www.republicbank.com, provide access to retail deposit markets. These retail deposit products, if offered at attractive rates, have historically been a source of additional funding when needed. If the Bank were to lose a significant funding source, such as a few major depositors, or if any of its lines of credit were canceled, or if the Bank cannot obtain brokered deposits, the Bank would be forced to offer market leading deposit interest rates to meet its funding and liquidity needs.

At June 30, 2013, the Bank had approximately \$272 million from 50 large non-sweep deposit relationships where the individual relationship individually exceeded \$2 million. These accounts do not require collateral; therefore, cash from these accounts can generally be utilized to fund the loan portfolio. The 20 largest non-sweep deposit relationships represented approximately \$193 million of the total balance. If any of these balances are moved from the Bank, the Bank would likely utilize overnight borrowing lines in the short-term to replace the balances. On a longer-term basis, the Bank would likely utilize brokered deposits to replace withdrawn balances. Based on past experience utilizing brokered deposits, the Bank believes it can quickly obtain brokered deposits if needed. The overall cost of gathering brokered deposits, however, could be substantially higher than the Traditional Bank deposits they replace, potentially decreasing the Bank's earnings.

Capital

Total stockholders' equity increased from \$537 million at December 31, 2012 to \$544 million at June 30, 2013. The increase in stockholders' equity was primarily attributable to net income earned during 2013 reduced by cash dividends declared and common stock repurchases.

See Part II, Item 2. Unregistered Sales of Equity Securities and Use of Proceeds for additional detail regarding stock repurchases and stock buyback programs.

Common Stock The Class A Common shares are entitled to cash dividends equal to 110% of the cash dividend paid per share on Class B Common Stock. Class A Common shares have one vote per share and Class B Common shares have ten votes per share. Class B Common shares may be converted, at the option of the holder, to Class A Common shares on a share for share basis. The Class A Common shares are not convertible into any other class of Republic's capital stock.

Dividend Restrictions The Parent Company's principal source of funds for dividend payments are dividends received from RB&T. Banking regulations limit the amount of dividends that may be paid to the Parent Company by the Bank without prior approval of the respective states banking regulators. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year's net profits, combined with the retained net profits of the preceding two years. At June 30, 2013, RB&T could, without prior approval, declare dividends of approximately \$76 million. The Company does not plan to pay dividends from its Florida subsidiary, RB, in the foreseeable future and filed an application in May 2013 to merge RB&T and RB under one bank charter.

Regulatory Capital Requirements The Parent Company and the Bank are subject to various regulatory capital requirements administered by banking regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on Republic's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Parent Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities and certain off balance sheet items, as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Table of Contents

Banking regulators have categorized the Bank as well-capitalized. To be categorized as well-capitalized, the Bank must maintain minimum Total Risk Based, Tier I Capital and Tier I Leverage Capital ratios. Regulatory agencies measure capital adequacy within a framework that makes capital requirements, in part, dependent on the individual risk profiles of financial institutions. Republic continues to exceed the regulatory requirements for Total Risk Based Capital, Tier I Capital and Tier I Leverage Capital. Republic and the Bank intend to maintain a capital position that meets or exceeds the well-capitalized requirements as defined by the FRB, FDIC and the OCC. Republic's average stockholders equity to average assets ratio was 16.05% at June 30, 2013 compared to 14.89% at December 31, 2012. Formal measurements of the capital ratios for Republic and the Bank are performed by the Company at each quarter end.

In 2004, the Bank executed an intragroup trust preferred transaction with the purpose of providing RB&T access to additional capital markets, if needed in the future. The subordinated debentures held by RB&T were treated as Tier 2 Capital based on requirements administered by the Bank's federal banking agency. In April 2013, the Bank received approval from its regulators and unwound the intragroup trust preferred transaction. The cash utilized to pay off the transaction remained at the Parent Company, Republic Bancorp. Unwinding of the transaction had no impact on Republic Bank & Trust Company's two Tier 1 related capital ratios and only a minimal impact on its Total Risk Based Capital ratio.

In 2005, Republic Bancorp Capital Trust (RBCT), an unconsolidated trust subsidiary of Republic Bancorp, Inc., was formed and issued \$40 million in Trust Preferred Securities (TPS). The TPS pay a fixed interest rate for ten years and adjust with LIBOR + 1.42% thereafter. The TPS mature on September 30, 2035 and are redeemable at the Bank's option after ten years. The subordinated debentures are treated as Tier I Capital for regulatory purposes. The sole asset of RBCT represents the proceeds of the offering loaned to Republic Bancorp, Inc. in exchange for subordinated debentures which have terms that are similar to the TPS. The subordinated debentures and the related interest expense, which are payable quarterly at the annual rate of 6.015%, are included in the consolidated financial statements. The proceeds obtained from the TPS offering have been utilized to fund loan growth (in prior years), support an existing stock repurchase program and for other general business purposes such as the acquisition of GulfStream Community Bank in 2006.

The following table sets forth the Company's risk based capital amounts and ratios as of June 30, 2013 and December 31, 2012:

Table 22 Capital Ratios

(dollars in thousands)	As of June 30, 2013		As of December 31, 2012	
	Amount	Ratio	Amount	Ratio
Total Risk Based Capital (to Risk Weighted Assets)

Asset/Liability Management and Market Risk

Asset/liability management control is designed to ensure safety and soundness, maintain liquidity and regulatory capital standards and achieve acceptable net interest income. Interest rate risk is the exposure to adverse changes in net interest income as a result of market fluctuations in interest rates. The Bank, on an ongoing basis, monitors interest rate and liquidity risk in order to implement appropriate funding and balance sheet strategies. Management considers interest rate risk to be Bank's most significant market risk.

The interest sensitivity profile of Republic at any point in time will be impacted by a number of factors. These factors include the mix of interest sensitive assets and liabilities, as well as their relative pricing schedules. It is also influenced by market interest rates, deposit growth, loan growth and other factors.

Republic utilized an earnings simulation model to analyze net interest income sensitivity. Potential changes in market interest rates and their subsequent effects on net interest income were evaluated with the model. The model projects the effect of instantaneous movements in interest rates between 100 and 300 basis point increments equally across all points on the yield curve. These projections are computed based on various assumptions, which are used to determine the range between 100 and 300 basis point increments, as well as the base case (which is a twelve month projected amount) scenario. Assumptions based on growth expectations and on the historical behavior of Republic's deposit and loan rates and their related balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model's simulated results due to timing, magnitude and frequency of interest rate changes, as well as changes in market conditions and the application and timing of various management strategies. Additionally, actual results could differ materially from the model if interest rates do not move equally across all points on the yield curve.

The Company did not run a model simulation for declining interest rates as of June 30, 2013 because the Federal Open Market Committee effectively lowered the Fed Funds Target Rate between 0.00% to 0.25% in December 2008; therefore, no further short-term rate reductions can occur. Overall, the indicated change in net interest income as of June 30, 2013 was marginally better than the indicated change as of December 31, 2012 in an up interest rate scenario.

The reason for the improvement in the Company's position in an up interest rate environment was primarily from an increase in long-term FHLB advances during 2012 and 2013. Because the interest rate sensitivity model measures the impact of changing interest rates to net interest income for the next twelve month period, liabilities with a repricing duration of greater than one year will positively impact net interest income in an up rate scenario. While this growth in advances positively impacted the Company's interest rate risk position in a rising rate environment, it negatively impacted the Company's current earnings, in the near-term, due to an increase in its cost of funds.

Management also projects that it may utilize additional long-term advances for the remainder of 2013 to further mitigate its risk from increases in interest rates. How much in advances it extends out will be dependent upon circumstances at that time. When the Bank obtains longer-term FHLB advances for interest rate risk mitigation, it will have a negative impact on then-current earnings. The amount of the negative impact will be dependent upon the dollar amount, coupon and final maturity of the advances obtained.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The following table illustrates Republic's projected net interest income sensitivity profile based on the asset/liability model as of June 30, 2013. The Company's interest rate sensitivity model does not include loan fees within interest income. During the 12 months from July 1, 2012 through June 30, 2013, loan fees included in interest income were \$9.0 million.

Table of Contents**Table 23 Traditional Banking Interest Rate Sensitivity for 2013**

(dollars in thousands)	Previous Twelve Months	Base	100 Basis Points	Increase in Rates 200 Basis Points	300 Basis Points
Projected interest income:					
Short-term investments	\$ 337	\$ 7	\$ 43	\$ 75	\$ 103
Investment securities	9,876	9,048	11,546	13,853	16,048

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Information required by this item is included under *Part I, Item 2., Management's Discussion and Analysis of Financial Condition and Results of Operation.*

Item 4. Controls and Procedures.

As of the end of the period covered by this report, an evaluation was carried out by Republic Bancorp, Inc.'s management, with the participation of its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

In the ordinary course of operations, Republic and the Bank are defendants in various legal proceedings. There is no proceeding pending or threatened litigation, to the knowledge of management, in which an adverse decision could result in a material adverse change in the business or consolidated financial position of Republic or the Bank, except as set forth below.

Overdraft Litigation

On August 1, 2011, a lawsuit was filed in the U.S. District Court for the Western District of Kentucky styled *Brenda Webb vs. Republic Bank & Trust Company d/b/a Republic Bank*, Civil Action No. 3:11-CV-00423-TBR. The Complaint was brought as a putative class action and seeks monetary damages, restitution and declaratory relief allegedly arising from the manner in which RB&T assessed overdraft fees. In the Complaint, the Plaintiff pleads six claims against RB&T alleging: breach of contract and breach of the covenant of good faith and fair dealing (Count I), unconscionability (Count II), conversion (Count III), unjust enrichment (Count IV), violation of the Electronic Funds Transfer Act and Regulation E (Count V), and violations of the Kentucky Consumer Protection Act, (Count VI). RB&T filed a Motion to Dismiss the case on January 12, 2012. In response, Plaintiff filed her Motion to Amend the Complaint on February 23, 2012. In Plaintiff's proposed Amended Complaint, Plaintiff acknowledged disclosure of the Overdraft Honor Policy and did not seek to add any claims to the Amended Complaint. However, Plaintiff divided the breach of contract and breach of the covenant of good faith and fair dealing claims into two counts (Counts One and Two). In the original Complaint, those claims were combined in Count One. RB&T filed its objection to Plaintiff's Motion to Amend. On June 16, 2012, the District Court denied the Plaintiff's Motion to Amend concluding that the Plaintiff lacked the ability to automatically amend

the complaint as of right. However, the Court held that the Plaintiff could be permitted to amend if the Plaintiff could first demonstrate that her amendment would not be futile and that the Plaintiff had standing to sue despite RB&T's offer of judgment. The Court declined to rule on that issue at that time and ordered the case stayed pending a decision by the U.S. Court of Appeals for the Sixth Circuit in a case on appeal with the same standing issue. The Sixth Circuit ruled on June 11, 2013 and concluded that the offer of judgment did not moot the matter before it only because the offer of judgment in question did not afford the plaintiff complete relief. The District Court lifted the stay of this matter on June 14, 2013 and permitted Plaintiff to file her Amended Complaint. Plaintiff filed her Amended Complaint on June 21, 2013 and brought six claims: breach of contract and breach of the covenant of good faith and fair dealing (Counts I & II), unconscionability (Count III), conversion (Count IV), unjust enrichment (Count V), violation of the Electronic Funds Transfer Act, (Count VI) and violation of the Kentucky Consumer Protection Act (Count VII). RB&T filed its Motion to Dismiss the Amended Complaint on July 15, 2013. Plaintiff has not yet responded to the Motion to Dismiss.

Table of Contents

Item 1A. Risk Factors.

FACTORS THAT MAY AFFECT FUTURE RESULTS

An investment in the Company's common stock is subject to risks inherent in its business. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included in this report. In addition to the risks and uncertainties described below, other risks and uncertainties not currently known to the Company or that the Company currently deems to be immaterial also may materially and adversely affect its business, financial condition and results of operations in the future. The value or market price of the Company's common stock could decline due to any of these identified or other risks, and you could lose all or part of your investment.

There are factors, many beyond the Company's control, which may significantly change the results or expectations of the Company. Some of these factors are described below, however many other factors are described in the other sections of the Company's Annual Report on Form 10-K for the year ending December 31, 2012.

TRANSACTIONS WITH H&R BLOCK BANK AND AFFILIATES OF H&R BLOCK, INC.

Reference here is made to:

Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operation

- *Recent Developments*
- *H&R Block Bank Purchase and Assumption Agreement*

The following risk factors relate to the P&A Transaction, the MSA and the RPA:

The parties to the Agreement may fail to receive the necessary regulatory approvals to consummate the P&A Transaction during 2013. The Agreement provides that RB&T and HRBB must file timely applications or notices with their primary regulators, publish all required public notices and take such other actions that are necessary or advisable in order to consummate the transactions contemplated by the Agreement. The Agreement requires that all regulatory approvals must be received by September 30, 2013 in order for the P&A Transaction to occur in 2013. If any regulatory approvals are obtained after September 30, 2013, the Agreement requires that the P&A Transaction will occur between April 30, 2014 and June 18, 2014.

Failure by any of the parties to receive their regulatory approvals in a timely manner would delay RB&T from offering H&R Block-branded financial services products to H&R Block's clients under the MSA until the fourth quarter of 2014 and would delay the completion of the P&A Transaction until the second quarter of 2014, delaying the projected economic benefits of the transactions to RB&T and the Company, overall.

The parties may fail to successfully negotiate the MSA and RPA. The failure of RB&T and affiliates of H&R Block, Inc. to successfully negotiate the MSA and RPA may lead to termination of the P&A transaction and would prevent RB&T from offering H&R Block-branded financial services products to H&R Block's clients and thus RB&T not realizing the anticipated earnings from the transactions.

The parties may fail to successfully consummate the P&A Transaction as contemplated in the Agreement for other reasons not currently known. The termination of the P&A Transaction would prevent RB&T from offering H&R Block-branded financial services products to H&R Block's clients under the MSA and thus RB&T not realizing the anticipated earnings from the transactions.

Table of Contents

Demand for and performance of H&R Block-branded financial services products may not meet the expectations of the parties to the Agreement, or stakeholders of such parties. The Company has estimated that the combined financial impact of a consummated P&A Transaction, MSA and RPA will be accretive to the Company's diluted earnings per Class A and Class B share by approximately \$0.57 to \$0.75 per year. The largest benefit of this impact is expected to occur in the first quarter of each calendar year, coinciding with the tax season. The actual results will vary depending upon a number of factors, including the volumes of Republic's H&R Block-branded financial services products sold, consumer demand for H&R Block, Inc. income tax return preparation services, unanticipated losses for RB&T on H&R Block-branded financial services credit products, the ability for RB&T to maintain deposit balances assumed from HRBB and earn a positive net interest spread on those deposits and incremental overhead costs to RB&T. Materially underestimating the demand for H&R Block-branded financial services products or materially underestimating the losses associated with H&R Block-branded credit products, could significantly negatively impact the projected earnings the Company expects to receive under the MSA.

MERGER APPLICATION

RB&T and RB have filed a merger application with the OCC to merge its charters under a national bank charter. Historically, the majority of Republic's banking operations have been under federal regulation and examination by the FDIC. Interpretations of interagency regulatory guidance and application of that guidance could be different between the OCC and the FDIC. Bank regulators may have different interpretations of policies, procedures and the application of Generally Accepted Accounting Principles to a bank's accounting estimates such as the Allowance for Loans and Leases. A more restrictive interpretation by the OCC of GAAP related to the Company's critical accounting estimates could lead to lower net income for the Company.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

Details of Republic's Class A Common Stock purchases during the second quarter of 2013 are included in the following table:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Programs
April 1 - April 30		\$		
May 1 - May 31				
June 1 - June 30				
Total		\$		330,640

During 2013, the Company repurchased 193,000 shares and there were no shares exchanged for stock option exercises. During November of 2011, the Company's Board of Directors amended its existing share repurchase program by approving the repurchase of 300,000 additional shares from time to time, as market conditions are deemed attractive to the Company. The repurchase program will remain effective until the total number of shares authorized is repurchased or until Republic's Board of Directors terminates the program. As of June 30, 2013, the Company had 330,640 shares which could be repurchased under its current share repurchase programs.

During 2013, there were approximately 11,000 shares of Class A Common Stock issued upon conversion of shares of Class B Common Stock by stockholders of Republic in accordance with the share-for-share conversion provision option of the Class B Common Stock. The exemption from registration of the newly issued Class A Common Stock relied upon was Section (3)(a)(9) of the Securities Act of 1933.

There were no equity securities of the registrant sold without registration during the quarter covered by this report.
