According to EITF 00-19, in order to classify warrants and options (other than employee stock options) as equity and not as liabilities, the Company should have sufficient authorized and unissued shares of common stock to provide for settlement of those instruments that may require share settlement. Under the terms of the convertible debentures dated April 3, 2006, the Company may be required to issue an unlimited number of shares to satisfy the debenture's contractual requirements. As such, on April 3, 2006, the Company's warrants and options (other than employee stock options) were classified as liabilities and measured at fair value with changes recognized currently in earnings.

As a result an amount of \$ 1,787 was reclassified into common stock and additional paid-in capital as follow: from conversion of the feature embedded in convertible debenture (\$1,951), convertible debenture (\$202), accrued interest (\$74) net of issuance expenses in the amount of \$440. N. On May 14, 2007, the Company consummated a private equity placement with a group of investors (the investors) for an equity investment (May 2007 Agreement). The Company sought a minimum of \$7,000 and up to a maximum of \$13,500 for shares of the Company's common stock, \$.00001 par value at a per share price of \$2.5, and warrants to purchase shares at an exercise price of \$5 exercisable until five years after the closing date of the agreement.

In May 2007, under May 2007 Agreement, the Company issued 3,126,177 shares of the Company's common stock and 3,126,177 warrants to purchase the Company's common stock in consideration for \$7,751 (net of cash issuance costs of \$64).

During July and August 2007, under May 2007 Agreement, the Company issued additional 273,828 shares of the Company's common stock and 273,828 warrants to purchase the Company's common stock in consideration for \$685. The consideration was paid partly prior to the issuance of the shares in the year ended June 30, 2007 (\$368) and was recorded as receipts on account of shares and the balance was paid during July and August 2007.

As part of May 2007 agreement, the Company signed an escrow agreement according to which, the Company granted an option to an investor to invest, under the same conditions defined in May 2007 agreement up to \$5,000 which will be paid in monthly instalments over 10 months starting six months subsequent to the closing date. According to the agreement, in the event that the investor fails to make any of the payments within five days of the payment due date, the option to invest the remaining amount will be cancelled. As a result of this agreement, the Company issued 634,580 shares of the Company's common stock and 634,580 warrants to purchase the Company's common stock in consideration for \$1,561 (net of cash issuance costs of \$25). As of March 31, 2008 the option was cancelled.

## Edgar Filing: PLURISTEM THERAPEUTICS INC - Form 10-Q

The total proceeds related to the May 2007 Agreement accumulated as of June 30, 2008 were \$9,997 (net of cash issuance costs of \$89), and 4,034,585 shares and 4,034,585 warrants were issued.

Pursuant to the agreement the Company issued 275,320 warrants to finders as finders fee. The warrants are exercisable for five years from the date of grant at an exercise price of \$2.5.

During year 2008 and 2007, 1,361,818 and 500,000 warrants related to the May 2007 Agreement were exercised on a cashless basis for 1,009,697 shares of stock and 366,534 shares of stock respectively.

In the subscription agreement for the May 2007 equity financing, there is a provision that requires the Company for a period of four years (subject to acceleration under certain circumstances) not to sell any of the Company's common stock for less than \$0.0125 per share. The May 2007 Agreement provides that any sale below that number must be preceded by consent from each purchaser in the placement. Since that date, the Company had effected a one-for-200 reverse stock split.

The Company decided to proceed and enter into additional security purchase agreements notwithstanding this provision for the following reasons:

The agreement does not contain any provisions for the adjustment of the specified minimum price in the event of stock splits and the like. If such agreement were to have contained such a provision, the floor price would be \$2.50.

N. (Cont.):

The majority of purchasers in the private placement have sold the stock purchased in the placement, and thus the number of purchasers whose consent is purportedly required has been substantially reduced. The number of shares outstanding as to which this provision currently applies according to the information supplied by transfer agent is 1.9 million shares.

An agreement that prevents the Company's Board of Directors from issuing shares that are necessary to finance the Company's business may be unenforceable.

It is unclear what could be the consequences of a court decision that the issuance of shares below \$2.50 per share violates the May 2007 Agreement.

Currently, the Company is in discussions with some of the purchasers in order to settle this matter.

O. The Company issued 28,398 warrants to the investors related to the May 2007 Agreement as compensation to investors who delivered the invested amount prior to the closing date of the placement. The warrants are exercisable for five years at an exercise price of \$2.5. The Company recorded the fair value of the warrants as financial expenses in the amount of \$651 in the year ended June 30, 2007. The fair value of these warrants was determined using the Black-Scholes pricing model, assuming a risk free rate of 4.8%, a volatility factor of 128%, dividend yield of 0% and expected life of 5 years.

Each option granted under the Plans is exercisable through the expiration date of the Plan unless stated otherwise. ### Going Concern

We have not generated revenues since inception. Historically we have relied on private placement issuances of equity and debt.

It is likely that we will need to raise additional working capital to fund our ongoing operations and growth. The amount of our future capital requirements depends primarily on the rate at which we increase our revenues and correspondingly decrease our use of cash to fund operations. Cash used for operations will be affected by numerous known and unknown risks and uncertainties including, but not limited to, our ability to successfully develop and commercialize our products and the degree to which competitive products and services are introduced to the market. As long as our cash flow from operations remains insufficient to completely fund operations, we will continue depleting our financial resources and seeking additional capital through equity and/or debt financing. If we raise additional capital through the issuance of debt, this will result in increased interest expense. If we raise additional funds through the issuance of equity or convertible debt securities, the percentage ownership of our company held by existing stockholders will be reduced and those stockholders may experience significant dilution. In addition, new securities may contain rights, preferences or privileges that are senior to those of our common stock.

There can be no assurance that acceptable financing to fund our ongoing operations can be obtained on suitable terms, if at all. If we are unable to obtain the financing necessary to support our operations, we may be unable to continue as a going concern. In that event, we may be forced to cease operations and our stockholders could lose their entire investment in our company.

### RESULTS OF OPERATIONS THREE MONTHS ENDED SEPTEMBER 30, 2008 COMPARED TO THREE MONTHS ENDED SEPTEMBER 30, 2007.

We have not generated any revenues, and we have negative cash flow from operations of \$15,273,000 and have accumulated a deficit of \$28,258,000 since our inception in May 2001. This negative cash flow is mostly attributable to research and development and general and administrative expenses. We anticipate that our operating expenses will increase as we intend to conduct detailed development of our products through animal pre-clinical trials and experiments and clinical trials. We estimate our operating cash expenses in the next twelve months to be approximately \$6,000,000.

#### Research and Development

Research and development expenses net for the three months ended September 30, 2008 increased by 43% to \$1,193,000 from \$837,000 for the three months ended September 30, 2007. The increase is due to the increase in salary expenses and subcontractor expenses attributed to an increase in the number of employees and research activity as part of our progress towards clinical trials, and decrease in the participation by the Israeli Office of the Chief Scientist, deducted with the decrease in stock-based compensation to employees and consultants in the amount of \$504,000 as a result of a decrease in our stock price.

#### General and Administrative

General and administrative expenses for the three months ended September 30, 2008 decreased by 36% to \$1,003,000 from \$1,557,000 for the three months ended September 30, 2007. The decrease in general and administrative expenses is primarily attributable to the decrease in stock-based compensation to employees and consultants which decreased from \$938,000 to \$381,000.

### Financial Income, net

The decrease in financial income from \$114,000 for the three months ended September 30, 2007 to an expense of \$46,000 for the three months ended September 30, 2008, was mainly as a result of the loss from sale of marketable securities.

### Net Loss

Net loss for the three months ended September 30, 2008 was \$2,242,000, as compared to net loss of \$2,280,000 for the three months ended September 30, 2007. Net loss per share for the three months ended September 30, 2008 was \$0.29 as compared to \$0.39 for the three months ended September 30, 2007. The net loss per share decreased as a result of the increase in our weighted average number of shares due to the issuance of additional shares in pursuant to a shelf registration statement, as discussed further below.

### Liquidity and Capital Resources

As of September 30, 2008, total current assets were \$2,661,000 and total current liabilities were \$853,000. On September 30, 2008, we had a working capital surplus of \$1,808,000 and an accumulated deficit of \$28,258,000. We finance our operations and plan to continue doing so with stock issuances and with the participation of the Office of the Chief Scientist.

Cash and cash equivalents as of September 30, 2008 amounted to \$1,978,000. This is an increase of \$1,655,000 from the \$323,000 reported as of June 30, 2008. We had no marketable securities on September 30, 2008 as opposed to marketable securities in the amount of \$1,185,000 that we had as of June 30, 2008 and sold afterwards in light of volatile market conditions and the need for cash in the short-term. Cash balances increased in the three months ended September 30, 2008 for the reasons presented below:

Operating activities used cash of \$1,805,000 in the three months ended September 30, 2008. Cash used by operating activities in the three months ended September 30, 2008 primarily consisted of payments of salaries to our employees, and payments of fees to our consultants, subcontractors and professional services providers.

Investing activities provided cash of \$953,000 in the three months ended September 30, 2008. This resulted primarily from proceeds from sale of marketable securities in the amount of \$1,113,000 deducted by costs associated with upgrading our facilities to Good Manufacturing Practice, or GMP, standard facilities in the amount of \$183,000.

Financing activities generated cash amount of \$2,507,000 during the three months ended September 30, 2008 resulting primarily from receiving cash from investors related to the August and September 2008 offerings described below.

On August 6, 2008, we sold 1,391,304 shares of our common stock and warrants to purchase 695,652 shares of Common Stock at an exercise price of \$1.90 per share to two investors in consideration of \$1,600,000 pursuant to terms of a securities purchase agreement. Rodman & Renshaw, LLC acted as placement agent, on a best efforts basis, for the offering and received a placement fee equal to 6% of the gross purchase price of the Units (excluding any consideration that may be paid in the future upon exercise of the Warrants) as well as warrants to purchase 83,478 shares of common stock at an exercise price of \$1.44 per share. Subject to FINRA Rule 2710, the placement agent warrants may be exercised after six months through and including August 5, 2013. The offering was made pursuant to our effective shelf registration statement on Form S-3 (File No. 333-151761).

On September 22, 2008, we sold 900,000 shares of our common stock and warrants to purchase 675,000 shares of Common Stock to an investor in consideration for \$1,035,000 pursuant to terms of a securities purchase agreement. The price per share of Common Stock is \$1.15, and the exercise price of the Warrants is \$1.90. The Warrants will be exercisable for a period of five years. The offering was made pursuant to our effective shelf registration statement on Form S-3 (File No. 333-151761). As part of this transaction, we are obligated to pay a transaction fee to finders equal to 6% of the actual Purchase Price and 41,400 warrants exercisable for five-years at an exercise price of \$1.50 per share to purchase 41,400 of our company's shares of Common Stock.

We do not expect to generate any revenues from sales of products in the next twelve months. We may generate revenues from the sale of licenses to use our technology. Our products will likely not be ready for sale for at least three years, if at all.

In our management's opinion, we expect to achieve the following events or milestones in the next twelve months in order for us to begin generating revenues as planned in three years or more:

## Edgar Filing: PLURISTEM THERAPEUTICS INC - Form 10-Q

Filing the IND (Investigation New Drug) package with the U.S. Food and Drug Administration, or FDA.

Scaling up of our 3-D PluriX™ Bioreactor operations bringing them to commercial capabilities.

Start the first Phase I clinical trial with the PLX-PAD after the FDA approval, or the IND.

### Outlook

We believe that the funds we have together with expected funds from the OCS will be sufficient for operating for at least two fiscal quarters. Management believes that we will need to raise additional funds before we have any cash flow from operations. To cut our expenses, effective on November 1, 2008 we have reduced the cash compensation of all management and directors by 10% for a period of six months. We plan to issue restricted stock to the management and directors to make up for such reduction. We believe that it will take several years for us to complete the approval process for our products in the United States or any other jurisdiction. In addition, future decisions regarding any acquisitions that we may choose to make or expanded product development, as to which there can be no assurance of success, will require additional capital, which must be raised through the issuance of additional securities and/or incurring debt. There can be no assurance, however, that acceptable financing to fund our ongoing operations can be obtained on suitable terms, if at all. If we are unable to obtain the financing necessary to support our operations, we may be unable to continue as a going concern. In that event, we may be forced to cease operations and our stockholders could lose their entire investment in our company.

### APPLICATION OF CRITICAL ACCOUNTING POLICIES

Our financial statements and accompanying notes are prepared in accordance with generally accepted accounting principles in the United States. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. These estimates and assumptions are affected by management's application of accounting policies. We believe that understanding the basis and nature of the estimates and assumptions involved with the following aspects of our consolidated financial statements is critical to an understanding of our financials. Critical and significant accounting policies are described in our latest audited financial statements and such policies have not changed materially.

#### *Off Balance Sheet Arrangements*

Our company has no off balance sheet arrangements that are not disclosed in our annual report on Form 10-K as filed with the U.S. Securities and Exchange Commission on September 29, 2008.

### Item 4T. Controls and Procedures.

***Evaluation of Disclosure Controls and Procedures*** We maintain a system of disclosure controls and procedures that are designed for the purposes of ensuring that information required to be disclosed in our Securities and Exchange Commission, or SEC, reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer ( CEO ) and our Chief Financial Officer ( CFO ), as appropriate to allow timely decisions regarding required disclosures.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our CEO and our CFO, of the effectiveness of our disclosure controls and procedures as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures are effective.

***Changes in Internal Control Over Financial Reporting*** There has been no change in our internal control over financial reporting during the first quarter of fiscal 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
