Form 10-Q
July 20, 2012

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended **June 30, 2012**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

COMMISSION FILE NUMBER: 000-19271

IDEXX LABORATORIES, INC.

(Exact name of registrant as specified in its charter)

DELAWARE 01-0393723
(State or other jurisdiction of incorporation (IRS Employer Identification No.)
or organization)

ONE IDEXX DRIVE, WESTBROOK, MAINE 04092
(Address of principal executive offices) (ZIP Code)

207-556-0300

(Registrant's telephone number, including area code)

Edgar Filing: IDEXX LABORATORIES INC /DE - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date. The number of shares outstanding of the registrant’s Common Stock, \$0.10 par value, was 56,866,885 on July 10, 2012.

IDEXX LABORATORIES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Basis of Presentation and principles of consolidation

The accompanying condensed consolidated financial statements of IDEXX Laboratories, Inc. (“IDEXX,” the “Company,” “we” or “our”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information and with the requirements of Regulation S-X, Rule 10-01 for financial statements required to be filed as a part of Form 10-Q.

The accompanying condensed consolidated financial statements include the accounts of IDEXX Laboratories, Inc. and our wholly-owned and majority-owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

The accompanying condensed consolidated financial statements reflect, in the opinion of our management, all adjustments necessary for a fair statement of our financial position and results of operations. All such adjustments are of a recurring nature. The consolidated balance sheet data at December 31, 2011 was derived from audited financial statements, but does not include all disclosures required by U.S. GAAP. The results of operations for the three and six months ended June 30, 2012 are not necessarily indicative of the results to be expected for the full year or any future period. These condensed consolidated financial statements should be read in conjunction with this Quarterly Report on Form 10-Q for the quarter ended June 30, 2012 and our Annual Report on Form 10-K for the year ended December 31, 2011 filed with the Securities and Exchange Commission.

Note 2. ACCOUNTING POLICIES

Significant Accounting Policies

The significant accounting policies used in preparation of these condensed consolidated financial statements for the six months ended June 30, 2012 are consistent with those discussed in Note 2 to the consolidated financial statements

in our Annual Report on Form 10-K for the year ended December 31, 2011, except for our significant accounting policies related to revenue recognition. Effective January 1, 2012, revenue from substantially all U.S. distributors is recognized upon delivery to the distributor because title and risk of loss remains with IDEXX until the product is delivered. Prior to January 1, 2012, we recognized revenue at the time of shipment to U.S. distributors because title and risk of loss passed to the distributors on delivery to the common carrier. This change did not have a material impact on our financial statements.

New Accounting Pronouncements Adopted

In September 2011, the Financial Accounting Standards Board (“FASB”) issued an amendment to the accounting guidance for goodwill in order to simplify how companies test goodwill for impairment. The amendment permits an entity to first assess the qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. The amendment is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this accounting pronouncement did not have a material impact on our financial statements and we do not expect it to have a material impact on our annual goodwill impairment assessment in the fourth quarter.

In June 2011, the FASB issued an amendment to the accounting guidance for presentation of comprehensive income. Under the amended guidance, an entity may present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In either case, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. For public companies, the amendment is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, and shall be applied retrospectively. Other than a change in presentation, the implementation of this accounting pronouncement did not have a material impact on our financial statements.

In May 2011, the FASB issued an amendment to the accounting guidance for fair value measurement and disclosure. Among other things, the guidance expands the disclosure requirements around fair value measurements categorized in Level 3 of the fair value hierarchy and requires disclosure of the level in the fair value hierarchy of items that are not measured at fair value in the statement of financial position but whose fair value must be disclosed. It also clarifies and expands upon existing requirements for measurement of the fair value of financial assets and liabilities as well as instruments classified in shareholders' equity. The guidance is effective for interim and annual periods beginning after December 15, 2011. The adoption of this accounting pronouncement did not have a material impact on our financial statements.

New Accounting Pronouncements Not Yet Adopted

In December 2011, the FASB issued an amendment to the accounting guidance for disclosure of offsetting assets and liabilities and related arrangements. The amendment expands the disclosure requirements in that entities will be required to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. The amendment is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2013, and shall be applied retrospectively. We do not expect the adoption of this accounting pronouncement to have a material impact on our financial statements.

NOTE 3. SHARE-BASED COMPENSATION

The fair value of options, restricted stock units, deferred stock units and employee stock purchase rights awarded during the three and six months ended June 30, 2012 totaled \$1.1 million and \$16.8 million, respectively, compared to \$2.4 million and \$23.6 million for the three and six months ended June 30, 2011, respectively.

The total unrecognized compensation expense, net of estimated forfeitures, for unvested share-based compensation awards outstanding at June 30, 2012 was \$38.8 million, which will be recognized over a weighted average period of approximately 2.0 years.

We determine the assumptions used in the valuation of option awards as of the date of grant. Differences in the stock price volatility, expected term or risk-free interest rate may necessitate distinct valuation assumptions at each grant date. As such, we may use different assumptions for options granted throughout the year. Option awards are granted with an exercise price equal to the closing market price of our common stock at the date of grant. We have never paid any cash dividends on our common stock and we have no present intention to pay a dividend; therefore, we assume that no dividends will be paid over the expected terms of option awards. The weighted averages of the valuation assumptions used to determine the fair value of each option award on the date of grant and the weighted average

estimated fair values were as follows:

	For the Six Months Ended June 30,			
	2012		2011	
Expected stock price volatility	34	%	33	%
Expected term, in years	4.6		4.8	
Risk-free interest rate	0.8	%	2.3	%
Weighted average fair value of options granted	\$26.32		\$24.87	

Note 4. Inventories

Inventories include material, labor and overhead, and are stated at the lower of cost (first-in, first-out) or market. The components of inventories were as follows (*in thousands*):

	June 30, 2012	December 31, 2011
Raw materials	\$30,385	\$28,338
Work-in-process	15,402	14,892
Finished goods	97,916	89,869
	\$143,703	\$133,099

Note 5. Goodwill and Intangible Assets, NET

The decrease in goodwill during the six months ended June 30, 2012 resulted from changes in foreign currency exchange rates. The decrease in intangible assets other than goodwill during the six months ended June 30, 2012 resulted from the continued amortization of our intangible assets and, to a lesser extent, changes in foreign currency exchange rates. This decrease was partly offset by the acquisition of a product right during the six months ended June 30, 2012.

NOTE 6. Other NONCURRENT ASSETS

Other noncurrent assets consisted of the following (*in thousands*):

	June 30, 2012	December 31, 2011
Investment in long-term product supply arrangements	\$11,849	\$ 12,091
Customer acquisition costs, net	23,897	21,075
Other assets	20,128	14,825
	\$55,874	\$ 47,991

Note 7. Accrued liabilities

Accrued liabilities consisted of the following (*in thousands*):

	June 30, 2012	December 31, 2011
Accrued expenses	\$36,692	\$40,472
Accrued employee compensation and related expenses	40,270	51,373
Accrued taxes	20,019	17,654
Accrued customer programs	31,497	31,884
	\$128,478	\$ 141,383

Note 8. Warranty Reserves

We provide a standard twelve month warranty on all instruments sold. We recognize the cost of instrument warranties in cost of product revenue at the time revenue is recognized based on the estimated cost to repair the instrument over its warranty period. Cost of product revenue reflects not only estimated warranty expense for instruments sold in the current period, but also any changes in estimated warranty expense for the portion of the aggregate installed base that is under warranty. Estimated warranty expense is based on a variety of inputs, including historical instrument performance in the customers' environment, historical costs incurred in servicing instruments and projected instrument reliability and service costs. Should actual service rates or costs differ from our estimates, revisions to the estimated warranty liability would be required. The liability for warranties is included in accrued liabilities in the accompanying condensed consolidated balance sheets.

The following is a summary of changes in accrued warranty reserves for the three and six months ended June 30, 2012 and 2011 (*in thousands*):

	For the Three Months Ended June 30, 2012		For the Six Months Ended June 30, 2011	
Balance, beginning of period	\$1,573	\$1,763	\$1,693	\$2,196
Provision for warranty expense	576	711	1,112	1,233
Change in estimate, balance beginning of period	(37)	(146)	(99)	(237)
Settlement of warranty liability	(613)	(653)	(1,207)	(1,517)
Balance, end of period	\$1,499	\$1,675	\$1,499	\$1,675

Note 9. Repurchases of common STOCK

The following is a summary of our open market common stock repurchases for the three and six months ended June 30, 2012 and 2011 (*in thousands, except per share amounts*):

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2012	2011	2012	2011
Shares repurchased	319	759	652	1,297
Total cost of shares repurchased	\$27,376	\$58,479	\$55,006	\$98,419
Average cost per share	\$85.84	\$77.08	\$84.32	\$75.89

We primarily acquire shares by means of repurchases in the open market. However, we also acquire shares that are surrendered by employees in payment for the minimum required withholding taxes due on the vesting of restricted stock units and the settlement of deferred stock units. The number of shares acquired through employee surrenders during both the three months ended June 30, 2012 and 2011 was not material. We acquired 50,172 shares at a total cost of \$4.4 million in connection with such employee surrenders during the six months ended June 30, 2012 compared to 53,015 shares at a total cost of \$4.1 million during the six months ended June 30, 2011.

We issue shares of treasury stock upon the vesting of certain restricted stock units and upon the exercise of certain stock options. The number of shares of treasury stock issued during both the six months ended June 30, 2012 and 2011 was not material.

Note 10. Income Taxes

Our effective income tax rates were 31.9% and 31.8% for the three and six months ended June 30, 2012 compared to 31.4% and 31.3% for the three and six months ended June 30, 2011. The increase in our effective income tax rate was due primarily to federal research and development tax incentives that were not available during the three and six months ended June 30, 2012 but were available during the same periods of the prior year, partly offset by a decrease in the effective income tax rates in international jurisdictions in which we operate.

Note 11. ACCUMULATED OTHER Comprehensive Income

Accumulated other comprehensive income consisted of the following (*in thousands*):

	For the Six Months Ended June 30, 2012		
	Unrealized loss on investments, net of tax	Unrealized gain on derivative instruments, net of tax	Cumulative translation adjustment
Beginning balance	\$(287)	\$ 3,206	\$ 12,524
Current-period other comprehensive income (loss)	55	(1,967)	(4,673)
Ending balance	\$(232)	\$ 1,239	\$ 7,851

Note 12. Earnings per Share

Basic earnings per share is computed by dividing net income attributable to IDEXX Laboratories, Inc. stockholders by the weighted average number of shares of common stock and vested deferred stock units outstanding during the year. Vested deferred stock units outstanding are included in shares outstanding for basic and diluted earnings per share because the associated shares of our common stock are issuable for no cash consideration, the number of shares of our common stock to be issued is fixed and issuance is not contingent. See Note 4 to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2011 for additional information regarding deferred stock units. The computation of diluted earnings per share is similar to the computation of basic earnings per share, except that the denominator is increased for the assumed exercise of dilutive options and assumed issuance of unvested restricted stock units and unvested deferred stock units using the treasury stock method unless the effect is anti-dilutive.

The following is a reconciliation of shares outstanding for basic and diluted earnings per share for the three and six months ended June 30, 2012 and 2011 (*in thousands*):

	For the Three Months Ended June 30, 2012		For the Six Months Ended June 30, 2011	
Shares outstanding for basic earnings per share	55,079	57,276	55,143	57,366
Shares outstanding for diluted earnings per share:				
Shares outstanding for basic earnings per share	55,079	57,276	55,143	57,366
Dilutive effect of share-based payment awards	1,132	1,451	1,202	1,568
	56,211	58,727	56,345	58,934

Certain options to acquire shares have been excluded from the calculation of shares outstanding for diluted earnings per share because they were anti-dilutive. The following table presents information concerning those anti-dilutive options for the three and six months ended June 30, 2012 and 2011 (*in thousands*):

	For the Three Months Ended June 30, 2012		For the Six Months Ended June 30, 2011	
Weighted average number of shares underlying anti-dilutive options	757	617	689	513

Note 13. Commitments, Contingencies and Guarantees

As discussed in our Annual Report on Form 10-K for the year ended December 31, 2011, in January 2010, we received a letter from the U.S. Federal Trade Commission (“FTC”), stating that it was conducting an investigation to determine whether IDEXX or others have engaged in, or are engaging in, unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act (“FTC Act”), through pricing or marketing policies for companion animal veterinary products and services, including but not limited to exclusive dealing or tying arrangements with distributors or end-users of those products or services. The letter requested that we preserve all materials potentially relevant to this investigation. The letter stated that the FTC had not concluded that IDEXX or anyone else had violated Section 5 of the FTC Act. We received subpoenas from the FTC, on April 15, 2010 and August 8, 2011, requesting that we provide the FTC with documents and information relevant to this investigation and we have cooperated fully with the FTC in its investigation.

We now understand that the FTC staff is focused in particular on whether our relationships with the three largest U.S. distributors of companion animal products, referred to as the national distributors, limit access by our competitors to companion animal veterinary practices. If the FTC determines to file a complaint against IDEXX in the administrative law court within the FTC, it would have the power to seek prospective remedies but not financial penalties.

Based on discussion with the FTC staff, we believe that their concerns could be addressed if one of these three national distributors was free to carry competitive products. In response to these concerns, we have determined to seek to modify our agreement with one of these distributors to eliminate our competitive products policy, which permits us to discontinue sale of our products in a particular product category to the distributor if the distributor sells competitive products in that product category. Under such a modified agreement, the distributor would be able to carry any competitive products without restriction or potential negative consequence, thereby addressing the FTC's concerns as we understand them. While we cannot predict when such a modified agreement would go into effect, since our distributor agreements renew annually as of January 1 of each year, we expect that a modified agreement with one of these distributors would be effective no later than January 1, 2013. While we cannot ensure that a distributor will enter into a modified agreement with us, we believe that a distributor who is released from the competitive products policy will wish to maintain access to our product lines under a modified agreement.

Under a modified agreement, the distributor would receive less compensation on sales of our products as we would no longer receive the benefits of the distributor's exclusive focus on our products. We expect to reinvest savings from this lower rate of compensation in other sales and marketing resources and the selling efforts of our other distributors. We believe that the reallocation of these sales resources will help mitigate the potential effects of the loss of exclusive focus of the national distributor with which we enter into a modified agreement.

We believe that the FTC has put on hold its internal process to determine whether to file a complaint against IDEXX in the administrative law court within the FTC in order to permit us to conduct the process described above. Following execution of a modified agreement that addresses the FTC's concerns as we understand them, we anticipate the FTC will seek to formalize the modified agreement in the form of a consent order. However, we cannot provide any assurances that the FTC will be satisfied with the steps we take to eliminate any restrictions on the ability of one of the national distributors to sell competitive products.

We also cannot provide any assurances that the FTC will not determine to litigate against IDEXX at some point in the future or whether we would be successful defending ourselves in such a proceeding. Were the FTC to choose to bring an enforcement proceeding, we would defend ourselves vigorously. Were we to be unsuccessful in defending this proceeding and any applicable appeals, we could be subject to restrictions on certain of our marketing and sales practices, including on the terms included in our agreements with certain of our U.S. distributors. While we cannot be certain about what prospective remedies would be sought by the FTC in any such proceeding, we believe that any required changes in our marketing or sales practices would not have a material adverse effect on our financial statements.

We continue to believe that our marketing and sales practices for companion animal veterinary products and services do not violate applicable antitrust laws. We are choosing to attempt to make the modification described above because we believe it will help us avoid long and costly litigation, and that our business will not be materially adversely affected.

Other significant commitments, contingencies and guarantees at June 30, 2012 are consistent with those discussed in Note 14 to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2011.

Note 14. Segment Reporting

We operate primarily through three business segments: diagnostic and information technology-based products and services for the veterinary market, which we refer to as the Companion Animal Group ("CAG"), water quality products ("Water") and products for livestock and poultry health, which we refer to as Livestock and Poultry Diagnostics ("LPD"). We also operate two smaller operating segments that comprise products for milk quality and safety ("Dairy") and products for the human point-of-care medical diagnostics market ("OPTI Medical"). Financial information about our Dairy and OPTI Medical operating segments is combined and presented with one of our remaining pharmaceutical product lines and our out-licensing arrangements in an "Other" category because they do not meet the quantitative or qualitative thresholds for reportable segments.

Edgar Filing: IDEXX LABORATORIES INC /DE - Form 10-Q

The following is a summary of segment performance for the three and six months ended June 30, 2012 and 2011 (*in thousands*):

	For the Three Months Ended June 30,				Unallocated Amounts	Consolidated Total
	CAG	Water	LPD	Other		
2012						
Revenue	\$278,294	\$21,983	\$23,060	\$12,312	\$ -	\$ 335,649
Income (loss) from operations	\$59,768	\$10,196	\$5,810	\$250	\$ (207) \$ 75,817
Interest expense, net						(446)
Income before provision for income taxes						75,371
Provision for income taxes						24,051
Net income						51,320
Less: Net income attributable to noncontrolling interest						3
Net income attributable to IDEXX Laboratories, Inc. stockholders						\$ 51,317
2011						
Revenue	\$259,734	\$21,510	\$25,367	\$11,251	\$ -	\$ 317,862
Income (loss) from operations	\$58,270	\$8,401	\$7,176	\$309	\$ (2,858) \$ 71,298
Interest expense, net						(363)
Income before provision for income taxes						70,935
Provision for income taxes						22,281
Net income						48,654
Less: Net loss attributable to noncontrolling interest						(3)
Net income attributable to IDEXX Laboratories, Inc. stockholders						\$ 48,657

Edgar Filing: IDEXX LABORATORIES INC /DE - Form 10-Q

	For the Six Months Ended June 30,				Unallocated Amounts	Consolidated Total
	CAG	Water	LPD	Other		
2012						
Revenue	\$546,367	\$41,565	\$45,242	\$25,151	\$ -	\$ 658,325
Income (loss) from operations	\$106,686	\$18,491	\$11,076	\$788	\$ (817)	\$ 136,224

Water segment revenue	21,983	21,510	41,565	40,475
LPD segment revenue	23,060	25,367	45,242	49,306

Other segment revenue	12,312	11,251	25,151	20,430
Total revenue	\$335,649	\$317,862	\$658,325	\$610,534

Note 15. FAIR VALUE MEASUREMENTS

U.S. GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP requires an entity to maximize the use of observable inputs, where available, and minimize the use of unobservable inputs when measuring fair value.

The Company has certain financial assets and liabilities that are measured at fair value on a recurring basis, certain nonfinancial assets and liabilities that may be measured at fair value on a nonrecurring basis and certain financial assets and liabilities that are not measured at fair value in our condensed consolidated balance sheets but for which we disclose the fair value. The fair value disclosures of these assets and liabilities are based on a three-level hierarchy, which is defined as follows:

Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Assets and liabilities measured at fair value are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability. We did not have any significant nonfinancial assets or nonfinancial liabilities which required remeasurement during the six months ended June 30, 2012. We did not have any transfers between Level 1 and Level 2 or transfers in or out of Level 3 of the fair value hierarchy during the six months ended June 30, 2012.

Our foreign currency exchange contracts and interest rate swap agreements are measured at fair value on a recurring basis in our accompanying condensed consolidated balance sheets. We measure the fair value of our foreign currency exchange contracts classified as derivative instruments using an income approach, based on prevailing market forward rates less the contract rate multiplied by the notional amount. The product of this calculation is then adjusted for counterparty risk. We measure the fair value of our interest rate swaps classified as derivative instruments using an income approach, utilizing a discounted cash flow analysis based on the terms of the contract and the interest rate curve adjusted for counterparty risk.

The amount outstanding under our unsecured revolving credit facility (“Credit Facility”), notes receivable and long-term debt are not measured at fair value in our accompanying condensed consolidated balance sheets. We determine the fair value of the amount outstanding under our Credit Facility, notes receivable and long-term debt using an income approach, utilizing a discounted cash flow analysis based on current market interest rates for debt issues with similar remaining years to maturity, adjusted for applicable credit risk. Our Credit Facility and long-term debt are valued using level 2 inputs, while our notes receivable, representing a strategic investment in a privately held company with a carrying value of \$4.4 million as of June 30, 2012, is valued using level 3 inputs. The results of these calculations yield fair values that approximate carrying values.

Edgar Filing: IDEXX LABORATORIES INC /DE - Form 10-Q

The following tables set forth our assets and liabilities that were measured at fair value on a recurring basis at June 30, 2012 and at December 31, 2011 by level within the fair value hierarchy (*in thousands*):

As of June 30, 2012	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at June 30, 2012
Assets				
Money market funds ⁽¹⁾	\$ 127,285	\$ -	\$ -	\$ 127,285
Equity mutual funds ⁽²⁾	2,155	-	-	2,155
Foreign currency exchange contracts ⁽³⁾	-	5,640	-	5,640
Liabilities				
Foreign currency exchange contracts ⁽³⁾	-	1,227	-	1,227
Deferred compensation ⁽⁴⁾	2,155	-	-	2,155
Interest rate swaps ⁽⁵⁾	-	2,275	-	2,275

As of December 31, 2011	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at December 31, 2011
Assets				
Money market funds ⁽¹⁾	\$ 88,525	\$ -	\$ -	\$ 88,525
Equity mutual funds ⁽²⁾	2,056	-	-	2,056
Foreign currency exchange contracts ⁽³⁾	-	6,841	-	6,841
Liabilities				
Foreign currency exchange contracts ⁽³⁾	-	1,753	-	1,753
Deferred compensation ⁽⁴⁾	2,056	-	-	2,056
Interest rate swaps ⁽⁵⁾	-	1,417	-	1,417

(1) Money market funds are included within cash and cash equivalents. The remaining balance of cash and cash equivalents as of June 30, 2012 and December 31, 2011 consisted of demand deposits.

(2) Equity mutual funds relate to a deferred compensation plan that was assumed as part of a previous business combination. This amount is included within other long-term assets, net. See number (4) below for a discussion of the related deferred compensation liability.

(3) Foreign currency exchange contracts are included within other current assets; other long-term assets, net; accrued liabilities; or other long-term liabilities depending on the gain (loss) position and anticipated settlement date.

(4) Deferred compensation plans are included within other long-term liabilities. The fair value of our deferred compensation plan is indexed to the performance of the underlying equity mutual funds discussed in number (2) above.

(5) Interest rate swaps are included within accrued liabilities.

The estimated fair value of certain financial instruments, including cash and cash equivalents, accounts receivable and accounts payable, approximate carrying value due to their short maturity.

Note 16. Derivative Instruments and Hedging

Disclosure within this footnote is presented to provide transparency about how and why we use derivative instruments, how the instruments and related hedged items are accounted for, and how the instruments and related hedged items affect our financial position, results of operations and cash flows.

We are exposed to certain risks related to our ongoing business operations. The primary risks that we manage by using derivative instruments are foreign currency exchange risk and interest rate risk. Our subsidiaries enter into foreign currency exchange contracts to manage the exchange risk associated with their forecasted intercompany inventory purchases and sales for the next year. From time to time, we may also enter into foreign currency exchange contracts to minimize the impact of foreign currency fluctuations associated with specific, significant transactions. We enter into interest rate swaps to minimize the impact of interest rate fluctuations associated with our variable-rate debt.

The primary purpose of our foreign currency hedging activities is to protect against the volatility associated with foreign currency transactions. We also utilize natural hedges to mitigate our transaction and commitment exposures. Our corporate policy prescribes the range of allowable hedging activity. We enter into foreign currency exchange contracts with large multinational financial institutions and we do not hold or engage in transactions involving derivative instruments for purposes other than risk management.

We recognize all derivative instruments, including our foreign currency exchange contracts and interest rate swap agreements, on the balance sheet at fair value at the balance sheet date. Derivative instruments that do not qualify for hedge accounting treatment must be recorded at fair value through earnings. If a derivative instrument does qualify for hedge accounting, depending on the nature of the hedging instrument, changes in the fair value of derivative instrument are either recognized in earnings or deferred in other comprehensive income (“OCI”), net of tax, and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. To qualify for hedge accounting treatment, cash flow hedges must be highly effective in offsetting changes to expected future cash flows on hedged transactions. We immediately record in earnings the extent to which a hedge instrument is not effective in achieving offsetting changes in fair value. We de-designate derivative instruments from hedge accounting when the likelihood of the hedged transaction occurring becomes less than probable. For de-designated instruments, the gain or loss from the time of de-designation through maturity of the instrument is recognized in earnings. Any gain or loss in OCI at the time of de-designation is reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. We enter into master netting arrangements with the counterparties to our derivative transactions which permit outstanding receivables and payables with the counterparties to our derivative transactions to be offset in the event of default. We present our derivative assets and liabilities on a gross basis. All cash flows related to our foreign currency exchange contracts and interest rate swaps are classified as operating cash flows, which is consistent with the cash flow treatment of the underlying items being hedged.

Cash Flow Hedges

We have designated our foreign currency exchange contracts and variable-to-fixed interest rate swaps as cash flow hedges as these derivative instruments mitigate the exposure to variability in the cash flows of forecasted transactions attributable to foreign currency exchange and interest rates. Unless noted otherwise, we have also designated our derivative instruments as qualifying for hedge accounting treatment.

We did not de-designate any instruments from hedge accounting treatment during the three and six months ended June 30, 2012 or 2011. Gains or losses related to hedge ineffectiveness recognized in earnings during the three and six months ended June 30, 2012 and 2011 were not material. At June 30, 2012, the estimated amount of net gains that are expected to be reclassified out of accumulated OCI and into earnings within the next 12 months is \$1.2 million if exchange and interest rates do not fluctuate from the levels at June 30, 2012.

We enter into foreign currency exchange contracts for amounts that are less than the full value of forecasted intercompany inventory purchases and sales. Our hedging strategy related to intercompany inventory purchases and sales is to employ the full amount of our hedges for the succeeding year at the conclusion of our budgeting process for that year, which is complete by the end of the preceding year. We primarily utilize foreign currency exchange contracts with durations of less than 24 months. Quarterly, we enter into contracts to hedge incremental portions of anticipated foreign currency transactions for the current and following year. As a result, our risk with respect to foreign currency exchange rate fluctuations and the notional value of foreign currency exchange contracts may vary throughout the year.

We have entered into forward fixed interest rate swap agreements to manage the economic effect of variable interest obligations on amounts borrowed under the terms of our Credit Facility. Beginning on March 30, 2012, the variable interest rate associated with \$40 million of borrowings outstanding under the Credit Facility became effectively fixed at 1.36% plus the range of applicable interest rates ("Credit Spread") through June 30, 2016. Beginning on March 28, 2013, the variable interest rate associated with an additional \$40 million of borrowings outstanding under the Credit Facility will become effectively fixed at 1.64% plus the Credit Spread through June 30, 2016. Also on March 30, 2012, two of our forward fixed interest rate swap agreements expired. Under these agreements, the variable interest rate associated with \$80 million of borrowings outstanding under the Credit Facility had been effectively fixed at 2% plus the Credit Spread above the London interbank rate.

The notional amount of foreign currency exchange contracts to hedge forecasted intercompany inventory purchases and sales consisted of the following (*in thousands*):

Currency Sold

	U.S. Dollar Equivalent	
	June 30, 2012	December 31, 2011
Euro	\$63,358	\$68,275
British pound	24,433	25,260
Canadian dollar	20,482	19,902
Australian dollar	12,359	12,417
Japanese yen	17,634	18,005
	\$138,266	\$143,859

Currency Purchased	U.S. Dollar Equivalent	
	June 30, 2012	December 31, 2011
Swiss franc	\$14,648	\$17,909

The notional amount of forward fixed interest rate swap agreements to manage variable interest obligations consisted of the following (*in thousands*):

	U.S. Dollar Equivalent	
	June 30, 2012	December 31, 2011
Interest rate swaps commencing March 31, 2010 and expiring March 30, 2012	\$-	\$80,000
Interest rate swap commencing March 30, 2012 and expiring June 30, 2016	\$40,000	\$40,000
Interest rate swap commencing March 28, 2013 and expiring June 30, 2016	\$40,000	\$40,000

The fair values of derivative instruments and their respective classification in the condensed consolidated balance sheet consisted of the following (*in thousands*):

		Asset Derivatives	
		June	December 31, 2011
		30,	2012
Derivatives designated as hedging instruments	Balance Sheet Classification		
Foreign currency exchange contracts	Other current assets	\$4,855	\$ 6,841
Foreign currency exchange contracts	Other long-term assets, net	785	-
Total derivative instruments		\$5,640	\$ 6,841

		Liability Derivatives	
		June	December 31, 2011
		30,	2012
Derivatives designated as hedging instruments	Balance Sheet Classification		
Foreign currency exchange contracts	Accrued expenses	\$1,056	\$ 1,753
Foreign currency exchange contracts	Other long-term liabilities	171	-
Interest rate swaps	Accrued expenses	2,275	1,417
Total derivative instruments		\$3,502	\$ 3,170

The effect of derivative instruments designated as cash flow hedges on the condensed consolidated balance sheet for the three and six months ended June 30, 2012 and 2011 consisted of the following (*in thousands*):

	Gain (Loss) Recognized in OCI on Derivative Instruments (Effective Portion)			
	For the Three		For the Six	
	Months Ended		Months Ended	
	June 30,	June 30,	June 30,	June 30,
Derivative instruments	2012	2011	2012	2011
Foreign currency exchange contracts, net of tax	\$383	\$1,276	\$(1,428)	\$(976)
Interest rate swaps, net of tax	(649)	177	(539)	353
Total derivative instruments, net of tax	\$(266)	\$1,453	\$(1,967)	\$(623)

The effect of derivative instruments designated as cash flow hedges on the condensed consolidated statement of operations for the three and six months ended June 30, 2012 and 2011 consisted of the following (*in thousands*):

	Classification of Gain (Loss) Reclassified from OCI into Income (Effective Portion)	Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)			
		For the Three Months Ended June 30, 2012		For the Six Months Ended June 30, 2011	
Derivative instruments					
Foreign currency exchange contracts	Cost of revenue	\$ 2,337	\$ (2,286)	\$ 3,823	\$ (3,577)
Interest rate swaps	Interest expense	(112)	(358)	(462)	(699)
Total derivative instruments		\$ 2,225	\$ (2,644)	\$ 3,361	\$ (4,276)

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Quarterly Report on Form 10-Q contains statements which, to the extent they are not statements of historical fact, constitute "forward-looking statements." Such forward-looking statements about our business and expectations within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, include statements relating to future revenue growth rates, earnings and other measures of financial performance, the effect of economic conditions on our business performance; demand for our products; realizability of assets; future cash flow and uses of cash; future repurchases of common stock; future levels of indebtedness and capital spending; interest expense; warranty expense; share-based compensation expense; and competition. Forward-looking statements can be identified by the use of words such as "expects," "may," "anticipates," "intends," "would," "will," "plans," "believes," "estimates," "should," and similar expressions. These forward-looking statements are intended to provide our current expectations or forecasts of future events; are based on current estimates, projections, beliefs, and assumptions; and are not guarantees of future performance. Actual events or results may differ materially from those described in the forward-looking statements. These forward-looking statements involve a number of risks and uncertainties as more fully described under the heading "Part II, Item 1A. Risk Factors" in this Quarterly Report on Form 10-Q. The risks and uncertainties discussed herein do not reflect the potential impact of any mergers, acquisitions or dispositions. In addition, any forward-looking statements represent our estimates only as of the day this Quarterly Report was first filed with the Securities and Exchange Commission ("SEC") and should not be relied upon as representing our estimates as of any subsequent date. From time to time, oral or written forward-looking statements may also be included in other materials released to the public. While we may elect to update forward-looking statements at some point in the future, we specifically disclaim any obligation to do so, even if our estimates or expectations change.

Business Overview and Trends

Operating segments. We operate primarily through three business segments: diagnostic and information technology-based products and services for the veterinary market, which we refer to as the Companion Animal Group (“CAG”), water quality products (“Water”) and products for livestock and poultry health, which we refer to as Livestock and Poultry Diagnostics (“LPD”). We also operate two smaller operating segments that comprise products for testing milk quality and safety (“Dairy”) and products for the human point-of-care medical diagnostics market (“OPTI Medical”). Financial information about our Dairy and OPTI Medical operating segments is combined and presented with one of our remaining pharmaceutical product lines and our out-licensing arrangements in an “Other” category because they do not meet the quantitative or qualitative thresholds for reportable segments. See Note 14 to the condensed consolidated financial statements included in this Quarterly Report on Form 10-Q for financial information about our segments and the section entitled “Description of Business by Segment” under the heading “Item 1. Business” in our Annual Report on Form 10-K for the year ended December 31, 2011 for additional description of our segments.

CAG develops, designs, manufactures and distributes products and performs services, primarily related to diagnostic and information management, for veterinarians. Water develops, designs, manufactures and distributes a range of products used in the detection of various microbiological parameters in water. LPD develops, designs, manufactures and distributes diagnostic tests and related instrumentation that are used to detect a wide range of diseases and to monitor health status in livestock and poultry. Dairy develops, designs, manufactures and distributes products to detect contaminants in milk. OPTI Medical develops, designs, manufactures and distributes point-of-care electrolyte and blood gas analyzers and related consumable products for the human medical diagnostics market. Further, OPTI Medical manufactures our VetStat[®] Electrolyte and Blood Gas Analyzer, a component of our Catalyst Dx[®] Analyzer and electrolyte consumables used with our Catalyst Dx[®] Analyzer.

Effects of Certain Factors on Results of Operations

Distributor Purchasing and Inventories. The instrument consumables and rapid assay products in our CAG segment are sold in the U.S. and certain other geographies by third party distributors, who purchase products from us and sell them to veterinary practices, which are the end users. As a result, distributor purchasing dynamics have an impact on our reported sales of these products. Distributor purchasing dynamics may be affected by many factors and may be unrelated to underlying end-user demand for our products. Consequently, reported results may reflect fluctuations in distributors’ inventories and not necessarily reflect changes in underlying end-user demand. Therefore, we believe it is important to track distributor sales to end users and to distinguish between the impact of end-user demand and the impact of distributor purchasing dynamics on reported revenue.

Where growth rates are affected by changes in end-user demand, we refer to this as the impact of practice-level sales on growth. Where growth rates are affected by distributor purchasing dynamics, we refer to this as the impact of changes in distributors’ inventories on growth. If during the current year, distributors’ inventories grew by less than

those inventories grew in the comparable period of the prior year, then changes in distributors' inventories have a negative impact on our reported sales growth in the current period. Conversely, if during the current year, distributors' inventories grew by more than those inventories grew in the comparable period of the prior year, then changes in distributors' inventories have a positive impact on our reported sales growth in the current period.

At the end of a quarter, we believe that our U.S. CAG distributors typically hold inventory equivalent to approximately four weeks of our anticipated end-user demand for instrument consumables and rapid assay products.

Currency Impact. For both the three and six months ended June 30, 2012, approximately 25% of our revenue was derived from products manufactured in the U.S. and sold internationally in local currencies compared to 26% for both the three and six months ended June 30, 2011. Strengthening of the rate of exchange for the U.S. dollar relative to other currencies has a negative impact on our revenues derived in currencies other than the U.S. dollar and on profits of products manufactured in the U.S. and sold internationally, and a weakening of the U.S. dollar has the opposite effect. Similarly, to the extent that the U.S. dollar is stronger in current or future periods relative to the exchange rates in effect in the corresponding prior periods, our growth rate will be negatively affected. The impact of foreign currency denominated operating expenses and foreign currency denominated supply contracts partly offset this exposure.

The impact on revenue resulting from changes in foreign currency exchange rates is not a measure defined by generally accepted accounting principles in the United States of America (“U.S. GAAP”), otherwise referred to herein as a non-U.S. GAAP measure. We calculate the impact on revenue resulting from changes in foreign currency exchange rates by applying the difference between the average exchange rates during the current year period and the comparable previous year period to foreign currency denominated revenues for the current year period.

During the three months ended June 30, 2012, as compared to the three months ended June 30, 2011, changes in foreign currency exchange rates decreased total company revenue by approximately \$8.2 million, due primarily to the strengthening of the U.S. dollar against the Euro and, to a lesser extent, the Canadian dollar, Australian dollar and British pound.

During the six months ended June 30, 2012, as compared to the six months ended June 30, 2011, changes in foreign currency exchange rates decreased total company revenue by approximately \$9.8 million, due primarily to the strengthening of the U.S. dollar against the Euro and, to a lesser extent, the Canadian dollar and British pound.

Effects of Economic Conditions. Demand for many of our products and services has been negatively affected by economic conditions since mid-2008. In our CAG segment, we believe that low economic growth and relatively high unemployment have led to negative or cautious consumer sentiment, which has affected the number of patient visits with their respective owners to veterinary clinics. Based on data provided by a subset of our U.S. customers that use our practice management systems, we observed a slight improvement in the growth of patient visits in the fourth quarter of 2011 and in the first and second quarters of 2012 over the previous year periods, although the rate of improvement has not been steady. We believe that this data, though limited, provides a fair and meaningful representation of patient visit activity in the U.S. that may be indicative of a gradual but inconsistent improvement in the U.S. economic environment. In contrast, economic conditions in certain European countries remain challenging, which continues to negatively impact our CAG segment in particular.

We believe that the overall trend in patient visits since the beginning of the economic downturn has had a slightly negative impact on the growth rate of sales of rapid assay tests, instrument consumables and reference laboratory diagnostic and consulting services. In addition, we believe the rate of growth of sales of our instruments and digital radiography systems, which are larger capital purchases for veterinarians, has also been affected by continued caution among veterinarians regarding economic conditions. Weaker economic conditions since mid-2008 have also caused our customers to remain sensitive to the pricing of our products and services resulting in lower growth due to limited price increases for certain products.

We also believe that current economic conditions have affected purchasing decisions of our Water and LPD business customers. Lower water testing volumes have resulted from a decline in discretionary testing and a decline in mandated testing as a result of lower home and commercial construction. Fiscal difficulties in certain European countries have also reduced government funding for some water and livestock testing programs.

We believe that the diversity of our products and services, and the geographic diversity of our markets, has partially mitigated the effects of the economic environment and negative consumer sentiment on our revenue growth rates. Looking forward, we are cautiously optimistic that the improvements we began to see in the U.S. in the fourth quarter of 2011 are reflective of a gradual improvement in the macroeconomic environment that over time will further reduce these effects.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates. We base our estimates on historical experience and on various assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The significant accounting policies used in preparation of these condensed consolidated financial statements for the three and six months ended June 30, 2012 are consistent with those discussed in Note 2 to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2011, except for our significant accounting policies related to revenue recognition. Effective January 1, 2012, revenue from substantially all U.S. distributors is recognized upon delivery to the distributor because title and risk of loss remains with IDEXX until the product is delivered. Prior to January 1, 2012, we recognized revenue at the time of shipment to U.S. distributors because title and risk of loss passed to the distributors on delivery to the common carrier. This change did not have a material impact on our financial statements. The critical accounting policies and the significant judgments and estimates used in the preparation of our condensed consolidated financial statements for the three and six months ended June 30, 2012 are consistent with those discussed in our Annual Report on Form 10-K for the year ended December 31, 2011 in the section under the heading “Part 2, Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates.”

Results of Operations

The following revenue analysis and discussion reports on organic revenue growth. Organic revenue growth should be considered in addition to, and not as a replacement for or as a superior measure to, revenues reported in accordance with U.S. GAAP, and may not be comparable to similarly titled measures reported by other companies. Management believes that reporting organic revenue growth provides useful information to investors by facilitating easier comparisons of our revenue performance with prior and future periods and to our peers. We exclude the effect of changes in foreign currency exchange rates because changes in foreign currency exchange rates are not under management’s control, are subject to volatility and can obscure underlying business trends. We exclude the effect of acquisitions because the nature, size and number of acquisitions can vary dramatically from period to period and therefore can also obscure underlying business trends.

Organic revenue growth and the percentage changes in revenue from currency and acquisitions are non-U.S. GAAP measures. See the subsection above titled “Business Overview and Trends” for a description of the calculation of the percentage change in revenue resulting from changes in foreign currency exchange rates. The percentage change in revenue resulting from acquisitions represents incremental revenues attributable to acquisitions that have occurred since the beginning of the prior year period.

Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011**Revenue**

Total Company. The following table presents revenue by operating segment:

Net Revenue <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	For the Three Months Ended June 30, 2011	Dollar Change	Percentage Change	Percentage Change from Currency	Percentage Change from Acquisitions	Organic Revenue Growth
CAG	\$278,294	\$259,734	\$18,560	7.1	% (2.5 %)	1.4	% 8.2 %
Water	21,983	21,510	473	2.2	% (2.5 %)	-	4.7 %
LPD	23,060	25,367	(2,307)	(9.1	%) (5.3 %)	-	(3.8 %)
Other	12,312	11,251	1,061	9.4	% (1.5 %)	-	10.9 %
Total Company	\$335,649	\$317,862	\$17,787	5.6	% (2.6 %)	1.1	% 7.1 %

Companion Animal Group. The following table presents revenue by product and service category for CAG:

Net Revenue <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	For the Three Months Ended June 30, 2011	Dollar Change	Percentage Change	Percentage Change from Currency	Percentage Change from Acquisitions	Organic Revenue Growth
Instruments and consumables	\$ 104,243	\$ 98,603	\$ 5,640	5.7 %	(2.8 %)	-	8.5 %
Rapid assay products	45,577	44,193	1,384	3.1 %	(1.1 %)	-	4.2 %
Reference laboratory diagnostic and consulting services	106,385	99,087	7,298	7.4 %	(3.0 %)	3.6 %	6.8 %
Practice management and digital imaging systems	22,089	17,851	4,238	23.7 %	(0.4 %)	-	24.1 %
Net CAG revenue	\$ 278,294	\$ 259,734	\$ 18,560	7.1 %	(2.5 %)	1.4 %	8.2 %

Instruments revenue was \$23.3 million and \$21.1 million for the three months ended June 30, 2012 and 2011, respectively. Consumables revenue was \$68.9 million and \$66.2 million for the three months ended June 30, 2012 and 2011, respectively. Instrument service and accessories revenue was \$11.6 million and \$11.0 million for the three months ended June 30, 2012 and 2011, respectively. The remaining sources of revenue are not significant to overall instruments and consumables revenue. Instruments revenue growth was due primarily to increased sales of our ProCyte Dx[®] and Catalyst Dx[®] instruments. Consumables revenue growth was due primarily to higher sales volumes of consumables used with our Catalyst Dx[®] instrument, partly offset by lower sales of consumables used with our VetTest[®] chemistry instrument as customers continue to upgrade from our VetTest[®] instrument to our Catalyst Dx[®] instrument. Higher sales volumes of consumables used with our ProCyte Dx[®] instrument also contributed to the increase in consumables revenue. These favorable factors were partly offset by lower sales volumes of consumables used with our LaserCyte[®] instrument. Service and accessories revenue growth was primarily a result of the increase in our active installed base of instruments. The impact of changes in distributors' inventory levels reduced instruments and consumables revenue growth by 2%.

The increase in rapid assay revenue was due primarily to higher average unit sales prices of our canine combination test products, partly offset by the unfavorable impact of changes in distributors' inventory levels, which reduced revenue growth by 1%.

The increase in reference laboratory diagnostic and consulting services revenue resulted primarily from the impact of higher testing volumes. Higher testing volumes were driven by the acquisition of new customers due, in part, to geographic expansion and our customer loyalty programs in which customers are provided incentives in exchange for agreements to purchase services in future periods.

The increase in practice management and digital imaging systems revenue resulted primarily from an increase in placements of our digital imaging and practice management systems and higher support revenue.

Water. The increase in Water revenue resulted primarily from higher Colilert® product sales volumes.

Livestock and Poultry Diagnostics. The decrease in LPD revenue resulted primarily from lower sales of Bovine Spongiform Encephalopathy (“BSE” or “mad cow disease”) tests resulting from the changes in European Union BSE testing requirements. Effective July 1, 2011, the age at which healthy cattle to be slaughtered are required to be tested for BSE in the European Union was increased from 48 months to 72 months, which is reducing the population of cattle tested for this disease.

Other. The increase in Other revenue was attributable primarily to higher sales volumes of our Dairy SNAP® tests used for the detection of antibiotic residue and, to a lesser extent, higher sales volumes of our Dairy SNAP® tests used for detection of the contaminant Aflatoxin M1 in milk.

Gross Profit

Total Company. The following table presents gross profit and gross profit percentages by operating segment:

Gross Profit <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	Percent of Revenue	For the Three Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change		
CAG	\$ 147,908	53.1	% \$ 138,332	53.3	% \$ 9,576	6.9	%	
Water	14,794	67.3	% 12,968	60.3	% 1,826	14.1	%	
LPD	15,671	68.0	% 17,335	68.3	% (1,664)	(9.6	%)	
Other	4,575	37.2	% 4,742	42.2	% (167)	(3.5	%)	
Unallocated Amounts	1,741	N/A	656	N/A	1,085	N/A		
Total Company	\$ 184,689	55.0	% \$ 174,033	54.8	% \$ 10,656	6.1	%	

Companion Animal Group. Gross profit for CAG increased due to higher sales, partly offset by a slight decrease in the gross profit percentage to 53%. The decrease in the gross profit percentage was due primarily to lower relative sales of higher margin products and higher costs of service, partly offset by higher average unit sales prices driven by our canine combination rapid assay tests and the favorable impact of currency. The net effect of currency was positive because the net unfavorable impact of changes in foreign currency exchange rates was more than offset by hedging gains during the three months ended June 30, 2012 compared to hedging losses during the same period of the prior year.

Water. Gross profit for Water increased due to higher sales and an increase in the gross profit percentage to 67% from 60%. The increase in the gross profit percentage was due primarily to the timing of certain manufacturing costs during the three months ended June 30, 2011. Lower freight and distribution costs and the favorable impact of currency also contributed to the increase in the gross profit percentage. The net effect of currency was positive because the net unfavorable impact of changes in foreign currency exchange rates was more than offset by hedging gains during the three months ended June 30, 2012 compared to hedging losses during the same period of the prior year.

Livestock and Poultry Diagnostics. Gross profit for LPD decreased due to lower sales and a slight decrease in the gross profit percentage to 68%. The decrease in the gross profit percentage was due primarily to higher overall manufacturing costs driven by lower production volumes. This unfavorable impact was partly offset by the favorable impact of currency and higher relative sales of products that yield higher gross margins. The net effect of currency was positive because the net unfavorable impact of changes in foreign currency exchange rates was more than offset by hedging gains during the three months ended June 30, 2012 compared to hedging losses during the same period of

the prior year.

Other. Gross profit for Other decreased as higher sales were more than offset by a decrease in the gross profit percentage to 37% from 42%. The decrease in the gross profit percentage was due to lower average unit sales prices in our OPTI Medical line of business and increased manufacturing, freight and distribution costs in our Dairy line of business.

Unallocated Amounts. Gross profit for Unallocated Amounts increased due primarily to a decrease in certain manufacturing and personnel-related costs. With respect to manufacturing costs, the costs reported in our operating segments include our standard cost for products sold and any variances from standard cost for products purchased or manufactured within the period. We capitalize these variances for inventory on hand at the end of the period to record inventory in accordance with U.S. GAAP. We then record these variances as cost of product revenue as that inventory is sold. The impact to cost of product revenue resulting from this variance capitalization and subsequent recognition is reported within the caption "Unallocated Amounts." The decrease in certain manufacturing costs was due primarily to the recognition of previously favorable production volume and purchase price variances incurred by our LPD business. With respect to personnel-related costs, we estimate certain personnel-related costs and allocate the estimated expenses to the operating segments. This allocation differs from actual expense and consequently yields a difference that is reported under the caption "Unallocated Amounts." The decrease in certain personnel-related costs for Unallocated Amounts is due primarily to lower self-insured health care costs during the three months ended June 30, 2012 compared to the same period of the prior year.

Operating Expenses and Operating Income

Total Company. The following tables present operating expenses and operating income by operating segment:

Operating Expenses <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	Percent of Revenue		For the Three Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change	
CAG	\$88,140	31.7	%	\$80,062	30.8	% \$8,078	10.1	%
Water	4,598	20.9	%	4,567	21.2	% 31	0.7	%
LPD	9,861	42.8	%	10,159	40.1	% (298)	(2.9	%)
Other	4,325	35.1	%	4,433	39.4	% (108)	(2.4	%)
Unallocated Amounts	1,948	N/A		3,514	N/A	(1,566)	(44.6	%)
Total Company	\$108,872	32.4	%	\$102,735	32.3	% \$6,137	6.0	%

Operating Income <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	Percent of Revenue		For the Three Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change	
CAG	\$59,768	21.5	%	\$58,270	22.4	% \$1,498	2.6	%
Water	10,196	46.4	%	8,401	39.1	% 1,795	21.4	%
LPD	5,810	25.2	%	7,176	28.3	% (1,366)	(19.0	%)
Other	250	2.0	%	309	2.8	% (59)	(19.1	%)
Unallocated Amounts	(207)	N/A		(2,858)	N/A	2,651	92.8	%
Total Company	\$75,817	22.6	%	\$71,298	22.4	% \$4,519	6.3	%

Companion Animal Group. The following table presents CAG operating expenses by functional area:

Operating Expenses <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	Percent of Revenue		For the Three Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change
--	---	--------------------------	--	---	--------------------------	------------------	----------------------

Sales and marketing	\$46,141	16.6	%	\$42,424	16.3	%	\$ 3,717	8.8	%
General and administrative	28,346	10.2	%	25,829	9.9	%	2,517	9.7	%
Research and development	13,653	4.9	%	11,809	4.6	%	1,844	15.6	%
Total operating expenses	\$88,140	31.7	%	\$80,062	30.8	%	\$ 8,078	10.1	%

The increase in sales and marketing expense resulted primarily from higher personnel-related costs, partly offset by the favorable impact of changes in foreign currency exchange rates. The increase in general and administrative expense resulted primarily from higher personnel-related costs, an increase in costs attributable to investments in information technology and higher amortization expense of our intangible assets. These unfavorable impacts were partly offset by the favorable impact of changes in foreign currency exchange rates. The increase in research and development expense resulted primarily from increased personnel-related costs and higher external consulting and development costs.

Water. The following table presents Water operating expenses by functional area:

Operating Expenses <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	Percent of Revenue		For the Three Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change	
Sales and marketing	\$ 2,449	11.1	%	\$ 2,351	10.9	% \$ 98	4.2	%
General and administrative	1,505	6.8	%	1,577	7.3	% (72)	(4.6)	%
Research and development	644	2.9	%	639	3.0	% 5	0.8	%
Total operating expenses	\$ 4,598	20.9	%	\$ 4,567	21.2	% \$ 31	0.7	%

The increase in sales and marketing expense resulted primarily from higher personnel-related costs. The decrease in general and administrative expense was due primarily to lower personnel-related costs.

Livestock and Poultry Diagnostics. The following table presents LPD operating expenses by functional area:

Operating Expenses <i>(dollars in thousands)</i>	For the Three Months Ended June 30, 2012	Percent of Revenue	For the Three Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change
Sales and marketing	\$ 4,179	18.1 %	\$ 4,102	16.2 %	\$ 77	1.9 %
General and administrative	2,834	12.3 %	3,131	12.3 %	(297)	(9.5 %)
Research and development	2,848	12.4 %	2,926	11.5 %	(78)	(2.7 %)
Total operating expenses	\$ 9,861	42.8 %	\$ 10,159	40.1 %	\$ (298)	(2.9 %)

The increase in sales and marketing expense resulted primarily from increased spending on promotional activities and higher personnel-related costs, partly offset by the favorable impact of changes in foreign currency exchange rates. The decrease in general and administrative expense resulted primarily from a decrease in intangible asset amortization. These favorable impacts were partly offset by higher personnel related costs and an increase in costs attributable to investments in information technology. The decrease in research and development expense was due primarily to a decrease in personnel-related costs.

Other. Operating expenses for Other decreased \$0.1 million to \$4.3 million for the three months ended June 30, 2012 due primarily to lower research and development costs in our OPTI Medical and Dairy lines of business, partly offset by higher personnel-related costs in our OPTI Medical line of business.

Unallocated Amounts. Operating expenses that are not allocated to our operating segments decreased \$1.6 million to \$1.9 million for the three months ended June 30, 2012 due primarily to lower legal and other professional fees incurred in connection with the U.S. Federal Trade Commission (“FTC”) investigation, a decrease in corporate support function expenses, lower personnel-related costs and the absence of legal and other fees incurred in connection with the United Kingdom Office of Fair Trading (“OFT”) investigation as this investigation concluded in November 2011. These favorable factors were partly offset by certain foreign exchange losses during the three months ended June 30, 2012 compared to gains during the same period of the prior year. We estimate corporate support function expenses and certain personnel-related costs and allocate the estimated expense to the operating segments. This allocation differs from the actual expense and consequently yields a difference that is reported under the caption “Unallocated Amounts.” The decrease in certain personnel-related costs for Unallocated Amounts is due primarily to lower self-insured health care costs during the three months ended June 30, 2012 compared to the same period of the prior year. The FTC investigation is discussed in more detail under the heading “Part II. Item 1A. Risk Factors” in this Quarterly Report on Form 10-Q.

Interest Income and Interest Expense

Interest income was \$0.5 million for the three months ended June 30, 2012 compared to \$0.4 million for the same period of the prior year.

Interest expense was \$0.9 million for the three months ended June 30, 2012 compared to \$0.8 million for the same period of the prior year.

Provision for Income Taxes

Our effective income tax rate was 31.9% for the three months ended June 30, 2012 compared to 31.4% for the three months ended June 30, 2011. The increase in our effective income tax rate was due primarily to federal research and development tax incentives that were not available during the three months ended June 30, 2012 but were available during the same period of the prior year, partly offset by a decrease in the effective income tax rates in international jurisdictions in which we operate.

Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011

The following revenue analysis and discussion reports on organic revenue growth. Organic revenue growth should be considered in addition to, and not as a replacement for or as a superior measure to, revenues reported in accordance with U.S. GAAP, and may not be comparable to similarly titled measures reported by other companies. Management believes that reporting organic revenue growth provides useful information to investors by facilitating easier comparisons of our revenue performance with prior and future periods and to our peers. We exclude the effect of changes in foreign currency exchange rates because changes in foreign currency exchange rates are not under management's control, are subject to volatility and can obscure underlying business trends. We exclude the effect of acquisitions because the nature, size and number of acquisitions can vary dramatically from period to period and therefore can also obscure underlying business trends.

Organic revenue growth and the percentage changes in revenue from currency and acquisitions are non-U.S. GAAP measures. See the subsection above titled “Business Overview and Trends” for a description of the calculation of the percentage change in revenue resulting from changes in foreign currency exchange rates. The percentage change in revenue resulting from acquisitions represents incremental revenues attributable to acquisitions that have occurred since the beginning of the prior year period.

Revenue

Total Company. The following table presents revenue by operating segment:

Net Revenue <i>(dollars in thousands)</i>	For the Six Months Ended June 30, 2012	For the Six Months Ended June 30, 2011	Dollar Change	Percentage Change		Percentage Change from Currency		Percentage Change from Acquisitions		Organic Revenue Growth	
CAG	\$546,367	\$500,323	\$46,044	9.2	%	(1.5	%)	1.4	%	9.3	%
Water	41,565	40,475	1,090	2.7	%	(1.5	%)	-		4.2	%
LPD	45,242	49,306	(4,064)	(8.2	%)	(3.5	%)	-		(4.7	%)
Other	25,151	20,430	4,721	23.1	%	(0.5	%)	-		23.6	%
Total Company	\$658,325	\$610,534	\$47,791	7.8	%	(1.7	%)	1.2	%	8.3	%

Companion Animal Group. The following table presents revenue by product and service category for CAG:

Net Revenue <i>(dollars in thousands)</i>	For the Six Months Ended June 30, 2012	For the Six Months Ended June 30, 2011	Dollar Change	Percentage Change		Percentage Change from Currency		Percentage Change from Acquisitions		Organic Revenue Growth	
Instruments and consumables	\$206,240	\$192,490	\$13,750	7.1	%	(1.7	%)	-		8.8	%
Rapid assay products	89,241	82,810	6,431	7.8	%	(0.6	%)	-		8.4	%
Reference laboratory diagnostic and consulting services	208,247	188,215	20,032	10.6	%	(1.9	%)	3.8	%	8.7	%
Practice management and digital imaging systems	42,639	36,808	5,831	15.8	%	(0.2	%)	-		16.0	%
Net CAG revenue	\$546,367	\$500,323	\$46,044	9.2	%	(1.5	%)	1.4	%	9.3	%

Instruments revenue was \$43.8 million and \$40.1 million for the six months ended June 30, 2012 and 2011, respectively. Consumables revenue was \$138.7 million and \$130.2 million for the six months ended June 30, 2012 and 2011, respectively. Instrument service and accessories revenue was \$22.7 million and \$21.6 million for the six months ended June 30, 2012 and 2011, respectively. The remaining sources of revenue are not significant to overall instruments and consumables revenue. Instruments revenue growth was due primarily to increased sales of our ProCyte Dx[®] and Catalyst Dx[®] instruments. Consumables revenue growth was due primarily to higher sales volumes of consumables used with our Catalyst Dx[®] instrument, partly offset by lower sales of consumables used with our VetTest[®] chemistry instrument as customers continue to upgrade from our VetTest[®] instrument to our Catalyst Dx[®] instrument. Higher sales volumes of consumables used with our ProCyte Dx[®] instrument also contributed to the increase in consumables revenue. These favorable factors were partly offset by lower sales volumes of consumables used with our LaserCyte[®] instrument. Service and accessories revenue growth was primarily a result of the increase in our active installed base of instruments. The impact of changes in distributors' inventory levels reduced instruments and consumables revenue growth by 1%.

The increase in rapid assay revenue was due primarily to higher sales of our canine combination test products and the favorable impact of changes in distributors' inventory levels worldwide, which contributed 1% to revenue growth. Higher sales of our canine combination test products were driven primarily by higher average unit sales prices.

The increase in reference laboratory diagnostic and consulting services revenue resulted primarily from the impact of higher testing volumes. Higher testing volumes were driven by the acquisition of new customers due, in part, to geographic expansion and our customer loyalty programs in which customers are provided incentives in exchange for agreements to purchase services in future periods.

The increase in practice management and digital imaging systems revenue resulted primarily from an increase in placements of our practice management and digital imaging systems and an increase in support and service revenue.

Water. The increase in Water revenue resulted primarily from higher Colilert® product sales volumes.

Livestock and Poultry Diagnostics. The decrease in LPD revenue resulted primarily from lower sales of BSE tests resulting from the changes in European Union BSE testing requirements and, to a lesser extent, lower relative sales in geographies where products are sold at higher average unit sales prices. Effective July 1, 2011, the age at which healthy cattle to be slaughtered are required to be tested for BSE in the European Union was increased from 48 months to 72 months, which is reducing the population of cattle tested for this disease.

Other. The increase in Other revenue was attributable primarily to higher sales volumes of our Dairy SNAP® tests used for the detection of antibiotic residue and the contaminant Aflatoxin M1 in milk. Higher revenue associated with our remaining pharmaceutical out-licensing arrangements and higher sales of our OPTI Medical consumables and instruments also contributed to the increase in revenue.

Gross Profit

Total Company. The following table presents gross profit and gross profit percentages by operating segment:

Gross Profit <i>(dollars in thousands)</i>	For the Six Months	Percent of Revenue	For the Six Months	Percent of Revenue	Dollar Change	Percentage Change
--	--------------------------	--------------------------	--------------------------	--------------------------	------------------	----------------------

	Ended June 30, 2012		Ended June 30, 2011						
CAG	\$287,309	52.6	%	\$261,683	52.3	%	\$25,626	9.8	%
Water	27,761	66.8	%	24,359	60.2	%	3,402	14.0	%
LPD	30,853	68.2	%	33,882	68.7	%	(3,029)	(8.9	%)
Other	9,892	39.3	%	8,484	41.5	%	1,408	16.6	%
Unallocated Amounts	3,648	N/A		550	N/A		3,098	N/A	
Total Company	\$359,463	54.6	%	\$328,958	53.9	%	\$30,505	9.3	%

Companion Animal Group. Gross profit for CAG increased due to higher sales and a slight increase in the gross profit percentage to 53%. The increase in the gross profit percentage was due primarily to the favorable impact of currency, higher average unit sales prices of our canine combination rapid assay tests and lower overall manufacturing costs driven by the production of our instruments and consumables. The net effect of currency was positive because the net unfavorable impact of changes in foreign currency exchange rates was more than offset by hedging gains during the six months ended June 30, 2012 compared to hedging losses during the same period of the prior year. These favorable factors were partly offset by lower relative sales of higher margin products and increased costs of service.

Water. Gross profit for Water increased due to higher sales and an increase in the gross profit percentage to 67% from 60%. The increase in the gross profit percentage was due primarily to the timing of certain manufacturing costs during the six months ended June 30, 2011. Lower freight and distribution costs and the favorable impact of currency also contributed to the increase in the gross profit percentage. The net effect of currency was positive because the net unfavorable impact of changes in foreign currency exchange rates was more than offset by hedging gains during the six months ended June 30, 2012 compared to hedging losses during the same period of the prior year.

Livestock and Poultry Diagnostics. Gross profit for LPD decreased due to lower sales and a slight decrease in the gross profit percentage to 68%. The decrease in the gross profit percentage was due primarily to higher overall manufacturing costs driven by lower production volumes. This unfavorable impact was partly offset by the favorable impact of currency and higher relative sales of products that yield higher gross margins. The net effect of currency was positive because the net unfavorable impact of changes in foreign currency exchange rates was more than offset by hedging gains during the six months ended June 30, 2012 compared to hedging losses during the same period of the prior year.

Other. Gross profit for Other increased due to higher sales, partly offset by a decrease in the gross profit percentage to 39% from 42%. The decrease in the gross profit percentage was due to lower average unit sales prices, driven by our OPTI Medical line of business, and higher distribution and freight costs in our OPTI Medical and Dairy lines of business. These unfavorable factors were partly offset by lower overall manufacturing costs in our Dairy line of business driven by increased production volumes of our SNAP[®] tests.

Unallocated Amounts. Gross profit for Unallocated Amounts increased due primarily to a decrease in certain manufacturing and personnel-related costs. With respect to manufacturing costs, the costs reported in our operating segments include our standard cost for products sold and any variances from standard cost for products purchased or manufactured within the period. We capitalize these variances for inventory on hand at the end of the period to record inventory in accordance with U.S. GAAP. We then record these variances as cost of product revenue as that inventory is sold. The impact to cost of product revenue resulting from this variance capitalization and subsequent recognition is reported within the caption "Unallocated Amounts." The decrease in certain manufacturing costs was due primarily to the recognition of previously favorable production volume and purchase price variances incurred by our LPD business.

Operating Expenses and Operating Income

Total Company. The following tables present operating expenses and operating income by operating segment:

Operating Expenses (dollars in thousands)	For the	Percent of Revenue		For the	Percent of Revenue	Dollar Change	Percentage Change		
	Six Months Ended June 30, 2012			Six Months Ended June 30, 2011					
CAG	\$180,623	33.1	%	\$160,441	32.1	%	\$20,182	12.6	%
Water	9,270	22.3	%	9,011	22.3	%	259	2.9	%
LPD	19,777	43.7	%	19,556	39.7	%	221	1.1	%

Edgar Filing: IDEXX LABORATORIES INC /DE - Form 10-Q

Other	9,104	36.2	%	8,725	42.7	%	379	4.3	%
Unallocated Amounts	4,465	N/A		6,395	N/A		(1,930)	(30.2)	(%)
Total Company	\$223,239	33.9	%	\$204,128	33.4	%	\$19,111	9.4	%

Operating Income <i>(dollars in thousands)</i>	For the Six Months Ended June 30, 2012	Percent of Revenue		For the Six Months Ended June 30, 2011	Percent of Revenue		Dollar Change	Percentage Change	
CAG	\$106,686	19.5	%	\$101,242	20.2	%	\$5,444	5.4	%
Water	18,491	44.5	%	15,348	37.9	%	3,143	20.5	%
LPD	11,076	24.5	%	14,326	29.1	%	(3,250)	(22.7)	(%)
Other	788	3.1	%	(241)	(1.2)	(%)	1,029	427.0	%
Unallocated Amounts	(817)	N/A		(5,845)	N/A		5,028	86.0	%
Total Company	\$136,224	20.7	%	\$124,830	20.5	%	\$11,394	9.1	%

Companion Animal Group. The following table presents CAG operating expenses by functional area:

Operating Expenses <i>(dollars in thousands)</i>	For the Six Months Ended June 30, 2012	Percent of Revenue		For the Six Months Ended June 30, 2011	Percent of Revenue		Dollar Change	Percentage Change	
Sales and marketing	\$95,603	17.5	%	\$85,758	17.1	%	\$9,845	11.5	%
General and administrative	57,270	10.5	%	51,217	10.2	%	6,053	11.8	%
Research and development	27,750	5.1	%	23,466	4.7	%	4,284	18.3	%
Total operating expenses	\$180,623	33.1	%	\$160,441	32.1	%	\$20,182	12.6	%

The increase in sales and marketing expense resulted primarily from higher personnel-related costs, partly offset by the favorable impact from changes in foreign currency exchange rates. The increase in general and administrative expense was due primarily to higher personnel-related costs, an increase in costs attributable to investments in information technology and higher amortization expense of our intangible assets. These unfavorable impacts were partly offset by the favorable impact of changes in foreign currency exchange rates. The increase in research and development expense resulted primarily from higher external consulting and development costs and increased personnel-related costs.

Water. The following table presents Water operating expenses by functional area:

Operating Expenses <i>(dollars in thousands)</i>	For the Six Months Ended June 30, 2012	Percent of Revenue	For the Six Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change
Sales and marketing	\$ 4,883	11.7 %	\$ 4,666	11.5 %	\$ 217	4.7 %
General and administrative	3,106	7.5 %	3,183	7.9 %	(77)	(2.4 %)
Research and development	1,281	3.1 %	1,162	2.9 %	119	10.2 %
Total operating expenses	\$ 9,270	22.3 %	\$ 9,011	22.3 %	\$ 259	2.9 %

The increase in sales and marketing expense resulted primarily from higher personnel-related costs. The decrease in general and administrative expense was due primarily to lower personnel-related costs. The increase in research and development expense was due primarily to higher personnel-related costs.

Livestock and Poultry Diagnostics. The following table presents LPD operating expenses by functional area:

Operating Expenses <i>(dollars in thousands)</i>	For the Six Months Ended June 30, 2012	Percent of Revenue	For the Six Months Ended June 30, 2011	Percent of Revenue	Dollar Change	Percentage Change
Sales and marketing	\$8,067	17.8 %	\$7,804	15.8 %	\$ 263	3.4 %
General and administrative	6,032	13.3 %	6,126	12.4 %	(94)	(1.5 %)
Research and development	5,678	12.6 %	5,626	11.4 %	52	0.9 %
Total operating expenses	\$19,777	43.7 %	\$19,556	39.7 %	\$ 221	1.1 %

The increase in sales and marketing expense resulted primarily from an increase in personnel-related costs, partly offset by the favorable impact of changes in foreign currency exchange rates. The decrease in general and administrative expense resulted primarily from a decrease in intangible asset amortization. These favorable impacts were partly offset by an increase in costs attributable to investments in information technology and an increase in personnel-related costs.

Other. Operating expenses for Other increased \$0.4 million to \$9.1 million for the six months ended June 30, 2012 due primarily to higher personnel-related costs in our OPTI Medical and Dairy lines of business.

Unallocated Amounts. Operating expenses that are not allocated to our operating segments decreased \$1.9 million to \$4.5 million for the six months ended June 30, 2012 due primarily to lower personnel-related costs, the absence of legal and other fees incurred in connection with the OFT investigation as this investigation concluded in November 2011 and lower legal and other professional fees incurred in connection with the U.S. FTC investigation, which is discussed in more detail under the heading “Part II. Item 1A. Risk Factors” in this Quarterly Report on Form 10-Q. We estimate certain personnel-related costs and allocate the estimated expense to the operating segments. This allocation differs from the actual expense and consequently yields a difference that is reported under the caption “Unallocated Amounts.” The decrease in certain personnel-related costs for Unallocated Amounts is due primarily to lower self-insured health care costs during the six months ended June 30, 2012 compared to the same period of the prior year. These favorable factors were partly offset by certain foreign exchange losses during the six months ended June 30, 2012 compared to gains during the same period of the prior year.

Interest Income and Interest Expense

Interest income was \$0.9 million for the six months ended June 30, 2012 compared to \$0.8 million for the same period of the prior year.

Interest expense was \$2.1 million for the six months ended June 30, 2012 compared to \$1.5 million for the same period of the prior year. The increase in interest expense was due primarily to higher average balances outstanding on our unsecured revolving credit facility ("Credit Facility"), partly offset by lower effective interest rates.

Provision for Income Taxes

Our effective income tax rate was 31.8% for the six months ended June 30, 2012, compared to 31.3% for the six months ended June 30, 2011. The increase in our effective income tax rate was due primarily to federal research and development tax incentives that were not available during the six months ended June 30, 2012 but were available during the same period of the prior year, partly offset by a decrease in the effective income tax rates in international jurisdictions in which we operate.

Recent Accounting Pronouncements

A discussion of recent accounting pronouncements is included in Note 2 to the condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

Liquidity and Capital Resources

Liquidity

We fund the capital needs of our business through cash on hand, funds generated from operations, and amounts available under our Credit Facility. At June 30, 2012 and December 31, 2011, we had \$201.8 million and \$183.9 million, respectively, of cash and cash equivalents, and working capital of \$136.2 million and \$87.3 million, respectively. Additionally, at June 30, 2012, we had remaining borrowing availability of \$55.0 million under our \$300

million Credit Facility. We believe that, if necessary, we could obtain additional borrowings at prevailing market interest rates to fund our growth objectives. We further believe that current cash and cash equivalents, funds generated from operations, and available borrowings will be sufficient to fund our operations, capital purchase requirements, and strategic growth needs for the next twelve months, and that these resources will be sufficient in the long term to fund our business as currently conducted.

We consider the majority of the operating earnings of certain non-U.S. subsidiaries to be indefinitely invested outside the U.S. Changes to this position could have adverse tax consequences. We manage our worldwide cash requirements considering available funds among all of our subsidiaries. Our foreign cash balances are generally available without restrictions to fund ordinary business operations outside the U.S. Of our total cash and cash equivalents at June 30, 2012, approximately \$196 million was held by our foreign subsidiaries and was subject to material repatriation tax effects. The amount of cash and cash equivalents held by foreign subsidiaries subject to other restrictions on the free flow of funds (primarily securing various obligations) was approximately \$1.1 million. As of June 30, 2012, 41% of the cash and cash equivalents held by our foreign subsidiaries was invested in money market funds restricted to U.S. government and agency securities, 35% was held as bank deposits, 21% was invested in money market funds having investments in highly liquid investment-grade fixed-income securities, and 3% was invested in money market funds restricted to non-U.S. government securities corresponding to the investment currency. As of June 30, 2012, approximately 66% of the cash and cash equivalents held by our foreign subsidiaries was held in U.S. dollars.

Should we require more capital in the U.S. than is generated by our operations domestically, for example to fund significant discretionary activities, we could elect to repatriate future earnings from foreign jurisdictions or raise capital in the U.S. through debt or equity issuances. These alternatives could result in higher effective tax rates, increased interest expense, or other dilution of our earnings. We have borrowed funds domestically and continue to have the ability to borrow funds domestically at reasonable interest rates.

The following table presents additional key information concerning working capital:

	For the Three Months Ended				
	June 30, 2012	March 31, 2012	December 31, 2011	September 30, 2011	June 30, 2011
Days sales outstanding ⁽¹⁾	41.9	42.7	41.0	43.1	41.2
Inventory turns ⁽²⁾	1.8	1.8	1.8	1.7	1.7

⁽¹⁾ Days sales outstanding represents the average of the accounts receivable balances at the beginning and end of each quarter divided by revenue for that quarter, the result of which is then multiplied by 91.25 days.

⁽²⁾ Inventory turns represents inventory-related cost of product revenue for the 12 months preceding each quarter-end divided by the inventory balance at the end of the quarter.

Sources and Uses of Cash

The following table presents cash provided (used):

(dollars in thousands)	For the Six Months Ended		
	2012	2011	Dollar Change
Net cash provided by operating activities	\$78,800	\$88,310	\$(9,510)
Net cash used by investing activities	(22,156)	(22,955)	799
Net cash used by financing activities	(38,265)	(65,137)	26,872
Net effect of changes in exchange rates on cash	(461)	2,265	(2,726)
Net increase in cash and cash equivalents	\$17,918	\$2,483	\$15,435

Operating Activities. Cash provided by operating activities was \$78.8 million for the six months ended June 30, 2012 as compared to \$88.3 million for the same period of the prior year. The total of net income and net non-cash charges, excluding the impact of reclassifying the tax benefit from share based compensation arrangements to a financing activity, was \$124.5 million for the six months ended June 30, 2012 as compared to \$119.6 million for the same period in 2011, resulting in incremental operating cash flows of \$4.9 million driven primarily by the increase in net income. The total of changes in operating assets and liabilities and the tax benefit from share-based compensation arrangements decreased cash by \$45.7 million and \$31.3 million for the six months ended June 30, 2012 and 2011,

respectively, resulting in an incremental decrease in cash of \$14.4 million.

The following table presents cash flows from changes in operating assets and liabilities and the tax benefit from share-based compensation arrangements:

(dollars in thousands)	For the Six Months Ended June 30,		
	2012	2011	Dollar Change
Accounts receivable	\$(8,192)	\$(24,213)	\$16,021
Inventories	(12,896)	(5,692)	(7,204)
Other assets	(2,836)	7,293	(10,129)
Accounts payable	(6,759)	7,002	(13,761)
Accrued liabilities	(12,819)	(5,171)	(7,648)
Deferred revenue	3,736	369	3,367
Tax benefit from share-based compensation arrangements	(5,946)	(10,854)	4,908
Total change in cash due to changes in operating assets and liabilities and the tax benefit from share-based compensation arrangements	\$(45,712)	\$(31,266)	\$(14,446)

Incremental cash used by accounts payable was due primarily to the timing of payments during the six months ended June 30, 2012 compared to the same period of the prior year. Incremental cash used by other assets was due primarily to a \$6.3 million royalty prepayment during the first quarter of 2012. The decrease in accrued liabilities during the six months ended June 30, 2012 was more than the decrease during the same period of the prior year due primarily to a higher payout of annual bonuses during the first quarter of 2012 compared to the first quarter of 2011 in connection with employee incentive programs. The increase in inventory during the six months ended June 30, 2012 was more than the increase during the same period of the prior year due primarily to the timing of inventory receipts. The increase in accounts receivable during the six months ended June 30, 2012 was less than the increase during the same period of the prior year due primarily to the amount and timing of revenues and customer payments within the quarter.

We historically have experienced proportionally lower net cash flows from operating activities during the first quarter and proportionally higher cash flows from operating activities for the remainder of the year and for the annual period driven primarily by the payment of annual bonuses in connection with employee incentive programs in the first quarter following the year for which the bonuses were earned.

Investing Activities. Cash used by investing activities was \$22.2 million for the six months ended June 30, 2012 compared to \$23.0 million for the same period of the prior year. The decrease in cash used by investing activities was due primarily to the substantial completion in 2011 of investments in our Memphis, Tennessee facility and a decrease in investments in manufacturing equipment during the six months ended June 30, 2012 compared to the same period of the prior year. These decreases were partly offset by incremental investments in our suite of business software applications and related hardware during the six months ended June 30, 2012.

Our total capital expenditure plan for 2012 is approximately \$60 million, which includes approximately \$13 million for the expansion of our headquarters facility in Westbrook, Maine, approximately \$16 million for investments in our suite of business software applications and related hardware and approximately \$13 million for investments in our reference laboratory equipment and facilities.

Financing Activities. Cash used by financing activities was \$38.3 million for the six months ended June 30, 2012 compared to cash used of \$65.1 million for the same period in 2011. The decrease in cash used by financing activities was due primarily to a decrease in cash used to repurchase common stock, partly offset by less cash received from the exercise of stock options and employee stock purchase plans and related tax benefits.

At June 30, 2012, we had \$244.0 million outstanding under the Credit Facility. The general availability of funds under the Credit Facility was further reduced by \$1.0 million for a letter of credit issued related to our worker's compensation policy covering claims for the years ending 2009 through 2012. The obligations under the Credit Facility may be accelerated upon the occurrence of an event of default under the Credit Facility, which includes customary events of default including, without limitation, payment defaults, defaults in the performance of affirmative and negative covenants, the inaccuracy of representations or warranties, bankruptcy and insolvency related defaults, defaults relating to judgments, certain events related to employee pension benefit plans under the Employee Retirement Income Security Act of 1974, the failure to pay specified indebtedness, and a change of control default. The Credit Facility contains affirmative, negative and financial covenants customary for financings of this type. The negative covenants include restrictions on liens, indebtedness of subsidiaries of the Company, fundamental changes, investments, transactions with affiliates and certain restrictive agreements. The financial covenant is a consolidated leverage ratio test that requires our ratio of debt to earnings before interest, taxes, depreciation and amortization, defined as the consolidated leverage ratio under the terms of the Credit Facility, not to exceed 3-to-1. At June 30, 2012, we were in compliance with the covenants of the Credit Facility.

Cash used to repurchase shares of our common stock in the open market decreased by \$43.4 million during the six months ended June 30, 2012 compared to the same period of the prior year. From the inception of our share repurchase program in August 1999 to June 30, 2012, we have repurchased 44.3 million shares. During the six months ended June 30, 2012, we purchased 0.7 million shares for an aggregate cost of \$55.0 million compared to purchases of 1.3 million shares for an aggregate cost of \$98.4 million during the six months ended June 30, 2011. We believe that the repurchase of our common stock is a favorable investment and we also repurchase to offset the dilutive effect of our share-based compensation programs. Repurchases of our common stock may vary depending upon the level of other investing activities and the share price. See Note 9 to the condensed consolidated financial statements included

in this Quarterly Report on Form 10-Q for additional information about our share repurchases.

Cash proceeds from the exercise of stock options and employee stock purchase plans and the related tax benefits decreased by \$14.0 million during the six months ended June 30, 2012 compared to the same period in 2011 due primarily to a decrease in the number of stock options exercised.

Other Commitments, Contingencies and Guarantees

Significant commitments, contingencies and guarantees at June 30, 2012 are consistent with those discussed in the section under the heading “Part 2, Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources,” and in Note 14 to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2011, except for the FTC investigation as described in Note 13 to the condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For quantitative and qualitative disclosures about market risk affecting IDEXX, see the section under the heading “Part II, Item 7A. Quantitative and Qualitative Disclosures About Market Risk” of our Annual Report on Form 10-K for the year ended December 31, 2011. As of the date of this report, there have been no material changes to the market risks described in our Annual Report on Form 10-K for the year ended December 31, 2011.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our management is responsible for establishing and maintaining disclosure controls and procedures, as defined by the Securities and Exchange Commission (“the SEC”) in its Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 as amended (the “Exchange Act”). The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures at June 30, 2012, our chief executive officer and chief financial officer have concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended June 30, 2012 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1A. Risk Factors

Our future operating results involve a number of risks and uncertainties. Actual events or results may differ materially from those discussed in this report. Factors that could cause or contribute to such differences include, but are not limited to, the factors discussed below, as well as those discussed elsewhere in this report.

The following discussion includes five revised risk factors (“Our Biologic Products Are Complex and Difficult to Manufacture, Which Could Negatively Affect Our Ability to Supply the Market,” “Strengthening of the Rate of Exchange for the U.S. Dollar Has a Negative Effect on Our Business,” “The Duration and Resolution of the FTC Investigation into Our Marketing and Sales Practices for Companion Animal Veterinary Products and Services are Unpredictable,” “Increase in Corporate Hospital Ownership and Prevalence of Buying Consortiums Could Negatively Affect Our Business” and “Risks Associated with Doing Business Internationally Could Negatively Affect Our Operating Results”) that reflect developments subsequent to the discussion of those risk factors included in our Annual Report on Form 10-K for the year ended December 31, 2011. Further, we have added one risk factor (“The Impact of a Change in the Status of One of Our Distributors on Our Results of Operations is Uncertain”) that was not included in our Annual Report on Form 10-K for the year ended December 31, 2011.

Our Failure to Successfully Execute Certain Strategies Could Have a Negative Impact on Our Growth and Profitability

The companion animal health care industry is highly competitive and we anticipate increasing levels of competition from both existing competitors and new market entrants. Our ability to maintain or enhance our growth rates and our profitability depends on our successful execution of many elements of our strategy, which include:

Developing, manufacturing and marketing innovative new or improved in-clinic laboratory analyzers that drive sales of IDEXX VetLab® instruments, grow our installed base of instruments, and increase demand for related consumable products, services and accessories;

Developing and introducing new proprietary diagnostic tests and services that provide valuable medical information to our customers and effectively differentiate our products and services from those of our competitors;

Increasing the value to our customers of our companion animal products and services by enhancing the integration of these products and the management of diagnostic information derived from our products;

Providing our veterinary customers with the medical and business tools, information and resources that enable them to grow their practices through increased pet visits and enhanced practice of real-time care;

Achieving cost improvements in our worldwide network of laboratories by implementing global best practices including lean processing techniques, incorporating technological enhancements including laboratory automation and a global laboratory information management system, employing purchasing strategies to maximize leverage of our global scale, increasing the leverage of existing infrastructure and consolidating testing in high volume laboratory hubs;

Achieving cost improvements in the manufacture and service of our in-clinic laboratory analyzers by employing the benefits of economies of scale in both negotiating supply contracts and leveraging manufacturing overhead, and by improving reliability of our instruments;

Expanding our served market and growing our market share by strengthening our sales and marketing activities both within the U.S. and in geographies outside of the U.S.;

Identifying, completing and integrating acquisitions that enhance our existing businesses or create new business or geographic areas for us; and

Developing and implementing new technology and licensing strategies.

If we are unsuccessful in implementing and executing on some or all of these strategies, our rate of growth or profitability may be negatively impacted.

Our Dependence on a Limited Number of Suppliers Could Limit Our Ability to Sell Certain Products or Reduce Our Profitability

We currently purchase many products and materials from sole or single sources. Some of the products that we purchase from these sources are proprietary and, therefore, cannot be readily or easily replaced by alternative sources. These products include our Catalyst Dx[®] and VetTest[®] consumables; ProCyte Dx[®] hematology, IDEXX VetAutoread[™] hematology, VetLyte[®] electrolyte, IDEXX VetLab[®] UA[™] urinalysis, VetTest[®] chemistry, and Coag Dx[™] blood coagulation analyzers and related consumables and accessories; image capture plates used in our digital radiography systems; and certain components and raw materials used in our SNAP[®] rapid assay devices, water testing products, livestock and poultry diagnostic tests, dairy testing products and LaserCyte[®] hematology analyzers. To mitigate risks associated with sole and single source suppliers, we seek when possible to enter into long-term contracts that ensure an uninterrupted supply of products at predictable prices. However, some suppliers decline to enter into long-term contracts and we are required to purchase products on a purchase order basis. There can be no assurance that suppliers with which we do not have contracts will continue to supply our requirements for products, that suppliers with which we do have contracts will always fulfill their obligations under these contracts, or that any of our suppliers will not experience disruptions in their ability to supply our requirements for products. In cases where we purchase sole and single source products or components under purchase orders, we are more susceptible to unanticipated cost increases or changes in other terms of supply. In addition, under some contracts with suppliers we have minimum purchase obligations and our failure to satisfy those obligations may result in loss of some or all of our rights under these contracts or require us to compensate the supplier. If we are unable to obtain adequate quantities of sole and single source products in the future, we may be unable to supply the market, which could have a material adverse effect on our results of operations.

Our Biologic Products Are Complex and Difficult to Manufacture, Which Could Negatively Affect Our Ability to Supply the Market

Many of our rapid assay, livestock and poultry diagnostic, water and dairy products are biologic products, which are products that include materials from living organisms, such as antibodies, cells and sera. Manufacturing biologic products is highly complex due to the inherent variability of biological input materials and to the difficulty of controlling the interactions of these materials with other components of the products, with samples and with the environment. There can be no assurance that we will be able to maintain adequate sources of biological materials or that we will be able to consistently manufacture biologic products that satisfy applicable product release criteria. Further, products that meet release criteria at the time of manufacture may fall out of specification while in customer inventory, which could necessitate field actions that would require us to incur expenses associated with recalling products and providing customers with new products, and could damage customer relations. Our inability to produce or obtain necessary biological materials or to successfully manufacture biologic products that incorporate such materials could result in our inability to supply the market with these products, which could have a material adverse effect on our results of operations.

A Weak Economy Could Result in Reduced Demand for Our Products and Services or Increased Customer Credit Risk

A substantial percentage of our sales are made worldwide to the companion animal veterinary market. Demand for our companion animal diagnostic products and services is driven in part by the number of patient visits with their respective owners to veterinary hospitals and the practices of veterinarians with respect to the recommendations for diagnostic testing, as well as the pet owner compliance with these recommendations. Economic weakness in our significant markets in recent years has caused and could continue to cause pet owners to skip or defer visits to veterinary hospitals or could affect their willingness to approve certain diagnostic tests, comply with a treatment plan or, even more fundamentally, continue to own a pet. In addition, concerns about the financial resources of pet owners could cause veterinarians to be less likely to recommend certain diagnostic tests and concerns about the economy may cause veterinarians to defer purchasing capital items such as our instruments and systems. A decline in patient visits to the hospital, in the willingness of pet owners to treat certain health conditions or approve certain tests, in pet ownership in general, or in the inclination of veterinarians to recommend certain tests or make capital purchases could result in a decrease in sales of diagnostic products and services, which could have a material adverse effect on our results of operations.

Demand for our water products is driven in part by the availability of funds at the government laboratories, water utilities and private certified laboratories that utilize our products. Availability of funds also affects demand by the government laboratories and cattle, swine and poultry producers that utilize our livestock and poultry diagnostic products, and by users of our human point-of-care diagnostic instruments. Economic weakness in our markets has caused and could continue to cause our customers to reduce their investment in such testing, which could have a material adverse effect on our results of operations.

In all of our markets, a weak economy may also cause deterioration in the financial condition of our distributors and customers, which could inhibit their ability to pay us amounts owed for products delivered or services provided in a timely fashion or at all.

Strengthening of the Rate of Exchange for the U.S. Dollar Has a Negative Effect on Our Business

Any strengthening of the rate of exchange for the U.S. dollar against non-U.S. currencies, and in particular the Euro, British pound, Canadian dollar, Japanese yen and Australian dollar, adversely affects our results, as it reduces the dollar value of sales that are made in those currencies and reduces the profits on products manufactured or sourced in U.S. dollars and exported to international markets. For both the three and six months ended June 30, 2012, approximately 25% of our revenue was derived from products manufactured in the U.S. and sold internationally in local currencies compared to 26% for both the three and six months ended June 30, 2011. To mitigate such foreign currency exposure, we utilize non-speculative forward currency exchange contracts. A strengthening U.S. dollar could also negatively impact the ability of customers outside the U.S. to pay for purchases denominated in U.S. dollars.

Various Government Regulations Could Limit or Delay Our Ability to Market and Sell Our Products

In the U.S., the manufacture and sale of our products are regulated by agencies such as the United States Department of Agriculture (“USDA”), the U.S. Food and Drug Administration (“FDA”) and the U.S. Environmental Protection Agency (“EPA”). Our infectious disease diagnostic tests for animal health applications, including most rapid assay canine and feline SNAP® tests and livestock and poultry diagnostic tests, must be approved by the USDA prior to sale in the U.S. Our water testing products must be approved by the EPA before they can be used by customers in the U.S. as a part of a water quality monitoring program required by the EPA. Our dairy testing products require approval by the FDA prior to sale in the U.S. The manufacture and sale of our OPTI® line of human point-of-care electrolytes and blood gas analyzers are regulated by the FDA and these products require approval by the FDA before they may be sold commercially in the U.S. The manufacture and sale of our products are subject to similar and sometimes more stringent laws in many foreign countries. Any failure to comply with legal and regulatory requirements relating to the manufacture and sale of our products in the U.S. or in other countries could result in fines and sanctions against us or suspensions or discontinuations of our ability to manufacture or sell our products, which could have a material adverse effect on our results of operations. In addition, delays in obtaining regulatory approvals for new products or product upgrades could have a negative impact on our growth and profitability.

The Duration and Resolution of the FTC Investigation into Our Marketing and Sales Practices for Companion Animal Veterinary Products and Services are Unpredictable

As discussed in our Annual Report on Form 10-K for the year ended December 31, 2011, in January 2010, we received a letter from the U.S. Federal Trade Commission (“FTC”), stating that it was conducting an investigation to determine whether IDEXX or others have engaged in, or are engaging in, unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act (“FTC Act”), through pricing or marketing policies for companion animal veterinary products and services, including but not limited to exclusive dealing or tying arrangements with distributors or end-users of those products or services. The letter requested that we preserve all materials potentially relevant to this investigation. The letter stated that the FTC had not concluded that IDEXX or anyone else had violated Section 5 of the FTC Act. We received subpoenas from the FTC, on April 15, 2010 and August 8, 2011, requesting that we provide the FTC with documents and information relevant to this investigation and we have cooperated fully with the FTC in its investigation.

We now understand that the FTC staff is focused in particular on whether our relationships with the three largest U.S. distributors of companion animal products, referred to as the national distributors, limit access by our competitors to companion animal veterinary practices. If the FTC determines to file a complaint against IDEXX in the administrative law court within the FTC, it would have the power to seek prospective remedies but not financial penalties.

Based on discussion with the FTC staff, we believe that their concerns could be addressed if one of these three national distributors was free to carry competitive products. In response to these concerns, we have determined to seek

to modify our agreement with one of these distributors to eliminate our competitive products policy, which permits us to discontinue sale of our products in a particular product category to the distributor if the distributor sells competitive products in that product category. Under such a modified agreement, the distributor would be able to carry any competitive products without restriction or potential negative consequence, thereby addressing the FTC's concerns as we understand them. While we cannot predict when such a modified agreement would go into effect, since our distributor agreements renew annually as of January 1 of each year, we expect that a modified agreement with one of these distributors would be effective no later than January 1, 2013. While we cannot ensure that a distributor will enter into a modified agreement with us, we believe that a distributor who is released from the competitive products policy will wish to maintain access to our product lines under a modified agreement.

We believe that the FTC has put on hold its internal process to determine whether to file a complaint against IDEXX in the administrative law court within the FTC in order to permit us to conduct the process described above. Following execution of a modified agreement that addresses the FTC's concerns as we understand them, we anticipate the FTC will seek to formalize the modified agreement in the form of a consent order. However, we cannot provide any assurances that the FTC will be satisfied with the steps we take to eliminate any restrictions on the ability of one of the national distributors to sell competitive products.

We also cannot provide any assurances that the FTC will not determine to litigate against IDEXX at some point in the future or whether we would be successful defending ourselves in such a proceeding. Were the FTC to choose to bring an enforcement proceeding, we would defend ourselves vigorously. Were we to be unsuccessful in defending this proceeding and any applicable appeals, we could be subject to restrictions on certain of our marketing and sales practices, including on the terms included in our agreements with certain of our U.S. distributors. While we cannot be certain about what prospective remedies would be sought by the FTC in any such proceeding, we believe that any required changes in our marketing or sales practices would not have a material adverse effect on our financial statements.

We continue to believe that our marketing and sales practices for companion animal veterinary products and services do not violate applicable antitrust laws. We are choosing to attempt to make the modification described above because we believe it will help us avoid long and costly litigation, and that our business will not be materially adversely affected.

The Impact of a Change in the Status of One of Our Distributors on Our Results of Operations is Uncertain

The release of one of our distributors from our competitive products policy, as described in the risk factor above, likely will result in one or more of our competitors selling products through that distributor, which we expect will increase the field sales resources used by those competitors to sell their products. Under a modified agreement with that distributor, we expect to provide lower compensation to the distributor on sales of our products since we would no longer receive the benefits of the distributor's exclusive focus on our products. We expect to reinvest savings from this lower rate of compensation in other sales and marketing resources and the selling efforts of our other distributors. We believe that the reallocation of these sales resources will help mitigate the potential effects of the loss of exclusive focus of the distributor and the additional field sales resources used by our competitors. However, there can be no assurances that we will be able to fully mitigate the competitive effects of the changes in the nature of our agreement with this distributor. Any reduction in the relative effectiveness of our selling efforts could have an adverse effect on our results of operations.

Our Success Is Heavily Dependent Upon Our Proprietary Technologies

We rely on a combination of patent, trade secret, trademark and copyright laws to protect our proprietary rights. If we do not have adequate protection of our proprietary rights, our business may be affected by competitors who utilize substantially equivalent technologies that compete with us.

We cannot ensure that we will obtain issued patents, that any patents issued or licensed to us will remain valid, or that any patents owned or licensed by us will provide protection against competitors with similar technologies. Even if our patents cover products sold by our competitors, the time and expense of litigating to enforce our patent rights could be substantial, and could have a material adverse effect on our results of operations. In addition, expiration of patent rights could result in substantial new competition in the markets for products previously covered by those patent rights.

In the past, we have received notices claiming that our products infringe third-party patents and we may receive such notices in the future. Patent litigation is complex and expensive, and the outcome of patent litigation can be difficult to predict. We cannot ensure that we will win a patent litigation case or negotiate an acceptable resolution of such a case. If we lose, we may be stopped from selling certain products and/or we may be required to pay damages and/or

ongoing royalties as a result of the lawsuit. Any such adverse result could have a material adverse effect on our results of operations.

Distributor Purchasing Patterns Could Negatively Affect Our Operating Results

We sell many of our products, including substantially all of the rapid assays and instrument consumables sold in the U.S., through distributors. Distributor purchasing patterns can be unpredictable and may be influenced by factors unrelated to the end-user demand for our products. In addition, our agreements with U.S. distributors may generally be terminated by the distributors for any reason on 60 days notice. Because significant product sales are made to a limited number of distributors, the unanticipated loss of a distributor or unanticipated changes in the frequency, timing or size of distributor purchases, could have a negative effect on our results of operations.

Distributors of veterinary products have entered into business combinations resulting in fewer distribution companies. Consolidation within distribution channels increases our customer concentration level, which could increase the risks described in the preceding paragraph. See “Part I. Item 1 Business – Marketing and Distribution” in our Annual Report on Form 10-K for the year ended December 31, 2011 for additional information.

Increased Competition and Technological Advances by Our Competitors Could Negatively Affect Our Operating Results

We face intense competition within the markets in which we sell our products and services and we expect that future competition may become even more intense. Competition could negatively affect our sales and profitability in a number of ways. New competitors may enter our markets and new or existing competitors may introduce new and competitive products and services, which could be superior to our products and services. Some of our competitors and potential competitors may choose to differentiate themselves by offering similar products and services to ours at lower sales prices, which could have a material adverse effect on our results of operations through loss of market share or a decision to lower our own sales prices to remain competitive. In addition, multiple competitors could bundle product and service offerings through co-marketing or other arrangements, which could enhance their ability to compete with our broad product and service offering. Some of our competitors and potential competitors, including large diagnostic and pharmaceutical companies, have substantially greater financial resources than us, and greater experience in manufacturing, marketing, research and development and obtaining regulatory approvals than we do.

Changes in Testing Patterns Could Negatively Affect Our Operating Results

The market for our companion animal and livestock and poultry diagnostic tests and our dairy and water testing products could be negatively impacted by a number of factors impacting testing practices. The introduction or broad market acceptance of vaccines or preventatives for the diseases and conditions for which we sell diagnostic tests and services could result in a decline in testing. Changes in accepted medical protocols regarding the diagnosis of certain diseases and conditions could have a similar effect. Eradication or substantial declines in the prevalence of certain diseases also could lead to a decline in diagnostic testing for such diseases. Our livestock and poultry products business in particular is subject to fluctuations resulting from changes in disease prevalence. In addition, changes in government regulations or in the availability of government funds available for monitoring programs could negatively affect sales of our products that are driven by compliance testing, such as our livestock and poultry, dairy and water products. Declines in testing for any of the reasons described, along with lost opportunities associated with a reduction in veterinary visits, could have a material adverse effect on our results of operations.

Effective January 1, 2009, the age at which healthy cattle to be slaughtered are required to be tested for bovine spongiform encephalopathy (“BSE” or “mad cow disease”) in the European Union was increased from 30 months to 48 months, which reduced the population of cattle tested by approximately 30%. In February 2011, the European Union’s Standing Committee on the Food Chain and Animal Health agreed to allow its member states to further raise the recommended testing age to 72 months, effective July 1, 2011, which is further reducing the population of cattle tested. The demand for our BSE testing products has been negatively impacted as a result of these regulatory changes, and could be further impacted by further changes that could be made in the future.

Increase in Corporate Hospital Ownership and Prevalence of Buying Consortiums Could Negatively Affect Our Business

An increasing percentage of veterinary hospitals in the U.S. is owned by corporations that are in the business of acquiring veterinary hospitals and/or opening new veterinary hospitals nationally or regionally. Major corporate hospital owners in the U.S. include VCA Antech, Inc., National Veterinary Associates and Banfield Pet Hospital, each of which is currently a customer of IDEXX. A similar trend exists in the U.K. and may in the future also develop in other countries. Furthermore, an increasing percentage of individually owned veterinary hospitals in the U.S. are participating in buying consortiums. Corporate owners of veterinary hospitals and buying consortiums often seek to improve profitability by leveraging the buying power they derive from their scale to obtain favorable pricing from suppliers, which could have a negative impact on our results of operations. While we have strong supplier relationships with several corporate hospital groups and buying consortiums that we believe are positive for our business, decisions by larger corporate owners and buying consortiums, in particular Banfield Pet Hospital, to shift their purchasing of products and services away from us and to a competitor would have a negative impact on our results of operations, which could be material. In addition, certain corporate owners, most notably VCA Antech, our primary competitor in the U.S. and Canadian markets for veterinary reference laboratory diagnostic services, also operate reference laboratories that serve both their hospitals and unaffiliated hospitals. Any hospitals acquired by these companies generally use their reference laboratory services almost exclusively and shift a large portion of their testing from in-clinic testing to their reference laboratories. Furthermore, because these companies compete with us in the reference laboratory services marketplace, hospitals acquired by these companies may cease to be customers or potential customers of our other companion animal products and services, which would cause our sales of these products and services to decline.

Our Limited Experience and Small Scale in the Human Point-of-Care Market Could Inhibit Our Success in this Market

We have limited experience in the human point-of-care medical diagnostics market and we operate at a small scale in this market. This market differs in many respects from the veterinary diagnostic market. Significant differences include the impact of third party reimbursement on diagnostic testing, more extensive regulation, greater product liability risks, larger competitors, a more segmented customer base and more rapid technological innovation. Our limited experience and small scale in the human point-of-care medical diagnostics market could negatively affect our ability to successfully manage the risks and features of this market that differ from the veterinary diagnostic market. There can be no assurance that we will be successful in achieving growth and profitability in the human point-of-care medical diagnostics market comparable to the results we have achieved in the veterinary diagnostic market.

Risks Associated with Doing Business Internationally Could Negatively Affect Our Operating Results

For both the three months and six months ended June 30, 2012, approximately 41% our revenue was attributable to sales of products and services to customers outside the U.S., compared to 43% for both the three and six months ended June 30, 2011. Various possible risks associated with foreign operations may impact our international sales, including disruptions in transportation of our products, the differing product and service needs of foreign customers, difficulties in building and managing foreign operations, import/export duties and licensing requirements, natural disasters and unexpected regulatory and economic or political changes in foreign markets. Further, prices that we charge to foreign customers may be different than the prices we charge for the same products in the U.S. due to competitive, market or other factors. Our results of operations are also susceptible to changes in foreign currency exchange rates. As a result, the mix of domestic and international sales in a particular period could have a material impact on our results of operations for that period.

Our Operations are Vulnerable to Interruption as a Result of Natural and Man-Made Disasters or System Failures

The operation of all of our facilities may be vulnerable to interruption as a result of natural and man-made disasters, interruptions in power supply or other system failures. While we maintain plans to continue business under such circumstances, there can be no assurance that such plans will be successful in fully or partially mitigating the effects of such events.

We manufacture many of our significant companion animal products, including our rapid assay devices and certain instruments, many of our water testing products and certain of our livestock and poultry testing products, at a single facility in Westbrook, Maine. Certain of our companion animal products, as well as our human point-of-care products,

are manufactured in Roswell, Georgia. We also manufacture certain of our livestock and poultry testing products in Bern, Switzerland and Montpellier, France. In addition, we maintain major distribution facilities in North America and in the Netherlands and major reference laboratories in Memphis, Tennessee; Ludwigsburg, Germany; Sacramento, California; Elmhurst, Illinois; North Grafton, Massachusetts; East Brisbane, Australia; Markham, Ontario; and Wetherby, the United Kingdom. Therefore, interruption of operations at any of these facilities could have a material adverse effect on our results of operations.

We rely on several information systems throughout our company to keep financial records, process customer orders, manage inventory, process shipments to customers and operate other critical functions. If we were to experience a system disruption that impacts any of our critical functions, it could result in the loss of sales and customers, financial misstatement and significant incremental costs, which could adversely affect our business.

We maintain property and business interruption insurance to insure against the financial impact of certain events of this nature. However, this insurance may be insufficient to compensate us for the full amount of any losses that we may incur. In addition, such insurance will not compensate us for the long-term competitive effects of being out of the market for the period of any interruption in operations.

We Could Be Subject to Class Action Litigation Due to Stock Price Volatility, which, if it Occurs, Could Result in Substantial Costs or Large Judgments Against Us

The market for our common stock may experience extreme price and volume fluctuations, which may be unrelated or disproportionate to our operating performance or prospects. Securities class action litigation has often been brought against companies following periods of volatility in the market prices of their securities. We may be the target of similar litigation in the future. Securities litigation could result in substantial costs and divert our management's attention and resources, which could have a negative effect on our business, operating results and financial condition.

If Our Quarterly or Annual Results of Operations Fluctuate, This Fluctuation May Cause Our Stock Price to Decline, Resulting in Losses to You

Our prior operating results have fluctuated due to a number of factors, including seasonality of certain product lines; changes in our accounting estimates; the impact of acquisitions; timing of distributor purchases, product launches, operating expenditures, changes in foreign currency exchange rates, litigation and claim-related expenditures; changes in competitors' product offerings; changes in the economy affecting consumer spending; and other matters. Similarly, our future operating results may vary significantly from quarter to quarter or year to year due to these and other factors, many of which are beyond our control. If our operating results or projections of future operating results do not meet the expectations of market analysts or investors in future periods, our stock price may fall.

Future Operating Results Could Be Negatively Affected by the Resolution of Various Uncertain Tax Positions and by Potential Changes to Tax Incentives

In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Significant judgment is required in determining our worldwide provision for income taxes. We periodically assess our exposures related to our worldwide provision for income taxes and believe that we have appropriately accrued taxes for contingencies. Any reduction of these contingent liabilities or additional assessments would increase or decrease income, respectively, in the period such determination was made. Our income tax filings are regularly under audit by tax authorities and the final determination of tax audits could be materially different than that which is reflected in historical income tax provisions and accruals. Additionally, we benefit from certain tax incentives offered by various jurisdictions. If we are unable to meet the requirements of such incentives, or if they expire or are renewed at less favorable terms, our inability to realize these benefits could have a material negative effect on future earnings.

Restrictions in Our Credit Facility or Our Inability to Obtain Financing on Favorable Terms May Limit Our Activities

Our ability to satisfy our obligations under our unsecured revolving credit facility (“Credit Facility”) depends on our future operating performance and on economic, financial, competitive and other factors beyond our control. Our business may not generate sufficient cash flows to meet these obligations or generate sufficient levels of earnings to satisfy the applicable affirmative, negative and financial covenants. Our failure to comply with these covenants and the other terms of the Credit Facility could result in an event of default and acceleration of our obligations under the Credit Facility, which may require us to seek additional financing or restructure existing debt and possibly on terms not deemed favorable.

We fund our operations, capital purchase requirements and strategic growth needs through cash on hand, funds generated from operations and amounts available under our Credit Facility. If we were unable to obtain financing on favorable terms, we could face restrictions that would limit our ability to execute certain strategies, which could have an adverse effect on our revenue growth and profitability.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the three months ended June 30, 2012, we repurchased shares of common stock as described below:

Period	Total Number of Shares Purchased (a)	Average Price Paid per Share (b)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (c)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (d)
April 1 to April 30, 2012	100,900	\$ 86.15	100,900	3,953,326
May 1 to May 31, 2012	126,300	86.33	126,300	3,827,026
June 1 to June 30, 2012	93,298	84.78	91,700	3,735,326
Total	320,498	\$ 85.82	318,900	3,735,326

Our board of directors has approved the repurchase of up to 48 million shares of our common stock in the open market or in negotiated transactions. The plan was approved and announced on August 13, 1999, and subsequently amended on October 4, 1999, November 16, 1999, July 21, 2000, October 20, 2003, October 12, 2004, October 12, 2005, February 14, 2007, February 13, 2008, February 10, 2010 and October 12, 2011 and does not have a specified expiration date. There were no other repurchase plans outstanding during the three months ended June 30, 2012, and no repurchase plans expired during the period. Repurchases of 318,900 shares were made during the three months ended June 30, 2012 in transactions made pursuant to our repurchase plan.

During the three months ended June 30, 2012, we received 1,598 shares of our common stock that were surrendered by employees in payment for the minimum required withholding taxes due on the vesting of restricted stock units and settlement of deferred stock units. In the above table, these shares are included in columns (a) and (b), but excluded from columns (c) and (d). These shares do not reduce the number of shares that may be purchased under the repurchase plan.

Item 6. Exhibits

Exhibit No.	Description
31.1	Certification of Principal Executive Officer pursuant to Rules 13a-14(a) and 15d-14(a) under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Principal Financial Officer pursuant to Rules 13a-14(a) and 15d-14(a) under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
