Summary of Significant Accounting Policies

a. Security Valuation:

The Fund values its securities at current market value or fair value consistent with regulatory requirements. Fair value is defined in the Fund's valuation and liquidity procedures as the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between willing market participants without a compulsion to contract at the measurement date.

Equity securities that are traded on an exchange are valued at the last quoted sale price on the principal exchange on which the security is traded at the Valuation Time subject to application, when appropriate, of the valuation factors described in the paragraph below. The Valuation Time is as of the close of regular trading on the New York Stock Exchange (usually 4:00 p.m. Eastern Time). In the absence of a sale price, the security is valued at the mean of the bid/ask quoted at the close on the principal exchange on which the security is traded. Securities traded on NASDAQ are valued at NASDAQ official closing price. Closed-end funds and exchange-traded funds (ETFs) are valued at the market price of the security at the Valuation Time. A security using any of these pricing methodologies is determined to be a Level 1 investment.

Foreign equity securities that are traded on foreign exchanges that close prior to the Valuation Time are valued by applying valuation factors to the last sale price or the mean price as noted above. Valuation factors are provided by an independent pricing service provider. These valuation factors are used when pricing the Fund's portfolio holdings to estimate market movements between the time foreign markets close and the time the Fund values such foreign securities. These valuation factors are based on inputs such as depositary receipts, indices, futures, sector indices/ETFs, exchange rates, and local exchange opening and closing prices of each security. When prices with the application of valuation factors are utilized, the value assigned to the foreign securities may not be the same as quoted or published prices of the securities on their primary markets. A security that applies a valuation factor is determined to be a Level 2 investment because the exchange-traded price has been adjusted. Valuation factors are not utilized if the independent pricing service provider is unable to provide a valuation factor or if the valuation factor falls below a predetermined threshold; in such case, the security is determined to be a Level 1 investment.

In the event that a security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Valuation Time), the security is valued at fair value as determined by the Fund's Pricing Committee, taking into account the relevant factors and surrounding circumstances using valuation policies and procedures approved by the Fund's Board of Directors. A security that has been fair valued by the Pricing Committee may be classified as Level 2 or 3 depending on the nature of the inputs.

In accordance with the authoritative guidance on fair value measurements and disclosures under accounting principles generally accepted in the United States of America (GAAP), the Fund discloses the fair value of its investments using a three-level hierarchy that classifies the inputs to valuation techniques used to measure the fair value. The hierarchy assigns Level 1 measurements to valuations based upon unadjusted quoted prices in active markets for identical assets. Level 2 measurements to valuations based upon other significant observable inputs, including adjusted quoted prices in active markets for identical assets, and Level 3 measurements to valuations based upon unobservable inputs that are significant to the valuation. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability, which are based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. A financial instrument's level within the fair value hierarchy is based upon the lowest level of any input that is significant to the fair value measurement. The three-level hierarchy of inputs is summarized below:

Level 1 quoted prices in active markets for identical investments;

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, and credit risk); or

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

Notes to Portfolio of Investments (unaudited) (concluded)**September 30, 2014**

The following is a summary of the inputs used as of September 30, 2014 in valuing the Fund's investments at fair value. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Refer to the Portfolio of Investments for a detailed breakout of the security types:

	Level 1	Level 2	Level 3	Total
Investments, at Value				
Long-Term Investments				
Food Products	\$ 30,933,682	\$	\$	\$ 30,933,682
Information Technology Services	22,239,499	142,158,623		164,398,122
Machinery	3,522,483	4,522,183		8,044,666
Pharmaceuticals	37,785,700	22,529,656		60,315,356
Other		606,414,325		606,414,325
Total	\$ 94,481,364	\$ 775,624,787	\$	\$ 870,106,151

Amounts listed as are \$0 or round to \$0.

The Fund held no Level 3 securities at September 30, 2014.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing transfers at the end of each period. The utilization of valuation factors may result in transfers between Level 1 and Level 2. For the period ended September 30, 2014, the securities issued by CMC Ltd., Sanofi India Ltd., Mphasis Ltd., and Piramal Enterprises Ltd., in the amounts of \$4,137,167, \$16,787,565, \$18,102,332, and \$12,103,659, respectively, transferred from Level 2 to Level 1 because no valuation factor was applied at September 30, 2014. During the period ended September 30, 2014, securities issued by Container Corp. of India Ltd. in the amount of \$30,569,714, transferred from Level 1 to Level 2 because there was a valuation factor applied at September 30, 2014. For the period ended September 30, 2014, there have been no significant changes to the fair valuation methodologies.

b. Federal Income Taxes:

The U.S. federal income tax basis of the Fund's investments and the net unrealized appreciation as of September 30, 2014 were as follows:

Cost	Appreciation	Depreciation	Net Unrealized Appreciation
\$444,931,874	\$430,546,451	\$ (5,372,174)	\$ 425,174,277
