SVB FINANCIAL GROUP AND SUBSIDIARIES

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Basis of Presentation

SVB Financial Group (SVB Financial or the Parent) is a diversified financial services company, as well as a bank holding company and financial holding company. SVB Financial was incorporated in the state of Delaware in March 1999. Through our various subsidiaries and divisions, we offer a variety of banking and financial products and services to support our clients through all stages of their life cycles. In these notes to our interim consolidated financial statements, when we use or refer to SVB Financial Group, SVBFG, the Company, we, our, us, other similar words, we mean SVB Financial Group and all of its subsidiaries collectively, including Silicon Valley Bank (the Bank), unless the context requires otherwise. When we use or refer to SVB Financial or the Parent we are referring only to the parent company, SVB Financial Group, unless the context requires otherwise.

The accompanying interim consolidated financial statements reflect all adjustments of a normal and recurring nature that are, in the opinion of management, necessary to fairly present our financial position, results of operations and cash flows in accordance with accounting principles generally accepted in the United States of America (GAAP). Such interim consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. The results of operations for the three and nine months ended September 30, 2010 are not necessarily indicative of results to be expected for any future periods. These interim consolidated financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2009 (2009 Form 10-K) and as updated to reflect revised segment financial reporting in our Current Report on form 8-K filed on September 15, 2010.

The accompanying unaudited interim consolidated financial statements have been prepared on a consistent basis with the accounting policies described in Consolidated Financial Statements and Supplementary Data-Note 2- Summary of Significant Accounting Policies under Part II, Item 8 of our 2009 Form 10-K, and with the accounting pronouncements adopted during the nine months ended September 30, 2010, as discussed below.

The preparation of interim consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates may change as new information is obtained. Significant items that are subject to such estimates include the valuation of non-marketable securities, the allowance for loan losses, valuation of equity warrant assets, the recognition and measurement of income tax assets and liabilities, the adequacy of the reserve for unfunded credit commitments, and share-based compensation.

Principles of Consolidation and Presentation

Our consolidated financial statements include the accounts of SVB Financial Group and our majority-owned subsidiaries and variable interest entities (VIEs) for which we are the primary beneficiary and our investments in which we have a majority owned voting interest. All significant intercompany accounts and transactions have been eliminated.

We determine whether we have a controlling financial interest in an entity by evaluating whether the entity is a VIE for which we are the primary beneficiary. We consider the following factors in evaluating whether our involvement with the VIE is significant and designates us as the primary beneficiary:

1. We have the power to direct the activities of the VIE that most significantly impact the entity's economic performance; and,
2. The aggregate indirect and direct variable interests held by the Company have the obligation to absorb losses or the right to receive benefits from the entity that could be significant to the VIE.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

We reassess our initial evaluation of whether an entity is a VIE upon the occurrence of certain events, such as changes in an entity's capital structure or in its activities, known as reconsideration events. Our evaluation of whether we are the primary beneficiary of a VIE is not limited to the occurrence of certain reconsideration events but is instead reassessed on an ongoing basis. We have not provided financial or other support during the periods presented to any VIE that we were not previously contractually required to provide. We are variable interest holders in certain partnerships for which we are the primary beneficiary.

Table of Contents

Current Accounting Developments

In the first quarter of 2010, we adopted new guidance related to the following topics:

ASU No. 2009-16, *Accounting for Transfers of Financial Assets*

ASU No. 2009-17, *Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*

ASU No. 2010-06, *Improving Disclosures about Fair Value Measurements*

No new accounting guidance was adopted during the second or third quarters of 2010.

Information about these pronouncements is described in more detail below.

Impact of Adopting ASU No. 2009-16

In June 2009, the Financial Accounting Standards Board (FASB) issued a new accounting standard which defines the term participating interest to establish specific conditions for reporting a transfer of a portion of a financial asset as a sale. This standard also removes the concept of a qualifying special-purpose entity (QSPE) for accounting purposes. Our adoption of this standard as of January 1, 2010 did not have a material impact on our financial position, results of operations or stockholders' equity as we have not historically made sales or transfers of assets to QSPEs. However, we do engage from time to time in selling our loans. Historically, our participating interests in those sales have the same priority and are not subordinated to the other participating interest holders' interest. Therefore, the change in the standard of removing the QSPE concept and the new definition of participating interest did not have an impact on our sales treatment.

Impact of Adopting ASU No. 2009-17

In June 2009, the FASB issued a new accounting standard which replaces the quantitative-based risks and rewards calculation for determining which enterprise has a controlling interest in a VIE, with an approach focused on which enterprise has both the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. Our adoption of this standard as of January 1, 2010 required us to de-consolidate Gold Hill Venture Lending Partners 03, LLC (GHLLC), which resulted in a reduction of total assets and total equity of \$1.1 million. The identification of VIE's or changes in our consolidation of entities did not have a material impact on our financial position, results of operations or stockholders' equity.

Impact of Adopting ASU No. 2010-06

In January 2010, the FASB issued a new accounting standard which requires the addition of new disclosures and clarifies existing disclosure requirements already included in the guidance for fair value measurements. The new disclosures related to significant transfers in and out of Level 1, Level 2 and Level 3 fair value measurements and the reasons for the transfers, as well as the clarifications of existing disclosures were effective for interim or annual reporting periods beginning after December 15, 2009 and were therefore adopted as of January 1, 2010. The new disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements are effective for interim or annual reporting periods beginning after December 15, 2010. This standard clarified and increased the disclosure requirements for fair value measurements and did not have an impact on our financial position, results of operations or stockholders' equity. See Note 14- Fair Value of Financial Instruments for further details.

Recent Accounting Pronouncements

In July 2010, the FASB issued a new accounting standard (ASU No. 2010-20), which requires the addition of new disclosures and enhances existing disclosure requirements already included in the guidance for credit quality and the allowance for credit losses. The statement requires

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

enhancements to disclosures for the allowance for credit losses on a disaggregated basis. The statement defines two levels of disaggregation: 1) portfolio segment and 2) class of financing receivable. Additionally, the statement requires multiple new disclosures regarding an entity's financing receivables, such as credit quality indicators, aging of past due receivables, troubled debt restructurings, and significant purchases and sales. The new disclosures and amendments to existing disclosures are effective for interim and annual reporting periods ending on or after December 15, 2010. This standard will enhance and increase the disclosure requirements for credit quality and the allowance for credit losses and will not have an impact on our financial position, results of operations or stockholders' equity.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentations.

Table of Contents**2. Stockholders Equity and Earnings Per Share (EPS)***Common Stock*

On June 16, 2010, we repurchased in its entirety the warrant previously issued to the U.S. Treasury in connection with our prior participation in the U.S. Treasury's Capital Purchase Program (CPP). The total cash repurchase price paid to the U.S. Treasury was \$6.8 million for the aggregate warrant. At the time of issuance, the warrant was initially exercisable for 708,116 shares of our common stock at an exercise price of \$49.78 per share. However, due to our completion of a qualified equity offering during the fourth quarter of 2009, the number of shares of common stock exercisable under the warrant was reduced to 354,058 pursuant to applicable CPP rules. The repurchase of the warrant reduced our stockholders equity by the total cash price of \$6.8 million, and did not have any impact on our net income available to common stockholders or diluted earnings per share for the nine months ended September 30, 2010.

Earnings Per Share

Basic earnings per share is the amount of earnings available to each share of common stock outstanding during the reporting period. Diluted earnings per share is the amount of earnings available to each share of common stock outstanding during the reporting period adjusted to include the effect of potentially dilutive common shares. Potentially dilutive common shares include incremental shares issued pursuant to stock options and restricted stock units under our equity incentive plan, stock purchases under our employee stock purchase plan, our 3.875% convertible senior notes (2008 Convertible Notes) and related warrants and note hedge. Potentially dilutive common shares are excluded from the computation of dilutive earnings per share in periods in which the effect would be antidilutive. The following is a reconciliation of basic EPS to diluted EPS for the three and nine months ended September 30, 2010 and 2009, respectively:

(Dollars and shares in thousands, except per share amounts)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Numerator:				
Net income attributable to SVBFG	\$ 37,787	\$ 24,163	\$ 77,464	\$ 27,266
Preferred stock dividend and discount accretion		(3,555)		(10,636)
Net income available to common stockholders	\$ 37,787	\$ 20,608	\$ 77,464	\$ 16,630
Denominator:				
Weighted average common shares outstanding-basic	41,930	33,177	41,679	33,033
Weighted average effect of dilutive securities:				
Stock options	511	495	652	215
Restricted stock units	72		70	
Denominator for diluted calculation	42,513	33,672	42,401	33,248
Net income per common share:				
Basic	\$ 0.90	\$ 0.62	\$ 1.86	\$ 0.50
Diluted	\$ 0.89	\$ 0.61	\$ 1.83	\$ 0.50

Any dilutive effect of our 2008 Convertible Notes are included in the calculation of diluted EPS using the treasury stock method. The 2008 Convertible Notes did not impact our weighted average diluted common shares total as the applicable conversion price was higher than the average daily closing price for the three and nine month periods. Our warrant associated with the 2008 Convertible Notes did not impact our weighted average diluted common shares total as the exercise price was higher than the average daily closing price for the three and nine month periods.

The following table summarizes the common shares excluded from the diluted EPS calculation as they were deemed to be anti-dilutive for the three and nine months ended September 30, 2010 and 2009, respectively:

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

(Shares in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Stock options	6	1,718	8	2,485
Restricted stock units	5	90	4	499
Warrant associated with Capital Purchase Program (1)		275		597
Total	11	2,083	12	3,581

(1) On June 16, 2010, we repurchased in its entirety the warrant previously issued to the U.S. Treasury in connection with our prior participation in the CPP.

In addition to the above, at September 30, 2010, 4.7 million shares of our 2008 Convertible Notes and associated warrants were outstanding but also excluded from the diluted EPS calculation as they were deemed to be anti-dilutive. Concurrent with the issuance

Table of Contents

of our 2008 Convertible Notes, we entered into a convertible note hedge and warrant agreement. For information on our 2008 Convertible Notes and associated convertible note hedge and warrant agreement, see our Consolidated Financial Statements and Supplementary Data- Note 12- Short-Term Borrowings and Long-Term Debt and Note 13- Derivative Financial Instruments and under Part II, Item 8 of our 2009 Form 10-K.

3. Share-Based Compensation

For the three and nine months ended September 30, 2010, we recorded share-based compensation expense of \$3.6 million and \$9.9 million, respectively, resulting in the recognition of \$0.9 million and \$2.4 million, respectively, in related tax benefits. For the three and nine months ended September 30, 2009, we recorded share-based compensation expense of \$3.4 million and \$11.2 million, respectively, resulting in the recognition of \$0.8 million and \$2.7 million, respectively, in related tax benefits.

Unrecognized Compensation Expense

At September 30, 2010, unrecognized share-based compensation expense was as follows:

(Dollars in thousands)	Unrecognized Expense	Average Expected Recognition Period - in Years
Stock options	\$ 11,644	2.93
Restricted stock units	12,926	2.39
Total unrecognized share-based compensation expense	\$ 24,570	

Share-Based Payment Award Activity

The table below provides stock option information related to the 1997 Equity Incentive Plan and the 2006 Equity Incentive Plan for the nine months ended September 30, 2010:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life in Years	Aggregate Intrinsic Value of In-The-Money Options
Outstanding at December 31, 2009	3,500,723	\$ 35.31		
Granted	452,324	47.85		
Exercised	(470,876)	28.63		
Forfeited	(98,100)	40.71		
Expired	(57,925)	50.01		
Outstanding at September 30, 2010	3,326,146	37.53	3.27	\$ 25,518,512
Vested and expected to vest at September 30, 2010	3,168,894	37.41	3.13	24,508,490
Exercisable at September 30, 2010	2,225,405	36.83	2.05	17,646,011

The aggregate intrinsic value of outstanding options shown in the table above represents the pretax intrinsic value based on our closing stock price of \$42.32 as of September 30, 2010. The total intrinsic value of options exercised during the three and nine months ended September 30, 2010 was \$1.3 million and \$8.5 million, respectively, compared to \$0.8 million and \$1.0 million for the comparable 2009 periods.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

The table below provides information for restricted stock units under the 1997 Equity Incentive Plan and the 2006 Equity Incentive Plan for the nine months ended September 30, 2010:

	Shares	Weighted Average Grant Date Fair Value
Nonvested at December 31, 2009	336,806	\$ 39.55
Granted	219,750	46.99
Vested	(95,948)	39.67
Forfeited	(35,685)	33.91
Nonvested at September 30, 2010	424,923	43.90

Table of Contents**4. Federal Funds Sold, Securities Purchased under Agreements to Resell and Other Short-Term Investment Securities**

The following table details the securities purchased under agreements to resell and other short-term investment securities at September 30, 2010 and December 31, 2009, respectively:

(Dollars in thousands)	September 30, 2010	December 31, 2009
Securities purchased under agreements to resell	\$ 48,115	\$ 58,242
Short-term agency discount notes	330,197	
Other short-term investment securities	12,853	

Total securities purchased under agreements to resell and other short-term investment securities	\$ 391,165	\$ 58,242
--	------------	-----------

In addition, as of September 30, 2010 and December 31, 2009, \$2.9 billion and \$3.1 billion, respectively, of our cash and due from banks was deposited at the Federal Reserve Bank and was earning interest at the Federal Funds target rate, and interest-earning deposits in other financial institutions were \$261.0 million and \$171.6 million, respectively.

5. Investment Securities

Our investment securities portfolio consists of both an available-for-sale securities portfolio, which represents interest-earning investment securities, and a non-marketable securities portfolio, which primarily represents investments managed as part of our funds management business.

The major components of our investment securities portfolio at September 30, 2010 and December 31, 2009 are as follows:

(Dollars in thousands)	Amortized Cost	September 30, 2010 Unrealized Gains	Unrealized Losses	Carrying Value	Amortized Cost	December 31, 2009 Unrealized Gains	Unrealized Losses	Carrying Value
Available-for-sale securities, at fair value:								
U.S. treasury securities	\$ 25,452	\$ 1,222	\$	\$ 26,674	\$ 25,583	\$ 464	\$	\$ 26,047
U.S. agency debentures	1,711,241	10,848	(369)	1,721,720	887,008	5,188	(443)	891,753
Residential mortgage-backed securities:								
Agency-issued mortgage-backed securities	1,150,836	33,030		1,183,866	1,413,817	14,050	(17,237)	1,410,630
Agency-issued collateralized mortgage obligations - fixed rate	966,492	25,500	(11)	991,981	1,360,790	17,142	(5,557)	1,372,375
Agency-issued collateralized mortgage obligations - variable rate	1,972,194	4,426	(923)	1,975,697				
Non-agency mortgage-backed securities (1)					89,155	48	(5,507)	83,696
Commercial mortgage-backed securities (1)					48,440	468	(107)	48,801
Municipal bonds and notes	96,980	5,792	(15)	102,757	100,504	2,429	(56)	102,877
Equity securities	444	92	(33)	503	1,795	219	(5)	2,009
Total available-for-sale securities	\$ 5,923,639	\$ 80,910	\$ (1,351)	\$ 6,003,198	\$ 3,927,092	\$ 40,008	\$ (28,912)	\$ 3,938,188

Non-marketable securities:

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Non-marketable securities
(investment company fair value
accounting):

Private equity fund investments (2)	365,742	271,316
Other private equity investments (3)	84,535	96,577
Other investments (4)	962	1,143

Non-marketable securities (equity
method accounting):

Other investments (5)	63,198	59,660
Low income housing tax credit funds	28,690	26,797

Non-marketable securities (cost
method accounting):

Private equity fund investments (6)	100,110	86,019
Other private equity investments	12,830	12,019

Total non-marketable securities	656,067	553,531
---------------------------------	---------	---------

Total investment securities	\$ 6,659,265	\$ 4,491,719
-----------------------------	--------------	--------------

- (1) During the second quarter of 2010, we sold all of our non-agency residential and commercial mortgage-backed securities totaling \$123.3 million and agency-issued collateralized mortgage obligations totaling \$34.6 million.

Table of Contents

- (2) The following table shows the amount of private equity fund investments by the following consolidated funds and our ownership of each fund at September 30, 2010 and December 31, 2009:

(Dollars in thousands)	September 30, 2010		December 31, 2009	
	Amount	Ownership %	Amount	Ownership %
SVB Strategic Investors Fund, LP	\$ 47,026	12.6 %	\$ 50,508	12.6 %
SVB Strategic Investors Fund II, LP	94,922	8.6	85,820	8.6
SVB Strategic Investors Fund III, LP	135,631	5.9	102,568	5.9
SVB Strategic Investors Fund IV, LP	31,050	5.0	13,677	5.0
SVB Capital Preferred Return Fund, LP	19,730	19.5	8,330	20.0
SVB Capital NT Growth Partners, LP	24,456	33.0	10,413	33.0
SVB Capital Partners II, LP (i)	4,631	5.1		N/A
Other Private Equity Fund (ii)	8,296	60.5		N/A
Total private equity fund investments	\$ 365,742		\$ 271,316	

- (i) At September 30, 2010, we had a direct ownership interest of 1.3% and an indirect ownership interest of 3.8% in the fund through our ownership interest of SVB Strategic Investors Fund II, LP.
- (ii) At September 30, 2010, we had a direct ownership interest of 44.5% and an indirect ownership interest of 12.6% and 3.4% in the fund through our ownership interests of SVB Capital NT Growth Partners, LP and SVB Capital Preferred Return Fund, LP, respectively.
- (3) The following table shows the amount of private equity investments by the following consolidated funds and our ownership of each fund at September 30, 2010 and December 31, 2009:

(Dollars in thousands)	September 30, 2010		December 31, 2009	
	Amount	Ownership %	Amount	Ownership %
Silicon Valley BancVentures, LP	\$ 19,598	10.7 %	\$ 24,023	10.7 %
SVB Capital Partners II, LP	38,052	5.1	36,847	5.1
SVB India Capital Partners I, LP	26,885	14.4	35,707	14.4
Total other private equity investments	\$ 84,535		\$ 96,577	

- (4) Other investments within non-marketable securities (investment company fair value accounting) include our ownership in Partners for Growth, LP, a consolidated sponsored debt fund. At September 30, 2010 and December 31, 2009 we had a majority ownership interest of slightly more than 50.0% in the fund. Partners for Growth, LP is managed by a third party, and we do not have an ownership interest in the general partner of this fund.
- (5) The following table shows the amount of investments and our ownership of each fund at September 30, 2010 and December 31, 2009:

(Dollars in thousands)	September 30, 2010		December 31, 2009	
	Amount	Ownership %	Amount	Ownership %
Gold Hill Venture Lending 03, LP (i)	\$ 12,096	9.3 %	\$ 16,134	9.3 %

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Partners for Growth II, LP	9,720	24.2	13,059	24.2
Other investments	41,382	N/A	30,467	N/A
Total other investments	\$ 63,198		\$ 59,660	

- (i) At September 30, 2010, we had a direct ownership interest of 4.8% in the fund and an indirect interest in the fund through our investment in GHLLC of 4.5%. Our aggregate direct and indirect ownership in the fund is 9.3%.
- (6) Represents investments in 344 and 349 venture capital/private equity funds at September 30, 2010 and December 31, 2009, respectively, where our ownership interest is less than 5% of the voting interests of each such fund. For the three months ended September 30, 2010, we recognized other- than- temporary impairment (OTTI) losses of \$0.5 million resulting from other- than- temporary declines in value for 16 of the 344 investments. For the nine months ended September 30, 2010, we recognized OTTI losses of \$1.5 million resulting from other- than- temporary declines in value for 54 of the 344 investments. The OTTI losses are included in net gains (losses) on investment securities, a component of noninterest income. For the remaining 290 investments at September 30, 2010, we concluded that declines in value, if any, were temporary and as such, no OTTI was required to be recognized. At September 30, 2010, the carrying value of these venture capital/private equity fund investments (cost method accounting) was \$100.1 million, and the estimated fair value was \$101.1 million.

Table of Contents

The following table summarizes our unrealized losses on our available-for-sale securities into categories of less than 12 months, or 12 months or longer, at September 30, 2010:

(Dollars in thousands)	Less than 12 months		September 30, 2010 12 months or longer		Total	
	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses
U.S. agency debentures	\$ 249,672	\$ (369)	\$	\$	\$ 249,672	\$ (369)
Residential mortgage-backed securities:						
Agency-issued collateralized mortgage obligations fixed rate	6,260	(11)			6,260	(11)
Agency-issued collateralized mortgage obligations variable rate	559,152	(923)			559,152	(923)
Municipal bonds and notes	3,509	(15)			3,509	(15)
Equity securities	32	(33)			32	(33)
Total temporarily impaired securities (1)	\$ 818,625	\$ (1,351)	\$	\$	\$ 818,625	\$ (1,351)

- (1) As of September 30, 2010, we identified a total of 36 investments that were in unrealized loss positions. There were no investments with unrealized losses that have been in an impaired position for a period of time greater than 12 months. Unrealized losses are due primarily to increases in market rates relative to rates at the time of purchase. Based on the underlying credit quality of the investments, we do not intend to sell any of our securities prior to recovery of our adjusted cost basis and as of September 30, 2010, it is more likely than not that we will not be required to sell any of our debt securities prior to recovery of our adjusted cost basis. Based on our analysis we deem all impairments to be temporary and changes in value for our temporarily impaired securities as of September 30, 2010 are included in other comprehensive income. Market valuations and impairment analyses on assets in the investment securities portfolio are reviewed and monitored on a quarterly basis.

The following table summarizes our unrealized losses on our available-for-sale securities portfolio into categories of less than 12 months, or 12 months or longer, as of December 31, 2009:

(Dollars in thousands)	Less than 12 months		December 31, 2009 12 months or longer		Total	
	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses

Residential mortgage-backed securities:						
Agency-issued mortgage-backed securities	1,034,781	(17,237)			1,034,781	(17,237)
Agency-issued collateralized mortgage obligations fixed rate	321,388	(5,535)	1,392	(22)	322,780	(5,557)
Non-agency mortgage-backed securities	23,966	(195)	51,276	(5,312)	75,242	(5,507)
Commercial mortgage-backed securities	14,968	(107)			14,968	(107)
Municipal bonds and notes	11,908	(56)			11,908	(56)
Marketable Equity securities	3	(5)			3	(5)
Total temporarily impaired securities	\$ 1,694,635	\$ (23,578)	\$ 52,668	\$ (5,334)	\$ 1,747,303	\$ (28,912)

Table of Contents

The following table summarizes the remaining contractual principal maturities and fully taxable equivalent yields on debt securities classified as available-for-sale as of September 30, 2010. Interest income on certain municipal bonds and notes (non-taxable investments) are presented on a fully taxable equivalent basis using the federal statutory tax rate of 35.0 percent. The weighted average yield is computed using the amortized cost of debt securities, which are reported at fair value. For U.S. treasury securities, the expected maturity is the actual contractual maturity of the notes. Expected remaining maturities for most U.S. agency debentures may occur earlier than their contractual maturities because the note issuers have the right to call outstanding amounts ahead of their contractual maturity. Expected maturities for mortgage-backed securities may differ significantly from their contractual maturities because mortgage borrowers have the right to prepay outstanding loan obligations with or without penalties. Mortgage-backed securities typically have original contractual maturities from 15 to 30 years whereas expected average lives of these securities tend to be significantly shorter and vary based upon structure.

(Dollars in thousands)	September 30, 2010									
	Total Carrying Value	Weighted-Average Yield	One Year or Less Carrying Value	Weighted-Average Yield	After One Year to Five Years Carrying Value	Weighted-Average Yield	After Five Years to Ten Years Carrying Value	Weighted-Average Yield	After Ten Years Carrying Value	Weighted-Average Yield

Table of Contents**6. Loans and Allowance for Loan Losses**

We serve a variety of commercial clients in the technology, life science, venture capital/private equity and premium wine industries. Our technology clients generally tend to be in the industries of hardware (semiconductors, communications and electronics), software and related services, and clean technology. Our life science clients are concentrated in the medical devices and biotechnology sectors. Loans made to venture capital/private equity firm clients typically enable them to fund investments prior to their receipt of funds from capital calls. Loans to the premium wine industry focus on vineyards and wineries that produce grapes and wines of high quality.

In addition to commercial loans, we make loans to targeted high- net- worth individuals through our Private Client Services (PCS) business. These products and services include real estate secured home equity lines of credit, which may be used to finance real estate investments and loans for personal residences used to purchase, renovate or refinance personal residences. These products and services also include restricted stock purchase loans and capital call lines of credit. We also provide real estate secured loans to eligible employees through our Employee Home Ownership Program (EHOP).

We also provide community development loans, which are low income housing loans made as part of our responsibilities under the Community Reinvestment Act. These loans are construction loans and are primarily secured by real estate.

The composition of loans, net of unearned income of \$40.9 million and \$34.9 million at September 30, 2010 and December 31, 2009, respectively, is presented in the following table:

(Dollars in thousands)	September 30, 2010	December 31, 2009
Commercial loans:		
Software	\$ 1,601,950	\$ 1,381,669
Hardware	540,423	551,545
Clean Technology	146,160	71,550

Impaired Loans and Troubled Debt Restructurings

A loan is considered impaired when, based upon currently known information, it is deemed probable that we will be unable to collect all amounts due according to the contractual terms of the agreement. The recorded investment in impaired loans totaled \$45.0 million and \$50.2 million at September 30, 2010 and December 31, 2009, respectively. The recorded investment in impaired loans for which there was a related allowance for loan losses was \$34.5 million and \$47.0 million at September 30, 2010 and December 31, 2009, respectively, with related allowance for loan losses of \$6.5 million and \$8.9 million, respectively. The recorded investment in impaired loans for which there was no related allowance for loan losses was \$10.5 million and \$3.2 million at September 30, 2010 and December 31, 2009, respectively. Average impaired loans for the three and nine months ended September 30, 2010 totaled \$45.5 million and \$48.9 million, respectively. Cash payments received related to these loans totaled \$0.5 million and \$1.4 million for the three and nine months ended September 30, 2010, respectively. Average impaired loans for the three and nine months ended September 30, 2009 totaled \$95.1 million and \$98.6 million, respectively. Cash payments received related to these loans totaled \$0.5 million and \$1.2 million for the three and nine months ended September 30, 2009, respectively. These payments were applied against the outstanding principal balance of the loans. We did not recognize any interest income related to impaired loans in either of the three and nine months ended September 30, 2010 or 2009 during the time period that the loans were impaired. There were no loans past due 90 days or more still accruing interest at September 30, 2010 compared to \$2.5 million at December 31, 2009.

Table of Contents

Included in the \$45.0 million of impaired loans at September 30, 2010 are loans modified in troubled debt restructurings (TDR s), where concessions have been granted to borrowers experiencing financial difficulties, in an attempt to maximize collection. As of September 30, 2010, we had TDR s of \$24.0 million, which were comprised of \$20.1 million in consumer loans secured by real estate, \$1.8 million in software loans, \$1.0 in construction loans and \$1.1 million in other commercial loans. In order for these loan balances to return to accrual status, the borrower must demonstrate a sustained period of timely payments. There were no commitments available for funding to the clients associated with these TDR s as of September 30, 2010.

7. Goodwill

During the first quarter of 2009, we conducted an assessment of goodwill of eProsper, a data management services company in which we own a 65% interest, based on eProsper s revised forecast of discounted net cash flows for that reporting unit. We concluded that we had an impairment of goodwill resulting from changes in our outlook for eProsper s future financial performance. As a result, \$4.1 million of goodwill was expensed as a noncash non tax-deductible charge to continuing operations during the first quarter of 2009. There was no remaining goodwill on our balance sheet as of September 30, 2010 or December 31, 2009 and has not been since the first quarter of 2009.

8. Short-Term Borrowings and Long-Term Debt

The following table represents outstanding short-term borrowings and long-term debt at September 30, 2010 and December 31, 2009:

(Dollars in thousands)	Maturity	September 30, 2010	December 31, 2009
<i>Short-term borrowings:</i>			
Other short-term borrowings	(1)	\$ 59,735	\$ 38,755
Total short-term borrowings		\$ 59,735	\$ 38,755
<i>Long-term debt:</i>			
5.375% senior notes	September 15, 2020	\$ 347,555	\$ 269,793
5.70% senior notes (2)	June 1, 2012	268,503	276,541
6.05% subordinated notes (3)	June 1, 2017	248,715	246,991
3.875% convertible senior notes	April 15, 2011	55,592	7,339
7.0% junior subordinated debentures	October 15, 2033		
4.99% long-term notes payable	(4)		
Total long-term debt		\$ 1,225,810	\$ 856,650

- (1) Represents cash collateral received from counterparties for our interest rate swap agreements related to our senior and subordinated notes.
- (2) At September 30, 2010 and December 31, 2009, included in the carrying value of our 5.70% senior notes are \$18.6 million and \$19.9 million, respectively, related to the fair value of the interest rate swap associated with the notes.
- (3) At September 30, 2010 and December 31, 2009, included in the carrying value of our 6.05% subordinated notes are \$48.7 million and \$27.0 million, respectively, related to the fair value of the interest rate swap associated with the notes.
- (4) Represents long-term notes payable related to one of our debt fund investments beginning April 30, 2009 with the last payment due in April 2012.

Interest expense related to short-term borrowings and long-term debt was \$6.6 million and \$18.1 million for the three and nine months ended September 30, 2010, respectively, and \$6.4 million and \$21.8 million for the three and nine months ended September 30, 2009, respectively. Interest expense shown is net of the cash flow impact from our interest rate swap agreements. The weighted average interest rates associated with our short-term borrowings as of September 30, 2010 and December 31, 2009 were 0.15 percent and 0.05 percent, respectively.

5.375% Senior Notes

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

In September 2010, we issued \$350 million of 5.375% senior notes due in September 2020 (5.375% Senior Notes). We received net proceeds of \$344.3 million after deducting underwriting discounts and commissions and other estimated expenses. We intend to use approximately \$250 million of the net proceeds from the sale of the notes to meet obligations due on the unconverted portion of our 2008 Convertible Notes due on April 15, 2011 (see 2008 Convertible Notes section below for further details). The remaining net proceeds will be used for general corporate purposes, including working capital.

Table of Contents

2008 Convertible Notes

In April 2008, we issued our 2008 Convertible Notes, due April 15, 2011, in the aggregate principal amount of \$250 million to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933. The issuance costs related to the 2008 Convertible Notes were \$6.8 million, and the net proceeds from the offering were \$243.2 million. The 2008 Convertible Notes are initially convertible, subject to certain conditions, into cash up to the principal amount of notes and, into shares of our common stock or cash or any combination thereof for any excess conversion value, at our option. Holders may convert their 2008 Convertible Notes beginning any fiscal quarter commencing after June 30, 2008, if: (i) the price of our common stock issuable upon conversion of the note reaches a specific threshold, (ii) specified corporate transactions occur, or (iii) the trading price for the note falls below certain thresholds. The notes have an initial conversion rate of 18.8525 shares of common stock per \$1,000 principal amount of notes, which represents an initial effective conversion price of \$53.04 per share. Upon conversion of a note, we will pay the outstanding principal amount in cash as required by the terms of the notes, and to the extent that the conversion value exceeds the principal amount, we have the option to pay cash or shares of our common stock (or a combination of cash and shares) in respect of the excess amount.

Concurrent with the issuance of our 2008 Convertible Notes, we entered into a convertible note hedge and warrant agreement (see Note 9-Derivative Financial Instruments), which effectively increased the economic conversion price of our 2008 Convertible Notes to \$64.43 per share of common stock. The terms of the hedge and warrant agreement are not part of the terms of the notes and will not affect the rights of the holders of the notes.

For the three and nine months ended September 30, 2010, the effective interest rate for our 2008 Convertible Notes was 5.66 percent and 5.72 percent, respectively, and interest expense was \$3.5 million and \$10.6 million, respectively. For the three and nine months ended September 30, 2009, the effective interest rate for our 2008 Convertible Notes was 5.66 percent and 5.73 percent, respectively, and interest expense was \$3.5 million and \$10.5 million, respectively. At September 30, 2010, the unamortized debt discount totaled \$1.3 million, and will be amortized over the remaining contractual term of the debt.

Available Lines of Credit

We have certain facilities in place to enable us to access short-term borrowings on a secured (using available-for-sale securities as collateral) and an unsecured basis. These include repurchase agreements and uncommitted federal funds lines with various financial institutions. As of September 30, 2010, we had not borrowed against any of our repurchase lines or uncommitted federal funds lines. We also pledge securities to the Federal Home Loan Bank of San Francisco and the discount window at the Federal Reserve Bank. The market value of collateral pledged to the Federal Home Loan Bank of San Francisco (comprised entirely of U.S. agency debentures) at September 30, 2010 totaled \$1.0 billion, all of which was unused and available to support additional borrowings. The market value of collateral pledged at the discount window of the Federal Reserve Bank at September 30, 2010 totaled \$88.7 million, all of which was unused and available to support additional borrowings.

9. Derivative Financial Instruments

We primarily use derivative financial instruments to manage interest rate risk, currency exchange rate risk, equity market price risk and to assist customers with their risk management objectives. Also, in connection with negotiating credit facilities and certain other services, we frequently obtain equity warrant assets giving us the right to acquire stock in certain client companies.

Interest Rate Risk

Interest rate risk is our primary market risk and can result from timing and volume differences in the repricing of our interest rate-sensitive assets and liabilities and changes in market interest rates. To manage interest rate risk for our 5.70% senior notes and our 6.05% subordinated notes, we entered into receive-fixed for pay-floating interest rate swap agreements at the time of debt issuance. The interest rate swaps have matched-terms with the respective notes and effectively swap fixed rate coupons on the notes to variable rate coupons based upon London Interbank Offered Rates (LIBOR). We use the shortcut method to assess hedge effectiveness and evaluate the hedging relationships for qualification under the shortcut method requirements for each reporting period.

For more information on our 5.70% senior notes and our 6.05% subordinated notes, see our Consolidated Financial Statements and Supplementary Data-Note 12- Short-Term Borrowings and Long-Term Debt under Part II, Item 8 of our 2009 Form 10-K.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Net cash benefits associated with our interest rate swaps are recorded in Interest Expense: Borrowings, a component of net interest income. The fair values of our interest rate swaps are calculated using discounted cash flow methods and are adjusted for credit valuation associated with counterparty risk. Increases from changes in fair value are included in Other Assets and decreases from changes in fair value are included in Other Liabilities. Although we do not expect any changes in the matched-terms on the notes and associated interest rate swaps, any differences associated with or arising from hedge ineffectiveness are recorded through net gains (losses) on derivative instruments, in noninterest income, a component of consolidated net income.

Currency Exchange Risk

We enter into foreign exchange forward contracts to hedge against exposures of our loans that are denominated in foreign currencies to our clients, primarily in Pound Sterling, Euro, and Japanese Yen. We do not designate any foreign exchange forward contracts as derivative instruments that qualify for hedge accounting. Changes in currency rates on the loans are included in other noninterest income, a component of noninterest income. We may experience ineffectiveness in the economic hedging relationship.

Table of Contents

because the loans are revalued based upon changes in the currency's spot rate on the principal value, while the forwards are revalued on a discounted cash flow basis. We record forward agreements in gain positions in *Other Assets* and loss positions in *Other Liabilities*, while net changes in fair value are recorded through net gains (losses) on derivative instruments, in noninterest income, a component of consolidated net income.

Equity Market Price Risk

We have convertible debt instruments that contain conversion options that enable the holders to convert the instruments, subject to certain conditions. Specifically, we currently have outstanding our 2008 Convertible Notes. Upon conversion of a note, we will pay the outstanding principal amount in cash as required by the terms of the notes, and to the extent that the conversion value exceeds the principal amount, we have the option to pay cash or shares of our common stock (or a combination of cash and shares) in respect of the excess amount. The conversion option represents an equity risk exposure for the excess conversion value and is an equity derivative classified in stockholders' equity. We manage equity market price risk of our convertible debt instruments by entering into convertible note hedge and warrant agreements to increase the economic conversion price of our convertible debt instruments and to decrease potential dilution to stockholders resulting from the conversion option.

Concurrent with the issuance of our 2008 Convertible Notes, we entered into a convertible note hedge and warrant agreement at a net cost of \$20.6 million, which effectively increased the economic conversion price from \$53.04 per common share to \$64.43 per common share. Similar to the conversion option of the excess value of the note, the hedge and warrant agreements are equity derivatives classified in stockholders' equity. For the three and nine months ended September 30, 2010 and 2009, there were no note conversions or exercises under the warrant agreement as the notes were not convertible.

For more information on the 2008 Convertible Notes, see our Consolidated Financial Statements and Supplementary Data-Note 12- *Short-Term Borrowings and Long-Term Debt* under Part II, Item 8 of our 2009 Form 10-K.

Other Derivative Instruments

Equity Warrant Assets

Our equity warrant assets are concentrated in private, venture-backed companies in the technology and life science industries. Most of these warrant agreements contain net share settlement provisions, which permit us to pay the warrant exercise price using shares issuable under the warrant (cashless exercise). Because we can net settle these warrant agreements, these equity warrant assets qualify as derivative instruments. We value our equity warrant assets using a modified Black-Scholes option pricing model, which incorporates assumptions about the underlying asset value, volatility, and the risk-free rate. We make valuation adjustments for estimated remaining life and marketability for warrants issued by private companies. Equity warrant assets are recorded at fair value in *Other Assets*, while changes in their fair value are recorded through net gains (losses) on derivative instruments, in noninterest income, a component of consolidated net income.

Other Derivatives

We sell forward and option contracts to clients that wish to mitigate their foreign currency exposure. We hedge the currency risk from this business by entering into opposite way contracts with correspondent banks. This hedging relationship does not qualify for hedge accounting. The contracts generally have terms of one year or less, although we may have contracts extending for up to five years. We generally have not experienced nonperformance on these contracts, have not incurred credit losses, and anticipate performance by all counterparties to such agreements. Increases from changes in fair value are included in *Other Assets* and decreases from changes in fair value are included in *Other Liabilities*. The net change in the fair value of these contracts is recorded through net gains (losses) on derivative instruments, in noninterest income, a component of consolidated net income.

Counterparty Credit Risk

We are exposed to credit risk if counterparties to our derivative contracts do not perform as expected. We minimize counterparty credit risk through credit approvals, limits, monitoring procedures and obtaining collateral, as appropriate.

Table of Contents

The total notional or contractual amounts, fair value, collateral and net exposure of our derivative financial instruments at September 30, 2010 and December 31, 2009, respectively, were as follows:

Dues and publications	444	325	1,093	1,266
Other	3,070	1,469	8,660	7,479
Total other noninterest expense	\$ 6,994	\$ 4,119	\$ 19,949	\$ 18,975

11. Segment Reporting

We have four operating segments for management reporting purposes: Global Commercial Bank, Relationship Management, SVB Capital, and Other Business Services. Our Other Business Services group includes Sponsored Debt Funds & Strategic Investments and SVB Analytics. The results of our operating segments are based on our internal management reporting process.

Our primary source of revenue is from net interest income, which is primarily the difference between interest earned on loans, net of funds transfer pricing (FTP), and interest paid on deposits, net of FTP. Accordingly, our segments are reported using net interest income, net of FTP. FTP is an internal measurement framework designed to assess the financial impact of a financial institution's sources and uses of funds. It is the mechanism by which an earnings credit is given for deposits raised, and an earnings charge is made for funded loans. FTP is calculated by applying a transfer rate to pooled, or aggregated, loan and deposit volumes.

We also evaluate performance based on provision for loan losses, noninterest income and noninterest expense, which are presented as components of segment operating profit or loss. In calculating each operating segment's noninterest expense, we consider the direct costs incurred by the operating segment as well as certain allocated direct costs. As part of this review, we allocate certain corporate overhead costs to a corporate account. We do not allocate income taxes to our segments. Additionally, our management reporting model is predicated on average asset balances; therefore, period-end asset balances are not presented for segment reporting purposes. Changes in an individual client's primary

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

relationship designation have resulted, and in the future may result, in the inclusion of certain clients in different segments in different periods.

Unlike financial reporting, which benefits from the comprehensive structure provided by GAAP, our internal management reporting process is highly subjective, as there is no comprehensive, authoritative guidance for management reporting. Our management reporting process measures the performance of our operating segments based on our internal operating structure, which is subject to change from time to time, and is not necessarily comparable with similar information for other financial services companies.

With respect to our operating segments, only Global Commercial Bank, Relationship Management and SVB Capital were determined to be separate reportable segments as of September 30, 2010.

Table of Contents

Changes to Segment Reporting Effective January 1, 2010

Effective January 1, 2010, we changed the way we monitor performance and results for certain of our business lines. We made certain changes to the items reported under our Global Commercial Bank, Relationship Management and Other Business Services segments. These changes do not change the four operating segments we currently report. As a result of these changes, our Global Commercial Bank segment's income before income tax expense for 2009 was reduced by \$41.0 million, as it now includes the operating expenses of the loan and deposit operations, which was previously included as a part of Other Items. Changes to other operating segments were not significant. We have reclassified all prior period segment information to conform to the current presentation of our reportable segments. The following is a description of the services that our four operating segments provide:

Global Commercial Bank provides solutions to the financial needs of commercial clients through lending, deposit products, cash management services, and global banking and trade products and services. It also serves the needs of our non-U.S. clients with global banking products, including loans, deposits and global finance, in key foreign entrepreneurial markets, where applicable. Effective January 1, 2010, Global Commercial Bank also includes the results of certain other business units that were previously reported as part of Relationship Management and Other Items.

Relationship Management provides banking products and a range of credit services to targeted high-net-worth individuals using both long-term secured and short-term unsecured lines of credit.

SVB Capital manages venture capital and private equity funds on behalf of SVB Financial Group and other third party limited partners. The SVB Capital family of funds is comprised of funds of funds and co-investment funds.

Other Business Services includes the results of our Sponsored Debt Funds & Strategic Investments segment, which is comprised of (i) our sponsored debt funds: Gold Hill Funds, which provide secured debt to private companies of all stages, and Partners for Growth Funds, which provide secured debt primarily to mid-stage and late-stage clients, and (ii) certain strategic investments held by SVB Financial. Other Business Services also includes the results of SVB Analytics, which provides equity valuation and equity management services to private companies and venture capital firms. Effective January 1, 2010, SVB Analytics also includes the results of certain other business units that were previously reported as part of Other Items.

The summary financial results of our operating segments are presented along with a reconciliation to our consolidated interim results. The Other Items column reflects the adjustments necessary to reconcile the results of the operating segments to the consolidated financial statements prepared in conformity with GAAP. Net interest income (loss) in the Other Items column is primarily interest income recognized from our available-for-sale securities portfolio, partially offset by interest income transferred to the segments as part of FTP. Noninterest income in the Other Items column is primarily attributable to noncontrolling interests and gains (losses) on equity warrant assets. Noninterest expense in the Other Items column primarily consists of expenses associated with corporate support functions such as information technology, finance, human resources, and legal, as well as certain corporate wide adjustments related to compensation expenses. Additionally, average assets in the Other Items column primarily consist of cash and cash equivalents and our available-for-sale securities portfolio balances.

Table of Contents

Our segment information for the three and nine months ended September 30, 2010 and 2009 is as follows:

(Dollars in thousands)	Global Commercial Banking	Relationship Management	SVB Capital (1)	Other Business Services (1)	Other Items	Total
Three months ended September 30, 2010						
Net interest income (loss)	\$ 84,775	\$ 8,543	\$	\$ (16)	\$ 13,039	\$ 106,341
(Provision for) recovery of loan losses	(8,376)	(2,639)			44	(10,971)
Noninterest income	31,399	360	6,418	2,995	45,064	86,236
Noninterest expense (2)	(58,706)	(4,785)	(2,752)	(3,559)	(34,369)	(104,171)
Income (loss) before income tax expense (3)	\$ 49,092	\$ 1,479	\$ 3,666	\$ (580)	\$ 23,778	\$ 77,435
Total average loans, net of unearned income	\$ 3,485,505	\$ 982,614	\$	\$	\$ 30,368	\$ 4,498,487
Total average assets	3,749,453	982,881	119,055	89,362	9,814,887	14,755,638

Nine months ended September 30, 2009						
Net interest income (loss)	\$ 273,957	\$ 25,897	\$ (13)	\$ (156)	\$ (19,675)	\$ 280,010
Provision for loan losses	(60,862)	(11,979)			(48)	(72,889)
Noninterest income (loss)	80,686	944	3,015	4,399	(32,043)	57,001
Noninterest expense, excluding impairment of goodwill (2)	(131,636)	(9,858)	(9,991)	(8,963)	(91,419)	(251,867)
Impairment of goodwill				(4,092)		(4,092)
Income (loss) before income tax expense (3)	\$ 162,145	\$ 5,004	\$ (6,989)	\$ (8,812)	\$ (143,185)	\$ 8,163
Total average loans, net of unearned income	\$ 3,822,200	\$ 966,939	\$	\$	\$ 22,342	\$ 4,811,481
Total average assets	3,932,869	968,384	91,412	79,244	5,863,263	10,935,172

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Total average deposits	8,265,536	155,679	5,960	8,427,175
------------------------	-----------	---------	-------	-----------

- (1) SVB Capital s and Other Business Services components of net interest income (loss), noninterest income (loss), noninterest expense and total average assets are shown net of noncontrolling interests for all periods presented.
- (2) The Global Commercial Bank segment includes direct depreciation and amortization of \$1.2 million and \$0.9 million for the three months ended September 30, 2010 and 2009, respectively, and \$3.4 million and \$2.5 million for the nine months ended September 30, 2010 and 2009, respectively.
- (3) The internal reporting model used by management to assess segment performance does not calculate income tax expense by segment. Our effective tax rate is a reasonable approximation of the segment rates.

Table of Contents**12. Off-Balance Sheet Arrangements, Guarantees and Other Commitments**

In the normal course of business, we use financial instruments with off-balance sheet risk to meet the financing needs of our customers. These financial instruments include commitments to extend credit, commercial and standby letters of credit and commitments to invest in venture capital/private equity fund investments. These instruments involve, to varying degrees, elements of credit risk. Credit risk is defined as the possibility of sustaining a loss because other parties to the financial instrument fail to perform in accordance with the terms of the contract.

Commitments to Extend Credit

The following table summarizes information related to our commitments to extend credit at September 30, 2010 and December 31, 2009, respectively:

(Dollars in thousands)	September 30, 2010	December 31, 2009
Commitments available for funding: (1)		
Fixed interest rate commitments	\$ 426,273	\$ 539,986
Variable interest rate commitments	5,465,804	4,798,740
Total commitments available for funding	\$ 5,892,077	\$ 5,338,726
Commitments unavailable for funding (2)	\$ 1,014,933	\$ 1,103,489
Maximum lending limits for accounts receivable factoring arrangements (3)	\$ 687,364	\$ 535,257
Reserve for unfunded credit commitments	15,892	13,331

- (1) Represents commitments which are available for funding, due to clients meeting all collateral, compliance, and financial covenants required under loan commitment agreements.
- (2) Represents commitments which are currently unavailable for funding, due to clients failing to meet all collateral, compliance, and financial covenants required under loan commitment agreements.
- (3) We extend credit under accounts receivable factoring arrangements when our clients' sales invoices are deemed creditworthy under existing underwriting practices.

Commercial and Standby Letters of Credit

The table below summarizes our commercial and standby letters of credit at September 30, 2010. The maximum potential amount of future payments represents the amount that could be remitted under letters of credit if there was a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from the collateral held or pledged.

(Dollars in thousands)	Expires In One Year or Less	Expires After One Year	Total Amount Outstanding	Maximum Amount of Future Payments
Financial standby letters of credit	\$ 543,514	\$ 29,390	\$ 572,904	\$ 572,904
Performance standby letters of credit	33,308	9,898	43,206	43,206
Commercial letters of credit	3,786		3,786	3,786
Total	\$ 580,608	\$ 39,288	\$ 619,896	\$ 619,896

At September 30, 2010 and December 31, 2009, deferred fees related to financial and performance standby letters of credit were \$4.0 million and \$3.9 million, respectively. At September 30, 2010, collateral in the form of cash of \$219.1 million and available-for-sale securities of \$19.0 million were available to us to reimburse losses, if any, under financial and performance standby letters of credit.

Table of Contents***Commitments to Invest in Venture Capital/Private Equity Funds***

We make commitments to invest in venture capital and private equity funds, which in turn make investments generally in, or in some cases make loans to, privately-held companies. Commitments to invest in these funds are generally made for a ten-year period from the inception of the fund. Although the limited partnership agreements governing these investments typically do not restrict the general partners from calling 100% of committed capital in one year, it is customary for these funds to generally call most of the capital commitments over 5 to 7 years. The actual timing of future cash requirements to fund these commitments is generally dependent upon the investment cycle, overall market conditions, and the nature and type of industry in which the privately held companies operate. The following table details our total capital commitments, unfunded capital commitments, and our ownership in each fund at September 30, 2010:

Our Ownership in Limited Partnership (Dollars in thousands)	SVBFG Capital Commitments	SVBFG Unfunded Commitments	SVBFG Ownership of each Fund
Silicon Valley BancVentures, LP	\$ 6,000	\$ 270	10.7%
SVB Capital Partners II, LP (1)	1,200	348	5.1
SVB India Capital Partners I, LP	7,750	2,697	14.4
SVB Capital Shanghai Yangpu Venture Capital Fund, LP	867	867	6.8
SVB Strategic Investors Fund, LP	15,300	1,530	12.6
SVB Strategic Investors Fund II, LP	15,000	2,550	8.6
SVB Strategic Investors Fund III, LP	15,000	5,400	5.9
SVB Strategic Investors Fund IV, LP	12,239	10,036	5.0
SVB Capital Preferred Return Fund, LP	12,288		19.5
SVB Capital NT Growth Partners, LP	24,670	4,256	33.0
Other Private Equity Fund (2)	10,013		60.5
Partners for Growth, LP	25,000	9,750	50.0
Partners for Growth II, LP	15,000	4,950	24.2
Gold Hill Venture Lending 03, LP (3)	20,000		9.3
Other Fund Investments (4)	152,927	41,701	N/A
New Fund Commitments (5)	189,837	122,870	N/A
Total	\$ 523,091	\$ 207,225	

- (1) Our ownership includes 1.3% direct ownership through SVB Capital Partners II, LLC and SVB Financial Group, and 3.8% indirect ownership through our investment in SVB Strategic Investors Fund II, LP.
- (2) Our ownership includes 44.5% direct ownership and indirect ownership interest of 12.6% and 3.4% in the fund through our ownership interests of SVB Capital NT Growth Partners, LP and SVB Capital Preferred Return Fund, LP, respectively.
- (3) Our ownership includes 4.8% direct ownership and 4.5% indirect ownership interest through GHLLC.
- (4) Represents commitments to 333 venture capital/private equity funds where our ownership interest is generally less than 5% of the voting interests of each such fund.
- (5) Represents the investment commitments made by SVB Financial which may be transferred to certain new managed funds of funds (New Fund Commitments). These New Fund Commitments will remain the obligations of SVB Financial, and will continue to remain as such until we may later decide to transfer, sell or otherwise dispose of the investments, whether to a third party or to a new existing fund managed by us.

The following table details the remaining unfunded commitments to venture capital/private equity funds by our consolidated managed funds of funds at September 30, 2010, which includes SVBFG's unfunded commitments detailed above:

Limited Partnership (Dollars in thousands)	Unfunded Commitments
SVB Strategic Investors Fund, LP	\$ 3,012

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

SVB Strategic Investors Fund II, LP	19,794
SVB Strategic Investors Fund III, LP	102,732
SVB Strategic Investors Fund IV, LP	165,202
SVB Capital Preferred Return Fund, LP	34,977
SVB Capital NT Growth Partners, LP	45,508
Other Private Equity Fund	9,083
 Total	 \$ 380,308

Table of Contents

13. Income Taxes

At September 30, 2010, our unrecognized tax benefit was \$0.5 million, the recognition of which would reduce our income tax expense by \$0.3 million. Total accrued interest and penalties at September 30, 2010 were \$0.2 million. We expect that our unrecognized tax benefit will change in the next 12 months, however, we do not expect the change to have a material impact on our financial position or our results of operations.

We are subject to income tax in the U.S. federal jurisdiction and various state and foreign jurisdictions and have identified our federal tax return and tax returns in California and Massachusetts as major tax filings. U.S. federal tax examinations through 1998 have been concluded. The U.S. federal tax return for 2006 and subsequent years remain open to examination by the Internal Revenue Service. Our California and Massachusetts tax returns for the years 2005 and 2006, respectively, and subsequent years remain open to examination.

14. Fair Value of Financial Instruments

Fair Value Measurements

We use fair value measurements to record fair value adjustments to certain financial instruments and to determine fair value disclosures. Our available-for-sale securities, derivative instruments and certain non-marketable investment securities are financial instruments recorded at fair value on a recurring basis.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (the exit price) in an orderly transaction between market participants at the measurement date. There is a three-level hierarchy for disclosure of assets and liabilities recorded at fair value. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable. Observable inputs reflect market-derived or market-based information obtained from independent sources, while unobservable inputs reflect our estimates about market data. The three levels for measuring fair value are based on the reliability of inputs and are as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Valuation adjustments and block discounts are not applied to instruments utilizing Level 1 inputs. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these instruments does not entail a significant degree of judgment.

Assets utilizing Level 1 inputs include exchange-traded equity securities.

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, directly or indirectly. Valuations for the available-for-sale securities are provided by independent external pricing service providers. We review the methodologies used to determine the fair value, including understanding the nature and observability of the inputs used to determine the price. Additional corroboration, such as obtaining a non-binding price from a broker, may be required depending on the frequency of trades of the security and the level of liquidity or depth of the market. The valuation methodology that is generally used for the Level 2 assets is the income approach. Below is a summary of the significant inputs used for each class of Level 2 assets and liabilities:

- **U.S. treasury securities:** U.S. treasury securities are considered by most investors to be the most liquid fixed income investments available. These securities are priced relative to market prices on similar U.S. treasury securities.
- **U.S. agency debentures:** Valuations of U.S. agency debentures are based on the characteristics specific to bonds held, such as issuer name, coupon rate, maturity date and any applicable issuer call option features. Valuations are based on market spreads relative to similar term benchmark market interest rates, generally U.S. treasury securities.

- **Agency-issued mortgage-backed securities:** Agency-issued mortgage-backed securities are pools of individual conventional mortgage loans underwritten to U.S. agency standards with similar coupon rates, tenor, and other attributes such as geographic location, loan size and origination vintage. Valuations of these securities are based on observable price adjustments relative to benchmark market interest rates taking into consideration estimated loan prepayment speeds.

- **Agency-issued collateralized mortgage obligations:** Agency-issued collateralized mortgage obligations are structured into classes or tranches with defined cash flow characteristics and are collateralized by U.S. agency-issued mortgage pass-through securities. Valuations of these securities incorporate similar characteristics of mortgage pass-through securities such as coupon rate, tenor, geographic location, loan size and origination vintage, in addition to incorporating the effect of estimated prepayment speeds on the cash flow structure of the class or tranche. Valuations incorporate observable market spreads over an estimated average life after considering the inputs listed above.

- **Non-agency mortgage-backed securities:** Valuations incorporate observable market spreads over an estimated average life after considering inputs such as coupon rate, tenor, geographic location, loan size and origination vintage, and estimated prepayment speeds. In the second quarter of 2010, we sold all of our remaining non-agency mortgage-backed securities.

Table of Contents

- **Commercial mortgage-backed securities:** Valuations of these securities are based on spreads to benchmark market interest rates (usually U.S. treasury rates or rates observable in the swaps market), prepayment speeds, loan default rate assumptions and loan loss severity assumptions on underlying loans. In the second quarter of 2010, we sold all of our remaining commercial mortgage-backed securities.
- **Municipal bonds and notes:** Bonds issued by municipal governments generally have stated coupon rates, final maturity dates and are subject to being called ahead of the final maturity date at the option of the issuer. Valuations of these securities are priced based on spreads to other municipal benchmark bonds with similar characteristics; or, relative to market rates on U.S. treasury bonds of similar maturity.
- **Interest rate swap assets:** Valuations of interest rate swaps are priced considering the coupon rate of the fixed leg of the contract and the variable coupon on the floating leg of the contract. Valuation is based on both spot and forward rates on the swap yield curve.
- **Foreign exchange forward and option contract assets and liabilities:** Valuations of these assets and liabilities are priced based on spot and forward foreign currency rates and option volatility assumptions.
- **Equity warrant assets (public portfolio):** Valuations of equity warrant assets of public portfolio companies are priced based on the Black-Scholes option pricing model that use the publicly-traded equity prices (underlying stock value), stated strike prices, option expiration dates, the risk-free interest rate and market-observable option volatility assumptions.

Level 3 Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions market participants would use in pricing the asset or liability. Below is a summary of the valuation techniques used for each class of Level 3 assets:

- **Private equity fund investments:** Valuations are based on the information provided by the investee funds' management, which reflects our share of the fair value of the net assets of the investment fund on the valuation date. We account for differences between our measurement date and the date of the fund investment's net asset value by using the most recent available financial information from the investee general partner, adjusted for any contributions paid during the interim period, distributions received from the investment during the interim period, or significant fund transactions or market events.
- **Other private equity investments:** Valuations are based on consideration of a range of factors including, but not limited to, the price at which the investment was acquired, the term and nature of the investment, local market conditions, values for comparable securities, and as it relates to the private company issue, the current and projected operating performance, exit strategies and financing transactions subsequent to the acquisition of the investment.
- **Other investments:** Valuations are based on pricing models that use observable inputs, such as yield curves and publicly-traded equity prices, and unobservable inputs, such as private company equity prices.
- **Equity warrant assets (private portfolio):** Valuations of equity warrant assets of private portfolio companies are priced based on a modified Black-Scholes option pricing model to estimate the underlying asset value, by using stated strike prices, option expiration dates, risk-free interest rates and option volatility assumptions. Option volatility assumptions used

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

in the modified Black-Scholes model are based on public market indices whose members operate in similar industries as companies in our private company portfolio. Option expiration dates are modified to account for estimates of actual life relative to stated expiration. Overall model asset values are further adjusted for a general lack of liquidity due to the private nature of the associated underlying company.

For the three and nine months ended September 30, 2010 and 2009, there were no transfers between Level 1 and Level 2. Transfers from Level 3 to Level 2 during the three and nine months ended September 30, 2010 and 2009 were due to the transfer of equity warrant assets from our private portfolio to our public portfolio. Transfer from Level 3 to Level 1 during the three and nine months ended September 30, 2010 was due to the initial public offering (IPO) of one of our portfolio companies.

It is our policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements. When available, we use quoted market prices to measure fair value. If market prices are not available, fair value measurement is based upon models that use primarily market-based or independently-sourced market parameters, including interest rate yield curves, prepayment speeds, option volatilities and currency rates. Substantially all of our financial instruments use either of the foregoing methodologies, collectively Level 1 and Level 2 measurements, to determine fair value adjustments recorded to our financial statements. However, in certain cases, when market observable inputs for model based valuation techniques may not be readily available, we are required to make judgments about assumptions market participants would use in estimating the fair value of the financial instrument.

The degree of management judgment involved in determining the fair value of a financial instrument is dependent upon the availability of quoted market prices or observable market parameters. For financial instruments that trade actively and have quoted market prices or observable market parameters, there is minimal subjectivity involved in measuring fair value. When observable market prices and parameters are not fully available, management judgment is necessary to estimate fair value. For inactive markets,

Table of Contents

there is little information, if any, to evaluate if individual transactions are orderly. Accordingly, we are required to estimate, based upon all available facts and circumstances, the degree to which orderly transactions are occurring and provide more weighting to price quotes that are based upon orderly transactions. In addition, changes in the market conditions may reduce the availability of quoted prices or observable data. For example, reduced liquidity in the capital markets or changes in secondary market activities could result in observable market inputs becoming unavailable. Therefore, when market data is not available, we use valuation techniques requiring more management judgment to estimate the appropriate fair value measurement. Accordingly, the degree of judgment exercised by management in determining fair value is greater for financial assets and liabilities categorized as Level 3.

The following fair value hierarchy tables present information about our assets and liabilities that are measured at fair value on a recurring basis as of September 30, 2010:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of September 30, 2010
(Dollars in thousands)				
Assets				
Available-for-sale securities:				
U.S. treasury securities	\$	\$ 26,674	\$	\$ 26,674
U.S. agency debentures		1,721,720		1,721,720

Total unrealized gains	\$ 6,219	\$ 20,186

- (1) Unrealized gains are recorded on the line items gains (losses) on investment securities, net and other noninterest income, components of noninterest income.
- (2) Unrealized gains are recorded on the line item gains (losses) on derivative instruments, net a component of noninterest income.

Financial Instruments not Carried at Fair Value

FASB issued guidance over financial instruments (ASC 825-10-65) requires that we disclose estimated fair values for our financial instruments not carried at fair value. Fair value estimates, methods and assumptions, set forth below for our financial instruments, are made solely to comply with the requirements of ASC 825.

Fair values are based on estimates or calculations at the transaction level using present value techniques in instances where quoted market prices are not available. Because broadly traded markets do not exist for many of our financial instruments, the fair value calculations attempt to incorporate the effect of current market conditions at a specific time. Fair valuations are management's estimates of the values, and they are calculated based on indicator prices corroborated by observable market quotes or pricing models, the economic and competitive environment, the characteristics of the financial instruments, expected losses, and other such factors. These calculations are subjective in nature, involve uncertainties and matters of significant judgment, and do not include tax ramifications; therefore, the results cannot be determined with precision or substantiated by comparison to independent markets, and they may not be realized in an actual sale or immediate settlement of the instruments. There may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results. For all of these reasons, the aggregation of the fair value calculations presented herein does not represent, and should not be construed to represent, the underlying value of the Company.

The following describes the methods and assumptions used in estimating the fair values of financial instruments, excluding financial instruments already recorded at fair value as described above.

Short-Term Financial Assets

Short-term financial assets include cash on hand, cash balances due from banks, interest-earning deposits, securities purchased under agreement to resell and other short-term investment securities. The carrying amount is a reasonable estimate of fair value because of the insignificant risk of changes in fair value due to changes in market interest rates, and purchased in conjunction with our cash management activities.

Non-Marketable Securities (Cost and Equity Method Accounting)

Non-marketable securities (cost and equity method accounting) includes other investments (equity method accounting), low income housing tax credit funds (equity method accounting), private equity fund investments (cost method accounting), and other private equity investments (cost method accounting). The fair value of other investments (equity method accounting), private equity fund investments (cost method accounting), and other private equity investments (cost method accounting) is based on financial information obtained as the investor or obtained from the fund investments or debt fund investments respective general partner. For private company investments, fair value is based on consideration of a range of factors including, but not limited to, the price at which the investment was acquired, the term and nature of the investment, local market conditions, values for comparable securities, current and projected operating performance, exit strategies and financing transactions subsequent to the acquisition of the investment. For our private equity fund investments and debt fund investments, we utilize the net asset value per share as obtained from the general partners of the fund investments. We adjust the net asset value per share for differences between our measurement date and the date of the fund investment's net asset value by using the most recently available financial information from the investee general partner, for example June 30th, for our September 30th interim consolidated financial statements, adjusted for any contributions paid during

Table of Contents

the third quarter, distributions received from the investment during the third quarter, or significant fund transactions or market events, if any. The fair value of our low income housing tax credit funds (equity method accounting) is based on carrying value.

Loans

The fair value of fixed and variable rate loans is estimated by discounting contractual cash flows using discount rates that reflect our current pricing for loans and the forward yield curve.

Deposits

The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, interest-bearing checking accounts, money market accounts and interest-bearing sweep deposits is equal to the amount payable on demand at the measurement date. The fair value of time deposits is estimated by discounting the balances using our cost of borrowings and the forward yield curve over their remaining contractual term.

Short-Term Borrowings

Short-term borrowings at September 30, 2010 and December 31, 2009 include cash collateral received from counterparties for our interest rate swap agreements related to our 5.70% senior and 6.05% subordinated notes. The carrying amount is a reasonable estimate of fair value.

Long-Term Debt

Long-term debt includes our 5.375% Senior Notes, 2008 Convertible Notes, junior subordinated debentures, senior and subordinated notes, and other long-term debt (see Note 8- Short-Term Borrowings and Long-Term Debt). The fair value of long-term debt is generally based on quoted market prices, when available, or is estimated based on calculations utilizing third-party pricing services and current market spread, price indications from reputable dealers or observable market prices of the underlying instrument(s), whichever is deemed more reliable.

Off-Balance Sheet Financial Instruments

The fair value of unfunded commitments to extend credit is estimated based on the average amount we would receive or pay to execute a new agreement with identical terms, considering current interest rates and taking into account the remaining terms of the agreement and counterparties' credit standing.

Letters of credit are carried at their fair value, which is equivalent to the residual premium or fee at September 30, 2010 and December 31, 2009. Commitments to extend credit and letters of credit typically result in loans with a market interest rate if funded.

The information presented herein is based on pertinent information available to us as of September 30, 2010 and December 31, 2009. The following table is a summary of the estimated fair values of our financial instruments that are not carried at fair value at September 30, 2010 and December 31, 2009.

	September 30, 2010		December 31, 2009	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
(Dollars in thousands)				
Financial assets:				
Non-marketable securities (cost and equity method accounting)	\$ 204,828	\$ 213,569	\$ 184,495	\$ 186,065
Net loans	4,784,836	4,835,548	4,475,644	4,499,058
Financial liabilities:				
Other short-term borrowings	59,735	59,735	38,755	38,755
Deposits	12,414,945	12,414,584	10,331,937	10,331,381
5.375% senior notes	347,555	356,234		
5.70% senior notes (1) (2)	268,503	282,368	269,793	273,843
6.05% subordinated notes (1) (2)	298,263	312,125	276,541	259,598
3.875% convertible senior notes	248,715	256,975	246,991	264,595
7.0% junior subordinated debentures	55,592	50,907	55,986	42,082

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Other long-term debt	7,182	7,182	7,339	7,339
<i>Off-balance sheet financial assets:</i>				
Commitments to extend credit		17,749		15,398

- (1) At September 30, 2010, included in the carrying value and estimated fair value of our 5.70% senior notes and 6.05% subordinated notes, are \$18.6 million and \$48.7 million, respectively related to the fair value of the interest rate swaps associated with the notes.

Table of Contents

- (2) At December 31, 2009, included in the carrying value and estimated fair value of our 5.70% senior notes and 6.05% subordinated notes, are \$19.9 million and \$27.0 million, respectively related to the fair value of the interest rate swaps associated with the notes.

Investments in Entities that Calculate Net Asset Value Per Share

FASB issued guidance over certain fund investments (FASB Accounting Standards Update No. 2009-12, *Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*) requires that we disclose the fair value of funds, significant investment strategies of the investees, redemption features of the investees, restrictions on the ability to sell investments, estimate of the period of time over which the underlying assets are expected to be liquidated by the investee, and unfunded commitments related to the investments.

Our investments in debt funds and private equity fund investments generally cannot be redeemed. Alternatively, we expect distributions to be received through initial public offerings (IPOs) and merger and acquisition (M&A) activity of the underlying assets of the fund. We currently do not have any plans to sell any of these fund investments. If we decide to sell these investments in the future, the investee fund's management must approve of the buyer before the sale of the investments can be completed. The fair values of the fund investments have been estimated using the net asset value per share of the investments, adjusted for any differences between our measurement date and the date of the fund investment's net asset value by using the most recently available financial information from the investee general partner, for example June 30th, for our September 30th interim consolidated financial statements, adjusted for any contributions paid during the third quarter, distributions received from the investment during the third quarter, or significant fund transactions or market events.

The following table is a summary of the estimated fair values of these investments and remaining unfunded commitments for each major category of these investments as of September 30, 2010:

(Dollars in thousands)	Fair Value	Unfunded Commitments
Non-marketable securities (investment company fair value accounting):		
Private equity fund investments (1)	\$ 365,742	\$ 380,309
Non-marketable securities (equity method accounting):		
Other investments (2)	58,896	17,414
Non-marketable securities (cost method accounting):		
Private equity fund investments (3)	101,071	152,107
Total	\$ 525,709	\$ 549,830

- (1) Private equity fund investments within non-marketable securities (investment company fair value accounting) include investments made by our managed funds of funds including SVB Strategic Investors Fund, LP, SVB Strategic Investors Fund II, LP, SVB Strategic Investors Fund III, LP, SVB Strategic Investors Fund IV, LP, SVB Capital NT Growth Partners, LP, and SVB Capital Preferred Return Fund, LP, and one of our co-investment funds, SVB Capital Partners II, LP. These investments represent investments in private equity and venture capital funds that invest primarily in U.S. and global technology and life sciences companies. Included in the fair value and unfunded commitments of fund investments under investment company fair value accounting are \$297.8 million and \$361.3 million, respectively, attributable to noncontrolling interests. It is estimated that we will receive distributions from the fund investments over the next 12 years, depending on the age of the funds.
- (2) Other investments within non-marketable securities (equity method accounting) include investments in debt funds and private equity and venture capital fund investments that invest in or lend money to primarily U.S. and global technology and life sciences companies. It is estimated that we will receive distributions from the fund investments over the next 10 years, depending on the age of the funds.
- (3) Private equity fund investments within non-marketable securities (cost method accounting) include investments in private equity and venture capital fund investments that invest primarily in U.S. and global technology and life sciences companies. Included in the \$152.1 million is \$122.9 million of unfunded commitments made by SVB Financial which may be transferred to certain new managed funds of funds (New Fund Commitments). These New Fund Commitments will remain the obligations of SVB Financial, and will continue to remain as such until we may later decide to transfer, sell or otherwise dispose of the investments, whether to a third party or to a new or existing fund managed by us. It is estimated that we will receive distributions from the fund investments over the next 10 years, depending on the age of the funds.

15. Legal Matters

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against us or our affiliates. Based upon information available to us, our review of such claims to date and consultation with our outside legal counsel, management believes the liability relating to these actions, if any, will not have a material adverse effect on our liquidity, consolidated financial position, and/or results of operations. Where appropriate, as we determine, we establish reserves in accordance with FASB guidance over contingencies. The outcome of litigation and other legal and regulatory matters is inherently uncertain, however, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material adverse effect on our liquidity, consolidated financial position, and/or results of operation.

Table of Contents

16. Related Parties

SVB Financial has a commitment under a partially-syndicated revolving line of credit facility to Gold Hill Venture Lending 03, LP, a venture debt fund (Gold Hill), and its affiliated funds. SVB Financial has a 9.3% effective ownership interest in Gold Hill, as well as a 90.7% majority interest in its general partner, Gold Hill Venture Lending Partners 03, LLC. The line of credit is secured and bears an interest rate of prime plus one percent. In April 2010, SVB Financial decreased the revolving line of credit facility to Gold Hill from a total commitment amount of \$75.0 million to \$15.0 million. Of the \$15.0 million, \$6.2 million or 41.2% is syndicated to another lender. The highest outstanding balance under SVB Financial's portion of the facility for the nine months ended September 30, 2010 and 2009 was \$9.7 million and \$37.6 million, respectively. There was no outstanding balance under the facility as of September 30, 2010. SVB Financial's portion of the outstanding balance was \$8.8 million as of December 31, 2009. The line of credit matures in May 2011.

During the nine months ended September 30, 2010, the Bank made loans to related parties, including companies with which certain of our directors are affiliated. Such loans: (a) were made in the ordinary course of business, (b) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and (c) did not involve more than the normal risk of collectability or present other unfavorable features.

17. Subsequent Events

We have evaluated all subsequent events and determined there are no events other than those discussed above that require disclosure.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
Forward-Looking Statements

This Quarterly Report on Form 10-Q, including in particular Management's Discussion and Analysis of Financial Condition and Results of Operations under Part 1, Item 2 of this report, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Management has in the past and might in the future make forward-looking statements orally to analysts, investors, the media and others. Forward-looking statements are statements that are not historical facts. Broadly speaking, forward-looking statements include, but are not limited to, the following:

Projections of our net interest income, noninterest income, earnings per share, noninterest expenses (including professional service, compliance, compensation and other costs), cash flows, balance sheet positions, capital expenditures, and capitalization or other financial items

Descriptions of our strategic initiatives, plans or objectives for future operations, including pending acquisitions

Forecasts of venture capital/private equity funding and investment levels

Forecasts of future interest rates, economic performance, and income from investments

Forecasts of expected levels of provisions for loan losses, loan growth and client funds

Descriptions of assumptions underlying or relating to any of the foregoing

In this Quarterly Report on Form 10-Q, we make forward-looking statements, including, but not limited to, those discussing our management's expectations about:

Market and economic conditions (including levels of public offering, mergers/acquisitions and venture capital financing activities) and the associated impact on us

The sufficiency of our capital, including sources of capital (such as funds generated through retained earnings) and the extent of which capital may be used or required

The adequacy of our liquidity position, including sources of liquidity (such as funds generated through retained earnings)

Our overall investment plans, strategies and activities, including venture capital/private equity funding and investments, and our investment of excess cash/liquidity

The realization, timing, valuation and performance of equity or other investments

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Our intention to sell our investment securities prior to recovery of our cost basis, or the likelihood of such

Expected cash requirements of unfunded commitments to certain investments, including capital calls

Our overall management of interest rate risk, including managing the sensitivity of our interest-earning assets and interest-bearing liabilities to interest rates, and the impact to earnings from a change in interest rates

The credit quality of our loan portfolio, including levels and trends of nonperforming loans, impaired loans and troubled debt restructurings

The adequacy of reserves (including allowance for loan and lease losses) and the appropriateness of our methodology for calculating such reserves

The level of loan and deposit balances

The level of client investment fees and associated margins

The profitability of our products and services

Our strategic initiatives, including the expansion of operations in China, India, Israel, the United Kingdom and elsewhere

The expansion and growth of our noninterest income sources

The financial impact of continued growth of our funds management business

Our plans to form new managed investment funds and our intention to transfer certain existing investment commitments to third parties or our managed funds

Distributions of private equity or debt fund investment proceeds; intentions to sell such fund investments

The changes in, or adequacy of, our unrecognized tax benefits and any associated impact

Payment upon conversion of convertible debt instruments

Changes in matched-terms under certain notes and associated interest rate swaps

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

The extent to which counterparties, including those to our forward and option contracts, will perform their contractual obligations

The effect of application of certain accounting pronouncements

The effect of lawsuits and claims

Exceeding internal performance targets for 2010 with respect to incentive compensation expenses

You can identify these and other forward-looking statements by the use of words such as becoming , may , will , should , predicts , potential continue , anticipates , believes , estimates , seeks , expects , plans , intends , the negative of such words, or comparable terminology. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we have based these expectations on our beliefs as well as our assumptions, and such expectations may prove to be incorrect. Our actual results of operations and financial performance could differ significantly from those expressed in or implied by our management's forward-looking statements.

For information with respect to factors that could cause actual results to differ from the expectations stated in the forward-looking statements, see Risk Factors under Part II, Item 1A of this report. We urge investors to consider all of these factors carefully in evaluating the forward-looking statements contained in this report. All subsequent written or oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. The forward-looking statements included in this filing are made only as of the date of this filing. We assume no obligation and do not intend to revise or update any forward-looking statements contained in this Quarterly Report on Form 10-Q.

The following discussion and analysis of financial condition and results of operations should be read in conjunction with our interim unaudited consolidated financial statements and accompanying notes as presented in Part I, Item 1 of this report and in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2009 (2009 Form 10-K), as filed with the Securities and Exchange Commission (SEC) and as updated to reflect revised segment financial reporting in our Current Report on form 8-K filed on September 15, 2010.

Reclassifications

Certain reclassifications have been made to prior period results to conform to the current period's presentations. Such reclassifications had no effect on our results of operations or stockholders' equity.

Management's Overview of Third Quarter 2010 Performance

The highlights of our third quarter 2010 results included the following: (1) strong loan growth; (2) continued improvement in credit quality; (3) pre-tax gains of \$23.6 million from sales of certain agency-backed available-for-sale securities; (4) continued growth in period-end deposits; and (5) continued purchases of available-for-sale securities, which has improved our net interest income.

Additional details of these highlights (compared to the third quarter of 2009, where applicable) is noted below:

Growth of \$2.8 billion in average interest-earning available-for-sale securities to \$5.3 billion, which have increased as a result of our continued deposit growth. Period-end available-for-sale securities were \$6.0 billion.

An increase in net gains on investment securities to \$46.6 million for the third quarter of 2010, compared to \$3.9 million for the third quarter of 2009. Net gains on investment securities of \$46.6 million for the third quarter of 2010 were attributable to the following:

Gains of \$23.6 million from sales of certain agency-backed available-for-sale securities in the third quarter of 2010.

Net gains from our nonmarketable and marketable securities of \$23.0 million. Net of noncontrolling interests, these gains were \$6.2 million for the third quarter of 2010, compared to net losses of \$1.0 million for the third quarter of 2009.

Period-end loans were \$4.9 billion, which included the addition of 423 new loan clients during the third quarter of 2010, resulting in \$534.8 million in new funded loans.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Provision for loan losses was \$11.0 million for the third quarter of 2010, compared to \$8.0 million for the third quarter of 2009. The provision for loan losses of \$11.0 million for the third quarter of 2010 was caused primarily by an increase in period-end loan balances (from June 30, 2010 to September 30, 2010) and net charge-offs of \$8.4 million, or 73 basis points as a percentage of average total gross loans (annualized). We consider our credit quality to be strong, and believe the size of our provision for loan losses has returned to levels that are consistent with a more normalized economic environment. Please refer to Results of Operations Provision for Loan Losses below for further details on our provision for loan losses.

Growth in average deposit balances of \$3.0 billion, or 33.8 percent, of which \$1.6 billion was from noninterest-bearing demand deposits. This growth is reflective of the continued low interest rate environment and a lack of attractive market investment opportunities for our clients.

An increase in net interest income (fully taxable equivalent basis) of \$9.5 million, primarily due to an increase in our average available-for-sale securities portfolio, as well as lower interest expense on deposits due to the low interest rate

Table of Contents

environment. This increase was partially offset by a decrease in interest income from loans due to decreases in loan rates and a \$46.0 million decrease in average loan balances compared to the comparable 2009 period.

A decrease of 56 basis points in our net interest margin to 3.14 percent, primarily due to significant growth of our deposits (the majority of which were invested in available-for-sale securities) and the low interest rate environment. These declines in our net interest margin were partially offset by a decrease in interest expense from deposits due to low market rates.

An increase of \$24.4 million in noninterest expense to \$104.2 million, primarily due to an increase of \$16.4 million in compensation and benefits expenses. Incentive compensation and employee stock ownership plan (ESOP) expenses for the third quarter 2010 reflect our current expectation that we will achieve our internal performance targets for 2010 as compared to our 2009 incentive compensation levels, which were at half of target levels as we did not achieve all of our internal performance targets for 2009. In addition, salaries and wages expenses increased due to an increase in the number of average full-time equivalent (FTE) employees, which increased by 59 to 1,321 FTEs for the third quarter of 2010, compared to 1,262 FTEs for the third quarter of 2009.

In September 2010, we issued \$350 million of 5.375% senior notes due in September 2020. We received net proceeds of \$344.3 million after deducting underwriting discounts and commissions and other estimated expenses.

A summary of our performance for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

(Dollars in thousands, except per share data and ratios)	Three months ended September 30,			Nine months ended September 30,

Non-GAAP Net Income and Non-GAAP Diluted Earnings Per Common Share

We use and report non-GAAP net income and non-GAAP diluted earnings per common share, which excludes gains from the sale of certain agency and non-agency-backed available-for-sale securities during 2010 and non-cash charges relating to impairment of goodwill during 2009. We believe these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide meaningful supplemental information regarding our performance by excluding certain items that do not occur every reporting period. Our management uses, and believes that investors benefit from referring to, these non-GAAP financial measures in assessing our operating results and related trends, and when planning, forecasting and analyzing future periods. However, these non-GAAP financial measures should be considered in addition to, not as a substitute for or preferable to, financial measures prepared in accordance with GAAP.

A reconciliation of GAAP to non-GAAP net income and non-GAAP diluted earnings per common share for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

(Dollars in thousands, except share amounts)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Net income available to common stockholders	\$ 37,787	\$ 20,608	\$ 77,464	\$ 16,630
Impairment of goodwill (1)				4,092
Gains on sales of available-for-sale securities (2)	(23,605)		(24,699)	
Tax impact of gains on sales of available-for-sale securities	9,397		9,830	
Non-GAAP net income available to common stockholders	\$ 23,579	\$ 20,608	\$ 62,595	\$ 20,722
GAAP earnings per common share - diluted	\$ 0.89	\$ 0.61	\$ 1.83	\$ 0.50
Impact of impairment of goodwill (1)				0.12
Impact of gains on sales of available-for-sale securities (2)	(0.56)		(0.58)	
Tax impact of gains on sales of available-for-sale securities	0.22		0.23	
Non-GAAP earnings per common share - diluted	\$ 0.55	\$ 0.61	\$ 1.48	\$ 0.62
Weighted average diluted common shares outstanding	42,512,515	33,672,491	42,400,685	33,247,740

- (1) Non-tax deductible goodwill impairment charge for eProspers recognized in the first quarter of 2009.
- (2) Gains on the sales of \$492.9 million and \$157.9 million in certain agency and non-agency backed available-for-sale securities in the third quarter and second quarter of 2010, respectively.

Critical Accounting Policies and Estimates

The accompanying management's discussion and analysis of results of operations and financial condition is based upon our unaudited interim consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements in accordance with GAAP requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosure of contingent assets and liabilities. Management evaluates estimates and assumptions on an ongoing basis. Management bases its estimates on historical experiences and various other factors and assumptions that are believed to be reasonable under the

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

circumstances. Actual results may differ materially from these estimates under different assumptions or conditions.

There have been no significant changes during the nine months ended September 30, 2010 to the items that we disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations under Part II, Item 7 of our 2009 Form 10-K.

Table of Contents**Results of Operations****Net Interest Income and Margin (Fully Taxable Equivalent Basis)**

Net interest income is defined as the difference between interest earned on loans, investment securities and short-term investment securities, and interest paid on funding sources. Net interest income is our principal source of revenue. Net interest margin is defined as the amount of annualized net interest income, on a fully taxable equivalent basis, expressed as a percentage of average interest-earning assets. Net interest income and net interest margin are presented on a fully taxable equivalent basis to consistently reflect income from taxable loans and securities and tax-exempt securities based on the federal statutory tax rate of 35.0 percent.

Analysis of Changes to Net Interest Income Due to Volume and Rate (Fully Taxable-Equivalent Basis)

Net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, referred to as volume change. Net interest income is also affected by changes in yields earned on interest-earning assets and rates paid on interest-bearing liabilities, referred to as rate change. The following table sets forth changes in interest income for each major category of interest-earning assets and interest expense for each major category of interest-bearing liabilities. The table also reflects the amount of simultaneous changes attributable to both volume and rate changes for the periods indicated. For this table, changes that are not solely due to either volume or rate are allocated in proportion to the percentage changes in average volume and average rate.

(1) Our available-for-sale securities portfolio represents interest-earning investment securities.

Net Interest Income (Fully Taxable Equivalent Basis)

Three months ended September 30, 2010 and 2009

Net interest income increased by \$9.5 million to \$106.9 million for the three months ended September 30, 2010, compared to \$97.4 million for the comparable 2009 period. Overall, we saw an increase in our net interest income primarily due to growth in our available-for-sale securities portfolio, which has increased as a result of our continued growth in deposits (growth in deposits is partly reflective of the continued low interest rate environment and the lack of attractive market investment opportunities for our clients). In addition, we saw an increase in net interest income due to lower costs of deposits as a result of the low interest rate environment.

Table of Contents

Although our cost of funding benefited from the low interest rate environment, the low rate environment had a negative impact on the rates earned on our available-for-sale securities and loans, which partially offset the overall increase in our net interest income.

The main factors affecting interest income and interest expense for the three months ended September 30, 2010, compared to the comparable 2009 period are discussed below:

Interest income for the three months ended September 30, 2010 increased by \$8.7 million primarily due to:

A \$10.7 million increase in interest income on available-for-sale securities, primarily related to the growth in average balances of \$2.8 billion due to new investments, which were purchased as a result of our continued deposit growth. This increase was partially offset by the re-investment of higher-yielding securities from sales and paydowns into lower-yielding securities due to the current low interest rate environment.

Additionally, this increase was also partially offset by a \$2.3 million decrease in interest income on loans, primarily due to a decrease in loan rates reflecting the current low interest rate environment, as well as from a \$46.0 million decrease in average loan balances for the three months ended September 30, 2010, compared to the comparable 2009 period.

Interest expense for the three months ended September 30, 2010 decreased by \$0.8 million primarily due to:

A decrease in interest expense from interest-bearing deposits of \$1.0 million, primarily due to declining market rates and our adjustment of our deposit rates throughout 2009 and the first half of 2010 to be in-line with current market rates. This decrease was partially offset by an increase in interest expense due to a \$1.5 billion increase in average interest-bearing deposit balances.

Additionally, this decrease was also partially offset by a net increase in interest expense of \$0.3 million related to our long-term debt, primarily due to the issuance of our 5.375% senior notes in September 2010. This increase in interest expense was partially offset by lower London Interbank Offered Rates (LIBOR) associated with interest rate swap agreements on our senior and subordinated notes.

Nine months ended September 30, 2010 and 2009

Net interest income increased by \$33.5 million to \$315.2 million for the nine months ended September 30, 2010, compared to \$281.7 million for the comparable 2009 period. Overall, we saw an increase in our net interest income primarily due to growth in our available-for-sale securities portfolio, which has increased as a result of our continued growth in deposits (growth in deposits is reflective of the continued low interest rate environment and the lack of attractive market investment opportunities for our clients). In addition, we saw an increase in net interest income due to lower costs of deposits and LIBOR rates associated with certain interest rate swaps as a result of the low interest rate environment. Although our cost of funding benefited from the low interest rate environment, lower loan balances and higher deposit balances decreased our overall net interest income.

The main factors affecting interest income and interest expense for the nine months ended September 30, 2010, compared to the comparable 2009 period are discussed below:

Interest income for the nine months ended September 30, 2010 increased by \$23.8 million primarily due to:

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

A \$47.9 million increase in interest income on available-for-sale securities, primarily related to the growth in average balances of \$2.9 billion due to new investments, which were purchased as a result of our continued deposit growth. This increase was partially offset by the re-investment of higher-yielding securities from sales and paydowns into lower yielding securities due to the current low interest rate environment.

This increase was partially offset by a \$25.3 million decrease in interest income on loans driven principally by a \$568.1 million decrease in average loan balances for the nine months ended September 30, 2010, compared to the comparable 2009 period.

Interest expense for the nine months ended September 30, 2010 decreased by \$9.7 million primarily due to:

A decrease in interest expense from interest-bearing deposits of \$5.9 million, primarily due to declining market rates and our adjustment of our deposit rates throughout 2009 and the first half of 2010 to be in-line with current market rates. This decrease was partially offset by a \$1.3 billion increase in average interest-bearing deposits.

A decrease in interest expense of \$3.7 million related to our long-term debt, primarily due to lower LIBOR rates associated with interest rate swap agreements on our senior and subordinated notes.

Net Interest Margin (Fully Taxable-Equivalent Basis)

Our net interest margin was 3.14 percent and 3.21 percent for the three and nine months ended September 30, 2010, respectively, compared to 3.70 percent and 3.79 percent for the comparable 2009 periods. The decreases in net interest margin were

Table of Contents

primarily due to the significant growth of our deposits, the majority of which were invested in available-for-sale securities and cash deposited at the Federal Reserve. As such, the overall mix of our interest-earning assets shifted to a higher proportion of lower-yielding assets. Additionally, sales and paydowns of available-for-sale securities during 2010 are being re-invested in lower-yielding securities due to the current low interest rate environment. These declines in our net interest margin were partially offset by a decrease in rates paid on our deposits and borrowings due to the decrease in market rates and overall low interest rate environment.

Average Balances, Yields and Rates Paid (Fully Taxable Equivalent Basis)

The average yield earned on interest-earning assets is the amount of annualized fully taxable-equivalent interest income expressed as a percentage of average interest-earning assets. The average rate paid on funding sources is the amount of annualized interest expense expressed as a percentage of average funding sources. The following tables set forth average assets, liabilities, noncontrolling interests and SVBFG stockholders' equity, interest income, interest expense, annualized yields and rates, and the composition of our annualized net interest margin for the three and nine months ended September 30, 2010 and 2009, respectively.

- (5) Average investment securities of \$666.1 million and \$481.1 million for the nine months ended September 30, 2010 and 2009, respectively, were classified as other assets as they were noninterest-earning assets. These investments primarily consisted of non-marketable securities.

Table of Contents***Provision for Loan Losses***

Our provision for loan losses is based on our evaluation of the adequacy of the existing allowance for loan losses in relation to total gross loans using historical and other objective information, and on our periodic assessment of the inherent and identified risk dynamics of the loan portfolio resulting from reviews of selected individual loans. The following table summarizes our allowance for loan losses for the three and nine months ended September 30, 2010 and 2009, respectively:

(Dollars in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Allowance for loan losses, beginning balance	\$ 71,789	\$ 110,473	\$ 72,450	\$ 107,396
Provision for loan losses	10,971	8,030	29,124	72,889
Gross loan charge-offs	(12,289)	(46,553)	(40,602)	(110,464)
Loan recoveries	3,898	14,763	13,397	16,892
Allowance for loan losses, ending balance	\$ 74,369	\$ 86,713	\$ 74,369	\$ 86,713
Provision as a percentage of total gross loans (annualized)	0.89%	0.68%	0.79%	2.08%
Gross loan charge-offs as a percentage of average total gross loans (annualized)	1.08	4.03	1.27	3.04
Net loan charge-offs as a percentage of average total gross loans (annualized)	0.73	2.75	0.85	2.58
Allowance for loan losses as a percentage of period-end total gross loans	1.52	1.85	1.52	1.85
Period-end total gross loans	\$ 4,900,129	\$ 4,692,498	\$ 4,900,129	\$ 4,692,498
Average total gross loans	4,534,485	4,583,320	4,277,371	4,852,543

Our provision for loan losses was \$11.0 million for the three months ended September 30, 2010, an increase of \$2.9 million compared to the comparable 2009 period. Gross loan charge-offs of \$12.3 million for the three months ended September 30, 2010 were primarily from our life science and software client portfolios. Gross loan charge-offs included \$3.2 million of loans that were reserved for and classified as impaired loans at June 30, 2010. Loan recoveries of \$3.9 million for the three months ended September 30, 2010 were primarily from our hardware, software and life science client portfolios.

Our provision for loan losses was \$29.1 million for the nine months ended September 30, 2010, a decrease of \$43.8 million compared to the comparable 2009 period. Gross loan charge-offs of \$40.6 million for the nine months ended September 30, 2010 were primarily from our life science, software and hardware client portfolios. Gross loan charge-offs included \$9.2 million of loans that were reserved for and classified as impaired loans in the period prior to the charge-off. Loan recoveries of \$13.4 million for the nine months ended September 30, 2010 were primarily from our software, hardware and life science client portfolios.

Noninterest Income

A summary of noninterest income for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,

NM- Not meaningful

Included in net income is income and expense attributable to noncontrolling interests. We recognize, as part of our investment funds management business through SVB Capital and Sponsored Debt Funds & Strategic Investments, the entire income or loss from funds where we own significantly less than 100%. We also recognize, as part of our equity valuation business through SVB Analytics, the results of eProsper, of which we own 65%. We are required under GAAP to consolidate 100% of the results of entities that we are deemed to control, even though we may own less than 100% of such entities. The relevant amounts attributable to investors other than us are reflected under Net (Income) Loss Attributable to Noncontrolling Interests on our statements of income. The non-GAAP tables presented below, for noninterest income and net gains (losses) on investment securities, all exclude noncontrolling interests. We believe these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide

meaningful supplemental information regarding our performance by excluding certain items that represent income attributable to investors other than us and our subsidiaries. Additionally, for 2010, we have also excluded the gains from sales of available-for-sale securities from our non-GAAP noninterest income. Our management uses, and believes that investors benefit from referring to, these non-GAAP financial measures in assessing our operating results and when planning, forecasting and analyzing future periods.

Table of Contents

However, these non-GAAP financial measures should be considered in addition to, not as a substitute for or preferable to, financial measures prepared in accordance with GAAP.

The following table provides a summary of non-GAAP noninterest income, net of noncontrolling interests:

Non-GAAP noninterest income, net of noncontrolling interests (Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change

Gains (Losses) on Investment Securities, Net

Net gains (losses) on investment securities include both gains (losses) from our non-marketable and marketable securities, as well as gains from sales from our available-for-sale securities portfolio.

Our available-for-sale portfolio is managed to maximize portfolio yield over the long-term in a manner consistent with our liquidity, credit diversification, and asset/liability strategies. Though infrequent, the sale of investments from our available-for-sale portfolio results in net gains (losses) on investment securities.

We experience variability in the performance of our non-marketable and marketable private equity and venture capital investments from quarter to quarter, which results in net gains (losses) on investment securities. This variability is due to a number of factors, including changes in the values of our investments, changes in the amount of distributions or liquidity events and general economic and market conditions. Such variability may lead to volatility in the gains (losses) from investment securities and as such our results for a particular period are not indicative of our performance in a future period. Throughout 2009, as a result of the economic downturn, the valuations of our investments were affected by a more challenging venture capital environment and a significant slowdown of merger and acquisition (M&A) activities and initial public offerings (IPOs) among our portfolio companies. In the first three quarters of 2010, we saw some improvement in venture capital investment levels and increased M&A and IPO activity among these portfolio companies.

The following table provides a summary of non-GAAP net gains (losses) on investment securities, net of noncontrolling interests:

Non-GAAP net gains (losses) on investment securities, net of noncontrolling interests (Dollars in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
GAAP net gains (losses) on investment securities	\$ 46,611	\$ 3,905	\$ 67,420	\$ (37,890)
Less: gains on sales of available-for-sale securities	23,605		24,699	
Net gains (losses) on investment securities excluding gains on sales of available-for-sale securities	23,006	3,905	42,721	(37,890)

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Less: income (losses) attributable to noncontrolling interests, including carried interest	16,817	4,880	33,159	(32,491)
Non-GAAP net gains (losses) on investment securities, net of noncontrolling interests	\$ 6,189	\$ (975)	\$ 9,562	\$ (5,399)

The net gains of \$46.6 million for the three months ended September 30, 2010 were due to the following:

Net gains of \$23.6 million from our available-for-sale securities resulting from the sale of \$492.9 million of securities. These securities included \$304.0 million of agency-issued mortgage-backed securities and \$188.9 million of fixed rate agency-issued collateralized mortgage obligations. Securities sold were comprised primarily of smaller-dollar value positions. These sales were consistent with our ongoing efforts to efficiently manage our available liquid resources and mitigate duration risk of the portfolio.

Net gains of \$23.0 million from our non-marketable and marketable securities, primarily due to \$19.5 million of unrealized gains from valuation adjustments primarily related to our managed co-investment funds and managed funds of funds. In addition, our managed funds of funds recorded realized gains of \$6.5 million from distributions, which were partially offset by realized losses of \$3.7 million from our managed co-investment funds primarily related to acquisitions of two portfolio companies. The \$3.7 million of realized losses were reclassifications of previously recorded unrealized losses.

Table of Contents

The net gains of \$67.4 million for the nine months ended September 30, 2010 were due to the following:

Net gains of \$42.9 million from our non-marketable and marketable securities, primarily due to \$31.5 million of unrealized gains primarily from valuation adjustments related to our managed co-investment funds and managed funds of funds. In addition, our managed funds of funds recorded realized gains of \$14.3 million from distributions, which were partially offset by realized losses of \$4.2 million from our managed co-investment funds primarily related to acquisitions of portfolio companies. The \$4.2 million of realized losses were reclassifications of previously recorded unrealized losses.

Net gains of \$24.5 million from our available-for-sale securities resulting primarily from the sale of \$650.8 million of securities. These securities included \$304.0 million of agency-issued mortgage-backed securities, \$188.9 million of fixed rate agency-issued collateralized mortgage obligations, non-agency residential and commercial mortgage-backed securities of \$123.3 million and agency-issued collateralized mortgage obligations of \$34.6 million.

Foreign Exchange Fees

Foreign exchange fees were \$9.1 million and \$26.2 million for the three and nine months ended September 30, 2010, respectively, compared to \$7.5 million and \$22.6 million for the comparable 2009 periods. The increases were primarily due to improving business conditions for our clients, which has resulted in higher commissioned notional volumes. Commissioned notional volumes were \$1.9 billion and \$4.7 billion for the three and nine months ended September 30, 2010, respectively, compared to \$1.3 billion and \$3.4 billion for the comparable 2009 periods.

Deposit Service Charges

Deposit service charges were \$7.3 million and \$22.3 million for the three and nine months ended September 30, 2010, respectively, compared to \$6.9 million and \$20.3 million for the comparable 2009 periods. The increases were primarily due to a decrease in the earnings credit received by clients due to decreases in short-term market interest rates.

Client Investment Fees

Client investment fees were \$4.7 million and \$13.6 million for the three and nine months ended September 30, 2010, respectively, compared to \$5.5 million and \$17.4 million for the comparable 2009 periods. The decreases were primarily attributable to lower margins earned on certain products owing to historically low rates in the short-term fixed income markets, as well as a decrease in average client investment funds for the nine month period. The decreases in average client investment funds were primarily due to our clients' desire to maintain short term liquidity provided by on balance sheet deposit accounts rather than invest in other options available in the current low interest rate environment. The following table summarizes average client investment funds for the three and nine months ended September 30, 2010 and 2009, respectively:

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

(Dollars in millions)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Client directed investment assets (1)	\$ 9,171	\$ 10,644	(13.8)%	\$ 9,300	\$ 11,109	(16.3)%
Client investment assets under management	6,803	5,477	24.2	6,215	5,574	11.5
Sweep money market funds					75	(100.0)
Total average client investment funds (2)	\$ 15,974	\$ 16,121	(0.9)	\$ 15,515	\$ 16,758	(7.4)

(1) Mutual funds and Repurchase Agreement Program assets.

(2) Client investment funds are maintained at third-party financial institutions.

Period-end total client investment funds were \$16.1 billion at September 30, 2010, compared to \$15.6 billion at December 31, 2009. The increase was primarily due to an increase in client investment assets under management, mainly attributable to our success in obtaining a higher percentage of technology and life science IPO proceeds, secondary public offerings and private company financing rounds in a financing environment that showed early signs of improvement in the latter half of 2010.

Table of Contents*Credit Card Fees*

Credit card fees were \$3.1 million and \$8.9 million for the three and nine months ended September 30, 2010, respectively, compared to \$2.3 million and \$6.7 million for the comparable 2009 periods. The increases were primarily due to the addition of new clients and an increase in client activity.

Gains (Losses) on Derivative Instruments, Net

A summary of gains (losses) on derivative instruments, net, for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
(Losses) gains on foreign exchange forward contracts, net:						
Gains on client foreign exchange forward contracts, net (1)	\$ 131	\$ 360	(63.6)%	\$ 750	\$ 1,304	(42.5)%
(Losses) gains on internal foreign exchange forward contracts, net (2)	(2,698)	(128)	NM	680	(2,664)	(125.5)
Total (losses) gains on foreign exchange forward contracts, net	(2,567)	232	NM	1,430	(1,360)	NM
Change in fair value of interest rate swap					(170)	(100.0)
Change in fair value of other derivatives	62		NM	62		NM
Equity warrant assets: (3)						
Gains (losses) on exercise, net	3,462	(506)	NM	5,099	(338)	NM
Change in fair value:						
Cancellations and expirations	(513)	(1,170)	(56.2)	(3,039)	(3,644)	(16.6)
Other changes in fair value	813	354	129.7	1,013	3,389	(70.1)
Total net gains (losses) on equity warrant assets (4)	3,762	(1,322)	NM	3,073	(593)	NM
Total gains (losses) on derivative instruments, net	\$ 1,257	\$ (1,090)	NM	\$ 4,565	\$ (2,123)	NM

NM- Not meaningful

- (1) Represents the net gains for foreign exchange forward contracts executed on behalf of clients.
- (2) Represents the change in the fair value of foreign exchange forward contracts used to economically reduce our foreign exchange exposure risk related to certain foreign currency denominated loans. Revaluations of foreign currency denominated loans are recorded in the line item Other as part of noninterest income, a component of consolidated net income.
- (3) At September 30, 2010, we held warrants in 1,158 companies, compared to 1,250 companies at September 30, 2009.
- (4) Includes net gains on equity warrant assets held by consolidated investment affiliates. Relevant amounts attributable to noncontrolling interests are reflected in the interim consolidated statements of income under the caption Net (Income) Loss Attributable to Noncontrolling Interests.

Net gains on derivative instruments were \$1.3 million for the three months ended September 30, 2010, compared to net losses of \$1.1 million for the comparable 2009 period. The increase of \$2.4 million was primarily attributable to the following:

Net gains on equity warrant assets of \$3.8 million for the three months ended September 30, 2010, compared to net losses of \$1.3 million for the comparable 2009 period. The net gains of \$3.8 million for the three months ended September 30, 2010 were primarily driven by net gains of \$3.5 million from the exercise of certain warrant positions and net gains of \$0.8 million from valuation increases in our warrant portfolio, partially offset by losses of \$0.5 million from warrant cancellations and expirations.

Net losses of \$2.7 million from foreign exchange forward contracts hedging our foreign currency denominated loans in the third quarter of 2010, compared to net losses of \$0.1 million for the comparable 2009 period. The net losses of \$2.7 million in the third quarter of 2010 were primarily due to the weakening of the U.S. dollar against the Pound Sterling and Euro, and were partially offset by net gains of \$2.9 million from revaluation of foreign currency denominated loans that are included in the line item "Other" as part of noninterest income.

Net gains on derivative instruments were \$4.6 million for the nine months ended September 30, 2010, compared to net losses of \$2.1 million for the comparable 2009 period. The increase of \$6.7 million was primarily attributable to the following:

Net gains on equity warrant assets of \$3.1 million for the nine months ended September 30, 2010, compared to net losses of \$0.6 million for the comparable 2009 period. The net gains of \$3.1 million for the nine months ended September 30, 2010 were primarily driven by net gains of \$5.1 million from the exercise of certain warrant positions and net gains of \$1.0 million from valuation increases in our warrant portfolio, partially offset by losses of \$3.0 million from warrant cancellations and expirations.

Net gains from foreign exchange forward contracts hedging our foreign currency denominated loans of \$0.7 million, compared to net losses of \$2.7 million for the comparable 2009 period. The net gains of \$0.7 million for the nine months ended September 30, 2010 were primarily due to the strengthening of the U.S. dollar against the Pound Sterling and Euro.

Table of Contents

These gains were partially offset by net losses of \$0.1 million from revaluation of foreign currency denominated loans that are included in the line item *Other* as part of noninterest income.

Other Noninterest Income

A summary of other noninterest income for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Fund management fees	\$ 2,702	\$ 2,437	10.9	\$ 8,098	\$ 7,625	6.2%
Service-based fee income (1)	1,894	1,700	11.4	6,512	5,645	15.4
Unused commitment fees	1,352	906	49.2	3,959	2,465	60.6
Currency revaluation gains	661	275	140.4	987	383	157.7
Gains (losses) on foreign currency loans revaluation, net	2,871	(94)	NM	(75)	1,886	(104.0)
Other	1,901	1,025	85.5	5,426	3,826	41.8
Total other noninterest income	\$ 11,381	\$ 6,249	82.1	\$ 24,907	\$ 21,830	14.1

NM-Not meaningful

(1) Includes income from SVB Analytics and its subsidiary, eProsper.

Other noninterest income was \$11.4 million and \$24.9 million for the three and nine months ended September 30, 2010, respectively, compared to \$6.2 million and \$21.8 million for the comparable 2009 periods. The increase of \$5.2 million for the three months ended September 30, 2010, compared to the comparable 2009 period was primarily due to revaluations of foreign currency denominated loans. Net gains from revaluation of foreign currency denominated loans of \$2.9 million for the three months ended September 30, 2010 were primarily due to the weakening of the U.S. dollar against the Pound Sterling and Euro and were partially offset by net losses of \$2.7 million from foreign exchange forward contracts, which we use to hedge the risk of our foreign currency denominated loans and are included in net gains (losses) on derivative instruments.

Noninterest Expense

A summary of noninterest expense for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Compensation and benefits	\$ 62,170	\$ 45,815	35.7%	\$ 181,993	\$ 141,042	29.0%
Professional services	12,618	12,109	4.2	37,358	35,452	5.4

NM- Not meaningful

Table of Contents

We use and report non-GAAP noninterest expense and a non-GAAP operating efficiency ratio, which excludes noncontrolling interests. We believe these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide meaningful supplemental information regarding our performance by: (i) excluding certain items that represent expense attributable to investors other than us and our subsidiaries, or certain items that do not occur every reporting period; or (ii) providing additional information used by management that is not otherwise required by GAAP or other applicable requirement. Our management uses, and believes that investors benefit from referring to, these non-GAAP financial measures in assessing our operating results and when planning, forecasting and analyzing future periods. However, these non-GAAP financial measures should be considered in addition to, not as a substitute for or preferable to, financial measures prepared in accordance with GAAP. The table below provides a summary of non-GAAP noninterest expense and non-GAAP operating efficiency ratio, both net of noncontrolling interests:

	Three months ended September 30,			Nine months ended September 30,		
Non-GAAP operating efficiency ratio, net of noncontrolling interests						
(Dollars in thousands, except ratios)	2010	2009	% Change	2010	2009	% Change
GAAP noninterest expense	\$ 104,171	\$ 79,807	30.5%	\$ 306,927	\$ 255,959	19.9%
Less: amounts attributable to noncontrolling interests	2,939	2,872	2.3	9,050	9,107	(0.6)
Less: impairment of goodwill					4,092	(100.0)
Non-GAAP noninterest expense, net of noncontrolling interests	\$ 101,232	\$ 76,935	31.6	\$ 297,877	\$ 242,760	22.7
GAAP taxable equivalent net interest income	\$ 106,851	\$ 97,360	9.7	\$ 315,161	\$ 281,678	11.9
Less: (losses) attributable to noncontrolling interests	2	1	100.0	20	(29)	(169.0)
Non-GAAP taxable equivalent net interest income, net of noncontrolling interests	106,849	97,359	9.7	315,141	281,707	11.9
Non-GAAP noninterest income, net of noncontrolling interests (1)	45,042	29,190	54.3	116,566	88,573	31.6
Non-GAAP taxable equivalent revenue, net of noncontrolling interests	\$ 151,891	\$ 126,549	20.0	\$ 431,707	\$ 370,280	16.6
Non-GAAP operating efficiency ratio (2)	66.65%	60.79%	9.6	69.00%	65.56%	5.2

(1) See Noninterest Income above for a description and reconciliation of non-GAAP noninterest income.

(2) The non-GAAP operating efficiency ratio is calculated by dividing non-GAAP noninterest expense by non-GAAP total taxable-equivalent income.

Compensation and Benefits

Compensation and benefits expense was \$62.2 million for the three months ended September 30, 2010, compared to \$45.8 million for the comparable 2009 period. The increase of \$16.4 million was primarily due to an increase of \$10.3 million in incentive compensation and ESOP expenses and an increase of \$2.9 million in salaries and wages expense.

Compensation and benefits expense was \$182.0 million for the nine months ended September 30, 2010, compared to \$141.0 million for the comparable 2009 period. The increase of \$41.0 million was primarily due to an increase of \$29.0 million in incentive compensation and ESOP expenses and an increase of \$4.8 million in salaries and wages expense.

Incentive compensation and ESOP expenses for the first three quarters of 2010 reflect our current expectation that we will achieve our internal performance targets for 2010 as compared to our 2009 incentive compensation levels, which were at half of target levels as we did not achieve all of our internal performance targets for 2009. In addition to lower incentive compensation levels, no ESOP expenses or company-wide merit increases were recorded in 2009. The increases in salaries and wages expense were primarily due to an increase in the average number of FTE

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

employees, as well as from merit increases in the first quarter of 2010. Average FTE s increased to 1,321 and 1,289 for the three and nine months ended September 30, 2010, respectively, compared to 1,262 and 1,260 for the comparable 2009 periods. This increase was to support our continued investment in growth initiatives and related infrastructure support.

Our variable compensation plans primarily consist of the Incentive Compensation Plan, Direct Drive Incentive Compensation Plan, Long-Term Cash Incentive Plan, 401(k) and ESOP Plan, Retention Program and Warrant Incentive Plan. Total costs incurred under these plans were \$17.7 million and \$51.9 million for the three and nine months ended September 30, 2010, respectively, compared to \$8.0 million and \$22.4 million for the comparable 2009 periods. These amounts are included in total compensation and benefits expense discussed above.

Business Development and Travel

Business development and travel expense was \$5.2 million and \$14.5 million for the three and nine months ended September 30,

2010, respectively, compared to \$2.9 million and \$9.6 million for the comparable 2009 periods. The increases were primarily reflective of our increased focus on global initiatives and increased activity due to improving economic and business conditions.

Federal Deposit Insurance Corporation (FDIC) Assessments

FDIC assessments were \$2.6 million and \$13.3 million for the three and nine months ended September 30, 2010, respectively, compared to \$2.6 million and \$13.9 million for the comparable 2009 periods. The decrease for the nine month period was primarily due to a special assessment fee of \$5.0 million in the second quarter of 2009, partially offset by an increase in average deposit balances and an increase in FDIC assessment rates in 2010. Our FDIC assessment expense for future periods may be impacted by requirements adopted under the Dodd-Frank Wall Street Reform and Consumer Protection Act, which includes, among other things, the extension of unlimited deposit insurance coverage on non-interest bearing demand accounts for two years beginning December 31, 2010 for all insured depository institutions.

Table of Contents

Provision for (Reduction of) Unfunded Credit Commitments

We calculate changes to our provision for unfunded credit commitments based on the credit commitments outstanding, as well as the credit quality of our loan commitments. We recorded a provision for unfunded credit commitments of \$1.7 million for the three months ended September 30, 2010, compared to a provision of \$0.1 million for the comparable 2009 period. The provision for unfunded credit commitments of \$1.7 million for the three months ended September 30, 2010 is a function of the increase in our total unfunded credit commitments balance, the composition of commitments and the application of our reserve methodology to our unfunded loan portfolio. Total unfunded credit commitments balance increased to \$5.9 billion as of September 30, 2010, compared to \$5.3 billion as of June 30, 2010.

We recorded a provision for unfunded credit commitments of \$2.6 million for the nine months ended September 30, 2010, compared to a reduction of provision of \$3.4 million for the comparable 2009 period. The provision for unfunded credit commitments of \$2.6 million for the nine months ended September 30, 2010 is a function of the increase in our total unfunded credit commitments balance, the composition of commitments and the application of the reserve methodology to our unfunded loan portfolio. Total unfunded credit commitments balance increased to \$5.9 billion as of September 30, 2010, compared to \$5.3 billion as of December 31, 2009.

Impairment of Goodwill

There was no goodwill on our balance sheet as of September 30, 2010. We recognized a non-cash non-tax deductible goodwill impairment charge of \$4.1 million in the first quarter of 2009 related to eProsper, which represented 100% of the remaining goodwill.

Other Noninterest Expense

A summary of other noninterest expense for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Telephone	\$ 1,208	\$ 325	NM%	\$ 3,438	\$ 3,042	13.0%
Tax credit fund amortization	1,050	1,165	(9.9)	3,107	3,458	(10.2)

Dues and publications	444	325	36.6	1,093	1,266	(13.7)
Other	3,070	1,469	109.0	8,660	7,479	15.8
Total other noninterest expense	\$ 6,994	\$ 4,119	69.8	\$ 19,949	\$ 18,975	5.1

NM- Not meaningful

Net (Income) Loss Attributable to Noncontrolling Interests

Included in net income (loss) is income and expense attributable to noncontrolling interests. The relevant amounts attributable to investors other than us are reflected under *Net (Income) Loss Attributable to Noncontrolling Interests* on our statements of income.

In the table below, noninterest (income) loss consists of investment gains and losses from our consolidated funds, currency revaluation gains (losses) from our managed funds and gains or losses recognized from the exercise of warrants held by one of our sponsored debt funds. Noninterest expense is primarily related to management fees paid by our managed funds to the Company's subsidiaries as the general partner and to one of our consolidated sponsored debt funds for management of the funds. A summary of net (income) loss attributable to noncontrolling interests for the three and nine months ended September 30, 2010 and 2009, respectively, is as follows:

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Net interest (income) loss (1)	\$ (2)	\$ (1)	100.0%	\$ (20)	\$ 29	(169.0)%
Noninterest (income) loss (1)	(17,922)	(5,114)	NM	(35,668)	32,946	NM
Noninterest expense (1)	2,939	2,872	2.3	9,050	9,107	(0.6)
Carried interest (2)	333	(3)	NM	1,267	(1,374)	(192.2)
Net (income) loss attributable to noncontrolling interests	\$ (14,652)	\$ (2,246)	NM	\$ (25,371)	\$ 40,708	(162.3)

NM- Not meaningful

- (1) Represents noncontrolling interests share in net interest income, noninterest income and noninterest expense.
- (2) Represents the change in the preferred allocation of income we earn as general partners managing our managed funds, the preferred allocation earned by the general partner entity managing one of our consolidated sponsored debt funds, and the preferred allocation earned by the limited partners of one of our managed funds of funds.

Table of Contents**Income Taxes**

Our effective tax expense rate was 39.8 percent for the three months ended September 30, 2010, compared to 41.1 percent for the comparable 2009 period. The decrease in the tax rate was primarily attributable to the effect of lower non-deductible expenses as a percentage of pre-tax income in the third quarter of 2010.

Our effective tax expense rate was 39.4 percent for the nine months ended September 30, 2010, compared to 44.2 percent for the comparable 2009 period. The decrease in the tax rate was primarily attributable to the effect of lower non-deductible expenses as a percentage of pre-tax income for the nine months ended September 30, 2010, and the effect of the \$4.1 million goodwill impairment charge associated with eProsper in the first quarter of 2009.

Our effective tax rate is calculated by dividing income tax expense by the sum of income before income tax expense and the net (income) loss attributable to noncontrolling interests.

Operating Segment Results

We have four operating segments for which we report our financial information: Global Commercial Bank, Relationship Management, SVB Capital and Other Business Services.

In accordance with ASC 280, we report segment information based on the management approach. The management approach designates the internal reporting used by management for making decisions and assessing performance as the source of our reporting segments. Please refer to Note 11- Segment Reporting of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report for additional details.

Our primary source of revenue is from net interest income, which is primarily the difference between interest earned on loans, net of funds transfer pricing (FTP), and interest paid on deposits, net of FTP. Accordingly, our segments are reported using net interest income, net of FTP. FTP is an internal measurement framework designed to assess the financial impact of a financial institution's sources and uses of funds. It is the mechanism by which an earnings credit is given for deposits raised, and an earnings charge is made for funded loans. FTP is calculated by applying a transfer rate to pooled, or aggregated, loan and deposit volumes.

We also evaluate performance based on provision for loan losses, noninterest income and noninterest expense, which are presented as components of segment operating profit or loss. In calculating each operating segment's noninterest expense, we consider the direct costs incurred by the operating segment as well as certain allocated direct costs. As part of this review, we allocate certain corporate overhead costs to a corporate account. We do not allocate income taxes to our segments. Additionally, our management reporting model is predicated on average asset balances; therefore, period-end asset balances are not presented for segment reporting purposes. Changes in an individual client's primary relationship designation have resulted, and in the future may result, in the inclusion of certain clients in different segments in different periods.

The following is our segment information for the three and nine months ended September 30, 2010 and 2009, respectively.

Global Commercial Bank

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Net interest income	\$ 84,775	\$ 88,596	(4.3)%	\$ 253,044	\$ 273,957	(7.6)%
Provision for loan losses	(8,376)	(3,153)	165.7	(25,856)	(60,862)	(57.5)
Noninterest income	31,399	27,025	16.2	89,123	80,686	10.5
Noninterest expense	(58,706)	(42,715)	37.4	(171,037)	(131,636)	29.9
Income before income tax expense	\$ 49,092	\$ 69,753	(29.6)	\$ 145,274	\$ 162,145	(10.4)
Total average loans, net of unearned income	\$ 3,485,505	\$ 3,576,973	(2.6)	\$ 3,280,358	\$ 3,822,200	(14.2)

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Total average assets	3,749,453	3,697,379	1.4	3,551,018	3,932,869	(9.7)
Total average deposits	11,762,637	8,757,704	34.3	11,420,631	8,265,536	38.2
<i>Three months ended September 30, 2010 compared to the three months ended September 30, 2009</i>						

Net interest income from our Global Commercial Bank (GCB) decreased by \$3.8 million for the three months ended September 30, 2010, primarily due to (1) a decrease in the FTP earned for deposits due to decreases in market interest rates and (2) a decrease in interest income resulting from a decrease of \$91.5 million in average loan balances. These decreases were partially offset by an increase in the FTP earned for deposits due to significant deposit growth.

Table of Contents

The provision for loan losses for GCB was \$8.4 million for the three months ended September 30, 2010, an increase of \$5.2 million compared to the comparable 2009 period. The provision for loan losses of \$8.4 million for the three months ended September 30, 2010 was primarily attributable to increases in period-end loan balances, as well as net charge-offs primarily from our life science and software client portfolios.

Noninterest income increased by \$4.4 million for the three months ended September 30, 2010, primarily due to an increase in foreign exchange fees and credit card fees. The increase in foreign exchange fees was primarily due to improving business conditions for our clients, which has resulted in higher commissioned notional volumes. Commissioned notional volumes increased to \$1.9 billion for the three months ended September 30, 2010, compared to \$1.3 billion for the comparable 2009 period. The increase in credit card fees was primarily due to the addition of new clients and an increase in client activity.

Noninterest expense increased by \$16.0 million for the three months ended September 30, 2010, primarily due to an increase in compensation and benefits expense of \$15.3 million. The increase in compensation and benefits expense was attributable to an increase in incentive compensation, ESOP, and salaries and wages expenses. Incentive compensation and ESOP expenses for the third quarter 2010 reflect our current expectation that we will achieve our internal performance targets for 2010 as compared to our 2009 incentive compensation levels, which were at half of target levels as we did not achieve all of our internal performance targets for 2009. The increase in salaries and wages was primarily due to the increase in the average number of FTE employees at GCB, which increased to 860 for the three months ended September 30, 2010, compared to 811 for the comparable 2009 period. The increase in average FTEs was attributable to increases in positions for product development, operational, sales and advisory, as well as to support our global commercial banking operations and initiatives.

Nine months ended September 30, 2010 compared to the nine months ended September 30, 2009

Net interest income from our GCB decreased by \$20.9 million for the nine months ended September 30, 2010, primarily due to a decrease in interest income resulting from a decrease in average loan balances, which decreased by \$541.8 million to \$3.3 billion, and a decrease in the FTP earned for deposits due to decreases in market interest rates. These decreases were partially offset by an increase in the FTP earned for deposits due to significant deposit growth.

The provision for loan losses for GCB was \$25.9 million for the nine months ended September 30, 2010, a decrease of \$35.0 million compared to the comparable 2009 period. The provision for loan losses of \$25.9 million for the nine months ended September 30, 2010 was primarily attributable to gross charge-offs from our life science, hardware and software client portfolios, partially offset by loan recoveries primarily from our software and life science client portfolios. The higher provision for loan losses for the nine months ended September 30, 2009 was primarily due to higher net charge-offs primarily from our software, venture capital/private equity and hardware industry portfolios.

Noninterest income increased by \$8.4 million for the nine months ended September 30, 2010, primarily due to an increase in foreign exchange fees, credit card fees, and deposit service charges, partially offset by a decrease in client investment fees. The increase in foreign exchange fees was primarily due to improving business conditions for our clients, which has resulted in higher commissioned notional volumes. Commissioned notional volumes increased to \$4.7 billion for the nine months ended September 30, 2010, compared to \$3.4 billion for the comparable 2009 period. The increase in credit card fees was primarily due to the addition of new clients and an increase in client activity. The increase in deposit service charges was primarily due to a decrease in the earnings credit received by clients due to decreases in short-term market interest rates. The decrease in client investment fees was primarily attributable to lower margins earned on certain products owing to historically low rates in the short-term fixed income markets, as well as a decrease in average balances of client investment funds.

Noninterest expense increased by \$39.4 million for the nine months ended September 30, 2010, primarily due to an increase in compensation and benefits expense of \$35.7 million. The increase in compensation and benefits expense was attributable to an increase in incentive compensation, ESOP, and salaries and wages expenses. Incentive compensation and ESOP expenses for the first nine months of 2010 reflect our current expectation that we will achieve our internal performance targets for 2010 as compared to our 2009 incentive compensation levels, which were at half of target levels as we did not achieve all of our internal performance targets for 2009. The increase in salaries and wages was primarily due to the increase in the average number of FTE employees at GCB, which increased to 838 for the nine months ended September 30, 2010, compared to 803 for the comparable 2009 period, as well as from merit increases in the first quarter of 2010.

Total average deposits	176,734	146,367	20.7	193,030	155,679	24.0

Three months ended September 30, 2010 compared to the three months ended September 30, 2009

The provision for loan losses for Relationship Management was \$2.6 million for the three months ended September 30, 2010, a decrease of \$2.2 million compared to the comparable 2009 period. The decrease was primarily due to a decrease in gross charge-offs in the third quarter of 2010 compared to the comparable 2009 period.

Noninterest expense increased by \$1.8 million for the three months ended September 30, 2010, primarily due to an increase in compensation and benefits expense of \$1.4 million attributable to an increase in incentive compensation expenses.

Nine months ended September 30, 2010 compared to the nine months ended September 30, 2009

Net interest income decreased by \$0.9 million for the nine months ended September 30, 2010, primarily due to a decrease in interest income resulting from a decrease in average loan balances, particularly loans to targeted high-net-worth individuals, and a decrease in the FTP earned for deposits due to decreases in market interest rates. These decreases were partially offset by an increase in the FTP earned for deposits due to deposit growth.

The provision for loan losses for Relationship Management was \$3.2 million for the nine months ended September 30, 2010, a decrease of \$8.8 million compared to the comparable 2009 period. The decrease was primarily due to a decrease in gross charge-offs for the nine months ended September 30, 2010 compared to the comparable 2009 period.

Noninterest expense increased by \$4.6 million for the nine months ended September 30, 2010, primarily due to an increase in compensation and benefits expense of \$3.8 million attributable to an increase in incentive compensation expenses.

SVB Capital

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Net interest loss	\$	\$ (10)	(100.0)%	\$ (1)	\$ (13)	(92.3)%

NM- Not meaningful

SVB Capital's components of noninterest income primarily include net gains and losses on marketable and non-marketable securities, preferred allocations and fund management fees, all net of noncontrolling interests. When we refer to net gains and losses on marketable and non-marketable securities in the discussion below, we are referring to net gains and losses from marketable and non-marketable securities and preferred allocations, net of noncontrolling interests.

We experience variability in the performance of SVB Capital from quarter to quarter due to a number of factors, including changes in the values of our funds' investments, changes in the amount of distributions and general economic and market conditions. Such variability may lead to volatility in the gains and losses from investment securities and cause our results to differ from period to period. Results for a particular period may not be indicative of future performance. In 2009, the valuation of our consolidated investment funds was affected by a more challenging venture capital environment and a significant slowdown of M&A activities and IPOs. The net gains for the three and nine months ended September 30, 2010 were primarily due to an increase in valuations for private companies and increased IPO and M&A activities during 2010. As a result, we saw higher unrealized gains in the three and nine months ended September 30, 2010, compared to the comparable 2009 periods.

Table of Contents

Three months ended September 30, 2010 compared to the three months ended September 30, 2009

Noninterest income increased by \$3.4 million to \$6.4 million for the three months ended September 30, 2010, primarily due to net gains on investment securities for the three months ended September 30, 2010. SVB Capital's components of noninterest income primarily include the following:

Net gains on investment securities of \$3.6 million for the three months ended September 30, 2010, compared to net gains of \$0.4 million for the comparable 2009 period. The net gains on investment securities of \$3.6 million for the three months ended September 30, 2010 were primarily related to net gains of \$1.9 million from five of our managed funds of funds attributable to unrealized valuation gains and realized gains from distributions, as well as net gains of \$1.8 million from valuation adjustments and carried interest from one of our managed co-investment funds.

We received fund management fees of \$2.7 million for the three months ended September 30, 2010, compared to \$2.4 million for the comparable 2009 period. The increase in fund management fees was primarily due to additional management fees associated with closing transactions of two funds in the third quarter of 2009 and one fund in the third quarter of 2010 in the SVB Preferred Return Funds family. Typically, a fund of funds is formed through multiple closing transactions in which limited partners enter into investment commitments.

Noninterest expense decreased by \$0.6 million for the three months ended September 30, 2010, primarily due to a decrease in professional services expense. This decrease was primarily attributable to higher legal costs in 2009 relating to newly formed funds.

Nine months ended September 30, 2010 compared to the nine months ended September 30, 2009

Noninterest income increased by \$11.3 million to \$14.3 million for the nine months ended September 30, 2010, primarily due to higher net gains on investment securities for the nine months ended September 30, 2010. SVB Capital's components of noninterest income primarily include the following:

Net gains on investment securities of \$6.0 million for the nine months ended September 30, 2010, compared to net losses of \$4.7 million for the comparable 2009 period. The net gains on investment securities of \$6.0 million for the nine months ended September 30, 2010 were primarily related to net gains of \$4.0 million from five of our managed funds of funds attributable to unrealized valuation gains and realized gains from distributions, as well as net gains of \$2.2 million from valuation adjustments and carried interest from one of our managed co-investment funds.

We received fund management fees of \$8.1 million for the nine months ended September 30, 2010, compared to \$7.6 million for the comparable 2009 period.

Other Business Services

Our Other Business Services group is comprised of SVB Analytics, as well as our Sponsored Debt Funds & Strategic Investments.

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,

NM- Not meaningful

Three months ended September 30, 2010 compared to the three months ended September 30, 2009

Noninterest income increased by \$3.0 million, primarily due to the following:

Net gains on investment securities of \$1.3 million for the three months ended September 30, 2010, compared to net losses of \$1.4 million for the comparable 2009 period. Net gains on investment securities of \$1.3 million for the three months ended September 30, 2010 were due to net gains of \$1.5 million primarily from three of our debt fund investments mainly attributable to unrealized valuation gains and realized gains from distributions and net gains of \$0.2 million from distributions from certain strategic venture capital fund investments. These gains were partially offset by net losses of \$0.5 million due to other-than-temporary impairment of certain strategic venture capital investments.

Noninterest expense increased by \$0.8 million for the three months ended September 30, 2010, primarily due to an increase in compensation and benefits expense at SVB Analytics attributable to an increase in incentive compensation and ESOP expenses.

Nine months ended September 30, 2010 compared to the nine months ended September 30, 2009

Noninterest income increased by \$4.2 million, primarily due to net gains on investment securities from our Sponsored Debt Funds & Strategic Investments, as well as an increase in SVB Analytics revenues. Other Business Services components of noninterest income primarily include the following:

Net gains on investment securities of \$2.2 million for the nine months ended September 30, 2010, compared to net losses of \$0.7 million for the comparable 2009 period. The net gains on investment securities of \$2.2 million for the nine months ended September 30, 2010 were due to net gains of \$2.4 million primarily from three of our debt fund investments attributable to unrealized valuation gains and realized gains from distributions, net gains of \$0.7 million from distributions from certain strategic venture capital fund investments, and net gains of \$0.5 million from one of our direct equity investments in a privately held company. These gains were partially offset by net losses of \$1.5 million due to other-than-temporary impairment of certain strategic venture capital investments.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Net gains from currency revaluation adjustments of \$0.6 million for the nine months ended September 30, 2010 related to one of our debt funds.

An increase in SVB Analytics' revenues to \$5.7 million for the nine months ended September 30, 2010, compared to \$5.0 million for the comparable 2009 period, primarily as a result of an increase in the number of valuations performed for clients, partially offset by a reduction in the average fee earned per valuation.

Noninterest expense decreased by \$2.2 million for the nine months ended September 30, 2010, primarily due to a non-tax deductible charge of \$4.1 million related to impairment of goodwill recognized in the first quarter of 2009 resulting from changes in our outlook for eProsper's future financial performance. This decrease was partially offset by an increase in compensation and benefits expense at SVB Analytics, attributable to an increase in incentive compensation and ESOP expenses, as well as an increase in salaries and wages expense as a result of merit increases in the first quarter of 2010.

Consolidated Financial Condition

Our total assets were \$15.7 billion at September 30, 2010, an increase of \$2.9 billion, or 21.9 percent, compared to \$12.8 billion at December 31, 2009. The increase was primarily due to increases in available-for-sale securities due to our deposit growth.

Table of Contents

Cash and Due from Banks

Cash and due from banks totaled \$3.4 billion at September 30, 2010, a decrease of \$67.4 million, or 2.0 percent, compared to \$3.5 billion at December 31, 2009. The decrease was primarily due to the investment of excess cash previously held at the Federal Reserve Bank into available-for-sale securities, partially offset by increases in cash from deposit growth. As of September 30, 2010 and December 31, 2009, \$2.9 billion and \$3.1 billion, respectively, of our cash and due from banks was deposited at the Federal Reserve Bank and was earning interest at the Federal Funds target rate, and interest-earning deposits in other financial institutions were \$261.0 million and \$171.6 million, respectively.

Federal Funds Sold, Securities Purchased Under Agreements to Resell and Other Short-Term Investments

Federal funds sold, securities purchased under agreements to resell and other short-term investments were \$391.2 million at September 30, 2010, an increase of \$333.0 million compared to \$58.2 million at December 31, 2009. The increase was primarily due to the investment of net proceeds of \$344.3 million from our issuance of 5.375% senior notes in September 2010. These proceeds were invested in short-term agency discount notes.

Investment Securities

Investment securities totaled \$6.7 billion at September 30, 2010, an increase of \$2.2 billion, or 48.3 percent, compared to \$4.5 billion at December 31, 2009. The increase was primarily related to purchases of variable rate agency-issued collateralized mortgage obligations and U.S. agency debentures, which were purchased with the excess cash from our continued deposit growth.

Our investment securities portfolio consists of both an available-for-sale securities portfolio, which represents interest-earning investment securities, and a non-marketable securities portfolio, which primarily represents investments managed as part of our funds management business.

Available-for-Sale Securities

Our available-for-sale portfolio is managed to maximize portfolio yield over the long-term in a manner consistent with our liquidity, credit diversification, and asset/liability strategies. Available-for-sale securities were \$6.0 billion at September 30, 2010, an increase of \$2.1 billion, or 52.4 percent, compared to \$3.9 billion at December 31, 2009. The increase was primarily due to a \$2.0 billion increase in variable rate agency-issued collateralized mortgage obligations and an \$830.0 million increase in U.S. agency debentures, partially offset by a \$380.4 million decrease in fixed rate agency-issued collateralized mortgage obligations and a \$226.8 million decrease in agency-issued mortgage-backed securities.

Portfolio duration is a standard measure used to approximate changes in the market value of fixed income instruments due to a change in market interest rates. The measure is an estimate based on the level of current market interest rates, expectations for changes in the path of forward rates and the effect of forward rates on mortgage prepayment speed assumptions and will fluctuate with changes in market interest rates. Changes in portfolio duration are also impacted by changes in the mix of longer versus shorter term-to-maturity securities. At September 30, 2010, estimated portfolio duration was 1.1 years, compared to 2.3 years at December 31, 2009. The decrease is due, in part to the purchase of \$2.0 billion in variable-rate agency issued collateralized mortgage obligations during the second and third quarters of 2010. The decrease in long-term market rates through the third quarter of 2010 also had a substantial impact on the duration of fixed-rate mortgage securities and callable notes. A general decrease in market interest rates increases the likelihood that mortgage prepayments will increase and that callable notes will, in fact, be called. The result of the interest rate effect is a contraction in portfolio duration.

Non-Marketable Securities

Non-marketable securities primarily represent investments managed by SVB Capital and investments in Sponsored Debt Funds & Strategic Investments as part of our investment funds management business and include funds of funds, co-investment funds and debt funds, as well as direct equity investments in portfolio companies and fund investments. Included in our non-marketable securities carried under investment company fair value accounting are amounts that are attributable to noncontrolling interests. We are required under GAAP to consolidate 100% of these investments that we are deemed to control, even though we may own less than 100% of such entities. Non-marketable securities of \$656.1 million (\$280.1 million net of noncontrolling interests) as of September 30, 2010, increased by \$102.6 million or 18.5 percent, from \$553.5 million (\$233.0 million net of noncontrolling interests) as of December 31, 2009. The increase was primarily attributable to additional capital calls for fund investments, as well as from unrealized gains from our non-marketable securities.

Table of Contents**Loans**

Loans, net of unearned income were \$4.9 billion at September 30, 2010, an increase of \$311.1 million, or 6.8 percent, compared to \$4.5 billion at December 31, 2009. Unearned income was \$40.9 million at September 30, 2010, compared to \$34.9 million at December 31, 2009. The majority of our loans are commercial in nature. Total gross loans were \$4.9 billion at September 30, 2010, an increase of \$317.2 million, or 6.9 percent, compared to \$4.6 billion at December 31, 2009. The increase was primarily due to increases in loans to software industry clients. The breakdown of total gross loans and total loans as a percentage of gross loans by category is as follows:

(Dollars in thousands)	September 30, 2010		December 31, 2009	
	Amount	Percentage	Amount	Percentage
Commercial loans:				
Software	\$ 1,618,840	33.0%	\$ 1,394,848	30.4%

Total gross loans	\$ 1,991,961	\$ 837,077	\$ 961,211	\$ 561,342	\$ 548,538	\$ 4,900,129

- (1) Premium Wine clients can have loan balances included in both commercial loans and real estate secured loans, the total of which are used for the breakout of the above categories.
- (2) Consumer loan clients have loan balances included in both real estate secured loans and other consumer loans, the total of which are used for the breakout of the above categories.

At September 30, 2010, gross loans (individually or in the aggregate) totaling \$1.1 billion, or 22.7 percent of our portfolio, were equal to or greater than \$20 million to any single client. These loans represented 36 clients, and of these loans, \$20.1 million were on nonaccrual status as of September 30, 2010.

Table of Contents

The following table provides a summary of loans by size and category. The breakout of the categories is based on total client balances (individually or in the aggregate) as of December 31, 2009:

(Dollars in thousands)	December 31, 2009					Total
	Less than Five Million	Five to Ten Million	Ten to Twenty Million	Twenty to Thirty Million	Thirty Million or More	
Commercial loans:

- (1) Premium Wine clients can have loan balances included in both commercial loans and real estate secured loans, the total of which are used for the breakout of the above categories.
- (2) Consumer loan clients have loan balances included in both real estate secured loans and other consumer loans, the total of which are used for the breakout of the above categories.

At December 31, 2009, gross loans (individually or in the aggregate) totaling \$977.6 million, or 21.3 percent of our portfolio, were equal to or greater than \$20 million to any single client. These loans represented 33 clients, and of these loans \$20.4 million were on nonaccrual status as of December 31, 2009.

The credit profile of our clients varies across our loan portfolio, based on the nature of the lending we do for different market segments. Clients across all industry segments and loan categories have been affected by the weakened economic environment in recent periods. Our technology and life sciences loan portfolio includes loans to clients at all stages of their life cycles, beginning with the early-stage, venture-backed companies. Loans provided to early-stage, venture-backed company clients represent a relatively small percentage of our portfolio at approximately 10 percent of total gross loans at September 30, 2010, compared to 11 percent at December 31, 2009. Typically these loans are made to companies with modest or negative cash flows and no established record of profitable operations. Repayment of these loans may be dependent upon receipt by borrowers of additional equity financing from venture capitalists or others, or in some cases, a successful sale to a third party or a public offering. Although we continued to see signs of improvement in the third quarter of 2010, venture capital financing activity as well as IPOs and M&A activities has slowed significantly in recent periods, owing to a weakened economic environment. Venture capital firms may provide financing at lower levels, more selectively or on less favorable terms, which may have an adverse effect on our borrowers that are otherwise dependent on such financing to repay their loans to us. When repayment is dependent upon the next round of venture investment and there is an indication that further investment is unlikely or will not occur, it is often likely the company would need to be sold to repay debt in full. If reasonable efforts have not yielded a likely buyer willing to repay all debt at the close of the sale or on commercially

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

viable terms, the account will most likely be deemed to be impaired.

At September 30, 2010, our lending to venture capital/private equity firms represented 15.4 percent of total gross loans, compared to 20.4 percent of total gross loans at December 31, 2009. Many of these clients have capital call lines of credit, the repayment of which is dependent on the payment of capital calls by the underlying limited partner investors in the funds managed by these firms.

At September 30, 2010, our asset-based lending, which consists primarily of working capital lines, and our accounts receivable factoring represented 8.3 percent and 7.2 percent, respectively, of total gross loans, compared to 7.8 percent and 6.5 percent, respectively at December 31, 2009. The repayment of these arrangements is dependent on the financial condition, and payment ability, of third parties with whom our clients do business which could be impacted.

Approximately 44.6 percent and 7.9 percent of our outstanding total gross loan balances as of September 30, 2010 were to entities based in the states of California and Massachusetts, respectively, compared to 44.9 percent and 9.0 percent, respectively, as of

December 31, 2009. Other than California, there are no states with balances greater than 10 percent.

See generally Risk Factors Credit Risks below in Item 1A of Part II.

Table of Contents***Credit Quality and Allowance for Loan Losses***

Nonperforming assets consist of loans past due 90 days or more that are still accruing interest, loans on impaired status and foreclosed property classified as Other Real Estate Owned (OREO). We measure all loans placed on impaired status for impairment based on the fair value of the underlying collateral or the net present value of the expected cash flows in accordance with ASC 310. The table below sets forth certain data and ratios between nonperforming loans, nonperforming assets and the allowance for loan losses:

(Dollars in thousands)	September 30, 2010	December 31, 2009
Gross nonperforming loans:		
Loans past due 90 days or more still accruing interest	\$	\$
Impaired loans	45,017	50,227
Total gross nonperforming loans	45,017	52,683
OREO		220
Total nonperforming assets	\$	\$
	45,017	52,903
Nonperforming loans as a percentage of total gross loans	0.92%	1.15%
Nonperforming assets as a percentage of total assets	0.29	0.41
Allowance for loan losses	\$	\$
As a percentage of total gross loans	74,369	72,450
As a percentage of total gross nonperforming loans	1.52%	1.58%
Allowance for loan losses for impaired loans	165,20	137,52
As a percentage of total gross loans	\$	\$
As a percentage of total gross nonperforming loans	6,538	8,868
Allowance for loan losses for total gross performing loans	0.13%	0.19%
As a percentage of total gross performing loans	14.52	16.83
Reserve for unfunded credit commitments (1)	\$	\$
Total gross loans	67,831	63,582
Total gross performing loans	\$	\$
Total unfunded credit commitments	1.38%	1.39%
	1.40	1.40
	\$	\$
	15,892	13,331
	4,900,129	4,582,966
	4,855,112	4,530,283
	5,892,077	5,338,726

(1) The Reserve for unfunded credit commitments is included as a component of Other Liabilities. See Provision for (Reduction of) Unfunded Credit Commitments above for a discussion of the changes to the reserve.

Impaired Loans

Included in the \$45.0 million of impaired loans at September 30, 2010 are \$24.0 million of loans modified in troubled debt restructurings (TDR s), where concessions have been granted to borrowers experiencing financial difficulties, in an attempt to maximize collection. Refer to Note 6 Loans and Allowance for Loan Losses of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report for further details. Subsequent to September 30, 2010, we received cash payments totaling \$8.9 million relating to a loan included in our impaired loan balance as of September 30, 2010. This was a paydown of the remaining loan balance and not a recovery. As such, this payment will not have an impact on our fourth quarter 2010 allowance for loan losses.

Average impaired loans for the three and nine months ended September 30, 2010 were \$45.5 million and \$48.9 million, respectively, compared to \$95.1 million and \$98.6 million for the comparable 2009 periods. If the impaired loans had not been impaired, \$0.7 million and \$2.4 million in interest income would have been recorded for the three and nine months ended September 30, 2010, respectively, compared to \$2.1 million and \$5.7 million for the comparable 2009 periods.

Table of Contents***Accrued Interest Receivable and Other Assets***

A summary of accrued interest receivable and other assets at September 30, 2010 and December 31, 2009 is as follows:

(Dollars in thousands)	September 30, 2010	December 31, 2009	% Change
Derivative assets, gross (1)	\$ 122,757	\$ 106,623	15.1%
Deferred tax assets	22,510	53,037	(57.6)
Accrued interest receivable	42,834	44,265	(3.2)
FHLB and FRB stock	38,312	38,888	(1.5)

Other assets	41,337	44,550	(7.2)
Total accrued interest receivable and other assets	\$ 395,682	\$ 329,447	20.1

NM- Not meaningful

(1) See Derivatives, Net section below.

Deferred Tax Assets

Our deferred tax assets balance was \$22.5 million at September 30, 2010, compared to \$53.0 million at December 31, 2009. The decrease was primarily due to the change in the deferred tax liability balance relating to the increase in the fair value of our available-for-sale securities portfolio. We also pay quarterly estimated taxes to the Internal Revenue Service and certain state and foreign taxing authorities.

Prepaid FDIC Assessments

In November 2009 the FDIC required insured financial institutions to prepay their estimated quarterly risk-based assessments for the 2010 through 2012 fiscal years. The decrease of \$7.7 million was due to the amortization of this prepayment for the nine months ended September 30, 2010.

Foreign Exchange Spot Contract Assets

Foreign exchange spot contract assets represent unsettled client trades at the end of the period. The increase of \$74.8 million was primarily due to increased client trade activity at period-end, and is largely offset by an increase in foreign exchange spot contract liabilities. (See Other Liabilities section below).

Marketable Securities

Marketable securities represent investments that were originally made within our non-marketable securities portfolio that have been converted into publicly-traded securities. The increase of \$19.0 million was primarily due to the IPO of one of our portfolio companies in the third quarter of 2010.

Derivatives, Net

Derivative instruments are recorded as a component of other assets and other liabilities on the balance sheet. The following table provides a summary of derivative assets (liabilities), net at September 30, 2010 and December 31, 2009:

(Dollars in thousands)	September 30, 2010	December 31, 2009	% Change
Assets (liabilities):			
Equity warrant assets	\$ 42,569	\$ 41,292	3.1%
Interest rate swaps assets	67,257	46,895	43.4
Foreign exchange forward and option contracts assets	12,657	18,436	(31.3)
Other derivatives	274		NM
Foreign exchange forward and option contracts liabilities	(13,296)	(15,870)	(16.2)
Total derivatives, net	\$ 109,461	\$ 90,753	20.6

Table of Contents*Equity Warrant Assets*

In connection with negotiating credit facilities and certain other services, we frequently obtain rights to acquire stock in the form of equity warrant assets in certain client companies. At September 30, 2010, we held warrants in 1,158 companies, compared to 1,225 companies at December 31, 2009. The change in fair value of equity warrant assets is recorded in gains on derivatives instruments, net, in noninterest income, a component of consolidated net income. The following table provides a summary of transactions and valuation changes for equity warrant assets for the three and nine months ended September 30, 2010 and 2009, respectively:

(Dollars in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Balance, beginning of period	\$ 40,597	\$ 47,704	\$ 41,292	\$ 43,659
New equity warrant assets	2,733	989	5,946	4,755
Non-cash increases in fair value	813	354	1,013	3,389
Exercised equity warrant assets	(1,061)	(5,431)	(2,643)	(5,800)
Terminated equity warrant assets	(513)	(1,170)	(3,039)	(3,557)
Balance, end of period	\$ 42,569	\$ 42,446	\$ 42,569	\$ 42,446

Interest Rate Swaps

For information on our interest rate swaps, see Note 9- Derivative Financial Instruments of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report.

Foreign Exchange Forward and Foreign Currency Option Contracts

We enter into foreign exchange forward contracts and foreign currency option contracts with clients involved in international activities, either as the purchaser or seller, depending upon the clients' need. For each forward or option contract entered into with our clients, we enter into an opposite way forward or option contract with a correspondent bank, which mitigates the risk of fluctuations in currency rates. We enter into forward contracts with correspondent banks to economically hedge currency exposure risk related to certain foreign currency denominated loans. Revaluations of foreign currency denominated loans are recorded on the line item Other as part of noninterest income, a component of consolidated net income. We have not experienced nonperformance by a counterparty and therefore have not incurred related losses. Further, we anticipate performance by all counterparties. We had no net exposure for foreign exchange forward and foreign currency option contracts at September 30, 2010, compared to net exposure risk of \$2.6 million at December 31, 2009.

Deposits

Deposits were \$12.4 billion at September 30, 2010, an increase of \$2.1 billion, or 20.2 percent, compared to \$10.3 billion at December 31, 2009. The increase in our deposit balance was primarily from increases in our noninterest-bearing demand deposits of \$1.2 billion, interest-bearing money market deposits of \$775.4 million and interest-bearing sweep deposits of \$99.1 million. The overall increase in deposit balances was primarily due to the lack of attractive market investment opportunities for our clients. Additionally, we saw growth in our interest-bearing sweep deposits primarily due to our clients' desire to take advantage of the convenience of the daily sweep product combined with the competitive rates we pay on the product. At September 30, 2010, 40.0 percent of our total deposits were interest-bearing deposits, compared to 39.0 percent at December 31, 2009.

At September 30, 2010, the aggregate balance of time deposit accounts individually exceeding \$100,000 totaled \$336.9 million, compared to \$281.2 million at December 31, 2009. At September 30, 2010, substantially all time deposit accounts exceeding \$100,000 in balances were scheduled to mature within one year. No material portion of our deposits has been obtained from a single depositor and the loss of any one depositor would not materially affect our business.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

We opted out of the extended unlimited insurance coverage provided by the FDIC's Temporary Liquidity Guarantee Program owing to our strong capital and liquidity position. As a result, our unlimited insurance coverage for noninterest-bearing transaction accounts expired on June 30, 2010 under the current program. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Financial Reform Act) extends, however, such unlimited insurance coverage for two years beginning December 31, 2010.

Long-Term Debt

At September 30, 2010 and December 31, 2009, we had long-term debt of \$1.2 billion and \$856.7 million, respectively. At September 30, 2010, long-term debt included 5.375% Senior Notes, 5.70% senior notes and 6.05% subordinated notes, 2008 Convertible Notes, junior subordinated debentures and 4.99% notes payable related to one of our debt fund investments. For more information on our long-term debt, see Note 8-

Short-Term Borrowings and Long-Term Debt of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report.

Table of Contents***Other Liabilities***

A summary of other liabilities at September 30, 2010 and December 31, 2009, respectively, is as follows:

(Dollars in thousands)	September 30, 2010	December 31, 2009	% Change
Foreign exchange spot contract liabilities, gross	\$ 99,247	\$ 19,638	NM%
Accrued compensation	60,441	37,873	59.6
Derivative liabilities, gross (1)	13,296	15,870	(16.2)
Reserve for unfunded credit commitments	15,892	13,331	19.2
Other	74,407	53,235	39.8
 Total other liabilities	 \$ 263,283	 \$ 139,947	 88.1

NM- Not meaningful

(1) See Derivatives, Net section above.

Foreign Exchange Spot Contract Liabilities

Foreign exchange spot contract liabilities represent unsettled client trades at the end of the period. The increase of \$79.6 million was primarily due to increased client trade activity at period-end, and is largely offset by an increase in foreign exchange spot contract assets. (See Accrued Interest Receivable and Other Assets section above).

Accrued Compensation

Accrued compensation includes amounts for our Incentive Compensation Plan, vacation, Direct Drive Incentive Compensation Plan, Long-Term Cash Incentive Plan, Retention Program, Warrant Incentive Plan, ESOP and other compensation arrangements. The increase of \$22.6 million reflects our current expectation that we will achieve our internal performance targets for 2010 as compared to our 2009 incentive compensation accruals, which were at half of target levels as we did not achieve all of our internal performance targets for 2009. In addition to lower incentive compensation accruals, no ESOP accruals were recorded in 2009.

Noncontrolling Interests

Noncontrolling interests totaled \$427.7 million and \$345.8 million at September 30, 2010 and December 31, 2009, respectively. The increase of \$81.9 million was primarily due to equity transactions, which included \$78.7 million of contributed capital from investors in four of our managed funds of funds for investing in limited partnerships, as well as net income attributable to noncontrolling interests of \$25.4 million for the nine months ended September 30, 2010, primarily from two of our managed funds of funds.

Fair Value Measurements

At September 30, 2010, approximately 42.1 percent of our total assets, or \$6.6 billion, consisted of financial assets recorded at fair value on a recurring basis, compared to 34.4 percent of our total assets, or \$4.4 billion as of December 31, 2009. Of these assets as of September 30, 2010, 92.6 percent used valuation methodologies involving market-based or market-derived information, collectively Level 1 and 2 measurements, to measure fair value, and 7.4 percent of these financial assets were measured using model-based techniques, or Level 3 measurements. This compares to 90.7 percent and 9.3 percent, respectively, as of December 31, 2009. Almost all of our financial assets valued using Level 3 measurements at September 30, 2010 and December 31, 2009 represented non-marketable securities. At September 30, 2010, 0.1 percent of total liabilities, or \$13.3 million, consisted of financial liabilities recorded at fair value on a recurring basis, which were valued using market-observable inputs, compared to 0.1 percent, or \$15.9 million as of December 31, 2009. There were no transfers between Level 1 and Level 2 and no material transfers between Level 3 and Level 2 during the nine months ended September 30, 2010 and 2009. During the three and nine months ended September 30, 2010, there was a transfer of \$10.8 million from Level 3 to Level 1 due to the IPO of one of our portfolio

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

companies. Our valuation processes include a number of key controls that are designed to ensure that fair value is calculated appropriately.

As of September 30, 2010, our available-for-sale portfolio, consisting primarily of agency-issued mortgage-backed securities, agency-issued collateralized mortgage obligations, U.S. agency debentures and U.S. treasury securities, represented \$6.0 billion, or 91.0 percent of our portfolio of assets measured at fair value on a recurring basis, compared to \$3.9 billion, or 89.2 percent, as of December 31, 2009. These instruments were primarily classified as Level 2 because their valuations were based on indicative prices corroborated by observable market quotes or pricing models with all significant inputs derived from or corroborated by observable market data. The fair value of our available-for-sale fixed-income investment securities portfolio is sensitive to changes in levels of market interest rates and market perceptions of credit quality of the underlying securities. Market valuations and impairment analyses on assets in the fixed-income investment portfolio are reviewed and monitored on a quarterly basis.

Table of Contents

To the extent available-for-sale investment securities are used to secure borrowings, changes in the fair value of those securities could have an impact on the total amount of secured financing available. We pledge securities to the Federal Home Loan Bank of San Francisco and the discount window at the Federal Reserve Bank. The market value of collateral pledged to the Federal Home Loan Bank of San Francisco (comprised entirely of U.S. agency debentures) at September 30, 2010 totaled \$1.0 billion, all of which was unused and available to support additional borrowings. The market value of collateral pledged at the discount window of the Federal Reserve Bank in accordance with our risk management practices at September 30, 2010 totaled \$88.7 million, all of which was unused and available to support additional borrowings. We have repurchase agreements in place with multiple securities dealers, which allow us to access short-term borrowings by using available-for-sale securities as collateral. At September 30, 2010, we had not utilized our repurchase lines to secure borrowed funds.

Financial assets valued using Level 3 measurements consist primarily of our investments in venture capital and private equity funds, direct equity investments in privately held companies and certain investments made by our consolidated sponsored debt fund. Our managed funds and sponsored debt fund that hold these investments are investment companies under the American Institute of Certified Public Accountants (AICPA) Audit and Accounting Guide for Investment Companies and accordingly, these funds report their investments at estimated fair value, with unrealized gains and losses resulting from changes in fair value reflected as investment gains or losses in our consolidated statements of income. Assets valued using Level 3 measurements also include equity warrant assets in shares of private company capital stock.

During the three and nine months ended September 30, 2010, the Level 3 assets that are measured at fair value on a recurring basis experienced net unrealized fair value increases totaling \$9.5 million and \$18.6 million, respectively. The unrealized gains for the three and nine months ended September 30, 2010 were primarily due to valuation increases in underlying fund investments in our managed funds of funds. During the three and nine months ended September 30, 2009, the Level 3 assets that are measured at fair value on a recurring basis experienced net unrealized fair value increases of \$0.9 million and decreases of \$45.3 million, respectively. The unrealized losses for the nine months ended September 30, 2009 were primarily due to valuation decreases in underlying fund investments in our managed funds of funds. Realized gains related to the Level 3 assets for the three and nine months ended September 30, 2010 of \$6.3 million and \$15.2 million, respectively, related primarily to gains from distributions from underlying fund investments in our managed funds of funds. Realized gains related to the Level 3 assets for the three and nine months ended September 30, 2009 of \$4.5 million and \$5.3 million, respectively, related primarily to gains from distributions from underlying fund investments in our managed funds of funds.

The valuation of non-marketable securities and equity warrant assets in shares of private company capital stock is subject to significant judgment. The inherent uncertainty in the process of valuing securities for which a ready market does not exist may cause our estimated values of these securities to differ significantly from the values that would have been derived had a ready market for the securities existed, and those differences could be material. The timing and amount of changes in fair value, if any, of these financial instruments depend upon factors beyond our control, including the performance of the underlying companies, fluctuations in the market prices of the preferred or common stock of the underlying companies, general volatility and interest rate market factors, and legal and contractual restrictions. The timing and amount of actual net proceeds, if any, from the disposition of these financial instruments depend upon factors beyond our control, including investor demand for initial public offerings, levels of merger and acquisition activity, legal and contractual restrictions on our ability to sell, and the perceived and actual performance of portfolio companies. All of these factors are difficult to predict. (See Risk Factors under Item 1A of Part II below.)

Capital Resources

Our management seeks to maintain adequate capital to support anticipated asset growth, operating needs and unexpected credit risks, and to ensure that SVB Financial and the Bank are in compliance with all regulatory capital guidelines. Our primary sources of new capital include retained earnings and proceeds from the sale and issuance of capital stock or other securities. Our management engages in a regular capital planning process in an effort to make effective use of the capital available to us. The capital plan considers capital needs for the foreseeable future and allocates capital to both existing and future business activities. Expected future use or activities for which capital may be set aside include balance sheet growth and unexpected credit losses, investment activity, potential product and business expansions, acquisitions and strategic or infrastructure investments.

Common Stock

On June 16, 2010, we repurchased in its entirety the warrant previously issued to the U.S. Treasury in connection with our prior participation in the U.S. Treasury's Capital Purchase Program (CPP). The total cash repurchase price paid to the U.S. Treasury was \$6.8 million for the aggregate warrant. At the time of issuance, the warrant was initially exercisable for 708,116 shares of our common stock at an exercise price of \$49.78 per share. However, due to our completion of a qualified equity offering during the fourth quarter of 2009, the number of shares of common stock exercisable under the warrant was reduced to 354,058 pursuant to applicable CPP rules. The repurchase of the warrant reduced our stockholders

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

equity by the total cash price of \$6.8 million, and did not have any impact on our net income available to common stockholders or diluted earnings per share for the three or nine months ended September 30, 2010.

Table of Contents

For information on our common stock, see Note 2- Stockholders' Equity and Earnings Per Share of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report.

SVBFG Stockholders' Equity

SVBFG stockholders' equity totaled \$1.3 billion at September 30, 2010, an increase of \$140.3 million, or 12.4 percent compared to \$1.1 billion at December 31, 2009. This increase was primarily the result of net income for the nine months ended September 30, 2010, an increase in accumulated other comprehensive income primarily due to an increase in the fair value of our available-for-sale securities portfolio, and an increase in additional-paid-in-capital from issuances of common stock during the nine months ended September 30, 2010.

Funds generated through retained earnings are a significant source of capital and liquidity and are expected to continue to be so in the future.

Capital Ratios

Both SVB Financial and the Bank are subject to capital adequacy guidelines issued by the Federal Reserve Board. Under these capital guidelines, the minimum total risk-based capital ratio and Tier 1 risk-based capital ratio requirements for bank holding companies and banks to be well capitalized are 10.0% and 6.0%, respectively. Under the same capital adequacy guidelines, a well-capitalized state member bank must maintain a minimum Tier 1 leverage ratio of 5.0%. There is no Tier 1 leverage requirement for a holding company to be deemed well-capitalized.

The Federal Reserve has not issued any minimum guidelines for the tangible common equity to tangible assets ratio or the tangible common equity to risk-weighted assets ratio.

Both the capital ratios of SVB Financial and the Bank were in excess of regulatory guidelines to be well-capitalized at September 30, 2010 and December 31, 2009. Capital ratios for SVB Financial and the Bank are set forth below:

	September 30, 2010	December 31, 2009
SVB Financial:		
Total risk-based capital ratio	19.11%	19.94%
Tier 1 risk-based capital ratio	15.04	15.45
Tier 1 leverage ratio	8.77	9.53
Tangible common equity to tangible assets ratio (1)	8.10	8.78
Tangible common equity to risk-weighted assets ratio (1)	15.17	15.05
Bank:		
Total risk-based capital ratio	16.86%	17.05%
Tier 1 risk-based capital ratio	12.65	12.45
Tier 1 leverage ratio	7.30	7.67
Tangible common equity to tangible assets ratio (1)	7.38	7.50
Tangible common equity to risk-weighted assets ratio (1)	13.23	12.53

(1) See below for a reconciliation of non-GAAP tangible common equity to tangible assets and tangible common equity to risk-weighted assets.

Core earnings growth and realized gains from the sale of certain available-for-sale securities had a positive impact on regulatory total and tier 1 capital for SVB Financial and the Bank at September 30, 2010, compared to December 31, 2009. Increases in loans and available-for-sale securities relative to cash balances resulted in a general decline in capital ratios as the overall mix of risk-weighted assets shifted to higher risk-weighted loans and available-for-sale securities relative to cash. The tier 1 risk-based capital ratio at SVB Financial was also negatively impacted by growth in noncontrolling interest which is excluded from regulatory tier 1 capital. The same ratio at the Bank is not impacted by noncontrolling interest and therefore improved slightly. For both SVB Financial and the Bank, decreases in the Tier 1 leverage ratio reflect continued growth in average assets which is due primarily to an increase in client deposits.

Table of Contents

The tangible common equity to tangible assets ratio and the tangible common equity to risk-weighted assets ratios are not required by GAAP or applicable bank regulatory requirements. However, we believe these ratios provide meaningful supplemental information regarding our capital levels. Our management uses, and believes that investors benefit from referring to, these ratios in evaluating the adequacy of the Company's capital levels; however, this financial measure should be considered in addition to, not as a substitute for or preferable to, comparable financial measures prepared in accordance with GAAP. These ratios are calculated by dividing total SVBFG stockholder's equity, by total assets or risk-weighted assets, after reducing both amounts by acquired intangibles and goodwill. The manner in which this ratio is calculated varies among companies. Accordingly, our ratio is not necessarily comparable to similar measures of other companies. The following table provides a reconciliation of non-GAAP financial measures with financial measures defined by GAAP:

Non-GAAP tangible common equity and tangible assets	SVB Financial		Bank	
	September 30, 2010	December 31, 2009	September 30, 2010	December 31, 2009
(Dollars in thousands, except ratios)				
GAAP SVBFG stockholders' equity	\$ 1,268,611	\$ 1,128,343	\$ 1,069,238	\$ 914,068
Less:				
Intangible assets	891	665		
Tangible common equity	\$ 1,267,720	\$ 1,127,678	\$ 1,069,238	\$ 914,068
GAAP Total assets	\$ 15,660,069	\$ 12,841,399	\$ 14,484,823	\$ 12,186,203
Less:				
Intangible assets	891	665		
Tangible assets	\$ 15,659,178	\$ 12,840,734	\$ 14,484,823	\$ 12,186,203
Risk-weighted assets	\$ 8,354,326	\$ 7,494,498	\$ 8,079,741	\$ 7,293,332
Tangible common equity to tangible assets	8.10%	8.78%	7.38%	7.50%
Tangible common equity to risk-weighted assets	15.17	15.05	13.23	12.53

For both SVB Financial and the Bank, the tangible common equity to tangible assets ratio decreased due primarily to an increase in tangible assets which primarily reflects our continued growth in deposit balances. This increase was partially offset by an increase in tangible equity from an increase in retained earnings. For both SVB Financial and the Bank, the increase in tangible common equity to risk-weighted asset ratio is reflective of a higher proportion of cash and investment securities relative to loans.

Off-Balance Sheet Arrangements

In the normal course of business, we use financial instruments with off-balance sheet risk to meet the financing needs of our customers. These financial instruments include commitments to extend credit, commercial and standby letters of credit, and commitments to invest in private equity fund investments. These instruments involve, to varying degrees, elements of credit risk. Credit risk is defined as the possibility of sustaining a loss because other parties to the financial instrument fail to perform in accordance with the terms of the contract. For details of our commitments to extend credit, and commercial and standby letters of credit, please refer to Note 12- Off-Balance Sheet Arrangements, Guarantees, and Other Commitments of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report.

Table of Contents

Commitments to Invest in Venture Capital/Private Equity Funds

We make commitments to invest in venture capital and private equity funds, which in turn make investments generally in, or in some cases make loans to, privately held companies. Commitments to invest in these funds are generally made for a ten-year period from the inception of the fund. Although the limited partnership agreements governing these investments typically do not restrict the general partners from calling 100% of committed capital in one year, it is customary for these funds to generally call most of the capital commitment over 5 to 7 years. The actual timing of future cash requirements to fund such commitments is generally dependent upon the investment cycle, overall market conditions, and the nature and type of industry in which the privately held companies operate.

At September 30, 2010, we had \$523.1 million in total capital commitments in venture capital/private equity funds, of which \$207.2 million was unfunded or uncalled. Included in the \$207.2 million unfunded commitments are commitments of \$122.9 million made by SVB Financial which may be transferred to certain new managed funds of funds (New Fund Commitments). These New Fund Commitments will remain the obligations of SVB Financial, and will continue to remain as such until we may later decide to transfer, sell or otherwise dispose of the investments, whether to a third party or to a new or existing fund managed by us. While the actual cash requirements of the total unfunded commitments are dependent on various factors, we currently expect capital calls of approximately \$60 million for the next 12 months.

For further details on our commitments to invest in private equity funds, refer to Note 12- Off-Balance Sheet Arrangements, Guarantees, and Other Commitments of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report.

Liquidity

The objective of liquidity management is to ensure that funds are available in a timely manner to meet our financial needs, including paying creditors, meeting depositors' needs, accommodating loan demand and growth, funding investments, repurchasing shares and other capital needs, without incurring undue cost or risk, or causing a disruption to normal operating conditions.

We regularly assess the amount and likelihood of projected funding requirements through a review of factors such as historical deposit volatility and funding patterns, present and forecasted market and economic conditions, individual client funding needs, and existing and planned business activities. Our Asset/Liability Committee (ALCO), which is a management committee, provides oversight to the liquidity management process and recommends policy guidelines, subject to the approval of the Finance Committee of our Board of Directors, and courses of action to address our actual and projected liquidity needs.

Our deposit base is, and historically has been, our primary source of liquidity. Our deposit levels and cost of deposits may fluctuate from time to time due to a variety of factors, including market conditions, prevailing interest rates, changes in client deposit behaviors, availability of insurance protection, and our offering of deposit products. At September 30, 2010, our period-end total deposit balances increased by \$2.1 billion to \$12.4 billion, compared to \$10.3 billion at December 31, 2009. The overall increase in deposit balances was primarily due to the lack of attractive market investment opportunities for our clients. This growth through the third quarter of 2010 had been a continuing trend since 2009. In 2009, noninterest-bearing demand deposits increased in part due to clients' preference for the security provided by unlimited FDIC insurance for noninterest-bearing transaction accounts. Although the FDIC had extended such insurance coverage for participating financial institutions from its prior expiration date of June 30, 2010 to December 31, 2010, we opted out of such extended coverage and our unlimited insurance coverage for noninterest-bearing transaction accounts expired on June 30, 2010. As of July 1, 2010, such insurance coverage was subject to a \$250,000 maximum pursuant to FDIC rules. Our election to opt out was based primarily on our assessment of our liquidity position and the associated costs of maintaining such extended coverage. Subsequent to our decision, the Financial Reform Act, which was enacted on July 21, 2010, has extended such unlimited insurance coverage for two years beginning December 31, 2010. As such, the availability of such unlimited insurance may have an impact on future deposit levels. Nevertheless, despite any fluctuations in our deposit levels or cost of deposits, the level of which we cannot predict, we continue to expand on opportunities to increase our liquidity and take steps to carefully manage our liquidity.

Our liquidity requirements can also be met through the use of our portfolio of liquid assets. Our definition of liquid assets includes cash and cash equivalents in excess of the minimum levels necessary to carry out normal business operations, investment securities maturing within nine months, investment securities eligible and available for financing or pledging purposes with a maturity in excess of nine months and anticipated near-term cash flows from investments. During the second quarter of 2010, we sold all of our remaining non-agency residential and commercial mortgage-backed securities of \$123.3 million, as well as agency-issued collateralized mortgage obligations of \$34.6 million. During the third quarter of 2010, we sold \$304.0 million of agency-issued mortgage-backed securities and \$188.9 million of fixed rate agency-issued collateralized mortgage obligations.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

On a stand-alone basis, SVB Financial's primary liquidity channels include dividends from the Bank, its investment portfolio assets, and its ability to raise debt and capital. The ability of the Bank to pay dividends is subject to certain regulations described in Business Supervision and Regulation Restriction on Dividends under Part I, Item 1 of our 2009 Form 10-K.

Table of Contents*Consolidated Summary of Cash Flows*

Below is a summary of our average cash position and statement of cash flows for the nine months ended September 30, 2010 and 2009, respectively. Please refer to our Interim Statements of Cash Flows for the nine months ended September 30, 2010, and 2009 under Part I, Item 1 of this report.

(Dollars in thousands)	Nine months ended September 30,	
	2010	2009
Average cash and due from banks	\$ 229,192	\$ 241,150
Average federal funds sold, securities purchased under agreements to resell and other short-term investment securities	4,048,242	3,190,730
Average cash and cash equivalents	\$ 4,277,434	\$ 3,431,880
Percentage of total average assets	29.9%	31.4%
Net cash provided by operating activities	\$ 176,591	\$ 102,801
Net cash used for investing activities	(2,427,491)	(942,019)
Net cash provided by financing activities	2,516,416	2,513,321
Net increase in cash and cash equivalents	\$ 265,516	\$ 1,674,103

Average cash and cash equivalents increased by \$845.6 million to \$4.3 billion for the nine months ended September 30, 2010, compared to \$3.4 billion for the comparable 2009 period, primarily due to the increase in deposit balances. The increase in deposit balances was primarily due to the lack of attractive market investment opportunities due to the current low interest rate environment.

Cash provided by operating activities was \$176.6 million for the nine months ended September 30, 2010, which included net income before noncontrolling interests of \$102.8 million. Significant adjustments for noncash items that increased cash provided by operating activities included \$29.1 million of provision for loan losses, a \$22.6 million increase in accrued compensation, a \$23.9 million decrease in income tax receivable, \$18.7 million of amortization of premiums on investment securities, \$14.4 million of depreciation and amortization and \$9.9 million of share-based compensation expense. Significant adjustments for noncash items that decreased cash provided by operating activities included \$67.4 million of net gains on investment securities, \$10.8 million of account receivable and \$4.9 million of deferred warrant-related loan fee amortization.

Cash used for investing activities was \$2.4 billion for the nine months ended September 30, 2010. Net cash outflows included purchases of available-for-sale securities of \$4.2 billion, a net increase in loans of \$354.5 million, purchases of non-marketable securities of \$115.5 million and purchases of premises and equipment of \$21.0 million. Net cash inflows included proceeds from the sales, maturities and pay downs of available-for-sale securities of \$2.2 billion, sales of non-marketable securities of \$38.1 million and the recovery of \$13.4 million from loans previously charged-off.

Cash provided by financing activities was \$2.5 billion for the nine months ended September 30, 2010. Net cash inflows included increases in deposits of \$2.1 billion, net proceeds from issuance of our 5.375% Senior Notes of \$344.3 million, capital contributions from noncontrolling interests of \$56.5 million, net increase in short-term borrowings of \$21.0 million and proceeds from issuance of common stock of \$15.2 million. Net cash outflows included \$6.8 million from the repurchase of a warrant under the Capital Purchase Program.

Cash and cash equivalents at September 30, 2010 were \$3.8 billion, compared to \$4.1 billion at September 30, 2009.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Interest Rate Risk Management**

Market risk is defined as the risk of adverse fluctuations in the market value of financial instruments due to changes in market interest rates. Interest rate risk is our primary market risk and can result from timing and volume differences in the repricing of our rate-sensitive assets and liabilities, widening or tightening of credit spreads and changes in the shape and level of the yield curve. Other market risks include foreign currency exchange risk and equity price risk. These risks are not considered significant and no separate quantitative information concerning them is presented herein.

Interest rate risk is managed by our Asset/Liability Committee (ALCO), which is a management committee. ALCO reviews sensitivities of assets and liabilities to changes in interest rates, structural changes in investment and funding portfolios, loan and deposit activity and current market conditions. Adherence to relevant policies, which are approved by the Finance Committee of our Board of Directors, is monitored on an ongoing basis.

Management of interest rate risk is carried out primarily through strategies involving our investment securities and funding portfolios. In addition, our policies permit off-balance sheet derivative instruments to manage interest rate risk.

We utilize a simulation model to perform sensitivity analysis on the market value of portfolio equity and net interest income under a variety of interest rate scenarios, balance sheet forecasts and proposed strategies. The simulation model provides a dynamic assessment of interest rate sensitivity embedded in our balance sheet which measures the potential volatility in forecasted results relating to changes in market interest rates over time. We review our interest rate risk position at a minimum, on a quarterly basis.

Market Value of Portfolio Equity and Net Interest Income

One application of the aforementioned simulation model involves measurement of the impact of market interest rate changes on our market value of portfolio equity (MVPE). MVPE is defined as the market value of assets, less the market value of liabilities, adjusted for any off-balance sheet items. A second application of the simulation model measures the impact of market interest rate changes on our net interest income (NII).

The following table presents our MVPE and NII sensitivity exposure at September 30, 2010 and December 31, 2009, related to an instantaneous and sustained parallel shift in market interest rates of 100 and 200 basis points (bps), respectively.

Change in interest rates (basis points)	Estimated MVPE	Estimated Increase/ (Decrease) In MVPE		Estimated NII	Estimated Increase/ (Decrease) In NII	
		Amount	Percent		Amount	Percent
		(Dollars in thousands)				
September 30, 2010:						
+200	\$ 1,590,233	\$ 22,096	1.4%	\$ 539,980	\$ 104,547	24.0%
+100	1,536,628	(31,509)	(2.0)	477,733	42,300	9.7
-	1,568,137			435,433		
-100	1,694,301	126,164	8.0	408,566	(26,867)	(6.2)
-200	1,663,707	95,570	6.1	398,350	(37,083)	(8.5)
December 31, 2009:						
+200	\$ 1,491,262	\$ (37,645)	(2.5)%	\$ 515,333	\$ 75,569	17.2%
+100	1,510,211	(18,696)	(1.2)	470,398	30,634	7.0
-	1,528,907			439,764		
-100	1,567,122	38,215	2.5	424,444	(15,320)	(3.5)
-200	1,626,056	97,149	6.4	406,626	(33,138)	(7.5)

Table of Contents

The estimated MVPE in the preceding table is based on a discounted cash flow analysis using market interest rates provided by publicly available sources that we deem reliable. These estimates are highly assumption-dependent and will change regularly as our asset/liability structure changes, as interest rate environments evolve, and as we change our assumptions in response to relevant circumstances. These calculations do not reflect changes we may make to reduce our MVPE exposure in response to a change in market interest rates. We expect to continue to manage our interest rate risk utilizing on and off-balance sheet strategies, as appropriate.

As with any method of measuring interest rate risk, certain limitations are inherent in the method of analysis presented in the preceding table. We are exposed to yield curve risk, prepayment risk and basis risk which cannot be fully modeled and expressed using the above methodology. Accordingly, the results in the preceding table should not be relied upon as a precise indicator of actual results in the event of changing market interest rates. Additionally, the resulting MVPE and NII estimates are not intended to represent, and should not be construed to represent the underlying value.

Our base case MVPE at September 30, 2010 increased from December 31, 2009 by \$39.2 million primarily due to the overall growth in the balance sheet as our loans and available-for-sale securities grew by \$311.1 million and \$2.1 billion, respectively. These increases were partially offset by our deposits and long-term debt, which grew by \$2.1 billion and \$369.2 million, respectively. The growth in long-term debt was primarily due to the issuance of our \$350 million in 5.375% Senior Notes. MVPE rose in the simulated upward 200 bps interest rate movement due to our significant growth in floating rate available-for-sale securities, and noninterest-bearing deposits. Additionally, with the historically low level of interest rates, our deposit rates are also at or near their absolute floors thus decreasing some of the effect of the downward rate shocks.

Our expected 12-month NII at September 30, 2010 decreased from December 31, 2009 by \$4.3 million due primarily to growth in our deposits, long-term debt, and a lower interest rate forecast. These are partially offset by growth in our available-for-sale securities portfolio. Our overall balance sheet grew by \$2.8 billion from December 31, 2009 to September 30, 2010. The growth was principally attributed to increases in our available-for-sale securities portfolio and deposits. NII sensitivity increased in both the simulated upward and downward interest rate movements due primarily to the large growth in the floating rate available-for-sale securities, and noninterest-bearing deposits. In addition to these changes, other general contributing factors include changes in balance sheet mix, changes in deposit repricing assumptions, and a lower projected forward rate curve.

The simulation model used for above analysis embeds floors in our interest rate scenarios which prevent model benchmark rates from resulting in negative rates. Current modeling assumptions maintain the SVB prime lending rate at its existing level (currently at 4.0%) until the National Prime Index has been adjusted upward by a minimum of 75 bps (to 4.0%), as we did not lower the Bank's prime lending rate despite the 75 bps decrease in the target Federal Funds rates in December 2008. These assumptions may change in future periods based on management discretion. Actual changes in our deposit pricing strategies may differ from our current model assumptions and may have an impact on our overall sensitivity.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are the controls and other procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's ("SEC") rules and forms. Disclosure controls and procedures include, among other things, processes, controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of our most recently completed fiscal quarter, pursuant to Exchange Act Rule 13a-15(b). Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective.

Changes in Internal Control

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the period covered by this Quarterly Report on Form 10-Q that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Please refer to Note 15- Legal Matters of the Notes to Interim Consolidated Financial Statements (unaudited) under Part I, Item 1 of this report.

ITEM 1A. RISK FACTORS

Our business faces significant risks, including market and economic environment, credit, market/liquidity, operational, legal/regulatory and strategic/reputation risks. The factors described below may not be the only risks we face and are not intended to serve as a comprehensive listing or be applicable only to the category of risk under which they are disclosed. The risks described below are generally applicable to more than one of the following categories of risks. Additional risks that we do not yet know of or that we currently think are immaterial may also impair our business operations. If any of the events or circumstances described in the following factors actually occurs, our business, financial condition and/or results of operations could suffer.

There are no material changes from the risk factors set forth in our 2009 Form 10-K, as updated in our Quarterly Report on Form 10-Q for the quarters ended March 31, 2010 (as filed with the SEC on May 7, 2010) and June 30, 2010 (as filed with the SEC on August 6, 2010).

Risks Relating to Market and Economic Environment

The continuation or worsening of recent market and economic conditions may adversely affect our industry, business, results of operations and ability to access capital.

Overall deterioration in domestic or global economic conditions, especially in the technology, life science, venture capital/private equity and premium wine industry niches or overall financial capital markets may adversely affect our business, growth, results of operations and ability to access capital. A global, domestic or significant regional economic slowdown or recession, could harm us by adversely affecting our clients and prospective clients access to capital to fund their businesses, their ability to sustain and grow their businesses, the level of funds they have available to maintain deposits, their demand for loans, their ability to repay loans and otherwise.

The United States has been in a serious economic downturn, as have economies around the world. Financial markets have been volatile, business and consumer spending has declined, and overall business activities have slowed, including a general slowdown in mergers and acquisitions (M&A) and initial public offerings (IPOs) of companies events upon which the venture capital and private equity community relies to exit their investments. Overall venture capital financing activity has also slowed in recent periods. There have been limited signs of economic recovery recently, such as a modest increase in the number of IPOs and M&A activity levels, yet economic conditions continue to be challenging. If recent market and economic conditions persist, our clients will continue to be adversely impacted, as will our investment returns, valuations of companies, and overall levels of venture capital and private equity investments, which may have a material and adverse effect on our business, financial condition and results of operations. A worsening of these conditions could likely exacerbate the adverse effect on us.

As a result of recent economic conditions, the capital and credit markets have experienced extreme volatility and disruption. SVB Financial depends on access to equity and debt markets as one of its primary sources to raise capital. There has been some improvement to market conditions, particularly access to equity and debt markets; however, if recent levels of market disruption and volatility continue or worsen, there can be no assurance that we will not experience an adverse effect, which may be material, on our ability to access capital and on our business, financial condition and results of operations.

Credit Risks

If our clients fail to perform under their loans, our business, results of operations and financial condition could be adversely affected.

As a lender, we face the risk that our client borrowers will fail to pay their loans when due. If borrower defaults cause large aggregate losses, it could have a material adverse effect on our business, results of operations and financial condition. We reserve for such losses by establishing an allowance for loan losses, the increase of which results in a charge to our earnings as a provision for loan losses. We have established an

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

evaluation process designed to determine the adequacy of our allowance for loan losses. While this evaluation process uses historical and other objective information, the classification of loans and the forecasts and establishment of loan losses are dependent to a great extent on our subjective assessment based upon our experience and judgment. Actual losses are difficult to forecast, especially if such losses stem from factors beyond our historical experience or are otherwise inconsistent or out of pattern with regards to our credit quality assessments. There can be no assurance that our allowance for loan losses will be sufficient to absorb future loan losses or prevent a material adverse effect on our business, financial condition and results of operations.

Table of Contents

Because of the credit profile of our loan portfolio, our levels of nonperforming assets and charge-offs can be volatile. We may need to make material provisions for loan losses in any period, which could reduce net income or increase net losses in that period.

Our loan portfolio has a credit profile different from that of most other banking companies. In addition, the credit profile of our clients varies across our loan portfolio, based on the nature of the lending we do for different market segments. In our portfolios for emerging, early-stage and mid-stage companies, many of our loans are made to companies with modest or negative cash flows and no established record of profitable operations. Repayment of these loans may be dependent upon receipt by borrowers of additional equity financing from venture capitalists or others, or in some cases, a successful sale to a third party or a public offering. In recent periods, due to the overall weakening of the economic environment, venture capital financing activity has slowed, and IPOs and M&A activities have slowed significantly. If economic conditions worsen or do not continue to improve, such activities may slow down even further. Venture capital firms may provide financing at lower levels, more selectively or on less favorable terms, which may have an adverse effect on our borrowers that are otherwise dependent on such financing to repay their loans to us. Moreover, collateral for many of our loans often includes intellectual property, which is difficult to value and may not be readily salable in the case of default. Because of the intense competition and rapid technological change that characterizes the companies in the technology and life science industry sectors, a borrower's financial position can deteriorate rapidly.

Additionally, we may enter into accounts receivable financing arrangements with our company clients. The repayment of these arrangements is dependent on the financial condition, and payment ability, of third parties with whom our clients do business. Such third parties may be unable to meet their financial obligations to our clients, especially in a weakened economic environment.

In our portfolio of venture capital and private equity firm clients, many of our clients have capital call lines of credit, the repayment of which is dependent on the payment of capital calls by the underlying limited partner investors in the funds managed by these firms. These limited partner investors may face liquidity issues or have difficulties meeting their financial commitments, especially during unstable economic times, which may lead to our clients' inability to meet their repayment obligations to us.

We have been increasing our efforts to lend to corporate technology and large corporate clients, including some companies with greater levels of debt relative to their equity, and have increased the average size of our loans over time. Increasing our larger loan commitments could increase the impact on us of any single borrower default.

We lend to targeted high net-worth individual clients through our Private Client Services (PCS) group. These individual clients may face difficulties meeting their financial commitments, especially during a challenging economic environment, and may be unable to repay their loans. We also lend to premium wineries and vineyards through our SVB Wine group. Repayment of loans made to these clients may be dependent on overall grape supply (which may be adversely affected by poor weather or other natural conditions) and overall wine demand and sales, or other sources of financing or income (which may be adversely affected by a challenging economic environment). See Loans under Management's Discussion and Analysis of Financial Condition and Results of Operations Consolidated Financial Condition under Item 2 of Part I of this report.

For all of these reasons, our level of nonperforming loans, loan charge-offs and allowance for loan losses can be volatile and can vary materially from period to period. Increases in our level of nonperforming loans or loan charge-offs may require us to increase our provision for loan losses in any period, which could reduce our net income or cause net losses in that period. Additionally, such increases in our level of nonperforming loans or loan charge-offs may also have an adverse effect on our credit ratings and market perceptions of us.

The borrowing needs of our clients may be volatile, especially during a challenging economic environment. We may not be able to meet our unfunded credit commitments, or adequately reserve for losses associated with our unfunded credit commitments, which could have a material effect on our business, financial condition, results of operations and reputation.

A commitment to extend credit is a formal agreement to lend funds to a client as long as there is no violation of any condition established under the agreement. The actual borrowing needs of our clients under these credit commitments have historically been lower than the contractual amount of the commitments. A significant portion of these commitments expire without being drawn upon. Because of the credit profile of our clients, we typically have a substantial amount of total unfunded credit commitments, which is reflected off our balance sheet. At September 30, 2010, we had \$5.9 billion in total unfunded credit commitments. Actual borrowing needs of our clients may exceed our expected funding requirements, especially during a challenging economic environment when our client companies may be more dependent on our credit commitments due to the lack of available credit elsewhere, the increasing costs of credit, or the limited availability of financings from more discerning and selective venture capital/private equity firms. In addition, limited partner investors of our venture capital/private equity fund clients may fail to meet their underlying investment commitments due to liquidity or other financing issues, which may impact our clients' borrowing needs. Any failure to meet our unfunded credit commitments in accordance with the actual borrowing needs of our clients may have a

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

material adverse effect on our business, financial condition, results of operations and reputation.

Additionally, we establish a reserve for losses associated with our unfunded credit commitments. The level of the reserve for unfunded credit commitments is determined by following a methodology similar to that used to establish our allowance for loan losses

Table of Contents

in our funded loan portfolio. The reserve is based on credit commitments outstanding, credit quality of the loan commitments, and management's estimates and judgment, and is susceptible to significant changes. There can be no assurance that our reserve for unfunded credit commitments will be adequate to provide for actual losses associated with our unfunded credit commitments. An increase in the reserve for unfunded credit commitments in any period may result in a charge to our earnings, which could reduce our net income or increase net losses in that period.

Market/Liquidity Risks

Our current level of interest rate spread may decline in the future. Any material reduction in our interest rate spread, or a sustained period of low market interest rates, could have a material adverse effect on our business, results of operations or financial condition.

A major portion of our net income comes from our interest rate spread, which is the difference between the interest rates paid by us on amounts used to fund assets and the interest rates and fees we receive on our interest-earning assets. We fund assets using deposits and other borrowings. While we are increasingly offering more interest-bearing deposit products, a majority of our deposit balances are from our noninterest bearing products. Our interest-earning assets include outstanding loans extended to our clients and securities held in our investment portfolio. Overall, the interest rates we pay on our interest-bearing liabilities and receive on our interest-earning assets, and our level of interest rate spread, could be affected by a variety of factors, including changes in market interest rates, competition, and a change over time in the mix of loans, investment securities, deposits and other liabilities on our balance sheet.

Changes in market interest rates, such as the Federal Funds rate, generally impact our interest rate spread. While changes in interest rates do not produce equivalent changes in the revenues earned from our interest-earning assets and the expenses associated with our interest-bearing liabilities, increases in market interest rates will nevertheless likely cause our interest rate spread to increase. Conversely, if interest rates decline, our interest rate spread will likely decline. Decreases in market interest rates, especially during 2008 and 2009, have caused our interest rate spread to decline significantly, which has reduced our net income in the past. Sustained low levels of market interest rates will likely continue to put pressure on our results of operations. Unexpected interest rate declines may also adversely affect our business forecasts and expectations. Interest rates are highly sensitive to many factors beyond our control, such as inflation, recession, global economic disruptions, unemployment and the fiscal and monetary policies of the federal government and its agencies.

Any material reduction in our interest rate spread or the continuation of sustained low levels of market interest rates could have a material adverse effect on our business, results of operations and financial condition.

Liquidity risk could impair our ability to fund operations and jeopardize our financial condition.

Liquidity is essential to our business. We require sufficient liquidity to meet our expected, as well as unexpected, financial obligations and requirements. An inability to raise funds through deposits, borrowings, equity/debt offerings and other sources could have a substantial negative effect on our liquidity. Our access to funding sources in amounts adequate to finance our activities, or on terms attractive to us, could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a reduction in our credit ratings, an increase in costs of capital in financial capital markets, a decrease in the level of our business activity due to a market downturn or adverse regulatory action against us, or a decrease in depositor or investor confidence in us. Our ability to borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole.

Additionally, our credit ratings are important to our liquidity and our business. A reduction in our credit ratings could adversely affect our liquidity and competitive position, increase our borrowing costs, and limit our access to the capital markets. Moreover, a reduction in our credit ratings could increase the interest rates we pay on deposits, or adversely affect perceptions about our creditworthiness or our overall reputation.

Equity warrant asset, venture capital and private equity funds and direct equity investment portfolio gains or losses depend upon the performance of the portfolio investments and the general condition of the public equity markets, which are uncertain and may vary materially by period.

In connection with negotiated credit facilities and certain other services, we frequently obtain equity warrant assets giving us the right to acquire stock in certain client companies. We also make investments through our SVB Capital family of funds in venture capital and private equity funds and direct investments in companies, which are required to be carried at fair value. The fair value of these warrants and investments are reflected in our financial statements and are adjusted on a quarterly basis. Fair value changes are generally recorded as unrealized gains or losses through consolidated net income. The timing and amount of changes in fair value, if any, of these financial instruments depend upon factors beyond our control, including the performance of the underlying companies, fluctuations in the market prices of the preferred or common stock of the underlying companies, the timing of our receipt of relevant

Table of Contents

financial information, general volatility and interest rate market factors, and legal and contractual restrictions. The timing and amount of our realization of actual net proceeds, if any, from the disposition of these financial instruments depend upon factors beyond our control, including investor demand for IPOs, levels of M&A activity, legal and contractual restrictions on our ability to sell, and the perceived and actual performance and future value of portfolio companies. Because of the inherent variability of these financial instruments and the markets in which they are bought and sold, the fair market value of these financial instruments might increase or decrease materially, and the net proceeds realized upon disposition might be less than the then-current recorded fair market value.

We cannot predict future realized or unrealized gains or losses, and any such gains or losses are likely to vary materially from period to period. Additionally, the value of our equity warrant asset portfolio depends on the number of warrants we obtain, and in future periods, we may not be able to continue to obtain such equity warrant assets to the same extent we have historically achieved.

Public equity offerings and mergers and acquisitions involving our clients or a slowdown in venture capital investment levels may reduce the borrowing needs of our clients, which could adversely affect our business, results of operations and financial condition.

While an active market for public equity offerings and mergers and acquisitions generally has positive implications for our business, one negative consequence is that our clients may pay off or reduce their loans with us if they complete a public equity offering, are acquired by or merge with another entity or otherwise receive a significant equity investment. The recent economic conditions reflect a slowdown in such transactions, however if the levels of such transactions were to increase, our total outstanding loans may decline. Moreover, our capital call lines of credit are typically utilized by our venture capital fund clients to make investments prior to receipt of capital called from their respective limited partners. A slowdown in overall venture capital investment levels may reduce the need for our clients to borrow from our capital call lines of credit. Any significant reduction in the outstanding amounts of our loans or under our lines of credit could have a material adverse effect on our business, results of operations and financial condition.

Failure to raise additional funds from third-party investors for our funds managed by SVB Capital may require us to use capital to fund commitments to other funds, which may have a material adverse effect on our business, financial condition and reputation.

From time to time, we form new investment funds through our funds management division, SVB Capital. These funds include funds that invest in other venture capital and private equity funds (which we refer to as funds of funds) and portfolio companies (which we refer to as direct equity funds). Our managed funds are typically structured as limited partnerships, heavily funded by third party limited partners and ultimately managed by us through our SVB Capital division. SVB Financial typically will also make a significant capital commitment to each of these funds as a limited partner.

Prior to forming a new fund of funds, SVB Financial has made and may make investment commitments intended for the new fund, in order to show potential investors the types of funds in which the new fund will invest. Until these investments are transferred to the new fund, which typically will occur upon the acceptance of binding commitments from third-party limited partners (the closing), these investments are obligations of SVB Financial. If we fail to attract sufficient capital from third-party investors to conduct the closing of a fund, we may be required to permanently allocate capital to these investments when we otherwise had intended them to be temporary obligations. If, under such circumstances, we decide to sell these investments or fail to meet our obligations, we may lose some or all of the capital that has already been deployed and may be subject to legal claims. Any unexpected permanent allocation of capital toward these investments, loss of capital contributed to these investments or legal claims against us could have a material adverse effect on our business and financial condition, as well as our reputation.

The soundness of other financial institutions could adversely affect us.

Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. We routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, and other institutional clients, which may result in payment obligations to us or to our clients due to products arranged by us. Many of these transactions expose us to credit and market risk that may cause our counterparty or client to default. In addition, we are exposed to market risk when the collateral we hold cannot be realized or is liquidated at prices not sufficient to recover the full amount of the secured obligation. There is no assurance that any such losses would not materially and adversely affect our business, results of operations and financial condition.

Operational Risks

If we fail to retain our key employees or recruit new employees, our growth and results of operations could be adversely affected.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

We rely on key personnel, including a substantial number of employees who have technical expertise in their subject matter area and/or a strong network of relationships with individuals and institutions in the markets we serve. If we were to have less success in

Table of Contents

recruiting and retaining these employees than our competitors, for reasons including regulatory restrictions on compensation practices or the availability of more attractive opportunities elsewhere, our growth and results of operations could be adversely affected.

The manner in which we structure our employee compensation could adversely affect our results of operations and cash flows, as well as our ability to attract, recruit and retain key employees.

In May 2006, in an effort to align our equity grant rate to that of other financial institutions similar to us, we committed to restrict the total number of shares of our common stock issued under stock options, restricted stock awards, restricted stock unit awards, stock bonus awards and any other equity awards granted during a fiscal year as a percentage of the total number of shares outstanding on a prospective basis. In light of this restriction, we may in the future consider taking other actions to modify employee compensation structures, such as granting cash compensation or other cash-settled forms of equity compensation, which may result in an additional charge to our earnings.

How we structure our equity compensation may also have an adverse effect on our ability to attract, recruit and retain key employees. Our decision in May 2006 to reduce equity awards to be granted on a prospective basis, and any other similar changes limiting our equity awards that we may adopt in the future, could negatively impact our hiring and retention strategies. Moreover, economic conditions have in the past reduced our share price, particularly during 2009, causing existing employee options and equity awards to have exercise prices higher in some cases, meaningfully higher than our actual share price. These factors could adversely affect our ability to attract, recruit and retain certain key employees.

The occurrence of fraudulent activity or breaches of our information security could have a material adverse effect on our business, financial condition and results of operations.

As a financial institution, we are susceptible to fraudulent activity that may be committed against us or our clients, which may result in financial losses to us or our clients, privacy breaches against our clients, or damage to our reputation. Such fraudulent activity may take many forms, including check fraud, electronic fraud, wire fraud, phishing, social engineering and other dishonest acts. In recent periods, there has been a rise in electronic fraudulent activity within the financial services industry, especially in the commercial banking sector due to cyber criminals targeting commercial bank accounts. Consistent with industry trends, we have also experienced an increase in attempted electronic fraudulent activity in recent periods.

Information pertaining to us and our clients are maintained, and transactions are executed, on our internal networks and Internet-based systems, such as our online banking system. The secure maintenance and transmission of confidential information, as well as execution of transactions over these systems, are essential to protect us and our clients against fraud and to maintain our clients' confidence. Increases in criminal activity levels and sophistication, advances in computer capabilities, new discoveries, vulnerabilities in third-party technologies (including browsers and operating systems) or other developments could result in a compromise or breach of the technology, processes and controls that we use to prevent fraudulent transactions and to protect data about us, our clients and underlying transactions, as well as the technology used by our clients to access our systems. Although we have developed systems and processes that are designed to detect and prevent security breaches and periodically test our security, failure to mitigate breaches of security could result in losses to us or our clients, result in a loss of business and/or clients, cause us to incur additional expenses, affect our ability to grow our online services or other businesses, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our business, financial condition and results of operations.

More generally, publicized information concerning security problems could inhibit the use or growth of the Internet as a means of conducting commercial transactions. Our ability to provide financial services over the Internet would be severely impeded if clients became unwilling to transmit confidential information online. As a result, our business, financial condition and results of operations could be adversely affected.

We face risks associated with the ability of our information technology systems and our people and processes to support our operations and future growth effectively.

In order to serve our target clients effectively, we have developed a comprehensive array of banking and other products and services. In order to support these products and services, we have developed and purchased or licensed information technology and other systems and processes. As our business continues to grow, we will continue to invest in and enhance these systems, and our people and processes. These investments and enhancements may affect our future profitability and overall effectiveness. From time to time, we may change, consolidate, replace, add or upgrade existing systems or processes, which if not implemented properly to allow for an effective transition, may have an adverse effect on our operations, including business interruptions which may result in inefficiencies, revenue losses, client losses, exposure to fraudulent activities, or damage to our reputation. For example, we are in the process of implementing a new universal banking system that will replace our current platform. Or, we may outsource certain operational functions to consultants or other third parties to enhance our overall efficiencies, which if not

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

performed properly, could also have an adverse effect on us. There can be no assurance that we will be able to effectively maintain or improve our systems and processes, or utilize outsourced talent, to meet our business needs efficiently. Any failure of such could adversely affect our operations, financial condition, results of operations, future growth and reputation.

Table of Contents

Business disruptions and interruptions due to natural disasters and other external events beyond our control can adversely affect our business, financial condition and results of operations.

Our operations can be subject to natural disasters and other external events beyond our control, such as earthquakes, fires, severe weather, public health issues, power failures, telecommunication loss, major accidents, terrorist attacks, acts of war, and other natural and man-made events. Our corporate headquarters and a portion of our critical business offices are located in California near major earthquake faults. Such events of disaster, whether natural or attributable to human beings, could cause severe destruction, disruption or interruption to our operations or property. Financial institutions, such as us, generally must resume operations promptly following any interruption. If we were to suffer a disruption or interruption and were not able to resume normal operations within a period consistent with industry standards, our business could suffer serious harm. In addition, depending on the nature and duration of the disruption or interruption, we might be vulnerable to fraud, additional expense or other losses, or to a loss of business and/or clients. We have implemented a business continuity management program and we continue to enhance it on an ongoing basis. There is no assurance that our business continuity management program can adequately mitigate the risks of such business disruptions and interruptions.

Additionally, natural disasters and external events could affect the business and operations of our clients, which could impair their ability to pay their loans or fees when due, impair the value of collateral securing their loans, cause our clients to reduce their deposits with us, or otherwise adversely affect their business dealings with us, any of which could have a material adverse effect on our business, financial condition and results of operations.

We face reputation and business risks due to our interactions with business partners, service providers and other third parties.

We rely on third parties, both in the United States and internationally in countries such as India, in a variety of ways, including to provide key components of our business infrastructure or to further our business objectives. These third parties may provide services to us and our clients or serve as partners in business activities. We rely on these third parties to fulfill their obligations to us, to accurately inform us of relevant information and to conduct their activities professionally and in a manner that reflects positively on us. Any failure of our business partners, service providers or other third parties to meet their commitments to us or to perform in accordance with our expectations could result in operational issues, increased expenditures, damage to our reputation or loss of clients, which could harm our business and operations, financial performance, strategic growth or reputation.

We depend on the accuracy and completeness of information about customers and counterparties.

In deciding whether to extend credit or enter into other transactions with customers and counterparties, we may rely on information furnished to us by or on behalf of customers and counterparties, including financial statements and other financial information. We also may rely on representations of customers and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. For example, under our accounts receivable financing arrangements, we rely on information, such as invoices, contracts and other supporting documentation, provided by our clients and their account debtors to determine the amount of credit to extend. Similarly, in deciding whether to extend credit, we may rely upon our customers' representations that their financial statements conform to U.S. GAAP and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. We also may rely on customer representations and certifications, or other audit or accountants' reports, with respect to the business and financial condition of our clients. Our financial condition, results of operations, financial reporting and reputation could be negatively affected if we rely on materially misleading, false, inaccurate or fraudulent information.

Our accounting policies and methods are key to how we report our financial condition and results of operations. They require management to make judgments and estimates about matters that are uncertain.

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. Our management must exercise judgment in selecting and applying many of these accounting policies and methods so they comply with U.S. GAAP and reflect management's judgment of the most appropriate manner to report our financial condition and results. In some cases, management must select the accounting policy or method to apply from two or more alternatives, any of which might be reasonable under the circumstances yet might result in our reporting materially different amounts than would have been reported under a different alternative.

Changes in accounting standards could materially impact our financial statements.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

From time to time, the FASB or the SEC may change the financial accounting and reporting standards that govern the preparation of our financial statements. In addition, the bodies that interpret the accounting standards (such as banking regulators or

Table of Contents

outside auditors) may change their interpretations or positions on how these standards should be applied. These changes may be beyond our control, can be hard to predict and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retrospectively, or apply an existing standard differently, also retrospectively, in each case resulting in our revising or restating prior period financial statements.

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results. As a result, current and potential stockholders could lose confidence in our financial reporting, which would harm our business and the trading price of our stock.

If we identify material weaknesses in our internal control over financial reporting or are otherwise required to restate our financial statements, we could be required to implement expensive and time-consuming remedial measures and could lose investor confidence in the accuracy and completeness of our financial reports. We may also face regulatory enforcement or other actions, including the potential delisting of our securities from NASDAQ. This could have an adverse effect on our business, financial condition and results of operations, including our stock price, and could potentially subject us to litigation.

Legal/Regulatory Risks

We are subject to extensive regulation that could limit or restrict our activities and impose financial requirements or limitations on the conduct of our business.

SVB Financial Group, including the Bank, is extensively regulated under federal and state laws and regulations governing financial institutions, including those imposed by the FDIC, the Federal Reserve and the California Department of Financial Institutions. Federal and state laws and regulations govern, limit or otherwise affect the activities in which we may engage and may affect our ability to expand our business over time. In addition, a change in the applicable statutes, regulations or regulatory policy could have a material effect on our business, including limiting the types of financial services and products we may offer or increasing the ability of nonbanks to offer competing financial services and products. These laws and regulations also require financial institutions, including SVB Financial and the Bank, to maintain certain minimum levels of capital, which may require us to raise additional capital in the future or affect our ability to use our capital resources for other business purposes. In addition, increased regulatory requirements (and the associated compliance costs), whether due to the adoption of new laws and regulations, changes in existing laws and regulations, or more expansive or aggressive interpretations of existing laws and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Additional requirements under our regulatory framework intended to strengthen the U.S. financial system could adversely affect us.

Recent government efforts to strengthen the U.S. financial system have resulted in the imposition of additional regulatory requirements, including expansive financial services regulatory reform legislation. On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Financial Reform Act) was enacted. This legislation sets out sweeping regulatory changes. The requirements include, among others: (i) new requirements on banking, derivative and investment activities, including modified capital requirements, the repeal of the prohibition on the payment of interest on business demand accounts, debit card interchange fee requirements, and the Volcker Rule, which restricts the sponsorship, or the acquisition or retention of ownership interests, in private equity funds; (ii) corporate governance and executive compensation requirements; (iii) enhanced financial institution safety and soundness regulations, including increases in assessment fees and deposit insurance coverage; and (iv) the establishment of new regulatory bodies, such as the Bureau of Consumer Financial Protection. Certain provisions are effective immediately; however, much of the Financial Reform Act is subject to further rulemaking (at least 200 implementation rulemakings) and/or studies (at least 60 further studies or reports). As such, while we are subject to the legislation, we cannot fully assess the impact of the Financial Reform Act until final rules are implemented, which depending on the rule, could be within six to 24 months from the enactment of the Financial Reform Act, or later.

Current and future legal and regulatory requirements, restrictions and regulations, including those imposed under the Financial Reform Act, may have a material and adverse effect on our business, financial condition, and results of operations and may make it more difficult for us to attract and retain qualified executive officers and employees.

If we were to violate international, federal or state laws or regulations governing financial institutions, we could be subject to disciplinary action that could have a material adverse effect on our business, financial condition, results of operations and reputation.

International, federal and state banking regulators possess broad powers to take supervisory or enforcement action with respect to financial institutions. Other regulatory bodies, including the SEC, NASDAQ, the Financial Industry Regulatory Authority (FINRA) and state securities regulators, regulate broker-dealers, including our subsidiary, SVB Securities. If SVB Financial Group were to violate, even if unintentionally or

inadvertently, the laws governing public companies, financial institutions and broker-

Table of Contents

dealers, the regulatory authorities could take various actions against us, depending on the severity of the violation, such as revoking necessary licenses or authorizations, imposing censures, civil money penalties or fines, issuing cease and desist or other supervisory orders, and suspending or expelling from the securities business a firm, its officers or employees. Supervisory actions could result in higher capital requirements, higher insurance premiums, higher levels of liquidity available to meet the Bank's financial needs and limitations on the activities of SVB Financial Group. These remedies and supervisory actions could have a material adverse effect on our business, financial condition, results of operations and reputation.

SVB Financial relies on dividends from its subsidiaries for most of its cash revenues.

SVB Financial is a holding company and is a separate and distinct legal entity from its subsidiaries. It receives substantially all of its cash revenues from dividends from its subsidiaries, primarily the Bank. These dividends are a principal source of funds to pay operating costs, borrowings, if any, and dividends, should SVB Financial elect to pay any. Various federal and state laws and regulations limit the amount of dividends that the Bank and certain of our nonbank subsidiaries may pay to SVB Financial. Also, SVB Financial's right to participate in a distribution of assets upon a subsidiary's liquidation or reorganization is subject to the prior claims of the subsidiary's creditors.

Strategic/Reputation Risks

Concentration of risk increases the potential for significant losses.

Concentration of risk increases the potential for significant losses in our business. Our clients are concentrated by industry niches: technology, life science, venture capital/private equity and premium wine. Many of our client companies are concentrated by certain stages within their life cycles, such as early-stage or mid-stage, and many of these companies are venture capital-backed. Our loan concentrations are derived from our borrowers engaging in similar activities or types of loans extended to a diverse group of borrowers that could cause those borrowers to be similarly impacted by economic or other conditions. Any adverse effect on any of our areas of concentration could have a material impact on our business, results of operations and financial condition. Due to our concentrations, we may suffer losses even when economic and market conditions are generally favorable for our competitors.

Decreases in the amount of equity capital available to our portfolio companies could adversely affect our business, growth and profitability.

Our core strategy is focused on providing banking products and services to companies, including in particular to emerging stage to mid-stage companies, that receive financial support from sophisticated investors, including venture capital or private equity firms, angels, and corporate investors. We derive a meaningful share of our deposits from these companies and provide them with loans as well as other banking products and services. In some cases, our lending credit decision is based on our analysis of the likelihood that our venture capital or angel-backed client will receive additional rounds of equity capital from investors. If the amount of capital available to such companies decreases, it is likely that the number of new clients and investor financial support to our existing borrowers could decrease, which could have an adverse effect on our business, profitability and growth prospects.

Among the factors that have affected and could in the future affect the amount of capital available to our portfolio companies are the receptivity of the capital markets, the prevalence of IPO's or M&A activity of companies within our technology and life science industry sectors, the availability and return on alternative investments and general economic conditions in the technology, life science and venture capital/private equity industries. Reduced capital markets valuations could reduce the amount of capital available to our client companies, including companies within our technology and life science industry sectors.

Because our business and strategy are largely based on this venture capital/private equity financing framework focused on our particular client niches, any material changes in the framework, including adverse trends in investment or fundraising levels, may have a materially adverse effect on our business, strategy and overall profitability.

We face competitive pressures that could adversely affect our business, results of operations, financial condition and future growth.

Other banks and specialty and diversified financial services companies and debt funds, many of which are larger than we are, offer lending, leasing, other financial products and advisory services to our client base. In addition, we compete with hedge funds and private equity funds. In some cases, our competitors focus their marketing on our industry sectors and seek to increase their lending and other financial relationships with technology companies or special industries such as wineries. In other cases, our competitors may offer a broader range of financial products to our clients. When new competitors seek to enter one of our markets, or when existing market participants seek to increase their market share, they sometimes undercut the pricing and credit terms prevalent in that market, which could adversely affect our market share or ability to exploit

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

new market opportunities. Our pricing and credit terms could deteriorate if we act to meet these competitive challenges, which could adversely affect our business, results of operations, financial condition and future growth. Similarly, competitive pressures could adversely affect the business, results of operations, financial condition and future growth of our non-banking services, including our access to capital and attractive investment opportunities for our funds business.

Table of Contents

Our ability to maintain or increase our market share depends on our ability to meet the needs of existing and future clients.

Our success depends, in part, upon our ability to adapt our products and services to evolving industry standards and to meet the needs of existing and potential future clients. A failure to achieve market acceptance for any new products we introduce, a failure to introduce products that the market may demand, or the costs associated with developing, introducing and providing new products and services could have an adverse effect on our business, results of operations, growth prospects and financial condition.

We face risks in connection with our strategic undertakings.

If appropriate opportunities present themselves, we may engage in strategic activities, which could include acquisitions, joint ventures, partnerships, investments or other business growth initiatives or undertakings. There can be no assurance that we will successfully identify appropriate opportunities, that we will be able to negotiate or finance such activities or that such activities, if undertaken, will be successful.

In order to finance future strategic undertakings, we might obtain additional equity or debt financing. Such financing might not be available on terms favorable to us, or at all. If obtained, equity financing could be dilutive and the incurrence of debt and contingent liabilities could have a material adverse effect on our business, results of operations and financial condition.

Our ability to execute strategic activities successfully will depend on a variety of factors. These factors likely will vary based on the nature of the activity but may include our success in integrating the operations, services, products, personnel and systems of an acquired company into our business, operating effectively with any partner with whom we elect to do business, retaining key employees, achieving anticipated synergies, meeting management's expectations and otherwise realizing the undertaking's anticipated benefits. Our ability to address these matters successfully cannot be assured. In addition, our strategic efforts may divert resources or management's attention from ongoing business operations and may subject us to additional regulatory scrutiny. If we do not successfully execute a strategic undertaking, it could adversely affect our business, financial condition, results of operations, reputation and growth prospects. In addition, if we were to conclude that the value of an acquired business had decreased and that the related goodwill had been impaired, that conclusion would result in an impairment of goodwill charge to us, which would adversely affect our results of operations.

We face risks associated with international operations.

One component of our strategy is to expand internationally. To date, we have opened offices in China, India, Israel and the United Kingdom. We plan to expand our operations in those locations and may expand beyond these countries. Our efforts to expand our business internationally carry with them certain risks, including risks arising from the uncertainty regarding our ability to generate revenues from foreign operations. In addition, there are certain risks inherent in doing business on an international basis, including, among others, legal, regulatory and tax requirements and restrictions, uncertainties regarding liability, tariffs and other trade barriers, difficulties in staffing and managing foreign operations, incremental requirement of management's attention and resources, differing technology standards or customer requirements, cultural differences, political and economic risks and financial risks, including currency and payment risks. These risks could adversely affect the success of our international operations and could have a material adverse effect on our overall business, results of operations and financial condition. In addition, we face risks that our employees may fail to comply with applicable laws and regulations governing our international operations, including the U.S. Foreign Corrupt Practices Act and foreign laws and regulations, which could have a material adverse effect on us.

Our business reputation is important and any damage to it could have a material adverse effect on our business.

Our reputation is very important to sustain our business, as we rely on our relationships with our current, former and potential clients and stockholders, the venture capital and private equity communities, and the industries that we serve. Any damage to our reputation, whether arising from regulatory, supervisory or enforcement actions, matters affecting our financial reporting or compliance with SEC and exchange listing requirements, negative publicity, or our conduct of our business or otherwise could have a material adverse effect on our business.
