#### FRIEDMAN INDUSTRIES, INCORPORATED

#### CONDENSED NOTES TO QUARTERLY REPORT UNAUDITED

#### NOTE A BASIS OF PRESENTATION

The accompanying unaudited, condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the consolidated financial statements and footnotes included in the Company s annual report on Form 10-K for the year ended March 31, 2012.

#### NOTE B INVENTORIES

Inventories consist of prime coil, non-standard coil and tubular materials. Prime coil inventory consists primarily of raw materials, non-standard coil inventory consists primarily of finished goods, and tubular inventory consists of both raw materials and finished goods. Inventories are valued at the lower of cost or replacement market. Cost for prime coil inventory is determined under the last-in, first-out ( LIFO ) method. Cost for non-standard coil inventory is determined using the specific identification method. Cost for tubular inventory is determined using the weighted average method.

During the quarters ended June 30, 2012 and 2011, LIFO inventories were liquidated. At June 30, 2012, a deferred debit of \$95,309 was recorded to reflect the difference in replacement cost and LIFO cost. LIFO inventories at June 30, 2011 were replaced by March 31, 2012. A deferred credit of \$82,653 was recorded at June 30, 2011 to reflect the difference between replacement cost and LIFO cost.

A summary of inventory values by product group follows:

|                             | June 30,<br>2012 | March 31,<br>2012 |
|-----------------------------|------------------|-------------------|
| Prime Coil Inventory        | \$ 6,839,110     | \$ 8,562,607      |
| Non-Standard Coil Inventory | 2,641,671        | 1,853,445         |
| Tubular Raw Material        | 3,363,025        | 6,859,871         |
| Tubular Finished Goods      | 21,996,369       | 19,477,757        |
|                             | \$ 34,840,175    | \$ 36,753,680     |

#### **Table of Contents**

Corporate expenses reflect general and administrative expenses not directly associated with segment operations and consist primarily of corporate executive and accounting salaries, professional fees and services, bad debts, profit sharing expense, corporate insurance expenses and office supplies. Corporate assets consist primarily of cash and the cash value of officers life insurance.

#### NOTE D SUPPLEMENTAL CASH FLOW INFORMATION

The Company paid income taxes of approximately \$214,000 and \$398,000 in the quarters ended June 30, 2012 and 2011, respectively. No interest was paid in the quarters ended June 30, 2012 and 2011, respectively. Noncash financing activities consisted of accrued dividends of \$883,928 in both of the quarters ended June 30, 2012 and 2011.

#### NOTE E SUBSEQUENT EVENTS

The Company evaluated subsequent events through the filing date of its Form 10-Q for the quarter ended June 30, 2012. The Company is not aware of any subsequent events that would require recognition or disclosure in the consolidated condensed financial statements.

# Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

#### **Results of Operations**

Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011

During the three months ended June 30, 2012, sales, costs of goods sold and gross profit increased \$499,314, \$8,381 and \$490,933, respectively, from the comparable amounts recorded during the three months ended June 30, 2011. The increase in sales resulted from an increase in tons sold offset by a decrease in the average selling price. Tons sold increased from approximately 46,000 tons in the 2011 quarter to approximately 50,000 tons in the 2012 quarter. The average per ton selling price decreased from approximately \$854 per ton in the 2011 quarter to \$789 per ton in the 2012 quarter. In the 2012 quarter, gross profit primarily benefited from improved margins associated with the coil product segment. In the 2011 quarter, the Company experienced an increase in material cost and was unable to pass all of this increase along to its customers. Gross profit as a percentage of sales increased from approximately 10.7% in the 2011 quarter to approximately 11.8% in the 2012 quarter.

Coil product segment sales increased approximately \$1,400,000 during the 2012 quarter. This increase was related primarily to an increase in tons sold, which increased from approximately 17,000 in the 2011 quarter to 22,000 in the 2012 quarter. The average per ton selling price of coil products decreased from approximately \$897 per ton in the 2011 quarter to \$772 per ton in the 2012 quarter. Coil segment operations reflected an operating profit of approximately \$354,000 in the 2012 quarter and an operating loss of approximately \$329,000 in the 2011 quarter. In the 2011 quarter, the Company experienced an increase in material cost and was unable to pass all of this increase to its customers. Coil operations were adversely impacted in both the 2012 and 2011 quarters by soft demand. Management believes that market conditions for coil products will not improve until the U.S. economy improves and generates a significant improvement in the demand for durable goods.

In August 2008, the Company began operating its coil facility in Decatur, Alabama. This facility produced operating losses of approximately \$309,000 and \$245,000 in the 2012 and 2011 quarters, respectively. The Company expects that this facility will continue to produce losses until demand for coil products improves.

The Company is primarily dependent on Nucor Steel Company ( NSC ) for its supply of coil inventory. In the 2012 quarter, NSC continued to supply the Company with steel coils in amounts that were adequate for the Company spurposes. The Company does not currently anticipate any significant change in such supply from NSC. Loss of NSC as a supplier could have a material adverse effect on the Company s business.

Tubular product segment sales decreased approximately \$900,000 during the 2012 quarter. This decrease resulted primarily from a decrease in the average per ton selling price. The average per ton selling price decreased from approximately \$828 per ton in the 2011 quarter to approximately \$802 per ton in the 2012 quarter. In both the 2012 and 2011 quarters, the tubular segment sold approximately 28,000 tons of tubular products. Tubular product segment operating profits as a percentage of segment sales were approximately 16.3% and 16.7% in the 2012 and 2011 quarters, respectively.

#### **Table of Contents**

U. S. Steel Tubular Products, Inc. ( USS ) is the Company s primary supplier of tubular products and coil material used in pipe manufacturing and is a major customer of finished tubular products. Certain finished tubular products used in the energy business are manufactured by the Company and sold to USS. Loss of USS as a supplier or customer could have a material adverse effect on the Company s business. The Company can make no assurances as to orders from USS or the amounts of pipe and coil material that will be available from USS in the future.

During the 2012 quarter, general, selling and administrative costs increased \$140,017 from the amount recorded during the 2011 quarter. This increase was related primarily to an increase in bonuses and commissions associated with increased earnings and volume.

Income taxes in the 2012 quarter increased \$84,809 from the amount recorded in the 2011 quarter. This increase was related primarily to the increase in earnings before taxes in the 2012 quarter. The effective tax rate was 32.5% and 33.5% in the 2012 and 2011 quarters, respectively.

#### FINANCIAL POSITION, LIQUIDITY AND CAPITAL RESOURCES

The Company remained in a strong, liquid position at June 30, 2012. The current ratios were 7.9 at June 30, 2012 and 4.7 at March 31, 2012. Working capital was \$52,743,730 at June 30, 2012, and \$51,154,503 at March 31, 2012.

During the quarter ended June 30, 2012, the Company maintained assets and liabilities at levels it believed were commensurate with operations. Changes in balance sheet amounts occurred in the ordinary course of business. Cash decreased primarily as a result of a decrease in accounts payable. The Company expects to continue to monitor, evaluate and manage balance sheet components depending on changes in market conditions and the Company s operations.

The Company has in the past and may in the future borrow funds on a term basis to build or improve facilities. The Company currently has no plans to borrow any significant amount of funds on a term basis.

Notwithstanding the current market conditions, the Company believes its cash flows from operations and borrowing capability due to its strong balance sheet are adequate to fund its expected cash requirements for the next twenty-four months.

# CRITICAL ACCOUNTING POLICIES

The preparation of consolidated financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. One such accounting policy that requires significant estimates and judgments is the valuation of LIFO inventories in the Company s quarterly reporting. The quarterly valuation of inventory requires estimates of the year end quantities, which is inherently difficult. Historically, these estimates have been materially correct. In the quarter ended June 30, 2012, LIFO inventories were reduced and are expected to be replaced by March 31, 2013. In the quarter ended June 30, 2011, LIFO inventories were replaced by March 31, 2012. A deferred debit of \$95,309 and a deferred credit of \$82,653 were recorded at June 30, 2012 and June 30, 2011, respectively, to reflect the difference between replacement cost and LIFO cost.

# FORWARD-LOOKING STATEMENTS

From time to time, the Company may make certain statements that contain forward-looking information (as defined in the Private Securities Litigation Reform Act of 1996, as amended) and that involve risk and uncertainty. These forward-looking statements may include, but are not limited to, future results of operations, future production capacity, product quality and proposed expansion plans. Forward-looking statements may be made by management orally or in writing including, but not limited to, this Management s Discussion and Analysis of Financial Condition and Results of Operations and other sections of the Company s filings with the U.S. Securities and Exchange Commission (the SEC) under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended (the Exchange Act). Actual results and trends in the future may differ materially depending on a variety of factors including, but not limited to, changes in the demand for and prices of the Company s products, changes in the demand for steel and steel products in general and the Company s success in executing its internal operating plans, including any proposed expansion plans.

8

#### Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not Required

#### Item 4. Controls and Procedures

The Company s management, with the participation of the Company s principal executive officer (CEO) and principal financial officer (CFO), evaluated the effectiveness of the Company s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act) as of the end of the fiscal quarter ended June 30, 2012. Based on this evaluation, the CEO and CFO have concluded that the Company s disclosure controls and procedures were effective as of the end of the fiscal quarter ended June 30, 2012 to ensure that information that is required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC s rules and forms and (ii) accumulated and communicated to the Company s management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company s internal control over financial reporting that occurred during the fiscal quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting.
