Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2013.

X

Section 1.	Conflict Minerals Disclosure			
Item 1.01.	Conflict Minerals Disclosure and Report			
Conflict Minerals Disclosure				
global dist 2004, TSL reliable an	r Limited (<u>TS</u> L) is a large-scale integrated solar-power products manufacturer and solar system developer based in China with a ribution network covering Europe, Asia, North America, Australia and Africa. Since it began its solar-power products business in has integrated the manufacturing of ingots, wafers and solar cells for use in its PV module production. TSL s PV modules provide d environmentally-friendly electric power for residential, commercial, industrial and other applications worldwide. TSL also develops, onstructs and sells solar power projects that primarily use the solar modules it manufactures.			
Securities definition	sures herein for the reporting period from January 1, 2013 to December 31, 2013 are presented to comply with Rule 13p-1 under the Exchange Act of 1934. According to section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the in the Form SD and for the purposes of this assessment, conflict minerals are defined as columbite-tantalite (coltan), cassiterite, gold, e, and their derivatives, which are limited to tantalum, tin and tungsten.			
Description of Reasonable Country of Origin Inquiry				
	ken the following steps as part of its reasonable country of origin inquiry to determine whether the conflict minerals may have in the Democratic Republic of the Congo or an adjoining country:			
•	listed out the materials and equipment used during the production of its products;			
• manufactu	determined which conflict minerals were necessary to the functionality or production of products manufactured or contracted to be red by TSL (<u>necessary conflict minerals</u>);			
•	identified the suppliers whose products contained necessary conflict minerals (<u>Suppliers in Concern</u>);			
• conflict mi	requested that the Suppliers in Concern provide a flow chart detailing where they obtained their products and materials that contained inerals and requested that they provide certificates of origin for these products and materials; and			

• analyzed whether the necessary conflict minerals used by TSL during the reporting period may have originated in the Democratic Republic of the Congo or an adjoining country or whether they were from scrap or recycled sources.					
TSL determined that during the reporting period, the only conflict mineral necessary to the functionality or production of products that it manufactures or contracts to be manufactured was tin. Ribbon cables used in the assembly of TSL s solar modules and solder used in junction boxes and busbar connections use tin, tin alloys, molten tin alloys and tin-coated copper. TSL has made inquiries with all its suppliers of ribbon cables and solder about the source of the tin used in their products and further requested that these suppliers provide certificates of origin for the tin contained in their products. TSL does not make purchases of raw ore or unrefined conflict minerals and makes no purchases in the Democratic Republic of the Congo or adjoining countries.					
Determination					
Based on TSL s reasonable country of origin inquiry, TSL has no reason to believe that its necessary conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country.
