Use of Non-GAAP Financial Measures

In addition to the financial measures prepared in accordance with generally accepted accounting principles (GAAP), we use the non-GAAP financial measures "adjusted EPS" and EBITDA . Adjusted EPS excludes the write-off and amortization of acquisition-related intangible assets,
and
tax

provisions/benefits
related
thereto.

EBITDA

is
defined

as

net

earnings (loss) before interest, taxes, depreciation and amortization expense. Neither
adjusted EPS nor EBITDA is a measure of operating performance under GAAP. We believe
that the use of these non-GAAP measures helps investors to gain a better understanding of

our core

operating

results

and

future

prospects,

consistent

with

how

management

measures

and forecasts our performance, especially when comparing such results to previous periods
or forecasts. When analyzing our operating performance, investors should not consider these
non-GAAP measures as a substitute for net income prepared in accordance with GAAP.
