**Item 7.01. Regulation FD Disclosure**

In the fourth quarter of 2012, Kellogg Company (the Company) changed its policy for recognizing expense for its pension and post-retirement benefit plans. Historically, the Company's accounting has resulted in recognition of changes in fair value of assets over a five-year period, and amortization of deferred actuarial gains and losses over a number of years. Under the new policy, gains and losses from these plans will be recognized in an annual mark-to-market adjustment that is recorded in the fourth quarter of each year.

In addition, concurrent with this change, the Company has elected to modify its process of allocating pension and post-retirement benefit plan costs to reportable segments. Historically, the Company has allocated all costs for these plans to the reportable segments. Beginning in the fourth quarter of 2012, the Company included only the service cost of these plans within the financial results of the reportable segments. All other costs related to these plans, such as interest cost, expected return on plan assets, and the annual mark-to-market adjustment will be reported in the Company's Corporate segment.

These changes have been applied retrospectively. Financial results from prior periods have been recast to include the impact as if the changes had been in place during those periods. For information about the Company's 2012 financial results, refer to the Company's press release issued on the date hereof.

Select recast measures of financial performance for 2012 and 2011, prepared in accordance with Generally Accepted Accounting Principles, have been included in Exhibit 99.1 to this Current Report on Form 8-k to provide year-over-year comparability for future periods.
