**SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

FORM 10-QSB

QUARTERLY REPORT UNDER SECTION 13 OR 15(d)
SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTER ENDED JULY 31, 2006

Commission file number: 0-13301

RF INDUSTRIES, LTD.

(Exact name of registrant as specified in its charter)

Nevada 88-0168936

(State of Incorporation) (I.R.S. Employer Identification
No.)

7610 Miramar Road, Bldg. 6000, San Diego, California 92126-4202

(Address of principal executive
offices) (Zip Code)

(858) 549-6340 FAX (858) 549-6345

(Issuer's telephone and fax numbers, including area code)

Securities registered pursuant to Section 12(b) of the Act: None

Check whether the issuer (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

State the number of shares outstanding of each of the issuer's classes of common stock at the latest practicable date. As of August 31, 2006, the registrant had 3,209,484 shares of Common Stock, \$.01 par value, issued.

Transitional Small Business Disclosure Format (check one): Yes No

RF INDUSTRIES, LTD.
NOTES TO CONDENSED UNAUDITED FINANCIAL STATEMENTS

Note 1 - Unaudited interim financial statements

The accompanying unaudited condensed financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments have been included in order to make the information not misleading. Information included in the balance sheet, as of October 31, 2005 has been derived from, and certain terms used herein are defined in, the audited financial statements of the Company as of October 31, 2005 included in the Company's Annual Report on Form 10-KSB for the year ended October 31, 2005 that was previously filed with the Securities and Exchange Commission. Operating results for the three and nine month periods ended July 31, 2006, are not necessarily indicative of the results that may be expected for the year ending October 31, 2006. The unaudited condensed financial statements should be read in conjunction with the financial statements and footnotes thereto included in the Company's Annual Report on Form 10-KSB for the year ended October 31, 2005.

Certain amounts in the 2005 unaudited condensed financial statements have been reclassified to conform to the 2006 presentation.

Note 2 - Investments

Pursuant to Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the Company's investments in U.S. Treasury Bills were classified as available-for-sale securities and, accordingly, were valued at fair value at the end of each period. If there is any other than temporary decline in fair value, the cost basis of the individual security would have been written down to fair value via a charge to earnings. Net unrealized holding gains on these investments as of July 31, 2006 were \$21,148, net of deferred income taxes of \$16,000.

Note 3 - Components of inventory

Inventories, consisting of materials, labor and manufacturing overhead, are stated at the lower of cost or market. Cost has been determined using the weighted average cost method.

	July 31, 2006	October 31, 2005
Raw materials and supplies	\$ 1,115,201	\$ 845,313
Work in process	18,048	63,242
Finished goods	3,136,317	3,318,293
Inventory reserve	(108,164)	(46,348)
Total	\$ 4,161,402	\$ 4,180,500

Purchases of connector products from two major vendors in the nine month period ended July 31, 2006, represented 30% and 17% compared to 38% and 23% of the total inventory purchases for the same period in fiscal year 2005. The Company has arrangements with these vendors to purchase product based on purchase orders periodically issued by the Company.

Note 4 - Earnings per share

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. For the three and nine months ended July 31, 2006 and 2005, the computation of diluted earnings per common share took into account the effects on the weighted average number of common shares outstanding of the assumed exercise of the outstanding stock options, adjusted for the application of the treasury stock method. The greatest number of shares potentially issuable by us upon the exercise of stock options in any quarter of the nine months ended July 31, 2006 that were not included in the computation of net earnings per common share because they were anti-dilutive, totaled 77,929. During the three and nine months ended July 31, 2005, all options were considered dilutive and included in the calculation of diluted earnings per share.

The following table summarizes the computation of basic and diluted weighted average shares:

	Three Months Ended July 31		Nine Months Ended July 31	
	2006	2005	2006	2005
Weighted average shares outstanding for basic net earnings per share	3,209,484	3,062,396	3,171,260	3,039,243
Add effects of potentially dilutive securities-assumed exercise of stock options	514,443	720,337	523,262	765,081
Weighted average shares for diluted net earnings per share	3,723,927	3,782,733	3,694,522	3,804,324

Note 5 - Stock Option Plan

During the three month period ended July 31, 2006, 94,750 stock options that were granted as of October 31, 2005 with a weighted average share price of \$4.94 were made effective with the stockholder's approval in June 2006 to increase the number of shares authorized to grant under the 2000 Stock Option Plan. There were no stock options exercised for the three months ended July 31, 2006. For the nine month period ended July 31, 2006, 123,750 options were granted and 126,963 stock options with a weighted average share price of \$1.24 were exercised resulting in proceeds of \$157,035 to the Company.

The Company continues to measure compensation cost related to stock options issued to employees using the intrinsic value method of accounting prescribed by Accounting Principles Board Opinion No. 25 ("APB 25"), "Accounting for Stock Issued to Employees," which only requires charges to compensation expense for the excess, if any, of the fair value of the underlying stock at the date a stock option is granted (or at an appropriate subsequent measurement date) over the amount the employee must pay to acquire the stock. The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards No. 123 ("SFAS 123"), "Accounting for Stock-Based Compensation," as amended by Statement of Financial Accounting Standards No. 148 ("SFAS 148"), "Accounting for Stock-Based Compensation - Transaction Disclosure." During the third quarter of fiscal year-end 2006, the options previously granted prior to stockholder approval were approved by the stockholders causing the measurement date for these options to occur under APB 25. These options were granted at an exercise price, which was less than the fair value of the common stock on the measurement date. The intrinsic value of these options is being amortized over the vesting period of the options which approximates one year. The charge incurred during the third quarter for the approval of these options approximates \$103,000. The Company estimates that the charge to future operations over the remaining vesting period will approximate \$34,000. The fair value of these options using the Black-Scholes option-pricing model was determined to be \$3.03 utilizing a risk free interest rate of 4.95% over the four years with a

40% volatility rate. The Company's historical net income and earnings per common share and pro forma net income and earnings per share assuming compensation cost had been determined based on the fair value at the grant date for all awards by the Company consistent with the provisions of SFAS 123 are set forth below:

7

Edgar Filing: R F INDUSTRIES LTD - Form 10QSB

	Three Months Ended July 31		Nine Months Ended July 31	
	2006	2005	2006	2005

Diluted earnings per share - pro forma	\$ 0.09	\$ 0.04	\$ 0.25	\$ 0.12

Note 6 - Concentration of Credit Risk

One customer accounted for approximately 18% of the Company's net sales for both of the three and nine month periods ended July 31, 2006, and 14% for the comparable periods in 2005. Although this customer has been an on-going major customer of the Company during the past five years, the written agreement with this customer does not have any minimum purchase obligations and the customer could stop buying the Company's products at any time for any reason. A reduction, delay or cancellation of orders from this customer or the loss of this customer could adversely impact the Company's revenues and profits. The Company cannot provide assurance that this customer or any of its current customers will continue to place orders, that orders by existing customers will continue at current or historical levels or that the Company will be able to obtain orders from new customers.

Note 7 - Geographical Information

The Company attributes sales to geographic areas based on the location of the customers. The following table presents the sales of the Company by geographic area for the three and nine month periods ended July 31, 2006 and 2005:

	Three Months Ended July 31		Nine Months Ended July 31	
	2006	2005	2006	2005
United States	\$ 3,491,307	\$ 2,806,291	\$ 9,907,119	\$ 8,641,387
Foreign countries	428,926	470,290	1,157,346	1,081,218
	\$ 3,920,233	\$ 3,276,581	\$ 11,064,465	\$ 9,722,605

NOTE 8 - Income Tax Provision

The income tax provisions reflected in the accompanying unaudited condensed statements of income for the three and nine months ended July 31, 2006 are different than the expected tax provisions computed using the applicable statutory Federal income tax rate of 34%. Interim tax provisions are determined using an estimate of the annual effective tax rate.

Our estimated annual effective tax rate is affected by state income taxes and permanent differences between income before taxes for financial reporting purposes and taxable income. Our most significant permanent difference, and the principal reason why our estimated effective income tax rate is substantially greater than the statutory Federal income tax rate, relates to the portion of our compensation expense recognized for financial reporting purposes that is attributable to the non-cash charges recorded for the qualified incentive stock options granted (see Note 5) to employees which are generally not deductible for income tax purposes. We recognized non-cash compensation charges of approximately \$103,000 in the three months ended July 31, 2006.

Item 2: Management's discussion and analysis of financial condition and results of operations

This report contains forward-looking statements. These statements relate to future events or the Company's future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "except," "plan," "anticipate," "believe," "estimate," "predict," "potential" or "continue," the negative of such terms comparable terminology. These statements are only predictions. Actual events or results may differ materially.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither the Company, nor any other person, assumes responsibility for the accuracy and completeness of the forward-looking statements. The Company is under no obligation to update any of the forward-looking statements after the filing of this Quarterly Report on Form 10-QSB to conform such statements to actual results or to changes in its expectations.

The following discussion should be read in conjunction with the Company's financial statements and the related notes and other financial information appearing elsewhere in this Form 10-QSB. Readers are also urged to carefully review and consider the various disclosures made by the Company which attempt to advise interested parties of the factors which affect the Company's business, including without limitation the disclosures made under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations," under the caption "Risk Factors," and the audited financial statements and related notes included in the Company's Annual Report filed on Form 10-KSB for the year ended October 31, 2005 and other reports and filings made with the Securities and Exchange Commission.

Critical Accounting Policies

The financial statements of RF Industries are prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”). The preparation of these financial statements requires our management to make estimates and assumptions about future events that affect the amounts reported in the financial statements and related notes. Future events and their effects cannot be determined with absolute certainty. Therefore, the determination of estimates requires the exercise of judgment. . The Company believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of financial statements. The Company’s significant accounting policies are summarized in Note 1 to the financial statements contained in its Annual Report on Form 10-KSB filed for the fiscal year ended October 31, 2005.

Investments:

Pursuant to Statement of Financial Accounting Standards No. 115, “Accounting for Certain Investments in Debt and Equity Securities,” the Company’s investments in U.S. Treasury Bills and government bonds were classified as available-for-sale securities and, accordingly, were valued at fair value at the end of each period. If there is any other than temporary decline in fair value, the cost basis of the individual security would have been written down to fair value via a charge to earnings.

New Accounting Policies

In December 2004, the FASB issued SFAS No. 123 (R) (“SFAS 123(R)”), *Accounting for Stock-Based Compensation* which establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. SFAS 123(R) focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. SFAS 123(R) requires that the fair value of such equity instruments be recognized as expense in the historical financial statements as services are performed. Prior to SFAS 123(R), only certain pro forma disclosures of fair value were required. SFAS 123(R) shall be effective for all of the Company’s interim and annual reporting periods commencing on November 1, 2006 and is expected to have a material impact on the consolidated financial statements of the Company during the fiscal year 2007 and thereafter.

Executive Overview

RF Industries markets connectors and cables to numerous industries for use in thousands of products, primarily for the wireless marketplace. In addition, to a limited extent, the Company also markets wireless products that incorporate connectors and cables. In the past, RF Industries has reported results of operations in three segments that, in general terms, defined the primary markets. However, since sales of connectors and cable assemblies represent over 86% and 88% of the Company’s net sales during the three and nine months ended July 31, 2006, and since the operations of all of the Company’s smaller business units effectively operate as subunits of the Company’s principal business unit, the Company does not report the results of these other, smaller business units as separate business segments.

Liquidity and Capital Resources

Management believes that existing current assets and the amount of cash it anticipates it will generate from current operations will be sufficient to fund the anticipated liquidity and capital resource needs of the Company for at least twelve months. The Company does not, however, currently have any commercial banking arrangements providing for loans, credit facilities or similar matters should the Company need to obtain additional capital. Management’s beliefs that its existing assets and the cash expected to be generated from operations will be sufficient during the current fiscal year are based on the following:

§ As of July 31, 2006, the amount of cash and cash equivalents was equal to \$3,564,831 in the aggregate as well as \$3,667,017 in investments for a total of \$7,231,848 in cash equivalents and available-for-sale securities.

§ As of July 31, 2006, the Company had \$13,527,878 in current assets, and \$1,491,582 in current liabilities.

§ As of July 31, 2006, the Company had no outstanding indebtedness (other than accounts payable and accrued expenses).

The Company does not believe it will need material additional capital equipment in the next twelve months. In the past, the Company has financed some of its equipment and furnishings requirements through capital leases. No additional capital equipment purchases have been currently identified that would require significant additional leasing or capital expenditures during the next twelve months. Management also believes that based on the Company's current financial condition, the absence of outstanding bank debt and recent operating results, the Company would be able to obtain bank loans to finance its expansion, if necessary, although there can be no assurance any bank loan would be obtainable or, if obtained, would be on favorable terms or conditions.

The Company recognized net income of \$1,067,369 for the nine months ended July 31, 2006 and realized cash flow of \$2,631,425 from its operating activities. Contributing to the amount of net cash provided by operations were depreciation and income tax benefit for non-qualified stock options and decreases in inventories and income tax refund receivable, and an increase in accounts payable and accrued expenses.

Trade accounts receivable (net of allowances for doubtful accounts) at July 31, 2006 decreased by \$119,726 to \$1,770,974 compared to the October 31, 2005 balance of \$1,890,700.

Net inventories at July 31, 2006 decreased 1%, or \$19,098 to \$4,161,402 compared to \$4,180,500 on October 31, 2005 due to an increase in the inventory reserve and tighter inventory controls. The Company considers its ability to fill customer orders on a short notice to be an important aspect of its marketing strategy, accordingly the Company normally will increase its inventory levels in future periods as sales continue to rise.

The Company's cash and cash equivalent position was reduced due to investments in available-for-sale securities in nine month U.S Treasury bills and government bonds and an increase in other current assets, including prepaid expenses and deposits of \$59,764 to \$157,120, as of July 31, 2006 from \$97,356 on October 31, 2005. This increase in prepaid expenses and deposits are primarily due to annual payments made in the quarter for all the Company's business insurances.

Accounts payable at July 31, 2006 increased \$216,509 to \$551,258 from \$334,749 on October 31, 2005 primarily due to the late arrival of inventory receipts during the quarter from its overseas suppliers.

Net cash used in investing activities was \$3,730,848 for the nine months ended July 31, 2006 as a result of the net of the purchase and sale of available-for-sale securities with a value of \$3,645,869, and \$117,229 of capital expenditures reduced by a \$2,500 payment on notes receivable and a \$29,750 payment on notes receivable from related parties.

Net cash provided by financing activities was \$157,035 for the nine months ended July 31, 2006, and was attributable to proceeds received from the exercise of stock options.

As of July 31, 2006, the Company had a total of \$3,564,831 of cash and cash equivalents compared to \$4,507,219 as of October 31, 2005. The Company realized \$2,631,425 in cash provided by operating activities, together with the use of cash of \$3,730,848 for investing activities in U.S. Treasury bills and other government securities and an increase in cash of \$157,035 from financing activities resulted in the Company's overall cash and cash equivalent position decreasing by \$942,388 during the nine month period.

Results Of Operations

Three Months 2006 vs. Three Months 2005

Net sales in the current fiscal quarter ended July 31, 2006, increased 20%, or \$643,652 to \$3,920,233 from \$3,276,581 in the comparable fiscal quarter in the prior year, due to increased demand for the Company's connector, cable assembly as well as Bioconnect and Neulink products plus additional revenues of \$127,097 generated from the Worswick division acquired by the Company in September 2005. The increase in sales reflects a general increase in demand for wireless connectors and cable products. The Company believes this increase is due, in part, to the continued growth in some sectors of the telecommunication industries and the continuing overall market increase in the demand for wireless products plus additional order demand for its Bioconnect products.

The Company's gross profit as a percentage of net sales increased 4% to 49% from 45% during the current fiscal quarter compared to the same fiscal quarter last year. The increase in gross margins during the current quarter resulted from improved product purchases, labor and overhead costs efficiencies and a decrease in its net costs in benefits for all divisions from the comparable period in 2005 due to employees assuming more of their dependent insurance coverage costs. The Company's four smaller divisions usually have significantly lower gross margins than the RF Connector and Cable Assembly division. Although the connector and cable assembly products net sales increased by \$318,189 they decreased as a percentage of the total Company's net sales (77% compared to 82% in the same period for the prior year) due to increases in sales in other divisions. Gross margin increased by 2% for the connector and cable assembly products while both sales and gross margins also increased in the other divisions in the current period.

Engineering expenses decreased 10%, or \$12,502 to \$118,712 from \$131,214 in the comparable quarter of the prior year due to lower development costs for new product enhancements. Engineering expenses fluctuate based on design engineering expenses incurred by the Company at the request of its customers.

Selling and general expenses increased 9% or \$90,645 to \$1,131,938 from \$1,041,293 in the comparable quarter of the prior fiscal year. Selling and general expenses increased in the third quarter of the current fiscal year due primarily to increases in administrative expense for audit costs plus amortization of intangible assets and the salaries of the additional personnel retained to improve the Company's reporting systems as well as recognition of stock option compensation expense. As a result of increased sales and reduced selling and general administrative expenses related to Sarbanes Oxley, as a percentage of net sales, the selling and general expenses for the current period decreased by 3% to 29% from 32% in the same period in the prior year.

Other income for the third quarter of 2006 increased \$57,829 over the same period in the prior year due to higher investment interest income.

Nine Months 2006 vs. Nine Months 2005

Net sales in the nine months ended July 31, 2006 increased 14% or \$1,341,860 to \$11,064,465 from \$9,722,605 in the comparable period in the prior year due to increased demand for the Company's connector, cable assembly, Bioconnect and wireless products. The increase in sales reflects a general increase in demand for wireless connectors and cable products as well as increased demand for Bioconnect products. In addition, Worswick Industries, which was owned and in operation during the entire nine months ended July 31, 2006 but not owned in the comparable nine-month period of the prior year, contributed \$379,905 to net sales during the current nine month period.

The Company's gross profit as a percentage of net sales increased to 48% from 46% during the first nine months of fiscal 2006 compared to the same period in fiscal 2005. The increase in gross margins during the period resulted from a combination of higher sales of \$613,440 and a 1% increase in gross margin in its connector, cable assembly and wireless operations and from higher sales of \$307,805 and a 19% increase in gross margins in its Bioconnect products.

Engineering expenses for the first nine months of fiscal 2006 increased 2%, or \$7,018, to \$398,875 from \$391,857 in the comparable period of the prior year due to increased in customer requests, but with a lower development costs for new product enhancements as a percentage of revenue.

Selling and general expenses increased less than 1% or \$12,736 to \$3,182,084 from \$3,169,348 in the comparable period of the prior fiscal year. The slight increase in selling and general expenses is attributed to no Sarbanes-Oxley Act compliance expenses being incurred during the period offset by additional expenses related to stock option expense, additional personnel, amortization, insurance and auditing costs plus general increases in other costs.

Other income for the first nine months of fiscal 2006 increased \$125,576 over the same period in the prior year due to more cash available for investments and a higher rate of return on those investments.

Risk Factors

Investors should carefully consider the risks described below and in the Company's Annual Report on Form 10-KSB for the fiscal year ended October 31, 2005. The risks and uncertainties described below and in the Annual Report are not the only ones facing the Company. If any of the following risks actually occur, the Company's business, financial condition or results of operations could be materially adversely affected.

Dependence On RF Connector and Cable Assembly Products

Of the Company's five operating divisions, the three RF Connector and Cable Assembly product divisions account for approximately 86% of the Company's net sales for the fiscal year ended October 31, 2005, and approximately 85% and 88% of net sales during the three and nine months ended July 31, 2006, respectfully. The Company expects the RF Connector and Cable Assembly products will continue to account for the majority of the Company's revenues for the near future. Accordingly, an adverse change in the operations of the RF Connector and Cable Assembly divisions could materially adversely affect the Company's business, operating results and financial condition. Factors that could adversely affect the RF Connector and Cable Assembly divisions are described below.

The Company Depends On Third-Party Contract Manufacturers For Substantially All Of Its Connector Manufacturing Needs.

Substantially all of the Company's RF Connector and Cable Assembly products are manufactured by third-party contract manufacturers. The Company relies on them to procure components for RF Connector and Cable Assembly and in certain cases to design, assemble and test its products on a timely and cost-efficient basis. If the Company's contract manufacturers are unable to complete design work on a timely basis, the Company will experience delays in product development and its ability to compete may be harmed. In addition, because some of the Company's manufacturers have manufacturing facilities in Taiwan and Korea, their ability to provide the Company with adequate supplies of high-quality products on a timely and cost-efficient basis is subject to a number of additional risks and uncertainties, including earthquakes and other natural disasters and political, social and economic instability. If the Company's manufacturers are unable to provide it with adequate supplies of high-quality products on a timely and cost-efficient basis, the Company's operations would be disrupted and its net revenue and profitability would suffer. Moreover, if the Company's third-party contract manufacturers cannot consistently produce high-quality products that are free of defects, the Company may experience a higher rate of product returns, which would also reduce its profitability and may harm the Company's reputation and brand.

The Company does not currently have any agreements with any of its contract manufacturers, and such manufacturers could stop manufacturing products for the Company at any time. Although the Company believes that it could locate alternate contract manufacturers if any of its manufacturers terminated their business, the Company's operations could be impacted until alternate manufacturers are found.

The Company's Dependence On Third-Party Manufacturers Increases The Risk That It Will Not Have An Adequate Supply Of Products Or That Its Product Costs Will Be Higher Than Expected.

The risks associated with the Company's dependence upon third parties that develop and manufacture and assemble the Company's products include:

- § reduced control over delivery schedules and quality;
- § risks of inadequate manufacturing yields and excessive costs;
- § the potential lack of adequate capacity during periods of excess demand; and
- § potential increases in prices.

These risks may lead to increased costs or delay product delivery, which would harm the Company's profitability and customer relationships.

Dependence Upon Independent Distributors To Sell And Market The Company's Products

The Company's sales efforts are primarily conducted through independent distributors. Sales through independent distributors accounted for approximately 62% of the net sales of the Company for the fiscal year ended October 31, 2005, and approximately 55% for each of the three and nine months ended July 31, 2006. Although the Company has entered into written agreements with most of the distributors, the agreements are nonexclusive and generally may be terminated by either party upon 30-60 days written notice. The Company's distributors are not within the control of the Company, are not obligated to purchase products from the Company, and may also sell other lines of products. There can be no assurance that these distributors will continue their current relationships with the Company or that they will not give higher priority to the sale of other products, which could include products of competitors. A reduction in sales efforts or discontinuance of sales of the Company's products by its distributors would lead to reduced sales and could materially adversely affect the Company's financial condition, results of operations and business. Selling through indirect channels such as distributors may limit the Company's contact with its ultimate customers and the Company's ability to assure customer satisfaction.

Dependence On Principal Customer

One customer accounted for approximately 15% of the net sales of the Company's RF Connector and Cable Assembly division for the fiscal year ended October 31, 2005 and 16% and 19% of net sales for the three and nine months ended July 31, 2006 respectively. Although this customer has been an on-going major customer of the Company during the past five years, the Company does have a written distributor agreement with this customer. However, this customer does not have any minimum purchase obligations and could stop buying the Company's products at any time. Accordingly, the Company's largest customer could stop buying the Company's products at any time. A reduction, delay or cancellation of orders from this customer or the loss of this customer could significantly reduce the Company's revenues and profits. The Company cannot provide assurance that this customer or any of its current customers will continue to place orders, that orders by existing customers will continue at current or historical levels or that the Company will be able to obtain orders from new customers.

Certain Of The Company's Markets Are Subject to Rapid Technological Change, So The Company's Success In These Markets Depends On Its Ability To Develop And Introduce New Products.

Although most of the Company's products have a stable market and are only gradually phased out, certain of the new and emerging markets, such as the wireless digital transmission markets, are characterized by:

- § rapidly changing technologies;
- § evolving and competing industry standards;
- § short product life cycles;
- § changing customer needs;
- § emerging competition;
- § frequent new product introductions and enhancements; and
- § rapid product obsolescence.

To develop new products for the connector and wireless digital transmission markets, the Company must develop, gain access to and use new technologies in a cost-effective and timely manner. In addition, the Company must maintain close working relationship with key customers in order to develop new products that meet customers' changing needs. The Company also must respond to changing industry standards and technological changes on a timely and cost-effective basis.

Products for connector applications are based on industry standards that are continually evolving. The Company's ability to compete in the future will depend on its ability to identify and ensure compliance with these evolving industry standards. If the Company is not successful in developing or using new technologies or in developing new products or product enhancements, its future revenues may be materially affected. The Company's attempt to keep up with technological advances may require substantial time and expense.

The Markets In Which The Company Competes Are Highly Competitive.

The markets in which the Company operates are highly competitive and the Company expects that competition will increase in these markets. In particular, the connector and communications markets in which the Company's products are sold are intensely competitive. Because the Company does not own any proprietary property that can be used to distinguish the Company from its competitors, the Company's ability to compete successfully in these markets depends on a number of factors, including:

§ success in subcontracting the design and manufacture of existing and new products that implement new technologies;

- § product quality;
- § reliability;
- § customer support;

- § time-to-market;
- § price;
- § market acceptance of competitors' products; and
- § general economic conditions.

In addition, the Company's competitors or customers may offer enhancements to their existing products or offer new products based on new technologies, industry standards or customer requirements that have the potential to replace or provide lower-cost or higher performance alternatives to the Company's products. The introduction of enhancements or new products by the Company's competitors could render its existing and future products obsolete or unmarketable.

Many of the Company's competitors have significantly greater financial and other resources. In certain circumstances, the Company's customers or potential customers have internal manufacturing capabilities with which the Company may compete.

If The Industries Into Which The Company Sells Its Products Experience Recession Or Other Cyclical Effects Impacting The Budgets Of Its Customers, The Company's Operating Results Could Be Negatively Impacted.

The primary customers for the Company's coaxial connectors are in the connector and communications industries. Any significant downturn in the Company's customers' markets, in particular, or in general economic conditions that result in the cut back of budgets would likely result in a reduction in demand for the Company's products and services and could harm the Company's business. Historically, the communications industry has been cyclical, affected by both economic conditions and industry-specific cycles. Depressed general economic conditions and cyclical downturns in the communications industry have each had an adverse effect on sales of communications equipment, OEMs and their suppliers, including the Company. No assurance can be given that the connector industry will not experience a material downturn in the near future. Any cyclical downturn in the connector and/or communications industry could have a material adverse effect on the Company.

The Company May Make Future Acquisitions That Will Involve Numerous Risks.

Since August 2004, the Company has purchased the operations of two smaller businesses (Aviel Electronics in Las Vegas, Nevada, August 2004, and Worswick Industries, Inc. in San Diego, California, September 2005). The Company periodically may make acquisitions of other companies that could expand the Company's product line or customer base. The risks involved with both the recent acquisitions and with any possible future acquisitions include:

- § diversion of management's attention;
- § the affect on the Company's financial statements of the amortization of acquired intangible assets;
- § the cost associated with acquisitions and the integration of acquired operations; and
- § the assumption of unknown liabilities, or other unanticipated events or circumstances.

Any of these risks could materially harm the Company's business, financial condition and results of operations. There can be no assurance that any business that the Company acquires will achieve anticipated revenues or operating results.

International Sales And Operations

Sales to customers located outside the United States, either directly or through U.S. and foreign distributors, accounted for approximately 11% and 10 % of net sales during the three and nine months ended July 31, 2006, and approximately 12% and 11 % for the comparable periods in 2005. The increase in foreign sales for the nine months ended July 31, 2006 is \$76,128. International revenues are subject to a number of risks, including:

- § longer accounts receivable payment cycles;
- § difficulty in enforcing agreements and in collecting accounts receivable;
- § tariffs and other restrictions on foreign trade;
- § economic and political instability; and
- § the burdens of complying with a wide variety of foreign laws.

The Company's foreign sales are also affected by general economic conditions in its international markets. A prolonged economic downturn in its foreign markets could have a material adverse effect on the Company's business. There can be no assurance that the factors described above will not have an adverse material effect on the Company's future international revenues and, consequently, on the financial condition, results of operations and business of the Company.

Since sales made to foreign customers or foreign distributors have historically been in U.S. dollars, the Company has not been exposed to the risks of foreign currency fluctuations. However, if the Company in the future is required to accept sales denominated in the currencies of the countries where sales are made, the Company thereafter may also be exposed to currency fluctuation risks.

Changes In Stock Option Accounting Rules May Adversely Affect Our Reported Operating Results, Our Stock Price, And Our Ability To Attract And Retain Employees

In the first quarter of the fiscal year ending October 31, 2007 the Company will be required, under the new rules of the Financial Accounting Standards Board, to adopt SFAS No. 123(R), "Share-Based Payment" to record all stock-based employee compensation as an expense. The new rules apply to stock option grants, as well as a wide range of other share-based compensation arrangements. As a small company with limited financial resources, the Company has depended upon compensating its officers, directors, and employees with such stock based compensation awards in the past in order to limit its cash expenditures and to attract and retain officers, directors, and employees. Accordingly, if the Company continues to grant stock options or other stock-based compensation awards to its officers, directors, and employees, its future earnings, if any, will be reduced (or our future losses will be increased) by the expenses recorded for those grants. Since the Company is a small company, the expenses it may have to record as a result of future options grants may be significant and may materially negatively affect its reported financial results. The adverse effects that the new accounting rules may have on the Company's future financial statements, should it continue to rely heavily on stock-based compensation, may reduce the Company's stock price and make it more difficult for it to attract new investors.

The Company Has No Exclusive Intellectual Property Rights In The Technology Employed In Its Products, Which May Limit the Company's Ability To Compete.

The Company does not hold any United States or foreign patents and does not have any patents pending. In addition, the Company does not have any other exclusive intellectual property rights in the technology employed in its

products. The Company does not actively seek to protect its rights in the technology that it develops or that the Company's third-party contract manufacturers develop. In addition, these parties share the technologies with other parties, including some of the Company's competitors. Accordingly, competitors can and do sell the same products as the Company, and the Company cannot prevent or restrict such competition.

Volatility of Stock Trading Prices

In the past several years the market price of the Company's common stock has varied greatly, and the volume of the Company's common stock traded has fluctuated greatly as well. These fluctuations often occur independently of the Company's performance or any announcements by the Company. Factors that may result in such fluctuations include:

§ any shortfall in revenues or net income from revenues or net income expected by securities analysts

§ fluctuations in the Company's financial results or the results of other connector and communications-related companies, including those of the Company's direct competitors

§ changes in analysts' estimates of the Company's financial performance, the financial performance of the Company's competitors, or the financial performance of connector and communications-related public companies in general

§ general conditions in the connector and communications industries

§ changes in the Company's revenue growth rates or the growth rates of the Company's competitors

§ sales of large blocks of the Company's common stock

§ conditions in the financial markets in general

In addition, the stock market may from time to time experience extreme price and volume fluctuations, which may be unrelated to the operating performance of any specific company. Accordingly, the market prices of the Company's common stock may be expected to experience significant fluctuations in the future.

Item 3. Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to this company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by Securities and Exchange Commission Rule 13a-15(b), we carried out an evaluation, under the supervision and with the participation of the Company's management, including our Chief Executive Officer and the Company's Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the quarter covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in ensuring that the information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

During the quarter ended July 31, 2006, the Company has continued actions to improve the Company's internal controls over financial reporting, including the following:

- Contracted with a 3rd party CPA firm for an internal review of the financial statements and consultation on other accounting and reporting matters.
- Implemented additional review and continued enhancement of internal control policies and procedures.

Item 4. Submission of Matters to a Vote of Security Holders

On June 9, 2006, we held the annual meeting of our shareholders. At the meeting, the holders of our outstanding common stock acted on the following matters:

A. Total shares voted.....2,519,199

- (1) The shareholders voted for six directors, each to serve for a term of one year and until his successor is elected. Each nominee received the following votes:

(1) Name of Nominee	Votes For	Votes Withheld
John R. Ehret	2,499,973	19,226
Marvin H. Fink	2,499,973	19,226
Howard F. Hill	2,352,011	167,188
Robert Jacobs	2,499,973	19,226
Linde Kester	2,499,873	19,326
William L. Reynolds	2,499,813	19,386

(2) Amendment of 2000 Stock Option Plan

For	Against	Abstain	Not Voted
294,641	285,591	14,223	1,924,744

- (3) To ratify the selection of J.H. Cohn LLP as the Company's independent registered public accounting firm for the fiscal year ending October 31, 2006. Votes cast were as follows:

For	Against	Abstain
2,504,281	6,171	8,747

Part II.
