First loss utilisation

The Group has agreed with HM Treasury modifications to the Scheme rules, which affect most APS portfolios in Global Banking & Markets and an APS portfolio in UK Corporate that relates to larger clients. All other APS portfolios in the Group are unaffected. The overall economic aspects of the Scheme are unchanged, including value and term of cover, credit derivative valuation and capital effects.

The modified rules for recognition of triggered assets align more closely to the Group's normal accounting and risk management procedures and will reduce the administrative burden of operating the Scheme. For the portfolios subject to these changes, the calculation of loss now takes into account expected recoveries in addition to those already received. This has resulted in a reduction in first loss utilisation. A comparison of losses arising under the original Scheme rules with those arising under the modified Scheme rules is set out below. This covers the period from Scheme inception to 31 March 2011 (the last point at which the original rules applied for the affected assets).

	£m
Original First Loss Utilisation	38,961
Assets not triggered under modified rules (1)	(4,126)
Assets triggered under modified rules (2)	997

Expected recoveries (3)	(6,272)
Revised First Loss Utilisation	29,560

## Notes:

- (1) Assets that had triggered under the original Scheme rules but were not impaired or defaulted are not triggered under the modified rules.
- (2) Assets that had not yet triggered under the original Scheme rules but had impaired or defaulted are triggered under the modified rules.
- (3) For assets which have triggered under both original and modified rules, this amount represents the excess of expected recoveries over cash recoveries received to date.
