UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the quarterly period ended January 31, 2018

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the transition period from _____ to _____

Commission file number 0-5286

KEWAUNEE SCIENTIFIC CORPORATION

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization) 2700 West Front Street Statesville, North Carolina (Address of principal executive offices) Registrant's telephone number, including area code: (704) 873-7202	38-0715562 (IRS Employer Identification No.) 28677-2927 (Zip Code)
---	---

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of large accelerated filer, accelerated filer, smaller reporting company, and emerging growth company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)	Smaller reporting company
	Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act). Yes No

As of March 5, 2018, the registrant had outstanding 2,724,932 shares of Common Stock.

Kewaunee Scientific Corporation

Notes to Consolidated Financial Statements

(unaudited)

A. Financial Information

The unaudited interim consolidated financial statements of Kewaunee Scientific Corporation (the Company) have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the Commission). Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted, although the Company believes that the disclosures are adequate to make the information presented not misleading.

These interim consolidated financial statements include all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of these financial statements and should be read in conjunction with the consolidated financial statements and notes included in the Company's 2017 Annual Report to Stockholders. The results of operations for the interim periods are not necessarily indicative of the results of operations to be expected for the full year. The consolidated balance sheet as of April 30, 2017 included in this interim period filing has been derived from the audited financial statements at that date, but does not include all of the information and related notes required by generally accepted accounting principles (GAAP) for complete financial statements.

The preparation of the interim consolidated financial statements requires management to make certain estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates.

B. Revenue Recognition

Product sales and installation revenue are recognized when all of the following criteria have been met: (1) products have been shipped, or customers have purchased and accepted title to the goods, but because of construction delays, have requested that the Company temporarily store the finished goods on the customer's behalf; service revenue for installation of products sold is recognized as the installation services are performed, (2) persuasive evidence of an arrangement exists, (3) the price to the customer is fixed, and (4) collectability is reasonably assured. The Company utilizes either the percentage of completion or completed contract method based on facts and circumstances of individual contracts.

Deferred revenue consists of customer deposits and advance billings of the Company's products where sales have not yet been recognized. Shipping and handling costs are included in costs of product sales. Because of the nature and quality of the Company's products, any warranty issues are determined in a relatively short period after the sale and are infrequent in nature, and as such, warranty costs are immaterial to the Company's consolidated financial position and results of operations and are expensed as incurred.

Product sales resulting from fixed-price construction contracts involve a signed contract for a fixed price to provide the Company's laboratory furniture and fume hoods for a construction project. In these instances, the Company is usually in the role of a subcontractor, but in some cases may enter into a contract directly with the end-user of the products. Contract arrangements normally do not contain a general right of return relative to the delivered items. Product sales resulting from fixed-price construction contracts are generated from multiple-element arrangements that require separate units of accounting and estimates regarding the fair value of individual elements. The Company has

determined that its multiple-element arrangements that qualify as separate units of accounting are (1) product sales and (2) installation services. There is objective and reliable evidence of fair value for both the product sales and installation services and allocation of arrangement consideration for each of these units is based on their relative fair values. Each of these elements represent individual units of accounting, as the delivered item has value to a customer on a stand-alone basis. The Company's products are regularly sold on a stand-alone basis to customers which provides either best estimate of selling prices or vendor-specific objective evidence of fair value. The fair value of installation services is separately calculated using expected costs of installation services. Many times the value of installation services is calculated using price quotations from subcontractors to the Company who perform installation services on a stand-alone basis.

Product sales resulting from purchase orders involve a purchase order received by the Company from its dealers or stocking distributor. This category includes product sales for standard products, as well as products which require some customization. Any customization requirements are approved by the customer prior to manufacture of the customized product. Sales from purchase orders are recognized under the terms of the purchase order which generally are freight on board (FOB) shipping point and do not include rights of return. Accordingly, these sales are recognized at the time of shipment.

Table of Contents**C. Derivative Financial Instruments**

The Company records derivatives on the consolidated balance sheet at fair value and establishes criteria for designation and effectiveness of hedging relationships. The nature of the Company's business activities involves the management of various financial and market risks, including those related to changes in interest rates. The Company does not enter into derivative instruments for speculative purposes. In May 2013, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on \$3,450,000 of outstanding long-term debt was effectively converted to a fixed interest rate of 4.875% for the period beginning May 1, 2013 and ending August 1, 2017. In May 2013, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on \$2,600,000 of outstanding long-term debt was effectively converted to a fixed interest rate of 4.37% for the period beginning August 1, 2017 and ending May 1, 2020. In May 2013, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on \$1,218,000 of outstanding long-term debt was effectively converted to a fixed interest rate of 3.07% for the period beginning November 3, 2014 and ending May 1, 2020. The Company entered into these interest rate swap arrangements to mitigate future interest rate risk associated with its long-term debt and has designated these as cash flow hedges.

D. Earnings Per Share

Basic earnings per share is based on the weighted average number of common shares outstanding during the three and nine month periods. Diluted earnings per share reflects the assumed exercise and conversion of restricted stock units and outstanding stock options under the Company's Omnibus Incentive Plan, except when such awards have an anti-dilutive effect. There were no antidilutive awards outstanding at January 31, 2018. Stock options to purchase 39,200 shares were not included in the computation of diluted earnings per share for the three and nine month periods ended January 31, 2017, because the option exercise prices were greater than the average market price of the common shares during the quarter, and accordingly, such stock options would have an antidilutive effect.

E. Inventories

Inventories consisted of the following (in thousands):

	January 31, 2018	April 30, 2017
Finished products	\$ 3,778	\$ 3,179
Work in process	2,133	1,950
Raw materials	11,769	9,806
	\$ 17,680	\$ 14,935

The Company uses the last-in, first-out (LIFO) method of valuing inventory for its domestic operations, which represents \$15,833,000 of inventory at January 31, 2018 and \$12,730,000 at April 30, 2017. An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Interim LIFO calculations are based on management's estimates of expected year-end inventory levels and costs, and are subject to the final year-end LIFO inventory valuation. The Company's international subsidiaries inventories were \$1,847,000 at January 31, 2018 and \$2,205,000, at April 30, 2017, measured using the first-in, first-out (FIFO) method at the lower of cost and net realizable value.

Table of Contents**F. Segment Information**

The Company's operations are classified into two business segments: Domestic and International. The Domestic business segment principally designs, manufactures, and installs scientific and technical furniture, including steel and wood laboratory cabinetry, fume hoods, laminate casework, flexible systems, worksurfaces, workstations, workbenches, and computer enclosures. The International business segment, which consists of the Company's foreign subsidiaries, provides products and services, including facility design, detailed engineering, construction, and project management from the planning stage through testing and commissioning of laboratories. Intersegment transactions are recorded at normal profit margins. All intercompany balances and transactions have been eliminated. Certain corporate expenses shown below have not been allocated to the business segments.

The following table provides financial information by business segments for the three and nine months ended January 31, 2018 and 2017 (in thousands):

	Domestic Operations	International Operations	Corporate / Eliminations	Total
Three months ended January 31, 2018				
Revenues from external customers	\$ 29,734	\$ 8,456	\$	\$ 38,190
Intersegment revenues	1,145	1,361	(2,506)	
Earnings (loss) before income taxes	2,959	1,363	(1,838)	2,484
Three months ended January 31, 2017				
Revenues from external customers	\$ 25,313	\$ 5,058	\$	\$ 30,371
Intersegment revenues	344	538	(882)	
Earnings (loss) before income taxes	563	943	(1,015)	491
	Domestic Operations	International Operations	Corporate/ Eliminations	Total
Nine months ended January 31, 2018				
Revenues from external customers	\$ 80,420	\$ 33,122	\$	\$ 113,542
Intersegment revenues	10,298	3,291	(13,589)	
Earnings (loss) before income taxes	7,720	4,019	(4,715)	7,024
Nine months ended January 31, 2017				
Revenues from external customers	\$ 83,161	\$ 20,818	\$	\$ 103,979
Intersegment revenues	3,781	2,936	(6,717)	
Earnings (loss) before income taxes	5,580	3,010	(3,670)	4,920

G. Defined Benefit Pension Plans

The Company has non-contributory defined benefit pension plans covering substantially all domestic salaried and hourly employees. These plans were amended as of April 30, 2005; no further benefits have been, or will be, earned under the plans, subsequent to the amendment date, and no additional participants will be added to the plans. Company contributions of \$600,000 were paid to the plans during the nine months ended January 31, 2018, and the Company does not expect any contributions to be paid to the plans during the remainder of the fiscal year. Contributions of \$555,000 were paid to the plans during the nine months ended January 31, 2017. The Company assumed an expected long-term rate of return of 7.75% for the period ended January 31, 2018 as compared to 8.0% for the period ended January 31, 2017. Pension expense consisted of the following (in thousands):

	Three months ended January 31, 2018	Three months ended January 31, 2017
Service cost	\$ -0-	\$ -0-
Interest cost	219	232
Expected return on plan assets	(328)	(311)
Recognition of net loss	283	314
Net periodic pension expense	\$ 174	\$ 235

Table of Contents

	Nine months ended January 31, 2018	Nine months ended January 31, 2017
Service cost	\$ -0-	\$ -0-
Interest cost	687	695
Expected return on plan assets	(984)	(932)
Recognition of net loss	849	942
Net periodic pension expense	\$ 522	\$ 705

H. Fair Value of Financial Instruments

The Company's financial instruments consist primarily of cash and equivalents, mutual funds, cash surrender value of life insurance policies, term loans and short-term borrowings. The carrying value of these assets and liabilities approximate their fair value. The following tables summarize the Company's fair value hierarchy for its financial assets and liabilities measured at fair value on a recurring basis as of January 31, 2018 and April 30, 2017 (in thousands):

	January 31, 2018		
	Level 1	Level 2	Total
<u>Financial Assets</u>			
Trading securities held in non-qualified compensation plans (1)	\$ 3,994	\$	\$ 3,994
Cash surrender value of life insurance policies (1)		75	75
Total	\$ 3,994	\$ 75	\$ 4,069

<u>Financial Liabilities</u>			
Non-qualified compensation plans (2)	\$	\$ 4,472	\$ 4,472
Interest rate swap derivatives		14	14
Total	\$	\$ 4,486	\$ 4,486

	April 30, 2017		
	Level 1	Level 2	Total
<u>Financial Assets</u>			
Trading securities held in non-qualified compensation plans (1)	\$ 3,748	\$	\$ 3,748
Cash surrender value of life insurance policies (1)		75	75
Total	\$ 3,748	\$ 75	\$ 3,823

<u>Financial Liabilities</u>			
Non-qualified compensation plans (2)	\$	\$ 4,186	\$ 4,186
Interest rate swap derivatives		62	62
Total	\$	\$ 4,248	\$ 4,248

- (1) The Company maintains two non-qualified compensation plans which include investment assets in a rabbi trust. These assets consist of marketable securities, which are valued using quoted market prices multiplied by the number of shares owned, and life insurance policies, which are valued at their cash surrender value.
- (2) Plan liabilities are equal to the individual participants' account balances and other earned retirement benefits.

I. Share-based Compensation

The stockholders approved the 2017 Omnibus Incentive Plan (2017 Plan) on August 30, 2017, which enables the Company to grant a broad range of equity, equity-related, and non-equity types of awards, with potential recipients including directors, consultants and employees. This plan replaces the 2010 Stock Option Plan for Directors and the 2008 Key Employee Stock Option Plan. No new awards will be granted under the prior plans. All outstanding options granted under the prior plans will remain subject to the prior plans. At the date of approval of the 2017 Plan there were 280,100 shares available for issuance under the prior plans. These shares and any outstanding awards that subsequently cease to be subject to such awards are available under the 2017 Plan. The 2017 Plan did not increase the total number of shares available for issuance under the Company's equity compensation plans.

Table of Contents

The Company issued restricted stock units (RSUs) under the 2017 Plan and recorded stock-based compensation expense of \$60,000 and \$100,000 during the three and nine months ended January 31, 2018 in accordance with ASC 718, Compensation Stock Compensation. The RSUs include both a service and performance component vesting over a three year period. The recognized expense is based upon the vesting period for service criteria and estimated attainment of the performance criteria at the end of the three year period based on cumulative days incurred and remaining over the three year period. The remaining estimated compensation expense of \$510,000 will be recorded over the remaining three year period.

J. Income Taxes

On December 22, 2017, the Tax Cuts and Jobs Act (the 2017 Tax Act) was signed into law. The 2017 Tax Act includes a broad range of tax reform provisions affecting businesses, including lower corporate tax rates, changes in business deductions, and international tax provisions. In response to the 2017 Tax Act, the U.S. Securities and Exchange Commission staff issued Staff Accounting Bulletin No. 118 (SAB 118) to address the application of U.S. GAAP in situations where a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the 2017 Tax Act. SAB 118 provides that the measurement period is complete when a company s accounting is complete and that the measurement period shall not extend beyond one year from the enactment date. SAB 118 provides guidance for registrants under three scenarios: (i) measurement of certain income tax effects is complete, (ii) measurement of certain income tax effects can be reasonably estimated, and (iii) measurement of certain income tax effects cannot be reasonably estimated.

The 2017 Tax Act lowered the federal statutory tax rate from 35% to 21%. As the Company has a fiscal year ending April 30, it is subject to a blended tax rate for the current fiscal year. Therefore, a blended rate of 29.73% was computed as the federal statutory rate for this year.

The Company has analyzed the income tax effects of the 2017 Tax Act and determined that (ii) measurement of the income tax effects can be reasonably estimated, and, as such, provisional amounts have been recorded. The Company believes that all provisional amounts reflected in its financial statements are based on the best estimates that can be made at this time. The Company will continue to analyze all impacts of the 2017 Tax Act and will update provisional amounts as required. The Company recognized income tax expense of \$1,566,000 and \$3,149,000 for the three and nine months ended January 31, 2018. The effective tax rate was 63.0% and 44.8% for the three and nine months ended January 31, 2018.

In accordance with ASC 740, Income Taxes , which requires deferred taxes to be re-measured in the year of an income tax rate change, the Company recorded a provisional discrete deferred income tax expense of \$587,000 in the three months ended January 31, 2018 as a result of applying a lower U.S. federal income tax rate to the Company s net deferred tax assets.

The Company revalued the U.S. deferred tax balances based on the tax rates effective for the following fiscal year at the new federal rate of 21% for amounts that are not expected to reverse during the current fiscal year and revalued the deferred tax balances expected to reverse in the current fiscal year at the Company s current fiscal year blended rate of 29.73%. The Company has not yet completed the revaluation of the deferred tax balances due to estimates which are being used during interim periods until finalization of the balances can occur at the Company s fiscal year end.

The 2017 Tax Act also includes a one-time transition tax on accumulated unrepatriated foreign earnings. In the three months ended January 31, 2018, the Company recorded a provisional discrete current income tax expense of \$528,000 on accumulated unrepatriated foreign earnings, including estimates for foreign earnings through April 30, 2018. In

addition, the Company has not yet completed the calculation of the related income tax pools for its foreign subsidiaries. The Company is entitled to elect to pay the one-time transition tax over a period of eight years. The Company intends to make this election and has recorded \$486,000 of the provisional expense as other non-current liabilities in the Company's Consolidated Balance Sheet for January 31, 2018. No additional income taxes have been provided for any remaining undistributed foreign earnings not subject to the transition tax, or any additional outside basis difference inherent in these entities, as these amounts continue to be indefinitely reinvested in foreign operations.

The Company is currently in the process of evaluating the new Global Intangible Low-Taxed Income (GILTI) provisions and has not yet elected an accounting policy with respect to whether to reflect GILTI in its deferred tax calculations or not. Therefore, the Company has not made any adjustments related to the GILTI tax in its financial statements. Under the SEC guidance noted above, the Company will continue to analyze and assess the effects of the GILTI provisions of the Act.

The Company anticipates future impacts at a U.S., state and local tax level related to the 2017 Tax Act as statutory and interpretive guidance is not available from applicable tax authorities needed to reasonably estimate the impact. Consequently, the Company has not recorded provisional amounts for this statutory and interpretive guidance and has continued to apply ASC 740 based on the provisions of the tax laws that were in effect immediately prior to the 2017 Tax Act enactment.

K. Reclassifications

Certain 2017 amounts have been reclassified to conform to the 2018 presentation in the consolidated statements of cash flows. Such reclassifications had no impact on net earnings.

Table of Contents

L. New Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update 2014-09, Revenue from Contracts with Customers (ASU 2014-09). This update outlines a new comprehensive revenue recognition model that supersedes most current revenue recognition guidance and requires companies to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 also requires additional disclosures about the nature, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. The FASB has issued several updates and/or practical expedients to ASU 2014-09. ASU 2014-09 and the subsequent updates and/or practical expedients to the standard will be effective for the Company during the first quarter of our fiscal year 2019 and we do not plan to early adopt. ASU 2014-09 provides two methods of adopting the standard: using either a full retrospective approach or modified retrospective approach. We expect to elect the modified retrospective approach of adopting the standard. We have conducted an assessment of how ASU 2014-09 is likely to affect us, identifying the Company s revenue streams and performance obligations. Our contracts with customers currently may be for single performance obligations or for multiple performance obligations. Based on our assessment, we do not believe the new standard significantly changes our accounting policy for these types of performance obligations. We have also evaluated the impact the new standard will have on our existing policies, contracts, accounting processes, internal controls, reporting systems and disclosure processes. We have begun implementing improvements and or enhancements to our business processes to support the implementation of the standard. We currently have not identified an improvement or enhancement that we would conclude would be a significant change to our internal control environment. Based on the evaluation and implementation efforts completed to date, we believe the adoption of ASU 2014-09 will not have a significant impact on the Company s consolidated financial position, results of operations, equity or cash flows.

In July 2015, the FASB issued ASU 2015-11, Inventory Simplifying the Measurement of Inventory. This guidance changes the measurement principle for inventory from the lower of cost or market to the lower of cost and net realizable value. Net realizable value is defined as estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The Company adopted this standard effective May 1, 2017. The adoption of this standard did not have a significant impact on the Company s consolidated financial position or results of operations.

In March 2016, the FASB issued ASU 2016-9, Stock Compensation Improvements to Employee Share-Based Payment Accounting. This guidance simplifies various aspects related to how share-based payments are accounted for and presented in the financial statements. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The Company adopted this standard prospectively effective May 1, 2017. Prior periods were not retrospectively adjusted. The adoption of this standard did not have a significant impact on the Company s consolidated financial position or results of operations.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The Company's 2017 Annual Report to Stockholders contains management's discussion and analysis of financial condition and results of operations as of and for the year ended April 30, 2017. The following discussion and analysis describes material changes in the Company's financial condition since April 30, 2017. The analysis of results of operations compares the three and nine months ended January 31, 2018 with the comparable periods of the prior year.

Results of Operations

Sales for the three months ended January 31, 2018 were \$38,190,000, an increase of 25.7% from sales of \$30,371,000 in the comparable period of the prior year. Domestic sales were \$29,734,000, an increase of 17.5% from sales of \$25,313,000 in the comparable period of the prior year. International sales were \$8,456,000, an increase of 67.2% from sales of \$5,058,000 in the comparable period of the prior year. The increase in sales was due to strength in the laboratory, healthcare, and technical furniture products in the US, Middle East, Indian and Asian markets with sales in each of these markets exceeding the prior period third quarter.

Sales for the nine months ended January 31, 2018 were \$113,542,000, an increase of 9.2% from sales of \$103,979,000 in the comparable period of the prior year. Domestic sales were \$80,420,000, down from \$83,161,000 in the comparable period of the prior year, as domestic orders from dealers were lower than the prior year period. International sales were \$33,122,000, up from sales of \$20,818,000 in the comparable period of the prior year due to the impact of a large order being delivered to a customer in the Middle East.

The order backlog was \$116.1 million at January 31, 2018, as compared to \$113.5 million at April 30, 2017 and \$106.9 million at January 31, 2017. Incoming orders continued to be strong in all of the Company's key markets, increasing the order backlog year-over-year.

The gross profit margin for the three months ended January 31, 2018 was 21.9% of sales as compared to 16.6% of sales in the comparable quarter of the prior year. The increase in the gross profit margin percent was primarily due to improved operating leverage from the increased sales volume as well as more profitable product mix than in the prior third quarter.

The gross profit margin for the nine months ended January 31, 2018 was 14.4% of sales, as compared to 13.9% of sales in the comparable period of the prior year. The increase in the gross profit margin percent was primarily due to continued execution of the Company's cost reduction and productivity improvement programs, and a favorable shift in product mix.

Operating expenses for the three months ended January 31, 2018 were \$5,971,000, or 15.6% of sales, as compared to \$4,590,000, or 15.1% of sales, in the comparable period of the prior year. The increase in operating expenses for the three months ended January 31, 2018 related primarily to increases in marketing expense of \$89,000, compensation expense of \$483,000, bad debt expense of \$91,000, International operating expenses of \$267,000, corporate governance expenses of \$81,000 and professional services \$194,000, partially offset by a decrease in pension expense of \$61,000.

Operating expenses for the nine months ended January 31, 2018 were \$16,360,000, or 14.4% of sales, as compared to \$14,484,000, or 13.9% of sales, in the comparable period of the prior year. The increase in operating expenses for the nine months ended January 31, 2018 related primarily to increases in marketing expense of \$144,000, compensation expense of \$676,000, bad debt expense of \$113,000, International operating expenses of \$432,000, corporate governance expenses of \$319,000 and professional services of \$78,000, partially offset by a decrease in pension expense \$183,000.

Interest expense was \$78,000 and \$226,000 for the three and nine months ended January 31, 2018, as compared to \$71,000 and \$229,000 for the comparable periods of the prior year. The changes in interest expense in the current three and nine month periods were attributable to changes in the borrowing levels.

Income tax expense of \$1,566,000 and \$133,000 was recorded for the three months ended January 31, 2018 and 2017, respectively. The effective tax rates were 63.0% and 27.1% for the three months ended January 31, 2018 and 2017, respectively. Our effective tax rate increased in the third quarter of fiscal year 2018, compared to the prior year period, primarily due to the effect of the enactment of the Tax Cuts and Jobs Act, which was signed into law on December 22, 2017. Two provisions of the new law had an immediate impact. First, the U.S. corporate tax rate was reduced from 35% to 21%. This rate reduction required the Company to re-measure our net deferred tax assets assuming a future tax benefit at the new lower 21% rate. The estimated discrete impact of this re-measurement of our net deferred tax assets recorded for the three months ended January 31, 2018 was \$587,000. Second, as part of the transition to a modified territorial system, the new law imposes a one-time transition tax on the unremitted earnings of our foreign subsidiaries. The estimated discrete impact of this one-time transition tax recorded for the three months ended January 31, 2018 was \$528,000. The Company intends to elect to pay this tax over an 8-year period.

Income tax expense of \$3,149,000 and \$1,695,000 was recorded for the nine months ended January 31, 2018 and 2017, respectively. The effective tax rates were 44.8% and 34.5% for the nine months ended January 31, 2018 and 2017, respectively.

Table of Contents

Noncontrolling interests related to the Company's subsidiary not 100% owned by the Company reduced net earnings by \$35,000 and \$120,000 for the three and nine months ended January 31, 2018, as compared to \$17,000 and \$98,000 for the comparable periods of the prior year. The change in the net earnings attributable to the noncontrolling interest in the current period was due to changes in earnings of the subsidiary in the related period.

Net earnings of \$883,000, or \$0.31 per diluted share, were reported for the three months ended January 31, 2018, compared to net earnings of \$341,000, or \$0.13 per diluted share, in the prior year period. Net earnings of \$3,755,000, or \$1.35 per diluted share, were reported for the nine months ended January 31, 2018, compared to net earnings of \$3,127,000, or \$1.15 per diluted share, in the prior year period.

Liquidity and Capital Resources

Historically, the Company's principal sources of liquidity have been funds generated from operations, supplemented as needed by short-term borrowings under the Company's revolving credit facility. Additionally, certain machinery and equipment are financed by non-cancellable operating leases. The Company believes that these sources will be sufficient to support ongoing business requirements in the current year, including capital expenditures.

The Company had working capital of \$36.2 million at January 31, 2018, compared to \$32.9 million at April 30, 2017. The ratio of current assets to current liabilities was 2.4-to-1.0 at January 31, 2018, compared to 2.2-to-1.0 at April 30, 2017. At January 31, 2018, advances of \$4.5 million were outstanding under the Company's bank revolving credit facility, compared to advances of \$3.5 million outstanding as of April 30, 2017. The Company had standby letters of credit outstanding of \$4.2 million at January 31, 2018 and April 30, 2017. Amounts available under the \$20 million revolving credit facility were \$11.3 million and \$12.3 million at January 31, 2018 and April 30, 2017, respectively. Total bank borrowings and interest rate swaps were \$7.5 million at January 31, 2018, compared to \$6.9 million at April 30, 2017.

The Company's operations used cash of \$645,000 during the nine months ended January 31, 2018. Cash was primarily used to support an increase in receivables of \$1,025,000 and inventories of \$2,745,000, and a decrease in deferred revenue of \$3,847,000, partially offset by cash provided by earnings and an increase in accounts payable and other accrued expenses of \$2,020,000. The Company's operations provided cash of \$5,851,000 during the nine months ended January 31, 2017. Cash was primarily provided from earnings, and a decrease in receivables of \$2,090,000, partially offset by an increase in accounts payable and other accrued expenses of \$1,189,000.

During the nine months ended January 31, 2018, the Company used net cash of \$1,965,000 in investing activities, which included \$1,907,000 for capital expenditures, and a \$58,000 increase in restricted cash. During the nine months ended January 31, 2017, net cash of \$2,061,000 was used in investing activities, which included \$2,190,000 for capital expenditures, offset by a \$129,000 decrease in restricted cash.

The Company's financing activities used cash of \$836,000 during the nine months ended January 31, 2018, primarily for cash dividends of \$1,331,000 paid to stockholders, cash dividends of \$74,000 paid to minority interest holders, and payments of \$626,000 on long-term debt, partially offset by an increase in net short-term borrowings of \$1,187,000. The Company's financing activities used cash of \$477,000 during the nine months ended January 31, 2017, primarily for cash dividends of \$1,163,000 and payments on long-term debt of \$316,000, partially offset by an increase in short-term borrowings of \$861,000.

Financial Outlook

As disclosed in the Company's Report on Form 10-Q for the period ended October 31, 2017, on December 7, 2017, the Company experienced a criminal network cyber-attack that led to a disruption of its domestic operations, including manufacturing, engineering, administration, and sales operations. The temporary production disruption had an immaterial impact on sales and earnings for the period ended January 31, 2018, and the Company believes it will have an immaterial impact for the remainder of the fiscal year. The Company's ability to predict future demand for its products continues to be limited given its role as subcontractor or supplier to dealers for subcontractors. Demand for the Company's products is also dependent upon the number of laboratory construction projects planned and/or current progress in projects already under construction. The Company's earnings are also impacted by fluctuations in prevailing pricing for projects in the laboratory construction marketplace and increased costs of raw materials, including stainless steel, wood, and epoxy resin, and whether the Company is able to increase product prices to customers in amounts that correspond to such increases without materially and adversely affecting sales. Additionally, since prices are normally quoted on a firm basis in the industry, the Company bears the burden of possible increases in labor and material costs between the quotation of an order and delivery of a product. Looking forward the Company is optimistic that fiscal year 2018 will result in sales and earnings growth as our order backlog and opportunities in the marketplace remain strong.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This report contains statements that the Company believes to be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact included in this report, including statements regarding the Company's future financial condition, results of operations, business operations and business prospects, are forward-looking statements. Words such as anticipate, estimate, expect, project, intend, plan, predict, believe and similar words, expressions and variations of these words and expressions are intended to identify forward-looking statements. All forward-looking statements are subject to important factors, risks, uncertainties and assumptions, including industry and economic conditions

Table of Contents

that could cause actual results to differ materially from those described in the forward-looking statements. Such factors, risks, uncertainties and assumptions include, but are not limited to, competitive and general economic conditions, both domestically and internationally; changes in customer demands; dependence on customers' required delivery schedules; risks related to fluctuations in the Company's operating results from quarter to quarter; risks related to international operations, including foreign currency fluctuations; changes in the legal and regulatory environment; changes in raw materials and commodity costs; and acts of terrorism, war, governmental action, natural disasters and other Force Majeure events. Many important factors that could cause such a difference are described under the caption

Risk Factors in Item 1A in the Company's 2017 Annual Report on Form 10-K, and under the caption Risk Factors in Part II, Item 1A of both this report and the Company's Report on Form 10-Q for the period ended October 31, 2017. These forward-looking statements speak only as of the date of this document. The Company assumes no obligation, and expressly disclaims any obligation, to update any forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There are no material changes to the disclosures made on this matter in the Company's Annual Report on Form 10-K for the fiscal year ended April 30, 2017.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934. Based on the evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that, as of the end of the period covered by this Quarterly Report on Form 10-Q, our disclosure controls and procedures were not effective to ensure that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required financial disclosure.

As disclosed under Item 9A. Controls and Procedures in our Annual Report on Form 10-K for the year ended April 30, 2017, management identified a material weakness in internal control over financial reporting relating to the misapplication of certain aspects of the Company's multi-element and percentage of completion revenue recognition policies.

The Company has implemented changes to the design of its controls and procedures surrounding the execution of the Company's multi-element and percentage of completion revenue recognition policies, which included, but were not limited to, drafting additional policy guidance, training key personnel and developing additional detective and monitoring controls. The material weakness cannot be considered remediated until the applicable controls operate for a sufficient period of time and management has concluded, through testing, that these controls are operating effectively. We currently expect to complete remediation of the material weakness by April 30, 2018.

In addition, as disclosed in the Company's Form 10-Q for the period ended October 31, 2017, on December 7, 2017, the Company experienced a criminal network cyber-attack that led to a disruption of its domestic operations, including manufacturing, engineering, administration, and sales operations. The Company engaged a leading cybersecurity firm to perform a forensic investigation of this attack and as a result of the investigation has identified a material weakness in its logical access control over its IT systems. We currently expect to complete remediation of this material weakness by April 30, 2018.

Table of Contents

PART II. OTHER INFORMATION

Item 1A. Risk Factors

Other than as set forth below, as of January 31, 2018 there have been no material changes to the risk factors faced by the Company from those previously disclosed in our Annual Report on Form 10-K for the year ended April 30, 2017, and in our Quarterly Report on Form 10-Q for the period ended October 31, 2017.

Cybersecurity incidents could expose us to liability and damage our reputation and our business.

We collect, process, store, and transmit large amounts of data, and it is critical to our business strategy that our facilities and infrastructure remain secure and are perceived by the marketplace to be secure. Our information technology systems are essential to our efforts to manufacture our products, process customer sales transactions, manage inventory levels, conduct business with our suppliers and other business partners, and record, summarize and analyze the results of our operations. These systems contain, among other things, material operational, financial and administrative information related to our business. As with most companies there will always be some risk of physical or electronic break-ins, computer viruses, or similar disruptions.

In addition, we like all entities, are the target of cybercriminals who attempt to compromise our systems. From time to time, we experience threats and intrusions that may require remediation to protect sensitive information, including our intellectual property and personal information, and our overall business. Any physical or electronic break-in, computer virus, cybersecurity attack or other security breach or compromise of the information handled by us or our service providers may jeopardize the security or integrity of information in our computer systems and networks or those of our customers and cause significant interruptions in our and our customers' operations.

Any systems and processes that we have developed that are designed to protect customer, associate and vendor information, intellectual property, and prevent data loss and other security attacks cannot provide absolute security. In addition, we may not successfully implement remediation plans to address all potential exposures. It is possible that we may have to expend additional financial and other resources to address these problems. Failure to prevent or mitigate data loss or other security incidents could expose us or our customers, associates and vendors to a risk of loss or misuse of such information, cause customers to lose confidence in our data protection measures, damage our reputation, adversely affect our operating results or result in litigation or potential liability for us. While we maintain insurance coverage that may, subject to policy terms and conditions, cover certain aspects of cyber risks, this insurance coverage is subject to a retention amount and may not be applicable to a particular incident or otherwise may be insufficient to cover all our losses beyond any retention. Similarly, we expect to continue to make significant investments in our information technology infrastructure. The implementation of these investments may be more costly or take longer than we anticipate, or could otherwise adversely affect our business operations, which could negatively impact our financial position, results of operations or cash flows.

We recently experienced a network cyber-attack that disrupted our domestic operations.

As disclosed in our Form 10-Q for the period ended October 31, 2017, on December 7, 2017, the Company experienced a criminal network cyber-attack that led to a disruption of its domestic operations, including manufacturing, engineering, administration, and sales operations. As of December 12, 2017 the Company had restored its domestic operations. The Company engaged third party experts, including a leading cybersecurity firm, to perform a forensic investigation of this attack and as a result of the investigation has identified a material weakness in internal control over financial reporting relating to its logical access control over its IT systems. While the Company currently

expects to complete remediation of this weakness by April 30, 2018, there can be no assurance that such remediation will be completed by such date. The Company has insurance coverage against recovery costs and business interruption resulting from cyber-attacks. However, the Company may have incurred, and may incur in the future, expenses and losses related to this attack that are not covered by insurance.
