ITEM 1. Business

This report contains forward-looking statements that involve risks and uncertainties. You should not rely on forward-looking statements. The statements in this report that are not purely historical are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. We use words such as anticipate, believe, plan, expect, future, intend, may, will, should, es potential, continue, and similar expressions to identify such forward-looking statements. These forward-looking statements include, but are not limited to:

statements regarding new and future products and services;

statements regarding our future business plans and growth strategy, including our recently announced restructuring and planned reduction of our mobile media content product offerings;

the expected demand for and benefits of our online and mobile products and services for our customers and distribution partners;

statements regarding seasonality of revenue and concentration of revenue sources;

anticipated benefits from the business and technologies we have acquired or intend to acquire;

anticipated development or acquisition of intellectual property and resulting benefits;

anticipated results of potential or actual litigation;

statements regarding our competitive environment;

statements regarding the impact of governmental regulation;

statements regarding employee hiring and retention, including anticipated reductions in force and headcount;

statements regarding the future payment of dividends;

anticipated revenue and expenses;

statements regarding expected impacts of changes in accounting rules, including the impact on deferred tax benefits;

statements regarding use of cash, cash needs and ability to raise capital; and

Edgar Filing: INFOSPACE INC - Form 10-K

statements regarding potential liability from contractual relationships.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause our results, levels of activity, performance, achievements and prospects, and those of the wireless and Internet industries generally, to be materially different from those expressed or implied by such forward-looking statements. These risks, uncertainties and other factors include, among others, those identified under Item 1A, Risk Factors and elsewhere in this report.

Overview

InfoSpace, Inc. (InfoSpace , Our or We) is a developer of tools and technologies that assist consumers with finding content and information on the Internet or mobile phone. We use our technology, including metasearch, to power our own branded Web sites and provide private-label online search and directory services to distribution partners. In addition, our mobile applications provide programming and sales opportunities to our mobile carrier partners, while providing consumers with relevant mobile functionality and mobile media content, including ringtones, graphics, and games. We were founded in 1996 and are incorporated in the state of Delaware. Our principal corporate offices are located in Bellevue, Washington. We also have facilities in Los Angeles, California; Westborough, Massachusetts; Woking and Eastleigh, United Kingdom; and Papendrecht, The Netherlands. Our common stock is listed on the Nasdaq Stock Market under the symbol INSP.

Table of Contents

In September 2006, we announced that we had been informed by one of our carrier partners that it intended to develop direct relationships for mobile ringtone content with the major record labels beginning in 2007. We anticipated that such direct relationships between the carrier and content providers would have a material negative impact on our revenues and operating results. As a result, during September 2006, we committed to a plan to make operational changes to our business to align operational focus and costs with expected future revenues. The plan included a reduction in our workforce and consolidation of our facilities. We also suspended investment in mobile media content initiatives and, accordingly, intend to substantially reduce, through various initiatives, our mobile media content product offerings by mid-2007 by eliminating certain products including, but not limited to, ringtones, graphics and games. We will continue to operate our two business units: Online, comprised of our search and directory properties as well as our private label distribution service and Mobile services, including portal, storefront, messaging, and mobile search.

Company Internet Site and Availability of SEC Filings. Our corporate Internet site is located at www.infospaceinc.com. We make available on that site our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, as well as any amendments to those filings, and other filings we make electronically with the U.S. Securities and Exchange Commission (the "SEC"). The filings can be found in the Investor Relations section of our site and are available free of charge. Information on our Internet site is not part of this Form 10-K. The SEC maintains an Internet site at www.sec.gov that contains reports, proxy and information statements, and other information regarding us and other issuers that file electronically with the SEC.

ONLINE

Our Online search and directory services enable Internet users to locate information, merchants, individuals and products online. We offer search and directory services through our branded Web sites, Dogpile.com, Switchboard.com, InfoSpace.com, Webcrawler.com, MetaCrawler.com, and Zoo.com, as well as through the Web properties of distribution partners. Partner versions of our search and directory services are generally private-labeled and delivered with each distribution partner's unique requirements. See Note 10 Business Unit Disclosures in the Notes to Consolidated Financial Statements (Item 8, of Part II of this Report) for further discussion.

Our search offerings differ from most other mainstream search services in that they provide "metasearch" technology that selects results from several search engines, including Google and Yahoo!, among others. We offer search services through our own Web sites, as well as through the Web properties of distribution partners including Akarl, Cablevision, Info.com, Verizon Online, WhenU, and others.

Our directory services include online yellow and white pages services. InfoSpace directory properties help Internet users find local and national merchants and individuals in North America. We offer directory services through our branded Web sites, such as Switchboard.com and InfoSpace.com, as well as through distribution partner relationships. We obtain the underlying directory listings primarily through our relationships with Yellowpages.com and Verizon.

We compete against other providers of Web search services, major Internet portals and Web-based directories. We also compete against more traditional advertising media, including radio, network and cable television, newspaper, magazines, Internet, direct mail and others for a share of the U.S. advertising media market.

MOBILE

Edgar Filing: INFOSPACE INC - Form 10-K

Our Mobile business delivers data technology solutions, consulting and management services for the mobile operator market, including portal, storefront, search and messaging solutions. Additionally, we provide mobile media content products, including ringtones, graphics and games, to subscribers of our Mobile customers. However, we plan to substantially reduce, through various initiatives, our mobile media content product offerings

Table of Contents

by mid-2007. Through our products, content and service offerings, our mobile operator partners are able to aggregate, configure and customize the services they offer under their own brand and deliver them to their subscribers. As of December 31, 2006, we had relationships with many leading mobile operators, including Cingular Wireless, T-Mobile, Virgin Mobile US, Verizon Wireless, and Virgin Mobile UK. See Note 10 Business Unit Disclosures in the Notes to Consolidated Financial Statements (Item 8, of Part II of this Report) for further discussion.

Competitors include mobile application providers, mobile application aggregators, mobile application enablers, entertainment and other digital media companies, and the mobile operators themselves.

Seasonality

Our online search and directory services are affected by seasonal fluctuations in Internet usage, which generally declines in the summer months. Our mobile products and services may also be subject to seasonality based on the timing of consumer product cycles and other factors, such as the timing of new mobile phone sales.

International Operations

We currently maintain facilities in the United States, the United Kingdom, and The Netherlands.

We have historically generated most of our revenues from customers in the United States. Revenue generated in the United States accounted for 96% in 2006, 93% in 2005, and 93% in 2004 of our total revenues in those years.

Revenue Sources

Our revenues are derived from products and services delivered to our customers and distribution partners across our two businesses, Online and Mobile. We derive a significant portion of our revenue from a small number of customers and we expect that this concentration will continue in the foreseeable future. Cingular Wireless, Google, and Yahoo! each accounted for more than 10% of our revenues in 2006.

Online Revenue: We generate revenues from our Web search and directory services when an end user of our services generates a paid search at our Web site. We also generate revenues from paid searches through a distribution partner's Web property. Revenues are recognized in the period in which a paid search occurs and are based on the amounts earned and remitted to us by our customer content providers. We also generate advertising revenues by selling banner, button and text-link advertisements based on cost per search or page view, which are recognized when the services are delivered.

Mobile Revenue: We earn revenues typically through agreements with mobile operators for various services, which include subscriber usage, hosting and maintenance services, and professional services, as well as for the delivery of mobile media content products, such as ringtones,

Edgar Filing: INFOSPACE INC - Form 10-K

graphics and games. We recognize subscriber usage revenues based on a fee per user or per usage by the end user. We recognize revenue from hosting services and maintenance of such services in the period in which the service is provided. We sometimes earn one-time user set-up fees, which are generally amortized over the term of the customer contract. We recognize revenues from professional services in the period in which the work is completed and accepted by the customer. We recognize revenue from our mobile media content product when it is delivered.

Product Development

We believe that our technology is essential to successfully implement our strategy of expanding and enhancing our products and services and maintaining the attractiveness and competitiveness of our products and

Table of Contents

services. Product development expenses were \$46.3 million in the year ended December 31, 2006, \$31.2 million in the year ended December 31, 2005, and \$23.1 million in the year ended December 31, 2004.

Intellectual Property

Our success depends significantly upon our technology. To protect our rights, we rely on a combination of copyright and trademark laws, patents, trade secrets, confidentiality agreements with employees and third parties and protective contractual provisions. Most of our employees have executed confidentiality and non-use agreements that contain provisions prohibiting the unauthorized disclosure and use of our confidential and proprietary information and that transfer to us any rights they may have in copyrightable works or patentable technologies that they may develop while under our employ. In addition, prior to entering into discussions with third parties regarding our business and technologies, we generally require that such parties enter into nondisclosure agreements with us. If these discussions result in a license or other business relationship, we also generally require that the agreement setting forth the parties' respective rights and obligations include provisions for the protection of our intellectual property rights. For example, the standard language in our agreements with distribution partners provides that we retain ownership of all patents and copyrights in our technologies and requires them to display our patent, copyright and trademark notices.

We hold over 50 U.S. registered trademarks and over 100 foreign trademarks registered in various countries. We also have applied for registration of certain service marks and trademarks in the United States and in other countries, and will seek to register additional marks in the U.S. and foreign countries, as appropriate. We may not be successful in obtaining registration for the service marks and trademarks for which we have applied.

We hold over 30 U.S. and foreign patents. Our issued patents relate to our online directory, advertisement and location services, among others. We are currently pursuing certain pending U.S. and foreign patent applications that relate to various aspects of our technology. We anticipate on-going patent application activity in the future. However, patent claims may not be issued and, if issued, may be challenged or invalidated by third parties. In addition, issued patents may not provide us with any competitive advantages.

Despite our efforts to protect our rights, unauthorized parties may copy aspects of our products or services or obtain and use information that we regard as proprietary. The laws of some foreign countries do not protect proprietary rights to as great an extent as do the laws of the United States. In addition, others could independently develop substantially equivalent intellectual property. If we do not effectively protect our intellectual property, our business could suffer.

Companies and individuals in the arts and entertainment industry, as well as in the Internet software and application services industry, have frequently resorted to litigation regarding intellectual property rights. We may have to litigate to enforce our intellectual property rights, to protect our trade secrets or to determine the validity and scope of others' proprietary rights which are sometimes not clear or may change. From time to time, we have received, and may receive in the future, notice of claims of infringement of others' proprietary rights. Responding to any such claims could be time-consuming, result in costly litigation, divert management's attention, cause product or service release delays, require us to redesign our products or services or require us to enter into royalty or licensing agreements. If a successful claim of infringement were made against us and we could not develop non-infringing technology or license the infringed or similar technology on a timely and cost-effective basis, our business could suffer.

MetaCrawler License Agreement. We hold an exclusive, perpetual worldwide license, subject to certain limited exceptions, to the MetaCrawler intellectual property and related search technology from the University of Washington, which we use in our web search services.

Competition

We operate in the online search and directory markets and mobile services and media markets, which are extremely competitive and rapidly changing. Our current and prospective competitors include many large

Table of Contents

companies that have substantially greater resources than we have. We believe that the primary competitive factors in the market for online and mobile services are:

our customers going direct to our distribution partners or our third party content providers, such as our recent announcement that one of our mobile customers plans to develop direct licensing relationships with the major record labels beginning in 2007;

the ability to meet the specific information and service demands of a particular Web property, mobile device or platform;

the cost-effectiveness, reliability and security of the products and application services;

the ability to provide products and application services that are innovative and attractive to consumers, subscribers and other end users;

the ability to develop innovative products and services that enhance the appearance and utility of the Web property, mobile device or platform; and

the ability to meet the needs of mobile operators and other major customers and distribution partners.

Although we believe that no one competitor offers all of the products and services we do, our primary offerings face competition from various sources. We compete, directly or indirectly, in the following ways, among others:

Our distribution partners and third party content providers are also our competitors.

Our search services compete with search providers and Internet portals such as Google, Yahoo! and Microsoft's MSN. Our online directory services compete with Internet portals and print and Web-based directories. These services also compete against more traditional advertising media, including radio, network and cable television, newspaper, magazines, Internet, direct mail and others for a share of the U.S. advertising market. Other information services we provide compete with specialized content providers.

Our mobile services compete with mobile application aggregators, mobile application enablers, media companies, content developers and publishers, and in-house information technology departments of mobile operators and device manufacturers.

In international markets, we compete with local companies which may have a competitive advantage due to their greater understanding of and focus on a particular local market.

We expect that in the future we will experience competition from other Internet application and mobile services companies, as well as from content providers. Some of these companies are currently customers, distribution partners or content providers of ours, the loss of which could harm our business.

Edgar Filing: INFOSPACE INC - Form 10-K

Many of our current customers have established relationships with some of our current and potential future competitors. Some of our customers are also our competitors. If our competitors develop software and application services that are superior to ours, or that achieve greater market acceptance than ours, our business will suffer.

Governmental Regulation

Because of the increasing use of the Internet and wireless devices, U.S. and foreign governments have adopted or may in the future adopt laws and regulations relating to the Internet or use of wireless devices, addressing issues such as consumer protection, user privacy, security, pricing, age verification, content, taxation, copyrights and other intellectual property, distribution, advertising and product and services quality.

Recent concerns regarding Internet and wireless device user privacy have led to the introduction of U.S. federal and state legislation to protect user privacy and data security. Existing federal laws regarding user privacy that we may be subject to include the Children's Online Privacy Protection Act, which regulates the online and,

Table of Contents

in some interpretations, wireless collection of personal information from children under 13, and the Gramm-Leach-Bliley Act, which regulates the collection and processing of personal financial information as well as imposes information security obligations. In addition, the Federal Trade Commission (the "FTC") has initiated investigations and hearings regarding Internet user privacy and data security, which could result in rules or regulations that could adversely affect our business. Various states have likewise sought to regulate consumer protection, advertising, privacy and data security in ways that may affect the collection, use and disclosure of information. For example, California has passed several laws relating to the collection, storage and distribution of personal information, requiring in part the posting of a privacy policy and disclosure of how information is shared with third parties for marketing purposes as well as obligating businesses to secure such information. We could become subject to new laws and regulations that could limit our ability to conduct targeted advertising, to distribute or collect user information or impose new data security costs on us.

Countries outside of the United States may have more restrictive privacy laws. The European Union, for example, strictly regulates the collection, use and transfer of personal information of European residents. Further, information lawfully collected in the European Union may not be transferred for processing outside Europe to a country that lacks adequate protections. The European Union has deemed the U.S. to lack such protections and transfers of personal information gathered in Europe to the United States are only permitted under limited circumstances. Other countries such as Canada follow models similar to the European Union albeit without express prohibitions on data export. These and similar restrictions may limit our ability to collect and use information regarding Internet users in those countries.

We may be subject to provisions of the Federal Trade Commission Act and similar state laws that regulate consumer protection and advertising in all media, including the Internet, and require advertisers to substantiate advertising claims before disseminating advertising. The FTC and various state attorneys general have recently brought actions charging deceptive advertising via the Internet and may actively monitor Internet advertising. The United States and various individual states have also enacted restrictions on advertising through other media. For example, in the United States, the Telephone Consumer Protection Act, "Do Not Call" legislation and similar state laws regulate the manner in which we may advertise goods and services via telephones and facsimiles. Also, with respect to our tournament games, most states regulate the provision of prizes for mobile games or other contests, and other states may adopt similar regulations.

Other countries similarly regulate direct and indirect marketing. For example, the European Union has enacted an electronic communications directive that imposes certain restrictions on the use of cookies and action tags as well as the sending of unsolicited communications. Also, like the United States, the members of the European Union and other countries each may have localized consumer protection, advertising, and privacy related legislation that may impose additional costs or limit our ability to conduct business in such regions and elsewhere.

We may also be subject to the provisions of the Child Online Protection Act, which restricts the distribution of certain materials deemed harmful to children. The Act is also designed to restrict access to such materials by children, and accordingly, the provisions of this Act may apply to certain Internet and wireless product and service providers even though such companies are not engaged in the business of distributing the harmful materials. Although some court decisions have cast doubt on the constitutionality of the Act, and we have instituted processes for voluntary compliance with provisions of the Act that may be relevant to our business, the Act could subject us to liability.

These or other laws or regulations that may be enacted in the future could have adverse effects on our business, including higher regulatory compliance costs, limitations on our ability to provide some services in some countries, and liabilities which might be incurred through lawsuits or regulatory penalties. For example, numerous states now require that companies notify individuals of security breaches that may result in third parties gaining unauthorized access to certain types of personal information. We believe we take reasonable steps to protect the security and confidentiality of the information we collect and store but there is no guarantee that third parties will not gain unauthorized access despite our efforts or that we will not incur costs in complying with our notification obligations under such circumstances.

Table of Contents**Employees**

As of January 31, 2007, we had approximately 530 employees. None of our employees are represented by a labor union and we consider employee relations to be positive. There is significant competition for qualified personnel in our industry, particularly for software development and other technical staff. We believe that our future success will depend in part on our continued ability to hire and retain qualified personnel.

Executive Officers and Directors of the Registrant

The following table sets forth certain information as of February 16, 2007 with respect to our executive officers and directors:

Name	Age	Position
James F. Voelker	55	Chairman, Chief Executive Officer and President
Allen M. Hsieh	46	Chief Financial Officer
Brian T. McManus	49	Executive Vice President Online
Steven L. Elfman	51	Executive Vice President Mobile
R. Bruce Easter, Jr.	49	Senior Vice President, General Counsel and Secretary
John E. Cunningham, IV	49	Director
Jules Haimovitz	56	Director
Richard D. Hearney	67	Director
Lewis M. Taffer.	59	Director
George M. Tronsrue, III	50	Director
Vanessa A. Wittman	39	Director

James F. Voelker has served as our Chairman and Chief Executive Officer since December 2002, and also as President since December 2005. He also held the title of President from December 2002 to April 2003. He has served as a director since July 2002. Mr. Voelker served as President and a director of NEXTLINK Communications, Inc. (now XO Communications, Inc.), a broadband communications company, from inception in 1994 through 1998.

Allen M. Hsieh was appointed Chief Financial Officer in November 2006, after serving as interim Chief Financial Officer from April 2006 to October 2006. Mr. Hsieh joined us in June 2003 as Chief Accounting Officer and Vice President Financial Operations. From February 2000 to March 2003, he served as Vice President Finance at Terabeam Corp., a provider of fiberless optics communications. Prior to Terabeam he served in various positions at PricewaterhouseCoopers LLP, a big four accounting firm, from July 1985 to February 2000, the last two years as a partner in their accounting and auditing practice.

Brian T. McManus was appointed Executive Vice President Online in October 2006, after serving as Executive Vice President Sales and Business Development from January 2006 to October 2006. He also served as Executive Vice President, Search and Directory from April 2003 to January 2006. From April 2000 to October 2002, he served as Vice President of Corporate Development at Internet service provider Epoch Internet.

Steven L. Elfman was appointed Executive Vice President Mobile in October 2006, after serving as Executive Vice President, Technology and Operations and Managing Director of Europe from August 2005 to October 2006. He also served as Vice President-Mobile Operations from

Edgar Filing: INFOSPACE INC - Form 10-K

November 2004 to July 2005, and as Chief Technology Officer and Vice President-Engineering and Operations from July 2003 to November 2004. From May 2003 to July 2003, he was a consultant at Accenture Ltd., a consulting company. From September 2001 to May 2003, Mr. Elfman served as Executive Vice President of Operations at Terabeam Corp., a provider of fiberless optics communications.

R. Bruce Easter, Jr. joined us in December 2006 as Senior Vice President, General Counsel and Secretary. From February 2003 to December 2006, he served as General Counsel for Seattle Northwest Securities Corporation, an investment banking firm. From January 1995 through December 1999, he served as Vice President and General Counsel at NEXTLINK Communications.

Table of Contents

John E. Cunningham, IV has served as a director of InfoSpace since July 1998. Mr. Cunningham has been a general partner of Clear Fir Partners, L.P., a private equity investment partnership, since February 1998. Since January 2004, he has served as a board member of Citel Technologies, Inc., a telecommunications company, and also served as its non-executive chairman from January 2004 to July 2006. From April 1995 until February 2003, he served as President of Kellett Investment Corporation, an investment fund for private companies.

Jules Haimovitz was appointed as a director in October 2005. Since July 2002, Mr. Haimovitz has served as Vice Chairman and Managing Partner of Dick Clark Productions Inc., a producer of programming for television, cable networks and syndicators. From June 1999 to July 2004, Mr. Haimovitz served in various capacities at Metro Goldwyn Mayer Inc., including President of MGM Networks Inc., a wholly-owned subsidiary, Executive Consultant to the CEO, and Chair of the Library Task Force. Mr. Haimovitz is a director of Blockbuster, Inc., a provider of in-home movie and game entertainment.

Richard D. Hearney has served as a director since September 2001. General Hearney served as President and Chief Executive Officer of Business Executives for National Security, an organization focusing on national security policy, from December 2000 to April 2002.

Lewis M. Taffer has served as a director since June 2001. Since March, 2006, Mr. Taffer has served as an Operating Advisor at Pegasus Capital Advisors. Since May 2006, he has served as a director and Senior Vice President at iGPS Company LLC, a provider of RFID (radio frequency identification)-tagged plastic pallet rental systems and an affiliate of Pegasus Capital Advisors. Since January 2005, he has been an independent management consultant. From January 2004 to January 2005, Mr. Taffer served as Executive Vice President, Acquisition Marketing of America Online. From May 2001 through December 2003, Mr. Taffer was an independent consultant specializing in marketing, business development and strategic partnerships.

George M. Tronsrue, III was appointed as a director in February 2003. Since March 2004, Mr. Tronsrue has served as Co-Manager of Jericho Fund, LLC, an investment and consulting company. From January 2000 to March 2004, Mr. Tronsrue served as Chairman and Chief Executive Officer of Monet Mobile Networks Inc., a wireless Internet service provider. Monet Mobile filed for Chapter 11 bankruptcy protection in March 2004.

Vanessa A. Wittman was appointed as a director in April 2003. From March 2003 to December 2006, Ms. Wittman served as Executive Vice President and Chief Financial Officer of Adelphia Communications Corporation, a cable television company. From February 2000 to March 2003, Ms. Wittman served as Chief Financial Officer of broadband network services provider 360networks, Inc.

Table of Contents

ITEM 1A. Risk Factors

RISKS RELATED TO OUR BUSINESS

A substantial portion of our revenues is dependent on our relationships with a small number of distribution partners who distribute our products and services, the loss of which would have a material adverse effect on our financial results.

We rely on our relationships with distribution partners, including mobile operators, Web portals and software application providers, for distribution of our products and services. We generated approximately 51% of our total revenues through relationships with our top five distribution partners for the year ended December 31, 2006. We cannot assure you that these relationships will continue or result in benefits to us that outweigh the cost of the relationships. One of our challenges is providing our distribution partners with relevant products and services at competitive prices in rapidly evolving markets. In September 2006, we announced that one of our major mobile customers plans to develop direct licensing relationships with the major record labels beginning in 2007. We anticipate that the direct relationships to be developed by this mobile customer and our substantial reduction of our mobile media content product offerings will have a material negative impact on our revenues. In addition, other distribution partners, including our other mobile distribution partners, may create their own products and services or also seek to license products and services from others that compete with or replace the products and services that we provide. Also, many of our search distribution partners are developing companies with limited operating histories and evolving business models that may prove unsuccessful even if our products and services are relevant and our prices competitive. If we are not able to maintain our relationships with our distribution partners, our financial results would be materially adversely affected.

Our mobile operator distribution partner agreements generally come up for renewal on an annual basis, and our agreements with most of our online search and directory distribution partners come up for renewal in 2007 and 2008. Such agreements may be terminated or may not be renewed or replaced on favorable terms, which could adversely impact our financial results. In particular, we are experiencing pricing pressure in our mobile business, and competition is increasing for consumer traffic in the search and directory markets. We anticipate that the cost of our content for our revenue sharing arrangements with our search distribution partners will increase as revenues grow and may increase on a relative basis compared to revenues to the extent that there are changes to existing arrangements or we enter into new arrangements on less favorable terms.

Failure by us or our search distribution partners to comply with the requirements imposed by our search content providers relating to the distribution of content may require us to modify, terminate or not enter into certain distribution relationships, may cause the content provider to terminate its agreement with us, and may expose us to liability.

If our search distribution partners or we fail to meet the requirements and guidelines promulgated by our major search content providers, we may not be able to continue to provide content to such distribution partners, we may be liable to such content providers for certain damages they may suffer, and the content provider may terminate its agreement with us. In the past, certain of our search content providers had notified us that we were not in compliance with respect to our use of their content or the redistribution of their content by our distribution partners. We have been able to cure such breaches, however, there can be no assurance that if we breach our agreements in the future we will be able to cure the breach. Our agreements with some of our major content providers give such content providers the ability to terminate their agreements with us immediately in the case of certain breaches, regardless of whether such breaches could be cured.

Additionally, agreements with our search content providers may be amended from time to time by both parties or may be subject to different interpretation by either party, which may require the rights we grant to our search distribution partners to be modified to comply with such

Edgar Filing: INFOSPACE INC - Form 10-K

amendments or interpretations. The agreements with our search distribution partners generally provide that we may modify the rights we grant to them to avoid being in conflict with the agreements with our search content providers. For example, recent changes by some of

Table of Contents

our search content providers such as Google and Yahoo! to their approval processes and guidelines with respect to downloadable applications through which content is provided to end users have resulted in some of our search distribution partners changing the manner in which they distribute their downloadable applications to end users to meet the new approval processes and guidelines. Other distribution partners have not been able to meet the new guidelines, and as a result we no longer provide the applicable content or any content, as the case may be, to such distribution partners or certain of their downloadable applications. Also, our search content providers have approval processes with respect to the redistribution of their content by our distribution partners. Some of our distribution partners that redistribute such content have not complied with such approval processes, and we no longer provide the applicable content to such partners or such partners no longer redistribute the content. If our search content providers impose additional restrictions, some of our distribution partners may be required to make changes to the manner in which they distribute their downloadable applications or may be required to cease redistributing the content. If such distribution partners are unable to meet the new restrictions, we may need to terminate our agreement with such distribution partners or no longer provide the applicable content to such partners.

The loss or reduction of content that we can make available to our distribution partners, as well as the termination of distribution or content provider agreements, as described above, could have a material adverse effect on our financial results.

A substantial portion of our revenues is attributable to a small number of customers, the loss of any one of which would harm our financial results.

We derive a substantial portion of our revenues from a small number of customers. We expect that concentration will continue in the foreseeable future. Our top five customers represented approximately 85%, 81%, and 82% of our revenues in 2006, 2005, and 2004, respectively. Cingular Wireless, Google and Yahoo! each accounted for more than 10% of our revenues in 2006. Our principal agreements with these customers expire in 2007, 2009 and 2008, respectively. Also, some of these customers are competitors of each other, and the way we do business with one of them may not be acceptable to one or some of their competitors with whom we also do business, which may result in such competitors not renewing their agreements with us on favorable terms.

If any of our top customers significantly reduces or eliminates the content or services it receives from us under our existing contracts, or we are unable to renew the contracts on favorable terms, or any of these customers are unwilling to pay us amounts that they owe us, or dispute amounts they owe us or have paid to us, our financial results would materially suffer. For example, in September 2006, we announced that one of our mobile customers plans to develop direct licensing relationships with the major record labels beginning in 2007. Although this mobile customer can continue to receive, or reduce further, the mobile content and services it receives from us under our existing agreements, we expect that the loss of the labeltones content portion will have a material negative impact on our revenues.

If our content providers or distribution partners disagree with our estimate of our royalty liability, it could expose us to significant liability and adversely impact our financial results.

Under our agreements with content providers, we calculate our royalty liability based on inputs from various sources of data and have been and are continuously subject to audits by our content providers and distribution partners. If our content providers disagree with the royalty amounts we have calculated that are due to them and we are unable to resolve those disagreements amicably, it may subject us to potential litigation and substantial costs even if it is found that the amounts we determined were due to them were accurate. If a content provider or distribution partner prevails in showing that the royalty amount due to it was not what was intended under our agreement with them and our estimate of the royalty liability was significantly different, it could subject us to significant liability to the affected content provider or distribution partner and have an adverse effect on our financial results. As we announced in January 2007, one of our content providers, EMI Entertainment World, Inc.

Table of Contents

(EMI), recently instituted litigation against us due to a disagreement, among other things, over the amount of royalties due to them from the content they provide. Although we believe that EMI's claims are without merit and that we have meritorious defenses to them and intend to vigorously defend the suit, there can be no assurance that we will prevail or that other content providers will not also disagree with the royalty amount due to them and initiate their own litigation, which could have a material adverse effect on our financial results.

Our agreements with some of our major customers contain minimum performance commitments or minimum service level requirements that we must meet in order to avoid reduction in payments from such customers.

Under our agreements with some of our major customers, we are required to generate a minimum amount of revenue. If we do not reach these minimums, we may receive reduced revenues from our customers or we may be required to compensate our customer for the difference between the minimum and the shortfall. If such shortfall is substantial, it could have a material adverse effect on our financial results.

Furthermore, we have entered into service level agreements with most of our mobile operator customers and certain other customers. These agreements generally call for specific system up times and 24/7 support and include penalties for non-performance. We may be unable to fulfill these commitments, which could subject us to substantial penalties under those agreements, harm our reputation and result in the loss of customers and distribution partners, which would have an adverse effect on our financial results.

Our strategic direction is evolving, including through our restructuring, which could negatively affect our future results.

Since inception, our business model has evolved and is likely to continue to evolve as we refine our product offerings and market focus. Since 2003, we have focused on our search, directory, and mobile products and services. We continue to evaluate opportunities in a rapidly evolving market. In September 2006, we announced that one of our mobile customers plans to develop direct licensing relationships with the major record labels beginning in 2007. In light of that announcement, we plan to continue building on our foundations in mobile technology and services and online discovery, including leveraging our search and directory technology and applications for mobile devices. However, we have suspended investments in developing or obtaining more mobile content and certain new mobile distribution channels, including our direct to consumer online web site, Moviso.com, and we plan to substantially reduce, through various initiatives, our mobile media content product offerings by mid-2007. These changes to our business may not prove successful in the short or long term due to a variety of factors, including competition, consumer adoption and demand for products and services, and other factors described in this section, and may have a material negative impact on our financial results.

In addition, we have in the past and may in the future find it advisable to streamline operations and reduce expenses, including, without limitation, such measures as reductions in the workforce, discretionary spending, and/or capital expenditures as well as other steps to reduce expenses. In September 2006, we announced a restructuring plan that includes the elimination of approximately 250 positions taking place through mid-2007 and the recording of restructuring charges of \$62.3 million as part of our effort to align costs with expected future revenues. Effecting this or any such restructuring will likely place significant strains on management, our employees, and our operational, financial, and other resources. In addition, any such restructuring could impair our development, marketing, sales and customer support efforts or alter our product development plans. Our suspension of investment in developing or obtaining new content and our ongoing process of substantially reducing our mobile media content product offerings may also negatively impact our relationships with our mobile operator distribution partners who may decide, prior to our product offering reduction, to obtain content or services from other sources offering a more complete mobile content and services package. Such effects could have a more immediate negative impact on our financial results.

Table of Contents

We have identified a material weakness in our internal controls as of December 31, 2006 that, if not properly remediated, could result in material misstatements in our financial statements in future periods.

Based on an evaluation of our disclosure controls and procedures as of December 31, 2006, our management has concluded that such disclosure controls and procedures were not effective as of such date due to the existence of a deficiency in the operation of our internal accounting controls, which constituted a material weakness in our internal control over financial reporting. As defined in Public Company Accounting Oversight Board Auditing Standard No. 2, a material weakness is a significant deficiency, or a combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The identified deficiency pertained to controls which were not adequately designed to ensure proper accounting and disclosure of deferred income taxes. These ineffective controls resulted in adjustments to our previously reported unaudited financial results as of, and for the quarter and full year ended, December 31, 2006.

Because of this material weakness, there is risk that a material misstatement of our annual or quarterly financial statements will not be prevented or detected. We are currently in the process of designing and implementing control procedures to remediate the material weakness. We cannot guarantee, however, that such remediation efforts will correct the material weakness such that our internal control over financial reporting will be effective. In the event that we do not adequately remedy this material weakness, or if we fail to maintain effective internal controls in future periods, our operating results, financial position and stock price could be adversely affected.

We have a history of incurring net losses, we may incur net losses in the future, and we may not be able to regain or sustain profitability on a quarterly or annual basis.

While we achieved profitability in each of the twelve fiscal quarters ending on June 30, 2006, in the fourth quarter of 2006, and on an annual basis for the years ended December 31, 2005 and 2004, we incurred net losses on an annual basis in 2006 and from our inception through December 31, 2003 and in the third quarter of 2006. For the year ended December 31, 2006, we recorded a loss of \$15.1 million. As of December 31, 2006, we had an accumulated deficit of \$1.0 billion. We may incur net losses in the future including from our operations, the impairment of goodwill or other intangible assets, losses from acquisitions, restructuring charges or expense related to stock-based compensation and other equity awards. There can be no assurance that we will be able to regain profitability on a quarterly or annual basis or, if regained, to sustain it.

Our financial results are likely to continue to fluctuate, which could cause our stock price to be volatile or decline.

Our financial results have varied on a quarterly basis and are likely to fluctuate in the future. These fluctuations could cause our stock price to be volatile or decline. Several factors could cause our quarterly results to fluctuate materially, including:

the loss, termination or reduction in scope of key distribution or content relationships, such as by distribution partners licensing content directly from content providers;

increased costs related to investments for new initiatives, including new products and services and new distribution channels;

Edgar Filing: INFOSPACE INC - Form 10-K

additional restructuring charges we may need to incur in the future;

litigation expense including settlement claims;

variable demand for our products and services, including seasonal fluctuations, rapidly evolving technologies and markets and consumer preferences;

the impact on revenues or profitability of changes in pricing for our products and services;

the results from shifts in the mix of products and services we provide;

Table of Contents

the effects of acquisitions by us, our customers or our distribution partners;

increases in the costs or availability of content for or distribution of our products;

the adoption of the accounting standard in 2006 that requires us to expense the fair value of our employee stock options and other equity awards;

the adoption of new laws, rules or regulations, or new court rulings, regarding intellectual property that may adversely affect our ability to continue to acquire content and distribute our products and services, or the ability of our content providers or distribution partners to continue to provide us with their content or distribute our products and services or increase our potential liability;

impairment in the value of long-lived assets or the value of acquired assets, including goodwill, core technology and acquired contracts and relationships;

the effect of changes in accounting principles or in our accounting treatment of revenues or expenses;

the adoption of new regulations or accounting standards; and

the foreign currency effects from transactions denominated in currencies other than the U.S. dollar.

For these reasons, among others, you should not rely on period-to-period comparisons of our financial results to forecast our future performance. Furthermore, our fluctuating operating results may fall below the expectations of securities analysts or investors, which could cause the trading price of our stock to decline.

If advertisers perceive that they are not receiving quality traffic to their sites through their paid-per-click advertisements, they may reduce or eliminate their advertising through the Internet, which could have a negative material impact on our financial results.

Most of our revenues from our search and directory business are based on the number of paid clicks on commercial search results served on our own Web sites or our distribution partners' Web properties. Generally, each time a user clicks on a commercial search result, the content provider that provided the commercial search result receives a fee from the advertiser who paid for such commercial click and the content provider pays us a portion of that fee. If the click originated from one of our distribution partners' Web properties, we share a portion of the fee we receive with such partner. If an advertiser receives what it perceives to be a large percentage of clicks for which it needs to pay, but that do not result in the intended objectives of such advertiser, the advertiser may reduce or eliminate its advertisements through the content provider that provided the commercial search result to us. This leads to a loss of revenue to our content providers and consequently to fewer fees paid to us. The content provider may also suspend or terminate our ability to provide its content through such distribution partners. The payment of fewer fees paid to us or the inability to provide content through such distribution partners could have a material negative effect on our financial results.

We operate in new and rapidly evolving markets, and our business model continues to evolve, which makes it difficult to evaluate our future prospects.

Edgar Filing: INFOSPACE INC - Form 10-K

Our potential for future profitability must be considered in the light of the risks, uncertainties, and difficulties encountered by companies that are in new and rapidly evolving markets and continuing to innovate with new and unproven technologies or services, as well as undergoing significant change. Our search, directory and mobile products and services are in young industries that have undergone rapid and dramatic changes in their short history. In addition to the other risks we describe in this section, some of these risks relate to our potential inability to:

retain and expand our existing mobile customer arrangements, or maintain or expand amount of products and services provided to them under such arrangements, or expand into new mobile services markets;

attract and retain distribution partners for our search and directory services;

Table of Contents

attract and retain content partners;

manage our growth, control expenditures and align costs with revenues; and

respond quickly and appropriately to competitive developments, including:

rapid technological change;

alternatives to access the Internet or mobile devices;

changes in customer requirements;

new products introduced into our markets by our competitors; and

regulatory changes affecting the industries we operate in or the markets we serve both in the United States and foreign countries.

If we do not effectively address the risks we face, we may not be able to achieve profitability.

We depend on third parties for content, and the loss of access to or increased cost of this content could cause us to reduce our product offerings to customers and could negatively impact our financial results.

We currently create only a relatively small portion of our content. In most cases, we acquire rights to content from numerous third-party content providers, and our future success is highly dependent upon our ability to maintain relationships with these content providers and enter into new relationships with other content providers.

We typically license content under arrangements that require us to pay usage or fixed monthly fees for the use of the content or require us to pay under a revenue-sharing arrangement. In the future, some of our content providers may not give us access to important content or may increase the royalties, fees or percentages that they charge us for their content, which could have a material negative effect on our operating results. If we fail to enter into or maintain satisfactory arrangements with content providers, particularly with our major content providers, our ability to provide a variety of products and services to our customers could be severely limited, which would have a material negative effect on our operating results. Also, even if we maintain agreements with our major content partners, such partners may directly contract with our distribution partners as well, reducing the demand by our distribution partners for content coming through us. Additionally, our content license and royalty fees will increase to the extent that our revenues related to such products and services increase and may increase as a percent of revenues as a result of price competition and carrier demand for our products and services and the mix of our product sales.

Further, our musical composition and other media licenses for the creation of mobile content consisting of ringtones generally require royalty payments on a most favored nation basis, which requires us to pay the highest royalty paid to any licensor to all such licensors. Also, our agreements with the four major record labels for ringtones, which comprise a significant portion of our mobile business revenues, typically have

Edgar Filing: INFOSPACE INC - Form 10-K

terms of one year or less. As part of our September 2006 restructuring plans, however, we intend to substantially reduce our role as a provider of mobile content; accordingly, these content agreements are expected to have less of an impact on our financial results going forward.

If we fail to detect invalid click activity, we could lose the confidence of advertisers and of our content providers, which could cause our business to suffer.

Poor quality traffic may be a result of invalid click activity. Such invalid click activity occurs, for example, when a person or automated click generation program clicks on a commercial search result to generate fees for the Web property displaying the commercial search result rather than to view the Web page underlying the commercial search result or when a competitor of the advertiser clicks on the advertiser's search result to increase the advertising expense of the advertiser. Some of this invalid click activity is sometimes referred to as

Table of Contents

click fraud. When such invalid click activity is detected, content providers may refund the fee paid by the advertiser for such invalid clicks. When such invalid click activity is detected as coming from one of our distribution partners' Web properties or our own Web sites, our content providers may refund the fees paid by the advertisers for such invalid clicks, which in turn reduces the amount of fees the content provider pays us. If we or our content providers are unable to effectively detect and stop invalid click activity, advertisers may see a reduced return on their advertising investment with the content provider because such invalid clicks do not generate quality traffic to such advertisers, which could lead such advertisers to reduce or terminate their investment in such ads. This could also lead to a loss of advertisers and revenue to our content providers and consequently to fewer fees paid to us. Additionally, if we are unable to detect and stop invalid click activity that may originate from our own Web sites or the Web properties of our distribution partners, our content providers may impose restrictions on our ability to provide their commercial search results on our own Web sites or to our current and future distribution partners, which could have a material negative impact on our financial results.

Although we and our content providers have in place certain systems to assist with the detection of invalid clicks, these systems may not detect all such invalid click activity, including new types of invalid click activity that may appear. From time to time, some of our search content providers may notify us that poor quality traffic may be originating from one of our distribution partners. Although the poor quality traffic may be due to factors other than invalid click activity, if we are unable to resolve or determine what factor may be creating the poor quality traffic, we may terminate our agreement with such distribution partner or stop providing content to such distribution partner from the partner that notified us of such traffic in an attempt to maintain the confidence of our content provider and their advertisers in the overall quality of our traffic.

Our financial and operating results will suffer if we are unsuccessful at integrating acquired technologies and businesses.

We have acquired a number of technologies and businesses in the past and may engage in further acquisitions in the future. Acquisitions may involve use of cash, potentially dilutive issuances of stock, the potential incurrence of debt and contingent liabilities or amortization expenses related to certain intangible assets. In the past, our financial results have suffered significantly due to impairment charges of goodwill and other intangible assets related to prior acquisitions. Acquisitions also involve numerous risks which could materially and adversely affect our results of operations or stock price, including:

- difficulties in assimilating the operations, products, technology, information systems and personnel of acquired companies which result in unanticipated costs, delays or allocation of resources;

- difficulties in acquiring foreign companies, including risks related to integrating operations across different cultures and languages, currency risks and the particular economic, political and regulatory risks associated with specific countries;

- the dilutive effect on earnings per share as a result of incurring operating losses and the amortization of acquired intangible assets for the acquired business;

- diverting management's attention from other business concerns;

- impairing relationships with our customers or those of the acquired companies, or breaching a significant or material contract due to the consummation of the acquisition;

- impairing relationships with our employees or those of the acquired companies;

Edgar Filing: INFOSPACE INC - Form 10-K

failing to achieve the anticipated benefits of the acquisitions in a timely manner or at all; and

adverse outcome of litigation matters assumed in or arising out of the acquisitions.

The success of the operations of companies that we have acquired will often depend on the continued efforts of the management and key employees of those acquired companies. Accordingly, we have typically attempted to retain key employees and members of existing management of acquired companies under the overall supervision

Table of Contents

of our senior management. We have, however, not always been successful in these attempts at retention. Failure to retain key employees of an acquired company may make it more difficult to integrate or manage the business of the acquired company, may reduce the anticipated benefits of the acquisition by increasing costs, causing delays, or otherwise and may expose us to additional competition from companies these employees may join or form.

Our stock price has been and is likely to continue to be highly volatile.

The trading price of our common stock has been highly volatile. Since we began trading on December 15, 1998, our stock price has ranged from \$3.70 to \$1,385.00 (as adjusted for stock splits). On February 16, 2007, the closing price of our common stock was \$23.19. Our stock price could decline or be subject to wide fluctuations in response to factors such as the other risks discussed in this section and the following, among others:

actual or anticipated variations in quarterly and annual results of operations;

announcements of significant acquisitions, dispositions, charges, changes in or loss of material contracts or other business developments by us, our customers, distribution partners or competitors;

conditions or trends in the search, directory or mobile products and services markets;

announcements of technological innovations, new products or services, or new customer or partner relationships by us or our competitors;

changes in financial estimates or recommendations by securities analysts;

disclosures of any material weaknesses in internal control over financial reporting;

the adoption of new regulations or accounting standards; and

announcements or publicity relating to litigation and similar matters.

In addition, the stock market in general, and the Nasdaq Stock Market and the market for Internet and technology company securities in particular, have experienced extreme price and volume fluctuations. These broad market and industry factors and general economic conditions may materially and adversely affect our stock price. Our stock has been subject to such price and volume fluctuations in the recent past. Often, class action litigation has been instituted against companies after periods of volatility in the overall market and the price of such companies stock. If such litigation were to be instituted against us, even if we were to prevail, it could result in substantial cost and diversion of management's attention and resources.

If we are unable to retain our key employees, we may not be able to successfully manage our business.

Our business and operations are substantially dependent on the performance of our executive officers and key employees, all of whom, except our chief executive officer, are employed on an at-will basis. If we lose the services of one or more of our executive officers or key employees and are unable to recruit and retain a suitable successor(s), we may not be able to successfully manage our business or achieve our business objectives. Additionally, our recently announced reduction of approximately 250 positions, to occur through mid-2007 and related to our restructuring, could place significant strain on many of the remaining employees, including key employees, as well as create uncertainty about their and our future prospects. We recently instituted a restricted stock unit program aimed at retaining employees who were not scheduled for termination. However, there can be no assurance that this or any other retention program we initiate will be successful at retaining employees, including key employees. Also, some employees scheduled to be terminated may decide to terminate their employment before their scheduled termination by us, creating additional strain and uncertainty on the remaining employees. If we are unable to retain the services of the remaining key employees, or if employees who are key during some aspects of the restructuring but who are scheduled to be terminated leave before their scheduled termination by us, it could increase the potential effects of the restructuring on our development, sales and customer support efforts or alter our product development plans.

Table of Contents

Unless we are able to hire, retain and motivate highly qualified employees, we will be unable to execute our business strategy.

Our future success depends on our ability to identify, attract, hire, retain and motivate highly skilled technical, managerial, sales and marketing, and corporate development personnel. Our services and the industries to which we provide our services are relatively new. Qualified personnel with experience relevant to our business are scarce and competition to recruit them is intense. If we fail to successfully hire and retain a sufficient number of highly qualified employees, we may have difficulties in supporting our customers or expanding our business. Realignment of resources, reductions in workforce, including our recently announced reduction in workforce of approximately 250 positions to occur through mid-2007, or other operational decisions have created and could continue to create an unstable work environment and may have a negative effect on our ability to hire, retain and motivate employees.

In light of current market and regulatory conditions, the value of stock options granted to employees may cease to provide sufficient incentive to our employees.

Like many technology companies, we use stock options and other equity-based awards to recruit technology professionals and senior level employees. Our stock options, which typically vest over a two-, three- or four-year period, are one of the means by which we have historically attempted to motivate long-term employee performance. Beginning in 2006, the accounting treatment of options required us to expense the fair value of our employee stock options, which may make it difficult or overly expensive for us to issue stock options to our employees in the future. We also face a significant challenge in retaining our employees if the value of these stock options is either not substantial enough or so substantial that the employees leave after their stock options have vested. If our stock price does not increase significantly above the prices of our options, or option programs become impracticable, we may need to issue new options or other equity incentives or increase other forms of compensation to motivate and retain our employees. We recently instituted a restricted stock unit program in lieu of issuing stock options to employees, other than executives, because stock options were not currently seen as providing enough incentive to attract or retain employees. We may undertake or seek stockholder approval to undertake other equity-based programs to retain our employees, which may be viewed as dilutive to our stockholders or may increase our compensation costs. Additionally, there can be no assurance that any such programs, including the restricted stock unit awards, we undertake will be successful in motivating and retaining our employees.

Our search and directory products and services may expose us to claims relating to how the content was obtained or distributed.

Our search and directory services link users, either directly through our Web sites or indirectly through the Web properties of our distribution partners, to third party Web pages and content in response to search queries. These services could expose us to legal liability from claims relating to such third-party content and sites, the manner in which these services are distributed by us or our distribution partners, or how the content provided by our third-party content providers was obtained or provided by our content providers. Such claims could include the following: infringement of copyright, trademark, trade secret or other proprietary rights; violation of privacy and publicity rights; unfair competition; defamation; providing false or misleading information; obscenity; and illegal gambling. Regardless of the legal merits of any such claims, they could result in costly litigation, be time consuming to defend and divert management's attention and resources. If there were a determination that we had violated third-party rights or applicable law, we could incur substantial monetary liability, be required to enter into costly royalty or licensing arrangements (if available), or be required to change our business practices. We may also have obligations to indemnify and hold harmless certain of our content or distribution partners for damages they suffer for such violations under our contracts with them. Implementing measures to reduce our exposure to such claims could require us to expend substantial resources and limit the attractiveness of our products and services to our customers. As a result, these claims could result in material harm to our business.

Recently, there have been legal actions brought or threatened against distributors of downloadable applications deemed to be adware or spyware. Additionally, certain bills are pending and some laws have

Table of Contents

been passed in certain jurisdictions setting forth requirements that must be met before a downloadable application is downloaded to an end user's computer. We partner with some distribution partners that provide adware to their users if the partners adhere to our strict guidelines requiring them, among other things, to disclose to the user what the adware does and to obtain the consent of the user before the application is downloaded. The adware must also be easy to uninstall. We also review the application the partner proposes to use before we distribute our results to them. We also have the right to audit our partners, and if we find that they are not following our guidelines, we can terminate our agreement with them or cease providing content to that downloadable application. Some partners have not been able to meet the new guidelines imposed by us or some of our content providers, and we no longer provide the applicable content or any content, as the case may be, to such partners or certain of their downloadable applications. We work closely with some of our major content providers to try to identify potential distribution partners that do not meet our guidelines or are in breach of our distribution agreements and we work with our distribution partners to ensure they deliver quality traffic. However, there can be no assurance that the measures we implement to reduce our exposure to claims that certain ways in which the content is distributed violate legal requirements will be successful. As stated above, these claims could result in material harm to our business.

Our efforts to increase our presence in markets outside the United States may be unsuccessful and could result in losses.

We plan to expand our mobile and search offerings internationally, particularly in Europe. We have limited experience in marketing and operating our products and services in international markets, and we may not be able to successfully execute our business model in these markets. Our success in these markets will be directly linked to the success of relationships with our distribution and content partners and other third parties.

As the international markets in which we operate continue to grow, competition in these markets will intensify. Local companies may have a substantial competitive advantage because of their greater understanding of and focus on the local markets. Some of our domestic competitors who have substantially greater resources than we do may be able to more quickly and comprehensively develop and grow in the international markets. International expansion may also require significant financial investment including, among other things, the expense of developing localized products, the costs of acquiring foreign companies and the integration of such companies with our operations, expenditure of resources in developing distribution and content relationships and the increased costs of supporting remote operations. Although our revenues from our European offerings have increased in absolute dollars, they have declined as a percentage of our overall revenues.

Other risks of doing business in international markets include the increased risks and burdens of complying with different legal and regulatory standards, difficulties in managing and staffing foreign operations, limitations on the repatriation of funds and fluctuations of foreign exchange rates, varying levels of Internet technology adoption and infrastructure, and ability to enforce our contracts in foreign jurisdictions. In addition, our success in international expansion could be limited by barriers to international expansion such as tariffs, adverse tax consequences, and technology export controls. If we cannot manage these risks effectively, the costs of doing business in some international markets may be prohibitive or our costs may increase disproportionately to our revenues.

We have implemented anti-takeover provisions that could make it more difficult to acquire us.

Our certificate of incorporation, bylaws and Delaware law contain provisions that could make it more difficult for a third party to acquire us without the consent of our board of directors, even if the transaction would be beneficial to our stockholders. Provisions of our charter documents which could have an anti-takeover effect include:

Edgar Filing: INFOSPACE INC - Form 10-K

the classification of our board of directors into three groups so that directors serve staggered three-year terms, which may make it difficult for a potential acquirer to gain control of our board of directors;

Table of Contents

the ability to authorize the issuance of shares of undesignated preferred stock without a vote of stockholders;

a prohibition on stockholder action by written consent; and

limitations on stockholders' ability to call special stockholder meetings.

On July 19, 2002, our board of directors adopted a stockholder rights plan, pursuant to which we declared and paid a dividend of one right for each share of common stock held by stockholders of record as of August 9, 2002. Unless redeemed by us prior to the time the rights are exercised, upon the occurrence of certain events, the rights will entitle the holders to receive shares of our preferred stock, or shares of an acquiring entity. The issuance of the rights would make the acquisition of InfoSpace more expensive to the acquirer and could delay or discourage third parties from acquiring InfoSpace without the approval of our board of directors.

Our systems could fail or become unavailable, which could harm our reputation, result in a loss of current and potential customers and cause us to breach agreements with our partners.

Our success depends, in part, on the performance, reliability and availability of our services. We have data centers in Seattle and Bellevue, Washington; Los Angeles, California; Waltham, Massachusetts; and Papendrecht, The Netherlands. Although we have completed our disaster and redundancy planning for certain of our business-critical systems so that some are now redundant across two physical locations, we have not yet completed our disaster recovery and redundancy planning for others. Our systems and operations could be damaged or interrupted by fire, flood, power loss, telecommunications failure, Internet breakdown, break-in, earthquake or similar events. We would face significant damage as a result of these events, and our business interruption insurance may not be adequate to compensate us for all the losses that may occur. In addition, our systems use sophisticated software that may contain bugs that could interrupt service. For these reasons, we may be unable to develop or successfully manage the infrastructure necessary to meet current or future demands for reliability and scalability of our systems.

If the volume of traffic to our products and services increases substantially, we must respond in a timely fashion by expanding our systems, which may entail upgrading our technology and network infrastructure. Due to the number of our customers and the products and services that we offer, we could experience periodic capacity constraints which may cause temporary unanticipated system disruptions, slower response times and lower levels of customer service. Our business could be harmed if we are unable to accurately project the rate or timing of increases, if any, in the use of our products and application services or expand and upgrade our systems and infrastructure to accommodate these increases in a timely manner.

The security measures we have implemented to secure information we collect and store may be breached, which could cause us to breach agreements with our partners and expose us to potential investigation and penalties by authorities and potential claims by persons whose information was disclosed.

We take reasonable steps to protect the security, integrity and confidentiality of the information we collect and store but there is no guarantee that inadvertent or unauthorized disclosure will not occur or that third parties will not gain unauthorized access despite our efforts. If such unauthorized disclosure or access does occur, we may be required to notify persons whose information was disclosed or accessed under existing and proposed laws. We also may be subject to claims of breach of contract for such disclosure, investigation and penalties by regulatory authorities and potential claims by persons whose information was disclosed.

Edgar Filing: INFOSPACE INC - Form 10-K

We may be subject to liability for our use or distribution of information that we gather or receive from third parties.

We obtain content and commerce information from third parties. When we distribute this information, we may be liable for the data that is contained in that content. This could subject us to legal liability for such things

Table of Contents

as defamation, negligence, intellectual property infringement, violation of privacy or publicity rights and product or service liability, among others. Laws or regulations of certain jurisdictions may also deem some content illegal, which may expose us to legal liability as well. We also gather personal information from users in order to provide personalized services. Gathering and processing this personal information may subject us to legal liability for, among other things, negligence, defamation, invasion of privacy or product or service liability. We are also subject to laws and regulations, both in the United States and abroad, regarding the collection and use of end user information. If we do not comply with these laws and regulations, we may be exposed to legal liability.

Many of the agreements by which we obtain content do not contain indemnity provisions in favor of us. Even if a given contract does contain indemnity provisions, these provisions may not cover a particular claim or type of claim or the party giving the indemnity may not have the financial resources to cover the claim. Our insurance coverage may be inadequate to cover fully the amounts or types of claims that might be made against us. Any liability that we incur as a result of content we receive from third parties could harm our financial results.

If others claim that our products infringe their intellectual property rights, we may be forced to seek expensive licenses, reengineer our products, engage in expensive and time-consuming litigation or stop marketing and licensing our products.

We attempt to avoid infringing known proprietary rights of third parties in our product development efforts. However, we do not regularly conduct patent searches to determine whether the technology used in our products infringes patents held by third parties. Patent searches generally return only a fraction of the issued patents that may be deemed relevant to a particular product or service. It is therefore nearly impossible to determine, with any level of certainty, whether a particular product or service may be construed as infringing a U.S. or foreign patent. Because patent applications in the United States are not publicly disclosed until the patent is issued, applications may have been filed by third parties that relate to our products. In addition, other companies, as well as research and academic institutions, have conducted research for many years in the search and directory and mobile and wireless technology fields, and this research could lead to the filing of further patent applications.

In addition to patent claims, third parties have in the past and may in the future make claims against us alleging infringement of copyrights, trademark rights, trade secret rights or other proprietary rights, or alleging unfair competition or violations of privacy or publicity rights. In some cases, the ownership or scope of an entity's or person's rights is unclear and may also change over time, including through changes in U.S. or international intellectual property laws or regulations or through court decisions or decisions by agencies or regulatory boards that manage such rights.

If we were to discover that our products violated or potentially violated third-party proprietary rights, including those third-party proprietary rights that came about due to decisions and other changes regarding a person's or entity's proprietary rights discussed above, we might be required to obtain licenses that are costly or contain terms unfavorable to us, or expend substantial resources to reengineer those products so that they would not violate such third party rights. Any reengineering effort may not be successful, and we cannot be certain that any such licenses would be available on commercially reasonable terms. Any third-party infringement claims against us could result in costly litigation or liability and be time consuming to defend, divert management's attention and resources, cause product and service delays or require us to enter into royalty and licensing agreements.

We rely heavily on our technology, but we may be unable to adequately or cost-effectively protect or enforce our intellectual property rights, thus weakening our competitive position and negatively impacting our financial results.

Edgar Filing: INFOSPACE INC - Form 10-K

To protect our rights in our products and technology, we rely on a combination of copyright and trademark laws, patents, trade secrets, and confidentiality agreements with employees and third parties and protective contractual provisions. We also rely on the law pertaining to trademarks and domain names to protect the value of our corporate brands and reputation. Despite our efforts to protect our proprietary rights, unauthorized parties

Table of Contents

may copy aspects of our products or services or obtain and use information that we regard as proprietary, or infringe our trademarks. In addition, it is possible that others could independently develop substantially equivalent intellectual property. If we do not effectively protect our intellectual property, we could lose our competitive position.

Effectively policing the unauthorized use of our products and trademarks is time-consuming and costly, and there can be no assurance that the steps taken by us will prevent misappropriation of our technology or trademarks. Our intellectual property may be subject to even greater risk in foreign jurisdictions, as protection is not sought or obtained in every country in which our services are available. Also, the laws of many countries do not protect proprietary rights to the same extent as the laws of the United States. If we cannot adequately protect our intellectual property, our competitive position in markets abroad may suffer.

RISKS RELATED TO THE INDUSTRIES IN WHICH WE OPERATE

Intense competition in the mobile, search and directory markets could prevent us from increasing distribution of our services in those markets or cause us to lose market share.

Our current business model depends on distribution of our products and services into the mobile, search and directory markets, which are extremely competitive and rapidly changing. Many of our competitors have substantially greater financial, technical and marketing resources, larger customer bases, longer operating histories, more developed infrastructures, greater name recognition or more established relationships in the industry than we have. Our competitors may be able to adopt more aggressive pricing policies, develop and expand their service offerings more rapidly, adapt to new or emerging technologies and changes in customer requirements more quickly, take advantage of acquisitions and other opportunities more readily, achieve greater economies of scale, and devote greater resources to the marketing and sale of their services than we can. Because of these competitive factors and due to our relatively small size and financial resources, we may be unable to compete successfully.

Some of the companies we compete with are currently customers of ours, the loss of which could harm our business. Many of our customers have established relationships with some of our competitors. If these competitors develop products and services that compete with ours, we could lose market share and our revenues could decrease. Additionally, our financial results could be adversely affected as well if our distribution partners create their own products and services that compete or replace the products and services we provide.

Consolidation in the industries in which we operate could lead to increased competition and loss of customers.

The Internet industry (including the search and directory segments) and the wireless industry have experienced substantial consolidation. We expect this consolidation to continue. These acquisitions could adversely affect our business and results of operations in a number of ways, including the following:

our distribution partners could acquire or be acquired by one of our competitors and terminate their relationship with us;

our distribution partners could merge with each other, which could reduce our ability to negotiate favorable terms;

competitors could improve their competitive positions through strategic acquisitions; and

companies from whom we acquire content could acquire or be acquired by one of our competitors and stop licensing content to us, or gain additional negotiating leverage in their relationships with us.

Security breaches may pose risks to the uninterrupted operation of our systems.

Our networks may be vulnerable to unauthorized access by hackers or others, computer viruses and other disruptive problems. Someone who is able to circumvent security measures could misappropriate our proprietary

Table of Contents

information or cause interruptions in our operations. Subscribers to some of our services are required to provide information in order to utilize the service that may be considered to be personally identifiable or private information. Unauthorized access to, and abuse of, this information could subject us to a risk of loss or litigation and liability.

We may need to expend significant capital or other resources protecting against the threat of security breaches or alleviating problems caused by breaches. Although we intend to continue to implement and improve our security measures, persons may be able to circumvent the measures that we implement in the future. Eliminating computer viruses and alleviating other security problems may require interruptions, delays or cessation of service to users accessing our services, any of which could harm our business.

Governmental regulation and the application of existing laws may slow business growth, increase our costs of doing business and create potential liability.

The growth and development of the Internet and wireless communication have led to new laws and regulations, as well as the application of existing laws to wireless communications and the Internet. Application of these laws can be unclear. The costs of complying or failure to comply with these laws and regulations could limit our ability to operate in our markets, expose us to compliance costs and substantial liability and result in costly and time-consuming litigation.

Several federal or state laws could impact our business. Federal laws include those designed to restrict the online distribution of certain materials deemed harmful to children and impose additional restrictions or obligations for online services when dealing with minors. Such legislation may impose significant additional costs on our business or subject us to additional liabilities. The application to advertising in our industries of existing laws regulating or requiring licenses for certain businesses can be unclear. Such regulated businesses may include, for example, gambling; distribution of pharmaceuticals, alcohol, tobacco or firearms; or insurance, securities brokerage and legal services. Additionally, certain bills are pending and some laws have been passed in certain jurisdictions setting forth requirements that must be met before a downloadable application is downloaded to an end user's computer. Moreover, regulations by the Federal Communications Commission regarding unsolicited commercial email to wireless devices have created new requirements that could adversely affect our business by limiting our ability to communicate with users and increasing our burden of disclosure.

We post our privacy policies and practices concerning the use and disclosure of user data. Any failure by us to comply with our posted privacy policies, FTC requirements or other privacy-related laws and regulations could result in proceedings by the FTC or others, including potential class action litigation, which could potentially have an adverse effect on our business, results of operations and financial condition. In this regard, there are a large number of legislative proposals before the United States Congress and various state legislative bodies regarding privacy and data protection issues related to our business. It is not possible to predict whether or when such legislation may be adopted, and certain proposals, if adopted, could materially and adversely affect our business through a decrease in user registrations and revenues. This could be caused by, among other possible provisions, the required use of disclaimers or other requirements before users can utilize our services.

The FTC has recommended to search engine providers that paid-ranking search results be delineated from non-paid results. To the extent that the FTC may in the future issue specific requirements regarding the nature of such delineation, which would require modifications to the presentation of search results, revenue from the affected search engines could be negatively impacted.

Due to the nature of the Internet, it is possible that the governments of states and foreign countries might attempt to regulate Internet transmissions, through data protection laws amongst others, or institute proceedings for violations of their laws. We might unintentionally violate such laws, such laws may be modified and new laws may be enacted in the future. Any such developments (or developments stemming

Edgar Filing: INFOSPACE INC - Form 10-K

from enactment or modification of other laws) could increase the costs of regulatory compliance for us or force us to change our business practices.

Table of Contents

We rely on the infrastructure of the Internet and of wireless networks, over which we have no control and the failure of which could substantially undermine our operations.

Our success depends, in large part, on other companies maintaining the Internet system infrastructure and mobile operators who distribute our mobile content and services to maintain their proprietary wireless networks. In particular, with respect to the Internet, we rely on other companies to maintain a reliable network backbone that provides adequate speed, data capacity and security and to develop products that enable reliable Internet access and services. With respect to wireless networks, we depend on mobile operators to maintain their wireless networks so as to provide adequate speed, data capacity and security and that enable reliable mobile access to our products and services.

As the Internet and usage of mobile services continues to experience growth in the number of users, frequency of use and amount of data transmitted, the Internet system infrastructure and the wireless networks of mobile operators may be unable to support the demands placed on them, and the Internet's and mobile operators' networks performance or reliability may suffer as a result of this continued growth. Some of the companies that we rely upon to maintain network infrastructure may lack sufficient capital to support their long-term operations. The failure of the internet infrastructure or wireless networks would substantially undermine our operations and may have a material adverse effect on our financial results.

ITEM 1B. Unresolved Staff Comments

Not applicable with respect to the current reporting period.

ITEM 2. Properties

Our principal corporate office is located in Bellevue, Washington, and we have business operations in: Los Angeles, California, Waltham and Westborough, Massachusetts, Woking and Eastleigh, United Kingdom, and Papendrecht, The Netherlands. Our Bellevue and Woking facilities are utilized by both our Online and Mobile businesses; our Westborough facilities are utilized by our Online business; and our Los Angeles, Eastleigh, and Papendrecht facilities are utilized by our Mobile business. We have data centers in Bellevue and Seattle, Washington, Los Angeles, California, Waltham, Massachusetts, and Papendrecht, The Netherlands. All of our facilities are leased. We believe our properties are suitable and adequate for our present and anticipated near term needs.

ITEM 3. Legal Proceedings

See Note 7 Commitments and Contingencies of the Notes to Consolidated Financial Statements (Item 8, of Part II of this Report) for information regarding legal proceedings.

ITEM 4. Submission of Matters to a Vote of Security Holders

Not applicable with respect to the current reporting period.

Table of Contents**PART II****ITEM 5. Market for Registrant's Common Stock, Related Stockholder Matters and Issuer Purchases of Equity Securities****Market for Our Common Stock**

Our common stock has been traded on the Nasdaq Stock Market under the symbol **INSP** since December 15, 1998, the date of our initial public offering. Prior to that time, there was no public market for our common stock. The following table sets forth, for the periods indicated, the high and low sales prices for our common stock as reported by the Nasdaq Stock Market.

	High	Low
Fiscal Year Ending December 31, 2006:		
First Quarter	\$ 28.39	\$ 22.80
Second Quarter	\$ 28.17	\$ 21.26
Third Quarter	\$ 23.13	\$ 17.28
Fourth Quarter	\$ 20.94	\$ 18.37
Fiscal Year Ending December 31, 2005:		
First Quarter	\$ 48.70	\$ 36.68
Second Quarter	\$ 46.60	\$ 28.90
Third Quarter	\$ 36.81	\$ 21.90
Fourth Quarter	\$ 28.42	\$ 21.36

On February 16, 2007, the last reported sale price for our common stock on the Nasdaq Stock Market was \$23.19 per share. As of February 16, 2007, there were 958 holders of record of our common stock.

We have never declared, nor have we paid, any cash dividends on our common stock. We currently intend to retain our earnings to finance future growth and, therefore, do not anticipate paying any cash dividends on our common stock in the foreseeable future. Please see Part III, Item 12 of this report for disclosure relating to our equity compensation plans. Such information is incorporated by reference from our Proxy Statement.

- (1) Effective January 1, 2006, we adopted the provisions of Statement of Financial Accounting Standard (SFAS) No. 123(R) which requires an enterprise to expense the fair value of an award of an equity instrument. Operating expenses in 2006 include \$16.9 million of stock-based compensation expense, allocated as follows: \$1.6 million in systems and network operations, \$2.7 million in product development, \$4.8 million in sales and marketing, and \$7.8 million in general and administrative.
- (2) In 2006, we recorded restructuring charges of \$62.3 million comprised of \$44.5 million of impairments of goodwill and other intangible assets, \$8.7 million of employee separation costs, \$5.7 million of losses on contractual commitments, \$2.6 million in costs of abandoned facilities, and \$824,000 of stock-based compensation.
- (3) In 2005, we received proceeds of \$83.2 million from the settlement of several outstanding litigation matters and recognized a gain of \$79.3 million comprised of the settlement proceeds and interest, less \$3.9 million in legal fees.
- (4) In 2006, we recognized a portion of our deferred tax assets related to goodwill, operating loss carryforwards, and equity. In 2005, we recognized a portion of our deferred tax assets related to operating loss carryforwards.
- (5) We consummated the sale of our Payment Solutions business on March 31, 2004, and the operating results and gain from the sale of this business have been presented as discontinued operations for all periods presented.
- (6) We adopted SFAS No. 142, *Goodwill and Other Intangible Assets* on January 1, 2002. We recorded a non-cash charge for the cumulative effect of change in accounting principle of \$206.6 million as of January 1, 2002, which was related to impairment of goodwill. This amount was determined based on an independent valuation of our reporting units as of January 1, 2002 using a combination of our quoted stock price and projections of future discounted cash flows for each reporting unit.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis in conjunction with Selected Consolidated Financial Data and our consolidated financial statements and notes thereto included elsewhere in this report.

Overview

InfoSpace, Inc. (InfoSpace , Our or We) is a developer of tools and technologies that assist consumers with finding content and information on the Internet or mobile phone. We use our metasearch technology to power our own branded Web sites and provide private-label online search and directory services to distribution partners. In addition, our mobile applications provide programming and sales opportunities to our carrier partners, while providing consumers with relevant mobile functionality and mobile media content, including ringtones, graphics, and games. We were founded in 1996 and are incorporated in the state of Delaware. Our principal corporate office is located in Bellevue, Washington. We also have facilities in Los Angeles, California; Westborough, Massachusetts; Woking and Eastleigh, United Kingdom; and Papendrecht, The Netherlands. Our common stock is listed on the Nasdaq Stock Market under the symbol INSP.

Our Online search and directory services enable Internet users to locate information, merchants, individuals, and products online. We offer search and directory services through our branded Web sites, Dogpile.com, Switchboard.com, InfoSpace.com, Webcrawler.com, MetaCrawler.com, and Zoo.com, as well as through the Web properties of distribution partners. Partner versions of our search and directory services are generally private-labeled and delivered with each distribution partner's unique requirements.

Our Mobile business delivers data technology solutions, consulting and management services for the mobile operator market, including portal, storefront, search and messaging solutions. Additionally, we provide mobile media content, including ringtones, graphics and games, to subscribers of our Mobile customers. However, we plan to substantially reduce, through various initiatives, our mobile media content product offerings by mid-2007. Through our products, content and service offerings, our mobile operator partners are able to aggregate, configure and customize the services they offer under their own brand and deliver them to their subscribers.

Overview of 2006 Operating Results

The following is an overview of our operating results for the year ended December 31, 2006. A more detailed discussion of our operating results, comparing our operating results for the years ended December 31, 2006, 2005, and 2004, is included under the heading Historical Results of Operations in this Management's Discussion and Analysis of Financial Condition and Results of Operations.

In September 2006, we announced that we had been informed by one of our carrier partners that it intended to develop direct relationships for mobile ringtone content with the major record labels beginning in 2007. We anticipated that such direct relationships between the carrier and content providers would have a material negative impact on our revenues and operating results. As a result, during September 2006, we committed to a plan to make operational changes to our business to align operational focus and costs with expected future revenues. The plan included a reduction in our workforce and consolidation of our facilities. We also suspended investment in mobile media content initiatives and, accordingly, intend to substantially reduce, through various initiatives, our mobile media content product offerings by mid-2007 by eliminating certain products including but not limited to ringtones, graphics and games. We will continue to operate our two business units: Online, comprised of our search and directory properties as well as our private label distribution service and Mobile services, including portal, storefront, messaging, and mobile search. Additionally, in 2006 we announced the closing of our office in Hamburg, Germany. As a result of

Edgar Filing: INFOSPACE INC - Form 10-K

these operational changes, in 2006 we recorded an aggregate \$62.3 million restructuring charge, which includes impairment for goodwill and other intangible assets, employee separation costs, losses on contractual commitments and costs to consolidate facilities.

Table of Contents

Revenues for 2006 increased to \$371.7 million from \$340.0 million in 2005. Revenues from our Online business increased to \$186.9 million in 2006 from \$182.6 million in 2005. This increase was primarily due to better monetization of our paid searches. During 2006, approximately 60% of our search revenues came from our search distribution partners. Revenues from our Mobile business increased to \$184.8 million in 2006 from \$157.4 million in 2005, primarily attributable to an increase in sales of our media download products, such as ringtones and graphics. Mobile revenues are expected to decrease in the near term as we substantially reduce our mobile media content product offerings.

Content and distribution costs for 2006 increased to \$178.3 million from \$145.4 million in 2005. Total segment gross profit, comprised of revenues net of content and distribution costs, decreased to \$193.4 million in 2006 from \$194.6 million in 2005. Segment gross profit from our Online business increased to \$120.2 million from \$114.5 million in 2005, due to better monetization of our paid searches, primarily from our own branded Web sites. Segment gross profit for our Mobile segment decreased to \$73.2 million in 2006 from \$80.1 million in 2005, primarily attributable to an increase in content costs associated with our media downloads and the loss of a service agreement at the end of 2005. Mobile content costs, as a percentage of revenue, increased at a greater rate as a result of an increase in content costs and the shift of the mix of products and services we provide. In particular, sales of our labeltone or true tone (MP3-like quality) ringtones, that have a greater cost as a percentage of revenue than our other media download products, represented a larger share of our Mobile revenues in 2006.

Other operating expenses for 2006, excluding the restructuring charge of \$62.3 million recorded in the second half of 2006, were \$204.1 million, an increase of \$55.9 million from \$148.2 million in 2005. Other operating expenses include expenses related to systems and network operations, product development, sales and marketing, general and administrative, depreciation and amortization of intangible assets. The increase from 2005 was primarily attributable to spending on certain business initiatives, general growth in our operations, and the effect of expensing stock options and other equity-based awards as required under Statement of Financial Accounting Standard (SFAS) No. 123(R), *Share-Based Payment*, which we adopted on January 1, 2006. Increased operating costs related to our initiatives and growth in our business primarily relate to increases in personnel costs, including salaries, benefits and other employee costs, and costs of temporary help from contractors to augment our staffing needs, as well as increases in marketing and promotional costs and depreciation expense. In light of our restructuring described above, we have suspended investments in developing or obtaining new Mobile content and certain Mobile distribution channels, including our direct to consumer online web site, Moviso.com.

Additionally, interest income increased in 2006 to \$19.6 million compared to interest income in 2005 of \$11.3 million and was primarily attributable to an increase in interest rates and, to a lesser extent, more available cash and marketable investments on hand to invest. In 2005, we recognized a gain, net of legal costs, of \$79.3 million in connection with the settlement of certain litigation matters, including the *Dreiling v. Jain, et al.* derivative lawsuit and the *Dreiling v. Jain, et. al.* Section 16(b) case. We also recognized an income tax benefit of \$28.6 million from the realization of a deferred tax asset related to a portion of our net operating loss carryforward, an increase of \$3.6 million from our realization of a similar deferred tax asset in 2005. Additionally, we recorded a net tax benefit of \$9.9 million from our operations in 2006 as compared to a net expense of \$1.5 million from our operations in 2005.

Net loss for 2006 was \$15.1 million compared to net income of \$159.4 million in 2005. The net loss in 2006 was primarily attributable to the items noted above.

Critical Accounting Policies and Estimates

The Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as disclosures included elsewhere in this Form 10-K, are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and disclosures of contingencies.

Table of Contents

The Securities and Exchange Commission (SEC) has defined a company's most critical accounting policies as the ones that are the most important to the portrayal of the company's financial condition and results of operations, and which require the company to make its most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. On an ongoing basis, we evaluate the estimates used, including those related to impairment of goodwill and other intangible assets, useful lives of other intangible assets, purchase accounting, other-than-temporary impairment of investments, revenue recognition, the estimated allowance for sales returns and doubtful accounts, restructuring-related liabilities, accrued contingencies and valuation allowance for our deferred tax assets. We base our estimates on historical experience, current conditions and on various other assumptions that we believe to be reasonable under the circumstances and, based on information available to us at that time, we make judgments about the carrying values of assets and liabilities that are not readily apparent from other sources as well as identify and assess our accounting treatment with respect to commitments and contingencies. Actual results may differ significantly from these estimates under different assumptions, judgments or conditions. We believe the following critical accounting policies involve the more significant judgments and estimates used in the preparation of our consolidated financial statements. We also have other accounting policies, which involve the use of estimates, judgments and assumptions that are significant to understanding our results. For additional information see Item 8 of Part II Financial Statements and Supplementary Data Note 1: Summary of Significant Accounting Policies to our Consolidated Financial Statements.

Revenue Recognition

Our revenues are derived from products and services delivered to our customers across our two businesses, Online and Mobile. In general, we recognize revenues in the period in which the services are performed, products are delivered or transaction occurs. In certain arrangements, we record deferred revenue for amounts received from customers in advance of the performance of services or upon execution of an agreement and recognize revenues ratably over the term of the agreement or expected customer life. We generally record revenue on a gross basis in accordance with Emerging Issues Task Force Issue 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent*. For distribution partner arrangements in our Online business we record revenue on a gross basis and the corresponding revenue sharing payments as a content and distribution expense. For mobile operator customers in which we license the content, we record revenue on a gross basis and the corresponding licensing expense as content and distribution expense. In the event the mobile operator customer directly licenses the content, we record as revenue the service fees we earn. See Item 8 of Part II Financial Statements and Supplementary Data Note 1: Summary of Significant Accounting Policies to our Consolidated Financial Statements for a description of products and services and the related revenue recognition policy for each of our business units.

Income Taxes

We account for income taxes under the asset and liability method, under which deferred tax assets, including net operating loss carryforwards, and liabilities are determined based on temporary differences between the book and tax basis of assets and liabilities. We periodically evaluate the likelihood of the realization of deferred tax assets, and reduce the carrying amount of the deferred tax assets by a valuation allowance to the extent we believe a portion will not be realized. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income, the carryforward periods available to us for tax reporting purposes, and other relevant factors. The range of possible judgments relating to the valuation of our deferred tax assets is wide.

During the year ended December 31, 2006, based on the weight of available evidence, we determined that it was more likely than not that a portion of our deferred tax asset would be realized and, at December 31, 2006, our deferred tax asset, net of the valuation allowance, is \$104.0 million. See discussion in our Results of Operations for the Years Ended December 31, 2006, 2005, and 2004. Significant judgment is required in making

Table of Contents

this assessment, and it is very difficult to predict when, if ever, our assessment may conclude that the remaining portion of our deferred tax assets are realizable.

During the evaluation of our disclosure controls and procedures as of December 31, 2006, our management identified a deficiency in our internal control over financial reporting which constituted a material weakness. Specifically, the deficiency pertained to our controls which were ineffective and not properly designed to ensure proper accounting and disclosure of our deferred income tax benefit and related income tax asset. We have and are continuing to take steps to address this material weakness, including the recent hiring of a senior tax director and implementing a more rigorous review process involving appropriate internal accounting staff and an external accounting firm. Additional review, evaluation and oversight were undertaken in order to ensure our consolidated financial statements were prepared in accordance with generally accepted accounting principles and, as a result, we concluded that the consolidated financial statements in this Form 10-K fairly present, in all material respects, our financial position, results of operations and cash flows for the periods presented.

Restructuring

In 2006, we committed to a plan to make operational changes to our business, which included a reduction in our workforce and, as part of the workforce reduction, consolidation of our facilities. Charges associated with this restructuring plan are accounted for in accordance with SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS No. 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. In determining the restructuring charges that we recorded in 2006 we relied on certain assumptions, including planned employee separation dates and estimated income for facilities that we plan to sublease. Changing business conditions may affect the assumptions related to the timing and extent of restructuring activities. We will review the status of these activities on a quarterly basis and, if appropriate, record changes based on updated estimates.

Accounting for Goodwill and Certain Other Intangible Assets

SFAS No. 142, *Goodwill and Other Intangible Assets*, requires that goodwill and intangible assets with indefinite lives be tested for impairment on an annual basis and between annual tests in certain circumstances. Certain circumstance may include testing for impairment in conjunction with restructuring in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. On a quarterly basis, we assess whether business conditions indicate that our goodwill and other intangible assets may not be recoverable, and, as a result of the restructuring plan we committed to in 2006, we tested our goodwill and certain other intangible assets for impairment.

Goodwill is tested for impairment at the reporting unit level (operating segment or one level below an operating segment.) Application of the goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount rates and other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit.

Other intangible assets are tested for impairment by comparing their carrying amounts to their fair values. We measure the fair value of such assets by estimating the future undiscounted cash flows attributable to them, and recognize an impairment if their carrying amounts exceeded the estimated fair values. Such evaluations rely on various assumptions, including the timing of future events and market conditions.

Edgar Filing: INFOSPACE INC - Form 10-K

During 2006, based upon our analysis, we recorded impairments for goodwill of \$31.9 million and intangible assets of \$12.6 million associated with changes in our Mobile business and our 2006 restructuring plan. As of December 31, 2006 we have \$104.4 million of goodwill and \$19.6 million of other intangible assets on our balance sheet.

Table of Contents

Business Combinations

Business combinations accounted for under the purchase method of accounting require management to estimate the fair value of the assets and liabilities acquired. The allocation of the purchase price based on the estimated fair value of assets and liabilities acquired may be subject to adjustments during the year following the date of acquisition.

Allowances for Sales and Doubtful Accounts

Our management must make estimates of potential future sales allowances related to current period revenues for our products and services. We analyze historical adjustments, current economic trends and changes in customer demand and acceptance of our products when evaluating the adequacy of the sales allowances. Estimates must be made and used in connection with establishing the sales allowance in any accounting period.

The allowance for doubtful accounts is a management estimate that considers actual facts and circumstances of individual customers and other debtors, such as financial condition and historical payment trends. We evaluate the adequacy of the allowance utilizing a combination of specific identification of potentially problematic accounts and identification of accounts that have exceeded payment terms.

Stock-Based Compensation

On January 1, 2006, we adopted SFAS No. 123(R), *Stock-Based Compensation*, which requires companies to record stock compensation expense for equity-based awards granted, including stock options and restricted stock unit grants, for which expense will be recognized over the service period of the equity-based award based on the fair value of the award at the date of grant. During 2006, we recognized \$16.9 million of stock compensation expense.

Calculating stock-based compensation expense relies upon certain assumptions, including the expected term of the stock-based awards, stock price volatility, expected interest rate, number and types of stock-based awards and the pre-vesting forfeiture rate. If we use different assumptions due to changes in our business or other factors, our stock-based compensation expense could materially vary in the future.

Through December 31, 2005, we accounted for stock-based compensation under the intrinsic method in accordance with Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*. Under the intrinsic method, we did not record any expenses when we granted stock options because they were priced at the fair market value of our stock at the date of grant.

On December 14, 2005, we accelerated vesting of certain unvested and out-of-the-money stock options with exercise prices equal to or greater than \$34.00 per share that were previously awarded under our equity compensation plans to our employees. These options were accelerated to avoid recording future compensation expense with respect to such options. We believe that because such options had exercise prices in excess of

Edgar Filing: INFOSPACE INC - Form 10-K

the current market value of our stock, the options were not achieving their original objective. The acceleration of vesting was effective for stock options outstanding as of December 14, 2005. Options to purchase 2.4 million shares of common stock were subject to the acceleration and the weighted average exercise price of the options subject to the acceleration was \$40.51. Due to this acceleration, an additional \$29.3 million is included in the pro forma stock-based compensation expense for the year ended December 31, 2005.

Contingencies

We are subject to various legal proceedings and claims and tax matters, the outcomes of which are subject to significant uncertainty. SFAS No. 5, *Accounting for Contingencies*, requires that an estimated loss from a loss contingency should be accrued by a charge to income if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. Disclosure of a contingency is

Table of Contents

required if there is at least a reasonable possibility that a loss has been incurred. We evaluate, among other factors, the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the amount of loss. Changes in these factors could materially impact our financial position or our results of operations. See Item 8 of Part II Financial Statements and Supplementary Data Note 7: Commitments and Contingencies to our Consolidated Financial Statements for further information regarding contingencies.

Historical Results of Operations

For the year ending December 31, 2006, our net loss totaled \$15.1 million, which includes restructuring expense of \$62.3 million related to our plan to make operational changes. While we achieved profitability for each of the quarters since the third quarter of 2003, with the exception of the third quarter of 2006, and for the years ended December 31, 2004 and 2005, prior to that we had incurred losses since our inception, and as of December 31, 2006, we had an accumulated deficit of \$1.0 billion.

In light of the rapidly evolving nature of our business and overall market conditions, we believe that period-to-period comparisons of our revenues and operating results are not necessarily meaningful, and you should not necessarily rely solely upon them as indications of future performance.

Table of Contents

The following table sets forth the historical results of our operations (in thousands and as percent of revenues).

	Years Ended December 31,			Years Ended December 31,		
	2006	2005	2004	2006	2005	2004
	(in thousands)			(as a percent of revenue)

Results of Operations for the Years Ended December 31, 2006, 2005, and 2004

Revenues. Revenues are derived from deploying our services and products to customers via the Internet and mobile phones. Under many of our agreements, we earn revenues from a combination of our products and services delivered to customers. Revenues for the years ended December 31, 2006, 2005, and 2004 are presented below (in thousands):

	Percentage		Change		Percentage		Change		Percentage
	2006	of Total	from 2005	2005	of Total	from 2004	2004	of Total	
Online	\$ 186,901	50.3%	\$ 4,345	\$ 182,556	53.7%	\$ 25,717	\$ 156,839	62.9%	
Mobile	184,836	49.7	27,424	157,412	46.3	64,897	92,515	37.1	
Total	\$ 371,737	100.0%	\$ 31,769	\$ 339,968	100.0%	\$ 90,614	\$ 249,354	100.0%	

Online Revenue

The increase in revenue for Online products and services for 2006 as compared to 2005 was primarily due to the growth in our online search services, in particular, better monetization for paid searches, and, to a lesser extent, directory revenues related to a contract we entered into in June 2005. These increases were partially offset by a decline in revenue due to one of our top customers, Verizon, not renewing certain key provisions of our subscription agreement for yellow pages listings in June 2005. In 2006, approximately 60% of our search revenues came from our search distribution partners.

Table of Contents

The absolute dollar increase in Online revenue from 2004 to 2005 was primarily due to growth in our paid search services from both our search and directory businesses, in particular, paid searches from our distribution partners Web properties and greater revenue per paid search, and directory revenues related to our acquisition of an online directory business in June 2004. In 2005, search revenues from distribution partners were over 60% of total search revenues.

We expect that search revenue from our distribution partners will continue to be a significant share of our search revenues.

Mobile Revenue

The increase in revenue for our Mobile products and services for 2006 as compared to 2005 was primarily due to increased revenues from the sales of our media download products, primarily sales of our labeltone or true tone (MP3-like quality) ringtones. Partially offsetting the increase in revenue for Mobile products and services was the loss of a service agreement at the end of 2005. We expect that there will be a decline in our Mobile revenue in 2007 due to one of our carrier partners developing direct licensing relationships with the major record labels and as result of our plan to substantially reduce, through various initiatives, our mobile media content product offerings by mid-2007, focusing instead on our core Mobile services, which generated approximately \$37 million in revenues in 2006.

The absolute dollar increase in Mobile revenue from 2004 to 2005 was primarily due to an increase in sales of our media download products, including our labeltones or MP3-like quality ringtones and, to a lesser extent, graphics and games.

Content and Distribution Expenses. Content and distribution expenses consist principally of costs related to royalty and license fees related to our Mobile products for items such as ringtones, graphics and games, and other content or data licenses, and revenue sharing arrangements with our Online distribution partners, as well as online content and data licenses. Content and distribution expenses in total dollars (in thousands) and as a percent of revenue for the years ended December 31, 2006, 2005, and 2004 are presented below:

	2006	Change	2005	Change	2004
Content and Distribution Expenses					
Online	\$ 66,672	\$ (1,337)	\$ 68,009	\$ 10,017	\$ 57,992
Percent of Online Revenue	35.7%	(1.6)%	37.3%	0.3%	37.0%
Mobile	111,655	34,313	77,342	42,646	34,696
Percent of Mobile Revenue	60.4%	11.3%	49.1%	11.6%	37.5%
Total	\$ 178,327	\$ 32,976	\$ 145,351	\$ 52,663	\$ 92,688
Percent of Total Revenues	48.0%	5.3%	42.7%	5.6%	37.1%

Content and distribution expenses increased by \$33.0 million to \$178.3 million in 2006 as compared to \$145.4 million in 2005. The cost as a percent of revenues decrease for Online content and distribution expense was primarily due to better monetization of our paid searches, primarily from our own branded Web sites. We anticipate that our Online content and distribution costs will continue to increase in absolute dollars if revenues increase through growth from existing arrangements with our Online distribution partners or we add new Online distribution partners. If Online revenue generated from our distribution partners increases at a greater rate than revenues generated from our own branded Web sites, content and distribution costs as a percent of revenue will increase.

Edgar Filing: INFOSPACE INC - Form 10-K

The absolute dollar and cost as a percent of revenues increase for Mobile content and distribution expense was primarily attributable to revenue growth from sales of our content and media products to our Mobile customers, in particular, sales of our labeltone or true tone (MP3-like quality) ringtones, for which our costs as a percentage of revenues were greater than our other media download products. We expect that there will be a

Table of Contents

decline in our content and distribution costs related to our Mobile business in 2007 due to the loss of revenue from one of our carrier partners developing direct licensing relationships with the major record labels and our substantially reducing our mobile media content product offerings.

Content and distribution expenses increased by \$52.7 million to \$145.4 million in 2005 as compared to \$92.7 million in 2004. The absolute dollar and percent of revenue increase was attributable to the growth from sales of our content and media download products to our mobile customers, including our higher cost labeltones or MP3-like quality ringtones, which require licensing and royalty payments to third parties and, to a lesser extent, revenue growth from our online search and directory distribution partners in which we have revenue sharing arrangements where we private label our search products for our partners to offer on their own Web properties.

Systems and Network Operations Expenses. Systems and network operations consists of expenses associated with the delivery, maintenance and support of our products, services and infrastructure, including personnel expenses, which include salaries, benefits and other employee related costs, stock-based compensation, and temporary help and contractors to augment our staffing, communication costs, equipment repair and maintenance, and professional service fees. Systems and network operations expenses in total dollars (in thousands) and as a percent of revenue for the years ended December 31, 2006, 2005, and 2004 are presented below:

	2006	Change	2005	Change	2004
Systems and Network Operations Expenses	\$ 31,222	\$ 9,847	\$ 21,375	\$ 7,155	\$ 14,220
Percent of Revenue	8.4%	2.1%	6.3%	0.6%	5.7%

Systems and network operations expenses increased by \$9.8 million to \$31.2 million for the year ended December 31, 2006 as compared to \$21.4 million for the year ended December 31, 2005. The absolute dollar increase for 2006 as compared to 2005 was primarily attributable to an increase in facilities, software, equipment expense, and communication costs of \$4.1 million related to increased costs of operating the East Coast data center and our new Puget Sound data center, an increase of \$3.6 million in personnel expenses and contractors to augment our staffing, stock-based compensation expense of \$1.6 million, and a \$1.0 million increase in professional service fees related to growth in our business.

Systems and network operations expenses increased by \$7.2 million to \$21.4 million for the year ended December 31, 2005 as compared to \$14.2 million for the year ended December 31, 2004. The increase in absolute dollars was primarily attributable to an increase of \$6.0 million in personnel expenses, including employee salaries and benefits and temporary help and contractors to augment our staffing and also related to our acquisitions of an online directory business and three mobile gaming companies. Additionally, there was an increase of over \$1.0 million in facilities, software and equipment expenses to support the additional headcount and the operation of our East Coast data center. Partially offsetting these increases was a decrease in communications costs of \$514,000 related to the renegotiation of certain contracts.

Product Development Expenses. Product development expenses consist principally of personnel expenses, which include salaries, benefits and other employee related costs, stock-based compensation, and temporary help and contractors to augment our staffing, for research, development, support and ongoing enhancements of our products and services. Product development expenses in total dollars (in thousands) and as a percent of revenue for the years ended December 31, 2006, 2005, and 2004 are presented below:

	2006	Change	2005	Change	2004
Product Development Expenses	\$ 46,340	\$ 15,137	\$ 31,203	\$ 8,061	\$ 23,142
Percent of Revenue	12.4%	3.2%	9.2%	(0.1)%	9.3%

Edgar Filing: INFOSPACE INC - Form 10-K

Product development expenses increased by \$15.1 million to \$46.3 million in 2006 as compared to \$31.2 million in 2005. The absolute dollar increase from the prior year was primarily attributable to an increase of

Table of Contents

\$13.0 million in personnel related expenses and contractors to augment our staffing, as we continued to invest in the development and enhancement of our products and services, and stock-based compensation of \$2.7 million.

Product development expenses increased by \$8.1 million to \$31.2 million in 2005 as compared to \$23.1 million in 2004. The increase in absolute dollars was primarily due to an increase of \$7.5 million in personnel expenses, including employee salaries and benefits and temporary help and contractors to augment our staffing, as we continued to invest in the development and enhancement of our products and services and also as a result of additional headcount related to our acquisitions of an online directory business and three mobile gaming companies.

Product development costs may not be consistent with changes in revenues as they represent key costs to develop and enhance our product and service offerings. We believe that investments in technology are necessary to remain competitive, and we anticipate that we will continue to invest in our products and services.

Sales and Marketing Expenses. Sales and marketing expenses consist principally of personnel costs, which include salaries, benefits and other employee related costs, stock-based compensation, and temporary help and contractors to augment our staffing, and advertising, market research and promotion expenses. Sales and marketing expenses in total dollars (in thousands) and as a percent of revenue for the years ended December 31, 2006, 2005, and 2004 are presented below:

	2006	Change	2005	Change	2004
Sales and Marketing Expenses	\$ 46,518	\$ 15,456	\$ 31,062	\$ 7,576	\$ 23,486
Percent of Revenue	12.5%	3.4%	9.1%	(0.3)%	9.4%

Sales and marketing expenses increased by \$15.5 million to \$46.5 million in 2006 as compared to \$31.1 million in 2005. The absolute dollar increase was primarily attributable to an increase in personnel expenses totaling \$7.3 million, an increase of \$3.8 million in marketing and promotional expense due to our new products and services initiatives, growth in content and new distribution channels, as well as \$4.8 million of stock-based compensation. These increases were partially offset by a decrease in professional service fees of \$563,000.

Sales and marketing expenses increased by \$7.6 million to \$31.1 million in 2005 as compared to \$23.5 million in 2004. The increase in absolute dollars was primarily attributable to an increase of \$4.1 million in advertising and promotion expense and an increase of \$3.4 million in personnel expenses, including salaries and benefits and temporary help and contractors to augment our staffing, as we continued to grow our business, and also as a result of our acquisitions of an online directory business and three mobile gaming companies.

We will continue to invest in marketing initiatives, sales promotions, and new distribution channels, while we expect that sales and marketing expenses will decline in 2007 due to our suspension of investment in our Mobile media products and services.

General and Administrative Expenses. General and administrative expenses consist primarily of personnel expenses, which include salaries, benefits and other employee related costs, stock-based compensation, professional service fees, which include legal fees, audit fees, SEC compliance costs, which include costs related to compliance with the Sarbanes-Oxley Act of 2002, occupancy and general office expenses, and general business development and management expenses. General and administrative expenses in total dollars (in thousands) and as a percent of revenue for the years ended December 31, 2006, 2005, and 2004 are presented below:

Edgar Filing: INFOSPACE INC - Form 10-K

	2006	Change	2005	Change	2004
General and Administrative Expenses	\$ 51,725	\$ 11,491	\$ 40,234	\$ 3,886	\$ 36,348
Percent of Revenue	13.9%	2.1%	11.8%	(2.8)%	14.6%

Table of Contents

General and administrative expenses increased by \$11.5 million to \$51.7 million in 2006 as compared to \$40.2 million in 2005. The absolute dollar increase was primarily attributable to stock-based compensation expense of \$7.8 million, \$2.2 million related to certain arbitration and litigation settlements, an increase in facilities expenses totaling \$1.5 million, an increase in personnel related expenses totaling \$1.2 million, and an increase in professional fees of \$1.1 million. These increases were partially offset by reductions in business taxes of \$2.6 million due to changes in existing tax laws.

General and administrative expenses increased by \$3.9 million to \$40.2 million in 2005 as compared to \$36.3 million in 2004. The increase in absolute dollars was primarily attributable to an increase in facilities costs of \$2.4 million to expand facilities and build our East Coast data center, an increase of \$1.2 million in personnel costs and temporary help and contractors, to augment our staffing, as a result of our acquisitions of an online directory business and three gaming companies, and growth in operations, and an increase of \$1.4 million in professional services fees, which include tax and consulting fees. Partially offsetting these increases were reductions in legal fees of \$1.9 million and insurance costs of \$929,000.

Restructuring: Restructuring charges reflect actual and estimated costs associated with the reductions in workforce and costs associated with the consolidation and closures of certain of our facilities. Restructuring charges for the years ended December 31, 2006, 2005, and 2004 are presented below (in thousands):

	2006	2005	2004
Restructuring charges:			
Impairment of goodwill and intangible assets	\$ 44,526	\$	\$
Employee separation costs	8,687		(31)
Stock-based compensation expense	824		
Losses on contractual commitments	5,671		
Estimated future lease losses	1,667		253
Impairment of leasehold improvements and fixed assets	941		
	\$ 62,316	\$	\$ 222

In September 2006, we announced that one of our carrier partners plans to develop direct licensing relationships with the major record labels beginning in 2007. We anticipated that such direct relationships between the carrier and content providers would have a material negative impact on our revenues and operating results. As a result, during September 2006, we committed to a plan to make operational changes to our business to align operational focus and costs with expected future revenues. The plan included a reduction in our workforce and consolidation of our facilities. We also suspended investment in mobile media content initiatives and, accordingly intend to substantially reduce, through various initiatives, our mobile media content product offerings by mid-2007. The restructuring plan is expected to be completed by mid-2007. Also during September 2006, we initiated a plan to close our office in Hamburg, Germany. In future periods, adjustments and additions are expected to be made to the amounts recorded as of December 31, 2006. Salaries and other costs are expected to decline in the future as a result of the reduction in our workforce.

We recorded no restructuring charges in 2005.

The restructuring charge in 2004 was attributable to an adjustment of our estimated reserves for the restructuring in 2003 primarily related to the payment of lease termination costs.

Edgar Filing: INFOSPACE INC - Form 10-K

Depreciation. Depreciation of property and equipment includes depreciation of network servers and data center equipment, computers, software, office equipment and fixtures, and leasehold improvements. Depreciation expenses for the years ended December 31, 2006, 2005, and 2004 are presented below (in thousands):

	2006	Change	2005	Change	2004
Depreciation Expenses	\$ 16,083	\$ 7,022	\$ 9,061	\$ 2,087	\$ 6,974

Table of Contents

The \$7.0 million increase from 2005 to 2006 was primarily a result of property and equipment recently placed in service related to our East Coast and Puget Sound data centers. The \$2.1 million increase from 2004 to 2005 was primarily a result of property and equipment recently placed in service related to our East Coast data center and those acquired with our acquisitions of an online directory business and the three mobile gaming companies, partially offset by a decrease in depreciation expenses of older property and equipment reaching the end of their depreciable lives.

Amortization of Other Intangible Assets. Amortization of definite-lived intangible assets includes amortization of core technology, customer and content relationships, customer lists and other intangible assets. Definite-lived intangible assets are amortized over their estimated life, ranging from one to five years. Amortization of other intangible assets is presented below for the years ended December 31, 2006, 2005, and 2004 (in thousands):

	2006	Change	2005	Change	2004
Amortization of Other Intangible Assets	\$ 12,213	\$ (3,052)	\$ 15,265	\$ 5,345	\$ 9,920

The \$3.1 million absolute dollar decrease from 2005 to 2006 was primarily attributable to the impairment \$12.6 million of definite-lived intangible assets related to our Mobile business.

The \$5.3 million absolute dollar increase from 2004 to 2005 was primarily attributable to intangible assets that were acquired in the acquisitions of an online directory business and the three mobile gaming companies.

Assuming we do not acquire businesses or intangible assets in the future, the amortization of intangible assets will be \$4.0 million in 2007.

Other, Net. Other, net consists of costs, charges, refunds or gains that are not directly associated with other revenue or operating expense classifications. Other, net for the years ended December 31, 2006, 2005, and 2004 is presented below (in thousands):

	2006	2005	2004
Other, net:			
Litigation settlement	\$	\$	\$ (3,906)
Tax refunds and credits			(266)
Executive severance and stock-based compensation			1,225
Miscellaneous			(256)
	\$	\$	\$ (3,203)

During 2004, we recorded other charges, net for a gain of \$3.2 million. We settled a litigation matter concerning promissory notes due from a former officer, resulting in a gain of \$3.9 million. Additionally, we recorded a charge of \$1.2 million related to the separation of a former executive officer, and we received a final assessment from the Internal Revenue Service (the IRS) for a payroll tax settlement regarding certain aspects of our payroll tax returns for the year 2000 that included penalties and estimated interest, and, accordingly, we paid the IRS. The interest charges were less than originally estimated and, as a result, we reversed previously recognized interest charges of \$266,000 upon our payment of the final assessment.

Edgar Filing: INFOSPACE INC - Form 10-K

Gain on Equity Investments. Gain on equity investments consists of gains from changes in the fair value of derivative instruments held by us and the other-than-temporary impairment of equity investments. Gain on equity investments is comprised of the following for the years ended December 31, 2006, 2005, and 2004 (in thousands):

	2006	2005	2004
Other-than-temporary investment impairments	\$	\$	\$ (916)
Increase in fair value of warrants		154	1,341
	\$	\$ 154	\$ 425

Table of Contents

Other-than-temporary investment impairment: We have equity investments in privately-held companies and periodically evaluate whether the decline in fair value of an investment is other-than-temporary. During 2004, we concluded that there had been an other-than-temporary impairment of certain equity investments and we recorded an impairment charge related to those specific investments.

Gains in fair value of warrants: In accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, we adjust our derivative instruments to fair value and recognize the change in the recorded fair value in earnings. We hold warrants to purchase stock in other companies, which qualify as derivatives, and therefore gains or losses are based on the fair value. In 2004, a company in which we held warrants to purchase shares of stock announced that it was being acquired and that any outstanding warrants to purchase shares of the company would also be purchased. We recognized a gain and proceeds of \$1.4 million in 2004 based on the estimated fair value of the warrant. The warrant was subsequently purchased for \$1.5 million and we received the final payment and recorded a gain of \$154,000 in 2005.

Other Income, Net. Other income, net, primarily consists of interest income, litigation settlements and foreign currency gain (loss).

	2006	2005	2004
Interest income	\$ 19,628	\$ 11,250	\$ 4,698
Gain on certain litigation settlements		79,297	
Foreign currency exchange gain (loss)	(42)	(1,131)	540
Other items, net	(205)	(94)	(247)
	\$ 19,381	\$ 89,322	\$ 4,991

Interest income increased primarily due to increased interest rates in 2006 compared to 2005. Interest income more than doubled primarily due to increased interest rates in 2005 compared to 2004. In 2005, we received proceeds of \$83.2 million from the settlement of several outstanding litigation matters. We recognized a gain of \$79.3 million comprised of the settlement proceeds and interest, less \$3.9 million in legal fees.

In 2005, we acquired elkware GmbH, a mobile gaming company, at a cost of 20.0 million euros in cash. The purchase price in U.S. dollars was \$26.4 million plus acquisition costs. In December 2004, due to the significant fluctuations in the exchange rate of the U.S. dollar to the euro, we entered into a forward exchange contract to mitigate our foreign currency exposure. At December 31, 2004, the exchange rate of the U.S. dollar had declined relative to the euro and a \$456,000 gain on the forward exchange contract was recorded in 2004. Subsequently, in January 2005 when the acquisition was consummated, the U.S. dollar had strengthened against the euro and a \$934,000 loss was recorded in 2005 at the settlement of that foreign exchange contract.

Income Tax Benefit. During the years ended December 31, 2006, 2005, and 2004, we have recorded an income tax benefit of \$38.5 million, \$23.5 million, and \$29,000, respectively. The 2006 income tax benefit of \$38.5 million is primarily due to a \$28.6 million benefit from the realization of deferred tax assets related to an additional portion of our net operating loss carryforwards and a net tax benefit of \$10.2 million from current year operations, partially offset by tax expense for federal alternative minimum, state and international taxes, as more fully discussed below. The 2005 income tax benefit of \$23.5 million is primarily due to a \$25.0 million benefit from the realization of deferred tax assets related to a portion of our net operating loss carryforwards, partially offset by tax expense for federal alternative minimum, state and international taxes.

At December 31, 2006, our net deferred tax assets are \$104.0 million out of total deferred tax assets of \$441.4 million, primarily comprised of \$381.2 million of accumulated net operating loss carryforwards, net of a \$337.4 million valuation allowance. In 2006, we determined it was

Edgar Filing: INFOSPACE INC - Form 10-K

more likely than not that an additional portion of our operating assets would be realizable in the foreseeable future. Accordingly, we reduced the valuation allowance related to our operating deferred tax assets and recognized a \$28.6 million deferred tax benefit. As of December 31, 2006, we continue to have a \$337.4 million valuation allowance against our deferred tax assets

Table of Contents

primarily related to net operating loss carryforwards. Due to the size of our net operating loss carryforwards, their expiration beginning in 2020, and our recent level of annualized profitability, we believe that sufficient uncertainty exists regarding the realizability of the remaining balance of our deferred tax assets. If in the future, we determine that the realization of the remaining deferred tax assets is more likely than not to be realized, we will record a benefit to the income statement or make an adjustment to additional paid-in-capital.

To the extent we are profitable and we record a tax expense, the actual payment may be offset against the accumulated net operating loss carryforwards

Income from Discontinued Operations and Gain on Sale of Discontinued Operation. In 2004, we completed the sale of our Payment Solutions business and have reflected income from Payment Solutions as income from discontinued operations. For 2004, we recorded a gain on the sale of Payment Solutions of \$29.1 million and income, net of taxes, from the operating results of Payment Solutions of \$2.3 million for the year ended December 31, 2004. Income from discontinued operations includes previously unallocated depreciation, amortization, corporate expenses, and income taxes that were attributed to Payment Solutions.

Liquidity and Capital Resources

Our principal source of liquidity is our cash and cash equivalents, short-term investments and long-term investments, initially generated from proceeds from private placements and our initial and follow-on public offerings. In addition, more recently we have generated cash from operations. In 2005, we received proceeds of \$83.2 million from the settlement of certain litigation matters and, in 2004, we received proceeds of \$82.0 million from the sale of our Payment Solutions business unit.

As of December 31, 2006, we had cash and marketable investments of \$401.9 million, consisting of cash and cash equivalents of \$163.5 million and short-term investments available-for-sale of \$238.4 million. We invest our excess cash in high quality marketable investments. These investments include securities issued by U.S. government agencies, certificates of deposit, money market funds, and taxable municipal bonds.

Commitments and Pledged Funds

The following are our contractual commitments associated with our operating lease obligations (in thousands):

	2007	2008	2009	2010	2011	Thereafter	Total
Minimum lease payments required	\$ 7,623	\$ 5,254	\$ 6,888	\$ 6,753	\$ 5,706	\$ 5,466	\$ 37,690
Less sublease income	(112)						(112)
Net lease payments required	\$ 7,511	\$ 5,254	\$ 6,888	\$ 6,753	\$ 5,706	\$ 5,466	\$ 37,578

We have no significant purchase commitments at December 31, 2006. We have pledged a portion of our cash as collateral for standby letters of credit and bank guaranties for certain of our property leases and banking arrangements. At December 31, 2006, the total amount of collateral

pledged under these agreements was \$4.4 million.

Cash Flows

Net cash provided by operating activities consists of net income (loss) offset by certain adjustments not affecting current-period cash flows and the effect of changes in our operating assets and liabilities. Adjustments to net income (loss) to determine cash flow from operations include certain restructuring charges, depreciation and amortization, stock-based compensation expense, and deferred taxes. Net cash used by investing activities consists of net cash used to acquire businesses, transactions related to our investments, purchases of property and equipment, and proceeds from the sale of certain assets. Net cash provided (used) by financing activities consists

Table of Contents

of proceeds from the issuance of stock through the exercise of stock options or warrants and our employee stock purchase plan, and cash used to repurchase outstanding stock.

Our net cash flows are comprised of the following for the years ended December 31, 2006, 2005, and 2004 (in thousands):

	Years Ended December 31,		
	2006	2005	2004
Net cash provided by operating activities	\$ 43,540	\$ 157,587	\$ 51,109
Net cash used by investing activities	(38,480)	(33,552)	(109,519)
Net cash provided (used) by financing activities	5,432	(56,267)	32,747
Net increase (decrease) in cash and cash equivalents	\$ 10,492	\$ 67,768	\$ (25,663)

Net cash provided by operating activities was \$43.5 million in 2006, consisting of our net loss of \$15.1 million, cash provided by changes in our operating assets and liabilities of \$5.8 million, consisting of decreases in other receivables and prepaid expenses and other current assets, increases in deferred revenue and accounts payable, and adjustments not affecting cash flows provided by operating activities of \$107.7 million, primarily consisting of restructuring, depreciation and amortization and stock-based compensation. Partially offsetting the increase are changes in our operating assets and liabilities of \$15.9 million, primarily consisting of increases in our accounts receivable and other long-term assets and a decrease in our accrued expenses and other current and long-term liabilities, and adjustments not affecting cash flows provided by operating activities of \$38.8 million, consisting of increases in our deferred tax assets.

Net cash provided by operating activities was \$157.6 million in 2005, consisting of our net income of \$159.4 million, cash provided by changes in our operating assets and liabilities of \$25.0 million, consisting of a decrease in notes and other receivables, an increase in accrued expenses and accounts payable, and adjustments not affecting cash flows provided by operating activities of \$24.8 million, primarily consisting of depreciation and amortization. Partially offsetting the increase are changes in our operating assets and liabilities of \$24.7 million, primarily consisting of increases in our accounts receivable, prepaid expenses and other current assets and other long-term assets and a decrease in our deferred revenue, and adjustments not affecting cash flows provided by operating activities of \$26.9 million, primarily consisting of the benefit from the reversal of the deferred tax asset valuation allowance.

Net cash provided by operating activities was \$51.1 million in 2004, consisting of our net income of \$82.4 million, cash provided by changes in our operating assets and liabilities of \$17.6 million, consisting of an increase in our accrued expenses, deferred revenues and a decrease in prepaid expenses and adjustments not affecting cash flows provided by operating activities of \$18.4 million, primarily consisting of depreciation and amortization, stock-based compensation and bad debt expense, and non-cash restructuring charges. Partially offsetting the increase are cash used by changes in our operating assets and liabilities of \$35.0 million, primarily consisting of increases in our accounts receivable, notes and other receivables, other long-term assets and a decrease in our accounts payable, and adjustments not affecting cash flows provided by operating activities of \$32.3 million, primarily consisting of income and the gain on sale of our Payment Solutions business of \$31.4 million, accounted for as a discontinued operation, and gains from our equity investments.

Net cash used by investing activities was \$38.5 million in 2006, primarily from the purchase of \$313.9 million of marketable investments, \$22.6 million of property and equipment purchases, and the purchase of \$320,000 of intangible assets. Partially offsetting cash used in investing activities were proceeds from the sale or maturity of our marketable investments of \$298.3 million and proceeds of \$35,000 from the sale of assets.

Edgar Filing: INFOSPACE INC - Form 10-K

Net cash used by investing activities was \$33.6 million in 2005, primarily from the purchase of \$189.0 million of marketable investments, the use of \$26.4 million for business acquisitions, net of cash acquired, increase of long-term assets of \$4.5 million and \$17.0 million of property and equipment purchases. Partially

Table of Contents

offsetting cash used in investing activities were proceeds from the sale or maturity of our marketable investments of \$202.9 million, proceeds of \$139,000 from the sale of assets and proceeds of \$154,000 upon the final settlement of warrants sold in 2004.

Net cash used by investing activities was \$109.5 million in 2004, primarily from the purchase of \$499.2 million of marketable investments, the use of \$130.6 million for business acquisitions, net of cash acquired, and \$10.4 million of property and equipment purchases. Partially offsetting cash used in investing activities were proceeds from the sale or maturity of our marketable investments of \$446.4 million, proceeds of \$82.0 million from the sale of our Payment Solutions business, and proceeds of \$2.3 million from the sale of equity investments and our non-core services.

Net cash provided by financing activities in 2006 was \$5.4 million, which resulted from the exercise of stock options and from the sale of shares through our employee stock purchase plan.

Net cash used by financing activities in 2005 was \$56.3 million, primarily from the repurchase of 2.6 million shares of common stock for \$70.4 million, including commissions. Partially offsetting cash used in financing activities were proceeds of \$14.1 million from the exercise of stock options and from the sale of shares through our employee stock purchase plan.

Net cash provided by financing activities in 2004 was \$32.7 million, which resulted from the exercise of stock options and from the sale of shares through our employee stock purchase plan.

We plan to use our cash to fund operations, develop technology, advertise, market and distribute our products and services, and continue the enhancement of our network infrastructure. We may use a portion of our cash for acquisitions or for common stock repurchases.

We believe that existing cash balances, cash equivalents, short term investments and cash generated from operations will be sufficient to meet our anticipated cash needs for working capital and capital expenditures for at least the next 12 months. However, the underlying assumed levels of revenues and expenses may not prove to be accurate. Our anticipated cash needs exclude any payments for pending or future litigation matters. In addition, we evaluate acquisitions of businesses, products or technologies that complement our business from time to time. Any such transactions, if consummated, may use a significant portion of our cash balances and marketable investments. We may seek additional funding through public or private financings or other arrangements prior to such time. Adequate funds may not be available when needed or may not be available on favorable terms. If we raise additional funds by issuing equity securities, dilution to existing stockholders will result. If funding is insufficient at any time in the future, we may be unable to develop or enhance our products or services, take advantage of business opportunities or respond to competitive pressures, any of which could harm our business.

Market Sensitive Derivatives and Financial Instruments

On December 15, 2004, we entered into a definitive agreement to acquire the outstanding stock of elkware GmbH, a German mobile games company. The purchase price was denominated in euros in the amount of 20.0 million euros. Due to significant changes in the exchange rate and the continued devaluation of the U.S. dollar to the euro, on December 22, 2004 we entered into a forward exchange contract to minimize any further exposure of the U.S. dollar weakening relative to the euro, which locked the exchange rate at 1.3416 for each dollar per euro. The acquisition was completed on January 7, 2005 and the forward contract was settled.

Table of Contents**Acquisitions****Summary of Our Acquisitions**

Company or Assets	Date Closed	Total Value of Transaction (in thousands)
elkware GmbH	01/07/2005	\$ 26,400
IOMO Limited	12/01/2004	\$ 15,400
Atlas Mobile, Inc.	07/01/2004	\$ 6,300
Switchboard Incorporated	06/03/2004	\$ 159,400

elkware GmbH. On January 7, 2005, we acquired elkware GmbH, a German mobile games company, for 20.0 million euros, which approximated \$26.4 million in cash, excluding acquisition costs and liabilities assumed. In addition, the purchase agreement required that 5.0 million euros of the purchase price be placed in escrow to provide security for certain indemnification obligations set forth in the purchase agreement. The operations were combined with our United Kingdom games operations and the office in Germany was closed in 2006.

IOMO Limited. In December 2004, we acquired the outstanding stock of IOMO Limited, a designer and publisher of mobile games, for 8.0 million British pounds, which approximated \$15.4 million in cash, excluding acquisition costs and liabilities assumed. In addition, the purchase agreement required that 1.1 million British pounds of the purchase price be placed in escrow to provide security for certain indemnification obligations set forth in the purchase agreement.

Atlas Mobile, Inc. In July 2004, we acquired the assets of Atlas Mobile, a provider of mobile multi-player tournament games, for \$6.3 million. We sold these assets in January 2007 for \$1.5 million.

Switchboard Incorporated. In June 2004, we acquired the outstanding stock of Switchboard Incorporated, a provider of local online advertising and Internet based yellow pages, for \$159.4 million in cash, which excludes transaction fees of \$6.0 million and liabilities assumed. As of the acquisition date, Switchboard had \$56.4 million in cash.

Stock Repurchase Program

On May 30, 2006, our Board of Directors approved a stock repurchase plan whereby we are authorized to purchase up to \$100 million of our common stock during the succeeding twelve month period. Repurchased shares will be retired and resume the status of authorized but unissued shares of common stock. We did not purchase any shares during the year ended December 31, 2006. Under a previous repurchase plan authorized on May 13, 2005, which expired May 12, 2006, we purchased 2,633,002 shares in open-market transactions during 2005 at a total cost, exclusive of purchase and administrative costs, of \$70.2 million, at an average price of \$26.66 per share.

Table of Contents**Quarterly Results of Operations (Unaudited)**

The following table presents a summary of our unaudited consolidated results of operations for the eight quarters ended December 31, 2006. The information for each of these quarters has been prepared on a basis consistent with our audited consolidated financial statements. You should read this information in conjunction with our consolidated financial statements and notes thereto included elsewhere in this Annual Report on Form 10-K. The operating results for any quarter are not necessarily indicative of results for any future period.

Recent Accounting Pronouncements

In June 2006, the Financial Accounting Standard Board (FASB) issued Interpretation (FIN) No. 48, *Accounting for Uncertainty in Income Taxes*. FIN No. 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN No. 48 is effective for our first fiscal year beginning January 1, 2007. We are currently evaluating the provisions of FIN No. 48 to determine what effect its adoption will have on our financial position, cash flows, and results of operations, however we do not believe that there will be any material effect of adoption of FIN No. 48.

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. SAB No. 108 provides interpretive guidance on how the effects of prior-year uncorrected misstatements should be considered when quantifying misstatements in the current year financial statements. SAB No. 108 requires registrants to quantify misstatements using both an income statement (rollover) and balance sheet (iron curtain) approach and evaluate whether either approach results in a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 was

Edgar Filing: INFOSPACE INC - Form 10-K

effective for 2006. The application of SAB No. 108 did not have an effect on our financial position, cash flows, or results of operations.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosure of fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements and accordingly, does not require any new fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. We are currently evaluating the provisions of SFAS No. 157 to determine what effect its adoption on January 1, 2008 will have on our financial position, cash flows, and results of operations.

Table of Contents**ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk**

We are exposed to financial market risks, including changes in interest rates, foreign currency fluctuations, and changes in the market values of our investments.

Interest Rate Risk. We invest our available cash in investment-grade debt instruments of corporate issuers and in debt instruments of the U.S. Government and its agencies. By policy, we limit our credit exposure to any one issuer. We do not have any derivative instruments in our investment portfolio. We protect and preserve invested funds by limiting default, market and reinvestment risk. Investments in both fixed-rate and floating-rate interest earning instruments carry a degree of interest rate risk. Fixed-rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating-rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates or we may suffer losses in principal if we are forced to sell securities which have declined in market value due to changes in interest rates. At December 31, 2006, our short-term investment balances were \$238.4 million.

The following table provides information about our cash equivalent and marketable fixed-income securities, including principal cash flows for 2006 and the related weighted average interest rates. Amounts are presented in U.S. dollar equivalents, which is our reporting currency.

Principal amounts by expected year of maturity in U.S. dollars as of December 31, 2006 are as follows (in thousands, except percentages):

	2007	Fair Value
Corporate bonds	\$ 11,922	\$ 11,928
Weighted average interest rate	5.44%	
U.S. government securities	140,616	140,636
Weighted average interest rate	5.33%	
Auction Rate securities	85,880	85,880
Weighted average interest rate	5.33%	
Commercial Paper	130,032	130,048
Weighted average interest rate	4.86%	
Cash equivalents and marketable fixed-income securities	\$ 368,450	\$ 368,492

Foreign Currency Risk: Our earnings and cash flows are subject to fluctuations due to changes in the exchange rates of the principal currency of countries that we operate in (Canada and countries in Europe) versus the U.S. dollar. We are exposed to these exchange rate fluctuations as the financial results of our non-U.S. based subsidiaries are translated into U.S. dollars in consolidation. As exchange rates vary, those results, when translated, may vary from expectations and adversely impact our results. The cumulative translation effects for subsidiaries using functional currencies other than the U.S. dollar are included in accumulated other comprehensive income in stockholders' equity. We do not currently use derivative instruments to manage our exposure to changes in foreign currency exchange rates as this exposure has had an immaterial impact on our past financial results.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

InfoSpace, Inc.

Bellevue, Washington

We have audited the accompanying consolidated balance sheets of InfoSpace, Inc. and subsidiaries (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of operations and comprehensive income (loss), changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of InfoSpace, Inc. and subsidiaries as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the consolidated financial statements, the Company changed its method of accounting for stock-based compensation upon adoption of Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*, effective January 1, 2006.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 21, 2007 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an adverse opinion on the effectiveness of the Company's internal control over financial reporting because of a material weakness.

Table of Contents

INFOSPACE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years Ended December 31, 2006, 2005, and 2004

Note 1: Summary of Significant Accounting Policies

Description of the business: InfoSpace, Inc. (the Company or InfoSpace) uses its technology, including metasearch, to power its branded Web sites and provide private-label online search and directory services to its distribution partners. The Company also is a provider and publisher of mobile content, products and services assisting consumers with finding information, personalization and entertainment on the mobile phone.

Principles of consolidation: The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany accounts and transactions have been eliminated.

Basis of presentation: On March 31, 2004, the Company completed the sale of its Payment Solutions business to Lightbridge, Inc., for \$82.0 million in cash. The operating results of the Payment Solutions business have been presented as a discontinued operation in the Consolidated Statements of Operations for all years presented.

Business combinations: Business combinations accounted for under the purchase method of accounting include the results of operations of the acquired business from the date of acquisition. Net assets of the business acquired are recorded at their fair value at the date of acquisition.

Cash and cash equivalents: The Company considers all highly liquid debt instruments with an original maturity of 90 days or less to be Cash equivalents. Cash and cash equivalents are carried at cost, which approximates market value.

Short-term and long-term investments: The Company principally invests its available cash in investment-grade debt instruments of corporate issuers and in debt instruments of the U.S. Government and its agencies. Auction Rate Securities and all debt instruments with original maturities greater than three months up to one year from the balance sheet date are considered Short-term investments. Other investments maturing after one year from the balance sheet date are considered Long-term investments. The Company accounts for investments in accordance with Statement of Financial Accounting Standard (SFAS) No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. As of December 31, 2006 and 2005, the Company's Short-term and Long-term investments are classified as available-for-sale and are reported at their fair market value, with changes in fair value reported in Other comprehensive income (loss).

Property and equipment: Property and equipment are stated at cost. Depreciation is computed under the straight-line method over the following estimated useful lives:

Edgar Filing: INFOSPACE INC - Form 10-K

Computer equipment and software	3 years
Data center servers	3 years
Internally developed software	3 years
Office equipment	7 years
Office furniture	7 years
Leasehold improvements	Shorter of lease term or economic life

The Company has capitalized certain internal use software development costs in accordance with Statement of Position 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*. Costs capitalized primarily consist of employee salaries and benefits allocated on a project or product basis. The Company capitalized \$2.3 million, \$2.8 million, and \$1.9 million of internal-use software costs in the years ended December 31, 2006, 2005, and 2004, respectively.

Table of Contents

INFOSPACE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2006, 2005, and 2004

Valuation of goodwill and intangible assets: In accordance with SFAS No. 142, *Goodwill and Intangible Assets*, the Company evaluates Goodwill and Other intangible assets at least annually to determine whether there has been any impairment of the value of these assets and evaluates impairment whenever events or changes in circumstances indicate that the carrying amount of the Company's assets might not be recoverable. The Company also accounts for definite-lived intangible assets in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. In the year ended December 31, 2006, impairments of other intangible assets of \$12.6 million and goodwill of \$31.9 million were recorded.

Other investments: The Company has invested in equity investments of privately-held companies for business and strategic purposes. As of December 31, 2006 and 2005, the Company has an investment with a carrying value of \$2.1 million in a privately-held company, which also includes a warrant to purchase shares in such company. Investments in companies whose securities are not publicly traded are recorded at cost. Warrants held by the Company to purchase equity securities are included in the Consolidated Balance Sheets at their fair value with changes in fair value recorded as Gains or losses on investments in the Consolidated Statement of Operations. Realized gains are recorded based on the identified specific cost of the investment sold. The Company does not exercise significant influence over the operating or financial policies of any of the non-public companies in which it has invested and therefore accounts for such investments under the cost method and records the investment in Other long-term assets. The Company accounts for these investments in equity instruments in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities* and the Securities and Exchange Commission's Staff Accounting Bulletin (SAB) No. 59, *Accounting for Noncurrent Marketable Equity Securities*, which provide guidance on determining when an investment is other-than-temporarily impaired. The Company periodically evaluates whether the declines in fair value of its investments are other-than-temporary.

Stock-based compensation: On January 1, 2006, the Company adopted SFAS No. 123(R), *Share-Based Payment*, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors including stock option grants and purchases of stock made pursuant to the Company's 1998 Employee Stock Purchase Plan (the ESPP) based on estimated fair values. SFAS No. 123(R) supersedes the Company's previous accounting under Accounting Principles Board Opinion (APB) No. 25, *Accounting for Stock Issued to Employees*. The Company adopted SFAS No. 123(R) using the modified prospective transition method, which requires the application of the accounting standard as of January 1, 2006. In accordance with the modified prospective transition method, the Company's Consolidated Financial Statements for the years ended December 31, 2005 and 2004 have not been restated to reflect, and do not include, the impact of SFAS No. 123(R).

SFAS No. 123(R) requires companies to estimate the fair value of share-based payment awards on the date of grant using an option-pricing model. The value of the award's portion that is ultimately expected to vest is recognized as expense over the requisite service periods in the accompanying Consolidated Financial Statements for the year ended December 31, 2006. Prior to the adoption of SFAS No. 123(R), the Company accounted for share-based awards to employees and directors using the intrinsic value method in accordance with APB No. 25 as allowed under SFAS No. 123, *Accounting for Stock-Based Compensation*. Under the intrinsic value method, share-based compensation expense was only recognized by the Company if the exercise price of the grant was less than the fair market value of the underlying stock at the date of grant.

Edgar Filing: INFOSPACE INC - Form 10-K

In November 2005, the Financial Accounting Standards Board issued Staff Position No. FAS 123(R)-3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards*, (FSP No. 123(R)-3). The Company has elected to adopt the alternative transition method provided in FSP No. 123(R)-3 for calculating the tax effects of stock-based compensation under SFAS No. 123(R). The

Table of Contents

INFOSPACE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2006, 2005, and 2004

alternative transition method includes simplified methods to establish the beginning balance of the additional paid in capital pool (APIC pool) related to the tax effects of stock-based compensation, and for determining the subsequent impact on the APIC pool and Consolidated Statements of Cash Flows of the tax effects of stock-based compensation awards that are outstanding upon adoption of SFAS No. 123(R).

Revenues:

Online revenue: The Company generates revenues from its online search, yellow page and white page services. Revenues are generated when an end user of its services generates a paid search on one of the Company's owned and operated Web sites or through a distribution partner's Web property, in which the Company offers its private label online search and directory products and services for distribution partners to offer on its Web properties. Revenues are recognized in the period in which a paid search occurs and are based on the amounts earned and remitted to the Company.

Certain of the Company's agreements contain maximum thresholds for paid searches for which a customer will pay during a specific period of time. In such circumstances, the Company recognizes revenue at the lesser of the amount that would be recorded based on the amount due per paid search, or the amount that would be recognized if the maximum amount due from the customer over the specified time provided in the agreement were recognized ratably over that period.

For distribution partner arrangements, whereby the Company shares a portion of the revenues earned through a distribution partner's Web property, revenue is recorded on a gross basis in accordance with Emerging Issues Task Force Issue 99-19 (EITF 99-19), *Reporting Revenue Gross as a Principal versus Net as an Agent*. The Company recognizes the cost of revenue share payments to the distribution partners in Content and distribution expense. Typically, revenue share expenses are based on a contracted rate per paid search or as a percent of gross revenue earned by the Company.

Mobile revenue: The Company earns revenue, typically from its agreements with mobile operators, from its content delivery services, which include both product downloads and subscriber usage, hosting and maintenance services and professional services and from sales of its media download products.

Subscriber usage fee revenue is generated based on the end users usage of the Company's messaging or browsing services. Revenue from professional services is recognized in the period in which the work is completed and accepted by the customer. Professional services are typically contracted at hourly rates, which are consistently applied, although differ by geographic region. Revenue for hosting services and maintenance of such services is recognized in the period in which the service is provided. The Company has entered into certain contracts that

Edgar Filing: INFOSPACE INC - Form 10-K

include set-up or integration fees and/or development fees, which are invoiced at the commencement of the agreement. Although these fees are sometimes paid to the Company at the commencement of the agreement, they are recognized ratably over the term of the agreement.

The Company's revenue from product downloads is generated when end users purchase media download products, such as ringtones, graphics or games, via their mobile phones. The agreements with the mobile operators provide that the mobile operators are responsible for billing and collecting from the end users, and remitting fees to the Company, for the purchase of the product download that the Company licenses or as a service fee for delivering a media download product that the mobile operator licenses directly. In accordance with EITF 99-19, the Company recognizes revenue, and a corresponding expense, for transactions in which the Company acts as a principal and directly licenses content from the license holder(s). The Company records revenue on a net basis for transactions in which the Company acts as an agent and delivers content that the mobile operator licenses directly from the license holder(s).

Table of Contents

INFOSPACE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2006, 2005, and 2004

Content and distribution expenses: Content and distribution expenses consist principally of costs related to licensing and royalty fee arrangements in connection with its mobile media download products for items such as ringtones, graphics and games, revenue sharing arrangements with distribution partners in connection with the search and directory services for Web properties of the Company's distribution partners and other content or data licenses.

For licensing and royalty agreements to secure the content for media download products, the Company records licensing and royalty expense in Content and distribution expense in the period in which the content or product is delivered. Certain agreements are based on a flat fee for a contracted period of time and these content expenses are recorded ratably over the contract period.

System and network operation expenses: System and network operation expenses are costs associated with the delivery, maintenance and support of the Company's products, services and infrastructure and principally consists of personnel costs, which include salaries, benefits and other employee related costs, and temporary help and contractors to augment staffing needs, communication costs, such as high-speed Internet access and hosting, equipment maintenance and repair, and professional service fees.

Product development expenses: Product development expenses consist principally of personnel costs, which include salaries, benefits and other employee related costs, and temporary help and contractors to augment staffing needs, for research, development, support and ongoing enhancements of the Company's products and services.

Sales and marketing expenses: Sales and marketing expenses consist principally of personnel costs, which include salaries, benefits and other employee related costs, and temporary help and contractors to augment staffing needs, and public relations, advertising, market research and promotion expenses.

General and administrative expenses: General and administrative expenses consist principally of personnel costs, professional service fees, which include legal, audit, and Securities and Exchange Commission (SEC) and Sarbanes-Oxley Act compliance fees, occupancy and general office expenses, and general business development and management expenses.

Advertising costs: Costs for advertising are recorded as expense when the advertisement appears or electronic impressions are recorded. Advertising expense totaled \$10.2 million, \$7.6 million, and \$5.4 million for the years ended December 31, 2006, 2005, and 2004, respectively.

Edgar Filing: INFOSPACE INC - Form 10-K

Restructuring charges: Restructuring charges reflect actual and estimated costs associated with the reductions in workforce and costs associated with the closures of certain Company facilities. During 2006, the Company committed to a plan to make operational changes, which included a reduction in workforce and, as part of the workforce reduction, consolidation of facilities. Charges associated with this restructuring plan are accounted for in accordance with SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS No. 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. Changing business conditions may affect the assumptions related to the timing and extent of restructuring activities. The Company will review the status of these activities on a quarterly basis and, if appropriate, record changes based on updated estimates. Included in Restructuring for 2006 are costs related to the impairment of goodwill and other intangible assets, employee separation costs, losses on contractual commitments, estimated future lease losses, and impairments of leasehold improvements and fixed assets.

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Other, net: Other, net consists of costs and/or charges that are not directly associated with other revenues or operating expense classifications. There were no Other, net charges in the years ended December 31, 2006 and 2005. Other, net in the year ended December 31, 2004, of \$3.2 million, primarily consists of the settlement of a litigation matter concerning promissory notes due from a former officer of the Company, resulting in a gain of \$3.9 million, which was partially offset by a charge of \$1.2 million related to the separation of a former executive officer.

Gain on equity investments: Gain on equity investments consists of gains from changes in the fair values of derivative instruments held by the Company and the other-than-temporary impairment of equity instruments. The Company recorded impairment charges totaling \$0, \$0, and \$916,000 for the years ended December 31, 2006, 2005, and 2004, respectively. The impairment charges are reflected in Gain on investments in the Consolidated Statements of Operations.

The Company periodically holds warrants in publicly-held and privately-held companies, initially acquired for business or strategic purposes. In 2004, a company in which the Company held warrants to purchase shares of stock announced that it was being acquired and that any outstanding warrants to purchase shares of the company would also be purchased. The Company recognized a gain and proceeds of \$1.4 million in 2004 based on the estimated fair value of the warrant. The warrant was subsequently sold for \$1.5 million and the Company recorded a gain of \$154,000 in 2005.

Gain on investments, net is comprised of the following for the years ended December 31, 2006, 2005, and 2004 (in thousands):

	Years Ended December 31,		
	2006	2005	2004
Other-than-temporary investment impairments	\$	\$	\$ (916)
Increase in fair value of warrants		154	1,341
	\$	\$ 154	\$ 425

Other income, net: Other income, net for the years ended December 31, 2006, 2005, and 2004, consists of the following (in thousands):

	Years Ended December 31,		
	2006	2005	2004
Interest income	\$ 19,628	\$ 11,250	\$ 4,698
Gain on litigation settlement		79,297	

Edgar Filing: INFOSPACE INC - Form 10-K

Foreign currency exchange gain (loss)	(42)	(1,131)	456
Other items, net	(205)	(94)	(163)
Other income, net	\$ 19,381	\$ 89,322	\$ 4,991

On March 25, 2005, the Company received proceeds of \$83.2 million from the settlement of several outstanding litigation matters. The Company recognized a gain of \$79.3 million, comprised of the settlement proceeds and interest, less \$3.9 million in legal fees. In January 2005, the Company recognized a foreign exchange loss in connection with an acquisition of a business.

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Income from discontinued operations and gain on sale of discontinued operations: In 2004, the Company completed the sale of its Payment Solutions business and has reflected the results of operations from its Payment Solutions business as discontinued operations for all periods presented. For the year ended December 31, 2004, the Company recorded income from the operating results of Payment Solutions of \$2.3 million and the Company recorded a gain on the sale of Payment Solutions of \$29.1 million.

Net income (loss) per share: Basic net income (loss) per share is computed using the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is computed using the weighted average number of common and potentially dilutive shares outstanding during the period. Potentially dilutive shares consist of the incremental common shares issuable upon conversion of the exercise of stock options and warrants, and upon employees vesting in restricted stock grants, using the treasury stock method. Potentially dilutive shares are excluded from the computation of earnings per share if their effect is antidilutive.

The treasury stock method calculates the dilutive effect only for those stock options and warrants whose exercise price is less than the average stock price during the period presented.

	Years Ended December 31,		
	2006	2005	2004
Weighted average common shares outstanding, basic	31,254,357	32,284,100	32,108,577
Dilutive stock options and warrants		3,331,830	4,432,258
Weighted average common shares outstanding, diluted	31,254,357	35,615,930	36,540,835
Stock options and warrants excluded as antidilutive	6,323,071	3,051,342	1,818,887

Other Comprehensive Income: Comprehensive income includes Net income, plus items that are recorded directly to stockholders' equity, including foreign currency translation adjustments and the net change in unrealized gains and losses on short-term and long-term investments. Included in the net change in unrealized gains and losses are realized gains or losses included in the determination of Net income in the period realized. For the years ended December 31, 2006 and 2005, the Company recorded a loss of \$42,000 and \$1.1 million, respectively. For the year ended December 31, 2004, the Company recorded a gain of \$540,000. Components of Other comprehensive income included on the Consolidated Balance Sheets at December 31, 2006 and 2005 consist of the following (in thousands):

	December 31,	
	2006	2005
Unrealized gain on foreign currency translation	\$ 1,423	\$ 967
Unrealized gain (loss) on available-for-sale investments	41	(448)
Cumulative tax effect on unrealized gain on available-for-sale investments	(186)	

\$ 1,278 \$ 519

Foreign currencies: Foreign subsidiary financial statements are denominated in foreign currencies and are translated at the exchange rate on the balance sheet date. Translation adjustments resulting from this process are charged or credited to other comprehensive income. Revenue and expenses are translated at average rates of exchange prevailing during the period. Realized gains and losses on foreign currency transactions are included in Other income, net.

Table of Contents

INFOSPACE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2006, 2005, and 2004

Concentration of credit risk: Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash equivalents, short-term and long-term investments and trade receivables. These instruments are generally unsecured and uninsured. The Company places its cash equivalents and investments with major financial institutions. Accounts receivable are typically unsecured and are derived from revenues earned from customers primarily located in the United States operating in a variety of industries and geographic areas. The Company performs ongoing credit evaluations of its customers and maintains allowances for potential credit losses.

Revenue concentration: The Company derives a significant portion of its revenues from a small number of customers. Revenues from the top ten customers of the Company represent 94%, 90%, and 89% of total revenues in the years ended December 31, 2006, 2005, and 2004, respectively. The number of customers that accounted for more than 10% of total revenues in the years ended December 31, 2006, 2005, and 2004 were three, three, and four, respectively. For the year ended December 31, 2006, two customers of the Online business unit accounted for approximately 27% and 14% of total Company revenues and one customer of the Mobile business unit accounted approximately 35% of total Company revenues. For the year ended December 31, 2005, two customers of the Online business unit accounted for approximately 25% and 16% of total Company revenues and one customer of the Mobile business unit accounted approximately 28% of total Company revenues. For the year ended December 31, 2004, two customers of the Online business unit accounted for approximately 26% and 19% of total Company revenues and one customer of the Mobile business unit accounted for approximately 18% of total Company revenues, and one customer of both the Online and Mobile business units accounted for approximately 12% of total Company revenues. At December 31, 2006 and 2005, two customers each accounted for more than 10% of the accounts receivable balance.

Fair value of financial instruments: Financial instruments consist primarily of Cash and cash equivalents, Investments, Notes and other receivables, Prepaid expenses and other assets, Accounts payable, Accrued expenses and other current liabilities, Deferred revenues and warrants in other entities. The carrying amount of financial instruments not recorded at fair value on the Consolidated Balance Sheets approximates the fair value of such instruments.

Derivative instruments: The Company follows SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, which requires that all derivatives be recorded on the balance sheet at fair value. The Company accounts for all derivatives by recognizing the changes in their fair values as gains or losses on the Company's Consolidated Statement of Operations.

Income taxes: The Company accounts for income taxes under the asset and liability method, under which Deferred tax assets, including net operating loss carryforwards, and liabilities are determined based on temporary differences between the book and tax basis of assets and liabilities. The Company evaluates the Deferred tax assets for future realization and reduce them by a valuation allowance to the extent management of the Company believes a portion will not be realized. Management considers many factors when assessing the likelihood of future realization of our Deferred tax assets including recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income, the carryforward periods available to for tax reporting purposes, and other relevant factors. Due to the size of the net operating loss carryforwards, their expiration beginning in 2020, and the Company's recent level of annualized profitability, management has determined that sufficient uncertainty exists regarding the realizability of all of the Deferred tax assets and has provided a partial valuation allowance. The Company will continue to evaluate the likelihood of the realization of the Deferred tax assets. Significant judgment is required in making this

assessment, and it is very difficult to predict when, if ever, the assessment may conclude that the remaining portion of the Deferred tax assets are more likely than not

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

realizable. At December 31, 2006 and 2005, the Company had released \$68.8 million and \$25.0 million of the valuation allowance, respectively. In 2006, \$35.6 million related to goodwill, \$28.6 million related to net operating loss carryforwards, and \$4.6 million related to equity. In 2005, the entire valuation allowance released of \$25.0 million related to net operating loss carryforwards.

Reclassification: Certain reclassifications have been made to the balances in the accompanying consolidated financial statements to conform to the 2006 presentation. The reclassifications consisted of aggregating certain currently immaterial captions on the Company's Statements of Cash Flows and reclassifications to the Company's segment reporting due to operational changes. Those reclassifications did not impact previously reported Revenues, Total operating expenses, Operating income (loss), Net income (loss), Total assets, Total liabilities, or Stockholders' equity.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates are used for impairment of goodwill and other intangible assets, useful lives of other intangible assets, purchase accounting, other-than-temporary impairment of investments, revenue recognition, the estimated allowance for sales returns and doubtful accounts, restructuring-related liabilities, accrued contingencies and valuation allowance for deferred tax assets. Actual amounts may differ from estimates.

Note 2: Balance Sheet Components

Short-term investments classified as available-for-sale at December 31, 2006 and 2005 consist of the following, stated at fair market value (in thousands):

	December 31,

Note 3: Stockholders Equity*Stock Incentive Plans*

Edgar Filing: INFOSPACE INC - Form 10-K

The Company's stock incentive plans generally provide employees, officers, directors, independent contractors and consultants of the Company an opportunity to purchase shares of stock pursuant to options which are not described in Section 422 of the Internal Revenue Code of 1986, as amended (nonqualified stock options). The plans also provide for the sale or bonus of stock to eligible individuals in connection with the performance of service for the Company. Finally, the plans authorize the grant of stock appreciation rights, either separately or in tandem with stock options, which entitle holders to cash compensation measured by appreciation in the value of the stock. The stock incentive plans are administered by the Compensation Committee, which is composed of non-employee directors.

1996 Plan: The Company primarily has one stock plan that was used for grants during 2006, 2005, and 2004. Options granted in 2006 under the Restated 1996 Flexible Stock Incentive Program (the 1996 Plan) vest over two or four years, with either 50% or 25% vesting one year from the date of grant and ratably thereafter on a semi-annual basis, and expire seven years from the date of grant. Options granted prior to 2006 under the 1996 Plan typically vest over four years, either 25% one year from the date of grant and ratably thereafter on a monthly basis or 25% one year from the date of grant and ratably thereafter on a semi-annual basis, and expire

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

seven or ten years from the date of grant. Shares underlying options available under the 1996 Plan increase annually on the first day of January by an amount equal to the lesser of (A) five percent of the Company's outstanding shares at the end of the Company's preceding fiscal year, or (B) a lesser amount determined by the Board of Directors. The 1996 Plan limits the number of shares of common stock that may be granted to any one individual pursuant to stock options in any fiscal year of the Company to 800,000 shares, plus an additional 800,000 shares in connection with his or her initial employment with the Company, which grant shall not count against the limit. If an option is surrendered or for any other reason ceases to be exercisable in whole or in part, the shares which were subject to the option but on which the option has not been exercised shall continue to be available under the 1996 Plan. On December 5, 2006, the 1996 Plan was amended to permit grants of restricted stock units (RSUs). RSUs granted under the 1996 Plan in 2006 are scheduled to vest over two years with 50% vesting at the end of the first year and 50% vesting at the end of the two-year period.

2001 Plan: In February 2001, the Company implemented the 2001 Nonstatutory Stock Option Plan (the 2001 Plan), under which nonqualified stock options to purchase common stock or shares of restricted stock may be granted to employees. Under the 2001 Plan, 2.5 million shares of common stock are authorized for grant of options or issuance of restricted stock. Options granted in 2006 under the 2001 Plan expire seven years from the date of the grant and vest over three years, with 33% vesting one year from the date of grant and ratably thereafter on a semi-annual basis. Options granted prior to 2006 under the 2001 Plan expire ten years from the date of the grant and vest over two years, with 50% vesting ratably on a monthly basis for the first 24 months and the remaining 50% balance vesting at the end of the two-year period.

Plans assumed through acquisition: In addition to the plans described above, the Company has five option plans assumed through acquisitions by InfoSpace and Go2Net, Inc. Options granted under these plans typically vest over a four-year period, 25% one year from the date of grant and ratably thereafter on a quarterly basis and expire six years from the date of grant.

A summary of the general terms of options to purchase common stock and RSUs previously granted under these plans, including options outstanding and available for grant at December 31, 2006, is as follows:

	1996 Plan	2001 Plan	Switchboard Plan	Other Plans
Requisite service period in years	4 or less	3 or less	4	4
Life in years	7 or 10	7 or 10	6	6 or 10
Options and RSUs outstanding at December 31, 2006	9,164,450	963,824	294,050	864
Options and RSUs available for grant at December 31, 2006	1,930,941	842,732	162,901	

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Options: Activity and pricing information regarding all options, excluding the InfoSpace, Inc. and Saraide Inc. 2000 Stock Plan (the Tandem Plan), are summarized as follows:

		Weighted
		Average
		Exercise
	Option	Price
Outstanding December 31, 2003	7,327,963	\$ 24.46
Granted	2,179,525	38.56

Total		9,067,818	5.06	\$ 27.70	5,531,799	\$ 30.06	

On December 14, 2005, the Company accelerated vesting of certain unvested and out-of-the-money stock options with exercise prices equal to or greater than \$34.00 per share that were previously awarded under the Company's equity compensation plans to its employees. These options were accelerated to avoid recording future compensation expense with respect to such options. The Company's management believes that because such options had exercise prices in excess of the current market value of the Company's stock, the options were not

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

achieving their original objective. The acceleration of vesting was effective for stock options outstanding as of December 14, 2005. Options to purchase 2.4 million shares of common stock were subject to the acceleration and the weighted average exercise price of the options subject to the acceleration was \$40.51. Due to this acceleration, an additional \$29.3 million is included in the pro forma stock-based compensation expense for the year ended December 31, 2005.

Restricted Stock Units: Activity and weighted average grant date fair value information regarding all restricted stock unit grants are summarized as follows:

	Restricted Stock	Weighted Average Grant Date Fair Value
Outstanding December 31, 2005		\$
Granted	1,355,970	20.38
Cancelled	(600)	(20.38)
Exercised		
Outstanding December 31, 2006	1,355,370	\$ 20.38

Tandem Plan: On April 17, 2000, the Company initiated the Tandem Plan, a tandem plan under which incentive options and nonqualified stock options to purchase common stock may be granted to employees of Saraide, Inc. ("Saraide"), a subsidiary of the Company. Under the Tandem Plan, Saraide employees receiving the grant received an option to purchase Saraide stock or stock of the Company. At the time of exercise, the employee chooses the option to exercise the Saraide option or the InfoSpace option. Upon exercise of one option, rights in the option of the other company are cancelled. Under the Tandem Plan, options to purchase 1,000,000 shares of the Company's common stock were reserved for grants. Options under the Tandem Plan expire ten years from the date of the grant. Options under this plan generally vest over four years, 25% one year from date of grant and ratably thereafter on a monthly basis. As of December 31, 2006, no shares of InfoSpace common stock remain available for grant of options under the Tandem Plan.

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Activity and pricing information regarding the Tandem Plan is summarized as follows:

		Weighted

Outstanding December 31, 2006	1,000	\$ 454.38
Options exercisable, December 31, 2006	1,000	\$ 454.38

Warrants: The Company also has outstanding warrants to purchase 1,837,109 shares of common stock issued in connection with the Company's 1998 private placement offerings and agreements to provide white pages directory and classified information services. These warrants can be exercised at any time until their expirations dates, which are between May and August 2008. For the years ended December 31, 2006, 2005, and 2004, no warrants were exercised, and at December 31, 2006 the warrants outstanding have exercise prices as follows:

	Number
Range of Exercise Prices	Outstanding
\$5.00	742,211

Edgar Filing: INFOSPACE INC - Form 10-K

\$7.50	324,718
\$12.50	324,718
\$15.00	445,462
Total Warrants Outstanding	1,837,109

Other Plans:

1998 Employee Stock Purchase Plan: The Company adopted the ESPP in August 1998. The ESPP is intended to qualify under Section 423 of the Code and permits eligible employees of the Company and its subsidiaries to purchase common stock through payroll deductions of up to 15% of their compensation. Under the ESPP, no employee may purchase common stock worth more than \$25,000 in any calendar year, valued as of the first day of each offering period. In addition, owners of 5% or more of the Company or one of its subsidiary's common stock may not participate in the ESPP. An aggregate of 1,360,000 shares of common stock are authorized for issuance under the ESPP. The ESPP was implemented with six-month offering periods that begin on each February 1 and August 1. The price of common stock purchased under the ESPP is the lesser of 85% of

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

the fair market value on the first day of an offering period and 85% of the fair market value on the last day of an offering period. The ESPP does not have a fixed expiration date, but may be terminated by the Company's Board of Directors at any time. There were 94,404, 60,058, and 58,694 shares issued for the ESPP periods that ended in 2006, 2005, and 2004, respectively. During the year ended December 31, 2006, financing cash generated for the purchase of shares through the ESPP amounted to \$1.8 million. The Company issues new shares upon purchase through the ESPP.

Stock Repurchase Plan: On May 30, 2006, the Company's Board of Directors approved a stock repurchase plan whereby the Company may purchase up to \$100 million of its common stock in open-market transactions during the succeeding twelve month period. Repurchased shares will be retired and resume the status of authorized but unissued shares of common stock. Under the repurchase plan, during 2006, the Company did not repurchase any shares.

On May 13, 2005, the Company's Board of Directors approved a stock repurchase plan whereby the Company may purchase up to \$100 million of its common stock in open-market transactions during the succeeding twelve month period. Repurchased shares will be retired and resume the status of authorized but unissued shares of common stock. Under the repurchase plan, during 2005, the Company purchased 2,633,002 shares in open-market transactions at a total cost, exclusive of purchase and administrative costs, of \$70.2 million, at an average price of \$26.66 per share.

Note 4: Stock-based Compensation Expense

For the years ended December 31, 2006, 2005 and 2004, the Company recognized compensation expense related to stock options and RSUs of \$16.9 million, \$0, and \$1.6 million, respectively. To estimate compensation expense which would have been recognized under SFAS No. 123 for the years ended December 31, 2005 and 2004 and the compensation cost that was recognized under SFAS No. 123(R) for the year ended December 31, 2006, the Company used the Black-Scholes option-pricing model with the following weighted-average assumptions for equity awards granted:

	Employee Stock Option Plans			Employee Stock Purchase Plan		
	Years Ended December 31,			Years Ended December 31,		
	2006	2005	2004	2006	2005	2004
Risk-free interest rate	4.38% - 5.07%	3.85% - 4.39%	2.99% - 3.72%	4.13% - 4.84%	2.77% - 3.73%	1.01% - 1.78%
Expected dividend yield	0%	0%	0%	0%	0%	0%
Volatility	52% - 88%	63% - 69%	64% - 67%	30% - 35%	58% - 79%	63% - 78%
Expected life	2.8 years	3.3 years	3.4 years	6 months	6 months	6 months

Edgar Filing: INFOSPACE INC - Form 10-K

The risk-free interest rate is based on the implied yield available on U.S. Treasury issues with an equivalent remaining term. The Company has not paid dividends in the past and does not plan to pay any dividends in the future. The expected volatility is based on historical volatility of the Company's stock for the related expected life of the option. The expected life of the equity award is based on historical experience.

As of December 31, 2006, total unrecognized stock-based compensation cost related to unvested stock options and unvested RSUs was \$63.3 million, which is expected to be recognized over a weighted average period of approximately 13 months. Total unrecognized stock-based compensation cost related to unvested stock options was \$36.0 million, which is expected to be recognized over a weighted average period of approximately 13 months. Total unrecognized stock-based compensation cost related to unvested RSU grants was \$27.3 million, which is expected to be recognized over a weighted average period of approximately 18 months.

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

The Company has included the following amounts for stock-based compensation cost, including the cost related to the ESPP, in the accompanying Consolidated Statements of Operations for the year ended December 31, 2006 (amounts in thousands):

	Year Ended December 31, 2006
Systems and network operations	\$ 1,646
Product development	2,662
Sales and marketing	4,772
General and administrative	7,783
Total	\$ 16,863
Basic and diluted pre-tax earnings per share impact	\$ 0.54

Excluded from the amounts above is \$824,000 of expense included in Restructuring, resulting from options held by terminated employees and \$242,000 that was capitalized as part of internally developed software. The total tax expense recognized related to stock-based compensation for 2006 was \$139,000 and no Financing cash flow was generated.

Stock-based compensation expense recognized during the year ended December 31, 2006 includes (1) compensation expense for awards granted prior to, but not yet fully vested as of, January 1, 2006, and (2) compensation expense for the share-based payment awards granted subsequent to December 31, 2005, based on the grant date fair values estimated in accordance with the provisions of SFAS No. 123 and SFAS No. 123(R), respectively. The Company has historically disclosed and currently recognizes stock-based compensation expense over the vesting period for each separately vesting portion of a share-based award as if they were, in substance, a multiple share-based award. SFAS No. 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. In the Company's pro forma disclosures required under SFAS No. 123 for the periods prior to 2006, the Company accounted for forfeitures as they occurred. The Company has historically and continues to estimate the fair value of share-based awards using the Black-Scholes-Merton (Black-Scholes) option-pricing model.

Had compensation expense for the plans been determined based on the fair value of the options at the grant dates for awards under the plans consistent with SFAS No. 123, the Company's net income for the years ended December 31, 2005 and 2004 would have been as follows (amounts in thousands, except per share data):

	Years Ended December 31, 2005	2004
Net income as reported	\$ 159,368	\$ 82,401

Edgar Filing: INFOSPACE INC - Form 10-K

Stock-based compensation, as reported		1,575
Total stock-based compensation determined under fair value based method for all awards	(60,180)	(36,314)
Pro forma income	\$ 99,188	\$ 47,662
Basic net income per share, as reported	\$ 4.94	\$ 2.57
Diluted net income per share, as reported	\$ 4.47	\$ 2.26
Pro forma basic net income per share, SFAS No. 123	\$ 3.07	\$ 1.48
Pro forma diluted net income per share, SFAS No. 123	\$ 2.85	\$ 1.35

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Weighted average fair value for options granted in the years ended December 31, 2006, 2005, and 2004 was \$10.40, \$16.65, and \$18.30 per share, respectively. The Company issues new shares upon exercise of options to purchase common stock and vesting of restricted stock units.

Total intrinsic value of options exercised to purchase common stock in the years ended December 31, 2006, 2005, and 2004 was \$6.7 million, \$12.4 million, and \$31.8 million, respectively. The total intrinsic value of the 9,068,818 options outstanding at December 31, 2006 was \$16.5 million and the options outstanding have a weighted average remaining contractual term of 5.1 years. The total intrinsic value of the 1,355,370 restricted stock units outstanding at December 31, 2006 was \$27.8 million and the restricted stock units outstanding have a weighted average remaining contractual term of 1.5 years. The total intrinsic value of the 5,532,799 options exercisable at December 31, 2006 was \$15.5 million and the options exercisable have a weighted average remaining contractual term of 4.5 years. Cash generated from the exercise of stock options amounted to \$3.6 million for the year ending December 31, 2006.

Note 5: Business Combinations

The following presents information regarding the Company's business combinations for the years ended December 31, 2006, 2005, and 2004, including information about the allocation of purchase price from these transactions.

Fiscal Year 2006

No business combinations were entered into during the year ended December 31, 2006.

Fiscal Year 2005

elkware GmbH. On January 7, 2005, the Company acquired elkware GmbH, a mobile gaming company, at a cost of 20.0 million euros in cash. The purchase price was allocated to the assets acquired and liabilities assumed based on their estimated fair values as follows:

	(in thousands)
Tangible assets acquired	\$ 2,157

Edgar Filing: INFOSPACE INC - Form 10-K

Liabilities assumed	(1,919)
Fair value of tangible net assets acquired	238
Fair value adjustments to intangible assets	13,164
Total fair value of net assets acquired	\$ 13,402
Purchase price:	
Cash	\$ 26,354
Acquisition costs	1,027
Deferred tax liability	4,607
Less fair value of net assets acquired	(13,402)
Excess of purchase price over net assets acquired, allocated to Goodwill	\$ 18,586

In December 2004, due to the significant fluctuations in the exchange rate of the U.S. dollar to the euro, the Company entered into a forward exchange contract to mitigate its foreign currency exposure. At December 31,

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

2004, the exchange rate of the U.S. dollar had declined relative to the euro and a \$456,000 gain on the forward exchange contract was recorded in 2004. Subsequently, in January 2005 when the acquisition was consummated, the U.S. dollar had strengthened against the euro and a \$934,000 loss as a result of the settlement of that foreign exchange contract was recorded in 2005.

Fiscal Year 2004

IOMO Limited. On December 1, 2004, the Company acquired all of the outstanding stock of IOMO Limited, a mobile games company, for 8.0 million British pounds in cash, plus acquisition costs. The purchase price was allocated to the assets acquired and liabilities assumed based on their estimated fair values as follows:

	(in thousands)
Tangible assets acquired	\$ 2,254
Liabilities assumed	(919)
Fair value of tangible net assets acquired	1,335
Fair value adjustments to intangible assets	7,850
Total fair value of net assets acquired	\$ 9,185
Purchase price:	
Cash	\$ 15,384
Acquisition costs	247
Deferred tax liability	2,355
Less fair value of net assets acquired	(9,185)
Excess of purchase price over net assets acquired, allocated to Goodwill	\$ 8,801

Atlas Mobile, Inc. On July 1, 2004, the Company acquired the assets of Atlas Mobile, Inc., a provider of mobile multi-player tournament games, for \$6.3 million in cash, plus acquisition costs. The purchase price was allocated to the assets acquired based on their estimated fair values as follows:

	(in thousands)
Purchase price:	

Edgar Filing: INFOSPACE INC - Form 10-K

Cash	\$ 6,349
Less fair value of net assets acquired	(5,000)
Excess of purchase price over net assets acquired, allocated to Goodwill	\$ 1,349

On January 22, 2007, the Company sold the assets acquired from Atlas Mobile for \$1.5 million.

Switchboard Incorporated. On June 3, 2004, the Company acquired Switchboard Incorporated (Switchboard), a provider of local online advertising and Internet based yellow pages. The Company acquired all of the outstanding stock of Switchboard for \$7.75 per share in cash totaling \$159.4 million, plus transaction fees of \$6.0 million, for an aggregate purchase price of \$165.4 million. The Company acquired Switchboard to further expand its presence in the online directory industry, because of Switchboard's brand name and trade recognition and existing traffic base, among other items. At the acquisition date, Switchboard had \$56.4 million in cash and marketable securities and no debt.

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

The purchase price was allocated to the assets acquired and liabilities assumed based on their estimated fair values as follows:

	(in thousands)
Tangible assets acquired	\$ 59,565
Liabilities assumed	(2,927)
Fair value of tangible net assets acquired	56,638
Fair value adjustments to intangible assets	22,925
Total fair value of net assets acquired	\$ 79,563
Purchase price:	
Cash	\$ 159,392
Acquisition costs	6,031
Deferred tax liability	5,390
Less fair value of net assets acquired	(79,563)
Excess of purchase price over net assets acquired, allocated to Goodwill	\$ 91,250

The tangible assets acquired and liabilities assumed were recorded at their fair values, which approximated their carrying amounts at the acquisition date. The Company evaluates the carrying value of its intangible assets for impairment whenever events or changes in circumstances indicate the carrying amount of an intangible asset may not be recoverable. The goodwill acquired will be tested for impairment at least annually, with the Company's other indefinite-lived intangible assets.

Note 6: Goodwill and Intangible Assets

The following table provides information about activity in Goodwill by reporting unit for the period from January 1, 2005 to December 31, 2006 (in thousands):

	Mobile	Online	Total
Goodwill as of January 1, 2005	\$ 18,611	\$ 140,199	\$ 158,810
Goodwill associated with elkware acquisition	18,586		18,586

Total definite-lived intangible assets	43,749	(27,144)	(12,623)	3,982	70,626	(42,129)	28,497
Indefinite-lived intangible assets	15,583			15,583	15,583		15,583
Total	\$ 59,332	\$ (27,144)	\$ (12,623)	\$ 19,565	\$ 86,209	\$ (42,129)	\$ 44,080

Assuming the Company does not acquire businesses or intangible assets in the future, Amortization of definite-lived intangible assets is expected to be \$4.0 million in 2007, which will completely amortize all definite-lived intangible assets recorded at December 31, 2006.

Impairment Analysis

In the year ended December 31, 2006, as part of its restructuring, the Company evaluated its intangible assets and recorded an impairment charge of \$12.6 million related certain definite-lived intangible assets acquired in acquisitions and, accordingly, the Company determined that an impairment occurred and, in addition, as part of the restructuring, Goodwill was evaluated and an impairment charge of \$31.9 million was recorded. These impairments are recorded in Restructuring.

In the years ended December 31, 2006, 2005, and 2004, the Company conducted its annual impairment analysis for goodwill and indefinite-lived intangible assets as of November 30, 2006, 2005, and 2004 and determined that the carrying value of its goodwill and indefinite-lived intangible assets, other than in connection with its 2006 restructuring, was not impaired. The annual impairment analysis is based on a valuation of the Company's reporting units using a combination of the Company's quoted stock price and projections of future discounted cash flows for each reporting unit.

Note 7: Commitments and Contingencies

The Company has noncancellable operating leases for its corporate facilities. The leases expire through 2013. Rent expense under operating leases totaled \$6.1 million, \$5.4 million, and \$3.6 million for the years ended December 31, 2006, 2005, and 2004, respectively.

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Future minimum rental payments required under noncancellable operating leases are as follows for the years ending December 31 (in thousands):

	2007	2008	2009	2010	2011	Thereafter	Total
Minimum lease payments required	\$ 7,623	\$ 5,254	\$ 6,888	\$ 6,753	\$ 5,706	\$ 5,466	\$ 37,690
Less sublease income	(112)						(112)
Net lease payments required	\$ 7,511	\$ 5,254	\$ 6,888	\$ 6,753	\$ 5,706	\$ 5,466	\$ 37,578

As of December 31, 2006, the Company has pledged \$4.4 million as collateral for standby letters of credit and bank guaranties for certain of its property leases, which is included in Other long-term assets.

Litigation

On June 6, 2003, a complaint entitled *Enger v. Richards*, filed in the Superior Court of the State of Washington (King County), was amended to add the Company and Naveen Jain, its former chairman and chief executive officer, as defendants. The action alleged various statutory and common law claims in connection with the sale of Yellow Pages on the Internet, LLC to the Company in May 1997. In December 2003, the plaintiff voluntarily dismissed the Company from this action. In January 2004, defendant John Richards, a former Company employee, asserted a third-party claim for indemnification against the Company, which purports to seek reimbursement for his legal fees as well as any judgment. In January 2005, the plaintiff, Jain and the Company settled all of their respective claims including Jain's claim for indemnification against the Company and any potential claims that Enger could bring against the Company. The settlement was paid entirely by the Company's insurance. Richards' claim for indemnification was not a part of the settlement agreement. On March 16, 2005, the trial court entered a judgment in Richards' favor of less than \$500. Enger appealed that judgment to the Washington Court of Appeals, which rejected Enger's appeal. Enger is seeking review in the Washington Supreme Court. The Company believes it has meritorious defenses to Richards' claim for indemnification, but litigation is inherently uncertain and the Company may not prevail in this matter.

On March 26, 2004, a complaint entitled *Alexander Hutton Capital, L.L.C. v. John Richards, Naveen Jain, et al.*, was filed in the Superior Court of the State of Washington (King County). Plaintiff did not name the Company as a defendant. As in the *Enger v. Richards* case (above) to which it is related, this action alleges various statutory and common law claims in connection with the sale of Yellow Pages on the Internet, LLC to the Company in May 1997. In July 2004, Richards asserted a third party claim for indemnification against the Company, which purports to seek reimbursement for his legal fees as well as any judgment. The Court dismissed on summary judgment certain of plaintiff's claims and theories of recovery and issued rulings limiting plaintiff's damages. In February 2005, the plaintiff, the Jains and the Company settled their respective claims, including the Jains' claim for indemnification against the Company and any potential claim that Hutton could bring against the Company. The settlement was paid entirely by the Company's insurance. On July 22, 2005, the Court granted Richards' motion to dismiss his

Edgar Filing: INFOSPACE INC - Form 10-K

claim for indemnification without prejudice. Hutton prevailed against Richards at trial and judgment was entered against Richards for approximately \$3 million. Richards appealed and then dismissed his appeal on February 2, 2007.

On January 11, 2007, EMI Entertainment World, Inc. and its associated music publishers filed a lawsuit against the Company and several alleged subsidiaries or predecessors-in-interest in the United States District Court for the Southern District of New York. The plaintiffs charge that the Company breached two ringtone license agreements by underpaying royalties, fraudulently reported the amount of royalties owed, and infringed the plaintiffs' copyrights by making unlicensed use of the plaintiffs' works. The plaintiffs claim in excess of \$10 million in damages for the alleged breaches of contract, unspecified compensatory and punitive damages for the

Table of Contents

INFOSPACE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2006, 2005, and 2004

alleged fraud, and in excess of \$100 million in statutory damages for alleged copyright infringement. The lawsuit is at its initial stages and the Company is conducting its factual investigation. Based on its knowledge to date, the Company believes that the plaintiffs' claims are without merit and that it has meritorious defenses to them and intends to vigorously defend the suit, however, litigation is inherently uncertain and the Company may not prevail in this matter. The Company has filed a motion to dismiss several claims and several entities from the suit. That motion has not yet been set for hearing.

Other

From time to time the Company is subject to various other legal proceedings or claims that arise in the ordinary course of business. Additionally, the Company is subject to income taxes in the U.S. and several foreign jurisdictions and, in the ordinary course of business, there are transactions and calculations where the ultimate tax determination is uncertain. Although the Company cannot predict the outcome of these matters with certainty, the Company's management does not believe that the disposition of these ordinary course matters will have a material adverse effect on the Company's financial position, results of operations or cash flows.

In the ordinary course of business, the Company may provide indemnifications of varying scope and terms to customers, vendors, partners and other parties. The Company has agreed to hold certain parties harmless against losses arising from a breach of representations or covenants, or other claims made against certain parties. It is not possible to determine the maximum potential amount under these indemnification agreements due to the conditional nature of the Company's obligations and the unique facts and circumstances involved in each particular agreement. Accordingly, the Company has not recorded a liability related to indemnification provisions.

The Company periodically enters into agreements that require minimum performance commitments. The Company's management believes that the likelihood is remote that any such arrangements will have a significant adverse effect on its financial position or liquidity. Accordingly, the Company has not recorded a liability related to these contingencies.

Note 8: Income Taxes

Income tax benefit from continuing operations consists of the following for the years ending December 31, 2006, 2005 and 2004 (in thousands):

Years Ended December 31,

Edgar Filing: INFOSPACE INC - Form 10-K

	2006	2005	2004
Current			
U.S. federal	\$ 309	\$ 2,522	\$ (4)

State	(634)		
International		(1,931)	
Total deferred benefit	(39,001)	(26,931)	
Benefit for income taxes, net, relating to continuing operations	\$ (38,538)	\$ (23,475)	\$ (29)

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Income tax benefit recognized during the year ended December 31, 2006 was primarily due to the effect of the reduction in the valuation allowance of \$28.6 million, related to its net operating losses, a tax benefit for current operations partially offset by a tax expense for Federal alternative minimum, state and international taxes.

The Income tax benefit from continuing operations differs from the amount computed by applying the statutory federal income tax rate for the years ending December 31, 2006, 2005, and 2004 as follows (in thousands):

	Years Ended December 31,		
	2006	2005	2004
Income tax provision (benefit) at federal statutory rate of 35%	\$ (18,769)	\$ 47,563	\$ 28,830
International			1,743
State, net of federal benefit	183	679	
Nondeductible goodwill	8,210		18,122
Change in valuation allowance current operations		(45,933)	(47,630)
Decrease in beginning of year valuation allowance balance	(28,643)	(25,000)	
Other	481	(784)	(1,094)
Benefit for income taxes, net	\$ (38,538)	\$ (23,475)	\$ (29)

The tax effect of temporary differences and net operating loss carry forwards that give rise to the Company's deferred tax assets and liabilities as of December 31, 2006 and 2005 are as follows (in thousands):

	December 31,	
	2006	2005
Deferred tax assets:		
Current	\$ 2,429	\$ 860
Non-current:		
Net operating loss carryforwards	381,187	379,714
Tax credit carryforwards	3,223	2,913
Depreciation and amortization	32,883	23,643
Capital loss carryforwards	16,136	17,917
Other, net	5,580	746
Total non-current	439,009	424,933
Total gross deferred tax assets	441,438	425,793

Edgar Filing: INFOSPACE INC - Form 10-K

Valuation allowance	(337,438)	(400,793)
Net deferred tax assets	\$ 104,000	\$ 25,000
Deferred tax liabilities (non-current):		
Intangible assets	(5,390)	(10,421)
Other	(112)	
Total gross deferred liabilities	(5,502)	(10,421)
Net deferred tax assets	\$ 98,498	\$ 14,579

At December 31, 2006 and 2005, the Company provided a valuation allowance for its net deferred tax assets for which significant uncertainty exists regarding the ultimate realization. The Company evaluates its deferred

Table of Contents

INFOSPACE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Years Ended December 31, 2006, 2005, and 2004

tax assets for future realization and reduces it by a valuation allowance to the extent significant uncertainty exists. Many factors are considered when assessing the likelihood of future realization of deferred tax assets including recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income, the carryforward periods available for tax reporting purposes, and other relevant factors. At December 31, 2006, the Company determined it was more likely than not that a portion of the operating assets would be realizable in the foreseeable future. Accordingly, the Company has reduced its valuation allowance related to its operating loss deferred tax assets and recognized an income tax benefit of \$28.6 million. The net change in the valuation allowance during the years ended December 31, 2006 and 2005 was \$63.4 million and \$77.3 million, respectively.

As of December 31, 2006, the Company's U.S. federal net operating loss carryforward for income tax purposes was approximately \$1 billion, of which \$877 million pertains to certain net operating loss carryforwards related to stock-based tax deductions in excess of amounts recognized for financial reporting purposes. When the net operating loss carryforwards related to stock-based tax deductions are recognized, the income tax benefit of those losses is accounted for as a credit to Stockholders' equity on the Consolidated Balance Sheets rather than the Consolidated Statements of Operations.

If not utilized, the Company's federal net operating loss carryforwards will expire between 2020 and 2024. Additionally, changes in ownership, as defined by Section 382 of the Internal Revenue Code, may limit the amount of net operating loss carryforwards used in any one year.

Note 9: Restructuring

Restructuring charges were \$62.3 million, \$0, and \$222,000 for the years ended December 31, 2006, 2005, and 2004, respectively.

In 2006, the Company announced that one of its carrier partners plans to develop direct licensing relationships with the major record labels beginning in 2007. The Company expects that these direct relationships will have a material negative impact on its revenues and operating results. As a result, during 2006, the Company committed to a plan to make operational changes to its business to align costs with expected future revenues, which included a reduction of its workforce and consolidation of its facilities. The Company recorded charges for severance, facilities, probable losses for contractual minimum royalties or fees for licensed mobile content, and a charge for certain fixed assets, including leasehold improvements and internally developed software, which were abandoned in 2006. Internally developed software impairment charges were \$562,000. Restructuring also includes the costs associated with the closing of its office in Hamburg, Germany announced by the Company during September 2006. As a result, the Company recorded an aggregate charge of \$62.3 million in Restructuring in 2006.

Edgar Filing: INFOSPACE INC - Form 10-K

During 2004, the Company recorded an adjustment to its reserves related to a restructuring charge in 2003, to adjust its estimated reserves for its future excess facilities costs.

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Restructuring for the years ended December 31, 2006, 2005, and 2004 consists of the following (in thousands):

Type	Years Ended December 31,		
	2006	2005	2004
Impairment of goodwill	\$ 31,903	\$	\$
Impairment of other intangible assets	12,623		
Employee separation costs	8,687		(31)
Stock-based compensation	824		
Losses on contractual commitments	5,671		
Estimated future lease losses	1,667		253
Impairment of leasehold improvements and fixed assets	941		
	\$ 62,316	\$	\$ 222

At December 31, 2006, the accrued liability associated with the restructuring related charges was \$10.2 million and consisted of the following (in thousands):

	Employee	Contractual	Facility	
	separation	commitments	abandonment	Total
Reserve balance at December 31, 2004	\$	\$	\$ 226	\$ 226
Adjustments			(152)	(152)
Payments in 2005			(74)	(74)
Reserve balance at December 31, 2005

Payments in 2006	(2,753)	(835)	(207)	(3,795)
Reserve balance at December 31, 2006	\$ 5,934	\$ 2,838	\$ 1,450	\$ 10,222

Note 10: Business Unit Disclosures

Edgar Filing: INFOSPACE INC - Form 10-K

SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, establishes standards for the way that companies report information about operating business units in annual financial statements. It also establishes standards for related disclosures about products and services, geographic areas, and major customers.

In January 2006, the Company realigned its operations to a functional organization structure and combined the functional operations of its two separate business units, Mobile and Search & Directory, to leverage its search and directory technology to its mobile products, services and distribution channels. This resulted in a change in the way it presents financial information to its chief operating decision maker, reflecting how management measures operating performance. The Company presents revenues consistent with the historical presentation, Online (formerly referred to as Search & Directory) and Mobile and, additionally, presents segment Content and distribution costs and segment gross profit, which is equal to Revenues less Content and distribution costs for each of the two segments. Content and distribution costs consist principally of revenue sharing arrangements with the Company's Online distribution partners as well as certain content and data licenses and costs related to royalty and license fees related to the Company's Mobile products for items such as ringtones, graphics and games, and other content or data licenses. Additionally, the Company does not allocate Systems and network operations expenses,

Table of Contents**INFOSPACE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Years Ended December 31, 2006, 2005, and 2004**

Product development expenses, Sales and marketing expenses, General and administrative expenses, Depreciation, Amortization of intangible assets, Income taxes or Other income to the reportable segments.

For each segment, the historical financial results for 2005 and 2004 are presented in a manner consistent with the Company's new measures for reportable segments information. The revised financial information for the new segment reporting is not indicative of how the Company operated or managed its business in the past and is different than the segment results previously presented.

The Company recently committed to a plan to make operational changes to its business to align costs with expected future revenues. The effect of this realignment on the Company's segments, if any, is currently being evaluated.

Information on reportable segments currently presented to the Company's chief operating decision maker and a reconciliation to consolidated net income (loss) for the years ended December 31, 2006, 2005, and 2004 are presented below (in thousands). The Company does not account for, and does not report to management, its assets or capital expenditures by segment.

	Years Ended December 31,

Note 11: Employee Benefit Plan

The Company has a 401(k) savings plan covering its U.S. based employees. Eligible employees may contribute through payroll deductions. The Company may match the employees' 401(k) contributions at the discretion of the Company's Board of Directors. During 2006, 2005, and 2004, the Company's Board of Directors elected to match a portion of the 401(k) contributions made by employees of the Company. The amount contributed by the Company is equal to a maximum of 50% of employee contributions up to a maximum of 3% of an employee's salary. For the years ended December 31, 2006, 2005, and 2004, the Company contributed \$976,000, \$851,000, and \$745,000, respectively.

Note 12: Recent Accounting Pronouncements

In June 2006, the Financial Accounting Standard Board (FASB) issued Interpretation (FIN) No. 48, *Accounting for Uncertainty in Income Taxes*. FIN No. 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN No. 48 is effective for our first fiscal year beginning after December 15, 2006. The Company is currently evaluating the provisions of FIN No. 48 to determine what effect its adoption on January 1, 2007 will have on the Company's financial position, cash flows, and results of operations, however management does not believe that there will be any material effect of adoption of FIN No. 48.

In September 2006, the SEC issued SAB No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. SAB No. 108 provides interpretive guidance on how the effects of prior-year uncorrected misstatements should be considered when quantifying misstatements in the current year financial statements. SAB No. 108 requires registrants to quantify misstatements using both an income statement (rollover) and balance sheet (iron curtain) approach and evaluate whether either approach results

Edgar Filing: INFOSPACE INC - Form 10-K

in a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 was effective for 2006. The application of SAB No. 108 did not have an effect on the Company's financial position, cash flows, or results of operations.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosure of fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements and accordingly, does not require any new fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company is currently evaluating the provisions of SFAS No. 157 to determine what effect its adoption on January 1, 2008 will have on the Company's financial position, cash flows, and results of operations.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable with respect to the current reporting period.

ITEM 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that, as of December 31, 2006, our disclosure controls and procedures were not effective due to a material weakness related to our internal controls with respect to the accounting and disclosure for deferred income taxes discussed below in Management's Report on Internal Control over Financial Reporting. Additional review, evaluation and oversight were undertaken on the part of management in order to ensure our consolidated financial statements were prepared in accordance with generally accepted accounting principles and, as a result, management has concluded that the consolidated financial statements in this Form 10-K fairly present, in all material respects, our financial position, results of operations and cash flows for the periods presented.

There was no change in our internal control over financial reporting that occurred during the three months ended December 31, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934).

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of the Sponsoring Organizations of the Treadway Commission.

Based on that evaluation, our management identified a deficiency in the operation of the Company's internal controls related to the accounting and disclosure for deferred income taxes, which constituted a material weakness in our internal control over financial reporting. A material weakness is a significant deficiency, as defined in Public Company Accounting Oversight Board Auditing Standard No. 2, or a combination of

Edgar Filing: INFOSPACE INC - Form 10-K

significant deficiencies, that results in more than a remote likelihood that a material misstatement of a company's annual or interim financial statements would not be prevented or detected by company personnel in the normal course of performing their assigned functions. This deficiency pertained to our controls which were ineffective and not properly designed to ensure proper accounting and disclosure of deferred income taxes which resulted in a material adjustment to the consolidated financial statements and related disclosures as of December 31, 2006 and for the year then ended.

Our management's assessment of the effectiveness of internal control over financial reporting as of December 31, 2006 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Table of Contents

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of

InfoSpace, Inc.

Bellevue, Washington

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting, that InfoSpace, Inc. and subsidiaries (the "Company") did not maintain effective internal control over financial reporting as of December 31, 2006, because of the effect of the material weakness identified in management's assessment based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weakness has been identified and included in management's assessment: controls were ineffective and not properly designed to ensure proper accounting and disclosure of deferred income taxes, which resulted in a material adjustment to the consolidated financial statements and related disclosures as of December 31, 2006 and for the year then ended. This material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the consolidated financial statements as of and for the year ended December 31, 2006, of the Company and this

report does not affect our report on such financial statements.

Table of Contents

In our opinion, management's assessment that the Company did not maintain effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2006 of the Company and our report dated February 21, 2007 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the change in accounting for stock-based compensation upon adoption of Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*, effective January 1, 2006.
