NUVEEN INVESTMENTS ACQUIRED BY TIAA-CREF

On October 1, 2014, TIAA-CREF completed its previously announced acquisition of Nuveen Investments, Inc., the parent company of your fund's investment adviser, Nuveen Fund Advisors, LLC ("NFAL") and the Nuveen affiliates that act as sub-advisers to the majority of the Nuveen Funds. TIAA-CREF is a national financial services organization with approximately \$851 billion in assets under management as of December 31, 2014 and is a leading provider of retirement services in the academic, research, medical and cultural fields. Nuveen is operating as a separate subsidiary within TIAA-CREF's asset management business.

Chairman's Letter

to Shareholders

Dear Shareholders,

A pattern of divergence has emerged in the past year. Steady and moderate growth in the U.S. economy helped sustain the stock market's bull run another year. U.S. bonds also performed well, amid subdued inflation, interest rates that remained unexpectedly low and concerns about the economic well-being of the rest of the world. The stronger domestic economy enabled the U.S. Federal Reserve (Fed) to gradually reduce its large scale bond purchases, known as quantitative easing (QE), without disruption to the markets, as well as begin to set expectations for a transition into tightening mode.

The story outside the U.S., however, was different. European growth was stagnating and Japan fell into a recession, contributing to the bouts of volatility in their markets. China's economy decelerated and, despite running well above the rate of other major global economies, investors feared it looked slow by China's standards. Compounding these concerns were a surprisingly steep decline in oil prices, the U.S. dollar's rally and an increase in geopolitical tensions, including the Russia-Ukraine crisis and terrorist attacks across the Middle East and Africa, as well as more recently in Europe.

While a backdrop of healthy economic growth in the U.S. and the continuation of accommodative monetary policy (with the central banks of Japan and potentially Europe stepping in where the Fed has left off) bodes well for the markets, the global outlook has become more uncertain. Indeed, volatility is likely to feature more prominently in the investment landscape going forward. Such conditions underscore the importance of professional investment management. Experienced investment teams have weathered the market's ups and downs in the past and emerged with a better understanding of the sensitivities of their asset class and investment style, particularly in times of turbulence. We recognize the importance of maximizing gains, while striving to minimize volatility.

And, the same is true for investors like you. Maintaining an appropriate time horizon, diversification and relying on practiced investment teams are among your best strategies for achieving your long-term investment objectives. Additionally, I encourage you to communicate with your financial consultant if you have questions about your investment in a Nuveen Fund. On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

William J. Schneider
Chairman of the Board

Nuveen Preferred Income Opportunities Fund (JPC)

Nuveen Preferred and Income Term Fund (JPI)

Nuveen Flexible Investment Income Fund (JPW)

Nuveen Asset Management, LLC (NAM) and NWQ Investment Management Company, LLC (NWQ), affiliates of Nuveen Investments, Inc., are sub-advisers for the Nuveen Preferred Income Opportunities Fund (JPC). NAM and NWQ each manage approximately half of the Fund's investment portfolio. Douglas Baker, CFA and Brenda Langenfeld, CFA, are the portfolio managers for the NAM team. The NWQ income-oriented investment team is led by Thomas Ray, CFA and Susi Budiman, CFA. Effective January 6, 2015, Thomas Ray replaced Michael J. Carne, CFA, who is no longer with the firm.

Effective August 14, 2014, in an effort to broaden investment flexibility, the Fund changed its investment policies providing that up to 5% of the portion of the Fund's portfolio managed by NAM can now be invested in preferred securities issued by companies located in emerging market countries.

The Nuveen Preferred and Income Term Fund (JPI) features management by Nuveen Asset Management, LLC (NAM), an affiliate of Nuveen Investments, Inc. Douglas Baker, CFA, and Brenda Langenfeld, CFA, have served as the Fund's portfolio managers since its inception.

Effective January 16, 2015, in an effort to broaden investment flexibility, the Fund changed its investment policies allowing at least 50% of its managed assets in securities rated investment grade and up to 50% of its managed assets in securities rated below investment grade.

The Nuveen Flexible Investment Income Fund (JPW) features portfolio management by NWQ Investment Management Company, LLC (NWQ), an affiliate of Nuveen Investments, Inc. Thomas J. Ray, CFA, and Susi Budiman, CFA, are the portfolio managers. Effective January 6, 2015, Thomas Ray replaced Michael J. Carne, CFA, who is no longer with the firm.

Here they discuss their management strategies and the performance of the Funds for the six-month reporting period ended January 31, 2015.

What key strategies were used to manage the Funds during this six-month reporting period ended January 31, 2015 and how did these strategies influence performance?

Nuveen Preferred Income Opportunities Fund (JPC)

The table in the Performance Overview and Holding Summaries section of this report provides total return performance for the Fund for the six-month, one-year, five-year and ten-year periods ended January 31, 2015. For the six-month reporting period ended January 31, 2015, the Fund's common shares at net asset value (NAV) outperformed the JPC Blended Index, but underperformed the BofA/Merrill Lynch Preferred Securities Fixed Rate Index.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual

investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's (S&P), Moody's Investors Service, Inc. (Moody's) or Fitch, Inc. (Fitch). Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this section.

Portfolio Managers' Comments (continued)

JPC invests at least 80% of its managed assets in preferred securities and up to 20% opportunistically over the market cycle in other types of securities, primarily income oriented securities such as corporate and taxable municipal debt and common equity. The Fund is managed by two experienced portfolio teams with distinctive, complementary approaches to the preferred market. NAM employs a debt-oriented approach that combines top down relative value analysis of industry sectors with fundamental credit analysis. NWQ's investment process identifies undervalued securities within a company's capital structure that offer the most attractive risk/reward potential. This unique, multi-team approach gives investors access to a broader investment universe with greater diversification potential.

NAM

For the portion of the Fund managed by NAM, we employed a credit-based investment approach, using a top-down process to position the Fund's portfolio in a manner that reflects the investment team's overall macro-economic outlook, while also incorporating a bottom-up approach that focuses on fundamental credit research, security structures, and option adjusted spread (OAS) analysis. We start by identifying the investable universe of \$1,000 par and \$25 par preferred securities. In an effort to capitalize on the inefficiencies between the different structure of the preferred securities market, we tactically and strategically shift capital between the \$25 par exchange listed market and the \$1,000 par over-the-counter market. Periods of volatility may drive notably different valuations between these two markets. This dynamic is often related to periodic differences in how retail and institutional markets perceive and price risk. Technical factors such as new issue supply may also influence the relative valuations between \$25 par exchange listed structures and \$1,000 par over-the-counter structures.

We will continue to monitor developments across the domestic and international financial markets, but we do not anticipate materially changing the Fund's relative positioning or strategy in the near future. We feel that valuations on the \$25 par retail side of the market have run slightly rich versus the \$1,000 par institutional side of the market. We will likely maintain an overweight to \$1,000 par securities as a result of this relative value opportunity, and because of our desire to position defensively against rising interest rates as discussed later in this report. Indeed, we have been concerned about the potential impact of rising rates on preferred security valuations for several quarters now. As a result, we favor fixed-to-floating rate coupon structures which, all else equal, have less interest rate sensitivity and meaningfully less duration extension risk versus traditional fixed-for-life coupon structures. Fixed-to-floating rate securities are more common on the \$1,000 par side of the market, and thus another reason for our recent, and foreseeable, overweight to \$1,000 par securities relative to the JPC Blended Index.

The population of "new generation" preferred securities, such as contingent capital securities (otherwise known as CoCos, Alternative Tier 1 (AT1) and enhanced capital notes), have indeed become a meaningful presence within the preferred/hybrid security marketplace. As a reminder, newly adopted international bank capital standards outlined in Basel III require new Tier 1-qualifying securities to contain explicit loss-absorbing features upon the breach of certain predetermined capital thresholds. Some of these features include equity conversion, permanent write-down of principal and temporary write-down of principal with the possibility of future write-up when/if the issuer is able to replenish capital levels back above the Tier 1 threshold trigger. We have allocated modestly to this new universe of securities, focusing on those issuers that have, in our opinion, meaningful capital cushions above the mentioned capital thresholds and those issuers that have, or have nearly, issued their regulatory maximum amount of AT1 securities, which is typically 1.5% of the issuer's risk-weighted assets.

With respect to the Fund's allocation to lower investment grade and below investment grade securities, we continue to believe that these segments will, over the long term, provide a more compelling risk-adjusted return profile than higher rated preferred/hybrid securities. Lower rated securities are often overlooked by retail and institutional investors, and especially by investors with investment grade-only mandates. Below investment grade securities typically are not index eligible, limiting the potential investor base and frequently creating opportunities for the Fund within this particular segment of the asset class. While lower rated preferred securities may exhibit periods of higher price volatility, we believe

Nuveen Investments

6

the return potential is disproportionately higher due to inefficiencies inherent in the segment. In addition, this lower rated segment of the asset class tends to exhibit lower interest rate sensitivity than higher rated security structures. As a result, this allocation also helps express our defensive interest rate positioning in the portfolio. Again, please note that preferred/hybrid securities are typically rated several notches below an issuer's senior unsecured debt rating. Consequently, in most instances, a BB-rated preferred/hybrid security has been issued by an entity with an investment grade senior unsecured credit rating of BBB or higher.

During the reporting period, S&P adjusted its methodology for rating preferred/hybrid securities, effectively removing any remaining implicit government support at the preferred security level of the capital structure. The result from this action were lower ratings for roughly 1,300 preferred/hybrid structures, with most of the ratings moving lower by just one notch. S&P had telegraphed this broad downgrade well in advance of actually implementing the new methodology. As a result, we saw little, if any, meaningful price action on the heels of the move lower in ratings. S&P's methodology is now more in-line with both Moody's and Fitch.

As with any fixed income asset class, preferred securities are not immune from the impact of rising interest rates. As mentioned above, we seek to minimize the impact of higher rates on the market value of the portfolio by establishing a position in less interest rate sensitive structures. We also feel that rising interest rates are frequently the result of an improving macro-economic landscape, and one where the current domestic economic recovery has likely gained meaningful traction. In this type of environment risk premiums should shrink, reflecting the lower risk profile of the overall market, and as a result credit spreads should also narrow. We believe therefore, that credit spread compression in the preferred security asset class should help mitigate the impact of rising interest rates.

In the portion of the Fund managed by NAM, several variables negatively impacted performance including an overweight to fixed-to-floating rate coupon structures, an overweight to the \$1000 par side of the market, an overweight to more subordinate Tier 1 structures versus more senior Tier 2 structures, and an overweight to lower investment grade and below investment grade securities. Modestly offsetting these factors was a relative overweight to the insurance subsector and corresponding underweights to the real estate investment trust (REIT), industrial and utility sectors.

With the \$1000 par dominated Barclays USD Capital Securities Index posting a 5.0% return during the reporting period and the \$25 par dominated BofA/Merrill Lynch U.S. Preferred Securities Fixed Rate Index posting a 5.4% return, the Fund's meaningful overweight to \$1000 par structures detracted modestly from our relative performance. Our overweight in the \$1000 par side of the market was heavily concentrated in fixed-to-floating rate coupon structures, which, all else being equal, have lower interest rate sensitivity and lower duration extension risk compared to preferred/hybrid securities with standard fixed rate coupons. We feel that during the reporting period, investors became increasingly complacent regarding interest rate risk. Couple that with a continued low interest rate environment and a steep yield curve, investor demand for longer duration traditional fixed rate coupon structures exceeded that for fixed-to-floating rate securities.

During the reporting period, relatively subordinate Tier 1 structures underperformed more senior Lower Tier 2 structures. The Tier 1 sub-index of the Barclays USD Capital Securities Index posted a return of 2.8%, which was significantly below the 5.5% return posted by the Lower Tier 2 sub-index. Historically, credit spreads for more subordinate structures, such as Tier 1 securities, tend to move at a greater magnitude than their more senior counterparts. Therefore, in a period when preferred security credit spreads generally widen, as they did during the reporting period, we would expect credit spreads for Tier 1 structures to increase at a greater rate compared to Lower Tier 2 structures. Indeed, the option adjusted spread (OAS) for the Barclays USD Capital Securities Tier 1 Index widened during the reporting period by approximately 40 basis points, while the Barclays USD Capital Securities Lower Tier 2 Index OAS widened by only 25

basis points. However, it is likely that the lower duration profile of the Tier 1 sub-index versus the Lower Tier 2 sub-index also contributed to the relative underperformance. As of January 31, 2015, the 6.0 year duration of the Barclays USD Capital Securities Tier 1 Index was approximately 1.4 years shorter than the 7.4 year duration of the Barclays USD Capital

Nuveen Investments

7

Portfolio Managers' Comments (continued)

Securities Lower Tier 2 Index. The relatively higher proportion of fixed-to-floating rate securities in the Tier 1 sub-index is primarily responsible for its relatively shorter duration profile.

During the reporting period, the Fund maintained an overweight to lower investment grade and below investment grade securities relative to the JPC Blended Index. Similar to the relative behavior between Tier 1 and Tier 2 structures under different market conditions, we generally expect lower investment and below investment grade preferred/hybrid securities to underperform higher rated counterparts in an environment when credit spreads generically widen, and vice versa during periods when credit spreads shrink. Therefore, with credit spreads generally widening during reporting period, the Fund's overweight to lower investment grade and below investment grade securities was slightly detrimental to relative performance versus the JPC Blended Index. Indeed, while the Barclays USD Capital Securities Lower Tier 2 BBB-rated sub-Index posted a strong absolute 5.0% return for the six-month measurement period, it modestly trailed the Lower Tier 2 A-rated or better return of 6.1%.

The Fund again had a meaningful overweight to the insurance subsector of the preferred/hybrid market and corresponding underweight to the REIT, industrial and utility subsectors. This positioning was intended to capitalize on what has been, and is expected to be, light or negligible new issue flow out of the insurance subsector. The insurance subsector is generally over-capitalized and not in need of additional capital. As one might expect then, we observed little new issue flow out of the insurance sector. This relative supply/demand advantage, coupled with continuing improvement in fundamentals, allowed the insurance subsector to outperform competing subsectors. Indeed, the Barclays USD Capital Securities USD Insurance subsector posted a six month return of 5.8%, well above the Barclays USD Capital Securities Non-Financial subsector return of 1.2% for the same period.

NWQ

For the portion of the Fund managed by NWQ, we seek to achieve high income and a measure of capital appreciation. While the Fund's investments are primarily preferred securities, a portion of the Fund allows the flexibility to invest across the capital structure in any type of debt, preferred or equity securities offered by a particular company. The portfolio management team then evaluates all available investment choices within a selected company's capital structure to determine the portfolio investment that may offer the most favorable risk-adjusted return potential. The Fund's portfolio is constructed with an emphasis on maintaining a sustainable level of income and an overall analysis for downside protection.

A sharp decline in oil prices had a material impact on the capital markets, particularly during the end of the reporting period. Credit spreads widened, interest rates declined, energy stocks plummeted and volatility spiked. Crude oil prices began to fall in late June, as forecasts for global demand weakened and the outlook for global supply remained robust. The Organization of the Petroleum Exporting Countries' (OPEC) decision at its November meeting to leave its production quota unchanged fueled a downward spiral in oil prices. West Texas Intermediate crude oil (WTI) ended the reporting period at \$47.79/barrel, while Brent crude oil ended the reporting period at \$47.52/barrel.

The drop in interest rates during the fourth quarter was global in scope as government bonds rallied and yield curves flattened around the world. A variety of factors led to the decline, including European economic woes, expectations for quantitative easing in Europe, slowing economic growth in the emerging markets, and global deflation fears. In the U.S., the decline in energy prices and falling European interest rates contributed to the decline of both intermediate- and long-term Treasury rates. The drop in long-term interest rates dramatically flattened the Treasury yield curve. At its December meeting, the Federal Reserve (Fed)

maintained its target fed funds rate at 0.25%, but noted that it would be patient in normalizing monetary policy. The Fed appears to be balancing improving U.S. economic fundamentals with deflation concerns and slowing worldwide economic growth. In response, investors adjusted their expectations for the timing of the first interest rate increase to mid-2015.

Nuveen Investments
8

Despite heightened market volatility, preferred securities performed exceptionally well. The BofA/Merrill Lynch Preferred Securities Fixed Rate Index returned 5.4% for the reporting period. Preferred prices benefited from the market's demand for long duration and yield. REIT preferreds also outperformed bank preferreds. Falling interest rates are typically more supportive of REITs than banks because as rates decline, the above average yield generated by REITs becomes more attractive to investors. The \$25 par preferred market outperformed the \$1,000 par preferred, due in large part to many high yield funds selling their holdings of \$1,000 par bank and insurance preferreds especially during the fourth quarter to raise cash and reduce risk. We remain an active participant in both the \$25 and \$1,000 par preferred markets and intend to take advantage of any dislocations when opportunities arise.

Our underweight in the banking sector and overweight in the real estate sector positively contributed to performance, while our industrials and financial sector holdings detracted from performance.

Several of our REIT holdings performed well during the reporting period, including Senior Housing Properties Trust and DDR Corporation preferred stock. Senior Housing Properties Trust owns independent living and assisted living communities, continuing care retirement communities, nursing homes, wellness centers and medical offices, clinic and biotech laboratory buildings located throughout the United States. DDR owns and manages 415 retail properties, representing 118 million square feet in the continental U.S. and Puerto Rico. REIT securities performed well during the reporting period amid easing long-term interest rates, advancing U.S. equity markets, and a steady U.S. economic rebound, all against the backdrop of a number of simmering global economic and political risks.

Also contributing to performance was KKR Financial Holdings LLC preferred stock. KKR is a leading global investment firm that manages investments across multiple asset classes including private equity, energy, infrastructure, real estate, capital markets, credit strategies and hedge funds. The company reported a lower-than-expected percent year-on-year drop in third-quarter profit, as its holdings appreciated more than many analysts foresaw and it generated more cash by exiting its investments.

Continued weakness in oil prices was a primary detractor to the Fund's performance. Since the Fund's industrial holdings are predominately energy related, performance of those holdings lagged, including McDermott International Inc. second lien notes, Key Energy Services Inc. and BreitBurn Energy Partners bonds. Energy-related securities performed poorly recently as oil prices declined given negative revisions of global oil demand, weaker macroeconomic news and a surging U.S. dollar.

In response to the plunge in crude prices, as well as rising volatility in the energy space, we made substantial changes to the portfolio in an effort to dampen volatility and improve the quality of portfolio holdings while also adding yield. We accomplished this by selling preferred securities and buying senior debt. We believe the debt issues the Fund holds have a more than sufficient equity and/or dividend cushion and that dividends will be slashed well before the debt is threatened.

During the reporting period, the Fund also wrote covered call options on common stocks to hedge equity exposure. These options had a negligible impact on performance.

Nuveen Preferred and Income Term Fund (JPI)

The table in the Performance Overview and Holding Summaries section of this report provides total return performance for the Fund for the six-month, one-year and since inception periods ended January 31, 2015. For the six-month reporting period ended January 31, 2015, the Fund's shares at net asset value (NAV) underperformed both the JPI Blended Benchmark Index and the BofA/Merrill Lynch Preferred Securities Fixed Rate Index.

Edgar Filing: Nuveen Preferred Income Opportunities Fund - Form N-CSRS

The Fund seeks to achieve its investment objective of providing a high level of current income and total return by investing in preferred securities and other income producing securities. The Fund's portfolio is actively managed seeking to capitalize on strong and continuously improving credit fundamentals across our issuer base, coupled with historically

Nuveen Investments

9

Portfolio Managers' Comments (continued)

wide credit spreads (the difference between current yields on preferred securities and U.S. Treasury Bonds and other fixed income benchmarks) for the preferred security asset class. The Fund's strategy focuses opportunistically on highly regulated industries, like utilities, banks and insurance companies, with a current emphasis broadly on financial services companies.

We employed a credit-based investment approach, using a top-down process to position the portfolio in a manner that reflects the investment team's overall macro-economic outlook, while also incorporating a bottom-up approach that focuses on fundamental credit research, security structures and option adjusted spread (OAS) analysis. We start by identifying the investable universe of \$1,000 par and \$25 par preferred securities. In an effort to capitalize on the inefficiencies between the different structure of the preferred securities market, we tactically and strategically shift capital between the \$25 par exchange listed market and the \$1,000 par over-the-counter market. Periods of volatility may drive notably different valuations between these two markets. This dynamic is often related to periodic differences in how retail and institutional markets perceive and price risk. Technical factors such as new issue supply may also influence the relative valuations between \$25 par exchange listed structures and \$1,000 par over-the-counter structures.

We will continue to monitor developments across the domestic and international financial markets, but we do not anticipate materially changing the Fund's relative positioning or strategy in the near future. We feel that valuations on the \$25 par retail side of the market have run slightly rich versus the \$1,000 par institutional side of the market. We will likely maintain an overweight to \$1,000 par securities as a result of this relative value opportunity, and because of our desire to position defensively against rising interest rates as discussed later in this report. Indeed, we have been concerned about the potential impact of rising rates on preferred security valuations for several quarters now. As a result, we favor fixed-to-floating rate coupon structures which, all else equal, have less interest rate sensitivity and meaningfully less duration extension risk versus traditional fixed-for-life coupon structures. Fixed-to-floating rate securities are more common on the \$1,000 par side of the market, and thus another reason for our recent, and foreseeable, overweight to \$1,000 par securities relative to the JPI Blended Benchmark Index.

The population of "new generation" preferred securities, such as contingent capital securities (otherwise known as CoCos, Alternative Tier 1 (AT1) and enhanced capital notes), have indeed become a meaningful presence within the preferred/hybrid security marketplace. As a reminder, newly adopted international bank capital standards outlined in Basel III require new Tier 1-qualifying securities to contain explicit loss-absorbing features upon the breach of certain predetermined capital thresholds. We have allocated modestly to this new universe of securities, focusing on those issuers that have, in our opinion, meaningful capital cushions above the mentioned capital thresholds and those issuers that have, or have nearly, issued their regulatory maximum amount of AT1 securities, which is typically 1.5% of the issuer's risk-weighted assets.

With respect to the Fund's allocation to lower investment grade and below investment grade securities, we continue to believe that these segments will, over the long term, provide a more compelling risk-adjusted return profile than higher rated preferred/hybrid securities. Lower rated securities are often overlooked by retail and institutional investors, and especially by investors with investment grade-only mandates. Below investment grade securities typically are not index eligible, limiting the potential investor base and frequently creating opportunities for the Fund within this particular segment of the asset class. While lower rated preferred securities may exhibit periods of higher price volatility, we believe the return potential is

disproportionately higher due to inefficiencies inherent in the segment. In addition, this lower rated segment of the asset class tends to exhibit lower interest rate sensitivity than higher rated security structures. As a result, this allocation also helps express our defensive interest rate positioning in the portfolio. Again, please note that preferred/hybrid securities are typically rated several notches below an issuer's senior unsecured debt rating.

Nuveen Investments

10

Consequently, in most instances, a BB-rated preferred/hybrid security has been issued by an entity with an investment grade senior unsecured credit rating of BBB or higher.

During the reporting period, S&P adjusted its methodology for rating preferred/hybrid securities, effectively removing any remaining implicit government support at the preferred security level of the capital structure. The result from this action were lower ratings for roughly 1,300 preferred/hybrid structures, with most of the ratings moving lower by just one notch. S&P had telegraphed this broad downgrade well in advance of actually implementing the new methodology. As a result, we saw little, if any, meaningful price action on the heels of the move lower in ratings. S&P's methodology is now more in-line with both Moody's and Fitch.

As with any fixed income asset class, preferred securities are not immune from the impact of rising interest rates. We seek to minimize the impact of higher rates on the market value of the portfolio by establishing a position in less interest rate sensitive structures. We also feel that rising interest rates are frequently the result of an improving macro-economic landscape, and one where the current domestic economic recovery has likely gained meaningful traction. In this type of environment risk premiums should shrink, reflecting the lower risk profile of the overall market and as a result credit spreads should also narrow. We believe therefore, that credit spread compression in the preferred security asset class should help mitigate the impact of rising interest rates.

In the portion of the Fund managed by NAM, several variables contributed to the relative underperformance including an overweight to fixed-to-floating rate coupon structures, an overweight to the \$1000 par side of the market, an overweight to more subordinate Tier 1 structures versus more senior Tier 2 structures and an overweight to lower investment grade and below investment grade securities. Modestly offsetting these factors was a relative overweight to the insurance subsector and corresponding underweights to the real estate investment trust (REIT), industrial and utility sectors.

With the \$1000 par dominated Barclays USD Capital Securities Index posting a 5.0% return during the period and the \$25 par dominated BofA/Merrill Lynch U.S. Preferred Securities Fixed Rate Index posting a 5.4% return, the Fund's meaningful overweight to \$1000 par structures detracted modestly from our relative performance. Our overweight in the \$1000 par side of the market was heavily concentrated in fixed-to-floating rate coupon structures, which, all else being equal, have lower interest rate sensitivity and lower duration extension risk compared to preferred/hybrid securities with standard fixed rate coupons. We feel that during the reporting period, investors became increasingly complacent regarding interest rate risk. Couple that with a continued low interest rate environment and a steep yield curve, investor demand for longer duration traditional fixed rate coupon structures during the period exceeded that for fixed-to-floating rate securities.

During the reporting period, relatively subordinate Tier 1 structures underperformed more senior lower Tier 2 structures. The Tier 1 sub-index of the Barclays USD Capital Securities Index posted a return of 2.8%, which was significantly below the 5.5% return posted by the Lower Tier 2 sub-index. Historically, credit spreads for more subordinate structures, such as Tier 1 securities, tend to move at a greater magnitude than their more senior counterparts. Therefore, in a period when preferred security credit spreads generally widen, as they did during the reporting period, we would expect credit spreads for Tier 1 structures to increase at a greater rate compared to Lower Tier 2 structures. Indeed, the option adjusted spread (OAS) for the Barclays USD Capital Securities Tier 1 Index widened during the reporting period by approximately 40 basis points, while the Barclays USD Capital Securities Lower Tier 2 Index OAS widened by only 25 basis points. However, it is likely that the lower duration profile of the Tier 1 sub-index versus the Lower Tier 2 sub-index also contributed to the relative underperformance. As of January 31, 2015, the 6.0 year duration of the Barclays USD Capital Securities Tier 1 Index was approximately 1.4 years shorter than the 7.4 year duration of the Barclays USD Capital Securities Lower Tier 2 Index. The relatively higher

proportion of fixed-to-floating rate securities in the Tier 1 sub-index is primarily responsible for its relatively shorter duration profile.

During the reporting period, the Fund maintained an overweight to lower investment grade and below investment grade securities relative to the JPI Blended Benchmark Index. Similar to the relative behavior between Tier 1 and Tier 2 structures under different market conditions, we generally expect lower investment and below investment grade

Nuveen Investments

11

Portfolio Managers' Comments (continued)

preferred/hybrid securities to underperform higher rated counterparts in an environment when credit spreads generically widen, and vice versa during periods when credit spreads shrink. Therefore, with credit spreads generally widening during the reporting period, the Fund's overweight to lower investment grade and below investment grade securities was slightly detrimental to relative performance versus the JPI Blended Index. Indeed, while the Barclays USD Capital Securities Lower Tier 2 BBB-rated sub-Index posted a strong absolute 5.0% return for the six month measurement period, it modestly trailed the Lower Tier 2 A-rated or better return of 6.1%.

The Fund again had a meaningful overweight to the insurance subsector of the preferred/hybrid market and corresponding underweight to the REIT, industrial and utility subsectors. This positioning was intended to capitalize on what has been, and is expected to be, light or negligible new issue flow out of the insurance sector. In general, the insurance sector is generally over-capitalized and not in need of additional capital. As one might expect then, we observed little new issue flow out of the insurance sector. This relative supply/demand advantage, coupled with continuing improvement in fundamentals, allowed the insurance subsector to outperform competing subsectors. Indeed, the Barclays USD Capital Securities Insurance subsector posted a return of 5.8%, well above the Barclays USD Capital Securities Non-Financial subsector return of 1.2% for the same period.

Nuveen Flexible Investment Income Fund (JPW)

The table in the Performance Overview and Holding Summaries section of this report provides total return performance for the Fund for the six-month, one-year and since inception periods ended January 31, 2015. For the six-month reporting period ended January 31, 2015, the Fund's total return on common share net asset value (NAV) underperformed the Barclays U.S. Aggregate Index and the BofA/Merrill Lynch Preferred Securities Fixed Rate Index. Previously, the Fund used the BofA/Merrill Lynch Preferred Securities Fixed Rate Index as its primary benchmark. Going forward, the Barclays U.S. Aggregate Bond Index will be the Fund's primary benchmark because it better reflects how the Fund is being managed. The BofA/Merrill Lynch Preferred Securities Fixed Rate Index will be a secondary benchmark for the Fund.

JPW invests at least 80% of its managed assets in income producing preferred, debt and equity securities issued by companies located anywhere in the world. Up to 50% of its managed assets may be in securities issued by non-U.S. companies, though all (100%) Fund assets will be in U.S. dollar-denominated securities. Up to 40% of its managed assets may consist of equity securities, not including preferred securities. Up to 75% of investments in debt and preferred securities that are of a type customarily rated by a credit rating agency, may be rated below investment grade, or if unrated, will be judged to be of comparable quality by NWQ. The Fund will invest at least 25% in securities issued by financial services companies.

The Fund's investment objectives are to provide high current income and, secondarily, capital appreciation. The Fund seeks to achieve its investment objectives by investing in undervalued securities with attractive investment characteristics. The Fund's portfolio is actively managed by NWQ and has the flexibility to invest across the capital structure in any type of debt, preferred or equity securities offered by a particular company. The portfolio management team then evaluates all available investment choices within a selected company's capital structure to determine the portfolio investment that may offer the most favorable risk-adjusted return potential. The Fund's portfolio is constructed with an emphasis on maintaining a sustainable level of income and an overall analysis for downside protection.

A sharp decline in oil prices had a material impact on the capital markets, particularly during the end of the reporting period. Credit spreads widened, interest rates declined, energy stocks plummeted and volatility spiked. Crude oil prices began to fall in late June, as forecasts for global demand weakened and the outlook for global supply remained robust. The Organization of the Petroleum Exporting Countries (OPECs) decision at its November meeting to leave its production quota unchanged fueled a downward spiral in oil prices. West Texas Intermediate crude oil (WTI) ended the reporting period at \$47.79/barrel, while Brent crude oil ended the reporting period at \$47.52/barrel.

Nuveen Investments

12

The drop in interest rates during the fourth quarter was global in scope as government bonds rallied and yield curves flattened around the world. A variety of factors led to the decline, including European economic woes, expectations for quantitative easing in Europe, slowing economic growth in the emerging markets, and global deflation fears. In the U.S., the decline in energy prices and falling European interest rates contributed to the decline of both intermediate- and long-term Treasury rates. The drop in long-term interest rates dramatically flattened the Treasury yield curve. At its December meeting, the Federal Reserve (Fed) maintained its target fed funds rate at 0.25%, but noted that it would be patient in normalizing monetary policy. The Fed appears to be balancing improving U.S. economic fundamentals with deflation concerns and slowing worldwide economic growth. In response, investors adjusted their expectations for the timing of the first interest rate increase to mid-2015.

Despite heightened market volatility, preferred securities performed exceptionally well. The BofA/Merrill Lynch Preferred Securities Fixed Rate Index returned 5.4% for the reporting period. Preferred prices benefited from the market's demand for long duration and yield. Real estate investment trust (REIT) preferreds also outperformed bank preferreds. Falling interest rates are typically more supportive of REITs than banks because as rates decline, the above average yield generated by REITs becomes more attractive to investors. The \$25 par preferred market outperformed the \$1,000 par preferred, due in large part to many high yield funds selling their holdings of \$1,000 par bank and insurance preferreds especially during the fourth quarter to raise cash and reduce risk. We remain an active participant in both the \$25 and \$1,000 par preferred markets and intend to take advantage of any dislocations when opportunities arise.

Our underweight in the banking sector and overweight in the real estate sector positively contributed to performance, but could not offset our industrials and financial sector holdings which contributed to our underperformance versus BofA/Merrill Lynch Preferred Securities Fixed Rate Index.

Several positions contributed to performance including Northstar Realty Finance Corporation preferred and common stock. The company makes investments in real estate debt, real estate securities, and net lease properties. We view the company as a well-diversified commercial mortgage REIT with an in-house loan origination and asset management operation uniquely positioned to grow as the securitization markets thaw and commercial loan demand rises. Its proprietary origination enhances return on capital as assets are self-created and not purchased in the secondary market. In addition, it allows for substantial flexibility.

Also contributing to performance was Ladenburg Thalmann Financial Services Inc. preferred stock. Ladenburg Thalmann is a diversified financial services company operating as both an independent brokerage and advisor and as an investment banking and capital markets company. The company's third quarter revenue growth came in higher than the industry average of 1.1%. The company's earnings per share also improved, which positively impacted performance.

Lastly, Stonemor Partners LP common stock positively contributed to performance. The company owns and operates cemeteries and funeral homes in the U.S. They reported strong third quarter results in addition to increasing their distribution for the third quarter, which marked the second increase in 2014.

Continued weakness in oil prices was the primary detractor from the Fund's performance. Since the Fund's industrial holdings are predominately energy related, performance of those holdings lagged, including McDermott second lien notes, as well as Key Energy and Linn Co. LLC common stocks. Energy-related securities performed poorly as oil prices declined given negative revisions of global oil demand, weaker macroeconomic news and a surging U.S. dollar.

In response to the crude prices, as well as rising volatility in the energy space we made substantial changes to the Fund's portfolio in an effort to dampen volatility and improve the quality of portfolio holdings

while also adding yield. We accomplished this by selling preferred securities and buying senior debt. We believe the debt issues the Fund holds have a more than sufficient equity and/or dividend cushion and that dividends will be slashed well before the debt is threatened.

During the reporting period, the Fund also wrote covered call options on common stocks to hedge equity exposure. These options had a negligible impact on performance.

Nuveen Investments

13

Fund**Leverage****IMPACT OF THE FUNDS' LEVERAGE STRATEGY ON PERFORMANCE**

One important factor impacting the return of the Funds relative to their benchmarks was the Funds' use of leverage through the use of bank borrowings. The Funds use leverage because our research has shown that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share NAV and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. The Funds' use of leverage had a positive impact on performance during this reporting period.

JPC and JPI continued to use swap contracts to partially fix the interest cost of leverage, which as mentioned previously, is through the use of bank borrowings. During this reporting period, these swap contracts detracted modestly from overall Fund performance.

As of January 31, 2015, the Funds' percentages of leverage are shown in the accompanying table.

	JPC	JPI	JPW
Effective Leverage*	28.49%	28.34%	30.33%
Regulatory Leverage*	28.49%	28.34%	30.33%

* Effective leverage is the Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund's portfolio that increase the Fund's investment exposure. Regulatory leverage consists of preferred shares issued or borrowings of the Fund. Both of these are part of the Fund's capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

THE FUNDS' REGULATORY LEVERAGE*Bank Borrowings*

The Funds employ regulatory leverage through the use of bank borrowings. As of January 31, 2015, the Funds' outstanding bank borrowings are as shown in the accompanying table.

	JPC	JPI	JPW
Bank Borrowings	\$404,100,000	\$225,000,000	\$30,000,000
Refer to Notes to Financial Statements, Note 8 Borrowing Arrangements for further details.			

Common Share**Information****DISTRIBUTION INFORMATION**

The following information regarding the Funds' distributions is current as of January 31, 2015. Each Fund's distribution levels may vary over time based on each Fund's investment activities and portfolio investment value changes.

During the current reporting period, each Fund's distributions to common shareholders were as shown in the accompanying table.

Ex-Dividend Date	Per Common Share Amounts		
	JPC	JPI	JPW
August 2014	\$ 0.0633	\$ 0.1580	\$ 0.1260
September	0.0633	0.1580	0.1260
October	0.0633	0.1580	0.1260
November	0.0633	0.1580	0.1260
December	0.0633	0.1580	0.1260
January 2015	0.0633	0.1595	0.1260
Ordinary Income Distribution*	\$	\$ 0.0264	\$
Long-Term Capital Gain*			0.0731
Short-Term Capital Gain*			0.3749
Current Distribution Rate**	7.98%	8.19%	8.91%

* Distribution paid in December 2014.

** Current distribution rate is based on the Fund's current annualized monthly distribution divided by the Fund's current market price. The Fund's monthly distributions to its shareholders may be comprised of ordinary income, net realized capital gains and, if at the end of the fiscal year the Fund's cumulative net ordinary income and net realized gains are less than the amount of the Fund's distributions, a return of capital for tax purposes.

Each Fund in this report seeks to pay regular monthly dividends out of its net investment income at a rate that reflects its past and projected net income performance. To permit each Fund to maintain a more stable monthly dividend, the Fund may pay dividends at a rate that may be more or less than the amount of net income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it will hold the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value. Conversely, if a Fund has cumulatively paid in dividends more than it has earned, the excess will constitute a negative UNII that will likewise be reflected in the Fund's net asset value. Each Fund will, over time, pay all its net investment income as dividends to shareholders.

As of January 31, 2015, all of the Funds in this report had positive UNII balances, based upon our best estimate, for tax purposes. JPC and JPI had positive UNII balances, while JPW had a negative UNII balance for financial reporting purposes.

All monthly dividends paid by each Fund during the six months ended January 31, 2015, were paid from net investment income. If a portion of the Fund's monthly distributions was sourced from or comprised of elements other than net investment income, including capital gains and/or a return of capital, shareholders would have received a notice to that effect. For financial reporting purposes, the composition and per share

amounts of each Fund's dividends for the reporting period are presented in this report's Statement of Changes in Net Assets and Financial Highlights, respectively. For income tax purposes, distribution information for each Fund as of its most recent tax year end is presented in Note 6 Income Tax Information within the Notes to Financial Statements of this report.

Nuveen Investments
15

Common Share Information (continued)**JPW'S DISTRIBUTION POLICY**

As noted previously, JPW's regular monthly distributions are currently being sourced entirely from net investment income. The Fund's current portfolio is predominantly invested in income producing securities the income from which is expected to be the source of distributions. For periods when the Fund is sourcing its monthly distributions solely from net investment income, the Fund will seek to distribute substantially all of its net investment income over time. There are no assurances given to how long the Fund will source distributions entirely from net investment income.

Market conditions may change, causing the portfolio management team at some future time to focus the mix of portfolio investments less to income-oriented securities. This may cause the regular monthly distributions to be sourced from something other than net investment income. JPW has adopted a cash-flow based distribution policy permitting it to source its regular monthly distributions from not only net investment income, but also from realized capital gains and/or return of capital. If a cash-flow based distribution policy is employed, the Fund will seek to establish a relatively stable common share distribution rate that roughly corresponds to the Fund's net cash flows after expense from its investments over an extended period of time. Actual net cash flows the Fund receives may differ from the Fund's distribution rate over shorter time periods. Over a specific timeframe, the difference between actual net cash flows and total Fund distributions will be reflected in an increasing (net cash flows exceed distributions) or a decreasing (distributions exceed net cash flows) Fund net asset value. If the Fund changes to a cash-flow based distribution, a press release will be issued describing such change and this change will also be described in subsequent shareholder reports. Additionally, for any distribution payment that is sourced from something other than net investment income, there will be a notice issued quantifying the sources of such distribution.

COMMON SHARE REPURCHASES

During August 2014, the Funds' Board of Trustees reauthorized an open-market share repurchase program, allowing each Fund to repurchase an aggregate of up to approximately 10% of its outstanding shares.

As of January 31, 2015, and since the inception of the Funds' repurchase programs, the Funds have cumulatively repurchased and retired their common shares as shown in the accompanying table.

	JPC	JPI	JPW
Common Shares Cumulatively Repurchased and Retired	2,826,100	0	0
Common Shares Authorized for Repurchase	9,695,000	2,275,000	370,000

During the current reporting period, the Funds repurchased and retired common shares at a weighted average price per share and a weighted average discount per common share as shown in the accompanying table.

	JPC	JPI	JPW
Common Shares Repurchased and Retired	88,813	0	0
Weighted Average Price Per Common Share Repurchased and Retired	\$ 9.27 12.73%	\$ 0 0%	\$ 0 0%

Weighted Average Discount Per Common Share
Repurchased and Retired

OTHER COMMON SHARE INFORMATION

As of January 31, 2015, and during the current reporting period, the Funds' common share prices were trading at a premium/(discount) to their common share NAVs as shown in the accompanying table.

	JPC	JPI	JPW
Common Share NAV	\$ 10.47	\$ 25.01	\$ 18.60
Common Share Price	\$ 9.52	\$ 23.37	\$ 16.97
Premium/(Discount) to NAV	(9.07)%	(6.56)%	(8.76)%
6-Month Average Premium/(Discount) to NAV	(11.30)%	(8.59)%	(10.23)%

Risk

Considerations

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Shares of closed-end funds are subject to investment risks, including the possible loss of principal invested. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment, Market and Price Risk. An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the corporate securities owned by the Funds, which generally trade in the over-the-counter markets. Shares of closed-end investment companies like the Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. A Fund's use of leverage creates the possibility of higher volatility for a Fund's per share NAV, market price and distributions. Leverage risk can be introduced through regulatory leverage (issuing preferred shares or debt borrowings at the Fund level) or through certain derivative investments held in a Fund's portfolio. Leverage typically magnifies the total return of a Fund's portfolio, whether that return is positive or negative. The use of leverage creates an opportunity for increased common share net income, but there is no assurance that a Fund's leveraging strategy will be successful.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Common Stock Risk. Common stock returns often have experienced significant volatility.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original investment that generated the income.

Preferred Stock Risk. Preferred stocks are subordinated to bonds and other debt instruments in a company's capital structure, and therefore are subject to greater credit risk.

Convertible Securities Risk. Convertible securities generally offer lower interest or dividend yields than non-convertible fixed-income securities of similar credit quality.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower-yielding securities.

Non-U.S. Securities Risk. Investments in non-U.S securities involve special risks not typically associated with domestic investments including currency risk and adverse political, social and economic developments. These risks often are magnified in emerging markets.

Below-Investment Grade Securities Risk: Investments in securities below investment grade quality are predominantly speculative and subject to greater volatility and risk of default.

Nuveen Investments

17

Risk Considerations (continued)

Derivatives Strategy Risk: Derivative securities, such as calls, puts, warrants, swaps and forwards, carry risks different from, and possibly greater than, the risks associated with the underlying investments.

Financial Sector Risk: Because the Funds invest a substantial portion of their assets (at least 25%) in securities issued by financial services companies, concentration in this sector may present more risks than if the Funds were more diversely invested in numerous sectors of the economy.

Unrated Investment Risk: In determining whether an unrated security is an appropriate investment for the Fund, the portfolio manager will consider information from industry sources, as well as its own quantitative and qualitative analysis, in making such a determination. However such a determination by the portfolio manager is not the equivalent of a rating by a rating agency.

Counterparty Risk: To the extent that a Fund's derivative investments are purchased or sold in over-the-counter transactions, the Fund will be exposed to the risk that counterparties to these transactions will be unable to meet their obligations.

Interest Rate Swaps Risk: The risk that yields will move in the direction opposite to the direction anticipated by a Fund, which would cause a Fund to make payments to its counterparty in the transaction that could adversely affect the Fund's performance.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives.
- (3) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (4) A copy of the most recent financial statements for these exchange-traded funds can be obtained directly from the Securities and Exchange Commission on its website at <http://www.sec.gov>.
- (5) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (6) Investment, or a portion of investment, is out on loan as described in the Notes to Financial Statements, Note 8 Borrowing Arrangements, Rehypothecation. The total value of investments out on loan

as of the end of the reporting period was \$40,539,000.

(7) For fair value measurement disclosure purposes, investment classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.

(8) Perpetual security. Maturity date is not applicable.

(9) The Fund may pledge up to 100% of its eligible investments (excluding any investments separately pledged as collateral for specific investments in derivatives, when applicable) as collateral for borrowings. As of the end of the reporting period, investments with a value of \$890,965,487 have been pledged as collateral for borrowings.

(10) Borrowings as a percentage of Total Investments is 28.4%.

(11) Other assets less liabilities includes the unrealized appreciation (depreciation) of certain over-the-counter derivatives as presented on the Statement of Assets and Liabilities. The unrealized appreciation (depreciation) of exchange-cleared and exchange-traded derivatives is recognized as part of the receivable or payable for variation margin as presented on the Statement of Assets and Liabilities, when applicable. Other assets less liabilities also includes the value of options as presented on the Statement of Assets and Liabilities.

(12) For disclosure purposes, Notional Amount is calculated by multiplying the Number of Contracts by the Strike Price by 100.

(13) Effective date represents the date on which both the Fund and counterparty commence interest payment accruals on each contract.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

Reg S Regulation S allows U.S. companies to sell securities to persons or entities located outside of the United States without registering those securities with the Securities and Exchange Commission. Specifically, Regulation S provides a safe harbor from the registration requirements of the Securities Act for the offers and sales of securities by both foreign and domestic issuers that are made outside the United States.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.

(2) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

(3) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives.

(4) For fair value measurement disclosure purposes, investment classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.

(5) Perpetual security. Maturity date is not applicable.

(6) Investment, or a portion of investment, is out on loan as described in the Notes to Financial Statements, Note 8 Borrowing Arrangements, Rehypothecation. The total value of investments out on loan as of the end of the reporting period was \$15,104,000.

(7) The Fund may pledge up to 100% of its eligible investments (excluding any investments separately pledged as collateral for specific investments in derivatives, when applicable) as collateral for borrowings. As of the end of the reporting period, investments with a value of \$514,862,088 have been pledged as collateral for borrowings.

(8) Borrowings as a percentage of Total Investments is 28.3%.

(9) Other assets less liabilities includes the unrealized appreciation (depreciation) of certain over-the-counter derivatives as presented on the Statement of Assets and Liabilities. The unrealized appreciation (depreciation) of exchange-cleared and exchange-traded derivatives is recognized as part of the receivable or payable for variation margin as presented on the Statement of Assets and Liabilities, when applicable.

(10) Effective date represents the date on which both the Fund and counterparty commence interest payment accruals on each contract.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

Reg S Regulation S allows U.S. companies to sell securities to persons or entities located outside of the United States without registering those securities with the Securities and Exchange Commission. Specifically, Regulation S provides a safe harbor from the registration requirements of the Securities Act for the offers and sales of securities by both foreign and domestic issuers that are made outside the United States.

Nuveen Investments

JPW Nuveen Flexible Investment Income Fund
Portfolio of Investments (continued) **January 31, 2015** (Unaudited)

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.

(2) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives.

(3) Non-income producing; issuer has not declared a dividend within the past twelve months.

(4) A copy of the most recent financial statements for these exchange-traded funds can be obtained directly from the Securities and Exchange Commission on its website at <http://www.sec.gov>.

(5) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

(6) For fair value measurement disclosure purposes, investment classified as Level 2. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.

(7) Perpetual security. Maturity date is not applicable.

(8) The Fund may pledge up to 100% of its eligible investments (excluding any investments separately pledged as collateral for specific investments in derivatives, when applicable) as collateral for borrowings. As of the end of the reporting period, investments with a value of \$61,979,149 have been pledged as collateral for borrowings.

(9) Borrowings as a percentage of Total Investments is 30.1%.

(10) Other assets less liabilities includes the unrealized appreciation (depreciation) of certain over-the-counter derivatives as presented on the Statement of Assets and Liabilities. The unrealized appreciation (depreciation) of exchange-cleared and exchange-traded derivatives is recognized as part of the receivable or payable for variation margin as presented on the Statement of Assets and Liabilities, when applicable. Other assets less liabilities also includes the value of options as presented on the Statement of Assets and Liabilities.

(11) For disclosure purposes, Notional Amount is calculated by multiplying the Number of Contracts by the Strike Price by 100.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

2011	348,000	3,416
2010	270,000	4,477
2009	270,000	4,111

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) The amounts shown are based on common share equivalents. During the fiscal year ended December 31, 2009, Preferred Income Opportunities (JPC) redeemed all of its outstanding Fund Preferred shares, at

liquidation value.

(c) Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Price is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

(d) • Ratios do not reflect the effect of dividend payments to Fund Preferred shareholders, where applicable.

• Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to Fund Preferred shares and/or borrowings, where applicable. Borrowings are described in Note 8 Borrowing Arrangements.

• Each ratio includes the effect of dividends expense on securities sold short and all interest expense paid and other costs related to borrowings, where applicable, as follows:

Preferred Income Opportunities (JPC)	Ratios of Dividends Expense on Securities Sold Short to Average Net Assets Applicable to Common Shares(f)	Ratios of Interest Expense and Other Costs to Average Net Assets Applicable to Common Shares

2013(h)	(0.99)	(1.00)	66,297	1.40**	1.93**	3

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Price is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

(c) • Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to borrowings, where applicable, as described in Note 8 Borrowing Arrangements.

• Each ratio includes the effect of all interest expense paid and other costs related to borrowings as follows:

Preferred and Income Term (JPI)	Ratios of Interest Expense and Other Costs to Average Net Assets Applicable to Common Shares(e)
Year Ended 7/31:	
2015(j)	0.42%**
2014	0.45
2013(g)	0.48
Flexible Investment Income (JPW)	
Year Ended 7/31:	

2015(j)	0.36**
2014(i)	0.33

(d) For the period July 26, 2012 (commencement of operations) through July 31, 2012.

(e) Preferred and Income Term (JPI) and Flexible Investment Income (JPW) did not utilize borrowings prior to the fiscal years ended July 31, 2013 and July 31, 2014, respectively.

(f) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales (as disclosed in Note 5 Investment Transactions) divided by the average long-term market value during the period.

(g) For the period August 29, 2012 (first utilization date of borrowings) through July 31, 2013.

(h) For the period June 25, 2013 (commencement of operations) through July 31, 2013.

(i) For the period August 13, 2013 (first utilization date of borrowings) through July 31, 2014.

(j) For the six months ended January 31, 2015.

* Rounds to less than \$0.01 per share.

** Annualized.

See accompanying notes to financial statements.

Notes to

Financial Statements (Unaudited)

1. General Information and Significant Accounting Policies

General Information

Fund Information

The funds covered in this report and their corresponding New York Stock Exchange ("NYSE") symbols are as follows (each a "Fund" and collectively, the "Funds"):

- Nuveen Preferred Income Opportunities Fund (JPC) ("Preferred Income Opportunities (JPC)")
- Nuveen Preferred and Income Term Fund (JPI) ("Preferred and Income Term (JPI)")
- Nuveen Flexible Investment Income Fund (JPW) ("Flexible Investment Income (JPW)")

The Funds are registered under the Investment Company Act of 1940, as amended, as diversified closed-end (non-diversified for Preferred and Income Term (JPI)) management investment companies. Preferred Income Opportunities (JPC), Preferred and Income Term (JPI) and Flexible Investment Income (JPW) were each organized as Massachusetts business trusts on January 27, 2003, April 18, 2012 and March 28, 2013, respectively.

The end of the reporting period for the Funds is January 31, 2015, and the period covered by these Notes to Financial Statements is the six months ended January 31, 2015 ("the current fiscal period").

Investment Adviser

The Funds' investment adviser is Nuveen Fund Advisors, LLC (the "Adviser"), a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"). The Adviser is responsible for each Fund's overall investment strategy and asset allocation decisions. The Adviser has entered into sub-advisory agreements with NWQ Investment Management Company, LLC ("NWQ") and/or Nuveen Asset Management LLC ("NAM"), a subsidiary of the Adviser, (each a "Sub-Adviser" and collectively, the "Sub-Advisers"). NWQ and NAM are each responsible for approximately half of Preferred Income Opportunities' (JPC) portfolio. NAM manages the investment portfolio of Preferred and Income Term (JPI), while NWQ manages the investment portfolio of Flexible Investment Income (JPW). The Adviser is responsible for managing Preferred Income Opportunities' (JPC) and Preferred and Income Term's (JPI) investments in swap contracts.

Change in Control

On October 1, 2014, TIAA-CREF, a national financial services organization, completed its previously announced acquisition of Nuveen, the parent company of the Adviser.

Because the consummation of the acquisition resulted in the "assignment" (as defined in the Investment Company Act of 1940) and automatic termination of the Funds' investment management agreements and investment sub-advisory agreements, Fund shareholders were asked to approve new investment management agreements with the Adviser and new investment sub-advisory agreements with NWQ and

NAM. These new agreements were approved by shareholders of each of the Funds, and went into effect during the current fiscal period.

Investment Objectives and Principal Investment Strategies

Preferred Income Opportunities' (JPC) investment objective is to provide high current income and total return by investing at least 80% of its managed assets (as defined in Note 7 Management Fees and Other Transactions with Affiliates) in preferred securities, and up to 20% opportunistically over the market cycle in other types of securities, primarily income-oriented securities such as corporate and taxable municipal debt and common equity. At least 60% of its managed assets are rated investment grade (BBB/Baa or better by S&P, Moody's, or Fitch) at the time of investment. Effective August 14, 2014, up to 5% of the portion of the Fund's portfolio managed by NAM can be invested in preferred securities issued by companies located in emerging market countries.

Preferred and Income Term's (JPI) investment objective is to provide a high level of current income and total return. The Fund seeks to achieve its investment objective by investing in preferred securities and other income producing securities. Under normal market conditions, the Fund will invest at least 80% of its managed assets in preferred and other income producing securities. The Fund will invest at least 60% (50% effective January 16, 2015) of its managed assets in securities rated investment grade (BBB-/Baa3 or higher) at the time of purchase. The Fund will invest 100% of its managed assets in U.S. dollar denominated securities. The Fund will also invest up to 40% of its managed assets in securities issued by non-U.S. domiciled companies.

Flexible Investment Income's (JPW) investment objectives are to provide high current income and, secondarily, capital appreciation. Under normal circumstances, the Fund will invest at least 80% of its managed assets in income producing securities issued by companies located anywhere in the world. The Fund will invest in income producing securities across the capital structure in any type of debt, preferred or equity securities offered by a

particular company, or debt securities issued by a government. The Fund will invest 100% of its managed assets in U.S. dollar-denominated securities, and may invest up to 50% of its managed assets in securities of non-U.S. companies. The Fund may invest up to 40% of its managed assets in equity securities (other than preferred securities). At least 25% of the aggregate market value of the Fund's investments in debt and preferred securities that are of a type customarily rated by a credit rating agency will be rated investment grade, or if unrated, will be judged to be of comparable quality by NWQ. The Fund will invest at least 25% of its managed assets in securities issued by financial services companies. The Fund may invest up to 15% of its managed assets in securities and other instruments that, at the time of purchase, are illiquid. The Fund may opportunistically write (sell) covered call options on the Fund's portfolio of equity securities for the purpose of enhancing the Fund's risk-adjusted total return over time. The Fund anticipates using leverage to help achieve its investment objectives. The Fund may utilize leverage in the form of borrowings from a financial institution or the issuance of preferred shares or other senior securities, such as commercial paper or notes.

Significant Accounting Policies

Each Fund is an investment company and follows accounting and reporting guidance under Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 946 "Financial Services - Investment Companies." The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from investment transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to earmark securities in the Funds' portfolios with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments.

As of the end of the reporting period, the Funds' outstanding when-issued/delayed delivery purchase commitments were as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Outstanding when-issued/delayed delivery purchase commitments	\$	\$	\$
<i>Investment Income</i>			

Dividend income is recorded on the ex-dividend date or, for foreign securities, when information is available. Interest income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Interest income also reflects paydown gains and losses, if any. Other income is comprised of fees earned in connection with the rehypothecation of pledged collateral as further described in Note 8 - Borrowing Arrangements.

Professional Fees

Professional fees presented on the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment or to pursue other claims or legal actions on behalf of Fund shareholders. If a refund is received for workout expenditures paid in a prior reporting period, such amounts will be recognized as "Legal fee refund" on the Statement of Operations.

Dividends and Distributions to Common Shareholders

Distributions to common shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

Dividends to common shareholders are declared monthly. Net realized capital gains from investment transactions, if any, are declared and distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Flexible Investment Income's (JPW) regular monthly distributions are currently being sourced entirely from net investment income. The Fund's current portfolio is predominantly invested in income producing securities the income from which is expected to be the source of distributions. For periods when the Fund is sourcing its monthly distributions solely from net investment income, the Fund will seek to distribute substantially all of its net investment income over time. There are no assurances given to how long the Fund will source distributions entirely from net investment income.

Market conditions may change, causing the portfolio management team at some future time to focus the mix of portfolio investments less to income-oriented securities. This may cause the regular monthly distributions to be sourced from something other than net investment income. Flexible Investment Income (JPW) has adopted a cash-flow based distribution policy permitting it to source its regular monthly distributions from not only net

Notes to Financial Statements (Unaudited) (continued)

investment income, but also from realized capital gains and/or return of capital. If a cash-flow based distribution policy is employed, the Fund will seek to establish a relatively stable common share distribution rate that roughly corresponds to the Fund's net cash flows after expense from its investments over an extended period of time. Actual net cash flows the Fund receives may differ from the Fund's distribution rate over shorter time periods over a specific timeframe, the difference between actual net cash flows and total Fund distributions will be reflected in an increasing (net cash flows exceed distributions) or a decreasing (distributions exceed net cash flows) Fund net asset value ("NAV"). If the Fund changes to a cash-flow based distribution, a press release will be issued describing such change and this change will also be described in subsequent shareholder reports. Additionally, if any distribution payment is sourced from something other than net investment income, a notice will be issued quantifying the sources of such distribution.

Indemnifications

Under the Funds' organizational documents, their officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Netting Agreements

In the ordinary course of business, the Funds may enter into transactions subject to enforceable master repurchase agreements, International Swaps and Derivative Association, Inc. ("ISDA") master agreements or other similar arrangements ("netting agreements"). Generally, the right to offset in netting agreements allows each Fund to offset any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. Generally, each Fund manages its cash collateral and securities collateral on a counterparty basis.

The Funds' investments subject to netting agreements as of the end of the reporting period, if any, are further described in Note 3 Portfolio Securities and Investments in Derivatives.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to common shares from operations during the reporting period. Actual results may differ from those estimates.

2. Investment Valuation and Fair Value Measurements

The fair valuation input levels as described below are for fair value measurement purposes.

Fair value is defined as the price that would be received upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure

purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The following is a summary of the three-tiered hierarchy of valuation input levels.

Level 1 Inputs are unadjusted and prices are determined using quoted prices in active markets for identical securities.

Level 2 Prices are determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 Prices are determined using significant unobservable inputs (including management's assumptions in determining the fair value of investments).

Common stocks and other equity-type securities are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1. Securities primarily traded on the NASDAQ National Market ("NASDAQ") are valued at the NASDAQ Official Closing Price and are generally classified as Level 1. However, securities traded on a securities exchange or NASDAQ for which there were no transactions on a given day or securities not listed on a securities exchange or NASDAQ are valued at the quoted bid price and are generally classified as Level 2. Prices of certain American Depositary Receipts ("ADR") held by the Funds that trade in the United States are valued based on the last traded price, official closing price or the most recent bid price of the underlying non-U.S.-traded stock, adjusted as appropriate for the underlying-to-ADR conversion ratio and foreign exchange rate, and from time-to-time may also be adjusted further to take into account material events that may take place after the close of the local non-U.S. market but before the close of the NYSE, which may represent a transfer from a Level 1 to a Level 2 security.

Prices of fixed-income securities are provided by a pricing service approved by the Funds' Board of Trustees (the "Board"). The pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality,

type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer or market activity, provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Prices of swap contracts are also provided by a pricing service approved by the Board using the same methods as described above, and are generally classified as Level 2.

Exchange-traded funds are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1.

The values of exchange-traded options are based on the mean of the closing bid and ask prices. Exchange-traded options are generally classified as Level 1. Options traded in the over-the-counter market are valued using an evaluated mean price and are generally classified as Level 2.

Repurchase agreements are valued at contract amount plus accrued interest, which approximates market value. These securities are generally classified as Level 2.

Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the NAV of the Funds' shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the NYSE is closed and an investor is not able to purchase, redeem or exchange shares. If significant market events occur between the time of determination of the closing price of a foreign security on an exchange and the time that the Funds' NAV is determined, or if under the Funds' procedures, the closing price of a foreign security is not deemed to be reliable, the security would be valued at fair value as determined in accordance with procedures established in good faith by the Board. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Board and/or its appointee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's NAV (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a

particular security, all valuations are subject to review by the Board and/or its appointee.

The inputs or methodologies used for valuing securities are not an indication of the risks associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of the end of the reporting period:

**Preferred

*** Represents net unrealized appreciation (depreciation) as reported in the Fund's Portfolio of Investments.

The Board is responsible for the valuation process and has appointed the oversight of the daily valuation process to the Adviser's Valuation Committee. The Valuation Committee, pursuant to the valuation policies and procedures adopted by the Board, is responsible for making fair value determinations, evaluating the

effectiveness of the Funds' pricing policies and reporting to the Board. The Valuation Committee is aided in its efforts by the Adviser's dedicated Securities Valuation Team, which is responsible for administering the daily valuation process and applying fair value methodologies as approved by the Valuation Committee. When determining the reliability of independent pricing services for investments owned by the Funds, the Valuation Committee, among other things, conducts due diligence reviews of the pricing services and monitors the quality of security prices received through various testing reports conducted by the Securities Valuation Team.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making a fair value determination, based on the facts and circumstances specific to the portfolio instrument. Fair value determinations generally will be derived as follows, using public or private market information:

- (i) If available, fair value determinations shall be derived by extrapolating from recent transactions or quoted prices for identical or comparable securities.
- (ii) If such information is not available, an analytical valuation methodology may be used based on other available information including, but not limited to: analyst appraisals, research reports, corporate action information, issuer financial statements and shelf registration statements. Such analytical valuation methodologies may include, but are not limited to: multiple of earnings, discount from market value of a similar freely-traded security, discounted cash flow analysis, book value or a multiple thereof, risk premium/yield analysis, yield to maturity and/or fundamental investment analysis.

The purchase price of a portfolio instrument will be used to fair value the instrument only if no other valuation methodology is available or deemed appropriate, and it is determined that the purchase price fairly reflects the instrument's current value.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such testing and fair valuation occurrences are reported to the Board.

3. Portfolio Securities and Investments in Derivatives

Portfolio Securities

Foreign Currency Transactions

To the extent that the Funds invest in securities and/or contracts that are denominated in a currency other than U.S. dollars, the Funds will be subject to currency risk, which is the risk that an increase in the U.S. dollar relative to the foreign currency will reduce returns or portfolio value. Generally, when the U.S. dollar rises in value against a foreign currency, the Funds' investments denominated in that currency will lose value because their currency is worth fewer U.S.

dollars; the opposite effect occurs if the U.S. dollar falls in relative value. Investments and other assets and liabilities denominated in foreign currencies are converted into U.S. dollars on a spot (i.e. cash) basis at the spot rate prevailing in the foreign currency exchange market at the time of valuation. Purchases and sales of investments and income denominated in foreign currencies are translated into U.S. dollars on the respective dates of such transactions.

As of the end of the reporting period, Preferred Income Opportunities' (JPC) and Preferred and Income Term's (JPI) investments in non-U.S. securities were as follows:

Preferred Income Opportunities (JPC)	Value	% of Total Investments
Country:		
United Kingdom	\$ 86,315,830	6.1%
Netherlands	54,522,743	3.8
Spain	35,359,874	2.5
France	33,194,293	2.3
Other	85,248,728	6.0
Total non-U.S. securities	\$294,641,468	20.7%
Preferred and Income Term (JPI)		
Country:		
United Kingdom	\$ 84,457,261	10.6%
Netherlands	54,620,615	6.9
France	35,632,921	4.5
Spain	26,676,943	3.4
Other	60,887,949	7.6
Total non-U.S. securities	\$262,275,689	33.0%

The books and records of the Funds are maintained in U.S. dollars. Foreign currencies, assets and liabilities are translated into U.S. dollars at 4:00 p.m. Eastern Time. Investment transactions, income and expenses are translated on the respective dates of such transactions. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date of the transactions, foreign currency transactions and the difference between the amounts of interest and dividends recorded on the books of a Fund and the amounts actually received.

The realized gains and losses resulting from changes in foreign currency exchange rates and changes in foreign exchange rates associated with (i) investments, (ii) investments in derivatives and (iii) other assets and liabilities are recognized as a component of "Net realized gain (loss) from investments and foreign currency" on the Statement of Operations, when applicable.

The unrealized gains and losses resulting from changes in foreign currency exchange rates and changes in foreign exchange rates associated with (i) investments and (ii) other assets and liabilities are recognized as a component of "Change in net unrealized appreciation (depreciation) of investments and foreign currency" on the Statement of Operations, when applicable. The unrealized gains and losses resulting from changes in foreign exchange rates associated with investments in derivatives are recognized as a component of the respective derivative's related "Change in net unrealized appreciation (depreciation)" on the Statement of Operations, when applicable.

Repurchase Agreements

Edgar Filing: Nuveen Preferred Income Opportunities Fund - Form N-CSRS

In connection with transactions in repurchase agreements, it is each Fund's policy that its custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction, including accrued interest, at all times. If the counterparty defaults, and the fair value of the collateral declines, realization of the collateral may be delayed or limited.

The following table presents the repurchase agreements for the Funds that are subject to netting agreements as of the end of the reporting period, and the collateral delivered related to those repurchase agreements.

Fund	Counterparty	Short-Term Investments, at Value	Collateral Pledged (From) Counterparty*	Net Exposure
Preferred Income Opportunities (JPC)	Fixed Income Clearing Corporation	\$ 24,559,123	\$(24,559,123)	\$
Preferred and Income Term (JPI) Flexible Investment Income (JPW)	Fixed Income Clearing Corporation	4,579,449	(4,579,449)	
	Fixed Income Clearing Corporation	3,180,909	(3,180,909)	

* As of the end of the reporting period, the value of the collateral pledged from the counterparty exceeded the value of the repurchase agreements. Refer to the Fund's Portfolio of Investments for details on the repurchase agreements.

Notes to Financial Statements (Unaudited) (continued)

Zero Coupon Securities

A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

Investments in Derivatives

Each Fund is authorized to invest in certain derivative instruments, such as futures, options and swap contracts. Each Fund limits its investments in futures, options on futures and swap contracts to the extent necessary for the Adviser to claim the exclusion from registration by the Commodity Futures Trading Commission as a commodity pool operator with respect to each Fund. The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes.

Options Transactions

The purchase of options involves the risk of loss of all or a part of the cash paid for the options (the premium). The market risk associated with purchasing options is limited to the premium paid. The counterparty credit risk of purchasing options, however, needs also to take into account the current value of the option, as this is the performance expected from the counterparty. When a Fund purchases an option, an amount equal to the premium paid (the premium plus commission) is recognized as a component of "Options purchased, at value" on the Statement of Assets and Liabilities. When a Fund writes an option, an amount equal to the net premium received (the premium less commission) is recognized as a component of "Options written, at value" on the Statement of Assets and Liabilities and is subsequently adjusted to reflect the current value of the written option until the option is exercised or expires or the Fund enters into a closing purchase transaction. The changes in the value of options purchased and/or written during the fiscal period are recognized as a component of "Change in net unrealized appreciation (depreciation) of options purchased and/or written" on the Statement of Operations. When an option is exercised or expires or the Fund enters into a closing purchase transaction, the difference between the net premium received and any amount paid at expiration or on executing a closing purchase transaction, including commission, is recognized as a component of "Net realized gain (loss) from options purchased and/or written" on the Statement of Operations. The Fund, as a writer of an option has no control over whether the underlying instrument may be sold (called) or purchased (put) and as a result bears the risk of an unfavorable change in the market value of the instrument underlying the written option. There is also the risk the Fund may not be able to enter into a closing transaction because of an illiquid market.

During the current fiscal period, Preferred Income Opportunities (JPC) and Flexible Investment Income (JPW) wrote covered call options on common stocks to hedge equity exposure.

The average notional amount of outstanding options written during the current fiscal period, was as follows:

Preferred Income Opportunities	Flexible Investment Income
---	---

	(JPC)	(JPW)
Average notional amount of outstanding options written*	\$(3,615,467)	\$(1,060,467)

* The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

The following table presents the fair value of all options held by the Funds as of the end of the reporting period, the location of these instruments on the Statement of Assets and Liabilities and the primary underlying risk exposure.

Underlying Derivative Risk	Location on the Statement of Assets and Liabilities			
	Asset Derivatives		(Liability) Derivatives	
Exposure Instrument	Location	Value	Location	Value
Preferred Income Opportunities (JPC)				
Equity price	Options	\$	Options written, at value	\$192,411
Flexible Investment Income (JPW)				
Equity price	Options	\$	Options written, at value	\$ 56,448

The following table presents the amount of net realized gain (loss) and change in net unrealized appreciation (depreciation) recognized on options written on the Statement of Operations during the current fiscal period, and the primary underlying risk exposure.

Fund	Underlying Risk Exposure	Derivative Instrument	Net Realized Gain (Loss) from Options Written	Change in Net Unrealized Appreciation (Depreciation) of Options Written
Preferred Income Opportunities (JPC)	Equity price	Options	\$ 25,009	\$ 26,597
Flexible Investment Income (JPW)	Equity price	Options	7,356	7,241

Swap Contracts

Interest rate swap contracts involve each Fund's agreement with the counterparty to pay or receive a fixed rate payment in exchange for the counterparty receiving or paying a variable rate payment that is intended to approximate the Fund's variable rate payment obligation on any variable rate borrowing. Forward interest rate swap contracts involve each Fund's agreement with a counterparty to pay, in the future, a fixed or variable rate payment in exchange for the counterparty paying the Fund a variable or fixed rate payment, the accruals for which would begin at a specified date in the future (the "effective date"). The amount of the payment obligation is based on the notional amount of the swap contract. Swap contracts do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the net amount of interest payments that each Fund is to receive. Swap contracts are valued daily. Upon entering into an interest rate swap contract (and beginning on the effective date for a forward interest rate swap contract), each Fund accrues the fixed rate payment expected to be paid or received and the variable rate payment expected to be received or paid on a daily basis, and recognizes the daily change in the fair value of the Fund's contractual rights and obligations under the contracts. The net amount recorded for these transactions for each counterparty is recognized on the Statement of Assets and Liabilities as a component of "Unrealized appreciation or depreciation on interest rate swaps (,net)" with the change during the fiscal period recognized on the Statement of Operations as a component of "Change in net unrealized appreciation (depreciation) of swaps." Income received or paid by each Fund is recognized as a component of "Net realized gain (loss) from swaps" on the Statement of Operations, in addition to the net realized gains or losses recognized upon the termination of a swap contract and are equal to the difference between the Fund's basis in the swap contract and the proceeds from (or cost of) the closing transaction. Payments received or made at the beginning of the measurement period are recognized as a component of "Interest rate swap premiums paid and/or received" on the Statement of Assets and Liabilities, when applicable. For tax purposes, periodic payments are treated as ordinary income or expense.

During the current fiscal period, Preferred Income Opportunities (JPC) and Preferred and Income Term (JPI) continued to use interest rate swaps to partially hedge the interest cost of leverage, which the Funds employ through the use of bank borrowings.

The average notional amount of interest rate swap contracts outstanding during the current fiscal period was as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)
Average notional amount of interest rate swap contracts outstanding*	\$275,075,333	\$168,750,000

* The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

The following table presents the fair value of all swap contracts held by the Funds as of the end of the reporting period, the location of these instruments on the Statement of Assets and Liabilities and the primary underlying risk exposure.

Underlying Derivative Instrument	Location on the Statement of Assets and Liabilities			
	Asset Derivatives		(Liability) Derivatives	
	Location	Value	Location	Value

**Risk
Exposure**

Preferred Income Opportunities (JPC)

---------------------	----	--	---------------

Preferred and Income Term (JPI)

Interest rate Swaps	\$	Unrealized depreciation on interest rate swaps	\$(6,278,465)
---------------------	----	--	---------------

The following table presents the swap contacts subject to netting agreements, and the collateral delivered related to those swap contracts as of the end of the reporting period.

	Gross Unrealized Appreciation on Interest Rate Swaps*	Gross Unrealized (Depreciation) on Interest Rate Swaps*	Amounts Netted on Statement of Assets and Liabilities	Net Unrealized Appreciation (Depreciation) on Interest Rate Swaps	Collateral Pledged to (from) Counterparty	Net Exposure
Fund Counterparty						
Preferred Income Opportunities (JPC)						
JPMorgan	\$	\$(4,989,648)	\$	\$(4,989,648)	\$2,876,751	\$(2,112,897)
Preferred and Income Term (JPI)						
JPMorgan	\$	\$(6,278,465)	\$	\$(6,278,465)	\$5,747,577	\$(530,888)

* Represents gross unrealized appreciation (depreciation) for the counterparty as reported in the Fund's Portfolio of Investments.

Notes to Financial Statements (Unaudited) (continued)

The following table presents the amount of net realized gain (loss) and change in net unrealized appreciation (depreciation) recognized on swap contracts on the Statement of Operations during the current fiscal period, and the primary underlying risk exposure.

Fund	Underlying Risk Exposure	Derivative Instrument	Net Realized Gain (Loss) from Swaps	Change in Net Unrealized Appreciation (Depreciation) of Swaps
Preferred Income Opportunities (JPC)	Interest rate	Swaps	\$ (2,050,447)	\$ (8,488,353)
Preferred and Income Term (JPI)	Interest rate	Swaps		(7,875,771)

Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the pre-determined threshold amount.

4. Fund Shares*Common Shares*

Transactions in common shares were as follows:

	Preferred Income Opportunities (JPC)	
	Six Months Ended 1/31/15	Year Ended 7/31/14
Common shares repurchased and retired	(88,813)	(13,000)
Weighted average: Price per common share repurchased and retired	\$ 9.27	\$ 9.50

Discount per common share repurchased and retired	12.73%	11.45%

	Preferred and Income Term (JPI)		Flexible Investment Income (JPW)	
	Six Months Ended	Year Ended	Six Months Ended	Year Ended
	1/31/15	7/31/14	1/31/15	7/31/14
Common shares sold				200,000

5. Investment Transactions

Long-term purchases and sales (including maturities but excluding derivative transactions and securities sold short, where applicable) during the current fiscal period, were as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Purchases	\$366,082,325	\$106,304,749	\$68,075,519
Sales and maturities	371,905,657	109,621,129	71,883,680

Nuveen Investments
64

Transactions in options written for the following Funds during the current fiscal period were as follows:

	Preferred Income Opportunities (JPC)		Flexible Investment Income (JPW)	
	Number of Contracts	Premiums Received	Number of Contracts	Premiums Received
Options outstanding, beginning of period		\$		\$
Options written	4,201	256,883	1,233	74,829
Options terminated in closing purchase transactions	(357)	(37,875)	(105)	(11,140)
Options outstanding, end of period	3,844	\$ 219,008	1,128	\$ 63,689

6. Income Tax Information

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its investment company taxable income to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. In any year when the Funds realize net capital gains, each Fund may choose to distribute all or a portion of its net capital gains to shareholders, or alternatively, to retain all or a portion of its net capital gains and pay federal corporate income taxes on such retained gains.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to recognition of premium amortization, timing differences in the recognition of income on real estate investment trust ("REIT") investments and timing differences in recognizing certain gains and losses on investment transactions. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the NAVs of the Funds.

As of January 31, 2015, the cost and unrealized appreciation (depreciation) of investments (excluding investments in derivatives, where applicable), as determined on a federal income tax basis, were as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Cost of investments	\$ 1,356,321,444	\$ 763,644,427	\$ 98,120,046
Gross unrealized:			
Appreciation	\$ 76,314,933	\$ 34,627,845	\$ 2,986,072
Depreciation	(11,250,448)	(4,197,054)	(1,281,285)

Net unrealized appreciation (depreciation) of investments	\$ 65,064,485	\$ 30,430,791	\$ 1,704,787
---	---------------	---------------	--------------

Permanent differences, primarily due to bond premium amortization adjustments, complex securities character adjustments, distribution reallocation, foreign currency transactions, investments in partnerships, REIT adjustments, securities litigation settlements, and treatment of notional principal contracts, resulted in reclassifications among the Funds' components of common share net assets as of July 31, 2014, the Funds' last tax year end, as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Paid-in-surplus	\$ (5,968,098)	\$	\$ 121,764
Undistributed (Over-distribution of) net investment income	4,771,244	(93,872)	(58,043)
Accumulated net realized gain (loss)	1,196,854	93,872	(63,721)

The tax components of undistributed net ordinary income and net long-term capital gains as of July 31, 2014, the Funds' last tax year end, were as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Undistributed net ordinary income ¹	\$ 8,386,044	\$ 5,419,997	\$ 1,418,806
Undistributed net long-term capital gains			145,392

¹ Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any.

Notes to Financial Statements (Unaudited) (continued)

The tax character of distributions paid during the Funds' last tax year ended July 31, 2014, was designated for purposes of the dividends paid deduction as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Distributions from net ordinary income ²	\$73,673,863	\$56,242,486	\$5,135,476
Distributions from net long-term capital gains		9,204	

² Net ordinary income consists of net taxable income derived from dividends, interest, net short-term capital gains and current year earnings and profits attributable to realized gains, if any.

As of July 31, 2014, the Funds' last tax year end, the following Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as shown in the following table. The losses not subject to expiration will be utilized first by a Fund.

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)
Expiration:		
July 31, 2016	\$120,943,410	\$
July 31, 2017	204,895,930	
July 31, 2018	9,385,427	
Not subject to expiration		\$ 1,026,076
Total	\$335,224,767	\$ 1,026,076

During the Funds' last tax year ended July 31, 2014, the following Fund utilized capital loss carryforwards as follows:

	Preferred Income Opportunities (JPC)
Utilized capital loss carryforwards	\$ 8,637,596

The Funds have elected to defer late-year losses in accordance with federal income tax rules. These losses are treated as having arisen on the first day of the current fiscal year. The following Fund has elected to defer losses as follows:

	Preferred and Income Term (JPI)
Post-October capital losses ³	\$ 738,549
Late-year ordinary losses ⁴	

³ Capital losses incurred from November 1, 2013 through July 31, 2014, the Fund's last tax year ended.

⁴ Ordinary losses incurred from January 1, 2014 through July 31, 2014 and specified losses incurred from November 1, 2013 through July 31, 2014.

7. Management Fees and Other Transactions with Affiliates

Each Fund's management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Sub-Advisers are compensated for their services to the Funds from the management fees paid to the Adviser.

Each Fund's management fee consists of two components a fund-level fee, based only on the amount of assets within each individual Fund, and a complex-level fee, based on the aggregate amount of all eligible fund assets managed by the Adviser. This pricing structure enables each Fund's shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual Fund-level fee, payable monthly, for each Fund is calculated according to the following schedule:

Average Daily Managed Assets*	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
For the first \$500 million	0.6800%	0.7000%	0.7000%
For the next \$500 million	0.6500	0.6750	0.6750
For the next \$500 million	0.6300	0.6500	0.6500
For the next \$500 million	0.6050	0.6250	0.6250
For managed assets over \$2 billion	0.5800	0.6000	0.6000

The annual complex-level fee, payable monthly, for each Fund is calculated according to the following schedule:

Complex-Level Managed Asset Breakpoint Level*	Effective Rate at Breakpoint Level
\$55 billion	0.2000%
\$56 billion	0.1996
\$57 billion	0.1989
\$60 billion	0.1961
\$63 billion	0.1931
\$66 billion	0.1900
\$71 billion	0.1851
\$76 billion	0.1806
\$80 billion	0.1773
\$91 billion	0.1691
\$125 billion	0.1599
\$200 billion	0.1505
\$250 billion	0.1469
\$300 billion	0.1445

* For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to certain types of leverage. For these purposes, leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen funds that constitute "eligible assets." Eligible assets do not include assets attributable to investments in other Nuveen funds and assets in excess of \$2 billion added to the Nuveen fund complex in connection with the Adviser's assumption of the management of the former First American Funds effective January 1, 2011. As of January 31, 2015, the complex-level fee rate for each of these Funds was 0.1635%.

The Funds pays no compensation directly to those of their trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board has adopted a deferred compensation plan for independent trustees that enables trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen-advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had

been invested in shares of select Nuveen-advised funds.

8. Borrowing Arrangements

Borrowings

Preferred Income Opportunities (JPC) and Preferred and Income Term (JPI) each entered into a prime brokerage facility with BNP Paribas Prime Brokerage, Inc. ("BNP") while Flexible Investment Income (JPW) entered in to a committed secured 180-day continuous rolling borrowing facility with the Bank of Nova Scotia (collectively, "Borrowings") as a means of leverage. Each Fund's maximum commitment amount under these Borrowings is as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Maximum commitment amount	\$405,000,000	\$250,000,000	\$35,000,000

As of the end of the reporting period, each Fund's outstanding balance on its Borrowings was as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Outstanding balance on Borrowings	\$404,100,000	\$225,000,000	\$30,000,000

Nuveen Investments

Notes to Financial Statements (Unaudited) (continued)

During the current fiscal period, the average daily balance outstanding and average annual interest rate on each Fund's Borrowings were as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)	Flexible Investment Income (JPW)
Average daily balance outstanding	\$403,030,435	\$225,000,000	\$30,000,000
Average annual interest rate	1.01%	1.01%	0.86%

In order to maintain these Borrowings, the Funds must meet certain collateral, asset coverage and other requirements. Borrowings outstanding are fully secured by securities held in each Fund's portfolio of investments ("Pledged Collateral"). For Preferred Income Opportunities (JPC) and Preferred and Income Term (JPI) interest is charged on these Borrowings at 1-Month LIBOR (London Inter-Bank Offered Rate) plus 0.85% per annum on the amounts borrowed and 0.50% per annum on the undrawn balance. Effective December 4, 2014, Preferred Income Opportunities (JPC) and Preferred and Income Term (JPI) are charged the 0.50% per annum undrawn fee only when the undrawn portion of the Borrowings on particular day is more than 20% of the maximum commitment amount. Flexible Investment Income's (JPW) interest is charged on the Borrowings at a rate equal to the 1-month LIBOR plus 0.70% per annum on the amount borrowed. In addition to the interest expense, Flexible Investment Income (JPW) will pay a commitment fee equal to 0.15% per annum on the undrawn balance of the Borrowings unless the undrawn portion of the Borrowings on that day is less than 40% of the maximum commitment amount.

Borrowings outstanding are recognized as "Borrowings" on the Statement of Assets and Liabilities. Interest expense incurred on the borrowed amount and undrawn balance are recognized as a component of "Interest expense and borrowings costs" on the Statement of Operations.

Rehypothecation

The Adviser has entered into a Rehypothecation Side Letter ("Side Letter") with BNP, allowing BNP to re-register the Pledged Collateral in its own name or in a name other than the Funds' to pledge, repledge, hypothecate, rehypothecate, sell, lend or otherwise transfer or use the Pledged Collateral (the "Hypothecated Securities") with all rights of ownership as described in the Side Letter. Subject to certain conditions, the total value of the outstanding Hypothecated Securities shall not exceed the lesser of (i) 98% of the outstanding balance on the Borrowings to which the Pledged Collateral relates and (ii) 33 1/3% of the Funds' total assets. The Funds may designate any Pledged Collateral as ineligible for rehypothecation. The Funds may also recall Hypothecated Securities on demand.

The Funds also have the right to apply and set-off an amount equal to one-hundred percent (100%) of the then-current fair market value of such Pledged Collateral against the current Borrowings under the Side Letter in the event that BNP fails to timely return the Pledged Collateral and in certain other circumstances. In such circumstances, however, the Funds may not be able to obtain replacement financing required to purchase replacement securities and, consequently, the Funds' income generating potential may decrease. Even if a Fund is able to obtain replacement financing, it might not be able to purchase replacement securities at favorable prices.

Edgar Filing: Nuveen Preferred Income Opportunities Fund - Form N-CSRS

The Funds will receive a fee in connection with the Hypothecated Securities ("Rehypothecation Fees") in addition to any principal, interest, dividends and other distributions paid on the Hypothecated Securities.

As of the end of the reporting period, Preferred Income Opportunities (JPC) and Preferred and Income Term (JPI) each had Hypothecated Securities as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)
Hypothecated Securities	\$40,539,000	\$15,104,000

Preferred Income Opportunities (JPC) and Preferred and Income Term (JPI) earn Rehypothecation Fees, which are recognized as "Other income" on the Statement of Operations. During the current fiscal period, the Rehypothecation Fees earned by each Fund are as follows:

	Preferred Income Opportunities (JPC)	Preferred and Income Term (JPI)
Rehypothecation Fees	\$ 310,673	\$ 172,500

Nuveen Fund Advisors, LLC 333 West Wacker Drive Chicago, IL 60606	State Street Bank & Trust Company Boston, MA 02111	Chapman and Cutler LLP Chicago, IL 60603	KPMG LLP Chicago, IL 60601	State Street Bank & Trust Company Nuveen Funds P.O. Box 43071 Providence, RI 02940-3071 (800) 257-8787

** During the fiscal period ended July 31, 2015, the Board of Trustees of the Funds, upon recommendation of the Audit Committee, engaged KPMG LLP ("KPMG") as the independent registered public accounting firm to the Funds replacing Ernst & Young LLP ("Ernst & Young"), which resigned as the independent registered public accounting firm effective September 30, 2014 as a result of the pending acquisition of Nuveen Investments by TIAA-CREF.

Ernst & Young's report on the Funds for the most recent fiscal period ended July 31, 2014, contained no adverse opinion or disclaimer of opinion, and was not qualified or modified as to uncertainty, audit scope or accounting principles. For the fiscal period ended July 31, 2014 for the Funds and for the period August 1, 2014 through September 30, 2014, there were no disagreements with Ernst & Young on any matter of accounting principles or practices, financial statement disclosure or auditing scope or procedures, which disagreements, if not resolved to the satisfaction of Ernst & Young, would have caused it to make reference to the subject matter of the disagreements in connection with its reports on the Funds' financial statements.

Quarterly Form N-Q Portfolio of Investments Information

Each Fund is required to file its complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. You may obtain this information directly from the SEC. Visit the SEC on-line at <http://www.sec.gov> or in person at the SEC's Public Reference Room in Washington, D.C. Call the SEC toll-free at (800) SEC-0330 for room hours and operation.

Nuveen Funds' Proxy Voting Information

You may obtain (i) information regarding how each fund voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, without charge, upon request, by calling Nuveen Investments toll-free at (800) 257-8787 or on Nuveen's website at www.nuveen.com and (ii) a description of the policies and procedures that each fund used to determine how to vote proxies relating to portfolio securities without charge, upon

request, by calling Nuveen Investments toll free at (800) 257-8787. You may also obtain this information directly from the SEC. Visit the SEC on-line at <http://www.sec.gov>.

CEO Certification Disclosure

Each Fund's Chief Executive Officer (CEO) has submitted to the New York Stock Exchange (NYSE) the annual CEO certification as required by Section 303A.12(a) of the NYSE Listed Company Manual.

Each Fund has filed with the SEC the certification of its CEO and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

Common Share Repurchases

Each Fund intends to repurchase, through its open market share repurchase program, shares of its own common stock at such times and in such amounts as is deemed advisable. During the period covered by this report, each Fund repurchased shares of its common stock, as shown in the accompanying table. Any future repurchases will be reported to shareholders in the next annual or semi-annual report.

	JPC	JPI	JPW
Common shares repurchased	88,813

Glossary of Terms

Used in this Report

- n **Average Annual Total Return:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or offer price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- n **Barclays U.S. Aggregate Bond Index:** An unmanaged index that includes all investment-grade, publicly issued, fixed-rate, dollar denominated, nonconvertible debt issues and commercial mortgage backed securities with maturities of at least one year and outstanding par values of \$150 million or more. Index returns assume reinvestment of distributions, but do not include the effects of any applicable sales charges or management fees.
- n **Barclays USD Capital Securities Index:** The Barclays USD Capital Securities component of the Barclays Global Capital Securities Index generally includes Tier 2/Lower Tier 2 bonds, perpetual step-up debt, step-up preferred securities, and term preferred securities. The index returns assume reinvestment of dividends, but do not include the effects of any sales charges or management fees.
- n **Basel III:** A comprehensive set of reform measures designed to improve the regulation, supervision and risk management within the banking sector. The Basel Committee on Banking Supervision published the first version of Basel III in late 2009, giving banks approximately three years to satisfy all requirements. Largely in response to the credit crisis, banks are required to maintain proper leverage ratios and meet certain capital requirements.
- n **BofA/Merrill Lynch Preferred Securities Fixed Rate Index:** An index that tracks the performance of fixed rate U.S. dollar denominated preferred securities issued in the U.S. domestic market. Qualifying securities must be rated investment grade (based on an average of Moody's, S&P, and Fitch) and must have an investment grade rated country of risk (based on an average of Moody's, S&P, and Fitch foreign currency long-term sovereign debt ratings). In addition, qualifying securities must be issued as public securities or through a 144A filing, must be issued in \$25, \$50 or \$100 par/liquidation preference increments, must have a fixed coupon or dividend schedule, and must have a minimum amount outstanding of \$100 million. The index returns assume reinvestment of dividends, but do not include the effects of any sales charges or management fees.
- n **Effective Leverage:** Effective leverage is a fund's effective economic leverage, and includes both regulatory leverage (see below) and the leverage effects of certain derivative investments in the fund's portfolio that increase the funds' investment exposure.
- n **Gross Domestic Product (GDP):** The total market value of all final goods and services produced in a country/region in a given year, equal to total consumer, investment and government spending, plus the value of exports, minus the value of imports.
- n **JPC Blended Index (Comparative Benchmark):** A blended return consisting of 82.5% of the BofA/Merrill Lynch Preferred Securities Fixed Rate Index and 17.5% of the Barclays USD Capital Securities Index. The index returns assume reinvestment of dividends, but do not include the effects of any sales charges or management fees.

n **JPI Blended Benchmark Index:** A blended return consisting of the BofA/Merrill Lynch Preferred Securities Fixed Rate Index and the Barclays USD Capital Securities Index. The JPI Blended Benchmark Index is comprised of a 65% weighting in the BofA/Merrill Lynch Preferred Securities Fixed Rate Index, and a 35% weighting in the Barclays USD Capital Securities Index. Benchmark returns assume reinvestment of distributions, but do not include the effects of any sales charges or management fees.

n **Leverage:** Leverage is created whenever a fund has investment exposure (both reward and/or risk) equivalent to more than 100% of the investment capital.

n **Net Asset Value (NAV) Per Share:** A fund's Net Assets is equal to its total assets (securities, cash, accrued earnings and receivables) less its total liabilities. NAV per share is equal to the fund's Net Assets divided by its number of shares outstanding.

n **Regulatory Leverage:** Regulatory leverage consists of preferred shares issued by or borrowings of a fund. Both of these are part of a fund's capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

Reinvest Automatically,

Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

Nuveen Closed-End Funds Automatic Reinvestment Plan

Your Nuveen Closed-End Fund allows you to conveniently reinvest distributions in additional Fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of compounding. Just like distributions in cash, there may be times when income or capital gains taxes may be payable on distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

Easy and convenient

To make recordkeeping easy and convenient, each quarter you'll receive a statement showing your total distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Distributions received to purchase shares in the open market will normally be invested shortly after the distribution payment date. No interest will be paid on distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

Flexible

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to

another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

TOTAL	88,813			

* The registrant's repurchase program, for the repurchase of 9,700,000 shares, was authorized November 20, 2013. The program was reauthorized for a maximum repurchase amount of 9,695,000 shares on August 6, 2014. Any repurchases made by the registrant pursuant to the program were made through open-market transactions.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the registrant's Board implemented after the registrant last provided disclosure in response to this Item.

ITEM 11. CONTROLS AND PROCEDURES.

- (a) The registrant's principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the 1940 Act) (17 CFR 270.30a-3(c))) are effective, as of a date within 90 days of the filing date of this report that includes the disclosure

Edgar Filing: Nuveen Preferred Income Opportunities Fund - Form N-CSRS

required by this paragraph, based on their evaluation of the controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (the Exchange Act) (17 CFR 240.13a-15(b) or 240.15d-15(b)).

- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d)) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

File the exhibits listed below as part of this Form.

(a)(1) Any code of ethics, or amendment thereto, that is the subject of the disclosure required by Item 2, to the extent that the registrant intends to satisfy the Item 2 requirements through filing of an exhibit: Not applicable to this filing.

(a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the 1940 Act (17 CFR 270.30a-2(a)) in the exact form set forth below: Ex-99.CERT attached hereto.

(a)(3) Any written solicitation to purchase securities under Rule 23c-1 under the 1940 Act (17 CFR 270.23c-1) sent or given during the period covered by the report by or on behalf of the registrant to 10 or more persons: Not applicable.

(b) If the report is filed under Section 13(a) or 15(d) of the Exchange Act, provide the certifications required by Rule 30a-2(b) under the 1940 Act (17 CFR 270.30a-2(b)); Rule 13a-14(b) or Rule 15d-14(b) under the Exchange Act (17 CFR 240.13a-14(b) or 240.15d-14(b)), and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. 1350) as an exhibit. A certification furnished pursuant to this paragraph will not be deemed filed for purposes of Section 18 of the Exchange Act (15 U.S.C. 78r), or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference. Ex-99.906 CERT attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
