- iii. As at 31 December 2015, unlisted equity investments with a carrying amount of RMB71 million (31 December 2014: RMB75 million) were stated at cost less impairment. The directors of the Company are of the opinion that as these available-for-sale financial investments do not have a quoted market price in an active market and their fair value cannot be reliably measured, and therefore, the available-for-sale financial investments are stated as cost.
- iv. As at 31 December 2015, Ningxia Energy has made a full impairment provision amounting to RMB2 million of the equity investment in Western Electric Commercial Co., Ltd. ().

Net deferred tax assets	1,362,995	952,057
Net deferred tax liabilities	1,006,155	1,061,265

As at 31 December 2015, no deferred tax liability was recognised for taxable temporary differences which amounted to RMB1,407 million.

As at 31 December 2015, the Group has not recognised deferred tax assets of RMB5,582 million (31 December 2014: RMB5,641 million) in respect of accumulated tax losses amounting to RMB22,328 million (31 December 2014: RMB22,564 million) arising in Mainland China that can be carried forward for offsetting against future taxable income, and deferred tax assets of RMB2,057 million (31 December 2014: RMB1,922 million) in respect of deductible temporary differences amounting to RMB8,227 million (31 December 2014: RMB7,686 million) as it was not considered probable that those assets would be realised. The above tax losses will expire in one to five years if unused.

As at 31 December 2015, the expiry profile of these tax losses was analysed as follows:

	31 December 2015	31 December 2014
Expiring in		
2015	-	106,146
2016	63,812	369,627

As at 31 December 2015, deferred tax assets amounting to RMB1,363 million (31 December 2014: RMB952 million) were recognised for tax losses and deductible temporary differences carried forward to the extent that the realisation of the related tax benefit is probable. The recognition of these deferred tax assets is supported by forecast of future taxable profits available to the Group.

13. TRADE AND NOTES RECEIVABLES

	31 December 2015	31 December 2014 (restated)
Trade receivables	4,394,814	3,702,007
Less: provision for impairment	(510,336)	(719,992)
	3,884,478	2,982,015
Notes receivable	1,266,561	2,350,519
	5,151,039	5,332,534

As at 31 December 2015, except for trade and notes receivables of the Group amounting to RMB1,451 million which were denominated in USD (31 December 2014: RMB901 million in USD), all trade and notes receivables were denominated in RMB (31 December 2014: all in RMB).

Trade receivables are non-interest-bearing and are generally on terms of 3 to 12 months. Certain of the Group's sales were on advanced payments or documents against payment. In some cases, these terms are extended for qualifying long term customers that have met specific credit requirements. As at 31 December 2015, the ageing analysis of trade and notes receivables was as follows:

	31 December 2015	31 December 2014 (restated)
Within 1 year	3,881,858	4,425,910
Between 1 and 2 years	326,631	678,508
Between 2 and 3 years	667,601	120,418
Over 3 years	785,285	827,690

	5,661,375	6,052,526
Less: provision for impairment	(510,336)	(719,992)
	5,151,039	5,332,534

The credit quality of trade and notes receivables that are neither past due nor impaired is assessed by reference to the counterparties' default history. As at 31 December 2015, there was no history of default for these customers.

As at 31 December 2015, the ageing analysis of past due but not impaired trade and notes receivables was as follows:

	31 December 2015	31 December 2014 (restated)
Past due for 1 year	172,597	668,467
Past due for 1 to 2 years	651,928	55,029
Past due for over 2 years	445,587	346,851
	1,270,112	1,070,347
Not past due	3,880,927	4,262,187
	5,151,039	5,332,534

The balances of trade and notes receivables that were past due but not impaired relate to a number of individual customers for whom there was no recent history of default. Based on past experience, the directors of the Company are of the opinion that no provision for impairment is necessary in respect of these balances as there has not been a significant change in credit quality and the balances are still considered recoverable within 12 months as at 31 December 2015.

Included in the Group's trade receivables are amounts due from the Group's joint ventures of RMB28 million (31 December 2014: RMB8

million), which are repayable on credit terms similar to those offered to the major customers of the Group.

As at 31 December 2015, the Group had pledged trade receivables amounting to RMB360 million (31 December 2014: RMB270 million) and notes receivable amounting to RMB27 million (31 December 2014: RMB98 million) for bank and other borrowings as set out in note 24 to the financial statements.

As at 31 December 2015, trade and notes receivables of RMB695 million (31 December 2014: RMB988 million) of the Group were impaired and provisions of RMB510 million (31 December 2014: RMB720 million) were made. The individually impaired receivables mainly relate to customers which are in unexpected difficult economic situations and it was expected that only a portion of these receivables would be recovered. The ageing analysis of these trade receivables is as follows:

	31 December 2015	31 December 2014
Within 1 year	1,348	2,815
Between 1 and 2 years	22,052	242,846

Provision for impairment	6,847	135,682

As at 31 December	510,336	719,992
<hr/>		

Note: As set out in note 39 (b), the Group lost control of Ningxia photovoltaic subsidiaries and the trade receivables due from these companies eliminated previously become receivables due from third parties, which have been fully impaired.

As at 31 December 2015, the Group derecognised discounted notes receivables accepted by banks in the PRC to financial institutions with a carrying amount in aggregate of RMB1,021 million (31 December 2014: RMB1,374 million), and endorsed notes receivables accepted by banks in the PRC to certain of its suppliers in order to settle the trade payables due to such suppliers with a carrying amount in aggregate of RMB13,052 million (31 December 2014: RMB12,741 million). The above discounted notes and endorsed notes are collectively referred to as the "Derecognised Notes". The Derecognised Notes have a maturity from one to twelve months at the end of the reporting period. In accordance with the Law of Negotiable Instruments in the PRC, the holders of the Derecognised Notes, including the financial institutions and the suppliers, have a right of recourse against the Group if the PRC banks default (the "Continuing Involvement"). In the opinion of the directors of the Company, the Group has transferred substantially all risks and rewards relating to the Derecognised Notes. Accordingly, it has derecognised the full carrying amounts of the Derecognised Notes and has derecognised the associated trade payables for the endorsed notes or has not recognised any short-term loans for the discounted notes. The maximum exposure to loss from the Group's Continuing Involvement in the Derecognised Notes and the undiscounted cash flows to repurchase these Derecognised Notes is equal to their carrying amounts. In the opinion of the directors of the Company, the fair values of the Group's Continuing Involvement in the Derecognised Notes are not significant.

For the years ended 31 December 2015 and 2014, the Group has not recognised any gain or loss on the date of transfer of the Derecognised Notes. No gains or losses were recognised from the Continuing Involvement, both during the year or cumulatively.

As at 31 December 2015, the Group has not derecognised notes receivable accepted by banks in the PRC endorsed to certain of its suppliers in order to settle the trade payables due to such suppliers with a carrying amount of RMB937 million (31 December 2014: RMB1,074 million). In the opinion

of the directors, the Group has retained the substantial risks and rewards, which include default risks relating to such endorsed notes, and accordingly, it continued to recognise the full carrying amounts of the endorsed notes and recognised the associated trade payables settled for the endorsed notes. Subsequent to the endorsement, the Group did not retain any rights on the use of the endorsed notes, including the sale, transfer or pledge of the endorsed notes to any other third parties. None of the endorsed notes settled during the year has been recouped as at 31 December 2015 (31 December 2014: nil).

(i)

Sales of materials and finished goods comprised sales of alumina, primary aluminum, copper and scrap materials. Transactions entered into are covered by general agreements on mutual provision of production supplies and ancillary services. The pricing policy is summarised below:

- (1) The price prescribed by the PRC government ("state-prescribed price") is adopted;
 - (2) If there is no state-prescribed price, state-guidance price is adopted;
 - (3) If there is neither state-prescribed price nor state-guidance price, then the market price (being price charged to and from independent third parties) is adopted; and
 - (4) If none of the above is available, then the adoption of a contractual price (being reasonable costs incurred in providing the relevant services plus not more than 5% of such costs is adopted).
-
- (ii) Utility services, including electricity, gas, heat and water, are provided at the state-prescribed price.
 - (iii) Engineering, project construction and supervisory services were provided for construction projects of the Group. The state-guidance price or prevailing market price (including the tender price where by way of tender) is adopted for pricing purposes.
 - (iv) The pricing policy for purchases of key and auxiliary materials (including bauxite, limestone, carbon, cement and coal) is the same as that set out in (i) above.
 - (v) Social services and logistics services provided by Chinalco Group cover public security, fire services, education and training, school and hospital services, cultural and physical education, newspaper and magazines, broadcasting and printing as well as property management, environmental and hygiene, greenery, nurseries and kindergartens, sanatoriums, canteens and offices, public transport and retirement management and other services. Provisions of these services are covered by the Comprehensive Social and Logistics Services Agreement. The pricing policy is the same as that set out in (i) above.
 - (vi) Pursuant to the Land Use Rights Lease Agreements entered into between the Group and Chinalco Group, operating leases for industrial or commercial land are charged at the market rent rate. The Group also entered into a building rental agreement with Chinalco

Group and pays rent based on the market rate for its lease of buildings owned by Chinalco.

The terms for the provision of financial services to the Group are no less favourable than those of the same type of financial services provided by Chinalco Finance to Chinalco and other members of its group or those of the same type of financial services that may be provided to the Group by other financial institutions.
- (ix) The related party transactions in respect of these items above also constitute connected transactions or continuing connected transactions as defined in Chapter 14A of the Listing Rules.
- (x) The Group provided guarantees to Xinyugou Coal and Ningxia Tian Jing Shen Zhou Wind Power Co., Ltd., joint ventures of the Group, and Xingshengyuan Coal, an associate of the Group, for their bank loans amounting to RMB311 million, RMB30 million and RMB17 million, respectively.
- (xi) As disclosed in note 20, the Company and its subsidiaries have entered into several sales and lease back agreements with Chinalco Finance and Chinalco Finance Leasing, respectively. Under these agreements, the Company and its subsidiaries sold certain assets and construction in progress to Chinalco Finance and Chinalco Finance Leasing, and leased back the assets and construction in progress under finance lease terms.
- (xii) As disclosed in note 8(b), the Group transferred certain urban properties and cash to Chinalco Property Development as capital injection which constituted a connected transaction.
- (xiii) Transfer of the Property Assets of Chalco Hong Kong to Chinalco Assets Holdings

In November 2015, Chalco Hong Kong and Chinalco Assets Holdings entered into an asset transfer agreement, pursuant to which, Chalco Hong Kong agreed to dispose of the property assets ("HK Property") of Chalco Hong Kong to Chinalco Assets Holdings. The appraised value of the properties was HKD372 million (equivalent to RMB311 million) as at the Benchmark Date of 30 September 2015. According to the asset transfer agreement, 30% of the total consideration, i.e. HKD112 million (equivalent to RMB93 million), shall be paid to Chalco Hong Kong by Chinalco Assets Holdings in December 2015, and the remaining 70% of the total consideration

shall be paid before 30 June 2016. The transaction between the Group and Chinalco Assets Holdings constituted a connected transaction.

The Group disposed of the Hong Kong Properties with carrying value of RMB102 million and recognised a gain of RMB210 million. In December 2015, the Group received the first batch of the asset transfer consideration of RMB93 million.

In addition, substantially all restricted cash, time deposits, cash and cash equivalents and borrowings as at 31 December 2015 and 2014 and the relevant interest earned or paid during the year were transacted with banks and other financial institutions which are controlled by the PRC government.

As at 31 December 2015 and 2014, except for the other capital commitments disclosed in note 42(c) to these financial statements, the Group had no significant commitments with related parties.

36. FINANCIAL AND CAPITAL RISK MANAGEMENT

36.1 Financial risk management

The Group's activities expose it to a variety of financial risks, including market risk (including foreign currency risk, cash flow and fair value interest rate risk and commodity price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise the potential adverse effects on the Group's financial performance.

Risk management is carried out by the treasury management department (the "Group Treasury") under policies approved by the board of directors of the Company. The Group Treasury identifies, evaluates and hedges financial risks through close co-operation with the Group's operating units.

(a) Market risk

(i) Foreign currency risk

Foreign currency risk primarily arises from certain significant foreign currency deposits, trade and notes receivables, trade and notes payables, receivable from a subsidiary of Chinalco due to disposal of an entity in the preceding year and disposal of Hong Kong Properties in the current year, and short-term and long-term loans denominated in United States dollars ("USD"), Australian dollars ("AUD"), Euro ("EUR"), Japanese yen ("JPY") and Hong Kong dollars ("HKD"). Related exposures are disclosed in notes 11, 13, 14, 15 and 19 and 23 to the financial statements, respectively. The Group Treasury closely monitors the international foreign currency market on the change of exchange rates and takes these into consideration when investing in foreign currency deposits and borrowing loans. As at 31 December 2015, the Group only has significant exposure to USD.

As at 31 December 2015, if RMB had strengthened/weakened by 5% against USD with all other variables held constant, the comprehensive income for the year would have been approximately RMB177 million lower/higher (2014: RMB238 million higher/lower), mainly as a result of foreign exchange gains and losses arising from translation of USD-denominated borrowings and receivables. Profit was less sensitive to the fluctuation in the RMB/USD exchange rates in 2015 than in 2014, mainly due to the decrease in the USD denominated cash and receivables.

As the assets and liabilities denominated in other foreign currencies other than USD were minimal relative to the total assets and liabilities of the Group, the directors of the Company are of the opinion that the Group was not exposed to any significant foreign currency risk arising from these foreign currency denominated assets and liabilities as at 31 December 2015 and 2014.

(ii) Interest rate risk

As at 31 December 2015, as the Group had no significant interest-bearing assets except for bank deposits (note 15), entrusted loans (note 14), receivables arising from disposal of subsidiaries, business and assets (note 11 and note 14) and a prepayment paid to a supplier (note 11), the Group's income and operating cash flows are substantially

independent of changes in market interest rates.

Most of the bank deposits are maintained in savings and time deposit accounts in the PRC. The interest rates are regulated by the People's Bank of China and the Group Treasury closely monitors the fluctuation on such rates periodically. The interest rates of entrusted loans and a deposit paid to a supplier are fixed, the interest rate of the receivables from disposal of subsidiaries, business and assets to Chinalco is at the rate of one-year bank loan determined by People's Bank of China at the payment date and the interest rate of the receivables from disposal of an entity to a subsidiary of Chinalco is LIBOR plus 0.9%. As the interest rates applied to the deposits and receivables from disposal of subsidiaries, business and assets were relatively low and the interest rates applied to the entrusted loans and a prepayment paid to a supplier were fixed, the directors of the Company are of the opinion that the Group was not exposed to any significant interest rate risk for its financial assets held as at 31 December 2015 and 2014.

The interest rate risk for the Group's financial liabilities primarily arises from interest-bearing loans. Loans borrowed at floating interest rates expose the Group to cash flow interest rate risk. The exposures to these risks are disclosed separately in note 19. The Group enters into debt obligations to support general corporate purposes including capital expenditures and working capital needs. The Group Treasury closely monitors market interest rates and maintains a balance between variable rate and fixed rate borrowings in order to reduce the exposures to the interest rate risk described above.

As at 31 December 2015, if interest rates had been 100 basis points (31 December 2014: 100 basis points) higher/lower for bank and other loans borrowed at floating interest rates with all other variables held constant, net profit for the year would have been RMB503 million lower/higher (2014: RMB547 million (restated)), respectively, mainly as a result of the higher/lower interest expense on floating rate borrowings.

The fair value interest rate risk of the Group mainly arises from long-term bonds, medium-term notes and short-term bonds issued at fixed rates. As the fluctuation of comparable interest rates of corporate bonds with similar terms was relatively low, the directors of the Company are of the opinion that the Group is not exposed to any significant fair value interest rate risk for its fixed interest rate borrowings held as at 31 December 2015 and 2014.

(iii) Commodity price risk

The Group uses futures and option contracts to reduce its exposure to fluctuations in the price of primary aluminum and other products. The Group uses the futures contract for hedging other than speculation. With reference to the hedging of primary aluminum, production company hedges the output of primary aluminum and trading company hedges the quantities of buyout and self-supporting.

The Group uses mainly futures contracts and option contracts traded on the Shanghai Futures Exchange and London Metal Exchange ("LME") to hedge against fluctuations in primary aluminum prices. As at 31 December 2015, the fair values of the outstanding futures contracts amounting to RMB2 million (31 December 2014: RMB121 million) and RMB11 million (31 December 2014: RMB4 million) are recognised in financial assets and financial liabilities at fair value through profit or loss, respectively. As at 31 December 2015, the fair value of outstanding options contracts amounting to RMB151 million (31 December 2014: RMB25 million) was recognised in financial liabilities at fair value through profit or loss.

A summary of futures contracts held as at 31 December 2015 is as follows:

As at 31 December 2015, if the commodity futures prices had increased/decreased by 3% (31 December 2014: 3%) and all other variables held constant, profit for the year would have changed by the amounts shown below:

(b) Credit risk

Credit risk arises from balances with banks and financial institutions, short-term investments, trade and notes receivables, other current and non-current receivables as well as credit exposures of customers, including outstanding receivables and committed transactions. The carrying amounts of short-term investments and these receivables included in notes 9, 11, 13, 14, and 15 represent the Group's maximum exposure to credit risk in relation to its financial assets. The Group also provided financial guarantees to certain subsidiaries, two joint ventures and an associate as well as a third party. The guarantees to joint ventures and an associate mentioned in note 35 represented the Group's maximum exposure to credit risk in relation to its guarantees to joint ventures and an associate. As at 31 December 2015, the guarantees balance provided to a third party is RMB11 million.

The Group maintains substantially all of its bank balances and cash and short-term investments in several major state-owned banks in the PRC. With strong support from the PRC government to these state-owned banks, the directors of the Company are of the opinion that there is no significant credit

risk on such assets being exposed to losses.

With regard to receivables, the marketing department assesses the credit quality of the customers and their related parties, taking into account their financial positions, past experience and other factors. The Group performs periodic credit evaluations of its customers and believes that adequate provision for impairment of receivables has been made in the financial statements. Management does not expect any further losses from non-performance by these counterparties. The Group holds collateral for some entrusted loans. As at 31 December 2015, the Group has the receivables amounting to RMB8,792 million from Chinalco and its subsidiaries which arose from the disposal of subsidiaries, business and assets. Chinalco and its subsidiaries have settled the receivables and the related interest thereof in accordance with the payment terms. Therefore, the Group believes that there is no material credit risk related to the above-mentioned receivables.

For the year ended 31 December 2015, revenues of approximately RMB31,818 million (2014: RMB24,986 million) are derived from entities directly or indirectly owned or controlled by the PRC government including Chinalco. There were no other individual customers from whom the Group has derived revenue of more than 10% of the Group's revenue during the year ended 31 December 2015 and 2014. Thus, the directors of the Company are of the opinion that the Group was not exposed to any significant concentration of credit risk as at 31 December 2015 and 2014.

(c) Liquidity risk

Cash flow forecast is performed in the operating entities of the Group and aggregated by the Group Treasury. The Group Treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. This forecast takes into consideration of the Group's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.

As at 31 December 2015, the Group had total banking facilities of approximately RMB138,392 million of which amounts totalling RMB67,620 million have been utilised as at 31 December 2015. Banking facilities of approximately

RMB63,877 million will be subject to renewal during the next 12 months. The directors of the Company are confident that such banking facilities can be renewed upon expiration based on their past experience and good credit standing.

In addition, as at 31 December 2015, the Group had credit facilities through its futures agent at the LME amounting to USD120 million (equivalent to RMB799.23 million) (31 December 2014: USD120 million (equivalent to RMB734.28 million)), of which USD58 million (equivalent to RMB376.28 million) (31 December 2014: USD57 million (equivalent to RMB346.09 million)) has been utilised. The futures agent has the right to adjust the related credit facilities.

Management also monitors rolling forecasts of the Group's liquidity reserve on the basis of expected cash flows.

The table below analyses the maturity profile of the Group's financial liabilities as at the end of the reporting period. The amounts disclosed in the table are the contractual undiscounted cash flows.

(b) Fair value and fair value hierarchy

Fair value

The carrying amounts and fair values of the Group's financial instruments, other than those with carrying amounts that reasonably approximate to fair values and those carried at fair value, are as follows:

	Carrying amounts		Fair values	
	31 December 2015	31 December 2014	31 December 2015	31 December 2014
Financial assets Financial assets included in other non-current assets (note 11)	6,057,461	8,393,122	6,245,648	8,703,168

	54,523,664	45,540,505	53,785,962	45,064,256

Management has assessed that the fair values of cash and cash equivalents, restricted cash and time deposits, trade and notes receivables, financial assets included in other current assets, entrusted loans, trade and notes payables, financial liabilities included in other payables and accrued liabilities, short-term and current portion of interest-bearing loans and borrowings, interest payable and the current portion of long-term payables approximate to their carrying amounts largely due to the short term maturities of these instruments.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

- * The fair values of the financial assets included in other non-current assets and financial liabilities included in other non-current liabilities have been calculated by discounting the expected future cash flows using rates currently available for instruments on with similar terms, credit risk and remaining maturities.
- * The fair values of long-term interest-bearing loans and borrowings have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities.

The Group's own non-performance risk for financial liabilities included in other non-current liabilities and long-term interest-bearing loans and borrowings as at 31 December 2015 was assessed to be insignificant.

36.3 Capital risk management

The Group's capital management objectives are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debts.

Consistent with other entities in the industry, the Group monitors capital on the basis of its gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total liabilities (excluding deferred tax liabilities and income tax payable) less restricted cash, time deposits and cash and cash equivalents. Total capital is calculated as equity, as shown in the consolidated statement of financial position, plus net debt less non-controlling interests.

During 2015 and 2014, the change in sales prices of the Group's primary products has adversely impacted on the profitability of the Group. The gearing ratio as at 31 December 2015 is as follows:

	31 December 2015	31 December 2014 (restated)
Total liabilities (excluding deferred tax		

liabilities and income tax payable)	137,922,304	152,049,076

Total capital attributable to owners of the parent	154,274,526	162,417,577
--	-------------	-------------

Gearing ratio	75%	83%
---------------	-----	-----

The decrease in the gearing ratio as at 31 December 2015 mainly resulted from the increase of share capital by the issuance of A shares.
