GSK publishes historical quarterly restated financial information.

As previously announced, for 2012 GlaxoSmithKline (GSK) will adopt a revised presentation for the analysis of its Pharmaceuticals and Vaccines turnover by product and therapeutic area that identifies revenues from Emerging Markets/Asia Pacific (excluding Australasia) ('EMAP') as a new segment. This replaces the separate Emerging Markets and Asia Pacific segments reported in 2011. Australasia will now be reported in Rest of World, along with Canada, Puerto Rico and other central revenues.

The revised reporting approach is in line with International Financial Reporting Standards (IFRS) that require companies' segment reporting to be representative of the way in which performance is reported internally.

In addition, the classification of certain products has been changed in 2012, including:

- The transfer of the OTC dermatology brands acquired with the Stiefel business from the Pharmaceuticals and Vaccines business to the Consumer Healthcare business in the USA and Europe;
- The creation of a Rare diseases therapy area;
- The transfer of Zovirax from the Dermatology therapy area to the Anti-viral therapy area; and
- Consumer Healthcare will be reported in four categories: Total wellness, Oral care, Nutrition and Skin health.

In order to assist future comparability with historical data, this release includes the Pharmaceuticals and Vaccines turnover by product for each quarter since the period ended 31 March 2011, and for the full years 2011 and 2010, presented on a like-for-like basis with the classifications that will be reported in 2012.

On 1 December 2011, GSK announced the introduction of core measures for both operating profit and earnings per share to report the performance of the Group with effect from Q1 2012. The primary purpose is to provide a clearer view of the underlying performance of GSK's core business by removing the volatility created by various items such as the impairment of intangible assets, legal charges and asset disposal gains and losses. As previously announced, the adjustments to be made in arriving at core will be as follows:

- Amortisation and impairment of intangible assets (excluding computer software) and goodwill;
- Major restructuring costs;
- Legal charges;
- Other operating income and disposal of associates, products and businesses;
- Acquisition accounting adjustments for material acquisitions; and
- Tax on adjustments.

It was also announced that with effect from Q1 2012, charges for amortisation and impairment of intangible assets related to marketed products will be reported in cost of sales (previously these were included in SG&A). In order to assist future comparability with historical data, this release includes reconciliations of total results restated (for the above referenced change in the presentation of amortisation and impairment of intangible assets related to marketed products) to core earnings for each quarter since the period ended 31 March 2011 and for the full years 2011 and

2010.

None of the restatements noted above has any impact on earnings per share either for total results or for core earnings.

CER growth

In order to illustrate underlying performance, it is the Group's practice to discuss its results in terms of constant exchange rate (CER) growth. This represents growth calculated as if the exchange rates used to determine the results of overseas companies in Sterling had remained unchanged from those used in the comparative period.
