Gross unrealized depreciation	<u>(10,807,226)</u>

Net unrealized appreciation of investments	\$ 8,157,081
--	--------------

⁽¹⁾ Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At January 31, 2010, the value of these securities amounted to \$40,188,007 or 14.41% of net assets.

⁽²⁾ Security is illiquid. At January 31, 2010, the value of these securities amounted to \$11,534,909 or 4.14% of net assets.

⁽³⁾ These securities, which represent 0.11% of net assets as of January 31, 2010, are considered restricted. (See restricted securities table below for more information.)

Restricted securities	Acquisition dates	Acquisition cost	Acquisition cost as a percentage of net assets	01/31/10 Market value	01/31/10 Market value as a percentage of net assets
Union National FIDC Trust 2006, Series 2007-2, due 07/01/10	06/28/07	\$1,834,873	0.66%	\$ 75,936	0.03%

Edgar Filing: GLOBAL HIGH INCOME FUND INC - Form N-Q

Series 3, due 07/01/10	08/07/08	2,099,381	0.75	86,338	0.03
Series 4, due 05/01/11	10/22/07	3,583,526	1.29	147,712	0.05
		\$7,517,780	2.70%	\$309,986	0.11%

(4) Security linked to closed-end fund.

(5) Security is in default.

(6) Security exempt from registration pursuant to Regulation S under the Securities Act of 1933. Regulation S applies to securities offerings that are made outside of the United States and do not involve direct selling efforts in the United States. At January 31, 2010, the value of these securities amounted to \$39,379,969 or 14.12% of net assets.

(7) Floating rate security □ The interest rates shown are the current rates as of January 31, 2010.

(8) Step bond □ Coupon rate increases in increments to maturity. Rate disclosed is as of January 31, 2010. Maturity date disclosed is the ultimate maturity date.

(9) Security purchased after stated maturity date as defaulted debt. Bond is being traded based on potential future claim.

(10) Debt security whose principal and/or interest payments are adjusted for inflation, unlike debt securities that make fixed principal and interest payments. The interest rate paid by the securities is fixed, while the principal value rises or falls based on changes in an index. Thus, if inflation occurs, the principal and interest payments on the securities are adjusted accordingly to protect investors from inflationary loss. During a deflationary period, the principal and interest payments decrease, although the securities principal amounts will not drop below their face amounts at maturity. In exchange for the inflation protection, the securities generally pay lower interest rates than typical government securities from the issuers country. Only if inflation occurs will securities offer a higher real yield than a conventional government security of the same maturity.

(11) The table below details the Fund's investment in a security issued by a fund that is advised by the same advisor as the Fund. The advisor does not earn a management fee from UBS Cash Management Prime Relationship Fund.

Security description	Value 10/31/09	Purchases during the three months ended 01/31/10	Sales during the three months ended 01/31/10	Value 01/31/10	Income earned from affiliate fo the three months ended 01/31/10
UBS Cash Management Prime Relationship Fund	\$27,942,180	\$26,876,494	\$44,875,011	\$9,943,663	\$9,154

(12) The rate shown reflects the yield at January 31, 2010.

(13) The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities and other instruments from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, official market closing prices, current market quotations or valuations from computerized "matrix" systems that derive values based on comparable securities or instruments. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. Securities traded in the over-the-counter ("OTC") market and listed on The NASDAQ Stock Market, Inc. ("NASDAQ") normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the market closing price, the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc. ("UBS Global AM"), the investment advisor of the Fund. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the "Board"). Foreign currency exchange rates are generally determined as of the close of the New York Stock Exchange ("NYSE"). Occasionally, events affecting the value of foreign investments occur between the time at which they are determined and the close of the NYSE, which will not be reflected in the computation of the Fund's net asset value. If events materially affecting the value of such securities occur during such time periods, the securities will be valued at their fair value as determined in good faith by or under the direction of the Board. The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value. Investments in open-end investment companies are valued at the daily closing net asset value of the respective investment company as provided by such other entity. Pursuant to the Fund's adoption of use of the practical expedient within ASC Topic 820 that is effective for interim periods ending after December 15, 2009, investments in non-registered investment companies are also valued at the daily net asset value. All investments quoted in foreign currencies are valued daily in US dollars on the basis of the foreign currency exchange rates prevailing at the time such valuation is determined by the Fund's custodian.

					\$ (8,445)	\$ 714,916	\$ 723,361	

(1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation.

(2) Credit spreads, where available, represented in absolute terms, utilized in determining the market value as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood of risk of default for the credit derivative. The credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood of risk of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as □Defaulted□ indicates a credit event has occurred for the referenced entity.

(3) Payment to the counterparty will be made upon the occurrence of bankruptcy and/or restructuring event with respect to the Argentine Government 8.280% bond, due 12/31/33.

(4) Payments received are based on the notional amount.

(5) Payment to the counterparty will be made upon the occurrence of bankruptcy and/or restructuring event with respect to the Republic of Bulgaria 8.250% bond, due 01/15/15.

(6) Payment to the counterparty will be made upon the occurrence of bankruptcy and/or restructuring event with respect to the Deutsche Bank Kazakhstan 7.375% bond, due 11/12/13.

(7) Payment to the counterparty will be made upon the occurrence of bankruptcy and/or restructuring event with respect to the United Mexican States 7.500% bond, due 04/08/33.

(8) Payment to the counterparty will be made upon the occurrence of bankruptcy and/or restructuring event with respect to the Russian Federation 7.500% bond, due 03/31/30.

US generally accepted accounting principles ("GAAP") requires disclosure regarding the various inputs that are used in determining the value of the Fund's investments. These inputs are summarized into the three broad levels listed below:

Level 1—Unadjusted quoted prices in active markets for identical investments.

Level 2—Other significant observable inputs, including but not limited to, quoted prices for similar investments, interest rates, prepayment speeds and credit risk.

Level 3—Unobservable inputs inclusive of the Fund's own assumptions in determining the fair value of investments.

The following is a summary of the inputs used as of January 31, 2010 in valuing the Fund's investments:

Measurements at 01/31/10

Description	Unadjusted quoted prices in active markets for identical investments (Level 1)	Other significant observable inputs (Level 2)	Unobservable inputs (Level 3)	Total
Corporate bonds	\$ □	\$ 37,960,330	\$ 9,560,909	\$ 47,521,239
Non US-government obligations	□	210,361,919	□	210,361,919
Sovereign/supranational bond	□	4,930,329	□	4,930,329
Short-term investment	□	9,943,663	□	9,943,663
Other financial instruments ⁽¹⁾	(244,019)	2,107,490	□	1,863,471
Total	\$ (244,019)	\$ 265,303,731	\$ 9,560,909	\$ 274,620,621

Other financial instruments may include open futures contracts, swap agreements, options and forward foreign ⁽¹⁾ currency contracts.

In January 2010, Financial Accounting Standards Board ("FASB") issues Accounting Standards Update ("ASU") No.2010-06 "Improving Disclosures about Fair Value Measurements". ASU No. 2010-06 will require reporting entities to make new disclosures about amounts and reasons for significant transfers in and out of Level 1 and Level 2 fair value measurements as well as input and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3, and information on purchases, sales, issuances and settlements on a gross basis in the reconciliation of activity in Level 3 fair value measures. The new and revised disclosures are required to be implemented for fiscal years beginning after December 15, 2009 except for the disclosures surrounding purchases, sales, issuances and settlements on a gross basis in the reconciliation of Level 3 fair value measures, which are effective for fiscal years beginning after December 15, 2010. Management is currently evaluating the impact the adoption of ASU No. 2010-06 may have on the Fund's financial statement disclosures.

The following is a rollforward of the Fund's investments that were valued using unobservable inputs for the period:

	Measurements using unobservable inputs (Level 3)	
	Corporate bonds	Total
Assets		
Beginning balance	\$ 10,733,190	\$ 10,733,190
Total gains or losses (realized/unrealized) included in earnings	(597,281)	(597,281)
Purchases, sales, issuances, and settlements (net)	(575,000)	(575,000)

Edgar Filing: GLOBAL HIGH INCOME FUND INC - Form N-Q

Transfers in and/or out of Level 3	□	□
Ending balance	\$ 9,560,909	\$ 9,560,909
The amount of total gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to investments still held at 01/31/10.	\$ (653,280)	\$ (653,280)

(1) Swap agreements

The Fund may engage in swap agreements, including but not limited to interest rate, currency, total return, credit default and equity swap agreements. The Fund expects to enter into these transactions to preserve a return or spread on a particular investment or to hedge a portion of the portfolio's duration, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, or to gain exposure to certain markets in the most economical way possible.

The Fund may enter into interest rate swap agreements with another party to receive or pay interest (e.g., an exchange of fixed rate payments for floating rate payments) to protect themselves from interest rate fluctuations. This type of swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to a specified interest rate(s) for a specified amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. Interest rate swap agreements are subject to general market risk, liquidity risk, counterparty risk and interest rate risk.

Credit default swap agreements involve commitments to make or receive payments in the event of a default or other credit event of a referenced security. As a buyer, the Fund would make periodic payments to the counterparty, and the Fund would receive payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will lose its periodic stream of payments over the term of the contract. However, if a credit event does occur, the Fund typically would receive full notional value for a reference obligation that may have little or no value. As a seller, the Fund would receive periodic payments from the counterparty, and the Fund would make payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will gain the periodic stream of payments it received over the term of the contract. However, if a credit event occurs, the Fund will pay full notional value for a reference obligation that may have little or no value. Credit default swaps may involve greater risks than if the Fund had invested in the reference obligation directly and are subject to general market risk, liquidity risk, counterparty risk and credit risk.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of referenced credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Fund may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds with a credit default swap on indices which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swap on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Credit default swap agreements on corporate issues or sovereign issues of an emerging country involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). The Fund may use credit default swaps on corporate issues or sovereign issues of an emerging country to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Fund owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default.

The maximum potential amount of future payments (undiscounted) that the Fund as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement which may exceed the amount of unrealized appreciation or depreciation reflected on the Statement of assets and liabilities. Notional amounts of all credit default swap agreements outstanding as of January 31, 2010 for which the Fund is the seller of protection are disclosed under the section "Credit default swaps on credit indices" "sell protection" in the Notes to portfolio of investments. These potential amounts would be partially offset by any

recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into, if any, by the Fund for the same referenced entity or entities.

Total return swap agreements involve commitments to pay or receive interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty, respectively. Total return swaps are marked-to-market daily, and the change, if any, is recorded as unrealized appreciation or depreciation. Total return swap agreements are subject to general market risk, liquidity risk, counterparty risk and that there may be unfavorable changes in the underlying investments or instruments.

The use of swaps involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If UBS Global AM is incorrect in its forecast of market values, interest rates and other applicable factors, the investment performance of the Fund will be less favorable than it would have been if this investment technique was never used. Swaps do not involve the delivery of securities and are subject to counterparty risk. If the other party to a swap defaults and fails to consummate the transaction, the Fund's risk of loss will consist of the net amount of interest or other payments that the Fund is contractually entitled to receive. Therefore, the Fund would consider the creditworthiness of the counterparty to a swap agreement in evaluating potential credit risk.

The Fund will accrue for interim payments on swap agreements on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap agreements on the Statement of assets and liabilities. Once interim payments are settled in cash, the net amount is recorded as realized gain/loss on swap agreements, in addition to realized gain/loss recorded upon the termination of swap agreements on the Statement of operations. Fluctuations in the value of swap agreements are recorded for financial statement purposes as unrealized appreciation or depreciation of swap agreements.

(2) Options writing

The Fund may write (sell) put and call options on foreign or US securities indices in order to gain exposure to or protect against changes in the markets. When the Fund writes a call or a put option, an amount equal to the premium received by the Fund is included in the Fund's Statement of assets and liabilities as an asset and as an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. If an option which the Fund has written either expires on its stipulated expiration date or the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security or derivative instrument, and the liability related to such option is extinguished. If a call option which the Fund has written is exercised, the Fund recognizes a realized gain or loss (long-term or short-term, depending on the holding period of the underlying security) from the sale of the underlying security or derivative instrument and the proceeds from the sale are increased by the premium originally received. If a put option which the Fund has written is exercised, the amount of the premium originally received reduces the cost of the security or derivative instrument which the Fund purchases upon exercise of the option.

In writing an option, the Fund bears the market risk (specifically interest rate risk) of an unfavorable change in the price of the derivative instrument, security, index or currency underlying the written option. Exercise of an option written by a Fund could result in the Fund selling or buying a derivative instrument, security or currency at a price different from current market value.

(3) Restricted securities

The Fund may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included in the Fund's Notes to portfolio of investments.

(4) Securities lending

The Fund may lend portfolio securities up to 33¹/₃% of its total assets to qualified broker-dealers or institutional investors. The loans are secured at all times by cash, cash equivalents, US government securities or irrevocable letters of credit in an amount at least equal to the market value of the securities loaned, plus accrued interest and dividends, determined on a daily basis and adjusted accordingly.

The Fund will regain ownership of loaned securities to exercise certain beneficial rights; however, the Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower fail financially. The Fund receives compensation for lending its securities from interest or dividends earned on the cash, cash equivalents, US government securities or irrevocable letters of credit held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The Fund monitors the market value of securities loaned on a daily basis and initially requires collateral against the loaned securities in an amount at least equal to 102% of the value of domestic securities loaned and 105% of the value of foreign securities loaned. The Fund did not lend any securities during the quarter ended January 31, 2010.

For more information regarding the Fund's other significant accounting policies, please refer to Fund's annual report to shareholders dated October 31, 2009.

Item 2. Controls and Procedures.

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (Investment Company Act)) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.
- (b) The registrant's principal executive officer and principal financial officer are aware of no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act) that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 3. Exhibits.

- (a) Certifications of principal executive officer and principal financial officer of registrant pursuant to Rule 30a-2(a) under the Investment Company Act is attached hereto as Exhibit EX-99.CERT.
