**FIRST BUSEY CORPORATION and Subsidiaries**

**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

**Note 1: Basis of Presentation**

The accompanying unaudited consolidated interim financial statements of First Busey Corporation ( First Busey or the Company ), a Nevada corporation, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC ) for Quarterly Reports on Form 10-Q and do not include certain information and footnote disclosures required by U.S. generally accepted accounting principles ( GAAP ) for complete annual financial statements. Accordingly, these financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

The accompanying Consolidated Balance Sheets as of December 31, 2013, which have been derived from audited financial statements, and the unaudited consolidated interim financial statements have been prepared in accordance with GAAP and reflect all adjustments that are, in the opinion of management, necessary for the fair presentation of the financial position and results of operations as of the dates and for the periods presented. All such adjustments are of a normal recurring nature. The results of operations for the three and nine months ended September 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014.

The consolidated financial statements include the accounts of the Company and its subsidiaries. All material intercompany transactions and balances have been eliminated in consolidation. Certain prior-year amounts have been reclassified to conform to the current presentation with no effect on net income or stockholders' equity.

In preparing the accompanying consolidated financial statements, the Company's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from those estimates. Material estimates which are particularly susceptible to significant change in the near term relate to the fair value of investment securities, the determination of the allowance for loan losses, and the valuation allowance on the deferred tax asset.

The Company has evaluated subsequent events for potential recognition and/or disclosure through the date the consolidated financial statements included in this Quarterly Report on Form 10-Q were issued. Other than the return of capital and associated surplus to the Company from Busey Bank (the Bank ), which was executed on October 22, 2014, as discussed in the capital resources section of management's discussion and analysis of financial condition and results of operations, there were no significant subsequent events for the quarter ended September 30, 2014 through the issuance date of these financial statements that warranted adjustment to or disclosure in the consolidated financial statements.

**Note 2: Recent Accounting Pronouncements**

*ASU 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure.* ASU 2014-04 clarifies when an in-substance repossession or foreclosure occurs and requires interim and annual disclosures. The new authoritative guidance will be effective for fiscal years, and interim periods within those

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

years, beginning after December 15, 2014 and is not expected to have a significant impact on the Company's financial statements.

*ASU 2014-09, Revenue from Contracts with Customers (Topic 606).* ASU 2014-09 outlines a single model for companies to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. ASU 2014-09 will require that companies recognize revenue based on the value of transferred goods or services as they occur in the contract and will also require additional disclosures. The new authoritative guidance will be for reporting periods after December 15, 2016, and the Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures.

ASU 2014-14, *Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure*. ASU 2014-14 requires that certain government-guaranteed mortgage loans be derecognized and that a separate other receivable be recognized upon foreclosure if certain conditions are met. Upon foreclosure on loans that meet these criteria, a separate receivable should be recorded based on the amount of the loan balance expected to be recovered from the guarantor. The new authoritative guidance will be effective for fiscal years, and interim periods within those years, beginning after December 15, 2014 and is not expected to have a significant impact on the Company's financial statements.

### Note 3: Securities

Securities are classified as held to maturity when First Busey has the ability and management has the positive intent to hold those securities to maturity. Accordingly, they are stated at cost, adjusted for amortization of premiums and accretion of discounts. Securities are classified as available for sale when First Busey may decide to sell those securities due to changes in market interest rates, liquidity needs, changes in yields on alternative investments, and for other reasons. They are carried at fair value with unrealized gains and losses, net of taxes, reported in other comprehensive income.

The amortized cost, unrealized gains and losses and fair values of securities classified as available for sale and held to maturity are summarized as follows:

September 30, 2014:	Amortized Cost	Gross Unrealized Gains (dollars in thousands)	Gross Unrealized Losses	Fair Value
<b>Available for sale</b>				
U.S. Treasury securities	\$ 50,341	\$ 242	\$ (6)	\$ 50,577

<b>Held to maturity</b>				
Obligations of states and political subdivisions	\$ 834	\$ 1	\$ (4)	\$ 831
Total	\$ 834	\$ 1	\$ (4)	\$ 831

The amortized cost and fair value of debt securities available for sale and held to maturity as of September 30, 2014, by contractual maturity, are shown below. Mutual funds and other equity securities do not have stated maturity dates and therefore are not included in the following maturity summary. Mortgages underlying the residential mortgage-backed securities may be called or prepaid without penalties; therefore, actual maturities could differ from the contractual maturities. All residential mortgage-backed securities were issued by U.S. government agencies and corporations.

	Available for sale		Held to maturity	
	Amortized Cost	Fair Value (dollars in thousands)	Amortized Cost	Fair Value
Due in one year or less	\$ 127,442	\$ 128,040	\$	\$
Due after one year through five years	353,926	356,234	515	518
Due after five years through ten years	148,191	151,396	1,869	1,903
Due after ten years	158,444	160,235		
Total	\$ 788,003	\$ 795,905	\$ 2,384	\$ 2,421

Realized gains and losses related to sales of securities available for sale are summarized as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(dollars in thousands)			
Gross security gains	\$	\$ 82	\$ 57	\$ 82
Gross security (losses)			(17)	
Net security gains	\$	\$ 82	\$ 40	\$ 82

The tax provision for the net realized gains was insignificant for the three and nine months ended September 30, 2014 and 2013.

Investment securities with carrying amounts of \$512.5 million and \$428.7 million on September 30, 2014 and December 31, 2013, respectively, were pledged as collateral for public deposits, securities sold under agreements to repurchase and for other purposes as required or permitted by law.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and whether the Company has the intent to sell the security and it is more-likely-than-not it will have to sell the security before recovery of its cost basis.

The total number of securities in the investment portfolio in an unrealized loss position as of September 30, 2014 was 158, and represented a loss of 0.7% of the aggregate carrying value. Based upon a review of unrealized loss circumstances, the unrealized losses resulted from changes in market interest rates and liquidity, not from changes in the probability of receiving the contractual cash flows. The Company does not intend to sell the securities and it is more-likely-than-not that the Company will recover the amortized cost prior to being required to sell the securities. Full collection of the amounts due according to the contractual terms of the securities is expected; therefore, the Company does not consider these investments to be other-than-temporarily impaired at September 30, 2014.

The Company had available for sale obligations of state and political subdivisions with a fair value of \$237.2 million and \$272.2 million as of September 30, 2014 and December 31, 2013, respectively. In addition, the Company had held to maturity obligations of state and political subdivisions totaling \$1.4 million and \$0.8 million at September 30, 2014 and December 31, 2013, respectively.

As of September 30, 2014, the Company's obligations of state and political subdivisions portfolio was comprised of \$196.7 million of general obligation bonds and \$41.8 million of revenue bonds issued by 238 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in 23 states (including the District of Columbia), including seven states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in 17 states, including two states where the aggregate fair value exceeded \$5.0 million.

As of December 31, 2013, the Company's obligations of state and political subdivisions portfolio was comprised of \$223.5 million of general obligation bonds and \$49.5 million of revenue bonds issued by 267 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in 25 states (including the District of Columbia), including seven states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in 21 states, including two states where the aggregate fair value exceeded \$5.0 million.

The amortized cost and fair values of the Company's portfolio of general obligation bonds are summarized in the following tables by the issuers state:

September 30, 2014:

U.S. State	Number of Issuers	Amortized Cost	Fair Value	Average Exposure Per Issuer (Fair Value)
		(dollars in thousands)		
Illinois	75	\$ 68,434	\$ 69,974	\$ 933
Wisconsin	40	38,271	38,562	964
Michigan	33	30,884	31,283	948
Pennsylvania	10	12,939	13,030	1,303
Ohio	10	10,936	10,890	1,089

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Texas	7	7,401	7,359	1,051
Iowa	3	6,118	6,154	2,051
Other	24	18,905	19,476	812
Total general obligations bonds	202	\$ 193,888	\$ 196,728	\$ 974

December 31, 2013:

U.S. State	Number of Issuers	Amortized Cost	Fair Value	Average Exposure Per Issuer (Fair Value)
(dollars in thousands)				
Illinois	82	\$ 82,884	\$ 83,804	\$ 1,022
Wisconsin	41	43,117	43,122	1,052
Michigan	37	35,350	35,365	956
Pennsylvania	11	14,132	14,133	1,285
Ohio	12	11,709	11,426	952
Texas	7	7,510	7,270	1,039
Iowa	3	6,126	6,060	2,020
Other	26	21,865	22,290	857
Total general obligations bonds	219	\$ 222,693	\$ 223,470	\$ 1,020

The general obligation bonds are diversified across many issuers, with \$3.5 million and \$5.0 million being the largest exposure to a single issuer at September 30, 2014 and December 31, 2013, respectively. Accordingly, as of September 30, 2014 and December 31, 2013, the Company did not hold general obligation bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company's stockholders' equity. Of the general obligation bonds in the Company's portfolio, 96.9% had been rated by at least one nationally recognized statistical rating organization and 3.1% were unrated, based on the fair value as of September 30, 2014. Of the general obligation bonds in the Company's portfolio, 96.4% had been rated by at least one nationally recognized statistical rating organization and 3.6% were unrated, based on the fair value as of December 31, 2013.

The amortized cost and fair values of the Company's portfolio of revenue bonds are summarized in the following tables by the issuers' state:

September 30, 2014:

U.S. State	Number of Issuers	Amortized Cost	Fair Value	Average Exposure Per Issuer (Fair Value)
(dollars in thousands)				
Illinois	4	\$ 6,999	\$ 6,920	\$ 1,730
Indiana	8	12,534	12,486	1,561
Other	24	22,440	22,412	934
Total revenue bonds	36	\$ 41,973	\$ 41,818	\$ 1,162

December 31, 2013:

U.S. State	Number of Issuers	Amortized Cost	Fair Value	Average Exposure Per Issuer (Fair Value)
(dollars in thousands)				
Illinois	4	\$ 7,356	\$ 7,121	\$ 1,780

# Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Indiana	14		14,740		14,481		1,034
Other	30		28,122		27,911		930
Total revenue bonds	48	\$	50,218	\$	49,513	\$	1,032

The revenue bonds are diversified across many issuers and revenue sources with \$3.0 million being the largest exposure to a single issuer at each of September 30, 2014 and December 31, 2013. Accordingly, as of September 30, 2014 and December 31, 2013, the Company did not hold revenue bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company's stockholders' equity. All of the revenue bonds in the Company's portfolio had been rated by at least one nationally recognized statistical rating organization as of September 30, 2014 and December 31, 2013. Some of the primary types of revenue bonds owned in the Company's portfolio include: primary education or government building lease rentals secured by ad valorem taxes, utility systems secured by utility system net revenues, housing authorities secured by mortgage loans or principal receipts on mortgage loans, secondary education secured by student fees/tuitions, and pooled issuances (i.e. bond bank) consisting of multiple underlying municipal obligors.

Substantially all of the Company's obligations of state and political subdivision securities are owned by Busey Bank, whose investment policy requires that state and political subdivision securities purchased be investment grade. Busey Bank's investment policy also limits the amount of rated state and political subdivision securities to an aggregate 100% of the Bank's Total Risk Based Capital at the time of purchase and an aggregate 15% of Total Risk Based Capital for unrated state and political subdivision securities issued by municipalities having taxing authority or located in counties/micropolitan statistical areas/metropolitan statistical areas in which an office of the Bank is located. The investment policy states fixed income investments that are not Office of the Comptroller of the Currency Type 1 securities (U.S. Treasuries, agencies, municipal government general obligation and, for well-capitalized institutions, most municipal revenue bonds) should be analyzed prior to acquisition to determine that (1) the security has low risk of default by the obligor, and (2) the full and timely repayment of principal and interest is expected over the expected life of the investment. All securities in the Bank's obligations of state and political subdivision securities portfolio are subject to ongoing review. Factors that may be considered as part of ongoing monitoring of state and political subdivision securities include credit rating changes by nationally recognized statistical rating organizations, market valuations, third-party municipal credit analysis, which may include indicative information regarding the issuer's capacity to pay, market and economic data and such other factors as are available and relevant to the security or the issuer such as its budgetary position and sources, strength and stability of taxes and/or other revenue.

As of September 30, 2014, the Company's regular monitoring of its obligations of state and political subdivisions portfolio had not uncovered any facts or circumstances resulting in significantly different credit ratings than those assigned by a nationally recognized statistical rating organization.

#### Note 4: Loans

Geographic distributions of loans were as follows:

	September 30, 2014				Total
	Illinois	Florida	Indiana	(dollars in thousands)

(1) Loans held for sale are included in retail real estate.

Net deferred loan origination costs included in the tables above were \$0.5 million as of September 30, 2014 and insignificant as of December 31, 2013.

The Company believes that sound loans are a necessary and desirable means of employing funds available for investment. Recognizing the Company's obligations to its stockholders, depositors, and to the communities it serves, authorized personnel are expected to seek to develop and make sound, profitable loans that resources permit and that opportunity affords. The Company maintains lending policies and procedures designed to focus lending efforts on the types, locations and duration of loans most appropriate for its business model and markets. While not specifically limited, the Company attempts to focus its lending on short to intermediate-term (0-7 years) loans in geographies within 125 miles of its lending offices. The Company attempts to utilize government-assisted lending programs, such as the Small Business Administration and United States Department of Agriculture lending programs, when prudent. Generally, loans are collateralized by assets, primarily real estate, of the borrowers and guaranteed by individuals. The loans are expected to be repaid primarily from cash flows of the borrowers, or from proceeds from the sale of selected assets of the borrowers.

Management reviews and approves the Company's lending policies and procedures on a routine basis. Management routinely (at least quarterly) reviews the Company's allowance for loan losses and reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing and potential problem loans. The Company's underwriting standards are designed to encourage relationship banking rather than transactional banking. Relationship banking implies a primary banking relationship with the borrower that includes, at a minimum, an active deposit banking relationship in addition to the lending relationship. The integrity and character of the borrower are significant factors in the Company's loan underwriting. As a part of underwriting, tangible positive or negative evidence of the borrower's integrity and character are sought out. Additional significant underwriting factors beyond location, duration, a sound and profitable cash flow basis and the borrower's character are the quality of the borrower's financial history, the liquidity of the underlying collateral and the reliability of the valuation of the underlying collateral.

Total borrowing relationships, including direct and indirect debt, are generally limited to \$20 million, which is significantly less than the Company's regulatory lending limit. Borrowing relationships exceeding \$20 million are reviewed by the Company's board of directors at least annually and more frequently by management. At no time is a borrower's total borrowing relationship permitted to exceed the Company's regulatory lending limit. Loans to related parties, including executive officers and the Company's various directorates, are reviewed for compliance with regulatory guidelines by the Company's board of directors at least annually.

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The Company maintains an independent loan review department that reviews the loans for compliance with the Company's loan policy on a periodic basis. In addition to compliance with this policy, the loan review process reviews the risk assessments made by the Company's credit department, lenders and loan committees. Results of these reviews are presented to management and the audit committee at least quarterly.

The Company's lending can be summarized into five primary areas: commercial loans, commercial real estate loans, real estate construction loans, retail real estate loans, and other retail loans. A description of each of the lending areas can be found in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. The significant majority of the lending activity occurs in the Company's Illinois and Indiana markets, with the remainder in the Florida market. Due to the small scale of the Indiana loan portfolio and its geographical proximity to the Illinois portfolio, the Company believes that quantitative or qualitative segregation between Illinois and Indiana is not material or warranted.

The Company utilizes a loan grading scale to assign a risk grade to all of its loans. Loans are graded on a scale of 1 through 10 with grades 2, 4 & 5 unused. A description of the general characteristics of the grades is as follows:

- *Grades 1, 3, 6-* These grades include loans which are all considered strong credits, with grade 1 being investment or near investment grade. A grade 3 loan is comprised of borrowers that exhibit credit fundamentals that exceed industry standards and loan policy guidelines. A grade 6 loan is comprised of borrowers that exhibit acceptable credit fundamentals.
- *Grade 7-* This grade includes loans on management's Watch List and is intended to be utilized on a temporary basis for a pass grade borrower where a significant risk-modifying action is anticipated in the near future.
- *Grade 8-* This grade is for Other Assets Specially Mentioned loans that have potential weaknesses which may, if not checked or corrected, weaken the asset or inadequately protect the Company's credit position at some future date.
- *Grade 9-* This grade includes Substandard loans, in accordance with regulatory guidelines, for which the accrual of interest has not been stopped. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.
- *Grade 10-* This grade includes Doubtful loans that have all the characteristics of a substandard loan with additional factors that make collection in full highly questionable and improbable. Such loans are placed on non-accrual status and may be dependent on collateral having a value that is difficult to determine.

All loans are graded at the inception of the loan. All commercial loans that are \$1.0 million or less are processed through an expedited underwriting process. If the credit receives a pass grade it is aggregated into a homogenous pool of either: \$0.35 million or less or \$0.35 million to \$1.0 million. These pools are monitored on a quarterly basis for the first year, semiannually in the second year and annually thereafter. Homogenous pool credits which are subsequently downgraded to a grading of 7 or worse, are subject to the same portfolio review as loans over \$1.0 million. All commercial loans greater than \$1.0 million dollars receive a portfolio review at least annually. Commercial loans greater than \$1.0 million that have a grading of 7 receive a portfolio review twice per year. Commercial loans greater than \$1.0 million that have a grading of 8 or worse receive a portfolio review on a quarterly basis. Interim grade reviews may take place if circumstances of the borrower warrant a more timely review.

Loans in the highest grades, represented by grades 1, 3, 6 and 7, totaled \$2.2 billion at September 30, 2014 compared to \$2.1 billion at December 31, 2013. Loans in the lowest grades, represented by grades 8, 9 and 10, totaled \$131.8 million at September 30, 2014, a decline of

\$30.1 million from \$161.9 million at December 31, 2013.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The following table presents weighted average risk grades segregated by category of loans (excluding held for sale, non-posted and clearings) and geography:

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income is subsequently recognized only to the extent cash payments are received in excess of the principal due. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

An age analysis of past due loans still accruing and non-accrual loans is as follows:

	September 30, 2014				Non-accrual Loans

A loan is impaired when, based on current information and events, it is probable the Company will be unable to collect scheduled principal and interest payments when due according to the terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. The following loans are assessed for impairment by the Company: loans 60 days or more past due and over \$0.25 million, loans graded 8 over \$0.5 million and loans graded 9 or 10.

Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. Large groups of smaller balance homogenous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment disclosures unless such loans are the subject of a restructuring agreement.

The gross interest income that would have been recorded in the three and nine months ended September 30, 2014 if impaired loans had been current in accordance with their original terms was \$0.1 million and \$0.7 million, respectively. The amount of interest collected on those loans and recognized on a cash basis that was included in interest income was insignificant for the three and nine months ended September 30, 2014.

The Company's loan portfolio includes certain loans that have been modified in a troubled debt restructuring (TDR), where concessions have been granted to borrowers who have experienced financial difficulties. The Company will restructure loans for its customers who appear to be able to meet the terms of their loan over the long term, but who may be unable to meet the terms of the loan in the near term due to individual circumstances.

The Company considers the customer's past performance, previous and current credit history, the individual circumstances surrounding the current difficulties and the customer's plan to meet the terms of the loan in the future prior to restructuring the terms of the loan. Generally, all five primary areas of lending are restructured through short-term interest rate relief, short-term principal payment relief, short-term principal and interest payment relief, or forbearance (debt forgiveness). Once a restructured loan has gone 90+ days past due or is placed on non-accrual status, it is included in the non-performing loan totals. A summary of restructured loans as of September 30, 2014 and December 31, 2013 is as follows:

	September 30, 2014	December 31, 2013
	(dollars in thousands)	
Restructured loans:		
In compliance with modified terms	\$ 11,050	\$ 11,511
30 - 89 days past due		380
Included in non-performing loans	2,253	5,919
Total	\$ 13,303	\$ 17,810

All TDRs are considered to be impaired for purposes of assessing the adequacy of the allowance for loan losses and for financial reporting purposes. When the Company modifies a loan in a TDR, it evaluates any possible impairment similar to other impaired loans based on present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. If the Company determines that the value of the TDR is less than the recorded investment in the loan, impairment is recognized through an allowance estimate in the period of the modification and in periods subsequent to the modification.

There were no performing loans classified as TDRs during the three months ended September 30, 2014. Performing loans classified as TDRs during the nine months ended September 30, 2014 were insignificant.

Performing loans classified as TDRs during the three and nine months ended September 30, 2013 included one commercial real estate modification in Illinois/Indiana for short-term principal payment relief, with a recorded investment of \$0.2 million. Performing loans classified as TDRs during the nine months ended September 30, 2013 also included one commercial real estate modification in Florida for short-term interest rate relief, with a recorded investment of \$0.1 million.

The gross interest income that would have been recorded in the three and nine months ended September 30, 2014 and 2013 if performing TDRs had been in accordance with their original terms instead of modified terms was insignificant.

There were no TDRs that were classified as non-performing and had payment defaults (a default occurs when a loan is 90 days or more past due or transferred to non-accrual) during the three and nine months ended September 30, 2014.

TDRs that were classified as non-performing and had payment defaults during the three months ended September 30, 2013 consisted of one Florida retail real estate modification totaling \$0.1 million. TDRs that were classified as non-performing and had payment defaults during the nine months ended September 30, 2013 consisted of one Illinois/Indiana commercial real estate modification totaling \$1.7 million, one Illinois/Indiana real estate construction modification totaling \$0.3 million, four Illinois/Indiana retail real estate modifications totaling \$1.1 million and two Florida retail real estate modifications totaling \$0.2 million.

The following tables provide details of impaired loans, segregated by category and geography. The unpaid contractual principal balance represents the recorded balance prior to any partial charge-offs. The recorded investment represents customer balances net of any partial charge-offs recognized on the loan. The average recorded investment is calculated using the most recent four quarters.

Management's opinion as to the ultimate collectability of loans is subject to estimates regarding future cash flows from operations and the value of property, real and personal, pledged as collateral. These estimates are affected by changing economic conditions and the economic prospects of borrowers.

#### *Allowance for Loan Losses*

The allowance for loan losses represents an estimate of the amount of losses believed inherent in the Company's loan portfolio at the balance sheet date. The allowance for loan losses is evaluated geographically, by class of loans. The allowance calculation involves a high degree of estimation that management attempts to mitigate through the use of objective historical data where available. Loan losses are charged against the allowance for loan losses when management believes the uncollectibility of the loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. Overall, the Company believes the allowance methodology is consistent with prior periods and the balance was adequate to cover the estimated losses in the Company's loan portfolio at September 30, 2014 and December 31, 2013.

The general portion of the Company's allowance contains two components: (i) a component for historical loss ratios, and (ii) a component for adversely graded loans. The historical loss ratio component is an annualized loss rate calculated using a sum-of-years digits weighted 20-quarter historical average.

The Company's component for adversely graded loans attempts to quantify the additional risk of loss inherent in the grade 8 and grade 9 portfolios. The grade 9 portfolio has an additional allocation placed on those loans determined by a one-year charge-off percentage for the respective loan type/geography. The minimum additional reserve on a grade 9 loan was 3.00% as of each of September 30, 2014 and December 31, 2013, which is an estimate of the additional loss inherent in these loan grades based upon a review of overall historical charge-offs. As of September 30, 2014, the Company believed this minimum reserve remained adequate.

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Grade 8 loans have an additional allocation placed on them determined by the trend difference of the respective loan type/geography's rolling 12- and 20-quarter historical loss trends. If the rolling 12-quarter average is higher (more current information) than the rolling 20-quarter average, the Company adds the additional amount to the allocation. The minimum additional amount for grade 8 loans was 1.00% as of September 30, 2014 and December 31, 2013, based upon a review of the differences between the rolling 12- and 20-quarter historical loss averages by region. As of September 30, 2014, the Company believed this minimum additional amount remained adequate.

# Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The specific portion of the Company's allowance relates to loans that are impaired, which includes non-performing loans, TDRs and other loans determined to be impaired. The impaired loans are subtracted from the general loans and are allocated specific reserves as discussed above.

Impaired loans are reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Collateral values are estimated using a combination of observable inputs, including recent appraisals discounted for collateral specific changes and current market conditions, and unobservable inputs based on customized discounting criteria.

The general quantitative allocation based upon historical charge off rates is adjusted for qualitative factors based on current general economic conditions and other qualitative risk factors both internal and external to the Company. In general, such valuation allowances are determined by evaluating, among other things: (i) Management & Staff; (ii) Loan Underwriting, Policy and Procedures; (iii) Internal/External Audit & Loan Review; (iv) Valuation of Underlying Collateral; (v) Macro and Local Economic Factor; (vi) Impact of Competition, Legal & Regulatory Issues; (vii) Nature and Volume of Loan Portfolio; (viii) Concentrations of Credit; (ix) Net Charge-Off Trend; and (x) Non-Accrual, Past Due and Classified Trend. Management evaluates the degree of risk that each one of these components has on the quality of the loan portfolio on a quarterly basis. Based on each component's risk factor, a qualitative adjustment to the reserve may be applied to the appropriate loan categories.

During the third quarter of 2014, the Company adjusted Illinois/Indiana qualitative factors relating to Loan Underwriting, Policy and Procedures, Macro and Local Economic Factor, Nature and Volume of Loan Portfolio, and Net Charge-Off Trend. Additionally, the Company adjusted Florida qualitative factors relating to Loan Underwriting, Policy and Procedures, Macro and Local Economic Factor, and Net Charge-Off Trend. The adjustment of these factors increased our allowance requirements by \$5.3 million at September 30, 2014 compared to the method used for June 30, 2014. Further, during the first quarter of 2014, the Company adjusted Illinois/Indiana and Florida qualitative factors relating to Net Charge-Off Trend compared to the method used for December 31, 2013. Adjustments to increase these qualitative factors were made in the third and first quarters of 2014 to recognize perceived changing degrees of risk, offset decreasing quantitative factors and reflect management's evaluation of risk. The Company will continue to monitor its qualitative factors on a quarterly basis.

The following table details activity on the allowance for loan losses. Allocation of a portion of the allowance to one category does not preclude its availability to absorb losses in other categories.

#### Note 5: Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase, which are classified as secured borrowings, generally mature either daily or within one year from the transaction date. Securities sold under agreements to repurchase are reflected at the amount of cash received in connection with the transaction. The underlying securities are held by the Company's safekeeping agent. The Company may be required to provide additional collateral based on the fair value of the underlying securities. The following table sets forth the distribution of securities sold under agreements to repurchase and weighted average interest rates:

	September 30, 2014	December 31, 2013
	(dollars in thousands)	
Balance at end of period	\$ 157,282	\$ 172,348
Weighted average interest rate at end of period	0.11%	0.13%
Maximum outstanding at any month end in year-to-date period	\$ 157,282	\$ 172,348
Average daily balance for the year-to-date period	\$ 137,424	\$ 137,777
Weighted average interest rate during period (1)	0.11%	0.14%

(1)The weighted average interest rate is computed by dividing total interest for the year-to-date period by the average daily balance outstanding.

**Note 6: Earnings Per Common Share**

Earnings per common share have been computed as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(in thousands, except per share data)			
Net income available to common stockholders	\$ 8,927	\$ 7,024	\$ 24,636	\$ 19,081
Shares:				
Weighted average common shares outstanding	86,920	86,801	86,894	86,745
Dilutive effect of outstanding options, warrants and restricted stock units as determined by the application of the treasury stock method	419	275	368	299
Weighted average common shares outstanding, as adjusted for diluted earnings per share calculation	87,339	87,076	87,262	87,044
Basic earnings per common share	\$ 0.10	\$ 0.08	\$ 0.28	\$ 0.22
Diluted earnings per common share	\$ 0.10	\$ 0.08	\$ 0.28	\$ 0.22

Basic earnings per share are computed by dividing net income available to common stockholders for the period by the weighted average number of common shares outstanding.

Diluted earnings per common share is computed using the treasury stock method and reflects the potential dilution that could occur if the Company's outstanding stock options were exercised and restricted stock units were vested. Stock options and restricted stock units for which the exercise or the grant price exceeds the average market price over the period have an anti-dilutive effect and are excluded from the calculation. At September 30, 2014, 457,630 outstanding options, 573,833 warrants, and 353,976 restricted stock units were anti-dilutive and excluded from the calculation of common stock equivalents. At September 30, 2013, 648,529 outstanding options, 573,833 warrants, and 380,252 restricted stock units were anti-dilutive and excluded from the calculation of common stock equivalents.

**Note 7: Stock-based Compensation**

The Company grants share-based compensation awards to its employees and members of its board of directors as provided for under the Company's 2010 Equity Incentive Plan. The Company currently grants share-based compensation in the form of restricted stock units ( RSUs ) and deferred stock units ( DSUs ). The Company also has outstanding stock options granted prior to 2011. Under the terms of the Company's 2010 Equity Incentive Plan, the Company is allowed, but not required, to source stock option exercises and grants of RSUs and DSUs from its inventory of treasury stock. As of September 30, 2014, the Company held 1,442,257 shares in treasury, with 895,655 additional shares authorized for repurchase under its stock repurchase plan. The repurchase plan has no expiration date and expires when the Company has repurchased all of the remaining authorized shares.

A description of the 2010 Equity Incentive Plan can be found in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. The Company's 2010 Equity Incentive Plan is designed to encourage ownership of its common stock by its employees and directors, to provide additional incentive for them to promote the success of its business, and to attract and retain talented personnel. All of the Company's employees and directors, and those of its subsidiaries, are eligible to receive awards under the plan.

# Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

A summary of the status of and changes in the Company's stock option awards for the nine months ended September 30, 2014 follows:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term
Outstanding at beginning of year	696,379	\$ 17.22	
Granted			
Exercised			
Forfeited	186,249	19.67	
Outstanding at end of period	510,130	\$ 16.33	1.97
Exercisable at end of period	510,130	\$ 16.33	1.97

The Company did not record any stock option compensation expense for the three and nine months ended September 30, 2014 or 2013.

A summary of the changes in the Company's stock unit awards for the nine months ended September 30, 2014, is as follows:

	Restricted Stock Units	Director Deferred Stock Units	Total	Weighted-Average Grant Date Fair Value
Non-vested at beginning of year	914,968	34,014	948,982	\$ 4.96
Granted	304,277	49,699	353,976	5.84
Dividend Equivalents Earned	25,150	1,051	26,201	5.53
Vested	(15,728)	(29,491)	(45,219)	5.02
Forfeited	(44,109)		(44,109)	4.73
Non-vested at end of period	1,184,558	55,273	1,239,831	\$ 5.23
Outstanding at end of period	1,184,558	144,822	1,329,380	\$ 5.22

All recipients earn quarterly dividend equivalents on their respective units. These dividend equivalents are not paid out during the vesting period, but instead entitle the recipients to additional units. Therefore, dividends earned each quarter compound based upon the updated unit balances. Upon vesting/delivery, shares are expected to be issued from treasury.

On June 23, 2014, under the terms of the 2010 Equity Incentive Plan, the Company granted 304,277 RSUs to members of management. As the stock price on the grant date of June 23, 2014 was \$5.84, total compensation cost to be recognized is \$1.8 million. This cost will be recognized over a period of two to five years. Subsequent to each requisite service period, the awards will vest 100%.

Additionally, on June 23, 2014, under the terms of the 2010 Equity Incentive Plan, the Company granted 36,000 DSUs to directors. As the stock price on the grant date of June 23, 2014 was \$5.84, total compensation cost to be recognized is \$0.2 million. This cost will be recognized over the requisite service period of one year from the date of grant or the next annual shareholders' meeting; whichever is earlier. The Company also granted 13,699 DSUs to the Chairman of the Board. As the stock price on the grant date of June 23, 2014 was \$5.84, total compensation cost to be recognized is \$0.1 million. This cost will be recognized over a period of five years. Subsequent to the requisite service period, the awards will vest 100%. These DSUs generally are subject to the same terms as RSUs under the Company's 2010 Equity Incentive Plan, except that,

following vesting, settlement occurs within 30 days following the earlier of separation from the Board or a change in control of the Company. Subsequent to vesting and prior to delivery, these units will continue to earn dividend equivalents.

The Company recognized \$0.3 million of compensation expense related to non-vested stock units for the three months ended September 30, 2014 and 2013. The Company recognized \$0.8 million and \$0.7 million of compensation expense related to non-vested stock units for the nine months ended September 30, 2014 and 2013, respectively. As of September 30, 2014, there was \$3.9 million of total unrecognized compensation cost related to these non-vested stock units. This cost is expected to be recognized over a period of 3.7 years.

#### Note 8: Income Taxes

At September 30, 2014, the Company was under examination by the Illinois Department of Revenue for the Company's 2011 and 2012 income tax filings.

#### Note 9: Outstanding Commitments and Contingent Liabilities

##### *Legal Matters*

The Company is a party to legal actions which arise in the normal course of its business activities. In the opinion of management, the ultimate resolution of these matters is not expected to have a material effect on the financial position or the results of operations of the Company.

##### *Credit Commitments and Contingencies*

The Company is a party to credit-related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Balance Sheets.

The Company's exposure to credit loss is represented by the contractual amount of those commitments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments. A summary of the contractual amount of the Company's exposure to off-balance-sheet risk relating to the Company's commitments to extend credit and standby letters of credit follows:

	September 30, 2014	December 31, 2013
	(dollars in thousands)	
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit	\$ 575,586	\$ 527,614
Standby letters of credit	13,601	10,155

Commitments to extend credit are agreements to lend to a customer as long as no condition established in the contract has been violated. These commitments are generally at variable interest rates and generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for equity lines of credit may expire without being drawn upon. Therefore, the total commitment amounts

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the customer.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer's obligation to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including bond financing and similar transactions and primarily have terms of one year or less. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds collateral, which may include accounts receivable, inventory, property and equipment, and income producing properties, supporting those commitments if deemed necessary. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Company would be required to fund the commitment. The maximum potential amount of future payments the Company could be required to make is represented by the contractual amount shown in the summary above. If the commitment is funded, the Company would be entitled to seek recovery from the customer. As of September 30, 2014 and December 31, 2013, no amounts were recorded as liabilities for the Company's potential obligations under these guarantees.

**Note 10: Reportable Segments and Related Information**

The Company has three reportable segments, Busey Bank, FirsTech and Busey Wealth Management. Busey Bank provides a full range of banking services to individual and corporate customers through its branch network in downstate Illinois, through its branch in Indianapolis, Indiana, and through its branch network in southwest Florida. FirsTech provides remittance processing for online bill payments, lockbox and walk-in payments. Busey Wealth Management is the parent company of Busey Trust Company, which provides a full range of asset management, investment and fiduciary services to individuals, businesses and foundations, tax preparation and philanthropic advisory services.

The Company's three reportable segments are strategic business units that are separately managed as they offer different products and services and have different marketing strategies.

The segment financial information provided below has been derived from the internal accounting system used by management to monitor and manage the financial performance of the Company. The accounting policies of the three segments are the same as those described in the summary of significant accounting policies in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Total net income	\$ 9,109	\$ 7,933	\$ 25,181	\$ 21,806

**Note 11: Derivative Financial Instruments**

Starting in the first quarter of 2014, the Company began entering into loan agreements that settled in non-U.S. dollar denominations. The foreign loan balance, gross, translated into U.S. dollars as of September 30, 2014 was \$1.4 million.

*Foreign Currency Derivatives.* The Company enters into foreign currency forward contracts that are not designated as hedging instruments to mitigate the economic effect of fluctuations in foreign currency exchange rates on certain non-U.S. dollar denominated loans. Due to the foreign loan activity beginning in 2014, the Company implemented a new accounting policy based on existing accounting standards. Because the foreign currency forward contracts do not meet hedge accounting requirements, gains and losses due to changes in their fair values are recognized in other income.

The notional amount and fair values of open foreign currency forward contracts were as follows:

	September 30, 2014	December 31, 2013
	(dollars in thousands)	
Forward contracts foreign exchange:		
Notional amount	\$ 1,392	\$
Other assets estimated fair value	13	
Other liabilities estimated fair value		

The amount of gains and losses relating to foreign currency forward contracts included in other income for the three and nine months ended September 30, 2014 was insignificant.

Foreign currency forward contracts involve the risk of dealing with counterparties and their ability to meet contractual terms. We believe the risk of incurring losses due to nonperformance by our counterparties is manageable.

As of September 30, 2014, the Company had no other interest rate futures, forwards, swaps or option contracts, or other financial instruments with similar characteristics with the exception of rate lock commitments on mortgage loans to be held for sale, which netted to an insignificant amount.

**Note 12: Fair Value Measurements**

The fair value of an asset or liability is the price that would be received by selling that asset or paid in transferring that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Company utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. FASB ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value

hierarchy is as follows:

*Level 1 Inputs* - Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

*Level 2 Inputs* - Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

*Level 3 Inputs* - Unobservable inputs for determining the fair values of assets or liabilities that reflect the Company's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to those Company assets and liabilities that are carried at fair value.

There were no transfers between levels during the quarter ended September 30, 2014.

In general, fair value is based upon quoted market prices, when available. If such quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar securities for which significant assumptions are derived primarily from or corroborated by observable data. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect, among other things, counterparty credit quality and the company's creditworthiness as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates and, therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

*Securities Available for Sale.* Securities classified as available for sale are reported at fair value utilizing level 1 and level 2 measurements. For mutual funds and other equity securities, unadjusted quoted prices in active markets for identical assets are utilized to determine fair value at the measurement date and have been classified as level 1 in the ASC 820 fair value hierarchy. For all other securities, the Company obtains fair value measurements from an independent pricing service. The independent pricing service evaluations are based on market data. The independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information. Because many fixed income securities do not trade on a daily basis, the independent pricing service evaluated pricing applications apply available information as applicable through processes such as benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations. In addition, the independent pricing service uses model processes, such as the Option Adjusted Spread model, to assess interest rate impact and develop prepayment scenarios. The models and processes take into account market convention. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models.

The market inputs that the independent pricing service normally seeks for evaluations of securities, listed in approximate order of priority, include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research publications. The independent pricing service also monitors market indicators, industry and economic events. Information of this nature is a trigger to acquire further market data. For certain security types, additional inputs may be used or some of the market inputs may not be applicable. Evaluators may prioritize inputs differently on any given day for any security based on market conditions, and not all inputs listed are available for use in the evaluation process for each security evaluation on a given day. Because the data utilized was observable, the securities have been classified as level 2 in the ASC 820 fair value hierarchy.

*Derivative Assets and Derivative Liabilities.* Derivative assets and derivative liabilities are reported at fair value utilizing level 2 measurements. Derivative instruments with positive fair values are reported as an asset and derivative instruments with negative fair value are reported as liabilities. The fair value of derivative assets and liabilities is determined based on prices obtained from a third party. Values of derivative assets and liabilities are primarily based on observable inputs and are classified as level 2 in the ASC 820 fair value hierarchy.

# Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2014 and December 31, 2013, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	Level 2 Inputs (dollars in thousands)	Level 3 Inputs	Total Fair Value
<b>September 30, 2014</b>				
<b>Securities available for sale</b>				
U.S. Treasury securities	\$	\$ 50,577	\$	\$ 50,577
Obligations of U.S. government corporations and agencies		188,636		188,636
Obligations of states and political subdivisions		237,162		237,162
Residential mortgage-backed securities		245,572		245,572
Corporate debt securities		73,958		73,958
Mutual funds and other equity securities	7,160			7,160
<b>Derivative assets</b>				
Foreign currency forward contracts		13		13
<b>Derivative liabilities</b>				
Foreign currency forward contracts				
<b>December 31, 2013</b>				
<b>Securities available for sale</b>				
U.S. Treasury securities	\$	\$ 102,640	\$	\$ 102,640
Obligations of U.S. government corporations and agencies		257,411		257,411
Obligations of states and political subdivisions		272,152		272,152
Residential mortgage-backed securities		177,735		177,735
Corporate debt securities		25,506		25,506
Mutual funds and other equity securities	5,866			5,866

Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

**Impaired Loans.** The Company does not record loans at fair value on a recurring basis. However, periodically, a loan is considered impaired and is reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Impaired loans measured at fair value typically consist of loans on non-accrual status and restructured loans in compliance with modified terms. Collateral values are estimated using a combination of observable inputs, including recent appraisals, and unobservable inputs based on customized discounting criteria. Due to the significance of the unobservable inputs, all impaired loan fair values have been classified as level 3 in the ASC 820 fair value hierarchy.

**OREO.** Non-financial assets and non-financial liabilities measured at fair value include OREO (upon initial recognition or subsequent impairment). OREO properties are measured using a combination of observable inputs, including recent appraisals, and unobservable inputs based on customized discounting criteria. Due to the significance of the unobservable inputs, all OREO fair values have been classified as level 3 in the ASC 820 fair value hierarchy.

The following table summarizes assets and liabilities measured at fair value on a non-recurring basis as of September 30, 2014 and December 31, 2013, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
(dollars in thousands)				
<b>September 30, 2014</b>				
Impaired loans	\$	\$	\$ 2,460	\$ 2,460
OREO				
<b>December 31, 2013</b>				
Impaired loans	\$	\$	\$ 5,491	\$ 5,491
OREO			1,134	1,134

The following table presents additional quantitative information about assets measured at fair value on a non-recurring basis for which the Company has utilized level 3 inputs to determine fair value:

		Quantitative Information about Level 3 Fair Value Measurements		
Fair Value Estimate		Valuation Techniques	Unobservable Input	Range (Weighted Average)
(dollars in thousands)				
<b>September 30, 2014</b>				
Impaired loans	\$ 2,460	Appraisal of collateral	Appraisal adjustments	-0.6% to -100.0% (-48.0%)
OREO		Appraisal of collateral	Appraisal adjustments	-% (-%)
<b>December 31, 2013</b>				
Impaired loans	\$ 5,491	Appraisal of collateral	Appraisal adjustments	-0.4% to -100.0% (-36.0%)
OREO	1,134	Appraisal of collateral	Appraisal adjustments	-6.6% to -100.0% (-47.9%)

# Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The estimated fair values of financial instruments that are reported at amortized cost in the Company's Consolidated Balance Sheets, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value, were as follows:

	September 30, 2014		December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(dollars in thousands)			
Financial assets:				
Level 2 inputs:				
Cash and due from banks	\$ 179,724	\$ 179,724	\$ 231,603	\$ 231,603
Securities held to maturity	2,384	2,421	834	831
Loans held for sale	12,090	12,355	13,840	14,103
Accrued interest receivable	12,219	12,219	11,148	11,148
Level 3 inputs:				
Loans, net	2,320,811	2,323,621	2,233,893	2,236,841
Financial liabilities:				
Level 2 inputs:				
Deposits	\$ 2,825,394	\$ 2,825,499	\$ 2,869,138	\$ 2,870,870
Securities sold under agreements to repurchase	157,282	157,282	172,348	172,348
Long-term debt	30,000	30,000		
Junior subordinated debt owed to unconsolidated trusts	55,000	55,000	55,000	55,000
Accrued interest payable	527	527	673	673

The fair value of loans, net reflects general changes in the interest rate curve used to calculate fair values based on cash flows.

FASB ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. A detailed description of the valuation methodologies used in estimating the fair value of financial instruments is set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

During the third quarter of 2014, the Company executed \$30.0 million in Federal Home Loan Bank ( FHLB ) overnight discount note indexed advances. The variable rate notes range in maturity from seven to ten years with options to prepay at par prior to maturity.

## Note 13: Pending Acquisitions

On September 25, 2014, the Company entered into an Agreement and Plan of Merger (the Merger Agreement ) by and among First Busey, FBC Acquisition LLC, a newly-formed Nevada limited liability corporation and wholly-owned subsidiary of First Busey, and Herget Financial Corp., a Delaware corporation ( Herget Financial ), pursuant to which First Busey will acquire Herget Financial and its wholly-owned bank subsidiary, Herget Bank, National Association ( Herget Bank ). Under the terms of the Merger Agreement, First Busey will acquire 100% of Herget Financial's outstanding common stock for aggregate cash consideration of \$34.1 million. Each share of Herget Financial common stock will be entitled to receive \$588.00 in cash. The merger consideration is subject to certain downward adjustments as set forth in the Merger Agreement. It is anticipated that Herget Bank will be merged with and into First Busey's bank subsidiary, Busey Bank, upon completion of the transaction. At that time, Herget Bank's banking offices will become branches of Busey Bank. As of September 30, 2014, Herget Financial and Herget Bank had

total consolidated assets of \$275.1 million. The merger is anticipated to be completed in early 2015, and is subject to the satisfaction of the closing conditions in the Merger Agreement and the approval of the appropriate regulatory authorities.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS  
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following is management's discussion and analysis of the financial condition of First Busey Corporation and its subsidiaries (referred to herein as First Busey, Company, we, or our ) at September 30, 2014 (unaudited), as compared with June 30, 2014 (unaudited), December 31, 2013 and September 30, 2013 (unaudited), and the results of operations for the three and nine months ended September 30, 2014 and 2013 (unaudited), and, in certain instances, the three months ended June 30, 2014 (unaudited). Management's discussion and analysis should be read in conjunction with the Company's consolidated financial statements and notes thereto appearing elsewhere in this quarterly report, as well as the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

**EXECUTIVE SUMMARY**

*Operating Results*

First Busey Corporation's net income for the third quarter of 2014 was \$9.1 million and net income available to common stockholders was \$8.9 million, or \$0.10 per fully-diluted common share. Net income increased from the third quarter of 2013, when the Company reported net income of \$7.9 million and net income available to common stockholders of \$7.0 million, or \$0.08 per fully-diluted common share. Net income available to common stockholders also grew 12% on a linked-quarter basis. For the second quarter of 2014, the Company reported net income of \$8.2 million and net income available to common stockholders of \$8.0 million, or \$0.09 per fully-diluted common share.

The Company's year-to-date net income through September 30, 2014 was \$25.2 million and net income available to common stockholders was \$24.6 million, or \$0.28 per fully-diluted common share, compared to net income of \$21.8 million and net income available to common stockholders of \$19.1 million, or \$0.22 per fully-diluted common share, for the comparable period of 2013.

Net interest income of \$25.9 million in the third quarter of 2014 increased from \$25.0 million in the second quarter of 2014, and \$25.2 million recorded in the third quarter of 2013. Net interest income for the first nine months of 2014 was \$75.5 million compared to \$75.1 million for the same period of 2013. Gross loans at September 30, 2014 increased \$55.8 million from June 30, 2014, despite a drop in held for sale loans of \$8.2 million during the period.

Robust loan growth during 2013 pushed Small Business Lending Fund qualified credits above certain thresholds required to meaningfully reduce costs of the Company's preferred stock dividend beginning in 2014. Dividends paid on the preferred stock totaled \$0.5 million for the first nine months of 2014 compared to \$2.7 million for the comparable period of 2013. In addition, credit quality and related costs continued to improve. As net charge-offs and non-performing loans trended significantly lower, the provision for loan loss fell to zero in the third quarter of 2014, a decrease from \$1.0 million in the second quarter of 2014 and \$2.0 million in the third quarter of 2013. For the first nine months of 2014, the provision for loan loss was \$2.0 million, compared to \$6.0 million for the same period of 2013. With a continued commitment to the quality of assets and the strength of our balance sheet, near-term loan losses are expected to remain at lower levels.

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Busey Wealth Management's net income of \$1.2 million for the third quarter of 2014 seasonally declined from \$1.4 million for the second quarter of 2014 but was comparable to the third quarter of 2013. Busey Wealth Management's net income for the first nine months of 2014 was \$3.6 million as compared to \$3.1 million for the first nine months of 2013. Assets under care increased to \$5.0 billion as of September 30, 2014 compared to \$4.7 billion at September 30, 2013. FirstTech's net income of \$0.3 million for the third quarter of 2014 was comparable to the second quarter of 2014 and increased from the third quarter of 2013 by 24.3%. FirstTech's year-to-date net income of \$1.0 million increased from \$0.8 million for the comparable period of 2013, primarily due to growth in electronic processing revenues, including online and mobile services.

*Asset Quality*

While much internal focus has been directed toward organic growth, the Company's commitment to credit quality remains strong, as evidenced by another quarter of meaningful progress across a range of credit indicators. As of September 30, 2014, the Company reported non-performing loans of \$8.7 million, the lowest level in over six years. Net charge-offs for the third quarter of 2014 also reflected yet another low at \$0.4 million for the quarter, compared to \$1.0 million for second quarter of 2014 and \$2.5 million for the third quarter of 2013. Net charge-offs for the first nine months of 2014 were \$2.6 million, compared to \$6.0 million for the same period of 2013. When determining whether to record a third quarter provision expense, the Company considered standard GAAP measures along with a \$2.0 million recovery that was recorded early in the fourth quarter of 2014. While these improvements are encouraging, many asset quality metrics remain dependent upon market-specific economic conditions, and specific measures may fluctuate from quarter to quarter. The key metrics are as follows:

**SELECTED FINANCIAL HIGHLIGHTS***(dollars in thousands)*

	September 30, 2014	As of and for the Three Months Ended June 30, 2014	December 31, 2013	September 30, 2013
<b>ASSET QUALITY</b>

---

(1) Includes loans held for sale.

(2) Includes loans categorized as commercial, commercial real estate and real estate construction.

Gross loans at September 30, 2014 increased \$55.8 million from June 30, 2014. Gross loans increased to \$2.4 billion at September 30, 2014 from \$2.3 billion at each of June 30, 2014, December 31, 2013 and September 30, 2013. Commercial loans increased to \$1.8 billion as of September 30, 2014, which represents an increase of 2.6% from June 30, 2014 and 5.1% from September 30, 2013.

*Economic Conditions of Markets*

Our primary markets, which are in micro-urban communities in downstate Illinois, are distinct from the smaller rural populations of Illinois and have strong industrial, academic or healthcare employment bases. Our primary downstate Illinois markets of Champaign, Macon, McLean and Peoria counties are anchored by several strong, familiar and stable organizations.

Champaign County is home to the University of Illinois – Urbana/Champaign ( U of I ), the University’s primary campus. U of I has in excess of 44,000 students. Additionally, Champaign County healthcare providers serve a significant area of downstate Illinois and western Indiana. Macon County is home to the North American headquarters for Archer Daniels Midland ( ADM ), a Fortune 100 company and one of the largest agricultural processors in the world. ADM’s presence in Macon County supports many derivative businesses in the agricultural processing arena. Additionally, Macon County is home to Millikin University, and its healthcare providers serve a significant role in the market. McLean County is home to State Farm, Country Financial, Illinois State University and Illinois Wesleyan University. State Farm, a Fortune 100 company, is the largest employer in McLean County, and Country Financial and the universities provide additional stability to a growing area of downstate Illinois. Peoria County is home to Caterpillar, a Fortune 100 company, and Bradley University, in addition to a large healthcare presence serving much of the western portion of downstate Illinois. The institutions noted above, coupled with a large agricultural sector, anchor the communities in which they are located, and have provided a comparatively stable foundation for housing, employment and small business.

The State of Illinois, where the largest portion of the Company’s customer base is located, continues to be one of the most troubled of any state in the United States with pension under-funding, continued budget deficits and a declining credit outlook. Additionally, the Company is located in markets with significant universities and healthcare companies, which rely heavily on state funding and contracts. Payment lapses by the State of Illinois to its vendors and government sponsored entities may have negative effects on our primary market areas.

Southwest Florida has shown continuing signs of improvement in areas such as job growth and home sales over the last few years. In addition, median sales prices of homes in Florida continue to be on the rise. Although we have seen recent improvement in certain economic indicators, we expect it will still take southwest Florida a few more years to return to peak economic strength. In 2013, Hertz Global Holdings, a Fortune 500 company, announced its intent to move its headquarters from New Jersey to southwest Florida, building a new world headquarters in Lee County. It is estimated that the new headquarters will bring at least 700 jobs to the area.

## OPERATING PERFORMANCE

### *NET INTEREST INCOME*

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is tax-equivalent net interest income as a percent of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 35%. Tax favorable assets generally have lower contractual pre-tax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax favorable assets. After factoring in the tax favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

The following tables show the consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related interest rates for the periods shown. The tables also show, for the periods indicated, a summary of the changes in interest earned and interest expense resulting from changes in volume and rates for the major components of interest-earning assets and interest-bearing liabilities. All average information is provided on a daily average basis.

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Net interest margin(1)	\$	77,015	3.15%	\$	76,843	3.16%	\$	5,347	\$	(5,175)	\$	172
------------------------	----	--------	-------	----	--------	-------	----	-------	----	---------	----	-----

---

(1) On a tax-equivalent basis assuming a federal income tax rate of 35%.

(2) Non-accrual loans have been included in average loans.

(3) Annualized.

Total average earning assets increased for the three and nine month periods ended September 30, 2014 as compared to the same periods of 2013. Average loans increased \$183.6 million and \$182.7 million for the three and nine month periods ended September 30, 2014 compared to the same periods of 2013, respectively. Average interest-bearing bank deposits and investment securities both decreased for the three and nine month periods ended September 30, 2014 as compared to the same periods of 2013. Loans generally have notably higher yields compared to interest-bearing bank deposits and investment securities, leading to a positive effect on net interest margin. Despite our increasing average loan balances, which positively influenced net interest margin, a highly competitive loan environment and a prolonged period of low interest rates continued to put downward pressure on yields and margins.

Total average interest-bearing liability balances decreased for the three and nine month periods ended September 30, 2014 as compared to the same periods of 2013. Time deposits were the largest factor, decreasing \$92.0 million and \$98.7 million for the three and nine month periods ended September 30, 2014 compared to the same periods of 2013, respectively.

Interest income, on a tax-equivalent basis, increased \$0.2 million for the three month period ended September 30, 2014 as compared to the same period of 2013. Interest income, on a tax-equivalent basis, decreased \$1.6 million for the nine month period ended September 30, 2014 as compared to the same period of 2013. The interest income increase for the three month period ended September 30, 2014 was primarily a result of higher average loan balances. The interest income decline for the nine month period ended September 30, 2014 related primarily to lower yields earned on assets in a low interest rate environment. Interest expense decreased \$0.4 million and \$1.8 million for the three and nine month periods ended September 30, 2014 as compared to the same periods of 2013, respectively. The interest expense decline was primarily a result of decreases in interest rates offered by the Company on certain deposit products, particularly time deposits, as the interest rate environment remains low.

#### *Net interest margin*

Net interest margin, our net interest income expressed as a percentage of average earning assets stated on a tax-equivalent basis, held relatively steady at 3.19% for the three month period ended September 30, 2014 compared to 3.20% for the same period in 2013 and was also relatively stable at 3.15% for the nine month period ended September 30, 2014 compared to 3.16% for the same period in 2013.

Quarterly net interest margins for 2014 and 2013 are as follows:

	2014	2013
First Quarter	3.13%	3.10%
Second Quarter	3.13%	3.17%
Third Quarter	3.19%	3.20%
Fourth Quarter		3.12%

The net interest spread, which represents the difference between the average rate earned on earning assets and the average rate paid on interest-bearing liabilities, also on a tax-equivalent basis, was 3.13% for the three month period ended September 30, 2014, compared to 3.14% for the same period in 2013 and was 3.09% for the nine month periods ended September 30, 2014 and 2013.

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

We continue to experience downward pressure on our yield in interest-earning assets resulting from a protracted period of historically low rates and heightened competition for assets, which has been experienced throughout the banking industry. The development of a stronger asset mix from increased loan balances, while actively bringing down interest expense and optimizing funding costs, remains a focus. We believe improvements in margin will be achieved through continued deployment of our liquid funds at higher yields as we expect to redeploy cash and securities into our loan portfolio at improved yields as the economy continues to strengthen.

Management attempts to mitigate the effects of an unpredictable interest-rate environment through effective portfolio management, prudent loan underwriting and operational efficiencies. Please refer to the Notes to Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 for accounting policies underlying the recognition of interest income and expense.

**OTHER INCOME**

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2014	2013	% Change (dollars in thousands)	2014	2013	% Change
Trust fees	\$ 4,182	\$ 4,035	3.6%	\$ 14,879	\$ 13,956	6.6%
Commissions and brokers fees, net	676	710	(4.8)%	2,023	1,819	11.2%
Remittance processing	2,394	2,105	13.7%	7,120	6,288	13.2%
Service charges on deposit accounts	3,175	3,126	1.6%	8,981	8,876	1.2%
Other service charges and fees	1,575	1,486	6.0%	4,681	4,452	5.1%
Gain on sales of loans	1,339	2,684	(50.1)%	3,554	8,944	(60.3)%
Security (losses) gains, net		82	(100.0)%	40	82	(51.2)%
Other	863	1,402	(38.4)%	2,924	3,637	(19.6)%
Total other income	\$ 14,204	\$ 15,630	(9.1)%	\$ 44,202	\$ 48,054	(8.0)%

Total other income decreased \$1.4 million and \$3.9 million for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013, respectively, primarily from decreased gains on sales of loans as the industry is experiencing a general slowdown in mortgage production, partially offset by an aggregate increase in trust fees and commissions and brokers fees, net as well as in remittance processing.

Combined wealth management revenue, consisting of trust fees and commissions and brokers fees, net, increased for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013. The increase was led by organic growth, which increased assets under care ( AUC ), and positive market trends. AUC increased to \$5.0 billion as of September 30, 2014 compared to \$4.7 billion at September 30, 2013. Continued growth in new AUC driven by our wealth management teams suggest future income will also be positively impacted as wealth management revenues are typically highly correlated to AUC. Furthermore, the Company believes the boutique services offered by Trevett Capital Partners within its suite of wealth services broadens its business base and enhances its ability to further develop revenue sources.

Remittance processing revenue relates to our payment processing company, FirsTech. FirsTech's revenue increased \$0.3 million for the three month period ended September 30, 2014 as compared to the same period in 2013 and \$0.8 million for the nine month period ended September 30, 2014 as compared to the same period in 2013, primarily due to growth in electronic processing revenues, including online and mobile services. FirsTech adds important diversity to our revenue stream while widening our array of service offerings to larger commercial clients within our footprint and nationally.

Overall, service charges on deposit accounts combined with other service charges and fees increased for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013. Evolving regulation, product changes and changing behaviors by our client base may impact the revenue derived from charges on deposit accounts going forward.

Gain on sales of loans decreased for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013 due to lower refinance volume as a result of market-based influences. Retail real estate portfolio balances were higher at September 30, 2014 compared to September 30, 2013, excluding held for sale loans. Total mortgage production is reflected in both the gain on loans sold and the balances of loans retained in the retail real estate portfolio, and the mix of sales versus retention may vary over time.

Other income decreased for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013. The decrease was primarily due to income fluctuation in the Company's private equity investment funds and fixed asset gains in 2013 compared to minimal activity in 2014.

**OTHER EXPENSE**

	Three Months Ended September 30			Nine Months Ended September 30		
	2014	2013	% Change (dollars in thousands)	2014	2013	% Change

Data processing	2,600	2,606	(0.2)%	8,099	7,813	3.7%
Amortization of intangible assets	701	783	(10.5)%	2,181	2,349	(7.2)%
Regulatory expense	503	545	(7.7)%	1,559	1,808	(13.8)%
OREO expense	16	(207)	107.7%	87	394	(77.9)%
Other	4,288	4,784	(10.4)%	12,862	14,239	(9.7)%
Total other expense	\$ 26,298	\$ 27,358	(3.9)%	\$ 79,739	\$ 84,726	(5.9)%
Income taxes	\$ 4,708	\$ 3,572	31.8%	\$ 12,771	\$ 10,583	20.7%
Effective rate on income taxes	34.1%	31.0%		33.7%	32.7%	
Efficiency ratio	63.0%	64.2%		64.0%	66.0%	
Full-time equivalent employees as of period-end	801	857				

Total other expense decreased \$1.1 million and \$5.0 million for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013, respectively, as the Company remains focused on cost control and productivity, which broadly reduced operating expenses.

Total compensation expense decreased \$0.7 million for the three month period ended September 30, 2014 as compared to the same period in 2013 and \$3.1 million for the nine month period ended September 30, 2014 compared to the same period in 2013. Employee benefits fluctuate as a function of changes in salaries and wages. An ongoing commitment to seek sensible opportunities to reduce cost and enhance productivity resulted in personnel reductions and other cost containment efforts that have contributed to positive expense trends.

Combined occupancy expenses and furniture and equipment expenses increased for the three month period ended September 30, 2014 as compared to the same period in 2013 but decreased slightly for the nine month period ended September 30, 2014 as compared to the same period in 2013. We continue to evaluate our operations for appropriate cost control measures while seeking improvements in service delivery to our customers.

Data processing expense was steady for the three month period ended September 30, 2014 as compared to the same period in 2013 but increased for the nine month period ended September 30, 2014 as compared to the same period in 2013. As the Company manages data processing expense, it continues to enhance its mobile and internet banking services and prioritize strategies to mitigate the risk from cybercriminals through the use of new technology, industry best practices and customer education. A portion of the increase in data processing expense was

also related to supporting new sources of revenue growth at FirsTech.

Amortization of intangible assets expense decreased for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013 as we are now in the seventh year of amortization arising from our merger with Main Street Trust, Inc.

Regulatory expense decreased for the three and nine month periods ended September 30, 2014 as compared to the same periods in 2013. We anticipate that our regulatory expenses will remain close to current levels for the near future.

Our costs associated with OREO, such as collateral preservation and legal fees, increased for the three months ended September 30, 2014 as compared to the same period in 2013 but decreased for the nine months ended September 30, 2014 as compared to the same period in 2013. This expense fluctuates based on the management of commercial properties and the operating activity associated with the properties that we hold throughout the year.

Other expense decreased for the three and nine months ended September 30, 2014 as compared to the same periods in 2013 primarily as a result of a widespread reduction in expenses due to an enhanced emphasis on cost control.

The effective rates of income taxes, or income taxes divided by income before taxes, of 34.1% and 33.7% for the three and nine months ended September 30, 2014, respectively, were lower than the combined federal and state statutory rate of approximately 41% due to amounts of tax preferred interest income, such as municipal bond interest and bank owned life insurance income, accounting for a portion of our taxable income. As taxable income increases, we expect our effective tax rate to increase. Under current law, Illinois net operating loss carryover limitations expired in 2014 and the corporate income tax rate is scheduled for reduction effective January 1, 2015. The Company continues to monitor evolving state tax legislation and its potential impact on operations on an ongoing basis.

The efficiency ratio represents total other expense, less amortization charges, as a percentage of tax-equivalent net interest income plus other income, less security gains and losses. The efficiency ratio, which is a non-GAAP financial measure commonly used by management and the investment community in the banking industry, measures the amount of expense that is incurred to generate a dollar of revenue. The efficiency ratio of 63.0% for the three month period ended September 30, 2014 improved from 64.2% in the comparable period in 2013. The efficiency ratio for the first nine months of 2014 was 64.0%, an improvement from 66.0% for the same period of 2013. The process of examining appropriate avenues to improve efficiency is expected to continue as a focus in future periods with an emphasis on revenue growth.

## FINANCIAL CONDITION

### SIGNIFICANT BALANCE SHEET ITEMS

	September 30, 2014	December 31, 2013 (dollars in thousands)	% Change
<b>Assets</b>			
Securities available for sale	\$ 803,065	\$ 841,310	(4.5)%
Securities held to maturity	2,384	834	185.9%
Loans, net, including loans held for sale	2,332,901	2,247,733	3.8%
Total assets	\$ 3,520,917	\$ 3,539,575	(0.5)%
<b>Liabilities</b>			
Deposits:			
Noninterest-bearing	\$ 579,550	\$ 547,531	5.8%
Interest-bearing	2,245,844	2,321,607	(3.3)%
Total deposits	\$ 2,825,394	\$ 2,869,138	(1.5)%

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Securities sold under agreements to repurchase	\$	157,282	\$	172,348	(8.7)%
Long-term debt		30,000			100.0%
Total liabilities	\$	3,090,889	\$	3,124,211	(1.1)%
<b>Stockholders' equity</b>	\$	430,028	\$	415,364	3.5%

First Busey's balance sheet at September 30, 2014 slightly decreased as compared with its balance sheet at December 31, 2013. Total securities decreased by \$36.7 million at September 30, 2014 compared to December 31, 2013. Net loans, including loans held for sale, increased by \$85.2 million, or 3.8%, during the same period, as loan demand in commercial real estate and retail real estate continued to improve in the third quarter.

Total liabilities decreased by \$33.3 million, or 1.1%, at September 30, 2014 compared to December 31, 2013. Noninterest-bearing deposits increased by \$32.0 million, or 5.8%, at September 30, 2014 compared to December 31, 2013, while interest-bearing deposits decreased by \$75.8 million, or 3.3%, at September 30, 2014 compared to December 31, 2013. Securities sold under agreements to repurchase decreased by \$15.1 million, or 8.7%, due to changing customer preferences and normal fluctuations in balances. The Company executed \$30.0 million of long-term debt in the third quarter of 2014 which is at variable rates and prepayable, as part of ongoing balance sheet strategy. The Company remained strongly core deposit funded at 76.1% of total assets as of September 30, 2014, with solid liquidity and significant market share in the communities it serves.

Stockholders' equity increased to \$430.0 million at September 30, 2014 as compared to \$415.4 million at December 31, 2013. This increase was primarily the result of earnings in the first nine months of 2014, partially offset by dividends paid on preferred and common stock.

## ASSET QUALITY

### Loan Portfolio

Geographic distributions of loans by category were as follows:

	September 30, 2014			Total
	Illinois	Florida	Indiana	
	(dollars in thousands)

	\$	2,281,460
Less allowance for loan losses		47,567
Net loans	\$	2,233,893

---

(1) Loans held for sale are included in retail real estate.

The total loan portfolio, gross, as of September 30, 2014 increased \$84.6 million from December 31, 2013; gross commercial balances (consisting of commercial, commercial real estate and real estate construction loans) increased \$30.4 million from December 31, 2013. Loans held for sale decreased by \$1.8 million as of September 30, 2014 from December 31, 2013. Retail real estate and retail other, less loans held for sale, increased \$56.0 million as of September 30, 2014 from December 31, 2013 as challenging conditions across the mortgage industry began to moderate during the second quarter of 2014, a trend which continued in the third quarter as well. Achieving meaningful organic growth remains a focus for us, and our commitment to credit quality remains strong, as evidenced by another quarter of meaningful progress across a range of credit indicators as discussed further below.

#### *Allowance for loan losses*

Our allowance for loan losses was \$47.0 million, or 2.0% of loans, at September 30, 2014, compared to \$47.6 million, or 2.1% of loans, at December 31, 2013.

Typically, when we move loans into nonaccrual status, the loans are collateral dependent and charged down through the allowance for loan losses to the fair value of our interest in the underlying collateral less estimated costs to sell. Our loan portfolio is collateralized primarily by real estate.

We continue to attempt to identify problem loan situations on a proactive basis. Once problem loans are identified, adjustments to the provision for loan losses are made based upon all information available at that time. The provision reflects management's analysis of additional allowance for loan losses necessary to cover probable losses in our loan portfolio.

As of September 30, 2014, management believed the level of the allowance and coverage of non-performing loans to be appropriate based upon the information available. However, additional losses may be identified in our loan portfolio as new information is obtained. We may need to provide for additional loan losses in the future as management continues to identify potential problem loans and gains further information concerning existing problem loans.

First Busey does not originate or hold any Alt-A or subprime loans or investments.

#### *Provision for Loan Losses*

The provision for loan losses is a current charge against income and represents an amount which management believes is sufficient to maintain an appropriate allowance for known and probable losses in the loan portfolio. In assessing the appropriateness of the allowance for loan losses, management considers the size and quality of the loan portfolio measured against prevailing economic conditions, regulatory guidelines, historical loan loss experience and credit quality of the portfolio. When a determination is made by management to charge-off a loan balance, such write-off is charged against the allowance for loan losses.

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

As net charge-offs and non-performing loans trended significantly lower, the provision for loan loss fell to zero in the third quarter of 2014 compared to \$2.0 million in the same period of 2013. Our provision for loan losses was \$2.0 million for the nine months ended September 30, 2014 and \$6.0 million for the same period of 2013. The relative provision expenses during 2014 and 2013 were reflective of management's determination of the appropriate level of reserve relative to risk in the portfolio in 2014.

Sensitive assets include non-accrual loans, loans on our classified loan reports and other loans identified as having more than reasonable potential for loss. Management reviews sensitive assets on at least a quarterly basis for changes in each applicable customer's ability to pay and changes in valuation of underlying collateral in order to estimate probable losses. The majority of these loans are being repaid in conformance with their contracts.

### *Non-performing Loans*

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

The following table sets forth information concerning non-performing loans as of each of the dates indicated:

	September 30, 2014	June 30, 2014	March 31, 2014	December 31, 2013
	(dollars in thousands)			
Non-accrual loans	\$ 8,681	\$ 11,232	\$ 14,340	\$ 17,164
Loans 90+ days past due and still accruing	65	235		195
Total non-performing loans	\$ 8,746	\$ 11,467	\$ 14,340	\$ 17,359
OREO	\$ 216	\$ 1,622	\$ 1,937	\$ 2,133
Total non-performing assets	\$ 8,962	\$ 13,089	\$ 16,277	\$ 19,492
Allowance for loan losses	\$ 47,014	\$ 47,428	\$ 47,426	\$ 47,567
Allowance for loan losses to loans	2.0%	2.0%	2.1%	2.1%
Allowance for loan losses to non-performing loans	537.6%	413.6%	330.7%	274.0%
Non-performing loans to loans, before allowance for loan losses	0.4%	0.5%	0.6%	0.8%
Non-performing loans and OREO to loans, before allowance for loan losses	0.4%	0.6%	0.7%	0.9%

We continue to drive positive trends across a range of credit indicators. Total non-performing assets were \$9.0 million at September 30, 2014, compared to \$19.5 million at December 31, 2013. While these improvements are encouraging, many asset quality metrics remain dependent upon market-specific economic conditions, and specific measures may fluctuate from quarter to quarter.

As of September 30, 2014, the Bank had charged-off \$3.6 million of principal balance on loans that were on non-accrual status at September 30, 2014. Partial charge-offs reduce the reported principal of the balance of the loan, whereas, a specific allocation of allowance for loan losses does not reduce the reported principal balance of the loan. Non-accrual loans are reported net of charge-offs, but include related specific allocations of the allowance for loan losses. In summary, if we had not charged-off \$3.6 million in loans, our non-accrual loans would have been that amount greater than the \$8.7 million reported.

#### Potential Problem Loans

Potential problem loans are those loans which are not categorized as impaired, restructured, non-accrual or 90+ days past due, but where current information indicates that the borrower may not be able to comply with present loan repayment terms. Management assesses the potential for loss on such loans as it would with other problem loans and has considered the effect of any potential loss in determining its provision for probable loan losses. Potential problem loans of \$34.7 million at September 30, 2014 were less than the \$50.1 million reported at December 31, 2013. The balance of potential problem loans is a reflection of continued economic challenges; however, we do not believe the potential losses will be as great as seen in the past. Management continues to monitor these credits and anticipates that restructurings, guarantees, additional collateral or other planned actions will result in full repayment of the debts. As of September 30, 2014, management identified no other loans that represent or result from trends or uncertainties which management reasonably expected to materially impact future operating results, liquidity or capital resources. As of September 30, 2014, management was not aware of any information about any other credits which caused management to have serious doubts as to the ability of such borrower(s) to comply with the loan repayment terms.

#### LIQUIDITY

Liquidity management is the process by which we ensure that adequate liquid funds are available to meet the present and future cash flow obligations arising in the daily operations of our business. These financial obligations consist of needs for funds to meet commitments to borrowers for extensions of credit, fund capital expenditures, honor withdrawals by customers, pay dividends to stockholders and pay operating expenses. Our most liquid assets are cash and due from banks, interest-bearing bank deposits, and, if needed, federal funds sold. The balances of these assets are dependent on the Company's operating, investing, lending, and financing activities during any given period.

First Busey's primary sources of funds consist of deposits, investment maturities and sales, loan principal repayments, and capital funds. Additional liquidity is provided by repurchase agreements, the ability to borrow from the Federal Reserve and the FHLB, and brokered deposits. Management intends to satisfy long-term liquidity needs primarily through retention of capital funds.

During the third quarter of 2014, as part of its ongoing balance sheet strategy, the Company undertook a modest level of long-term debt due to low interest rates and attractive funding options available in the market. The Company executed \$30.0 million in FHLB overnight discount note indexed advances. The variable rate notes range in maturity from seven to ten years with options to prepay at par prior to maturity.

Based upon the level of investment securities that reprice within 30 days and 90 days, as of September 30, 2014, management believed that adequate liquidity existed to meet all projected cash flow obligations. We seek to achieve a satisfactory degree of liquidity by actively managing both assets and liabilities. Asset management guides the proportion of liquid assets to total assets, while liability management monitors future funding requirements and prices liabilities accordingly.

#### **OFF-BALANCE-SHEET ARRANGEMENTS**

At September 30, 2014, the Company had outstanding standby letters of credit of \$13.6 million and commitments to extend credit of \$575.6 million to its customers. Since these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. These commitments are made in the ordinary course of business to meet the financing needs of the Company's customers. As of September 30, 2014, no amounts were recorded as liabilities for the Company's potential obligations under these commitments.

#### **CAPITAL RESOURCES**

The ability of the Company to pay cash dividends to its stockholders and to service its debt historically was dependent on the receipt of cash dividends from its subsidiaries. However, Busey Bank sustained significant losses during 2008 and 2009 resulting in pressure on its capital, which was relieved through injections of capital from the Company. State chartered banks have certain statutory and regulatory restrictions on the amount of cash dividends they may pay. Due to the significant losses in the past and the Company's desire to maintain a strong capital position at Busey Bank, no dividends have been paid from Busey Bank since 2009. Until such time as retained earnings have been restored, Busey Bank will not be permitted to pay dividends, and we will need to request permission from Busey Bank's primary regulator to distribute any capital out of Busey Bank. On January 22, 2013, with the approval of its primary regulator, Busey Bank transferred \$50.0 million to the Company, representing a return of capital and associated surplus as a result of an amendment to Busey Bank's charter. Further, on October 22, 2014, with the approval of its primary regulator, Busey Bank transferred \$60.0 million to the Company, representing a return of capital and associated surplus as a result of a further amendment to Busey Bank's charter.

The Company and Busey Bank are subject to regulatory capital requirements administered by federal and state banking agencies that involve the quantitative measure of their assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. Quantitative measures established by regulations to ensure capital adequacy require the Company and Busey Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined in the regulations), and, for the Bank, Tier 1 capital (as defined in the regulations) to average assets (as defined in the regulations). Failure to meet minimum capital requirements may cause regulatory bodies to initiate certain discretionary and/or mandatory actions that, if undertaken, may have a direct material effect on our financial statements. The Company, as a financial holding company, is required to be "well capitalized" in the two capital categories based on risk-weighted assets, as shown in the table below. As of September 30, 2014, the Company and Busey Bank met

all capital adequacy requirements to which they were subject, including the guidelines to be considered well capitalized.

	Actual		Minimum Capital Requirement		Minimum To Be Well Capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(dollars in thousands)						
<b>As of September 30, 2014:</b>						
<u>Total Capital (to Risk Weighted Assets)</u>						
Consolidated	\$ 483,817	18.66%	\$ 207,403	8.00%	\$ 259,254	10.00%
Busey Bank	\$ 439,163	17.06%	\$ 205,960	8.00%	\$ 257,449	10.00%
<u>Tier I Capital (to Risk Weighted Assets)</u>						
Consolidated	\$ 450,451	17.37%	\$ 103,702	4.00%	\$ 155,552	6.00%
Busey Bank	\$ 406,020	15.77%	\$ 102,980	4.00%	\$ 154,470	6.00%
<u>Tier I Capital (to Average Assets)</u>						
Consolidated	\$ 450,451	12.92%	\$ 139,404	4.00%	N/A	N/A
Busey Bank	\$ 406,020	11.79%	\$ 137,770	4.00%	\$ 172,212	5.00%

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law, which required the Board of Governors of the Federal Reserve System to establish minimum capital levels for bank holding companies on a consolidated basis that are as stringent as those required for insured depository institutions. The components of Tier 1 capital will be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. As a result, the proceeds of trust preferred securities will be excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by bank holding companies with less than \$15 billion of assets. As the Company has assets of less than \$15 billion, it will be able to maintain its trust preferred proceeds as Tier 1 capital but it will have to comply with new capital mandates in other respects, and it will not be able to raise Tier 1 capital through the issuance of trust preferred securities.

In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III regulatory capital reforms and issued rules effecting certain changes required by the Dodd-Frank Act (the Basel III Rules). The Basel III Rules are applicable to all U.S. banks that are subject to minimum capital requirements, as well as to bank and savings and loan holding companies other than small bank holding companies (generally bank holding companies with consolidated assets of less than \$500 million). The Basel III Rules not only increase most of the required minimum regulatory capital ratios, but they also introduce a new Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer. The Basel III Rules also expand the definition of capital as in effect currently by establishing criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that now generally qualify as Tier 1 Capital will not qualify, or their qualifications will change when the Basel III Rules are fully implemented. The Basel III Rules also permit banking organizations with less than \$15.0 billion in assets to retain, through a one-time election, the existing treatment for accumulated other comprehensive income, which currently does not affect regulatory capital. The Basel III Rules have maintained the general structure of the current prompt corrective action framework, while incorporating the increased requirements. The prompt corrective action guidelines were also revised to add the Common Equity Tier 1 Capital ratio. In order to be a well-capitalized depository institution under the new regime, a bank and holding company must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more; a Tier 1 Capital ratio of 8% or more; a Total Capital ratio of 10% or more; and a leverage ratio of 5% or more. Generally, financial institutions become subject to the new Basel III Rules on January 1, 2015, with phase-in periods for many of the changes. Management has reviewed the effects of the Basel III Rules on the Company's and the Bank's capital positions and is positioning the Company to satisfy the new requirements.

## FORWARD LOOKING STATEMENTS

Statements made in this report, other than those concerning historical financial information, may be considered forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the financial condition, results of operations, plans, objectives, future performance and business of First Busey. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of First Busey's management and on information currently available to management, are generally identifiable by the use of words such as believe, expect, anticipate, plan, intend, estimate, may, will, would, could, should or other similar expressions. All statements in this document, including forward-looking statements, speak only as of the date they are made, and we undertake no obligation to update any statement in light of new information or future events. A number of factors, many of which are beyond our ability to control or predict, could cause actual results to differ materially from those in our forward-looking statements. These factors include, among others, the following: (i) the strength of the local and national economy; (ii) the economic impact of any future terrorist threats or attacks; (iii) changes in state and federal laws, regulations and governmental policies concerning First Busey's general business (including the impact of the Dodd-Frank Act and the extensive regulations to be promulgated thereunder, as well as the Basel III Rules); (iv) changes in interest rates and prepayment rates of First Busey's assets; (v) increased competition in the financial services sector and the inability to attract new customers; (vi) changes in technology and the ability to develop and maintain secure and reliable electronic systems; (vii) the loss of key executives or employees; (viii) changes in consumer spending; (ix) unexpected results of acquisitions; (x) unexpected outcomes of existing or new litigation involving First Busey; (xi) changes in accounting policies and practices; and (xii) the economic impact of exceptional weather occurrences such as tornadoes, hurricanes, floods, and blizzards. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Additional information concerning First Busey and its business, including additional factors that could materially affect its financial results, is included in First Busey's filings with the Securities and Exchange Commission.

## Critical Accounting Estimates

Critical accounting estimates are those that are critical to the portrayal and understanding of First Busey's financial condition and results of operations and require management to make assumptions that are difficult, subjective or complex. These estimates involve judgments, estimates and uncertainties that are susceptible to change. In the event that different assumptions or conditions were to prevail, and depending on the severity of such changes, the possibility of a materially different financial condition or materially different results of operations is a reasonable likelihood.

Our significant accounting policies are described in Note 1 of the Company's Annual Report on Form 10-K for the year ended December 31, 2013. The majority of these accounting policies do not require management to make difficult, subjective or complex judgments or estimates or the variability of the estimates is not material. However, the following policies could be deemed critical:

**Fair Value of Investment Securities.** Securities are classified as held to maturity when First Busey has the ability and management has the positive intent to hold those securities to maturity. Accordingly, they are stated at cost, adjusted for amortization of premiums and accretion of discounts. First Busey had \$2.4 million of securities classified as held to maturity at September 30, 2014. First Busey had no securities classified as trading at September 30, 2014. Securities are classified as available for sale when First Busey may decide to sell those securities due to changes in market interest rates, liquidity needs, changes in yields on alternative investments, and for other reasons. They are carried at fair value with unrealized gains and losses, net of taxes, reported in other comprehensive income. As of September 30, 2014, First Busey had \$803.1 million of securities classified as available for sale. For equity securities, unadjusted quoted prices in active markets for identical assets are utilized to determine fair value at the measurement date. For all other securities, we obtain fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things. Due to the limited nature of the market for certain securities, the fair value and potential sale proceeds could be materially different in the event of a sale.

Realized securities gains or losses are reported in security gains (losses), net in the Consolidated Statements of Income. The cost of securities sold is based on the specific identification method. Declines in the fair value of available for sale securities below their amortized cost are evaluated to determine whether the loss is temporary or other-than-temporary. If the Company (a) has the intent to sell a debt security or (b) will more-likely-than-not be required to sell the debt security before its anticipated recovery, then the Company recognizes the entire unrealized loss in earnings as an other-than-temporary loss. If neither of these conditions are met, the Company evaluates whether a credit loss exists. The impairment is separated into the amount of the total impairment related to the credit loss and the amount of total impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings, and the amount related to all other factors is recognized in other comprehensive income.

The Company also evaluates whether the decline in fair value of an equity security is temporary or other-than-temporary. In determining whether an unrealized loss on an equity security is temporary or other-than-temporary, management considers various factors including the magnitude and duration of the impairment, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to hold the equity security to forecasted recovery.

***Allowance for Loan Losses.*** First Busey has established an allowance for loan losses which represents its estimate of the probable losses inherent in the loan portfolio as of the date of the financial statements and reduces the total loans outstanding by an estimate of uncollectible loans. Loans deemed uncollectible are charged against and reduce the allowance. A provision for loan losses is charged to current expense. This provision acts to replenish the allowance for loan losses and to maintain the allowance at a level that management deems adequate.

To determine the adequacy of the allowance for loan losses, a formal analysis is completed quarterly to assess the risk within the loan portfolio. This assessment is reviewed by senior management of Busey Bank and the Company. The analysis includes a review of historical performance, dollar amount and trends of past due loans, dollar amount and trends in non-performing loans, certain impaired loans, and loans identified as sensitive assets. Sensitive assets include non-accrual loans, past-due loans, loans on First Busey's watch loan reports and other loans identified as having probable potential for loss.

The allowance consists of specific and general components. The specific component considers loans that are classified as impaired. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying amount of that loan. The general component covers non-classified loans and classified loans not considered impaired, and is based on historical loss experience adjusted for qualitative factors. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss experience.

A loan is considered to be impaired when, based on current information and events, it is probable First Busey will not be able to collect all principal and interest amounts due according to the contractual terms of the loan agreement. When a loan becomes impaired, management generally calculates the impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate. If the loan is collateral dependent, the fair value of the collateral is used to measure the amount of impairment. The amount of impairment and any subsequent changes are recorded through a charge to the provision for loan losses. For collateral dependent loans, First Busey has determined the required allowance on these loans based upon the estimated fair value, net of selling costs, of the applicable collateral. The required allowance or actual losses on these impaired loans could differ significantly if the ultimate fair value of the collateral is significantly different from the fair value estimates used by First Busey in estimating such potential losses.

**Deferred Taxes.** We have maintained significant net deferred tax assets for deductible temporary differences, the largest of which relates to the State of Illinois net operating loss carryforward and the allowance for loan losses. For income tax return purposes, only actual charge-offs are deductible, not the provision for loan losses. Under generally accepted accounting principles, a valuation allowance is required to be recognized if it is more-likely-than-not that the deferred tax asset will not be realized. The determination of the recoverability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, the forecasts of future income, applicable tax planning strategies, and assessments of the current and future economic and business conditions. We consider both positive and negative evidence regarding the ultimate recoverability of our deferred tax assets. Positive evidence includes available tax planning strategies and the probability that taxable income will continue to be generated in future periods, as it was in periods since March 31, 2010, while negative evidence includes a cumulative loss in 2009 and 2008 and certain business and economic trends. We evaluated the recoverability of our net deferred tax assets and established a valuation allowance for certain state net operating loss and credit carryforwards that are not expected to be fully realized. Management believes that it is more-likely-than-not that the other deferred tax assets included in the accompanying consolidated financial statements will be fully realized. We determined that no valuation allowance was required for any other deferred tax assets as of September 30, 2014, although there is no guarantee that those assets will be recognizable in future periods.

We assess the likelihood that any deferred tax assets will be realized through the reduction of taxes in future periods and establish a valuation allowance for those assets for which recovery is not more-likely-than-not. In making this assessment, we must make judgments and estimates regarding the ability to realize the asset through the future reversal of existing taxable temporary differences, future taxable income, and the possible application of future tax planning strategies. The Company's evaluation gave consideration to the fact that all net operating loss carrybacks have been utilized. Therefore, utilization of net operating loss carryforwards are dependent on implementation of tax strategies and continued profitability.

### ITEM 3. QUANTITATIVE AND QUALITATIVE

#### DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of changes in asset values due to movements in underlying market rates and prices. Interest rate risk is the risk to earnings and capital arising from movements in interest rates. Interest rate risk is the most significant market risk affecting First Busey as other types of market risk, such as foreign currency exchange rate risk and commodity price risk, have minimal impact or do not arise in the normal course of First Busey's business activities.

The Bank has an asset-liability committee which meets at least quarterly to review current market conditions and attempts to structure the Bank's balance sheet to ensure stable net interest income despite potential changes in interest rates with all other variables constant.

As interest rate changes do not impact all categories of assets and liabilities equally or simultaneously, the asset-liability committee primarily relies on balance sheet and income simulation analysis to determine the potential impact of changes in market interest rates on net interest income. In these standard simulation models, the balance sheet is projected over a year-one time horizon and a year-two time horizon, and net interest income is calculated under current market rates and then assuming permanent instantaneous shifts of +/-100, +/-200, +/-300 and +/-400 basis points. Management measures such changes assuming immediate and sustained shifts in the federal funds rate and other market rate indices and the corresponding shifts in other non-market rate indices based on their historical changes relative to changes in the federal funds rate and other market indices. The model assumes assets and liabilities remain constant at the measurement date balances. The model uses repricing frequency on all variable-rate assets and liabilities. Prepayment speeds on loans have been adjusted to incorporate expected prepayment speeds in both a declining and rising rate environment. As of September 30, 2014 and December 31, 2013, due to the current low interest rate environment, a downward adjustment in federal fund rates was not meaningful.

Utilizing this measurement concept, the interest rate risk of First Busey due to an immediate and sustained change in interest rates, expressed as a change in net interest income as a percentage of the net interest income calculated in the constant base model, was as follows:

	-400	-300	-200	Year-One: Basis Point Changes		+200	+300	+400
				-100	+100			
September 30, 2014	NA	NA	NA	NA	(2.62)%	(5.23)%	(8.21)%	(11.44)%
December 31, 2013	NA	NA	NA	NA	(3.55)%	(6.91)%	(10.62)%	(14.60)%

  

	-400	-300	-200	Year-Two: Basis Point Changes		+200	+300	+400
				-100	+100			
September 30, 2014	NA	NA	NA	NA	0.30%	0.20%	(0.49)%	(1.66)%
December 31, 2013	NA	NA	NA	NA	0.54%	0.63%	0.15%	(0.88)%

The risk is monitored and managed within approved policy limits. The calculation of potential effects of hypothetical interest rate changes was based on numerous assumptions and should not be relied upon as indicative of actual results. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies. The above results do not take into account any management action to mitigate potential risk.

#### ITEM 4. CONTROLS AND PROCEDURES

##### *Evaluation of Disclosure Controls and Procedures*

An evaluation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) was carried out as of September 30, 2014, under the supervision and with the participation of our Chief Executive Officer, Chief Financial Officer and several other members of our senior management. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2014, our disclosure controls and procedures were effective in ensuring that the information we are required to disclose in the reports we file or submit under the Exchange Act is (i) accumulated and communicated to our management (including the Chief Executive Officer and Chief Financial Officer) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

##### *Changes in Internal Control over Financial Reporting*

During the quarter ended September 30, 2014, First Busey did not make any changes in its internal control over financial reporting or other factors that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

## Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

On May 14, 2013, the Committee of Sponsoring Organizations of the Treadway Commission ( COSO ) issued an updated version of its Internal Control - Integrated Framework ( 2013 Framework ). Originally issued in 1992 ( 1992 Framework ), the framework helps organizations design, implement and evaluate the effectiveness of internal control concepts and simplify their use and application. The 1992 Framework will remain effective during the transition, which extends to December 15, 2014, after which time COSO will consider it as superseded by the 2013 Framework. As of September 30, 2014, First Busey continues to utilize the 1992 Framework and is in the process of transitioning to the 2013 Framework.

**PART II - OTHER INFORMATION**

**ITEM 1. LEGAL PROCEEDINGS**

As part of the ordinary course of business, First Busey and its subsidiaries are parties to litigation that is incidental to their regular business activities.

There is no material pending litigation, other than ordinary routine litigation incidental to its business, in which First Busey or any of its subsidiaries is involved or of which any of their property is the subject. Furthermore, there is no pending legal proceeding that is adverse to First Busey in which any director, officer or affiliate of First Busey, or any associate of any such director or officer, is a party or has a material interest.

**ITEM 1A. RISK FACTORS**

There have been no material changes to the risk factors disclosed in Item 1A of Part I of the Company's 2013 Annual Report on Form 10-K.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

Repurchases

There were no purchases made by or on behalf of First Busey of shares of its common stock during the quarter ended September 30, 2014.

On January 22, 2008, First Busey announced that its board of directors had authorized the repurchase of 1,000,000 shares of common stock. First Busey's repurchase plan has no expiration date and is active until all the shares are repurchased or action is taken by the board of directors to discontinue the plan. As of September 30, 2014, under the Company's stock repurchase plan, 895,655 shares remained authorized for repurchase.

**ITEM 3. DEFAULTS UPON SENIOR SECURITIES**

None.

**ITEM 4. MINE SAFETY DISCLOSURES**

Not Applicable.

**ITEM 5. OTHER INFORMATION**

(a) None.

(b) None.

**ITEM 6. EXHIBITS**

- \*2.1 Agreement and Plan of Merger, dated September 25, 2014, by and among First Busey Corporation, FBC Acquisition LLC and Herget Financial Corp. (Schedules and other similar attachments have been omitted pursuant to Item 601(b)(2) of Regulation S-K).
- \*31.1 Certification of Principal Executive Officer, pursuant to Rule 13a-14(a) and Rule 15d-14(a).
- \*31.2 Certification of Principal Financial Officer, pursuant to Rule 13a-14(a) and Rule 15d-14(a).
- \*32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, from the Company's Chief Executive Officer.
- \*32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, from the Company's Chief Financial Officer.
- \*101 Interactive Data File

Interactive data files pursuant to Rule 405 of Regulation S-T: (i) Consolidated Balance Sheets at September 30, 2014 and December 31, 2013; (ii) Consolidated Statements of Income for the three and nine months ended September 30, 2014 and 2013; (iii) Consolidated Statements of Comprehensive Income for the three and nine months ended September 30, 2014 and 2013; (iv) Consolidated Statements of Stockholders' Equity for the nine months ended September 30, 2014 and 2013; (v) Consolidated Statements of Cash Flows for the nine months ended September 30, 2014 and 2013; and (vi) Notes to Unaudited Consolidated Financial Statements.
