Transparent pricing

In a transparent pricing market the

value to customer of two identical products is fixed, and the supplier is paid that delivered price  
Impacts of higher oil prices

Freight costs become a much larger component of delivered cost

High freight costs with a variety of distance to market steepens the cost curve

Proximity to market delivers sustainable cost advantage

Regardless of demand impact the incentive to expand production is high for assets which are close to markets

Energy  
Margins matter

Cu equivalent production is  
based on implied revenue

\$1 million of revenue from  
energy coal  
calculates to the  
same tonnage  
of copper  
equivalent as \$1 million of  
revenue from **petroleum**

One tonne of petroleum  
derived copper is worth more  
than 4 times as much as one  
tonne of energy coal derived  
copper
