MuniYield New Jersey Fund, Inc.

The Benefits and Risks of Leveraging

MuniYield New Jersey Fund, Inc. utilizes leveraging to seek to enhance the yield and net asset value of its Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Stock, is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As a part of its investment strategy, the Fund may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Fund to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed-rate, tax-exempt securities. To the extent the Fund invests in inverse floaters, the market value of the Fund's portfolio and the net asset value of the Fund's shares may also be more volatile than if the Fund did not invest in these securities. As of May 31, 2005, the percentage of the Fund's total net assets invested in inverse floaters was 7.33%, before the deduction of Preferred Stock.

Swap Agreements

The Fund may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

MUNIYIELD NEW JERSEY FUND, INC.

MAY 31, 2005

A Letter From the President

Dear Shareholder

After expanding at an annualized rate of 4.4% in 2004, U.S. gross domestic

Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

product grew at an estimated 3.5% in the first quarter of 2005. The slowdown was not entirely unexpected given last year's healthy growth and the evolution of the economic cycle. The Federal Reserve Board -- with one eye firmly affixed on the economic indicators and the other on inflationary measures -- has increased the federal funds rate by 25 basis points (.25%) at each of its eight meetings since June 2004. At period-end, the target short-term interest rate stood at 3%.

U.S. equity markets ended 2004 in a strong rally, but have struggled to record meaningful gains in 2005. The potential for slowing economic and corporate earnings growth, as well as volatile energy prices, have intermittently hampered equity market progress. On the positive side, corporate transactions, such as mergers and acquisitions, stock buy-backs and dividend payouts, have all increased. In Asia, equities have continued to benefit from higher economic growth prospects and valuations that appear inexpensive relative to other parts of the world.

In the bond market, the yield curve flattening "conundrum" continued as short-term and long-term yields moved still closer together. Over the past year, the two-year Treasury yield increased 106 basis points while the 10-year Treasury yield declined 66 basis points. At May 31, 2005, the two-year Treasury note yielded 3.60% and the 10-year Treasury note yielded 4%. The falling long-term rates may be partly attributed to foreign interest in U.S. assets and increased issuance of short-term Treasury bonds to finance the federal deficit. Notably, the government is considering the reissuance of the 30-year Treasury, which was suspended in August 2001. This would allow the U.S. Treasury to adopt a more flexible approach to borrowing, while providing investors with another long-term fixed income option.

Amid these conditions, the major benchmarks posted six-month and 12-month returns as follows:

Total Returns as of May 31, 2005	6-month	12-month
U.S. equities (Standard & Poor's 500 Index)	+2.42%	+ 8.24%
Small-cap U.S. equities (Russell 2000 Index)	-2.10%	+ 9.82%
International equities (MSCI Europe Australasia Far East Index)	+1.81%	+14.62%
Fixed income (Lehman Brothers Aggregate Bond Index)	+2.90%	+ 6.82%
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+3.51%	+ 7.96%
High yield bonds (Credit Suisse First Boston High Yield Index)	+0.60%	+ 9.97%

While the environment is likely to remain somewhat challenging, we believe opportunities exist for investors. With this in mind, we encourage you to meet with your financial advisor to review your goals and asset allocation and to rebalance your portfolio, as necessary, to ensure it remains aligned with your objectives and risk tolerance. As always, we thank you for trusting Merrill Lynch Investment Managers with your investment assets, and we look forward to serving you in the months and years ahead.

Sincerely,

/s/ Robert C. Doll, Jr.

A Discussion With Your Fund's Portfolio Manager

We continued to focus our investment further out on the municipal yield curve, a strategy that proved constructive as the curve flattened and long-term bonds outperformed short-term issues.

Describe the recent market environment relative to municipal bonds.

Amid significant volatility, long-term bond yields moved lower over the past six months as shorter-term yields increased. Yields on 30-year Treasury bonds declined 68 basis points (.68%) to 4.32%, while 10-year Treasury note yields declined 36 basis points to 4%. In the meantime, the Federal Reserve Board (the Fed) continued to raise short-term interest rates at each of its meetings throughout the period, bringing the federal funds rate to 3% at period-end. As long-term rates fell while short-term rates moved in concert with the Fed rate hikes, the yield curve flattened.

In the tax-exempt market, yields on 30-year revenue bonds, as measured by the Bond Buyer Revenue Bond Index, fell 29 basis points to 4.78%. According to Municipal Market Data, yields on AAA-rated issues maturing in 30 years declined 50 basis points to 4.26%, while AAA-rated bonds maturing in 10 years saw their yields decline 17 basis points to 3.49%.

During the past six months, more than \$186 billion in tax-exempt bonds was underwritten, an increase of 7.5% versus the same period a year earlier. Issuance so far in 2005 has been boosted by a more than 40% increase in refunding issues as municipalities sought to refinance existing higher-coupon debt. These refunding issues have been heavily weighted in the 10-year - 20-year maturity range to lower the overall interest cost of the refunding issue. This concentration has put pressure on intermediate tax-exempt bond yields while supporting longer-term bond prices.

Investor demand for municipal product has remained generally positive. According to statistics from the Investment Company Institute, through April 30, 2005, year-to-date net new cash flows into long-term municipal bond funds have exceeded \$697 million. This represents a significant improvement from the \$2.86 billion net outflow seen during the same four months in 2004.

Describe conditions in the State of New Jersey.

New Jersey has remained active in the debt market, reflecting the state's efforts to manage its fiscal challenges. Revenue collections for the first seven months of fiscal year 2005 (which ends June 30, 2005) fell short by \$204 million. However, income tax revenue increased by 19.9% and sales tax by 4.2%, while corporate business tax decreased by 7.4%. On March 1, Acting Governor Richard Codey submitted his fiscal year 2006 budget recommendations. He proposed a budget of \$27.4 billion, which was 2.2% less than the 2005 budget and relies much less on the use of one-time revenues. Proposed spending reductions include, among other things, \$1.2 billion from eliminating and reducing New Jersey's property tax rebates for at least one year, and savings of approximately \$600 million from reductions in government spending, including 500 job cuts. Further savings would be realized from freezing most direct state aid to municipalities and school districts at current levels.

Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

On the revenue side, the budget proposal includes raising \$275 million by extending the state's 6% sales tax to some goods and services that are currently tax-exempt, \$500 million from asset sales, and \$150 million from installing video slot machines at the Meadowlands. The budget proposal received positive responses from credit ratings agencies, prompting Moody's and Standard & Poor's to confirm their Aa3 and AA- ratings, respectively, on the state's debt.

New Jersey's unemployment rate is improving, according to U.S. Department of Labor Statistics. Most recently, the state's unemployment rate declined from 4.2% in April to 3.9% in May.

How did the Fund perform during the period?

For the six-month period ended May 31, 2005, the Common Stock of MuniYield New Jersey Fund, Inc. had net annualized yields of 5.93% and 6.25%, based on a period-end per share net asset value of \$15.84 and a per share market price of \$15.02, respectively, and \$.468 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +7.21%, based on a change in per share net asset value from \$15.25 to \$15.84, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, exceeded the +6.54% average return of the Lipper New Jersey Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to those securities exempt from taxation in New Jersey or a city in New Jersey.) Several factors contributed to Fund performance. Most notable was our yield curve positioning, which was designed to capitalize on what we expected would be a flattening yield curve. We moved a portion of bonds in the 10-year - 15-year

4

MUNIYIELD NEW JERSEY FUND, INC.

MAY 31, 2005

maturity range further out on the curve to the 20-year - 25-year area. Our strategy paid off, as the yield curve did flatten and shorter-term bonds significantly lagged longer-term issues. Also contributing to performance were our positions in zero-coupon, or capital appreciation, bonds, as well as the advance refunding of a portion of the Fund's holdings. Finally, bonds backed by tobacco revenues performed quite well, and we were able to participate in the gains enjoyed by this sector.

Detracting from performance, albeit not significantly, was our somewhat conservative investment strategy relative to some of our peers. Our focus on higher-quality, insured bonds prohibited us from taking fuller advantage of the spread compression trend that benefited lower-quality issues during the period. Still, we were able to outperform our Lipper average with a more moderate level of risk.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

As mentioned earlier, we focused on adding longer-dated bonds to the portfolio and selling some of our shorter-dated holdings. For the six-month period,

Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

issuance of long-term municipal bonds in New Jersey increased a remarkable 77% versus the same six months one year earlier. The significant increase in debt issuance was prompted by the state's need to close its budget gap and also reflected the state's efforts to aggressively refinance its debt in the low interest rate environment. The net result was that New Jersey municipal bonds cheapened on a relative basis. This presented us with sufficient opportunity to accomplish our restructuring goals.

For the six-month period ended May 31, 2005, the Fund's Auction Market Preferred Stock (AMPS) had an average yield of 1.77% for Series A, 1.66% for Series B and 1.77% for Series C. The Fund's borrowing costs moved somewhat higher during the period, predominately as a result of the Fed's continued interest rate hikes, but also reflecting seasonal (tax-time) factors as investors redeemed monies from their short-term tax-exempt investments to pay their tax liabilities. Still, the tax-exempt yield curve remained relatively steep and continued to generate an income benefit to holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 34.6% of total net assets. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

The Fund ended the period relatively neutral with respect to interest rate risk. As a result, we would expect the Fund to perform, on average, similar to its benchmark in the months ahead. We maintain a high-quality portfolio. In fact, the Fund's average credit quality improved modestly during the period as spreads tightened, and we took profits on some of our low investment grade holdings, particularly bonds backed by tobacco revenues, which were among the market's best performers.

Overall, we do not anticipate any major changes in terms of portfolio composition or structure. We expect that New Jersey supply will remain robust as the state continues to refinance its debt, which should keep New Jersey bonds inexpensive on a relative basis.

Theodore R. Jaeckel Jr., CFA
Vice President and Portfolio Manager

Notes to Financial Statements

1. Significant Accounting Policies:

MuniYield New Jersey Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The Fund's financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Fund determines and makes available for publication the net asset value of its Common Stock on a daily basis. The Fund's Common Stock shares are listed on the New York Stock Exchange under the symbol MYJ. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments -- Municipal bonds are traded primarily in the

Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

over-the-counter ("OTC") markets and are valued at the last available bid price in the OTC market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Fund under the general direction of the Board of Directors. Such valuations and procedures are reviewed periodically by the Board of Directors of the Fund. Financial futures contracts and options thereon, which are traded on the exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the OTC market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Fund's pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund.

(b) Derivative financial instruments -- The Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

- o Financial futures contracts -- The Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.
- o Options -- The Fund may write covered call options and purchase put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

- o Forward interest rate swaps -- The Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or

Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

loss in an amount equal to the value of the agreement.

16

MUNIYIELD NEW JERSEY FUND, INC.

MAY 31, 2005

Notes to Financial Statements (concluded)

(c) Income taxes -- It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(d) Security transactions and investment income -- Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend date. Interest income is recognized on the accrual basis. The Fund amortizes all premiums and discounts on debt securities.

(e) Dividends and distributions -- Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(f) Offering costs -- Direct expenses related to the public offering of the Fund's Preferred Stock were charged to capital at the time of issuance of the shares.

2. Investment Advisory Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .50% of the Fund's average weekly net assets, including proceeds from the issuance of Preferred Stock. The Investment Adviser has agreed to reimburse its management fee by the amount of management fees the Fund pays to FAM indirectly through its investment in the CMA New Jersey Municipal Money Fund. For the six months ended May 31, 2005, FAM reimbursed the Fund in the amount of \$2,036.

For the six months ended May 31, 2005, the Fund reimbursed FAM \$3,796 for certain accounting services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended May 31, 2005 were \$89,163,068 and \$91,236,572, respectively.

4. Stock Transactions:

The Fund is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share, all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to reclassify any unissued shares of stock without approval of holders of Common Stock.

Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

Preferred Stock

Auction Market Preferred Stock are redeemable shares of Preferred Stock of the Fund, with a par value of \$.05 per share for Series A and Series B and \$.10 per share for Series C and a liquidation preference of \$25,000 per share plus accrued and unpaid dividends that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods. The yields in effect at May 31, 2005 were as follows: Series A, 2.35%, Series B, 2.65% and Series C, 2.45%.

Shares issued and outstanding during the six months ended May 31, 2005 remained constant. Shares issued and outstanding during the year ended November 30, 2004 increased by 860 shares from the issuance of an additional series of Preferred Stock.

The Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended May 31, 2005, Merrill Lynch, Pierce, Fenner & Smith Incorporated, an affiliate of FAM, earned \$80,105 as commissions.

5. Capital Loss Carryforward:

On November 30, 2004, the Fund had a net capital loss carryforward of \$8,187,904 of which \$1,092,188 expires in 2007, \$6,856,160 expires in 2008 and \$239,556 expires in 2012. This amount will be available to offset like amounts of any future taxable gains.

6. Subsequent Event:

The Fund paid a tax-exempt income dividend to holders of Common Stock in the amount of \$.078000 per share on June 29, 2005 to shareholders of record on June 14, 2005.

Dividend Policy

The Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Fund may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Fund for any particular month may be more or less than the amount of net investment income earned by the Fund during such month. The Fund's current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the financial information included in this report.

Mercury Advisors

A Division of Merrill Lynch Investment Managers

www.mercury.ml.com

MuniYield New Jersey Fund, Inc. seeks to provide shareholders with as high a level of current income exempt from federal and New Jersey income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income tax and New Jersey personal income taxes.

This report, including the financial information herein, is transmitted to shareholders of MuniYield New Jersey Fund, Inc. for their information. It is not a prospectus. Past performance results shown in this report should not be considered a representation of future performance. The Fund has leveraged its Common Stock and intends to remain leveraged by issuing Preferred Stock to provide the Common Stock shareholders with a potentially higher rate of return. Leverage creates risks for Common Stock shareholders, including the likelihood of greater volatility of net asset value and market price of shares of the Common Stock, and the risk that fluctuations in the short-term dividend rates of the Preferred Stock may affect the yield to Common Stock shareholders. Statements and other information herein are as dated and are subject to change.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling toll-free 1-800-MER-FUND (1-800-637-3863); (2) at www.mutualfunds.ml.com; and (3) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>. Information about how the Fund voted proxies relating to securities held in the Fund's portfolio during the most recent 12-month period ended June 30 is available (1) at www.mutualfunds.ml.com and (2) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>.

Item 11 - Controls and Procedures

11(a) - The registrant's certifying officers have reasonably designed such disclosure controls and procedures to ensure material information relating to the registrant is made known to us by others particularly during the period in which this report is being prepared. The registrant's certifying officers have determined that the registrant's disclosure controls and procedures are effective based on our evaluation of these controls and procedures as of a date within 90 days prior to the filing date of this report.

11(b) - There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Act (17 CFR 270.30a-3(d)) that occurred during the last fiscal half-year of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 12 - Exhibits attached hereto

12(a) (1) - Code of Ethics - Not Applicable to this semi-annual report

12(a) (2) - Certifications - Attached hereto

12(a) (3) - Not Applicable

12(b) - Certifications - Attached hereto
