CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION

The accompanying consolidated financial statements should be read in conjunction with the Annual Report on Form 10-K for the fiscal year ended December 31, 2012 for SBA Communications Corporation and its subsidiaries (the "Company"). The December 31, 2012 Condensed Consolidated Balance Sheet has been derived from the Company's audited consolidated financial statements. These financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, omit or condense certain footnotes and other information normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States. In the opinion of the Company's management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. The results of operations for an interim period may not give a true indication of the results for the year. Certain reclassifications have been made to prior year amounts or balances to conform to the presentation adopted in the current year.

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in consolidated financial statements and accompanying notes. While the Company believes that such estimates are fair when considered in conjunction with the consolidated financial statements and accompanying notes, the actual amount of such estimates, when known, will vary from these estimates.

2. FAIR VALUE MEASUREMENTS

Items Measured at Fair Value on a Recurring Basis The Company's earnouts related to acquisitions are measured at fair value on a recurring basis using Level 3 inputs. The Company determines the fair value of acquisition-related contingent consideration, and any subsequent changes in fair value, using a discounted probability-weighted approach using Level 3 inputs. The fair value of the earnouts is reviewed quarterly and is based on the payments the Company expects to make based on historical internal observations related to the anticipated performance of the underlying assets. The Company's estimate of the fair value of its obligation if the performance targets contained in various acquisition agreements were met was \$8.9 million and \$9.8 million as of March 31, 2013 and December 31, 2012, respectively, which the Company recorded in accrued expenses on its Consolidated Balance Sheets. The maximum potential obligation related to the performance targets was \$15.9 million as of March 31, 2013.

Items Measured at Fair Value on a Nonrecurring Basis The Company's long-lived assets, intangibles, and asset retirement obligations are measured at fair value on a nonrecurring basis using Level 3 inputs. Level 3 valuations rely on unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. The Company considers many factors and makes certain assumptions when making this assessment, including but not limited to: general market and economic conditions, historical operating results, geographic location, lease-up potential, and expected timing of lease-up. The fair value of the long-lived assets, intangibles, and asset retirement obligations is calculated using a discounted cash flow model. During the three months ended March 31, 2013, the Company recognized an impairment charge of \$2.9 million included in asset impairment and decommission costs in the accompanying Consolidated Statement of Operations, related to its long-lived assets resulting from the Company's analysis that the future cash flows from certain tower sites would not recover the carrying value of the investment in those tower sites. During the three months ended March 31, 2012, the Company recognized an impairment charge of \$0.3 million.

Fair Value of Financial Instruments The carrying values of cash and cash equivalents, accounts receivable, restricted cash, accounts payable, and short-term investments, which consist of \$4.0 million and \$5.3 million in certificate of deposits, as of March 31, 2013 and December 31, 2012, respectively, approximate their related estimated fair values due to the short maturity of those instruments. The Company's estimate of the fair value of its held-to-maturity investments in treasury and corporate bonds, including current portion, are based primarily upon Level 1 reported market values. As of March 31, 2013, the carrying value and fair value of the held-to-maturity investments,

Table of Contents**SBA COMMUNICATIONS CORPORATION AND SUBSIDIARIES****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

including current portion, was \$1.3 million and \$1.5 million, respectively. As of December 31, 2012, the carrying value and fair value of the held-to-maturity investments, including current portion, was \$1.3 million and \$1.5 million, respectively.

The Company determines fair value of its debt instruments utilizing various Level 2 sources including quoted prices and indicative quotes (non-binding quotes) from brokers that require judgment to interpret market information including implied credit spreads for similar borrowings on recent trades or bid/ask prices. The fair value of the Revolving Credit Facility is considered to be equal to the carrying value because the interest payments are based on Eurodollar rates that reset every month. The Company does not believe its credit risk has changed materially from the date the applicable Eurodollar Rate plus 187.5 basis points was set for the Revolving Credit Facility. The following table reflects fair values, principal balances, and carrying values of the Company's debt instruments (see Note 8).

Table of Contents**SBA COMMUNICATIONS CORPORATION AND SUBSIDIARIES****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****3. RESTRICTED CASH**

Restricted cash consists of the following:

	As of March 31, 2013	As of December 31, 2012	Included on Balance Sheet
	(in thousands)		
Securitization escrow accounts	\$ 25,943	\$ 26,774	Restricted cash - current asset
Payment and performance bonds	937	934	Restricted cash - current asset
Surety bonds and workers compensation	11,990	11,989	Other assets - noncurrent
Total restricted cash	\$ 38,870	\$ 39,697	

Pursuant to the terms of the Secured Tower Revenue Securities (see Note 8), the Company is required to establish a securitization escrow account, held by the indenture trustee, into which all rents and other sums due on the towers are directly deposited by the lessees. These restricted cash amounts are used to fund reserve accounts for the payment of (1) debt service costs, (2) ground rents, real estate and personal property taxes, and insurance premiums related to tower sites, (3) trustee and servicing expenses, (4) management fees, and (5) to reserve a portion of advance rents received from tenants. The restricted cash in the controlled deposit account in excess of required reserve balances is subsequently released to the Borrowers (as defined in the Annual Report on Form 10-K) monthly, provided that the Borrowers are in compliance with their debt service coverage ratio and that no event of default has occurred. All monies held by the indenture trustee are classified as restricted cash on the Company's Consolidated Balance Sheets.

Payment and performance bonds relate primarily to collateral requirements for tower construction currently in process by the Company. Cash is pledged as collateral related to surety bonds issued for the benefit of the Company or its affiliates in the ordinary course of business and primarily related to the Company's tower removal obligations. As of March 31, 2013, the Company had \$34.8 million in surety, payment and performance bonds for which it was required to post \$10.5 million in collateral. As of December 31, 2012, the Company had \$35.1 million in surety, payment and performance bonds for which it was required to post \$10.5 million in collateral. The Company periodically evaluates the collateral posted for its bonds to ensure that it meets the minimum requirements. The Company had pledged \$2.3 million as of each of March 31, 2013 and December 31, 2012, as collateral related to its workers compensation policy.

4. ACQUISITIONS

During the first quarter of 2013, the Company acquired 41 completed towers and related assets and liabilities. These acquisitions were not significant to the Company and, accordingly, pro forma financial information has not been presented. The Company evaluates all acquisitions after the applicable closing date of each transaction to determine whether any additional adjustments are needed to the allocation of the purchase price paid for the assets acquired and liabilities assumed by major balance sheet caption, as well as the separate recognition of intangible assets from goodwill if certain criteria are met.

were not included in diluted loss per share because the effect would have been anti-dilutive for each of the three months ended March 31, 2013 and 2012, respectively. Accordingly, basic and diluted loss per common share and the weighted average number of shares used in the computation are the same for each period presented.

Stock Repurchases

The Company's Board of Directors authorized a stock repurchase program on April 27, 2011. This program authorizes the Company to purchase, from time to time, up to \$300.0 million of the Company's outstanding Class A common stock through open market repurchases in compliance with Rule 10b-18 of the Securities Exchange Act of 1934, as amended, and/or in privately negotiated transactions at management's discretion based on market and business conditions, applicable legal requirements and other factors. During the three months ended March 31, 2013 and 2012, the Company did not repurchase any shares in conjunction with the stock repurchase program. As of March 31, 2013, the Company had a remaining authorization to repurchase an additional \$150.0 million of its common stock under its current \$300.0 million stock repurchase program.

11. STOCK-BASED COMPENSATION***Stock Options***

The Company records compensation expense for employee stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes option-pricing model with the assumptions included in the table below. The Company uses a combination of historical data and historical volatility to establish the expected volatility. Historical data is used to estimate the expected option life and the expected forfeiture rate. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for the estimated life of the option. The following assumptions were used to estimate the fair value of options granted using the Black-Scholes option-pricing model:

	For the three months ended March 31,	
	2013	2012
Risk free interest rate	0.60% - 0.81%	0.62% - 0.83%
Dividend yield	0.0%	0.0%
Expected volatility	25.0% - 29.0%	53.0%

12. INCOME TAXES

Edgar Filing: SBA COMMUNICATIONS CORP - Form 10-Q

The Company had U.S. taxable losses during the three months ended March 31, 2013 and 2012, and, as a result, federal and state net operating loss carry-forwards have been generated. The U.S. federal and state net operating loss carry-forwards of the Company have a full valuation allowance as management believes it is not more-likely-than-not that the Company will generate sufficient taxable income in future periods to recognize the losses. However, a foreign tax provision is recognized because certain international subsidiaries of the Company have profitable operations or a net deferred tax liability position.

13. SEGMENT DATA

The Company operates principally in two business segments: site leasing and site development. The Company's reportable segments are strategic business units that offer different services. They are managed separately based on the fundamental differences in their operations. The site leasing segment includes results of the managed and sublease businesses. The site development segment includes the results of both consulting and construction related activities.

Table of Contents**SBA COMMUNICATIONS CORPORATION AND SUBSIDIARIES****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

During the fourth quarter of 2012, the Company combined its site development segments, as the nature of the services were complementary to one another. All prior periods presented have been restated to conform to the current year presentation.

For the three months ended March 31, 2013 and 2012, the Company's leasing revenues generated outside of the United States were 7.1% and 5.9%, respectively, of total consolidated leasing revenues. As of March 31, 2013 and December 31, 2012, the Company's total assets outside of the United States were 9.8% and 12.2%, respectively, of total consolidated assets. Total assets held outside of the United States at December 31, 2012 included \$178.1 million of cash in Brazil, which was paid as part of the Vivo acquisition in January 2013.

The Company generally does not require collateral.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We are a leading independent owner and operator of wireless communications towers. Our principal operations are in the United States and its territories. In addition, we own and operate towers in Canada, Central America and South America. Our primary business line is our site leasing business, which contributed approximately 96.7% of our total segment operating profit for the year-to-date period ended March 31, 2013. In our site leasing business, we lease antenna space to wireless service providers on towers and other structures that we own, manage or lease from others. The towers that we own have been constructed by us at the request of a wireless service provider, constructed based on our own initiative or acquired. As of March 31, 2013, we owned 17,539 tower sites, the substantial majority of which have been built by us or built by other tower owners or operators who, like us, have built such towers to lease space to multiple wireless service providers. We also managed or leased approximately 4,900 actual or potential additional communications sites, approximately 500 of which were revenue producing as of March 31, 2013. Our other business line is our site development business, through which we assist wireless service providers in developing and maintaining their own wireless service networks.

Site Leasing

Our primary focus is the leasing of antenna space on our multi-tenant towers to a variety of wireless service providers under long-term lease contracts in the United States, Canada, Central America and South America. Site leasing revenues are received primarily from wireless service provider tenants, including AT&T, Sprint, Verizon Wireless, T-Mobile, Digicel, Claro, and Telefonica. Wireless service providers enter into numerous different tenant leases with us, each of which relates to the lease or use of space at an individual tower site. In the United States and Canada our tenant leases are generally for an initial term of five to ten years with five 5-year renewal periods at the option of the tenant. These tenant leases typically contain specific rent escalators, which average 3-4% per year, including the renewal option periods. Tenant leases in our Central and South America markets typically have an initial term of 10 years with 5-year renewal periods. In Central America, we have similar rent escalators to that of leases in the United States and Canada while our leases in South America typically escalate in accordance with a standard cost of living index.

Cost of site leasing revenue primarily consists of:

Rental payments on ground and other underlying property leases;

Straight-line rent adjustment for the difference between rental payments made and the expense recorded as if the payments had been made evenly throughout the minimum lease term (which may include renewal terms) of the underlying property leases;

Property taxes;

Site maintenance and monitoring costs (exclusive of employee related costs);

Utilities;

Property insurance; and

Deferred lease origination cost amortization.

Ground leases are generally for an initial term of five years or more with multiple renewal terms of five year periods at our option and provide for rent escalators which typically average 3-4% annually or provide for term

Table of Contents

escalators of approximately 15%. Of the 17,539 tower sites we owned as of March 31, 2013, approximately 70% were located on parcels of land that we own, land subject to perpetual easements, or parcels of land in which we have a leasehold interest that extends beyond 20 years. For any given tower, costs are relatively fixed over a monthly or an annual time period. As such, operating costs for owned towers do not generally increase as a result of adding additional customers to the tower. The amount of direct costs associated with operating a tower varies from site to site depending on the taxing jurisdiction and the height and age of the tower. The ongoing maintenance requirements are typically minimal and include replacing lighting systems, painting a tower or upgrading or repairing an access road or fencing.

As indicated in the table below, our site leasing business generates substantially all of our total segment operating profit. For information regarding our operating segments, please see Note 13 of our Condensed Notes to Consolidated Financial Statements included in this quarterly report.

	Revenues For the three months ended March 31, 2013 2012 (dollars in thousands)	
Site leasing revenue	\$ 273,504	\$ 172,923
Total revenues	\$ 313,071	\$ 192,490

Total segment operating profit ⁽¹⁾	\$ 212,376	\$ 140,297
Site leasing segment operating profit percentage of total segment operating profit ⁽¹⁾	96.7%	98.0%

⁽¹⁾ Site leasing segment operating profit and total segment operating profit are non-GAAP financial measures. We reconcile these measures and other Regulation G disclosures in this quarterly report in the section entitled Non-GAAP Financial Measures. We believe that over the long-term, site leasing revenues will continue to grow as wireless service providers lease additional antenna space on our towers due to increasing minutes of network use and data transfer, network expansion and network coverage requirements. We believe our site leasing business is characterized by stable and long-term recurring revenues, predictable operating costs and minimal non-discretionary capital expenditures. Due to the relatively young age and mix of our tower portfolio, we expect future expenditures required to maintain these towers to be minimal. Consequently, we expect to grow our cash flows by (1) adding tenants to our towers at minimal incremental costs by using existing tower capacity or requiring wireless service providers to bear all or a portion of the cost of tower modifications and (2) executing monetary amendments as wireless service providers upgrade their equipment. Furthermore, because our towers are strategically positioned and our customers typically do not relocate, we have historically experienced low tenant lease terminations as a percentage of revenue.

Table of Contents

Site Development

Our site development business, which is conducted in the United States only, is complementary to our site leasing business and provides us the ability to keep in close contact with the wireless service providers who generate substantially all of our site leasing revenue and to capture ancillary revenues that are generated by our site leasing activities, such as antenna and equipment installation at our tower locations. Site development services revenues are received primarily from providing a full range of end to end services to wireless service providers or companies providing development or project management services to wireless service providers. Our services include: (1) network pre-design; (2) site audits; (3) identification of potential locations for towers and antennas; (4) support in buying or leasing of the location; (5) assistance in obtaining zoning approvals and permits; (6) tower and related site construction; (7) antenna installation; and (8) radio equipment installation, commissioning and maintenance.

For information regarding our operating segments, see Note 13 of our Condensed Notes to Consolidated Financial Statements included in this quarterly report.

International Operations

As of March 31, 2013, we had operations in Canada, Costa Rica, El Salvador, Guatemala, Nicaragua, Panama, and Brazil. Our operations in these countries are solely in the site leasing business, and we expect to expand operations through new builds and acquisitions. Tenant leases in the Canadian market typically have similar terms and conditions as those in the United States, with an initial term of five years, and specific rent escalators. Tenant leases in Central America and Brazil typically have a ten year initial term. Tenant leases in Central America typically have similar renewal terms and rent escalators as those in the United States and Canada while those in Brazil are based on a standard cost of living index.

In our Central American markets, significantly all of our revenue, expenses, and capital expenditures arising from our new build activities are denominated in U.S. dollars. Specifically, our ground leases, our tenant leases and most of our tower related expenses are due, and paid, in U.S. dollars. In our Central American markets, our local currency obligations are principally limited to (1) permitting and other local fees, (2) utilities and (3) taxes. In our Canadian and Brazilian operations, significantly all of our revenue, expenses and capital expenditures, including tenant leases, ground leases and other tower-related expenses, are denominated in local currency.

CRITICAL ACCOUNTING POLICIES

We have identified the policies and significant estimation processes listed in the Annual Report on Form 10-K as critical to our business operations and the understanding of our results of operations. The listing is not intended to be a comprehensive list. In many cases, the accounting treatment of a particular transaction is specifically dictated by accounting principles generally accepted in the United States, with no need for management's judgment in their application. In other cases, management is required to exercise judgment in the application of accounting principles with respect to particular transactions. The impact and any associated risks related to these policies on our business operations is discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations where such policies affect reported and expected financial results. For a detailed discussion on the application of these and other accounting policies, see Note 2 of our Consolidated Financial Statements contained in our Annual Report on Form 10-K for the year ended December 31, 2012. Our preparation of our financial statements requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements, and the reported amounts of revenue and expenses during the reporting periods. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. There can be no assurance that actual results will not differ from those estimates and such differences could be significant.

Table of Contents**KEY PERFORMANCE INDICATORS****Non-GAAP Financial Measures**

This report contains certain non-GAAP measures, including Segment operating profit and Adjusted EBITDA information. We have provided below a description of such non-GAAP measures, a reconciliation of such non-GAAP measures to their most directly comparable GAAP measures and an explanation as to why management utilizes these measures.

Segment Operating Profit:

We believe that Segment operating profit is an indicator of the operating performance of our site leasing and site development segments and is used to provide management with the ability to monitor the operating results and margin of each segment, while excluding the impact of depreciation, accretion and amortization, which is largely fixed and non-cash in nature. Segment operating profit is not intended to be an alternative measure of revenue or segment gross profit as determined in accordance with GAAP.

	Site leasing segment		
	For the three months		
	ended March 31,		Dollar
	2013	2012	Change
	(in thousands)		
Segment revenue	\$ 273,504	\$ 172,923	\$ 100,581
Segment cost of revenues (excluding depreciation, accretion and amortization)	(68,101)	(35,407)	(32,694)
Segment operating profit	\$ 205,403	\$ 137,516	\$ 67,887

	Site development segment		
	For the three months		
	ended March 31,		Dollar
	2013	2012	Change
	(in thousands)		
Segment revenue	\$ 39,567	\$ 19,567	\$ 20,000
Segment cost of revenues (excluding depreciation, accretion and amortization)	(32,594)	(16,786)	(15,808)
Segment operating profit	\$ 6,973	\$ 2,781	\$ 4,192

This increase in site leasing segment operating profit of \$67.9 million for the three months ended March 31, 2013 is primarily due to additional profit generated by (1) the towers that we acquired in the Mobilitie acquisition in the second quarter of 2012 and the TowerCo and Vivo acquisitions in the fourth quarter of 2012 and partially from towers constructed subsequent to March 31, 2012, (2) organic site leasing growth from new leases, (3) contractual rent escalators and (4) lease amendments with current tenants which increased the related rent to reflect additional equipment added to our towers.

The increase in site development segment operating profit of \$4.2 million for the three months ended March 31, 2013 is primarily due to the higher volume of work performed compared to the prior year associated with the deployment of next generation networks by wireless carriers, in particular, Sprint's Network Vision initiative.

Table of Contents**Adjusted EBITDA:**

We define Adjusted EBITDA as net loss excluding the impact of net interest expenses, provision for taxes, depreciation, accretion and amortization, asset impairment and decommission costs, non-cash compensation, net loss from extinguishment of debt, other income and expenses, acquisition related expenses, non-cash straight-line leasing revenue and non-cash straight-line ground lease expense.

We believe that Adjusted EBITDA is an indicator of the financial performance of our core businesses. Adjusted EBITDA is a component of the calculation that has been used by our lenders to determine compliance with certain covenants under our Senior Credit Agreement, 8.25% Notes, 5.625% Notes and 5.75% Notes. Adjusted EBITDA is not intended to be an alternative measure of operating income or gross profit margin as determined in accordance with GAAP.

The reconciliation of Adjusted EBITDA is as follows:

	For the three months ended March 31, 2013 2012 (in thousands)		Dollar Change
Net loss	\$ (22,376)	\$ (22,651)	\$ 275

Other income	(152)	(12)	(140)
Adjusted EBITDA	\$ 187,720	\$ 121,489	\$ 66,232

⁽¹⁾ Interest expense includes interest expense, non-cash interest expense and amortization of deferred financing fees.

⁽²⁾ Includes \$241 and \$433 of franchise taxes for the three months ended March 31, 2013 and 2012, respectively, reflected in selling, general, and administrative expenses in the Consolidated Statement of Operations.

Adjusted EBITDA was \$187.7 million for the three months ended March 31, 2013 compared to \$121.5 million for the three months ended March 31, 2012. The increase of \$66.2 million is primarily due to increased segment operating profit from our site leasing and site development segments partially offset by an increase in selling, general and administrative costs.

Revenues:

Site leasing revenues increased \$100.6 million for the three months ended March 31, 2013, as compared to the same period in the prior year, due largely to (i) revenues from the towers that we acquired, including \$75.7 from the Mobilitie, TowerCo, and Vivo towers acquired in 2012, and towers that we constructed subsequent to March 31, 2012 (ii) organic site leasing growth from new leases, contractual rent escalators and lease amendments which increased the related rent to reflect additional equipment added to our towers and (iii) increased straight-line leasing revenue associated with the master lease amendment with T-Mobile.

Edgar Filing: SBA COMMUNICATIONS CORP - Form 10-Q

Site development revenues increased \$20.0 million for the three months ended March 31, 2013, as compared to the same period in the prior year, as a result of a higher volume of work performed during the quarter as compared to the same period last year associated with the deployment of next generation networks by wireless carriers, in particular, Sprint's Network Vision initiative.

Table of Contents

Operating Expenses:

Site leasing cost of revenues increased \$32.7 million for the three months ended March 31, 2013, as compared to the same period in the prior year, primarily as a result of the growth in the number of tower sites owned by us, including \$31.3 million from the Mobilitie, TowerCo, and Vivo towers acquired during 2012, partially offset by the positive impact of our ground lease purchase program.

Site development cost of revenues increased \$15.8 million for the three months ended March 31, 2013, as compared to the same period in the prior year, as a result of a higher volume of work associated with the deployment of next generation networks by wireless carriers.

Selling, general and administrative expenses increased \$3.2 million for the three months ended March 31, 2013, as compared to the same period in the prior year, primarily as a result of an increase in personnel, salaries and benefits and non-cash compensation due in part to the Company's continued portfolio expansion.

Asset impairment and decommission costs increased \$3.4 million for the three months ended March 31, 2013, as compared to the same period in the prior year, primarily as a result of the write-off of assets and related costs associated with the decommissioning of 55 towers during the three months ended March 31, 2013.

Acquisition related expenses increased \$5.5 million for the three months ended March 31, 2013, as compared to the same period in the prior year, primarily as a result of an increase in acquisition and integration related expenses related to the Vivo tower acquisition which occurred at the end of the fourth quarter of 2012.

Depreciation, accretion and amortization expense increased \$43.5 million for the three months ended March 31, 2013, as compared to the same period in the prior year, due to an increase in the number of tower sites built and acquired by us, including the Mobilitie, TowerCo, and Vivo towers acquired during 2012. Depreciation, accretion, and amortization expense recorded for the three months ended March 31, 2013 includes \$38.5 million related to the Mobilitie, TowerCo, and Vivo acquisitions.

Operating Income:

Operating income increased \$16.5 million for the three months ended March 31, 2013 to \$56.8 million compared to \$40.3 million for the three months ended March 31, 2012, primarily due to higher segment operating profit in both the site leasing and site development segments offset by increases in acquisition related expenses, asset impairment and decommission costs, depreciation, accretion, and amortization expense, and selling, general and administrative expenses.

Other Income (Expense):

Interest expense increased \$17.2 million from the three months ended March 31, 2012 due to the higher weighted average principal amount of cash-interest bearing debt outstanding for the three months ended March 31, 2013 compared to the three months ended March 31, 2012, primarily resulting from the issuance of the 2012-1 Term Loan, 2012-2 Term Loan, 2012-1 Tower Securities, 5.75% Notes and 5.625% Notes during 2012. These increases were offset by the full redemption of \$375.0 million of principal balance of the 8.0% Notes and the redemption of the \$131.3 million in aggregate principal balance of the 8.25% Notes.

Amortization of deferred financing fees increased \$1.2 million for the three months ended March 31, 2013 from the three months ended March 31, 2012, primarily resulting from the issuance of the 2012-1 Term Loan, 2012-2 Term Loan, 2012-1 Tower Securities, 5.75% Notes and 5.625% Notes during 2012 offset by the full repayment of the 8.0% Notes in the third quarter of 2012.

Table of Contents**Net Loss**

Net loss decreased \$0.3 million to \$22.4 million for the three months ended March 31, 2013 from the three months ended March 31, 2012. The decrease is primarily due to an increase in our site leasing and site development segments operating profit, as well as an income tax benefit realized during the three months ended March 31, 2013. These items were partially offset by increases in selling, general, and administrative expenses, asset impairment and decommission costs, acquisition related expenses, depreciation, amortization, and accretion, interest expense, and other expenses.

LIQUIDITY AND CAPITAL RESOURCES

SBA Communications Corporation is a holding company with no business operations of its own. SBA Communications' only significant asset is the outstanding capital stock of SBA Telecommunications, LLC (formerly known as Telecommunications, Inc.) (Telecommunications), which is also a holding company that owns equity interests in entities that directly or indirectly own all of our domestic and international towers and assets. We conduct all of our business operations through Telecommunications' subsidiaries. Accordingly, our only source of cash to pay our obligations, other than financings, is distributions with respect to our ownership interest in our subsidiaries from the net earnings and cash flow generated by these subsidiaries.

A summary of our cash flows is as follows:

Sources of Liquidity

We fund our growth, including our tower portfolio growth, through cash flows from operations, long-term indebtedness and equity issuances. With respect to our debt financing, we have issued secured and unsecured debt instruments at various levels of our organizational structure to minimize our financing costs while maximizing our operational flexibility.

Cash provided by operating activities was \$94.2 million for the three months ended March 31, 2013 as compared to \$66.0 million for the three months ended March 31, 2012. This increase was primarily due to an increase in segment operating profit from the site leasing and site development operating segments partially offset by increased cash interest payments relating to the higher average amount of cash-interest bearing debt outstanding for the three months ended March 31, 2013 compared to the three months ended March 31, 2012.

During the three months ended March 31, 2013, we did not borrow any amounts under the Revolving Credit Facility. As of March 31, 2013, the availability under the Revolving Credit Facility was \$670 million, subject to compliance with financial ratios.

Table of Contents

On April 18, 2013, we issued \$1.33 billion of 2013 Tower Securities (as defined below) which have a blended coupon interest rate of 3.218% per annum, payable monthly and a weighted average life through the anticipated repayment date of 7.2 years . The proceeds from this issuance were used to settle a portion of our obligations under our 1.875% Notes, pay down the outstanding balance under our Revolving Credit Facility and pay down an aggregate \$500.0 million under our 2011 and 2012-2 Term Loans.

Registration Statements

We have on file with the Commission a shelf registration statement on Form S-4 registering shares of Class A common stock that we may issue in connection with the acquisition of wireless communication towers or antenna sites and related assets or companies who own wireless communication towers, antenna sites or related assets. During the three months ended March 31, 2013, we did not issue any shares of Class A common stock under this registration statement. As of March 31, 2013, we had approximately 1.7 million shares of Class A common stock remaining under this shelf registration statement.

On February 27, 2012, we filed with the Commission an automatic shelf registration statement for well-known seasoned issuers on Form S-3ASR. This registration statement enables us to issue shares of our Class A common stock, preferred stock or debt securities either separately or represented by warrants, or depositary shares as well as units that include any of these securities. Under the rules governing automatic shelf registration statements, we will file a prospectus supplement and advise the Commission of the amount and type of securities each time we issue securities under this registration statement. During the three months ended March 31, 2013, we did not issue any shares of our Class A common stock under the automatic shelf registration statement and the prospectus supplement related thereto.

Uses of Liquidity

We believe that our principal use of liquidity will be to fund tower portfolio growth and, secondarily, to fund our stock repurchase program. In the future, we may repurchase, for cash or equity, our outstanding indebtedness in privately-negotiated or open market transactions in order to optimize our liquidity and leverage and take advantage of market opportunities.

In order to manage our leverage and liquidity positions, take advantage of market opportunities and ensure continued compliance with our financial covenants, we may from time to time repurchase our outstanding indebtedness for cash or equity. If we undertake debt repurchases or exchanges, these actions could materially impact the amount and composition of indebtedness outstanding or dilute our existing shareholders.

During the remainder of 2013, we expect to incur non-discretionary cash capital expenditures associated with tower maintenance and general corporate expenditures of \$11 million to \$16 million. We expect to have discretionary cash capital expenditures during the remainder of 2013 primarily associated with new tower construction, additional tower acquisitions, tower augmentations and ground lease purchases. We expect to fund these additional cash capital expenditures from cash on hand, cash flow from operations and borrowings under the Revolving Credit Facility. The exact amount of our future cash capital expenditures will depend on a number of factors including amounts necessary to support our tower portfolio, our new tower build and tower acquisition programs, and our ground lease purchase program.

Subsequent to March 31, 2013, we acquired 7 towers for an aggregate consideration paid of \$2.8 million in cash.

During the three months ended March 31, 2013 we did not repurchase any shares of our Class A common stock under our stock repurchase program. Interest on the 4.0% Notes is payable semi-annually on April 1 and October 1. The maturity date of the 4.0% Notes is October 1, 2014. We incurred fees of \$11.7 million with the issuance of the 4.0% Notes of which \$7.7 million was recorded as deferred financing fees and \$4.0 million was recorded as a reduction to shareholders' equity.

The 4.0% Notes are convertible, at the holder's option, into shares of our Class A common stock, at an initial conversion rate of 32.9164 shares of our Class A common stock per \$1,000 principal amount of 4.0% Notes (subject to certain customary adjustments), which is equivalent to an initial conversion price of approximately \$30.38 per share or a 22.5% conversion premium based on the last reported sale price of \$24.80 per share of our Class A common stock on the Nasdaq Global Select Market on April 20, 2009, the purchase agreement date.

Concurrently with the pricing of the 4.0% Notes, we entered into convertible note hedge and warrant transactions with affiliates of certain of the initial purchasers of the convertible notes. The initial strike price of the convertible note hedge transactions relating to the 4.0% Notes is \$30.38 per share of our Class A common stock (the same as the initial conversion price of the 4.0% Notes) and the upper strike price of the warrant transactions is \$44.64 per share.

We are amortizing the debt discount on the 4.0% Notes utilizing the effective interest method over the life of the 4.0% Notes which increases the effective interest rate of the 4.0% Notes from its coupon rate of 4.0% to 12.9%. As of March 31, 2013 and December 31, 2012, the carrying amount of the equity component related to the 4.0% Notes was \$169.0 million.

As a result of the repayments, no further scheduled principal payments are required for the 2011 and 2012-2 Term Loans until the maturity date.

Our current primary market risk exposure is interest rate risk relating to (1) our ability to meet financial covenants and (2) the impact of interest rate movements on our 2011 Term Loan, 2012-1 Term Loan, 2012-2 Term Loan and any borrowings that we may incur under our Revolving Credit Facility, which are at floating rates. We manage the interest rate risk on our outstanding debt through our large percentage of fixed rate debt. In addition, in connection with our convertible notes, we are subject to market risk associated with the market price of our common stock.
