For the purposes of the discussion in this Quarterly Report on Form 10-Q, the term Voya Financial, Inc. refers to Voya Financial, Inc. and the terms "Company," "we," "our," and "us" refer to Voya Financial, Inc. and its subsidiaries.

NOTE CONCERNING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q, including "Risk Factors," and "Management's Discussion and Analysis of Financial Condition and Results of Operations," contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements relating to future developments in our business or expectations for our future financial performance and any statement not involving a historical fact. Forward-looking statements use words such as "anticipate," "believe," "estimate," "expect," "intend," "plan," and other words and terms of similar meaning in connection with a discussion of future operating or financial performance. Actual results, performance or events may differ materially from those projected in any forward-looking statement due to, among other things, (i) general economic conditions, particularly economic conditions in our core markets, (ii) performance of financial markets, including emerging markets, (iii) the frequency and severity of insured loss events, (iv) mortality and morbidity levels, (v) persistency and lapse levels, (vi) interest rates, (vii) currency exchange rates, (viii) general competitive factors, (ix) changes in laws and regulations, and (x) changes in the policies of governments and/or regulatory authorities. Factors that may cause actual results to differ from those in any forward-looking statement also include those described under "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations-Trends and Uncertainties" and "Business-Closed Blocks-CBVA" in the Annual Report on Form 10-K for the year ended December 31, 2014 (File No. 001-35897) (the "Annual Report on Form 10-K") and "Risk Factors," in the Quarterly Report on Form 10-Q for the quarter ended March 31, 2015 (File No. 001-35897) and this Quarterly Report on Form 10-Q.

The risks included here are not exhaustive. Current reports on Form 8-K and other documents filed with the Securities and Exchange Commission ("SEC") include additional factors that could affect our businesses and financial performance. Moreover, we operate in a rapidly changing and competitive environment. New risk factors emerge from time to time, and it is not possible for management to predict all such risk factors.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

1. Business, Basis of Presentation and Significant Accounting Policies

Business

Voya Financial, Inc. (which changed its name from ING U.S., Inc. on April 7, 2014) and its subsidiaries (collectively the "Company") is a financial services organization in the United States that offers a broad range of retirement services, annuities, investment management services, mutual funds, life insurance, group insurance and supplemental health products. Prior to April 20, 2015, the Company provided principal products and services in three ongoing businesses—Retirement Solutions, Investment Management and Insurance Solutions—and reported results for the ongoing businesses through five segments. Effective April 20, 2015, the Company provides principal products and services in two ongoing businesses ("Ongoing Business")—Retirement and Investment Solutions; and Insurance Solutions. This change did not affect the Company's five ongoing operating segments. The Company also has a Corporate segment, which includes the financial data not directly related to the businesses, and Closed Block segments. See the Segments Note to these Condensed Consolidated Financial Statements.

Prior to May 2013, the Company was an indirect, wholly-owned subsidiary of ING Groep N.V. ("ING Group" or "ING"), a global financial services holding company based in The Netherlands, with American Depository Shares listed on the New York Stock Exchange. In 2009, ING Group announced the anticipated separation of its global banking and insurance businesses, including the divestiture of the Company. On April 11, 2013, the Company announced plans to rebrand as Voya Financial. On May 2, 2013, the common stock of Voya Financial, Inc. began trading on the New York Stock Exchange under the symbol "VOYA." On May 7, 2013 and May 31, 2013, Voya Financial, Inc. completed its initial public offering of common stock, including the issuance and sale by Voya Financial, Inc. of 30,769,230 shares of common stock and the sale by ING Insurance International B.V. ("ING International"), an indirect wholly owned subsidiary of ING Group and previously the sole stockholder of Voya Financial, Inc., of 44,201,773 shares of outstanding common stock of Voya Financial, Inc. (collectively, the "IPO"). On September 30, 2013, ING International transferred all of its remaining shares of Voya Financial, Inc. common stock to ING Group.

On October 29, 2013, ING Group completed a sale of 37,950,000 shares of common stock of the Company in a registered public offering ("Secondary Offering"), reducing ING Group's ownership in the Company to 57%.

In 2014, ING Group completed sales of 82,783,006 shares of common stock of Voya Financial, Inc. in three registered public offerings throughout the year (the "2014 Offerings"). In conjunction with each of these offerings, pursuant to the terms of share repurchase agreements between ING Group and Voya Financial, Inc., Voya Financial, Inc. acquired 19,447,847 shares of its common stock from ING Group (the "2014 Direct Share Repurchases") (the 2014 Offerings and the 2014 Direct Share Repurchases collectively, the "2014 Transactions"). Upon completion of the 2014 Transactions, ING Group's ownership of Voya Financial, Inc. was reduced to approximately 19%.

On March 9, 2015, ING Group completed a sale of 32,018,100 shares of common stock of Voya Financial, Inc. in a registered public offering (the "March 2015 Offering"). Also on March 9, 2015, pursuant to the terms of a share repurchase agreement between ING Group and Voya Financial, Inc., Voya Financial, Inc. acquired 13,599,274 shares of its common stock from ING Group (the "March 2015 Direct Share Repurchase") (the March 2015 Offering and the March 2015 Direct Share Repurchase collectively, the "March 2015 Transactions"). Upon completion of the March

2015 Transactions, ING Group has exited its stake in Voya Financial, Inc. common stock. ING Group continues to hold warrants to purchase up to 26,050,846 shares of Voya Financial, Inc. common stock at an exercise price of \$48.75, in each case subject to adjustments. As a result of the completion of the March 2015 Transactions, ING Group has satisfied the provisions of its agreement with the European Union regarding the divestment of its U.S. insurance and investment operations, which required ING Group to divest 100% of its ownership interest in Voya Financial, Inc. together with its subsidiaries by the end of 2016.

Basis of Presentation

The accompanying Condensed Consolidated Financial Statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") and are unaudited. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Condensed Consolidated Financial

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Statements and the reported amounts of revenues and expenses during the reporting period. Those estimates are inherently subject to change and actual results could differ from those estimates.

The Condensed Consolidated Financial Statements include the accounts of Voya Financial, Inc. and its subsidiaries, as well as partnerships (voting interest entities ("VOEs")) in which the Company has control and variable interest entities ("VIEs") for which the Company is the primary beneficiary. See the Consolidated Investment Entities Note to these Condensed Consolidated Financial Statements. Intercompany transactions and balances have been eliminated.

The accompanying Condensed Consolidated Financial Statements reflect adjustments (including normal, recurring adjustments) necessary to present fairly the financial position of the Company as of September 30, 2015, its results of operations and comprehensive income for the three and nine months ended September 30, 2015 and 2014, and its changes in shareholders' equity and statements of cash flows for the nine months ended September 30, 2015 and 2014, in conformity with U.S. GAAP. Interim results are not necessarily indicative of full year performance. The December 31, 2014 Consolidated Balance Sheet is from the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K, filed with the SEC. Therefore, these unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements and related notes included in the Company's Annual Report on Form 10-K.

Revision of Previously Issued Financial Statements

As part of the Company's ongoing process of validating actuarial models, during the second quarter of 2015, the Company identified improper inputs to the calculation of the estimated fair value of the embedded derivative in certain of its guaranteed minimum withdrawal benefits with life payouts ("GMWBL") products. The products are included in the Company's Closed Block Variable Annuity ("CBVA") segment, and are no longer offered by the Company. The errors affected the Company's U.S. GAAP financial statements for periods prior to and including the three months ended March 31, 2015, and did not impact regulatory or rating agency capital. The errors did not affect the Company's variable annuity policyholders in any manner.

Based on an analysis of quantitative and qualitative factors in accordance with SEC Staff Accounting Bulletins 99 and 108, the Company concluded that these errors were not material to the consolidated financial position, results of operations or cash flows as presented in the Company's quarterly and annual financial statements that have been previously filed in the Company's Quarterly Reports on Form 10-Q and Annual Reports on Form 10-K. As a result, amendment of such reports is not required. In preparing the Company's Condensed Consolidated Financial Statements for the three and six months ended June 30, 2015 and the three and nine months ended September 30, 2015, the Company made appropriate revisions to its financial statements for historical periods. Such changes are reflected in the financial results for the three and nine months ended September 30, 2014 and as of December 31, 2014 included in these interim financial statements and will also be reflected in the historical financial results included in the Company's subsequent quarterly and annual consolidated financial statements.

The correction results in changes to the liabilities, with corresponding tax effects, as follows:

- (a) Liabilities: Lower Future policy benefits, with the change recorded in Other net realized capital gains (losses).
- (b) Assets: Lower Deferred income taxes (after considering the impacts of valuation allowances), with the change recorded as Income tax expense (benefit).

Edgar Filing: Voya Financial, Inc. - Form 10-Q

The following tables quantify the prior period impact of this revision.

Balance Sheets:

	December 31, 2014			December 31, 2013		
	As originally reported	Effect of change	As adjusted	As originally reported	Effect of change	As adjusted
Deferred income taxes	\$1,320.6	\$(20.7)	\$1,299.9	\$162.1	\$—	\$162.1
Future policy benefits	15,691.2	(59.0)	15,632.2	14,098.4	(43.0)	14,055.4
Retained earnings (deficit) - Unappropriated	(9,861.9)	38.3	(9,823.6)	(12,161.6)	43.0	(12,118.6)

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Statements of Operations:

	Three Months Ended September 30, 2014			Nine Months Ended September 30, 2014		
	As originally reported	Effect of change	As adjusted	As originally reported	Effect of change	As adjusted
Other net realized capital gains (losses)	\$200.4	\$5.0	\$205.4	\$(350.9)	\$11.0	\$(339.9)
Income tax expense (benefit)	37.4	—	37.4	74.2	—	74.2
Net income (loss)	517.4	5.0	522.4	1,201.9	11.0	1,212.9
Net income (loss) available to Voya Financial, Inc.'s common shareholders	400.8	5.0	405.8	905.2	11.0	916.2
Net income (loss) available to Voya Financial, Inc.'s common shareholders per share:						
Basic	\$1.59	\$0.02	\$1.61	\$3.54	\$0.04	\$3.58
Diluted	\$1.58	\$0.01	\$1.59	\$3.51	\$0.04	\$3.55

	Three Months Ended March 31, 2015		
	As originally reported	Effect of change	As adjusted
Other net realized capital gains (losses)	\$(259.6)	\$5.0	\$(254.6)
Income tax expense (benefit)	44.7	0.9	45.6
Net income (loss)	211.6	4.1	215.7
Net income (loss) available to Voya Financial, Inc.'s common shareholders	185.5	4.1	189.6
Net income (loss) available to Voya Financial, Inc.'s common shareholders per share:			
Basic	\$0.78	\$0.02	\$0.80
Diluted	\$0.77	\$0.02	\$0.79

Additionally, the impact of this revision to Income (loss) before income taxes was \$16.0, \$(2.0) and \$17.0 for the years ended December 31, 2014, 2013 and 2012, respectively.

Certain line items in the Condensed Consolidated Statements of Comprehensive Income, Cash Flows and Shareholders' Equity were immaterially affected by the revision of previously issued financial statements. All of the line item changes in the Condensed Consolidated Statements of Cash Flows were in the operating activities section. There were no changes to the Condensed Consolidated Statements of Comprehensive Income and Shareholders' Equity, except for the effects of the changes described above.

Adoption of New Pronouncements

Repurchase Agreements

In June 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-11, "Transfers and Servicing (Accounting Standards Codification ("ASC") Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures" ("ASU 2014-11"), which (1) changes the accounting for repurchase-to-maturity transactions to secured borrowing accounting, and (2) requires separate accounting for a transfer of a financial asset executed with a repurchase agreement with the same counterparty. This will result in secured borrowing accounting for the repurchase agreement. The amendments also require additional disclosures for certain transactions accounted for as a sale and for repurchase agreements, securities lending transactions and repurchase-to-maturity transactions that are accounted for as secured borrowings.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The provisions of ASU 2014-11 were adopted by the Company on January 1, 2015, with the exception of disclosure amendments for repurchase agreements, securities lending transactions and repurchase-to-maturity transactions that are accounted for as secured borrowings, which were adopted April 1, 2015. The adoption of the January 1, 2015 provisions had no effect on the Company's financial condition, results of operations or cash flows. The April 1, 2015 disclosure provisions are included in the Investments (excluding Consolidated Investment Entities) Note to these Condensed Consolidated Financial Statements.

Discontinued Operations and Disposals

In April 2014, the FASB issued ASU 2014-08, "Presentation of Financial Statements (ASC Topic 205) and Property, Plant, and Equipment (ASC Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity" ("ASU 2014-08"), which requires the disposal of a component of an entity to be reported in discontinued operations if the disposal represents a strategic shift that has, or will have, a major effect on the entity's operations and financial results. The component should be reported in discontinued operations when it meets the criteria to be classified as held for sale, is disposed of by sale or is disposed of other than by sale.

The amendments also require additional disclosures about discontinued operations, including disclosures about an entity's significant continuing involvement with a discontinued operation and disclosures for a disposal of an individually significant component of an entity that does not qualify for discontinued operations.

The provisions of ASU 2014-08 were adopted prospectively by the Company on January 1, 2015. The adoption had no effect on the Company's financial condition, results of operations or cash flows.

Future Adoption of Accounting Pronouncements

Short-Duration Contracts

In May 2015, the FASB issued ASU 2015-09, "Financial Services - Insurance (ASC Topic 944): Disclosures about Short-Duration Contracts" ("ASU 2015-09"), which requires insurance entities to disclose, for annual reporting periods, information about the liability for unpaid claims and claim adjustment expenses and about significant changes in methodologies and assumptions used to calculate the liability for unpaid claims and claims adjustment expenses. The standard also requires entities to disclose, for annual and interim reporting periods, a rollforward of the liability for unpaid claims and claim adjustment expenses.

The provisions of ASU 2015-09 are effective, retrospectively, for annual periods beginning after December 15, 2015, and interim periods within annual periods beginning after December 15, 2016, with early adoption permitted. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2015-09.

Investments That Calculate Net Asset Value

In May 2015, the FASB issued ASU 2015-07, "Fair Value Measurement (ASC Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)" ("ASU 2015-07"), which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. In addition, the standard limits certain disclosures to investments for which the entity has elected to measure the fair value using the practical expedient, rather than for all investments that are eligible to be measured at fair value using the net asset value per share.

The provisions of ASU 2015-07 are effective, retrospectively, for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years, with early adoption permitted. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2015-07.

Internal-Use Software

In April 2015, the FASB issued ASU 2015-05, "Intangibles - Goodwill and Other-Internal-Use Software (ASC Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement" ("ASU 2015-05"), which clarifies that customers should account for software licenses included in cloud computing arrangements (ex. software as a service) consistent with the acquisition of other software licenses. If the arrangement does not include a software license, the customer should account for the arrangement as a service contract.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The provisions of ASU 2015-05 are effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015, with early adoption permitted. The amendments can be applied prospectively or retrospectively. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2015-05.

Defined Benefit Plans

In April 2015, the FASB issued ASU 2015-04, "Compensation - Retirement Benefits (ASC Topic 715): Practical Expedient for the Measurement Date of an Employer's Defined Benefit Obligation and Plan Assets" ("ASU 2015-04"), which permits remeasurement of defined benefit plan assets and obligations resulting from the occurrence of a significant event using the month-end that is closest to the date of the event.

The provisions of ASU 2015-04 are effective, prospectively, for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years, with early adoption permitted. The Company does not expect ASU 2015-04 to have an impact.

Debt Issuance Costs

In April 2015, the FASB issued ASU 2015-03, "Interest - Imputation of Interest (ASC Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs" ("ASU 2015-03"), which requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability. In August 2015, the FASB issued ASU 2015-15, "Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements" ("ASU 2015-15"), to confirm that ASU 2015-03 does not address debt issuance costs related to line-of-credit arrangements. As such, an entity may defer and present such costs as an asset and subsequently amortize the costs ratably over the term of the line-of-credit arrangement.

The provisions of ASU 2015-03 and ASU 2015-15 are effective, retrospectively, for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years, with early adoption permitted. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2015-03 and ASU 2015-15.

Consolidation

In February 2015, the FASB issued ASU 2015-02, "Consolidation (ASC Topic 810): Amendments to the Consolidation Analysis" ("ASU 2015-02"), which:

- Modifies the evaluation of whether limited partnerships and similar legal entities are VIEs or VOEs, including the requirement to consider the rights of all equity holders at risk to determine if they have the power to direct the entity's most significant activities.

- Eliminates the presumption that a general partner should consolidate a limited partnership. Limited partnerships and similar entities will be VIEs unless the limited partners hold substantive kick-out rights or participating rights.

- Affects the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships.

- Provides a new scope exception for registered money market funds and similar unregistered money market funds, and ends the deferral granted to investment companies from applying the VIE guidance.

The provisions of ASU 2015-02 are effective for annual periods, and for interim periods within those annual periods, beginning after December 15, 2015, with early adoption permitted, using either a retrospective or modified

retrospective approach. The Company is currently in the process of determining the impact of the adoption of the provisions of ASU 2015-02.

Hybrid Financial Instruments

In November 2014, the FASB issued ASU 2014-16, “Derivatives and Hedging (ASC Topic 815): Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity” (“ASU 2014-16”), which requires an entity to determine the nature of the host contract by considering the economic characteristics and risks of the entire hybrid financial instrument, including all embedded derivative features.

The provisions of ASU 2014-16 are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted. Initial adoption of ASU 2014-16 may be reported on a modified retrospective basis, with a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption, or on a full retrospective basis,

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

with application to all prior periods presented. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2014-16.

Going Concern

In August 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements-Going Concern (ASC Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern" ("ASU 2014-15"), which requires management to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued. The provisions of ASU 2014-15 will not affect a company's financial condition, results of operations, or cash flows, but require disclosure if management determines there is substantial doubt, including management's plans to alleviate or mitigate the conditions or events that raise substantial doubt. The provisions of ASU 2014-15 are effective for annual periods ending after December 15, 2016, and annual and interim periods thereafter. The Company does not expect ASU 2014-15 to have an impact.

Collateralized Financing Entities

In August 2014, the FASB issued ASU 2014-13, "Consolidation (ASC Topic 810): Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity" ("ASU 2014-13"), which allows an entity to elect to measure the financial assets and financial liabilities of a consolidated collateralized financing entity using either:

• ASC Topic 820, whereby both the financial assets and liabilities are measured using the requirements of ASC Topic 820, with any difference reflected in earnings and attributed to the reporting entity in the statement of operations.

• The measurement alternative, whereby both the financial assets and liabilities are measured using the more observable of the fair value of the financial assets and the fair value of the financial liabilities.

The provisions of ASU 2014-13 are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015, with early adoption permitted. The Company is currently in the process of determining the impact of the adoption of the provisions of ASU 2014-13.

Share-based Payments

In June 2014, the FASB issued ASU 2014-12, "Compensation-Stock Compensation (ASC Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period" ("ASU 2014-12"), which requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition and should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved.

The provisions of ASU 2014-12 are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. The amendments can be applied prospectively or retrospectively. The Company does not expect ASU 2014-12 to have an impact on its financial condition or results of operations, as the guidance is consistent with that previously applied.

Revenue from Contracts with Customers

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (ASC Topic 606)" ("ASU 2014-09"), which requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Revenue is recognized when, or as, the entity satisfies a performance obligation under the contract.

The standard also requires disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers.

In August 2015, the FASB issued ASU 2015-14 to amend the effective date of ASU 2014-09 to fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted as of the original effective date, which is January 1, 2017. The provisions of ASU 2014-09 are effective retrospectively. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2014-09.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The amortized cost and fair value of fixed maturities, including securities pledged, as of September 30, 2015, are shown below by contractual maturity. Actual maturities may differ from contractual maturities as securities may be restructured, called or prepaid. Mortgage-backed securities ("MBS") and Other asset-backed securities ("ABS") are shown separately because they are not due at a single maturity date.

	Amortized Cost	Fair Value
Due to mature:		
One year or less	\$ 1,375.2	\$ 1,393.7
After one year through five years	13,044.2	13,629.5
After five years through ten years	20,742.7	21,075.1
After ten years	24,578.1	26,338.2
Mortgage-backed securities	9,340.0	10,181.8
Other asset-backed securities	1,230.4	1,288.4
Fixed maturities, including securities pledged	\$ 70,310.6	\$ 73,906.7

The investment portfolio is monitored to maintain a diversified portfolio on an ongoing basis. Credit risk is mitigated by monitoring concentrations by issuer, sector and geographic stratification and limiting exposure to any one issuer.

As of September 30, 2015 and December 31, 2014, the Company did not have any investments in a single issuer, other than obligations of the U.S. Government and government agencies, with a carrying value in excess of 10% of the Company's condensed consolidated Shareholders' equity.

The following tables set forth the composition of the U.S. and foreign corporate securities within the fixed maturity portfolio by industry category as of the dates indicated:

	Amortized Cost	Gross Unrealized Capital Gains	Gross Unrealized Capital Losses	Fair Value

(Dollar amounts in millions, unless otherwise stated)

Fixed Maturities and Equity Securities

The Company's fixed maturities and equity securities are currently designated as available-for-sale, except those accounted for using the FVO. Available-for-sale securities are reported at fair value and unrealized capital gains (losses) on these securities are recorded directly in Accumulated other comprehensive income (loss) ("AOCI") and presented net of related changes in Deferred policy acquisition costs ("DAC"), Value of business acquired ("VOBA") and Deferred income taxes. In addition, certain fixed maturities have embedded derivatives, which are reported with the host contract on the Condensed Consolidated Balance Sheets.

The Company has elected the FVO for certain of its fixed maturities to better match the measurement of assets and liabilities in the Condensed Consolidated Statements of Operations. Certain collateralized mortgage obligations ("CMOs"), primarily interest-only and principal-only strips, are accounted for as hybrid instruments and valued at fair value with changes in the fair value recorded in Other net realized capital gains (losses) in the Condensed Consolidated Statements of Operations.

The Company invests in various categories of CMOs, including CMOs that are not agency-backed, that are subject to different degrees of risk from changes in interest rates and defaults. The principal risks inherent in holding CMOs are prepayment and extension risks related to significant decreases and increases in interest rates resulting in the prepayment of principal from the underlying mortgages, either earlier or later than originally anticipated. As of September 30, 2015 and December 31, 2014, approximately 47.7% and 44.4%, respectively, of the Company's CMO holdings, were invested in the above mentioned types of CMOs such as interest-only or principal-only strips, that are subject to more prepayment and extension risk than traditional CMOs.

Public corporate fixed maturity securities are distinguished from private corporate fixed maturity securities based upon the manner in which they are transacted. Public corporate fixed maturity securities are issued initially through market intermediaries on a registered basis or pursuant to Rule 144A under the Securities Act of 1933 (the "Securities Act") and are traded on the secondary market through brokers acting as principal. Private corporate fixed maturity securities are originally issued by borrowers directly to investors pursuant to Section 4(a)(2) of the Securities Act, and are traded in the secondary market directly with counterparties, either without the participation of a broker or in agency transactions.

Repurchase Agreements

The Company engages in dollar repurchase agreements with mortgage-backed securities ("dollar rolls") and repurchase agreements with other collateral types to increase its return on investments and improve liquidity. Such arrangements meet the requirements to be accounted for as financing arrangements. The Company also enters into reverse repurchase agreements. These transactions involve a purchase of securities and an agreement to sell substantially the same securities as those purchased. As of September 30, 2015 and December 31, 2014, the Company did not have any securities pledged in dollar rolls, repurchase agreement transactions or reverse repurchase agreements.

Securities Lending

The Company engages in securities lending whereby certain securities from its portfolio are loaned to other institutions, through a lending agent, for short periods of time. The Company has the right to approve any institution with whom the lending agent transacts on its behalf. Initial collateral, primarily cash, is required at a rate of 102% of the market value of the loaned securities. The lending agent retains the collateral and invests it in short-term liquid assets on behalf of the Company. The market value of the loaned securities is monitored on a daily basis with additional collateral obtained or refunded as the market value of the loaned securities fluctuates. The lending agent indemnifies the Company against losses resulting from the failure of a counterparty to return securities pledged where collateral is insufficient to cover the loss. As of September 30, 2015 and December 31, 2014, the fair value of loaned securities was \$437.0 and \$545.9, respectively, and is included in Securities pledged on the Condensed Consolidated Balance Sheets. As of September 30, 2015 and December 31, 2014, collateral retained by the lending agent and invested in short-term liquid assets on the Company's behalf was \$454.2 and \$563.9, respectively, and is recorded in Short-term investments under securities loan agreements, including collateral delivered on the Condensed Consolidated Balance Sheets. As of September 30, 2015 and December 31, 2014, liabilities to return collateral of \$454.2 and \$563.9, respectively, is included in Payables under securities loan agreements, including collateral held on the Condensed Consolidated Balance Sheets.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table sets forth borrowings under securities lending transactions by class of collateral pledged for the dates indicated:

	September 30, 2015	December 31, 2014
U.S. Treasuries	\$—	\$205.4
U.S. Government agencies and authorities	—	17.3
U.S. corporate public securities	260.5	216.7
Foreign corporate public securities and foreign governments	193.7	124.5
Payables under securities loan agreements	\$454.2	\$563.9

The Company's securities lending activities are conducted on an overnight basis, and all securities loaned can be recalled at any time. The Company does not offset assets and liabilities associated with its securities lending program.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Investments with fair values less than amortized cost are included in the Company's other-than-temporary impairments analysis. Impairments were recognized as disclosed in the "Evaluating Securities for Other-Than-Temporary Impairments" section below. The Company evaluates non-agency RMBS and ABS for "other-than-temporary impairments" each quarter based on actual and projected cash flows, after considering the quality and updated loan-to-value ratios reflecting current home prices of underlying collateral, forecasted loss severity, the payment priority within the tranche structure of the security and amount of any credit enhancements. The Company's assessment of current levels of cash flows compared to estimated cash flows at the time the securities were acquired (typically pre-2008) indicates the amount and the pace of projected cash flows from the underlying collateral has generally been lower and slower, respectively. However, since cash flows are typically projected at a trust level, the impairment review incorporates the security's position within the trust structure as well as credit enhancement remaining in the trust to determine whether an impairment is warranted. Therefore, while lower and slower cash flows will impact the trust, the effect on the valuation of a particular security within the trust will also be dependent upon the trust structure. Where the assessment continues to project full recovery of principal and interest on schedule, the Company has not recorded an impairment. Based on this analysis, the Company determined that the remaining investments in an unrealized loss position were not other-than-temporarily impaired and therefore no further other-than-temporary impairment was necessary.

Troubled Debt Restructuring

The Company invests in high quality, well performing portfolios of commercial mortgage loans and private placements. Under certain circumstances, modifications are granted to these contracts. Each modification is evaluated as to whether a troubled debt restructuring has occurred. A modification is a troubled debt restructuring when the borrower is in financial difficulty and the creditor makes concessions. Generally, the types of concessions may include reducing the face amount or maturity amount of the debt as originally stated, reducing the contractual interest rate, extending the maturity date at an interest rate lower than current market interest rates and/or reducing accrued interest. The Company considers the amount, timing and extent of the concession granted in determining any impairment or changes in the specific valuation allowance recorded in connection with the troubled debt restructuring. A valuation allowance may have been recorded prior to the quarter when the loan is modified in a troubled debt restructuring. Accordingly, the carrying value (net of the specific valuation allowance) before and after modification through a troubled debt restructuring may not change significantly, or may increase if the expected recovery is higher than the pre-modification recovery assessment. For the nine months ended September 30, 2015, the Company had no new troubled debt restructurings for private placement bonds or commercial mortgage loans. For the year ended December 31, 2014, the Company had no new troubled debt restructurings for private placement bonds and one new troubled debt restructuring for commercial mortgage loans with a pre-modification and post-modification carrying value of \$1.9.

As of September 30, 2015, the Company held 11 commercial mortgage troubled debt restructured loans with a carrying value of \$20.0. Of these 11 loans, 10 were restructured in August 2013 with a pre-modification and post modification carrying value of \$48.3. These loans represent what remains of an initial portfolio of 20 restructures with a pre-modification and post modification carrying value of \$88.6. This portfolio of loans is comprised of cross-defaulted, cross-collateralized individual loans, which are owned by the same sponsor. Between the date of the troubled debt restructurings and September 30, 2015, this portfolio of loans has repaid \$70.7 in principal.

As of September 30, 2015 and December 31, 2014, the Company did not have any commercial mortgage loans or private placements modified in a troubled debt restructuring with a subsequent payment default.

Mortgage Loans on Real Estate

The Company's mortgage loans on real estate are all commercial mortgage loans held for investment, which are reported at amortized cost, less impairment write-downs and allowance for losses. The Company diversifies its commercial mortgage loan portfolio by geographic region and property type to reduce concentration risk. The Company manages risk when originating commercial mortgage loans by generally lending only up to 75% of the estimated fair value of the underlying real estate. Subsequently, the Company continuously evaluates mortgage loans based on relevant current information including a review of loan-specific credit quality, property characteristics and market trends. Loan performance is monitored on a loan specific basis through the review of submitted appraisals, operating statements, rent revenues and annual inspection reports, among other items. This review ensures properties are performing at a consistent and acceptable level to secure the debt. The components to evaluate debt service coverage are received and reviewed at least annually to determine the level of risk.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table summarizes the Company's investment in mortgage loans as of the dates indicated:

	September 30, 2015	December 31, 2014
Commercial mortgage loans	\$10,730.5	\$9,796.9
Collective valuation allowance for losses	(3.3) (2.8
Total net commercial mortgage loans	\$10,727.2	\$9,794.1

There were no impairments taken on the mortgage loan portfolio for the three and nine months ended September 30, 2015 and 2014.

The following table summarizes the activity in the allowance for losses for commercial mortgage loans for the periods indicated:

	September 30, 2015	December 31, 2014
Collective valuation allowance for losses, balance at January 1	\$2.8	\$3.8
Addition to (reduction of) allowance for losses	0.5	(1.0
Collective valuation allowance for losses, end of period	\$3.3	\$2.8

The carrying values and unpaid principal balances of impaired mortgage loans were as follows as of the dates indicated:

	September 30, 2015	December 31, 2014
Impaired loans without allowances for losses	\$24.9	\$72.8
Less: Allowances for losses on impaired loans	—	—
Impaired loans, net	\$24.9	\$72.8
Unpaid principal balance of impaired loans	\$26.4	\$75.3

The following table presents information on restructured loans as of the dates indicated:

	September 30, 2015	December 31, 2014
Troubled debt restructured loans	\$20.0	\$65.5

The Company defines delinquent mortgage loans consistent with industry practice as 60 days past due. The Company's policy is to recognize interest income until a loan becomes 90 days delinquent or foreclosure proceedings are commenced, at which point interest accrual is discontinued. Interest accrual is not resumed until the loan is brought current.

There were no mortgage loans in the Company's portfolio in process of foreclosure or in arrears with respect to principal and interest as of September 30, 2015 and December 31, 2014.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

Interest income recognized on troubled debt restructured loans, on an accrual basis	1.7	3.3

⁽¹⁾ Includes amounts for Troubled debt restructured loans.

Loan-to-value ("LTV") and debt service coverage ("DSC") ratios are measures commonly used to assess the risk and quality of mortgage loans. The LTV ratio, calculated at time of origination, is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The DSC ratio, based upon the most recently received financial statements, is expressed as a percentage of the amount of a property's net income to its debt service payments. A DSC ratio of less than 1.0 indicates that a property's operations do not generate sufficient income to cover debt payments. These ratios are utilized as part of the review process described above.

The following table presents the LTV ratios as of the dates indicated:

	September 30, 2015 ⁽¹⁾	December 31, 2014 ⁽¹⁾
Loan-to-Value Ratio:		
0% - 50%	\$1,395.0	\$1,460.6
> 50% - 60%	2,865.0	2,261.6
> 60% - 70%	5,961.4	5,514.8
> 70% - 80%	489.6	541.3
> 80% and above	19.5	18.6
Total Commercial mortgage loans	\$10,730.5	\$9,796.9

⁽¹⁾ Balances do not include collective valuation allowance for losses.

Evaluating Securities for Other-Than-Temporary Impairments

The Company performs a regular evaluation, on a security-by-security basis, of its available-for-sale securities holdings, including fixed maturity securities and equity securities in accordance with its impairment policy in order to evaluate whether such investments are other-than-temporarily impaired.

The following tables identify the Company's credit-related and intent-related impairments included in the Condensed Consolidated Statements of Operations, excluding impairments included in Other comprehensive income (loss) by type for the periods indicated:

	Three Months Ended September 30,			
	2015	No. of Securities	2014	No. of Securities
U.S. Treasuries	\$—	—	\$0.5	1
U.S. corporate public securities	12.5	15	14.4	41
Foreign corporate public securities and foreign governments ⁽¹⁾	26.4	8	1.3	4
Foreign corporate private securities ⁽¹⁾	—	—	—	—
Residential mortgage-backed	1.7	23	2.5	47
Commercial mortgage-backed	0.6	1	—	*5
Other asset-backed	0.1	1	0.7	17
Equity	—	—	—	—
Total	\$41.3	48	\$19.4	115

⁽¹⁾ Primarily U.S. dollar denominated.

* Less than \$0.1.

	Nine Months Ended September 30,

Equity	0.1	1	1.0	2
Total	\$54.6	92	\$25.2	158

⁽¹⁾ Primarily U.S. dollar denominated.

The above tables include \$0.6 and \$10.9 of write-downs related to credit impairments for the three and nine months ended September 30, 2015, respectively, in Other-than-temporary impairments, which are recognized in the

Condensed Consolidated Statements of Operations. The remaining \$40.7 and \$43.7 in write-downs for the three and nine months ended September 30, 2015, respectively, are related to intent impairments.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The above tables include \$2.3 and \$5.9 of write-downs related to credit impairments for the three and nine months ended September 30, 2014, respectively, in Other-than-temporary impairments, which are recognized in the Condensed Consolidated Statements of Operations. The remaining \$17.1 and \$19.3 in write-downs for the three and nine months ended September 30, 2014, respectively, are related to intent impairments.

The following tables summarize these intent impairments, which are also recognized in earnings, by type for the periods indicated:

	Three Months Ended September 30,		2014	
	2015	No. of Securities	Impairment	No. of Securities
U.S. Treasuries	\$—	—	\$0.5	1

The Company may sell securities during the period in which fair value has declined below amortized cost for fixed maturities or cost for equity securities. In certain situations, new factors, including changes in the business environment, can change the Company's previous intent to continue holding a security. Accordingly, these factors may lead the Company to record additional intent related capital losses.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following tables identify the amount of credit impairments on fixed maturities for which a portion of the OTTI loss was recognized in Other comprehensive income (loss) and the corresponding changes in such amounts for the periods indicated:

	Three Months Ended September 30,	
	2015	2014
Balance at July 1	\$80.2	\$104.0
Additional credit impairments:		
On securities not previously impaired	—	0.3
On securities previously impaired	0.6	1.7
Reductions:		
Increase in cash flows	0.1	—
Securities sold, matured, prepaid or paid down	3.0	3.6
Balance at September 30	\$77.7	\$102.4

	Nine Months Ended September 30,	
	2015	2014
Balance at January 1	\$86.8	\$114.2
Additional credit impairments:		
On securities not previously impaired	—	1.4
On securities previously impaired	3.4	3.2
Reductions:		
Increase in cash flows	0.9	—
Securities sold, matured, prepaid or paid down	11.6	16.4
Balance at September 30	\$77.7	\$102.4

Net Investment Income

The following table summarizes Net investment income for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Fixed maturities	\$983.6	\$1,006.8	\$2,963.0	\$2,983.9
Equity securities, available-for-sale	3.2	2.3	7.0	9.7
Mortgage loans on real estate	135.2	124.2	394.1	358.5
Policy loans	27.6	28.5	83.2	84.6
Short-term investments and cash equivalents	0.7	0.9	2.3	2.4
Other	(20.5) 3.3	(7.5) (4.5
Gross investment income	1,129.8	1,166.0	3,442.1	3,434.6
Less: Investment expenses	3.1	2.4	6.8	4.5
Net investment income	\$1,126.7	\$1,163.6	\$3,435.3	\$3,430.1

As of September 30, 2015 and December 31, 2014, the Company had \$3.6 and \$0.1, respectively, of investments in fixed maturities that did not produce net investment income. Fixed maturities are moved to a non-accrual status when the investment defaults.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Interest income on fixed maturities is recorded when earned using an effective yield method, giving effect to amortization of premiums and accretion of discounts. Such interest income is recorded in Net investment income in the Condensed Consolidated Statements of Operations.

Net Realized Capital Gains (Losses)

Net realized capital gains (losses) comprise the difference between the amortized cost of investments and proceeds from sale and redemption, as well as losses incurred due to the credit-related and intent-related other-than-temporary impairment of investments. Realized investment gains and losses are also primarily generated from changes in fair value of embedded derivatives within product guarantees and fixed maturities, changes in fair value of fixed maturities recorded at FVO and changes in fair value including accruals on derivative instruments, except for effective cash flow hedges. The cost of the investments on disposal is generally determined based on first-in-first-out ("FIFO") methodology.

Net realized capital gains (losses) were as follows for the periods indicated:

	Three Months Ended September 30,	
	2015	2014
Fixed maturities, available-for-sale, including securities pledged	\$ (48.1)) \$ (1.3)
Fixed maturities, at fair value option	(82.0)) (104.4)
Equity securities, available-for-sale	(0.9)) —
Derivatives	823.1	167.9
Embedded derivative - fixed maturities	2.0	(1.1)
Embedded derivative - product guarantees	(394.7)) 132.7
Other investments	(0.3)) (7.8)
Net realized capital gains (losses)	\$ 299.1	\$ 186.0
After-tax net realized capital gains (losses)	\$ 192.5	\$ 134.4
	Nine Months Ended September 30,	
	2015	2014
Fixed maturities, available-for-sale, including securities pledged	\$ (53.9)) \$ 43.3
Fixed maturities, at fair value option	(260.0)) (139.3)
Equity securities, available-for-sale	(1.3)) 17.9
Derivatives	431.8	(11.6)
Embedded derivative - fixed maturities	(10.6)) (8.3)
Embedded derivative - product guarantees	(67.9)) (287.0)
Other investments	1.2	19.9
Net realized capital gains (losses)	\$ 39.3	\$ (365.1)
After-tax net realized capital gains (losses)	\$ 23.6	\$ (224.8)

Proceeds from the sale of fixed maturities and equity securities, available-for-sale and the related gross realized gains and losses, before tax, were as follows for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Proceeds on sales	\$ 1,364.5	\$ 1,806.3	\$ 4,142.3	\$ 5,606.5

Edgar Filing: Voya Financial, Inc. - Form 10-Q

Gross gains	18.2	38.2	50.7	143.4
Gross losses	23.1	20.2	54.1	76.3

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

3. Derivative Financial Instruments

The Company enters into the following types of derivatives:

Interest rate caps: The Company uses interest rate cap contracts to hedge the interest rate exposure arising from duration mismatches between assets and liabilities. Interest rate caps are also used to hedge interest rate exposure if rates rise above a specified level. Such increases in rates will require the Company to incur additional expenses. The future payout from the interest rate caps fund this increased exposure. The Company pays an upfront premium to purchase these caps. The Company utilizes these contracts in non-qualifying hedging relationships.

Interest rate swaps: Interest rate swaps are used by the Company primarily to reduce market risks from changes in interest rates and to alter interest rate exposure arising from mismatches between assets and/or liabilities. Interest rate swaps are also used to hedge the interest rate risk associated with the value of assets it owns or in an anticipation of acquiring them. Using interest rate swaps, the Company agrees with another party to exchange, at specified intervals, the difference between fixed rate and floating rate interest payments, calculated by reference to an agreed upon notional principal amount. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made to/from the counterparty at each due date. The Company utilizes these contracts in qualifying hedging relationships as well as non-qualifying hedging relationships.

Foreign exchange swaps: The Company uses foreign exchange or currency swaps to reduce the risk of change in the value, yield or cash flows associated with certain foreign denominated invested assets. Foreign exchange swaps represent contracts that require the exchange of foreign currency cash flows against U.S. dollar cash flows at regular periods, typically quarterly or semi-annually. The Company utilizes these contracts in qualifying hedging relationships as well as non-qualifying hedging relationships.

Credit default swaps: Credit default swaps are used to reduce credit loss exposure with respect to certain assets that the Company owns or to assume credit exposure on certain assets that the Company does not own. Payments are made to, or received from, the counterparty at specified intervals. In the event of a default on the underlying credit exposure, the Company will either receive a payment (purchased credit protection) or will be required to make a payment (sold credit protection) equal to the par minus recovery value of the swap contract. The Company utilizes these contracts in non-qualifying hedging relationships.

Total return swaps: The Company uses total return swaps as a hedge against a decrease in variable annuity account values, which are invested in certain indices. Using total return swaps, the Company agrees with another party to exchange, at specified intervals, the difference between the economic risk and reward of assets or a market index and the LIBOR rate, calculated by reference to an agreed upon notional principal amount. No cash is exchanged at the onset of the contracts. Cash is paid and received over the life of the contract based upon the terms of the swaps. The Company utilizes these contracts in non-qualifying hedging relationships.

Currency forwards: The Company uses currency forward contracts to hedge policyholder liabilities associated with the variable annuity contracts which are linked to foreign indices. The currency fluctuations may result in a decrease in account values, which would increase the possibility of the Company incurring an expense for guaranteed benefits in excess of account values. The Company also utilizes currency forward contracts to hedge currency exposure related

to its invested assets. The Company utilizes these contracts in non-qualifying hedging relationships.

Forwards: The Company uses forward contracts to hedge certain invested assets against movement in interest rates, particularly mortgage rates. The Company uses To Be Announced mortgage-backed securities as an economic hedge against rate movements. The Company utilizes forward contracts in non-qualifying hedging relationships.

Futures: Futures contracts are used to hedge against a decrease in certain equity indices. Such decreases may result in a decrease in variable annuity account values which would increase the possibility of the Company incurring an expense for guaranteed benefits in excess of account values. The Company also uses futures contracts as a hedge against an increase in certain equity indices. Such increases may result in increased payments to the holders of the fixed index annuity ("FIA") contracts. The Company also uses interest rate futures contracts to hedge its exposure to market risks due to changes in interest rates. The Company enters into exchange traded futures with regulated futures commissions that are members of the exchange. The Company also posts initial and variation margins, with the exchange, on a daily basis. The Company utilizes exchange-traded futures in non-qualifying hedging relationships.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Swaptions: A swaption is an option to enter into a swap with a forward starting effective date. The Company uses swaptions to hedge the interest rate exposure associated with the minimum crediting rate and book value guarantees embedded in the retirement products that the Company offers. Increases in interest rates will generate losses on assets that are backing such liabilities. In certain instances, the Company locks in the economic impact of existing purchased swaptions by entering into offsetting written swaptions. Swaptions are also used to hedge against an increase in the interest rate benchmarked crediting strategies within FIA contracts. Such increases may result in increased payments to contract holders of FIA contracts and the interest rate swaptions offset this increased exposure. The Company pays a premium when it purchases the swaption. The Company utilizes these contracts in non-qualifying hedging relationships.

Options: The Company uses put options to manage the equity, interest rate and equity volatility risk of the economic liabilities associated with certain variable annuity minimum guaranteed benefits and/or to mitigate certain rebalancing costs resulting from increased volatility. The Company also uses call options to hedge against an increase in various equity indices. Such increases may result in increased payments to the holders of the FIA contracts. The Company pays an upfront premium to purchase these options. The Company utilizes these options in non-qualifying hedging relationships.

Variance swaps: The Company uses variance swaps to manage equity volatility risk on the economic liabilities associated with certain minimum guaranteed living benefits and/or to mitigate certain rebalancing costs resulting from increased volatility. An increase in the equity volatility results in higher valuations of such liabilities. In an equity variance swap, the Company agrees with another party to exchange amounts in the future, based on the changes in equity volatility over a defined period. The Company utilizes equity variance swaps in non-qualifying hedging relationships.

Managed custody guarantees ("MCGs"): The Company issues certain credited rate guarantees on variable fixed income portfolios that represent stand-alone derivatives. The market value is partially determined by, among other things, levels of or changes in interest rates, prepayment rates and credit ratings/spreads.

Embedded derivatives: The Company also invests in certain fixed maturity instruments and has issued certain annuity products that contain embedded derivatives whose market value is at least partially determined by, among other things, levels of or changes in domestic and/or foreign interest rates (short-term or long-term), exchange rates, prepayment rates, equity rates or credit ratings/spreads. In addition, the Company has entered into coinsurance with funds withheld arrangements, which contain embedded derivatives.

The Company's use of derivatives is limited mainly to economic hedging to reduce the Company's exposure to cash flow variability of assets and liabilities, interest rate risk, credit risk, exchange rate risk and market risk. It is the Company's policy not to offset amounts recognized for derivative instruments and amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement, which provides the Company with the legal right of offset.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The notional amounts and fair values of derivatives were as follows as of the dates indicated:

	September 30, 2015			December 31, 2014		
	Notional Amount	Asset Fair Value	Liability Fair Value	Notional Amount	Asset Fair Value	Liability Fair Value

⁽¹⁾ Open derivative contracts are reported as Derivatives assets or liabilities on the Condensed Consolidated Balance Sheets at fair value.

N/A - Not Applicable

The maximum length of time over which the Company is hedging its exposure to the variability in future cash flows for forecasted anticipatory hedge transactions is through the first quarter of 2017.

Based on the notional amounts, a substantial portion of the Company's derivative positions was not designated or did not qualify for hedge accounting as part of a hedging relationship as of September 30, 2015 and December 31, 2014. The Company utilizes derivative contracts mainly to hedge exposure to variability in cash flows, interest rate risk, credit risk, foreign exchange risk and equity market risk. The majority of derivatives used by the Company are designated as product hedges, which hedge the exposure arising from insurance liabilities or guarantees embedded in the contracts the Company offers through various product lines. These derivatives do not qualify for hedge accounting as they do not meet the criteria of being "highly effective" as outlined in ASC Topic 815, but do provide an economic hedge, which is in line with the Company's risk management objectives. The Company also uses derivatives contracts to hedge its exposure to various risks associated with the investment portfolio. The Company does not seek hedge accounting treatment for certain of these derivatives as they generally do not qualify for hedge accounting due to the criteria required under the portfolio hedging rules outlined in ASC Topic 815. The Company also uses credit default swaps coupled with other investments in order to produce the investment characteristics of otherwise permissible

investments that do not qualify as effective accounting hedges under ASC Topic 815.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Although the Company has not elected to net its derivative exposures, the notional amounts and fair values of Over-The-Counter ("OTC") and cleared derivatives excluding exchange traded contracts and forward contracts (To Be Announced mortgage-backed securities) are presented in the tables below as of the dates indicated:

	September 30, 2015		
	Notional Amount	Asset Fair Value	Liability Fair Value
Credit contracts	\$4,341.3	\$26.8	\$17.3
Equity contracts	16,865.6	388.8	104.1

⁽¹⁾ Represents the netting of receivable balances with payable balances, net of collateral, for the same counterparty under eligible netting agreements.

Collateral

Under the terms of the OTC Derivative International Swaps and Derivatives Association, Inc. ("ISDA") agreements, the Company may receive from, or deliver to, counterparties collateral to assure that terms of the ISDA agreements will be met with regard to the Credit Support Annex ("CSA"). The terms of the CSA call for the Company to pay interest on any cash received equal to the Federal Funds rate. To the extent cash collateral is received and delivered, it is included in Payables under securities loan agreements, including collateral held and Short-term investments under securities loan agreements, including collateral delivered, respectively, on the Condensed Consolidated Balance Sheets and is reinvested in short-term investments. Collateral held is used in accordance with the CSA to satisfy any obligations. Investment grade bonds owned by the Company are the source of noncash collateral posted, which is reported in Securities pledged on the Condensed Consolidated Balance Sheets. As of September 30, 2015, the Company held \$983.2 and \$181.1 of net cash collateral related to OTC derivative contracts and cleared derivative contracts, respectively. As of December 31, 2014, the Company held \$515.8 and \$119.1 of net cash collateral related

to OTC derivative contracts and cleared derivative contracts, respectively. In addition, as of September 30, 2015, the Company delivered \$662.5 of securities and held \$7.8 securities as collateral. As of December 31, 2014, the Company delivered \$638.7 of securities and held \$159.3 securities as collateral.

Voya Financial, Inc.

Total	\$436.7	\$319.6	\$428.9	\$(368.2

⁽¹⁾ Changes in value for effective fair value hedges are recorded in Other net realized capital gains (losses). Changes in fair value upon disposal for effective cash flow hedges are amortized through Net investment income and the ineffective portion is recorded in Other net realized capital gains (losses) in the Condensed Consolidated Statements of Operations. For the three and nine months ended September 30, 2015 and 2014, ineffective amounts were immaterial.

⁽²⁾ Changes in value are included in Other net realized capital gains (losses) in the Condensed Consolidated Statements of Operations.

⁽³⁾ Changes in value are included in Policyholder benefits in the Condensed Consolidated Statements of Operations.

Credit Default Swaps

The Company has entered into various credit default swaps. When credit default swaps are sold, the Company assumes credit exposure to certain assets that it does not own. Credit default swaps may also be purchased to reduce credit exposure in the Company's portfolio. Credit default swaps involve a transfer of credit risk from one party to another in exchange for periodic payments. As of September 30, 2015, the fair values of credit default swaps of \$26.8 and \$17.3 were included in Derivatives assets and Derivatives liabilities, respectively, on the Condensed Consolidated Balance Sheets. As of December 31, 2014, the fair values of credit default swaps of \$40.9 and \$36.0 were included in Derivatives assets and Derivatives liabilities, respectively, on the Condensed Consolidated Balance Sheets. As of September 30, 2015, the maximum potential future net exposure to the Company was \$1.8 billion, net of purchased protection of \$500.0 on credit default swaps. As of December 31, 2014, the maximum potential future net exposure to the Company was \$1.7 billion, net of purchased protection of \$500.0 on credit default swaps. These instruments are typically written for a maturity period of 5 years and contain no recourse provisions. If the Company's current debt

and claims paying ratings were downgraded in the future, the terms in the Company's derivative agreements may be triggered, which could negatively impact overall liquidity.

4. Fair Value Measurements (excluding Consolidated Investment Entities)

Fair Value Measurement

The Company categorizes its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique, pursuant to ASU 2011-04, "Fair Value Measurements (ASC Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP" ("ASU 2011-04"). The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3), as described in the Fair Value Measurements (excluding Consolidated Investment Entities) Note in the Consolidated Financial Statements in Part II, Item 8. of the Company's 2014 Annual Report on Form 10-K. If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

When available, the estimated fair value of financial instruments is based on quoted prices in active markets that are readily and regularly obtainable. When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, including discounted cash flow methodologies, matrix pricing or other similar techniques.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Valuation of Financial Assets and Liabilities at Fair Value

Certain assets and liabilities are measured at estimated fair value on the Company's Condensed Consolidated Balance Sheets. The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The exit price and the transaction (or entry) price will be the same at initial recognition in many circumstances. However, in certain cases, the transaction price may not represent fair value. The fair value of a liability is based on the amount that would be paid to transfer a liability to a third-party with an equal credit standing. Fair value is required to be a market-based measurement that is determined based on a hypothetical transaction at the measurement date, from a market participant's perspective. The Company considers three broad valuation techniques when a quoted price is unavailable: (i) the market approach, (ii) the income approach and (iii) the cost approach. The Company determines the most appropriate valuation technique to use, given the instrument being measured and the availability of sufficient inputs. The Company prioritizes the inputs to fair valuation techniques and allows for the use of unobservable inputs to the extent that observable inputs are not available.

The Company utilizes a number of valuation methodologies to determine the fair values of its financial assets and liabilities in conformity with the concepts of exit price and the fair value hierarchy as prescribed in ASC Topic 820. Valuations are obtained from third-party commercial pricing services, brokers and industry-standard, vendor-provided software that models the value based on market observable inputs. The valuations obtained from third-party commercial pricing services are non-binding. The Company reviews the assumptions and inputs used by third-party commercial pricing services for each reporting period in order to determine an appropriate fair value hierarchy level. The documentation and analysis obtained from third-party commercial pricing services are reviewed by the Company, including in-depth validation procedures confirming the observability of inputs. The valuations are reviewed and validated monthly through the internal valuation committee price variance review, comparisons to internal pricing models, back testing to recent trades or monitoring of trading volumes.

Fixed maturities: The fair values for actively traded marketable bonds are determined based upon the quoted market prices and are classified as Level 1 assets. Assets in this category primarily include certain U.S. Treasury securities.

For fixed maturities classified as Level 2 assets, fair values are determined using a matrix-based market approach, based on prices obtained from third-party commercial pricing services and the Company's matrix and analytics-based pricing models, which in each case incorporate a variety of market observable information as valuation inputs. The market observable inputs used for these fair value measurements, by fixed maturity asset class, are as follows:

U.S. Treasuries: Fair value is determined using third-party commercial pricing services, with the primary inputs being stripped interest and principal U.S. Treasury yield curves that represent a U.S. Treasury zero-coupon curve.

U.S. government agencies and authorities, State, municipalities and political subdivisions: Fair value is determined using third-party commercial pricing services, with the primary inputs being U.S. Treasury yield curves, trades of comparable securities, credit spreads off benchmark yields and issuer ratings.

U.S. corporate public securities, Foreign corporate public securities, and foreign governments: Fair value is determined using third-party commercial pricing services, with the primary inputs being benchmark yields, trades of

comparable securities, issuer ratings, bids and credit spreads off benchmark yields.

U.S. corporate private securities and Foreign corporate private securities: Fair values are determined using a matrix and analytics-based pricing model. The model incorporates the current level of risk-free interest rates, current corporate credit spreads, credit quality of the issuer and cash flow characteristics of the security. The model also considers a liquidity spread, the value of any collateral, the capital structure of the issuer, the presence of guarantees, and prices and quotes for comparably rated publicly traded securities.

RMBS, CMBS and ABS: Fair value is determined using third-party commercial pricing services, with the primary inputs being credit spreads off benchmark yields, prepayment speed assumptions, current and forecasted loss severity, debt service coverage ratios, collateral type, payment priority within tranche and the vintage of the loans underlying the security.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Transfers in and out of Level 1 and 2

There were no securities transferred between Level 1 and Level 2 for the three and nine months ended September 30, 2015 and 2014. The Company's policy is to recognize transfers in and transfers out as of the beginning of the reporting period.

Level 3 Financial Instruments

The fair values of certain assets and liabilities are determined using prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement (i.e., Level 3 as defined by ASC Topic 820), including but not limited to liquidity spreads for investments within markets deemed not currently active. These valuations, whether derived internally or obtained from a third-party, use critical assumptions that are not widely available to estimate market participant expectations in valuing the asset or liability. In addition, the Company has determined, for certain financial instruments, an active market is such a significant input to determine fair value that the presence of an inactive market may lead to classification in Level 3. In light of the methodologies employed to obtain the fair values of financial assets and liabilities classified as Level 3, additional information is presented below.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

For the three and nine months ended September 30, 2015 and 2014, the transfers in and out of Level 3 for fixed maturities and equity securities, as well as separate accounts, were due to the variation in inputs relied upon for valuation each quarter. Securities that are primarily valued using independent broker quotes when prices are not available from one of the commercial pricing services are reflected as transfers into Level 3. When securities are valued using more widely available information, the securities are transferred out of Level 3 and into Level 1 or 2, as appropriate.

Significant Unobservable Inputs

Quantitative information about the significant unobservable inputs used in the Company's Level 3 fair value measurements of its annuity product guarantees is presented in the following sections and table.

The Company's Level 3 fair value measurements of its fixed maturities, equity securities available-for-sale and equity and credit derivative contracts are primarily based on broker quotes for which the quantitative detail of the unobservable inputs is neither provided nor reasonably corroborated, thus negating the ability to perform a sensitivity analysis. The Company performs a review of broker quotes by performing a monthly price variance comparison and back tests broker quotes to recent trade prices.

Significant unobservable inputs used in the fair value measurements of GMABs, GMWBs and GMWBLs include long-term equity and interest rate implied volatility, correlations between the rate of return on policyholder funds and between interest rates and equity returns, nonperformance risk, mortality and policyholder behavior assumptions, such as benefit utilization, lapses and partial withdrawals. Such inputs are monitored quarterly.

Significant unobservable inputs used in the fair value measurements of FIAs include nonperformance risk and policyholder behavior assumptions, such as lapses and partial withdrawals. Such inputs are monitored quarterly.

The significant unobservable inputs used in the fair value measurement of the Stabilizer embedded derivatives and MCG derivative are interest rate implied volatility, nonperformance risk, lapses and policyholder deposits. Such inputs are monitored quarterly.

Following is a description of selected inputs:

Equity / Interest Rate Volatility: A term-structure model is used to approximate implied volatility for the equity indices and swap rates for GMAB, GMWB and GMWBL fair value measurements and swap rates for the Stabilizer and MCG fair value measurements. Where no implied volatility is readily available in the market, an alternative approach is applied based on historical volatility.

Correlations: Integrated interest rate and equity scenarios are used in GMAB, GMWB and GMWBL fair value measurements to better reflect market interest rates and interest rate volatility correlations between equity and fixed income fund groups and between equity fund groups and interest rates. The correlations are based on historical fund returns and swap rates from external sources.

Nonperformance Risk: For the estimate of the fair value of embedded derivatives associated with the Company's product guarantees, the Company uses a blend of observable, similarly rated peer company credit default swap

spreads, adjusted to reflect the credit quality of the individual insurance company subsidiary that issued the guarantee and the priority of policyholder claims.

Actuarial Assumptions: Management regularly reviews actuarial assumptions, which are based on the Company's experience and periodically reviewed against industry standards. Industry standards and Company experience may be limited on certain products.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table presents the unobservable inputs for Level 3 fair value measurements as of September 30, 2015:

Unobservable Input	Range ⁽¹⁾			
	GMWB/GMWBL	GMAB	FIA	Stabilizer/MCGs
Long-term equity implied volatility	15% to 25%	15% to 25%	—	—
Interest rate implied volatility	0.1% to 18%	0.1% to 18%	—	0.1% to 7.5%
Correlations between:				
Equity Funds	48% to 98%	48% to 98%	—	—
Equity and Fixed Income Funds	-38% to 62%	-38% to 62%	—	—
Interest Rates and Equity Funds	-32% to 14%	-32% to 14%	—	—
Nonperformance risk	0.21% to 1.4%	0.21% to 1.4%	0.21% to 1.4%	0.21% to 1.4%
Actuarial Assumptions:				
Benefit Utilization	85% to 100%	⁽²⁾ —	—	—
Partial Withdrawals	0% to 10%	0% to 10%	0% to 10%	—
Lapses	0.08% to 22%	⁽³⁾⁽⁴⁾ 0.08% to 25%	⁽³⁾⁽⁴⁾ 0% to 60%	⁽³⁾ 0% to 50%
Policyholder Deposits ⁽⁶⁾	—	—	—	0% to 65%
Mortality	—	⁽⁷⁾ —	⁽⁷⁾ —	⁽⁷⁾ —

⁽¹⁾ Represents the range of reasonable assumptions that management has used in its fair value calculations.

⁽²⁾ Those policyholders who have elected systematic withdrawals are assumed to continue taking withdrawals. As a percent of account value, 35% are taking systematic withdrawals. Of those policyholders who are not taking withdrawals, the Company assumes that 85% will begin systematic withdrawals after a delay period. The utilization function varies by policyholder age and policy duration. Interactions with lapse and mortality also affect utilization. The utilization rate for GMWB and GMWBL tends to be lower for younger contract owners and contracts that have not reached their maximum accumulated GMWB and GMWBL benefit amount. There is also a lower utilization rate, though indirectly, for contracts that are less "in the money" (i.e., where the notional benefit amount is in excess of the account value) due to higher lapses. Conversely, the utilization rate tends to be higher for contract owners near or beyond retirement age and contracts that have accumulated their maximum GMWB or GMWBL benefit amount. There is also a higher utilization rate, though indirectly, for contracts which are highly "in the money." The chart below provides the GMWBL account value by current age group and average expected delay times from the associated attained age group as of September 30, 2015 (account value amounts are in \$ billions).

Account Values

Attained Age Group	In the Money	Out of the Money	Total	Average Expected Delay (Years)**
< 60	\$2.4	\$—	* \$2.4	9.1
60-69	6.2	—	* 6.2	4.4
70+	5.4	—	* 5.4	2.6
	\$14.0	\$—	* \$14.0	5.1

* Less than \$0.1.

** For population expected to withdraw in future. Excludes policies taking systematic withdraws and 15% of policies the Company assumes will never withdraw.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

(3) Lapse rates tend to be lower during the contractual surrender charge period and higher after the surrender charge period ends; the highest lapse rates occur in the year immediately after the end of the surrender charge period.

(4) The Company makes dynamic adjustments to lower the lapse rates for contracts that are more "in the money." The table below shows an analysis of policy account values according to whether they are in or out of the surrender charge period and to whether they are "in the money" or "out of the money" as of September 30, 2015 (account value amounts are in \$ billions).

	Moneyiness	GMAB Account Value	Lapse Range	GMWB/GMWBL Account Value	Lapse Range
During Surrender Charge Period					
	In the Money**	\$—	* 0.08% to 7.2%	\$5.8	0.08% to 5.6%
	Out of the Money	—	* 0.41% to 7.9%	—	* 0.36% to 5.9%
After Surrender Charge Period					
	In the Money**	\$—	* 2.5% to 22.5%	\$8.2	1.4% to 20.7%
	Out of the Money	—	* 11.9% to 24.8%	0.6	5.0% to 21.7%

* Less than \$0.1.

** The low end of the range corresponds to policies that are highly "in the money." The high end of the range corresponds to the policies that are close to zero in terms of "in the moneyiness."

(5) Stabilizer contracts with recordkeeping agreements have a different range of lapse and policyholder deposit assumptions from Stabilizer (Investment only) and MCG contracts as shown below:

	Percentage of Plans	Overall Range of Lapse Rates	Range of Lapse Rates for 85% of Plans	Overall Range of Policyholder Deposits	Range of Policyholder Deposits for 85% of Plans
Stabilizer (Investment Only) and MCG Contracts	90	% 0-25%	0-15%	0-30%	0-15%
Stabilizer with Recordkeeping Agreements	10	% 0-50%	0-25%	0-65%	0-25%
Aggregate of all plans	100	% 0-50%	0-25%	0-65%	0-25%

(6) Measured as a percentage of assets under management or assets under administration.

(7) The mortality rate is based on the 2012 Individual Annuity Mortality Basic table with mortality improvements.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table presents the unobservable inputs for Level 3 fair value measurements as of December 31, 2014:

Unobservable Input	Range ⁽¹⁾			
	GMWB/GMWBL	GMAB	FIA	Stabilizer/MCGs
Long-term equity implied volatility	15% to 25%	15% to 25%	—	—
Interest rate implied volatility	0.2% to 16%	0.2% to 16%	—	0.2% to 7.6%
Correlations between:				
Equity Funds	49% to 98%	49% to 98%	—	—
Equity and Fixed Income Funds	-38% to 62%	-38% to 62%	—	—
Interest Rates and Equity Funds	-32% to -4%	-32% to -4%	—	—
Nonperformance risk	0.13% to 1.1%	0.13% to 1.1%	0.13% to 1.1%	0.13% to 1.1%
Actuarial Assumptions:				
Benefit Utilization	85% to 100%	(2) —	—	—
Partial Withdrawals	0% to 10%	0% to 10%	0% to 5%	—
Lapses	0.08% to 24%	(3)(4) 0.08% to 31%	(3)(4) 0% to 60%	(3) 0% to 50% (5)
Policyholder Deposits ⁽⁶⁾	—	—	—	0% to 65% (5)
Mortality	—	(7) —	(7) —	(8) —

(1) Represents the range of reasonable assumptions that management has used in its fair value calculations.

Those policyholders who have elected systematic withdrawals are assumed to continue taking withdrawals. As a percent of account value, 33% are taking systematic withdrawals. Of those policyholders who are not taking withdrawals, the Company assumes that 85% will begin systematic withdrawals after a delay period. The utilization function varies by policyholder age and policy duration. Interactions with lapse and mortality also affect utilization. The utilization rate for GMWB and GMWBL tends to be lower for younger contract owners and contracts that have not reached their maximum accumulated GMWB and GMWBL benefit amount. There is also a

(2) lower utilization rate, though indirectly, for contracts that are less "in the money" (i.e., where the notional benefit amount is in excess of the account value) due to higher lapses. Conversely, the utilization rate tends to be higher for contract owners near or beyond retirement age and contracts that have accumulated their maximum GMWB or GMWBL benefit amount. There is also a higher utilization rate, though indirectly, for contracts which are highly "in the money." The chart below provides the GMWBL account value by current age group and average expected delay times from the associated attained age group as of December 31, 2014 (account value amounts are in \$ billions).

Attained Age Group	Account Values			Average Expected Delay (Years)*
	In the Money	Out of the Money	Total	
< 60	\$2.4	\$0.5	\$2.9	9.5
60-69	6.2	1.0	7.2	4.9
70+	5.2	0.5	5.7	3.1
	\$13.8	\$2.0	\$15.8	5.8

* For population expected to withdraw in future. Excludes policies taking systematic withdraws and 15% of policies the Company assumes will never withdraw.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

(3) Lapse rates tend to be lower during the contractual surrender charge period and higher after the surrender charge period ends; the highest lapse rates occur in the year immediately after the end of the surrender charge period.

(4) The Company makes dynamic adjustments to lower the lapse rates for contracts that are more "in the money." The table below shows an analysis of policy account values according to whether they are in or out of the surrender charge period and to whether they are "in the money" or "out of the money" as of December 31, 2014 (account value amounts are in \$ billions).

	Moneyiness	GMAB Account Value	Lapse Range	GMWB/GMWBL Account Value	Lapse Range
During Surrender Charge Period					
	In the Money**	\$—	* 0.08% to 8.2%	\$6.7	0.08% to 6.3%
	Out of the Money	—	* 0.41% to 12%	1.2	0.36% to 7%
After Surrender Charge Period					
	In the Money**	\$—	* 2.5% to 21% 12.3% to	\$7.2	1.7% to 21%
	Out of the Money	0.1	31%	1.4	5.6% to 24%

* Less than \$0.1.

** The low end of the range corresponds to policies that are highly "in the money." The high end of the range corresponds to the policies that are close to zero in terms of "in the moneyiness."

(5) Stabilizer contracts with recordkeeping agreements have a different range of lapse and policyholder deposit assumptions from Stabilizer (Investment only) and MCG contracts as shown below:

	Percentage of Plans	Overall Range of Lapse Rates	Range of Lapse Rates for 85% of Plans	Overall Range of Policyholder Deposits	Range of Policyholder Deposits for 85% of Plans
Stabilizer (Investment Only) and MCG Contracts	87	% 0-30%	0-15%	0-45%	0-15%
Stabilizer with Recordkeeping Agreements	13	% 0-50%	0-25%	0-65%	0-25%
Aggregate of all plans	100	% 0-50%	0-25%	0-65%	0-25%

(6) Measured as a percentage of assets under management or assets under administration.

(7) The mortality rate is based on the Annuity 2000 Basic table with mortality improvements.

(8) The mortality rate is based on the 2012 Individual Annuity Mortality Basic table with mortality improvements.

Generally, the following will cause an increase (decrease) in the GMAB, GMWB and GMWBL embedded derivative fair value liabilities:

- ▲ An increase (decrease) in long-term equity implied volatility
- ▲ An increase (decrease) in interest rate implied volatility
- ▲ An increase (decrease) in equity-interest rate correlations
- ▲ A decrease (increase) in nonperformance risk
- ▲ A decrease (increase) in mortality

- ▲ An increase (decrease) in benefit utilization
- ▲ A decrease (increase) in lapses

Changes in fund correlations may increase or decrease the fair value depending on the direction of the movement and the mix of funds. Changes in partial withdrawals may increase or decrease the fair value depending on the timing and magnitude of withdrawals.

Generally, the following will cause an increase (decrease) in the FIA embedded derivative fair value liability:

- ▲ A decrease (increase) in nonperformance risk
- ▲ A decrease (increase) in lapses

Generally, the following will cause an increase (decrease) in the derivative and embedded derivative fair value liabilities related to Stabilizer and MCG contracts:

- ▲ An increase (decrease) in interest rate implied volatility

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

• A decrease (increase) in nonperformance risk

• A decrease (increase) in lapses

- A decrease (increase) in policyholder deposits

The Company notes the following interrelationships:

Higher long-term equity implied volatility is often correlated with lower equity returns, which will result in higher in-the-moneyness, which in turn, results in lower lapses due to the dynamic lapse component reducing the lapses. This increases the projected number of policies that are available to use the GMWBL benefit and may also increase the fair value of the GMWBL.

• Generally, an increase (decrease) in benefit utilization will decrease (increase) lapses for GMWB and GMWBL.

• Generally, an increase (decrease) in interest rate volatility will increase (decrease) lapses of Stabilizer and MCG contracts due to dynamic participant behavior.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

⁽¹⁾ Certain amounts included in Funding agreements without fixed maturities and deferred annuities are also reflected within the Annuity product guarantees section of the table above.

The following disclosures are made in accordance with the requirements of ASC Topic 825 which requires disclosure of fair value information about financial instruments, whether or not recognized at fair value on the Condensed Consolidated Balance Sheets, for which it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates, in many cases, could not be realized in immediate settlement of the instrument.

ASC Topic 825 excludes certain financial instruments, including insurance contracts and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following valuation methods and assumptions were used by the Company in estimating the fair value of the following financial instruments, which are not carried at fair value on the Condensed Consolidated Balance Sheets:

Mortgage loans on real estate: The fair values for mortgage loans on real estate are estimated on a monthly basis using discounted cash flow analyses and rates currently being offered in the marketplace for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. Mortgage loans on real estate are classified as Level 3.

Policy loans: The fair value of policy loans approximates the carrying value of the loans. Policy loans are collateralized by the cash surrender value of the associated insurance contracts and are classified as Level 2.

Other investments: Primarily Federal Home Loan Bank ("FHLB") stock, which is carried at cost and periodically evaluated for impairment based on ultimate recovery of par value and is classified as Level 1.

Investment contract liabilities:

Funding agreements without fixed maturities and deferred annuities: Fair value is estimated as the mean present value of stochastically modeled cash flows associated with the contract liabilities taking into account assumptions about contract holder behavior. The stochastic valuation scenario set is consistent with current market parameters and discount is taken using stochastically evolving risk-free rates in the scenarios plus an adjustment for nonperformance risk. Margins for non-financial risks associated with the contract liabilities are also included. These liabilities are classified as Level 3.

Funding agreements with fixed maturities and guaranteed investment contracts: Fair value is estimated by discounting cash flows, including associated expenses for maintaining the contracts, at rates, that are risk-free rates plus an adjustment for nonperformance risk. These liabilities are classified as Level 2.

Supplementary contracts and immediate annuities: Fair value is estimated as the mean present value of the single deterministically modeled cash flows associated with the contract liabilities discounted using stochastically evolving short risk-free rates in the scenarios plus an adjustment for nonperformance risk. The valuation is consistent with current market parameters. Margins for non-financial risks associated with the contract liabilities are also included. These liabilities are classified as Level 3.

Long-term debt: Estimated fair value of the Company's long-term debt is based upon discounted future cash flows using a discount rate approximating the current market rate, incorporating nonperformance risk. Long-term debt is classified as Level 2.

Fair value estimates are made at a specific point in time, based on available market information and judgments about various financial instruments, such as estimates of timing and amounts of future cash flows. Such estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument, nor do they consider the tax impact of the realization of unrealized capital gains (losses). In many cases, the fair value estimates cannot be substantiated by comparison to independent markets, nor can the disclosed value be realized in immediate settlement of the instruments. In evaluating the Company's

management of interest rate, price and liquidity risks, the fair values of all assets and liabilities should be taken into consideration, not only those presented above.

Voya Financial, Inc.

⁽¹⁾ Interest accrued at the following rates for DAC: 1.3% to 7.5% during 2015 and 0.6% to 7.4% during 2014. Interest accrued at the following rates for VOBA: 3.5% to 7.5% during 2015 and 3.1% to 7.5% during 2014.

6. Share-based Incentive Compensation Plans

ING U.S., Inc. 2013 Omnibus Employee Incentive Plan and Voya Financial, Inc. 2014 Omnibus Employee Incentive Plan

The Company has provided equity-based compensation awards to its employees under the ING U.S., Inc. 2013 Omnibus Employee Incentive Plan (the "2013 Omnibus Plan") and the Voya Financial, Inc. 2014 Omnibus Employee Incentive Plan (the "2014 Omnibus Plan"). At inception of the 2013 Omnibus Plan, a total of 7,650,000 shares of Company common stock were reserved and available for issuance under the plan. As of September 30, 2015, common stock reserved and available for issuance under the 2013 Omnibus Plan was 244,641 shares.

The 2014 Omnibus Plan was adopted by the Company's Board of Directors and approved by shareholders in 2014, and has substantially the same terms as the 2013 Omnibus Plan, except for certain changes intended to allow certain performance-based compensation awards to comply with the criteria for tax deductibility set forth in Section 162(m) of the Internal Revenue Code. The 2014 Omnibus Plan provides for 17,800,000 shares of common stock to be

available for issuance as equity-based compensation awards. As of September 30, 2015, common stock reserved and available for issuance under the 2014 Omnibus Plan was 15,746,304 shares.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The 2013 Omnibus Plan and the 2014 Omnibus Plan (together, the "Omnibus Plans") each permit the granting of a wide range of equity-based awards, including restricted stock units ("RSUs"), which represent the right to receive a number of shares of Company common stock upon vesting; restricted stock, which are shares of Company stock that are issued subject to sale and transfer restrictions until the vesting conditions are met; performance share units ("PSUs"), which are RSUs subject to certain performance-based vesting conditions, and under which the number of shares of common stock delivered upon vesting varies with the level of achievement of performance criteria; and stock options. Grants of equity-based awards under the Omnibus Plans are made by the Compensation and Benefits Committee (the "Committee") of the Board of Directors of the Company, and are subject to such terms and conditions as the Committee may determine, including in respect of vesting and forfeiture, subject to certain limitations provided in the Omnibus Plans. Equity-based awards under the Omnibus Plans may carry dividend equivalent rights, pursuant to which notional dividends accumulate on unvested equity awards and are paid, in cash, upon vesting. Awards made under the Omnibus Plans, to date, have included dividend equivalent rights. Dividend equivalents are credited to the recipient and are paid only to the extent the applicable performance criteria and service conditions are met.

During the nine months ended September 30, 2015, grants of equity awards to the Company's employees consisted solely of RSUs and PSUs awarded under the 2014 Omnibus Plan. PSUs awarded during the nine months ended September 30, 2015 entitle recipients to receive, upon vesting, a number of shares of common stock that ranges from 0% to 150% of the number of PSUs awarded, depending on the level of achievement of the specified performance conditions. The establishment and the achievement of performance objectives are determined and approved by the Committee. Except under certain termination conditions, RSUs and PSUs vest no earlier than one year from the date of the award and no later than three years from the date of the award. In the case of retirement (as defined in the award agreement), awards vest depending on the employee's age and years of service subject to the satisfaction of any applicable performance criteria.

If an award under the Omnibus Plans is forfeited, expired, terminated or otherwise lapses, the shares of Company common stock underlying that award will again become available for issuance. Shares withheld by the Company to pay employee taxes, or which are withheld by or tendered to the Company to pay the exercise price of stock options (or are repurchased from an option holder by the Company with proceeds from the exercise of stock options) are not available for reissuance.

As of September 30, 2015, there were no stock options issued or outstanding under the Omnibus Plans.

Deal Incentive Awards: Upon closing of the IPO, RSUs were granted to employees of the Company under the 2013 Omnibus Plan in connection with Deal Incentive Awards. Deal Incentive Awards are conditional agreements to grant equity awards to certain employees of the Company, upon the closing of the IPO or upon the satisfaction of certain other conditions. RSUs granted in connection with Deal Incentive Awards are subject to certain vesting conditions, lockup period and other holding requirements.

Due to the completion of the March 2015 Offering, the remaining 70,880 RSUs vested and were issued during the nine months ended September 30, 2015.

Voya Financial, Inc. 2013 Omnibus Non-Employee Director Incentive Plan

The Company offers equity-based awards to Voya Financial, Inc. non-employee directors under the Voya Financial, Inc. 2013 Omnibus Non-Employee Director Incentive Plan ("2013 Director Plan"), which the Company adopted in connection with the IPO. A total of 288,000 shares of Company common stock may be issued under the 2013 Director Plan. The material terms of the 2013 Director Plan are substantially consistent with the material terms of the Omnibus Plans described above.

Non-Employee Director Service Grants: In March of 2015, the Company granted 16,008 RSUs to the non-employee directors then serving on the Board. These awards vest one-third on each of the first, second and third anniversary of the grant date, in each case provided that the grantee remains a director of the Company on the relevant vesting date, and provided that no shares will be delivered in connection with the RSUs until such time as the director's service on the Board is terminated. During the nine months ended September 30, 2015, the Company granted an additional 3,905 RSUs to non-employee directors upon their initial election to the Board.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Voya Financial, Inc. 2014 Employee Phantom Stock Plan

During 2014, the Company provided certain of its non-executive employees with cash-settled awards under the Voya Financial, Inc. 2014 Employee Phantom Stock Plan (the "Phantom Plan"). Awards made under the Phantom Plan were designed to provide grantees with an economic benefit that is equivalent to an analogous grant under the Omnibus Plans; however the Company must deliver cash, and may not deliver equity, upon vesting of such awards. Awards were granted in the form of phantom RSUs and phantom PSUs, each of which was designed to mirror the value of an equity-settled RSU or PSU awarded under the Omnibus Plans, with the cash settlement value determined based on the closing price of a share of Company common stock on the New York Stock Exchange on the trading day immediately preceding the date such award vests. As of September 30, 2015, the Company had 107,751 phantom RSUs and 58,205 phantom PSUs, respectively, outstanding to its employees.

ING Group Equity-Based Plans

Prior to the IPO, employees of the Company received equity-based compensation in the form of ING Group equity awards, pursuant to equity compensation plans adopted by ING Group. These plans included:

Long-term Sustainable Performance Plan: In 2012 and 2013 employees of the Company received ING Group-based equity awards under the Long-Term Sustainable Performance Plan ("LSPP") of ING Group. LSPP awards made to Company employees are settled by delivery of ING Group American Depository Receipts ("ADRs").

LSPP awards to employees of the Company provided in 2013 were, upon the closing of the IPO, converted into Company-based equity awards under the 2013 Omnibus Plan. Outstanding awards made in 2012 were not converted. The PSUs were considered granted upon the establishment and communication of the performance measures for the applicable performance period by the Committee, which is generally carried out during the first quarter of each year, although awards in respect of the 2013 performance year were not granted until the second quarter of that year.

LSPP awards provided to the Company's employees in 2012 were not converted and have continued to vest according to the terms of their original grant, with substantially all such awards having vested during or prior to the first quarter of 2015.

Equity Compensation Plan: In 2012 and 2013, certain employees of the Company (principally those employed within the Investment Management segment) received equity-based awards under the ING America Insurance Holdings, Inc. Equity Compensation Plan (the "Equity Compensation Plan"). Awards made under the Equity Compensation Plan are settled in the form of ING Group ADRs.

Equity Compensation Plan awards to employees of the Company provided in 2013 were, upon the closing of the IPO, converted into Company-based equity awards under the 2013 Omnibus Plan. These awards are subject to a three-year vesting period provided that the participant is still employed by the Company on the relevant vesting date.

Compensation Cost

The Company measures the cost of the share-based awards at their grant date fair value, based upon the market value of the stock, and recognizes that cost over the vesting period. Differences in actual versus expected experience or

changes in expected forfeitures are recognized in the period of change. Compensation expense is principally related to the granting of PSUs and RSUs and is recognized in Operating expenses in the Condensed Consolidated Statements of Operations.

The liability related to the awards made under the Phantom Plan is recorded within Other liabilities. Unlike equity-settled awards, which have a fixed grant-date fair value, the fair value of unvested cash-settled awards is remeasured at the end of each reporting period until the awards vest.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

As a result of the reduction of ING Group's ownership in Voya Financial, Inc. to approximately 43% on March 25, 2014, those ING Group equity awards that were not converted to equity awards of Voya Financial, Inc. are no longer deemed to be granted to employees of ING Group. Therefore, beginning on March 25, 2014, the compensation cost is remeasured at each reporting date until the awards vest. The remeasured cost is recognized prospectively on a pro-rata basis equal to the proportion of service provided by the award recipients as nonemployees to the total requisite service period of the award. The corresponding amount for the 2012 ING Group LSPP awards, which are settled through the issuance of new ING Group equity securities, is recorded as a capital contribution. The corresponding amount for the 2012 Equity Compensation Plan awards, which are settled through the delivery of ING Group ADRs acquired by the Company in the secondary market, is recorded as a liability. The impact of the remeasurement of the compensation cost of these awards for the three and nine months ended September 30, 2015 and 2014 was immaterial.

The following table summarizes share-based compensation expense, which includes expenses related to awards granted under the Omnibus Plans, Director Plan, Phantom Plan and ING Group share-based compensation plans for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
RSUs ⁽¹⁾	\$13.8	\$12.3	\$40.5	\$31.8
RSUs - Deal incentive awards	—	1.3	2.1	6.9
PSU awards ⁽²⁾	8.2	14.1	34.2	45.4
Phantom Plan	0.2	1.4	3.5	2.9
Share-based compensation expense	\$22.2	\$29.1	\$80.3	\$87.0
Income tax benefit ⁽³⁾	7.8	—	28.1	—
After-tax share-based compensation expense	\$14.4	\$29.1	\$52.2	\$87.0

⁽¹⁾ This table includes immaterial compensation expense for the three months ended September 30, 2015 and \$0.8 for the nine months ended September 30, 2015, related to ING Group RSU awards. In addition, this table includes compensation expense of \$1.8 and \$5.5 for the three and nine months ended September 30, 2014, respectively, related to ING Group RSU awards.

⁽²⁾ This table includes immaterial compensation expense for the three months ended September 30, 2015 and \$7.9 for the nine months ended September 30, 2015, related to ING Group PSU awards. In addition, this table includes compensation expense of \$6.1 and \$22.8 for the three and nine months ended September 30, 2014, respectively, related to ING Group PSU awards.

⁽³⁾ The Company recognized no income tax benefit due to valuation allowances for the three and nine months ended September 30, 2014. See the Income Taxes Note to these Condensed Consolidated Financial Statements for additional information.

Awards Outstanding

The following table summarizes the number of awards under the Omnibus Plans for the period indicated:

(awards in millions)	RSUs		RSUs-Deal Incentive Awards		PSU Awards

(Dollar amounts in millions, unless otherwise stated)

7. Shareholders' Equity and Earnings per Common Share

Common Shares

The following table presents the rollforward of common shares used in calculating the weighted average shares utilized in the basic earnings per common share calculation for the periods indicated:

(shares in millions)	Common Shares 2015			Common Shares 2014		
	Issued	Held in Treasury	Outstanding	Issued	Held in Treasury	Outstanding
Common shares, balance as of January 1	263.7	21.8	241.9	261.8	0.1	261.7
Common shares issued	—	—	—	—	—	—
Common shares acquired - share repurchase	—	28.1	(28.1)	—	16.6	(16.6)
Share-based compensation	1.6	0.1	1.5	1.7	0.4	1.3
Common shares, balance as of September 30	265.3	50.0	215.3	263.5	17.1	246.4

Share Repurchase Program

On February 5, 2015, the Company's Board of Directors increased the Company's authority to repurchase its shares by \$750.0, with such authorization to expire (unless subsequently extended) no later than December 31, 2015. On March 9, 2015, the Company repurchased 13,599,274 shares of its common stock from ING Group for an aggregate purchase price of \$600.0.

On May 28, 2015, the Company's Board of Directors further increased the Company's authorization to repurchase its shares by an additional \$750.0, with such authorization to expire (unless subsequently extended) no later than June 30, 2016. The authorization may be terminated, increased or decreased by the Company's Board of Directors at any time.

In addition to the 13,599,274 shares purchased from ING Group, during the nine months ended September 30, 2015, the Company repurchased 11,236,648 shares of its common stock in open market repurchases for an aggregate purchase price of \$490.5 and 3,253,831 shares of its common shares under a discounted share repurchase arrangement with a third-party financial institution for an aggregate purchase price of \$150.0.

On September 23, 2015, the Company entered into an additional share repurchase arrangement with a third-party financial institution. In exchange for an up-front payment of \$100.0, the financial institution will deliver shares of the Company's common stock to the Company upon final settlement of the agreement, which will be during the fourth quarter. The total number of shares ultimately delivered, and therefore the average repurchase price paid per share, will be determined at the end of the applicable purchase period under the arrangement based on a formula incorporating the volume weighted average price of the Company's common stock during that period. The \$100.0 was recorded as a decrease to Additional paid-in capital and will be reclassified to Treasury stock upon settlement of the arrangement.

Including the effect of the share repurchase arrangement that will be completed during the fourth quarter, these repurchases reduced the remaining amount of the Company's share repurchase authorization to \$170.4 as of September 30, 2015.

Net Withholding of Shares

In connection with the vesting of equity-based compensation awards, employees may remit to the Company, or the Company may withhold into treasury stock, shares of common stock in respect of tax withholding obligations associated with such vesting. For the nine months ended September 30, 2015, the Company increased its treasury stock by 104,297 shares in connection with such withholding activities.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Warrants

On May 7, 2013, the Company issued to ING Group warrants to purchase up to 26,050,846 shares of the Company's common stock equal in the aggregate to 9.99% of the issued and outstanding shares of common stock at that date. The current exercise price of the warrants is \$48.75 per share of common stock, subject to adjustments, including for stock dividends, cash dividends in excess of \$0.01 per share a quarter, subdivisions, combinations, reclassifications and non-cash distributions. The warrants also provide for, upon the occurrence of certain change of control events affecting the Company, an increase in the number of shares to which a warrant holder will be entitled upon payment of the aggregate exercise price of the warrant. The warrants became exercisable (subject to the limitation stated below with respect to ING Group and its affiliates) starting on the first anniversary of the completion of the IPO (May 7, 2014) and expire on the tenth anniversary of the completion of the IPO (May 7, 2023). The warrants are net share settled, which means that no cash will be payable by a warrant holder in respect of the exercise price of a warrant upon exercise, and are classified as permanent equity. They have been recorded at their fair value determined on the issuance date of May 7, 2013 in the amount of \$94.0 as an addition and reduction to Additional paid-in capital. Warrant holders are not entitled to receive dividends.

The warrants are not exercisable by ING Group or any of its affiliates before January 1, 2017, but are exercisable in accordance with their terms before January 1, 2017 by holders other than ING Group or its affiliates, if any.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table presents a reconciliation of Net income (loss) and shares used in calculating basic and diluted net income (loss) per common share for the periods indicated:

(in millions, except for per share data)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Earnings				
Net income (loss) available to common shareholders:				
Net income (loss)	\$ 116.2	\$ 522.4	\$ 699.0	\$ 1,212.9
Less: Net income (loss) attributable to noncontrolling interest	75.9	116.6	183.9	296.7
Net income (loss) available to common shareholders	\$ 40.3	\$ 405.8	\$ 515.1	\$ 916.2
Weighted average common shares outstanding				
Basic	221.8	252.6	229.4	256.0
Dilutive Effects: ⁽¹⁾				
RSUs	1.8	1.5	1.7	1.2
RSUs - Deal incentive awards	—	* —	* —	* 0.5
PSU awards	—	0.3	0.2	0.4
Diluted	223.6	254.4	231.3	258.1
Net income (loss) available to common shareholders per common share				
Basic	\$ 0.18	\$ 1.61	\$ 2.25	\$ 3.58
Diluted	0.18	1.59	2.23	3.55

* Less than 0.1.

⁽¹⁾ For the three and nine months ended September 30, 2015 and 2014, weighted average shares used for calculating basic and diluted earnings per share excludes the dilutive impact of warrants, as the inclusion of this equity instrument would be antidilutive to the earnings per share calculation due to "out of the moneyness" in the periods presented.

Dividends to Common Shareholders

The declaration and payment of common share dividends by the Company is subject to the discretion of its Board of Directors and will depend on the Company's overall financial condition, results of operations, capital levels, cash requirements, future prospects, receipt of dividends from Voya Financial, Inc.'s insurance subsidiaries, risk management considerations and other factors deemed relevant by the Board. There are no significant restrictions, other than those generally applicable to corporations incorporated in Delaware and those described in the Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources - Debt Securities - Junior Subordinated Notes to these Condensed Consolidated Financial Statements, on the payment of dividends by the Company.

On July 30, 2015, Voya Financial, Inc.'s Board of Directors declared a quarterly cash dividend of \$0.01 per share of outstanding common stock. The dividend was paid on September 30, 2015 to shareholders of record of Voya

Financial, Inc. as of August 31, 2015.

On October 29, 2015, Voya Financial, Inc.'s Board of Directors declared a quarterly cash dividend of \$0.01 per share of outstanding common stock. The dividend is to be paid on December 30, 2015 to shareholders of record of Voya Financial, Inc. as of November 27, 2015.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

8. Insurance Subsidiaries

Restrictions on Dividends and Returns of Capital from Subsidiaries

The Company's business is conducted through operating subsidiaries. U.S. insurance laws and regulations regulate the payment of dividends and other distributions by its U.S. insurance subsidiaries to their respective parents. These restrictions are based in part on the prior year's statutory income and surplus. In general, dividends up to specified levels are considered ordinary and may be paid without prior approval. Dividends in larger amounts, or "extraordinary" dividends, are subject to approval by the insurance commissioner of the state of domicile of the insurance subsidiary proposing to pay the dividend. In addition, under the insurance laws applicable to the Company's insurance subsidiaries domiciled in Connecticut, Iowa and Minnesota (these insurance subsidiaries, together with the Company's insurance subsidiary domiciled in Colorado are referred to collectively, as the Company's "principal insurance subsidiaries"), no dividend or other distribution exceeding an amount equal to an insurance company's earned surplus may be paid without the domiciliary insurance regulator's prior approval.

Security Life of Denver International ("SLDI"), the Company's Arizona captive, may not declare or pay dividends other than in accordance with its annual capital and dividend plan as approved by the Arizona Department of Insurance, which includes a minimum capital requirement.

The Company may receive dividends from or contribute capital to its wholly owned non-life insurance subsidiaries such as broker-dealers, investment management entities and intermediate holding companies.

Insurance Subsidiaries - Dividends, Returns of Capital, and Capital Contributions

The following table summarizes dividends and extraordinary distributions by each of the Company's Principal Insurance Subsidiaries to its parent for the periods indicated:

Subsidiary Name (State of domicile):	Dividends Paid		Extraordinary Distributions Paid	
	Nine Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Voya Insurance and Annuity Company ("VIAC") (IA)	\$394.0	\$216.0	\$98.0	\$—
Voya Retirement Insurance and Annuity Company ("VRIAC") (CT)	231.0	281.0	—	—
Security Life of Denver Insurance Company ("SLD") (CO)	111.0	32.0	130.0	—
ReliaStar Life Insurance Company ("RLI") (MN)	194.0	193.0	280.0	—

Additionally, VRIAC is permitted to pay an ordinary dividend of \$90.0 after December 22, 2015.

Tax credits	—		(0.2))
Nondeductible expenses	0.8		0.5	
Other	(1.3))	0.5	
Income tax expense (benefit)	(44.7))%	6.7	%

	Nine Months Ended September 30,			
	2015		2014	
Income tax expense (benefit) at federal statutory rate	35.0	%	35.0	%
Tax effect of:				
Valuation allowance	(1.6))	(16.5))
Dividend received deduction	(11.9))	(5.7))
Audit settlement	—		(0.1))
State tax expense (benefit)	1.7		0.7	
Noncontrolling interest	(7.8))	(8.1))
Tax credits	—		(0.1))
Nondeductible expenses	0.2		0.3	
Other	—		0.3	
Income tax expense (benefit)	15.6	%	5.8	%

The Company uses the estimated annual effective tax rate method in computing its interim tax provision. Certain items, including changes in the realizability of deferred tax assets and changes in liabilities for uncertain tax positions, are excluded from the estimated annual effective tax rate and the actual tax expense or benefit is reported in the period that the related item is incurred.

Valuation allowances are provided when it is considered unlikely that deferred tax assets will be realized. As of September 30, 2015 and December 31, 2014, the Company had a total valuation allowance of approximately \$1.0 billion. As of September 30, 2015 and December 31, 2014, \$1.3 billion of this valuation allowance was allocated to continuing operations and \$(354.1) was allocated to Other comprehensive income (loss) related to realized and unrealized capital losses.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

For the three months ended September 30, 2015 and 2014, the total increases (decreases) in the valuation allowance were \$1.1 and \$(98.5), respectively, and were allocated to continuing operations. For the nine months ended September 30, 2015 and 2014, the total decreases in the valuation allowance were \$(8.9) and \$(212.5), respectively. With respect to the 2015 decrease, \$(13.4) was allocated to continuing operations and \$4.5 was allocated to Additional paid-in capital. With respect to the 2014 decrease, \$(212.5) was allocated to continuing operations.

Tax Regulatory Matters

During April 2015, the Internal Revenue Service ("IRS") completed its examination of the Company's returns through tax year 2013. The 2013 audit settlement did not have a material impact on the Company. The Company is currently under audit by the IRS, and it is expected that the examination of tax year 2014 will be finalized within the next twelve months. The Company and the IRS have agreed to participate in the Compliance Assurance Process for the tax years 2014 and 2015.

The Company does not expect any material changes to the unrecognized tax benefits within the next twelve months.

11. Financing Agreements

Short-term Debt

The Company did not have any short-term debt borrowings outstanding as of September 30, 2015 and December 31, 2014.

Long-term Debt

The following table summarizes the carrying value of the Company's long-term debt issued and outstanding as of September 30, 2015 and December 31, 2014:

	Maturity	September 30, 2015	December 31, 2014
7.25% Voya Holdings, Inc. debentures due 2023 ⁽¹⁾	08/15/2023	\$159.3	\$159.0
7.63% Voya Holdings, Inc. debentures due 2026 ⁽¹⁾	08/15/2026	201.7	232.3

5.7% Senior Notes due 2043	07/15/2043	398.6	398.6
Subtotal		3,485.6	3,515.7
Less: Current portion of long-term debt		—	—
Total		\$3,485.6	\$3,515.7

⁽¹⁾ Guaranteed by ING Group.

As of September 30, 2015 and December 31, 2014, the Company was in compliance with its debt covenants.

Unsecured senior debt, which consists of senior fixed rate notes and guarantees of fixed rate notes, ranks highest in priority, followed by subordinated debt, which consists of junior subordinated debt securities.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Put Option Agreement for Senior Debt Issuance

On March 17, 2015, the Company entered into a ten-year put option agreement with a Delaware trust formed by the Company, in connection with the sale by the trust of \$500.0 aggregate face amount of pre-capitalized trust securities redeemable February 15, 2025 ("P-Caps") in a Rule 144A private placement. The trust invested the proceeds from the sale of the P-Caps in a portfolio of principal and interest strips of U.S. Treasury securities. The put option agreement provides Voya Financial, Inc. the right to sell to the trust at any time up to \$500.0 of its 3.976% Senior Notes due 2025 ("3.976% Senior Notes") and receive in exchange a corresponding amount of the principal and interest strips of U.S. Treasury securities held by the trust. The 3.976% Senior Notes will not be issued unless and until the put option is exercised. In return, the Company agreed to pay a semi-annual put premium to the trust at a rate of 1.875% per annum applied to the unexercised portion of the put option, and to reimburse the trust for its expenses. The put premium is recorded in Operating expenses in the Condensed Consolidated Statements of Operations. The 3.976% Senior Notes will be fully, irrevocably and unconditionally guaranteed by Voya Holdings. The Company's obligations under the put option agreement and the expense reimbursement agreement with the trust are also guaranteed by Voya Holdings.

The put option described above will be exercised automatically in full upon the Company's failure to make certain payments to the trust, including any failure to pay the put option premium or expense reimbursements when due, if the failure to pay is not cured within 30 days, and upon certain bankruptcy events involving the Company or Voya Holdings. The Company is also required to exercise the put option in full: (i) if the Company reasonably believes that its consolidated shareholders' equity, calculated in accordance with U.S. GAAP but excluding AOCI and Noncontrolling interest, has fallen below \$3.0 billion, subject to adjustment in certain cases; (ii) upon the occurrence of an event of default under the 3.976% Senior Notes; and (iii) if certain events occur relating to the trust's status as an "investment company" under the Investment Company Act of 1940.

The Company has a one-time right to unwind a prior voluntary exercise of the put option by repurchasing all of the 3.976% Senior Notes then held by the trust in exchange for a corresponding amount of U.S. Treasury securities. If the put option has been fully exercised, the 3.976% Senior Notes issued may be redeemed by the Company prior to their maturity at par or, if greater, at a make-whole redemption price, in each case plus accrued and unpaid interest to the date of redemption. The P-Caps are to be redeemed by the trust on February 15, 2025 or upon any early redemption of the 3.976% Senior Notes.

Aetna Notes

ING Group guarantees various debentures of Voya Holdings that were assumed by Voya Holdings in connection with the Company's acquisition of Aetna's life insurance and related businesses in 2000 (the "Aetna Notes"). Concurrent with the completion of the Company's IPO, the Company entered into a shareholder agreement with ING Group that governs certain aspects of the Company's continuing relationship. The Company agreed in the shareholder agreement to reduce the aggregate outstanding principal amount of Aetna Notes to:

- no more than \$400.0 as of December 31, 2015;
- no more than \$300.0 as of December 31, 2016;
- no more than \$200.0 as of December 31, 2017;
- no more than \$100.0 as of December 31, 2018;

and zero as of December 31, 2019.

The reduction in principal amount of Aetna Notes can be accomplished, at the Company's option, through redemptions, repurchases or other means, but will also be deemed to have been reduced to the extent the Company posts collateral with a third-party collateral agent, for the benefit of ING Group, which may consist of cash collateral; certain investment-grade debt instruments; a letter of credit ("LOC") meeting certain requirements; or senior debt obligations of ING Group or a wholly owned subsidiary of ING Group.

If the Company fails to reduce the outstanding principal amount of the Aetna Notes, the Company has agreed to pay a quarterly fee (ranging from 0.5% per quarter for 2016 to 1.25% per quarter for 2019) to ING Group based on the outstanding principal amount of Aetna Notes which exceed the limits set forth above.

During the nine months ended September 30, 2015, Voya Holdings repurchased \$31.1 of the outstanding principal amount of 7.63% Debentures due August 15, 2026 and \$0.1 of the outstanding principal amount of 7.25% Debentures due August 15, 2023. In connection with these transactions, the Company incurred a loss on debt extinguishment of \$0.2 and \$10.1 for the three and

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

nine months ended September 30, 2015, respectively, which was recorded in Interest expense in the Condensed Consolidated Statements of Operations.

As of September 30, 2015 and December 31, 2014, the outstanding principal amount of the Aetna Notes guaranteed by ING Group was \$474.9 and \$506.1, respectively.

Credit Facilities

The Company maintains credit facilities used primarily for collateral required under affiliated reinsurance transactions and also for general corporate purposes. As of September 30, 2015, unsecured and uncommitted credit facilities totaled \$1.7, unsecured and committed credit facilities totaled \$7.3 billion and secured facilities totaled \$205.0. Of the aggregate \$7.5 billion capacity available, the Company utilized \$2.8 billion in credit facilities outstanding as of September 30, 2015. Total fees associated with credit facilities were \$27.2 and \$76.9 for the three and nine months ended September 30, 2015, respectively. Total fees associated with credit facilities were \$29.1 and \$86.5 for the three and nine months ended September 30, 2014, respectively.

The following table outlines the Company's credit facilities, their dates of expiration, capacity and utilization as of September 30, 2015:

Obligor / Applicant	Secured/ Unsecured	Committed/ Uncommitted	Expiration	Capacity	Utilization	Unused Commitment
Voya Financial, Inc.	Unsecured	Committed	02/14/2018	\$3,000.0	\$470.8	\$2,529.2

⁽¹⁾ Due to Hannover Re's implementation of the Hannover Re Buyer Facility Agreement described below, the \$1.125 billion Letter of Credit Facility was reduced to \$300.0 effective October 7, 2015.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Upon Hannover Re exercising its election to implement its own facility providing collateral for reinsurance between SLD and SLDI, on September 24, 2015, the Company entered into a Hannover Re Buyer Facility Agreement with Hannover Life Reinsurance Company of America, Hannover Re (Ireland) Limited, Hannover Ruck SE and SLDI ("Buyer Facility Agreement"). Under the Buyer Facility Agreement the existing collateral, provided by SLDI through LOCs and a collateral note supporting the reserves on the Hannover Re block, was replaced by a \$2.9 billion senior unsecured floating rate note issued by Hannover Ruck and deposited into a reserve credit trust established by SLDI for the benefit of SLD.

Effective September 29, 2015, Roaring River, LLC ("Roaring River"), the Company's wholly owned captive reinsurance subsidiary, entered into a letter of credit facility agreement with a third-party bank to provide up to \$425.0 of committed capacity until October 1, 2025, which supports reserves on an affiliated reinsurance agreement. The initial amount of the letter of credit is \$207.5, which replaces a \$207.5 letter of credit issued under the Company's Revolving Credit Facility.

Effective January 24, 2014, SLDI entered into a letter of credit facility agreement with a third-party bank to provide up to \$150.0 of committed capacity until January 24, 2018, which supports reserves on an affiliated reinsurance agreement in connection with a portion of its deferred annuity business. Effective March 31, 2015, the amount of the facility was increased to \$175.0 of committed capacity until January 24, 2018.

On February 11, 2015, Voya Financial, Inc. entered into a \$195.0 letter of credit facility agreement with a third-party bank, which matures February 11, 2018 and includes an option to support the LOC outstanding either on a secured or unsecured basis. As of September 30, 2015, Voya Financial, Inc. collateralized the facility with \$212.0 of unrestricted cash and short-term investments. The LOC will be used to provide collateral under the reinsurance agreements of Voya Financial, Inc. subsidiaries.

Amended and Restated Credit Agreement

On February 14, 2014, the Company revised the terms of its Revolving Credit Agreement by entering into the Amended and Restated Revolving Credit Agreement (the "Amended and Restated Credit Agreement") with a syndicate of banks. The Amended and Restated Credit Agreement modifies the original agreement by extending the terms of the agreement to February 14, 2018 and reducing the total amount of LOCs that may be issued to \$3.0 billion. As of September 30, 2015, there were no amounts outstanding as revolving credit borrowings. As of September 30, 2015, \$470.8 of LOCs were outstanding under the Revolving Credit Agreement.

12. Commitments and Contingencies

Commitments

Through the normal course of investment operations, the Company commits to either purchase or sell securities, mortgage loans, or money market instruments, at a specified future date and at a specified price or yield. The inability of counterparties to honor these commitments may result in either a higher or lower replacement cost. Also, there is likely to be a change in the value of the securities underlying the commitments.

As of September 30, 2015, the Company had off-balance sheet commitments to purchase investments of \$1.4 billion, of which \$235.2 related to consolidated investment entities. As of December 31, 2014, the Company had off-balance sheet commitments to purchase investments of \$887.4, of which \$297.0 related to consolidated investment entities.

Insurance Company Guaranty Fund Assessments

Insurance companies are assessed on the costs of funding the insolvencies of other insurance companies by the various state guaranty associations, generally based on the amount of premiums companies collect in that state.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The Company accrues the cost of future guaranty fund assessments based on estimates of the insurance company's insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations and the amount of premiums written in each state. The Company has estimated this undiscounted liability, which is included in Other liabilities on the Condensed Consolidated Balance Sheets, to be \$14.0 and \$14.5 as of September 30, 2015 and December 31, 2014, respectively. The Company has also recorded an asset in Other assets on the Condensed Consolidated Balance Sheets of \$24.6 and \$26.5 as of September 30, 2015 and December 31, 2014, respectively, for future credits to premium taxes. The Company estimates its liabilities for future assessments under state insurance guaranty association laws. The Company believes the reserves established are adequate for future assessments relating to insurance companies that are currently subject to insolvency proceedings.

Restricted Assets

The Company is required to maintain assets on deposit with various regulatory authorities to support its insurance operations. The Company may also post collateral in connection with certain securities lending, repurchase agreements, funding agreements, credit facilities and derivative transactions. The components of the fair value of the restricted assets were as follows as of the dates indicated:

	September 30, 2015	December 31, 2014
Fixed maturity collateral pledged to FHLB	\$1,550.9	\$1,614.8
FHLB restricted stock ⁽¹⁾	73.3	76.3
Other fixed maturities-state deposits	229.2	241.7
Securities pledged ⁽²⁾	1,099.5	1,184.6
Total restricted assets	\$2,952.9	\$3,117.4

⁽¹⁾ Included in Other investments on the Condensed Consolidated Balance Sheets.

⁽²⁾ Includes the fair value of loaned securities of \$437.0 and \$545.9 as of September 30, 2015 and December 31, 2014, respectively. In addition, as of September 30, 2015 and December 31, 2014, the Company delivered securities as collateral of \$662.5 and \$638.7, respectively. Loaned securities and securities delivered as collateral are included in Securities pledged on the Condensed Consolidated Balance Sheets.

Federal Home Loan Bank Funding Agreements

The Company is a member of the FHLB of Des Moines and the FHLB of Topeka and is required to pledge collateral to back funding agreements issued to the FHLB. As of September 30, 2015 and December 31, 2014, the Company had \$1.3 billion and \$1.4 billion, respectively, in non-putable funding agreements, which are included in Contract owner account balances on the Condensed Consolidated Balance Sheets. As of September 30, 2015 and December 31, 2014, assets with a market value of approximately \$1.6 billion collateralized the FHLB funding agreements.

Litigation, Regulatory Matters and Loss Contingencies

Litigation, regulatory and other loss contingencies arise in connection with the Company's activities as a diversified financial services firm. The Company is a defendant in a number of litigation matters arising from the conduct of its business, both in the ordinary course and otherwise. In some of these matters, claimants seek to recover very large or indeterminate amounts, including compensatory, punitive, treble and exemplary damages. Modern pleading practice in the U.S. permits considerable variation in the assertion of monetary damages and other relief. Claimants are not always required to specify the monetary damages they seek or they may be required only to state an amount sufficient

to meet a court's jurisdictional requirements. Moreover, some jurisdictions allow claimants to allege monetary damages that far exceed any reasonably possible verdict. The variability in pleading requirements and past experience demonstrates that the monetary and other relief that may be requested in a lawsuit or claim often bears little relevance to the merits or potential value of a claim. Litigation against the Company includes a variety of claims including negligence, breach of contract, fraud, violation of regulation or statute, breach of fiduciary duty, negligent misrepresentation, failure to supervise, elder abuse and other torts.

As with other financial services companies, the Company periodically receives informal and formal requests for information from various state and federal governmental agencies and self-regulatory organizations in connection with inquiries and investigations of the products and practices of the Company or the financial services industry. It is the practice of the Company to cooperate fully in these matters.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The outcome of a litigation or regulatory matter is difficult to predict and the amount or range of potential losses associated with these or other loss contingencies requires significant management judgment. It is not possible to predict the ultimate outcome or to provide reasonably possible losses or ranges of losses for all pending regulatory matters, litigation and other loss contingencies. While it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company's financial position, based on information currently known, management believes that neither the outcome of pending litigation and regulatory matters, nor potential liabilities associated with other loss contingencies, are likely to have such an effect. However, given the large and indeterminate amounts sought in certain litigation and the inherent unpredictability of all such matters, it is possible that an adverse outcome in certain of the Company's litigation or regulatory matters, or liabilities arising from other loss contingencies, could, from time to time, have a material adverse effect upon the Company's results of operations or cash flows in a particular quarterly or annual period.

For some matters, the Company is able to estimate a possible range of loss. For such matters in which a loss is probable, an accrual has been made. For matters where the Company, however, believes a loss is reasonably possible, but not probable, no accrual is required. For matters for which an accrual has been made, but there remains a reasonably possible range of loss in excess of the amounts accrued or for matters where no accrual is required, the Company develops an estimate of the unaccrued amounts of the reasonably possible range of losses. As of September 30, 2015, the Company estimates the aggregate range of reasonably possible losses, in excess of any amounts accrued for these matters as of such date, to be up to approximately \$100.0.

For other matters, the Company is currently not able to estimate the reasonably possible loss or range of loss. The Company is often unable to estimate the possible loss or range of loss until developments in such matters have provided sufficient information to support an assessment of the range of possible loss, such as quantification of a damage demand from plaintiffs, discovery from plaintiffs and other parties, investigation of factual allegations, rulings by a court on motions or appeals, analysis by experts and the progress of settlement discussions. On a quarterly and annual basis, the Company reviews relevant information with respect to litigation and regulatory contingencies and updates the Company's accruals, disclosures and reasonably possible losses or ranges of loss based on such reviews.

Litigation includes *Beeson, et al. v SMMS, Lion Connecticut Holdings, Inc. and ING NAIC* (Marin County CA Superior Court, CIV-092545). Thirty-four Plaintiff households (husband/wife/trust) assert that SMMS, which was purchased in 2000 and sold in 2003, breached a duty to monitor the performance of investments that Plaintiffs made with independent financial advisors they met in conjunction with retirement planning seminars presented at Fireman's Fund Insurance Company. SMMS recommended the advisors to Fireman's Fund as seminar presenters. Some of the seminars were arranged by SMMS. As a result of the performance of their investments, Plaintiffs claim they incurred damages. Fireman's Fund has asserted breach of contract and concealment claims against SMMS alleging that SMMS failed to fulfill its ongoing obligation to monitor the financial advisors and the investments they recommended to Plaintiffs and by failing to disclose that a primary purpose of the seminars was to develop business for the financial advisors. The Company denied all claims and vigorously defended this case at trial. During trial, the Court ruled that SMMS had duties to Plaintiffs and Fireman's Fund that it has breached. On December 12, 2014, the Court issued a Statement of Decision in which it awarded damages in the aggregate of \$36.8 to Plaintiffs and \$7.5 to Fireman's Fund. The Company objected to the Court's decisions and the Statement of Decision on the grounds that they were inconsistent with California law and the evidence presented at trial. On January 7, 2015, the Court made final the award in favor of the Plaintiffs. The Company filed an appellate bond that stays execution of that judgment while an

appeal is pursued. On June 8, 2015, the Court issued a Statement of Decision denying Fireman's Fund's request for punitive damages.

13. Related Party Transactions

Parties are considered to be related if one party has the ability to control or exercise significant influence over the other party in making financial or operating decisions. Effective March 9, 2015, ING Group divested its remaining ownership interest in Voya Financial, Inc. As such, as of the date of this Quarterly Report, ING Group and its affiliates are no longer considered related parties of Voya Financial, Inc. Transactions with ING Group and its affiliates continue to be reported as related party transactions for periods prior to March 9, 2015.

The following tables summarize income and expense from transactions with related parties for the periods indicated:

	Three Months Ended September 30,			
	2015		2014	
	Income	Expense	Income	Expense
NN Group	\$—	\$—	\$1.0	\$0.1
ING Group	—	—	3.9	3.5
ING Bank	—	—	0.3	4.7
Other	—	—	4.8	3.6
Total	\$—	\$—	\$10.0	\$11.9

	Nine Months Ended September 30,			
	2015		2014	
	Income	Expense	Income	Expense
NN Group	\$0.4	\$0.1	\$2.2	\$0.4
ING Group	2.8	3.0	10.8	10.9
ING Bank	18.2	5.7	4.4	15.4
Other	3.8	3.4	15.4	10.6
Total	\$25.2	\$12.2	\$32.8	\$37.3

Assets and liabilities from transactions with related parties as of December 31, 2014 are shown below:

	Assets	Liabilities
NN Group	\$0.1	\$0.2
ING Group	1.9	1.2
ING Bank	12.9	4.0
Other	2.2	1.4
Total	\$17.1	\$6.8

As of March 9, 2015, ING Group and its affiliates are no longer considered related parties of Voya Financial, Inc.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The material agreements whereby the Company generates revenues and expenses with affiliated entities are as follows:

Credit Facilities

The Company is a borrower in credit facility agreements with ING Bank, in which ING Bank provides LOC capacity. While there were outstanding payables related to credit facility agreements with ING Bank, because ING Bank is no longer a related party, there were no outstanding payables related to credit facility agreements with related parties as of September 30, 2015. As of December 31, 2014, when ING Bank was a related party, the Company had outstanding payables of \$4.0 related to credit facility agreements with ING Bank. For the three months ended September 30, 2015, the Company incurred no expenses related to credit facility agreements with related parties. For the three months ended September 30, 2014, the Company incurred expenses of \$4.0 related to credit facility agreements with related parties. The Company incurred expenses of \$5.7 and \$11.5 related to credit facility agreements with related parties for the nine months ended September 30, 2015 and 2014, respectively.

Share Repurchase Program

During the nine months ended September 30, 2015, the Company repurchased 13,599,274 shares of its common stock from ING Group for an aggregate purchase price of \$600.0.

See the Shareholders' Equity and Earnings per Common Share Note to these Condensed Consolidated Financial Statements for additional information regarding share repurchase transactions with ING Group.

Derivatives

The Company is party to several derivative contracts with NN Group N.V. ("NN Group") and ING Bank and one or more of ING Bank's subsidiaries. The Company is exposed to various risks relating to its ongoing business operations, including but not limited to interest rate risk, foreign currency risk and equity market risk. To manage these risks, the Company uses various strategies, including derivatives contracts, certain of which are with related parties, such as interest rate swaps, equity options and currency forwards.

As of September 30, 2015, such notional amounts are outstanding with ING Group and NN Group; however, ING Group and NN Group are no longer related parties. As of December 31, 2014, the outstanding notional amount with ING Bank and NN Group was \$464.1 (consisting of currency forwards of \$178.0 and equity options of \$286.1). As of December 31, 2014, the market value for these contracts was \$11.5. For the three months ended September 30, 2015 and 2014, the Company recorded no net realized capital gains (losses) with ING Bank and NN Group.

For the nine months ended September 30, 2015 and 2014, the Company recorded net realized capital gains (losses) of \$18.2 and \$3.9, respectively, with ING Bank and NN Group.

The Company has sold protection under certain credit default swap derivative contracts that were previously supported by a guarantee provided by NN Group. During 2013, the guarantee provided by NN Group on the sold protection was replaced with guarantees provided by Voya Financial, Inc. The Company purchased protection under one credit default swap derivative contract that is supported by the NN Group guarantee with the potential exposure

limited to swap premiums to be paid. As of September 30, 2015 and December 31, 2014, the maximum potential future exposure to the Company on credit default swaps supported by the NN Group guarantee was \$26.5 and \$33.1, respectively.

14. Consolidated Investment Entities

The Company provides investment management services to, and has transactions with, various collateralized loan obligations, private equity funds, single strategy hedge funds, insurance entities, securitizations and other investment entities in the normal course of business. In certain instances, the Company serves as the investment manager, making day-to-day investment decisions concerning the assets of these entities. These entities are considered to be either VIEs or VOEs and the Company evaluates its involvement with each entity to determine whether consolidation is required.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Certain investment entities are consolidated under VIE or VOE consolidation guidance. The Company consolidates certain entities under the VIE guidance when it is determined that the Company is the primary beneficiary of these entities. The Company consolidates certain entities under the VOE guidance when it acts as the general partner and the limited partners do not have substantive rights to impact ongoing governance and operating activities of the entity, or when it otherwise has control through voting rights.

The Company has no right to the benefits from, nor does it bear the risks associated with these investments beyond the Company's direct equity and debt investments in and management fees generated from these investment products. Such direct investments amounted to approximately \$744.6 and \$694.4 as of September 30, 2015 and December 31, 2014, respectively. If the Company were to liquidate, the assets held by consolidated investment entities would not be available to the general creditors of the Company as a result of the liquidation.

Consolidated Investments

Collateral Loan Obligations ("CLO") Entities

Certain subsidiaries of the Company structure and manage CLO entities created for the sole purpose of offering investors various maturity and risk characteristics by issuing multiple tranches of collateralized debt. The notes issued by the CLO entities are backed by diversified portfolios consisting primarily of senior secured floating rate leveraged loans.

The Company provides collateral management services to the CLO entities. In return for providing management services, the Company earns investment management fees and contingent performance fees. The Company has invested in certain of the entities, generally taking an ownership position in the unrated junior subordinated tranches. The CLO entities are structured and managed similarly but have differing fee structures and initial capital investments made by the Company. The Company's ownership interests and management and contingent performance fees were assessed to determine if the Company is the primary beneficiary of these entities.

As of September 30, 2015 and December 31, 2014, the Company consolidated 17 and 16 CLOs, respectively.

Private Equity Funds and Single Strategy Hedge Funds (Limited Partnerships)

The Company invests in and manages various limited partnerships, including private equity funds and single strategy hedge funds. The Company, as a general partner or managing member of certain sponsored investment funds, is generally presumed to control the limited partnerships unless the limited partners have the substantive ability to remove the general partner without cause, based upon a simple majority vote, or can otherwise dissolve the partnership, or have substantive participating rights over decision-making of the partnerships.

As of September 30, 2015 and December 31, 2014, the Company consolidated 33 and 35 funds respectively, which were structured as partnerships.

Registered Investment Companies

On May 7, 2015, the Company launched the Pomona Investment Fund (the "PIF") which is a private equity mutual fund. The PIF is a non-diversified, closed-end registered investment company that invests in a variety of private equity investment types and strategies. Formed as a Delaware statutory trust, investors in the PIF will receive fund shares, representing proportional interests in the assets of the PIF and voting rights on matters submitted to vote by shareholders. As of September 30, 2015, the Company is a majority investor in the PIF, and as such has a controlling financial interest in the fund.

The Company is invested in the Voya Strategic Income Opportunities Fund, which is a separately managed series fund. The Voya Strategic Income Opportunities Fund is a multi-credit unconstrained Fixed Income Mutual Fund that invests in a combination of underlying funds and direct fixed income investments. Investors in the fund receive fund shares, representing proportional interests in the assets of the fund and voting rights on matters submitted to vote by shareholders. As of September 30, 2015, the Company is a majority investor in the Voya Strategic Income Opportunities Fund, and as such has a controlling financial interest in the fund.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table summarizes the components of the consolidated investment entities, excluding collateral support for certain reinsurance contracts, as of the dates indicated:

	September 30, 2015	December 31, 2014
Assets of Consolidated Investment Entities		
VIEs - CLO entities:		
Cash and cash equivalents	\$409.8	\$605.9
Corporate loans, at fair value using the fair value option	7,147.7	6,793.1
Other assets	202.9	67.3
Total CLO entities	7,760.4	7,466.3
VOEs - Private equity funds and single strategy hedge funds:		
Cash and cash equivalents	365.2	104.5
Limited partnerships/corporations, at fair value	5,065.1	3,727.3
Other assets	55.1	25.1
Total investment funds	5,485.4	3,856.9
Total assets of consolidated investment entities	\$13,245.8	\$11,323.2
Liabilities of Consolidated Investment Entities		
VIEs - CLO entities:		
CLO notes, at fair value using the fair value option	\$7,225.6	\$6,838.1
Other liabilities	484.2	561.1
Total CLO entities	7,709.8	7,399.2
VOEs - Private equity funds and single strategy hedge funds:		
Other liabilities	1,825.7	796.7
Total investment funds	1,825.7	796.7
Total liabilities of consolidated investment entities	\$9,535.5	\$8,195.9

Fair Value Measurement

Upon consolidation of CLO entities, the Company elected to apply the FVO for financial assets and financial liabilities held by these entities and continued to measure these assets (primarily corporate loans) and liabilities (debt obligations issued by CLO entities) at fair value in subsequent periods. The Company has elected the FVO to more closely align its accounting with the economics of its transactions and allows the Company to more effectively align changes in the fair value of CLO assets with a commensurate change in the fair value of CLO liabilities.

Investments held by consolidated private equity funds and single strategy hedge funds are measured and reported at fair value in the Company's Condensed Consolidated Financial Statements. Changes in the fair value of consolidated investment entities are recorded as a separate line item within Income (loss) related to consolidated investment entities in the Company's Condensed Consolidated Statements of Operations.

The methodology for measuring the fair value and fair value hierarchy classification of financial assets and liabilities of consolidated investment entities is consistent with the methodology and fair value hierarchy rules applied by the Company to its investment portfolio. Refer to the Fair Value Measurement section of the Business, Basis of Presentation and Significant Accounting Policies Note in the Consolidated Financial Statements in Part II, Item 8. of

the Company's 2014 Annual Report on Form 10-K.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

As discussed in more detail below, the Company utilizes valuations obtained from third-party commercial pricing services, brokers and investment sponsors or third-party administrators that supply NAV (or its equivalent) per share used as a practical expedient. The valuations obtained from brokers and third-party commercial pricing services are non-binding. These valuations are reviewed on a monthly or quarterly basis (dependent on the type of fund or product). Procedures include, but are not limited to, a review of underlying fund investor reports, review of top and worst performing funds requiring further scrutiny, review of variance from prior periods and review of variance from benchmarks, where applicable. In addition, the Company considers both macro and fund specific events that may impact the latest NAV supplied and determines if further adjustments of value should be made. Such changes, if any, are subject to senior management review.

When a price cannot be obtained from a commercial pricing service, independent broker quotes are solicited. Securities priced using independent broker quotes are classified as Level 3. Broker quotes and prices obtained from pricing services are reviewed and validated through an internal valuation committee price variance review, comparisons to internal pricing models, back testing to recent trades or monitoring of trading volumes.

Cash and Cash Equivalents

The carrying amounts for cash reflect the assets' fair values. The fair value for cash equivalents is determined based on quoted market prices. These assets are classified as Level 1.

VIEs - CLO Entities

Corporate loans: Corporate loan investments, which comprise the majority of consolidated CLO portfolio collateral, are senior secured corporate loans maturing at various dates between 2016 and 2024, paying interest at LIBOR, EURIBOR or PRIME plus a spread of up to 9.5% and typically range in credit rating categories from AAA down to unrated. As of September 30, 2015 and December 31, 2014, the unpaid principal balance exceeded the fair value of the corporate loans by approximately \$164.1 and \$75.9, respectively. Less than 1% of the collateral assets were in default as of September 30, 2015 and December 31, 2014.

The fair values for corporate loans are determined using independent commercial pricing services. Fair value measurement based on pricing services may be classified in Level 2 or Level 3 depending on the type, complexity, observability and liquidity of the asset being measured. The inputs used by independent commercial pricing services, such as benchmark yields and credit risk adjustments, are those that are derived principally from or corroborated by observable market data. Hence, the fair value measurement of corporate loans priced by independent pricing service providers is classified within Level 2 of the fair value hierarchy. In addition, there are assets held with CLO portfolios that represent senior level debt of other third party CLOs. These CLO investments are classified within Level 3 of the fair value hierarchy. See description of fair value process for CLO notes below.

CLO notes: The CLO notes are backed by a diversified loan portfolio consisting primarily of senior secured floating rate leveraged loans. Repayment risk is segmented into tranches with credit ratings of these tranches reflecting both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it. The most subordinated tranche bears the first loss and receives the residual payments, if any. The interest rates are generally variable rates based on LIBOR plus a pre-defined spread, which varies from 0.22% for the more senior tranches to 7.00% for the more subordinated tranches. CLO notes mature at various dates between 2020

and 2027 and have a weighted average maturity of 9.2 years as of September 30, 2015. The outstanding balance on the notes issued by consolidated CLOs exceeds their fair value by approximately \$341.2 and \$239.6 as of September 30, 2015 and December 31, 2014, respectively. The investors in this debt are not affiliated with the Company and have no recourse to the general credit of the Company for this debt.

The fair values of the CLO notes including subordinated tranches in which the Company retains an ownership interest are obtained from a third-party commercial pricing service. The service combines the modeling of projected cash flow activity and the calibration of modeled results with transactions that have taken place in the specific debt issue as well as debt issues with similar characteristics. Several of the more significant inputs to the models including default rate, recovery rate, prepayment rate and discount margin, are determined primarily based on the nature of the investments in the underlying collateral pools and cannot be corroborated by observable market data. Accordingly, CLO notes are classified within Level 3 of the fair value hierarchy.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The Company reviews the detailed prices including comparisons to prior periods for reasonableness. The Company utilizes a formal pricing challenge process to request a review of any price during which time the vendor examines its assumptions and relevant market inputs to determine if a price change is warranted.

The following table summarizes significant unobservable inputs for Level 3 fair value measurements as of the dates indicated:

	Fair Value	Valuation Technique	Unobservable Inputs
September 30, 2015			
Assets:			
CLO Investments	\$ 18.6	Discounted Cash Flow	Default Rate Recovery Rate Prepayment Rate Discount Margin
Liabilities:			
CLO Notes	\$7,225.6	Discounted Cash Flow	Default Rate Recovery Rate Prepayment Rate Discount Margin
	Fair Value	Valuation Technique	Unobservable Inputs
December 31, 2014			
Assets:			
CLO Investments	\$ 19.2	Discounted Cash Flow	Default Rate Recovery Rate Prepayment Rate Discount Margin
Liabilities:			
CLO Notes	\$6,838.1	Discounted Cash Flow	Default Rate Recovery Rate Prepayment Rate Discount Margin

The following narrative indicates the sensitivity of inputs:

Default Rate: An increase (decrease) in the expected default rate would likely increase (decrease) the discount margin (increase risk premium) used to value the CLO investments and CLO notes and, as a result, would potentially decrease the value of the CLO investments and CLO notes.

Recovery Rate: A decrease (increase) in the expected recovery of defaulted assets would potentially decrease (increase) the valuation of CLO investments and CLO notes.

Prepayment Rate: A decrease (increase) in the expected rate of collateral prepayments would potentially decrease (increase) the valuation of CLO investments and CLO notes as the expected weighted average life ("WAL") would increase.

Discount Margin (spread over LIBOR): An increase (decrease) in the discount margin used to value the CLO investments and CLO notes and would decrease (increase) the value of the CLO investments and CLO notes.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

VOEs - Private Equity Funds and Single Strategy Hedge Funds

Limited partnerships, at fair value, primarily represent the Company's investments in private equity funds and single strategy hedge funds. At times, the limited partnerships make strategic co-investments directly into private equity companies, including, but not limited to, buyout, venture capital, distressed and mezzanine. The fair value for these investments is estimated based on the NAV from the latest financial statements of these funds, provided by the fund's investment manager or third-party administrator.

Private Equity Funds

As prescribed in ASC Topic 820, the unit of account for these investments is the interest in the investee fund. The Company owns an undivided interest in the fund portfolio and does not have the ability to dispose of individual assets and liabilities in the fund portfolio. Rather, the Company would be required to redeem or dispose of its entire interest in the investee fund. There is no current active market for interests in underlying private equity funds.

Valuation is generally based on the valuations provided by the fund's general partner or investment manager. The valuations typically reflect the fair value of the Company's capital account balance of each fund investment, including unrealized capital gains (losses), as reported in the financial statements of the respective investee fund as of the respective year end or the latest available date. In circumstances where fair values are not provided, the Company seeks to determine the fair value of fund investments based upon other information provided by the fund's general partner or investment manager or from other sources.

The fair value of securities received in-kind from fund investments is determined based on the restrictions around the securities.

• Unrestricted, publicly traded securities are valued at the closing public market price on the reporting date;

• Restricted, publicly traded securities may be valued at a discount from the closing public market price on the reporting date, depending on the circumstances; and

• Privately held securities are valued by the directors/general partner of the investee fund, based on a variety of factors, including the price of recent transactions in the company's securities and the company's earnings, revenue and book value.

In the case of direct investments or co-investments in private equity companies, the Company initially recognizes investments at cost and subsequently adjusts investments to fair value. On a quarterly basis, the Company reviews the general partner or lead investor's valuation of the investee company, taking into account other available information, such as indications of a market value through subsequent issues of capital or transactions between third parties, performance of the investee company during the period and public, comparable companies' analysis, where appropriate.

Investments in these funds typically may not be fully redeemed at NAV within 90 days because of inherent restriction on near term redemptions. Therefore, these investments are classified within Level 3 of the fair value hierarchy.

As of September 30, 2015 and December 31, 2014, certain private equity funds maintained revolving lines of credit of \$637.0 and \$550.0 respectively, which renew annually and bear interest at LIBOR/EURIBOR plus 160 bps. The lines of credit are used for funding transactions before capital is called from investors, as well as for the financing of certain

purchases. The private equity funds generally may borrow an amount that does not exceed the lesser of a certain percentage of the funds' undrawn commitments or a certain percentage of the funds' undrawn commitments plus 250% asset coverage from the invested assets of the funds as of September 30, 2015 and December 31, 2014. As of September 30, 2015 and December 31, 2014, outstanding borrowings amount to \$415.9 and \$261.4 respectively. The borrowings are reflected in Liabilities related to consolidated investment entities - other liabilities on the Condensed Consolidated Balance Sheets. The borrowings are carried at an amount equal to the unpaid principal balance.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Single Strategy Hedge Funds

As of September 30, 2015 and December 31, 2014, the Company acts as investment manager of a certain single strategy hedge fund (the "Fund") that seeks to achieve its investment objective by investing in many forms of U.S. residential mortgage-backed securities, government securities and related derivative instruments, including without limitation, U.S. Treasury debt, government sponsored enterprise ("Agency") backed securities and fixed or adjustable rate collateralized mortgage obligations and Real Estate Mortgage Investment Conduits ("REMICs"). The Fund may also enter into repurchase and reverse repurchase agreements.

Investments in this Fund are priced in accordance with the Fund's pricing hierarchy process in which prices are obtained from a primary vendor and, if that vendor is unable to provide the price, the next vendor in the hierarchy is contacted until a price is obtained or it is determined that a price cannot be obtained from a commercial pricing service. When a price cannot be obtained from a commercial pricing service, independent broker quotes are solicited. Securities that rely upon a vendor supplied price are classified as Level 2. Securities priced using independent broker quotes are classified as Level 3.

As of September 30, 2015 and December 31, 2014, this Fund sold securities under an agreement to repurchase at a specified future date. Securities sold under an agreement to repurchase are not de-recognized on the Condensed Consolidated Balance Sheets, as the single strategy hedge fund retains substantially all the risks and rewards of ownership. The obligation to repay the corresponding cash received is recognized in the Condensed Consolidated Balance Sheets in Liabilities related to consolidated investment entities - Other liabilities. As of September 30, 2015 and December 31, 2014, outstanding financings amount to \$1,219.3 and \$417.1, respectively.

The following table summarizes the fair value hierarchy levels of consolidated investment entities as of September 30, 2015:

	Level 1	Level 2	Level 3	Total
Assets				
VIEs - CLO entities:				
Cash and cash equivalents	\$409.8	\$—	\$—	\$409.8
Corporate loans, at fair value using the fair value option	—	7,129.1	18.6	7,147.7
VOEs - Private equity funds and single strategy hedge funds:				
Cash and cash equivalents	365.2	—	—	365.2
Limited partnerships/corporations, at fair value	—	2,253.8	2,811.3	5,065.1
Total assets, at fair value	\$775.0	\$9,382.9	\$2,829.9	\$12,987.8
Liabilities				
VIEs - CLO entities:				
CLO notes, at fair value using the fair value option	\$—	\$—	\$7,225.6	\$7,225.6
Total liabilities, at fair value	\$—	\$—	\$7,225.6	\$7,225.6

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table summarizes the fair value hierarchy levels of consolidated investment entities as of December 31, 2014:

	Level 1	Level 2	Level 3	Total
Assets				
VIEs - CLO entities:				
Cash and cash equivalents	\$605.9	\$—	\$—	\$605.9
Corporate loans, at fair value using the fair value option	—	6,773.9	19.2	6,793.1
VOEs - Private equity funds and single strategy hedge funds:				
Cash and cash equivalents	104.5	—	—	104.5
Limited partnerships/corporations, at fair value	—	1,035.6	2,691.7	3,727.3
Total assets, at fair value	\$710.4	\$7,809.5	\$2,710.9	\$11,230.8
Liabilities				
VIEs - CLO entities:				
CLO notes, at fair value using the fair value option	\$—	\$—	\$6,838.1	\$6,838.1
Total liabilities, at fair value	\$—	\$—	\$6,838.1	\$6,838.1

Level 3 assets primarily include investments in private equity funds and single strategy hedge funds held by the consolidated VOEs, while the Level 3 liabilities consist of CLO notes. Transfers of investments out of Level 3 and into Level 2 or Level 1, if any, are recorded as of the beginning of the period in which the transfer occurred. For the three months ended September 30, 2015 and September 30, 2014 there were no transfers in or out of Level 3, or transfers between Level 1 and Level 2.

For the nine months ended September 30, 2015 there were no transfers in or out of Level 3 or transfers between Level 1 and Level 2. For the nine months ended September 30, 2014, \$13.9 of investments held in single strategy hedge funds were transferred from Level 2 to Level 3 based upon the use of broker quotes to price certain underlying securities held by the single strategy hedge fund. There were no transfers between Level 1 and Level 2.

Deconsolidation of Certain Investment Entities

During the three and nine months ended September 30, 2015 , the Company deconsolidated one investment entity. During the three and nine months ended September 30, 2014 , the Company did not deconsolidate any investment entities.

Nonconsolidated VIEs

CLO Entities

In addition to the consolidated CLO entities, the Company also holds variable interest in certain CLO entities that are not consolidated as it has been determined that the Company is not the primary beneficiary. With these CLO entities, the Company serves as the investment manager and receives investment management fees and contingent performance fees. Generally, the Company does not hold any interest in the nonconsolidated CLO entities but if it does, such ownership has been deemed to be insignificant. The Company has not provided, and is not obligated to provide, any financial or other support to these entities.

The Company reviews its assumptions on a periodic basis to determine if conditions have changed such that the projection of these contingent fees becomes significant enough to reconsider the Company's consolidation status as variable interest holder. As of September 30, 2015 and December 31, 2014, the Company did not hold any ownership interests in these unconsolidated CLOs.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table presents the carrying amounts of total assets and liabilities of the CLOs in which the Company concluded that it holds a variable interest, but is not the primary beneficiary as of the dates indicated. The Company determines its maximum exposure to loss to be: (i) the amount invested in the debt or equity of the CLO and (ii) other commitments and guarantees to the CLO.

	September 30, 2015	December 31, 2014
Carrying amount	\$1.7	\$—
Maximum exposure to loss	1.7	—
Assets of nonconsolidated investment entities	1,314.3	932.8
Liabilities of nonconsolidated investment entities	1,372.2	983.7

Investment Funds

The Company manages or holds investments in certain private equity funds and hedge funds. With these entities, the Company serves as the investment manager and is entitled to receive investment management fees and contingent performance fees that are generally expected to be insignificant. Although the Company has the power to direct the activities that significantly impact the economic performance of the funds, it is not considered the primary beneficiary and did not consolidate any of these investment funds.

In addition, the Company does not consolidate the funds in which its involvement takes a form of a limited partner interest and is restricted to a role of a passive investor, as a limited partner's interest does not provide the Company with any substantive kick-out or participating rights, which would overcome the presumption of control by the general partner.

Securitizations

The Company invests in various tranches of securitization entities, including RMBS, CMBS and ABS. Through its investments, the Company is not obligated to provide any financial or other support to these entities. Each of the RMBS, CMBS and ABS entities are thinly capitalized by design and considered VIEs. The Company's involvement with these entities is limited to that of a passive investor. The Company has no unilateral right to appoint or remove the servicer, special servicer or investment manager, which are generally viewed to have the power to direct the activities that most significantly impact the securitization entities' economic performance, in any of these entities, nor does the Company function in any of these roles. The Company, through its investments or other arrangements, does not have the obligation to absorb losses or the right to receive benefits from the entity that could potentially be significant to the entity. Therefore, the Company is not the primary beneficiary and will not consolidate any of the RMBS, CMBS and ABS entities in which it holds investments. These investments are accounted for as investments available-for-sale as described in the Fair Value Measurements (excluding Consolidated Investment Entities) Note to these Condensed Consolidated Financial Statements and unrealized capital gains (losses) on these securities are recorded directly in AOCI, except for certain RMBS which are accounted for under the FVO whose change in fair value is reflected in Other net realized gains (losses) in the Condensed Consolidated Statements of Operations. The Company's maximum exposure to loss on these structured investments is limited to the amount of its investment. Refer to the Investments (excluding Consolidated Investment Entities) Note to these Condensed Consolidated Financial Statements for details regarding the carrying amounts and classifications of these assets.

15. Segments

The Company provides its principal products and services in two ongoing businesses and reports results through five ongoing segments as follows:

Business	Segment
	Retirement
Retirement and Investment Solutions	Annuities
	Investment Management
Insurance Solutions	Individual Life
	Employee Benefits

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The Company also has a Corporate segment, which includes corporate operations, assets and obligations and assets not allocated to other segments, and Closed Block segments, which comprise products that are in run-off and no longer being actively marketed and sold.

These segments reflect the manner by which the Company's chief operating decision maker views and manages the business. A brief description of these segments follows.

Retirement and Investment Solutions

The Retirement and Investment Solutions business provides its products and services through three segments: Retirement, Annuities and Investment Management. The Retirement segment provides tax-deferred, employer-sponsored retirement savings plans and administrative services to corporate, education, healthcare, other non-profit and government entities, as well as individual retirement accounts ("IRAs"), other retail financial products and comprehensive financial services to individual customers and pension risk transfer solutions to institutional customers. The Annuities segment primarily provides fixed, indexed and structured annuities, tax-qualified mutual fund custodial products and payout annuities for pre-retirement wealth accumulation and postretirement income management sold through multiple channels. The Investment Management segment provides investment products and retirement solutions across a broad range of geographies, market sectors, investment styles and capitalization spectrums. Products and services are offered to institutional clients, including public, corporate and union retirement plans, endowments and foundations and insurance companies, as well as individual investors and general accounts of the Company's insurance subsidiaries and are distributed through the Company's direct sales force, consultant channel and intermediary partners (such as banks, broker-dealers and independent financial advisers).

Insurance Solutions

The Insurance Solutions business provides its products through two segments: Individual Life and Employee Benefits. The Individual Life segment provides wealth accumulation, protection and transfer opportunities through universal, variable and term life products, distributed through a network of independent general agents and managing directors, to meet the needs of a broad range of customers from the middle market through affluent market segments. The Employee Benefits segment provides stop loss, group life, voluntary employee-paid and disability products to mid-sized and large businesses.

Corporate

Corporate includes corporate operations and corporate level assets and financial obligations. The Corporate segment includes investment income on assets backing surplus in excess of amounts held at the segment level, financing and interest expenses, and other items not allocated to segments, including items such as expenses of the Company's strategic investment program, certain expenses and liabilities of employee benefit plans and intercompany eliminations.

Closed Blocks

Closed Blocks consists of three separate reporting segments that include run-off and legacy business lines that are no longer being actively marketed or sold. The Closed Block Variable Annuity ("CBVA") segment consists of variable annuity contracts that were designed to offer long-term savings products in which individual contract owners made deposits that are maintained in separate accounts. These products included options for policyholders to purchase living benefit riders. In 2009, the Company separated its CBVA segment from other operations, placing it in run-off, and made a strategic decision to stop actively writing new retail variable annuity products with substantial guarantee features (the last policies were issued in early 2010 and the block shifted to run-off). The Closed Block Institutional Spread Products segment historically issued GICs and funding agreements and invested amounts raised to earn a spread. While the business in the Closed Block Institutional Spread Products segment is being managed in active run-off, the Company continues to issue liabilities from time to time to replace liabilities that are maturing. The Closed Block Other segment consists primarily of retained and run-off activity related to divestment, including the Company's group reinsurance and individual reinsurance businesses.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Measurement

Operating earnings before income taxes is an internal measure used by management to evaluate segment performance. The Company uses the same accounting policies and procedures to measure segment operating earnings before income taxes as it does for consolidated Net income (loss). Operating earnings before income taxes does not replace Net income (loss) as the U.S. GAAP measure of the Company's consolidated results of operations. However, the Company believes that the definitions of operating earnings before income taxes provide users with a valuable measure of its business and segment performances and enhance the understanding of the Company's financial results by highlighting performance drivers. Each segment's operating earnings before income taxes is calculated by adjusting Income (loss) before income taxes for the following items:

Net investment gains (losses), net of related amortization of DAC, VOBA, sales inducements and unearned revenue. Net investment gains (losses) include gains (losses) on the sale of securities, impairments, changes in the fair value of investments using the FVO unrelated to the implied loan-backed security income recognition for certain mortgage-backed obligations and changes in the fair value of derivative instruments, excluding realized gains (losses) associated with swap settlements and accrued interest;

Net guaranteed benefit hedging gains (losses), which include changes in the fair value of derivatives related to guaranteed benefits, net of related reserve increases (decreases) and net of related amortization of DAC, VOBA and sales inducements, less the estimated cost of these benefits. The estimated cost, which is reflected in operating results, reflects the expected cost of these benefits if markets perform in line with the Company's long-term expectations and includes the cost of hedging. Other derivative and reserve changes related to guaranteed benefits are excluded from operating results, including the impacts related to changes in the Company's nonperformance spread;

Income (loss) related to businesses exited through reinsurance or divestment (including net investment gains (losses) on securities sold and expenses directly related to these transactions);

Income (loss) attributable to noncontrolling interest;

Income (loss) related to early extinguishment of debt;

Impairment of goodwill, value of management contract rights and value of customer relationships acquired;

Immediate recognition of net actuarial gains (losses) related to the Company's pension and other postretirement benefit obligations and gains (losses) from plan amendments and curtailments; and

Other items, including restructuring expenses (severance, lease write-offs, etc.), certain third-party expenses and deal incentives related to the divestment of the Company by ING Group, and expenses associated with the rebranding of Voya Financial, Inc. from ING U.S., Inc.

Operating earnings before income taxes also does not reflect the results of operations of the Company's CBVA segment, since this segment is managed to focus on protecting regulatory and rating agency capital rather than achieving operating metrics. When the Company presents the adjustments to Income (loss) before income taxes on a consolidated basis, each adjustment excludes the relative portions attributable to the Company's CBVA segment.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The summary below reconciles operating earnings before income taxes for the segments to Income (loss) before income taxes for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Retirement and Investment Solutions:				
Retirement	\$80.5	\$117.2	\$333.4	\$367.9
Annuities	50.5	78.3	180.1	197.3
Investment Management	45.6	58.6	139.5	163.3
Insurance Solutions:				
Individual Life	(10.8) 39.8	70.3	134.3
Employee Benefits	44.2	37.0	122.5	91.7
Total Ongoing Business	210.0	330.9	845.8	954.5
Corporate	(75.6) (47.1) (177.1) (122.7
Closed Blocks:				
Closed Block Institutional Spread Products	4.0	8.5	12.3	20.5
Closed Block Other	(1.4) 2.0	8.1	1.4
Closed Blocks	2.6	10.5	20.4	21.9
Total operating earnings before income taxes	137.0	294.3	689.1	853.7
Adjustments:				
Closed Block Variable Annuity	(7.1) 136.0	144.0	78.1
Net investment gains (losses) and related charges and adjustments	(64.6) 43.4	(23.6) 174.0
Net guaranteed benefit hedging gains (losses) and related charges and adjustments	(31.7) 33.4	(54.3) 19.5
Loss related to businesses exited through reinsurance or divestment	(16.4) (31.9) (65.1) (69.3
Income (loss) attributable to noncontrolling interest	75.9	116.6	183.9	296.7
Loss related to early extinguishment of debt	(0.2) —	(10.1) —
Other adjustments to operating earnings	(12.6) (32.0) (36.1) (65.6
Income (loss) before income taxes	\$80.3	\$559.8	\$827.8	\$1,287.1

Operating revenues is a measure of the Company's segment revenues. Each segment's Operating revenues are calculated by adjusting Total revenues to exclude the following items:

Net realized investment gains (losses) and related charges and adjustments include gains (losses) on the sale of securities, impairments, changes in the fair value of investments using the FVO unrelated to the implied loan-backed security income recognition for certain mortgage-backed obligations and changes in the fair value of derivative instruments, excluding realized gains (losses) associated with swap settlements and accrued interest. These are net of related amortization of unearned revenue;

Gain (loss) on change in fair value of derivatives related to guaranteed benefits include changes in the fair value of derivatives related to guaranteed benefits, less the estimated cost of these benefits. The estimated cost, which is

reflected in operating results, reflects the expected cost of these benefits if markets perform in line with the Company's long-term expectations and includes the cost of hedging. Other derivative and reserve changes related to guaranteed benefits are excluded from operating revenues, including the impacts related to changes in the Company's nonperformance spread;

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Revenues related to businesses exited through reinsurance or divestment (including net investment gains (losses) on securities sold and expenses directly related to these transactions);

Revenues attributable to noncontrolling interest; and

Other adjustments to Operating revenues primarily reflect fee income earned by the Company's broker-dealers for sales of non-proprietary products, which are reflected net of commission expense in the Company's segments' operating revenues, as well as other items where the income is passed on to third parties.

Operating revenues also do not reflect the revenues of the Company's CBVA segment, since this segment is managed to focus on protecting regulatory and rating agency capital rather than achieving operating metrics. When the Company presents the adjustments to total revenues on a consolidated basis, each adjustment excludes the relative portions attributable to the Company's CBVA segment.

The summary below reconciles operating revenues for the segments to Total revenues for the periods indicated:

	Three Months Ended September		Nine Months Ended September	
	30, 2015	2014	30, 2015	2014

16. Condensed Consolidating Financial Information

The accompanying condensed consolidating financial information has been prepared and presented pursuant to SEC Regulation S-X, Rule 3-10, "Financial Statements of Guarantors and Issuers of Guaranteed Securities Registered or Being Registered" ("Rule 3-10"). The condensed consolidating financial information presents the financial position of Voya Financial, Inc. ("Parent Issuer"), Voya Holdings ("Subsidiary Guarantor") and all other subsidiaries ("Non-Guarantor Subsidiaries") of the Company as of September 30, 2015 and December 31, 2014, and their results of operations, comprehensive income and cash flows for the nine months ended September 30, 2015 and 2014.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The 5.5% senior notes due 2022, the 2.9% senior notes due 2018 and the 5.7% senior notes due 2043 (collectively, the "Senior Notes") and the 5.65% fixed-to-floating rate junior subordinated notes due 2053 (the "Junior Subordinated Notes"), each issued by Parent Issuer, are fully and unconditionally guaranteed by Subsidiary Guarantor, a 100% owned subsidiary of Parent Issuer. No other subsidiary of Parent Issuer guarantees the Senior Notes or the Junior Subordinated Notes. Rule 3-10(h) provides that a guarantee is full and unconditional if, when the issuer of a guaranteed security has failed to make a scheduled payment, the guarantor is obligated to make the scheduled payment immediately and, if it does not, any holder of the guaranteed security may immediately bring suit directly against the guarantor for payment of amounts due and payable. In the event that Parent Issuer does not fulfill the guaranteed obligations, any holder of the Senior Notes or the Junior Subordinated Notes may immediately bring a claim against Subsidiary Guarantor for amounts due and payable. See the Insurance Subsidiaries Note to these Condensed Consolidated Financial Statements for information on any significant restrictions on the ability of the Parent Issuer or Subsidiary Guarantor to obtain funds from the Non-Guarantor Subsidiaries by dividend or return of capital.

The following condensed consolidating financial information is presented in conformance with the components of the Condensed Consolidated Financial Statements. Investments in subsidiaries are accounted for using the equity method for purposes of illustrating the consolidating presentation. Equity in the subsidiaries is therefore reflected in the Parent Issuer's and Subsidiary Guarantor's Investment in subsidiaries and Equity in earnings of subsidiaries. Non-Guarantor Subsidiaries represent all other subsidiaries on a combined basis. The consolidating adjustments presented herein eliminate investments in subsidiaries and intercompany balances and transactions.

Voya Financial, Inc.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
(Dollar amounts in millions, unless otherwise stated)

For the purposes of the discussion in this Quarterly Report on Form 10-Q, the term Voya Financial, Inc. refers to Voya Financial, Inc. and the terms "Company," "we," "our," and "us" refer to Voya Financial, Inc. and its subsidiaries.

The following discussion and analysis presents a review of our consolidated results of operations for the three and nine months ended September 30, 2015 and 2014 and financial condition as of September 30, 2015 and December 31, 2014. This item should be read in its entirety and in conjunction with the Condensed Consolidated Financial Statements and related notes contained in Part I, Item 1. of this Form 10-Q, as well as "Management's Discussion and Analysis of Financial Condition and Results of Operations" section contained in our Annual Report on Form 10-K for the year ended December 31, 2014 ("Annual Report on Form 10-K").

In addition to historical data, this discussion contains forward-looking statements about our business, operations and financial performance based on current expectations that involve risks, uncertainties and assumptions. Actual results may differ materially from those discussed in the forward-looking statements as a result of various factors. See the Note Concerning Forward-Looking Statements. Investors are directed to consider the risks and uncertainties discussed in Part II, Item 1A. of this Form 10-Q, as well as in other documents we have filed with the Securities and Exchange Commission ("SEC").

Overview

Prior to April 20, 2015, we provided our principal products and services in three ongoing businesses—Retirement Solutions, Investment Management and Insurance Solutions—and reported our results for the ongoing businesses through five segments. Effective April 20, 2015, we provide our principal products and services in two ongoing businesses ("Ongoing Business")—Retirement and Investment Solutions; and Insurance Solutions. This change did not affect our five ongoing operating segments.

The Retirement and Investment Solutions business provides its products and services through three segments: Retirement, Annuities and Investment Management:

Our Retirement segment provides tax-deferred, employer-sponsored retirement savings plans and administrative services to corporate, education, healthcare, other non-profit and government entities. Our Retirement segment also provides individual retirement accounts ("IRAs") and other retail financial products as well as comprehensive financial advisory services to individual customers as well as pension risk transfer solutions to institutional customers. Our retirement products and services are distributed through multiple intermediary channels, including third-party administrators ("TPAs"), independent and national wirehouse affiliated brokers and registered investment advisors, in addition to independent sales agents and consulting firms. We also have a direct sales team for large defined contribution plans and the stable value business, as well as a team of affiliated brokers who sell our products both in person and via telephone.

Our Annuities segment provides fixed, indexed and structured annuities, tax-qualified mutual fund custodial products and payout annuities for pre-retirement wealth accumulation and postretirement income management. Annuity products are primarily distributed by independent marketing organizations, independent broker-dealers, banks, independent insurance agents, pension professionals and affiliated broker-dealers.

Our Investment Management segment provides investment products and retirement solutions to both individual and institutional customers by offering domestic and international fixed income, equity, multi-asset and alternative products and solutions across a range of geographies, market sectors, investment styles and capitalization spectrums. Investment Management products and services are primarily marketed to institutional clients, including public, corporate and union retirement plans, endowments and foundations and insurance companies, as well as individual investors and the general accounts of our insurance company subsidiaries. Investment Management products and

services are distributed through a combination of our direct sales force, consultant channel and intermediary partners (such as banks, broker-dealers and independent financial advisers).

The Insurance Solutions business provides its products and services through two segments: Individual Life and Employee Benefits:

Our Individual Life segment provides wealth accumulation, protection and transfer opportunities through universal, variable and term life products. Our customers range across a variety of age groups and income levels. We primarily distribute our product offerings through a network of independent general agents and managing directors ("Aligned Distributors"), who are committed to promoting Voya products to independent agents and advisors. Aligned Distributors receive higher levels of service, and access to proprietary tools and training. We also support other independent general agents and marketing organizations who sell a broad portfolio of products from various carriers including Voya branded life, annuity and mutual funds.

Our Employee Benefits segment provides stop loss, group life, voluntary employee-paid and disability products to mid-sized and large businesses. We reinsure substantially all of our new disability sales to a third-party. To distribute our products we utilize brokers, consultants, TPAs and private exchanges. In the voluntary market, policies are marketed to employees at the worksite through enrollment firms, technology partners and brokers.

In addition to our Ongoing Business, we also have Corporate and Closed Blocks segments. Corporate includes our corporate operations and corporate level assets and financial obligations. The Corporate segment includes investment income on assets backing surplus in excess of amounts held at the segment level, financing and interest expenses, and other items not allocated to segments, including items such as expenses of our Strategic Investment Program (described below), certain expenses and liabilities of employee benefit plans and intercompany eliminations.

Closed Blocks consist of three separate reporting segments that include run-off and legacy business lines that are no longer being actively marketed or sold. Accordingly, these segments have been classified as closed blocks and are managed separately from our Ongoing Business.

The Closed Block Variable Annuity ("CBVA") segment consists of variable annuity contracts that were designed to offer long-term savings products in which individual contract owners made deposits that are maintained in separate accounts. These products included options for policyholders to purchase living benefit riders. In 2009, we separated our CBVA segment from our other operations, placing it in run-off, and made a strategic decision to stop actively writing new retail variable annuity products with substantial guarantee features (the last policies were issued in early 2010 and the block shifted to run-off).

The Closed Block Institutional Spread Products segment historically issued guaranteed investment contracts ("GICs") and funding agreements and invested amounts raised to earn a spread. While the business in the Closed Block Institutional Spread Products segment is being managed in active run-off, we continue to issue liabilities from time to time to replace liabilities that are maturing.

The Closed Block Other segment consists primarily of retained and run-off activity related to divestments, including our group reinsurance and individual reinsurance businesses.

Revision of Previously Issued Financial Statements

As part of our ongoing process of validating actuarial models, we identified during the second quarter of 2015 improper inputs to the calculation of the estimated fair value of the embedded derivative in certain of our guaranteed minimum withdrawal benefits with life payouts ("GMWBL") products. The products are included in our CBVA segment, and are no longer offered by the Company. The errors affected our financial statements prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") for periods prior to and including the three months ended March 31, 2015, and did not impact regulatory or rating agency capital. The errors did not affect our variable annuity policyholders in any manner.

Based on an analysis of quantitative and qualitative factors in accordance with SEC Staff Accounting Bulletins 99 and 108, we have concluded that these errors were not material to the consolidated financial position, results of operations or cash flows as presented in our quarterly and annual financial statements that have been previously filed in our

Quarterly Reports on Form 10-Q and Annual Reports on Form 10-K. As a result, amendment of such reports is not required. In preparing our Condensed Consolidated Financial Statements for the three and six months ended June 30, 2015 and the three and nine months ended September 30, 2015, we have made appropriate revisions to our financial statements for historical periods. Such changes are reflected in the financial results for the three and nine months ended September 30, 2014 and as of December 31, 2014 included in the interim financial statements in this Quarterly Report on Form 10-Q and discussed in this Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), and will also be reflected in the historical financial results included in the Company's subsequent quarterly and annual consolidated financial statements.

See the "Revision of Previously Issued Financial Statements" section in the Business, Basis of Presentation and Significant Accounting Policies Note in our Condensed Consolidated Financial Statements in Part I, Item 1. of this Quarterly Report on Form 10-Q for more information.

Trends and Uncertainties

Throughout this MD&A, we discuss a number of trends and uncertainties that we believe may materially affect our future liquidity, financial condition or results of operations. Where these trends or uncertainties are specific to a particular aspect of our business, we often include such a discussion under the relevant caption of this MD&A, as part of our broader analysis of that area of our business. In addition, the following factors represent some of the key general trends and uncertainties that have influenced the development of our business and our historical financial performance and that we believe will continue to influence our business and financial performance in the future.

Market Conditions

While extraordinary monetary accommodation has suppressed volatility in rate, credit and domestic equity markets for an extended period, we are cognizant of the potential for an increase in volatility upon the normalization of monetary policy. More recently we have seen a spike in volatility in both credit and equity markets primarily as a result of heightened concern around the health of economic activity in China and, by extension, global economic conditions. In the short- to medium-term, the potential for increased volatility, coupled with prevailing low interest rates, can pressure sales and reduce demand as consumers hesitate to make financial decisions. In addition, this environment could make it difficult to manufacture products that are consistently both attractive to customers and profitable. Financial performance can be adversely affected by market volatility as fees driven by assets under management ("AUM") fluctuate, hedging costs increase and revenue declines due to reduced sales and increased outflows. In the long-term, however, we believe the financial crisis of 2008-2009 ("financial crisis") and resultant lingering uncertainty will motivate individuals to seek solutions combining elements of capital preservation, income and growth. Thus, as a company with strong retirement, investment management and insurance capabilities, we believe current market conditions may ultimately enhance the attractiveness of our broad portfolio of products and services. We will need to continue to monitor the behavior of our customers and other factors, including mortality rates, morbidity rates, annuitization rates and lapse rates, which adjust in response to changes in market conditions in order to ensure that our products and services remain attractive as well as profitable.

Interest Rate Environment

After generally moving modestly higher in the first half of 2015, yields across most high quality fixed income classes were relatively unchanged in the third quarter of 2015, and remain at levels that are still low by historical standards. The possibility that the Federal Reserve Board in the United States will begin normalization of monetary policy through an increase in the federal funds rate may impact both the level and volatility of long term interest rates. The timing and impact of any such increases in the federal fund rate are uncertain, depending on the Federal Reserve Board's assessment of economic growth, development in labor markets, inflation and other risks.

The continued low interest rate environment has affected and may continue to affect the demand for our products in various ways. While interest rates remain low, we may experience lower sales and reduced demand as it is more difficult to manufacture products that are consistently both attractive to customers and profitable. Our financial performance may also be adversely affected by the current low interest rate environment. The interest rate environment has historically influenced our business and financial performance, and we believe it will continue to do so in the future for several reasons, including the following:

Our general account investment portfolio, which was approximately \$89.0 billion as of September 30, 2015, consists predominantly of fixed income investments and currently has an average yield of approximately 5.0%. In the near

term and absent further material change in yields available on fixed income investments, we expect the yield we earn on new investments will be lower than the yields we earn on maturing investments, which were generally purchased in environments where interest rates were higher than current levels. We currently anticipate that proceeds that are reinvested in fixed income investments in the remainder of 2015 will earn an average yield in the range of 4.00% to 4.25%. If interest rates were to rise, we expect the yield on our new money investments would also rise and gradually converge toward the yield of those maturing assets. In addition, while less material to financial results than new money investment rates, movements in prevailing interest rates also influence the prices of fixed income investments that we sell on the secondary market rather than holding until maturity or repayment, with rising interest rates generally leading to lower prices in the secondary market, and falling interest rates generally leading to higher prices.

Certain of our products pay guaranteed minimum rates. For example, fixed accounts and a portion of the stable value accounts included within defined contribution retirement plans, universal life ("UL") policies and individual fixed annuities include guaranteed minimum credited rates. We are required to pay these guaranteed minimum rates even if earnings on our investment portfolio decline, with the resulting investment margin compression negatively impacting earnings. In addition, we expect more policyholders to hold policies (lower lapses) with comparatively high guaranteed rates longer in a low interest rate environment. Conversely, a rise in average yield on our investment portfolio would positively impact earnings if the average interest rate we pay on our products does not rise correspondingly. Similarly, we expect policyholders would be less likely to hold policies (higher lapses) with existing guarantees as interest rates rise.

Our CBVA segment provides certain guaranteed minimum benefits. A prolonged low interest rate environment may subject us to increased hedging costs or an increase in the amount of statutory reserves that our insurance subsidiaries are required to hold for these variable annuity guarantees, lowering their statutory surplus, which would adversely affect their ability to pay dividends to us. A prolonged low interest rate environment may also affect the perceived value of guaranteed minimum income benefits, which in turn may lead to a higher rate of annuitization of those products over time.

For additional information on our sensitivity to interest rates, see Quantitative and Qualitative Disclosure About Market Risk in Part I, Item 3. of this Quarterly Report on Form 10-Q.

In the long-term, however, we believe the financial crisis and resultant lingering uncertainty will motivate individuals to seek solutions combining elements of capital preservation, income and growth and enhance the attractiveness of our broad portfolio of products and services.

The Impact of our CBVA Segment on U.S. GAAP Earnings

Our ongoing management of our CBVA segment is focused on preserving our current capitalization status through careful risk management and hedging. Because U.S. GAAP accounting differs from the methods used to determine regulatory and rating agency capital measures, our hedge programs may create earnings volatility in our U.S. GAAP financial statements.

Governmental and Public Policy Impact on Demand for Our Products

The demand for our products is influenced by a dynamic combination of governmental and public policy factors. We anticipate that legislative and other governmental activity and our ability to flexibly respond to changes resulting from such activity will be crucial to our long-term financial performance. In particular, the demand for our products is influenced by the following factors:

Availability and quality of public retirement solutions: The lack of comprehensive or sufficient government-sponsored retirement solutions has been a significant driver of the popularity of private sector retirement products. We believe that concerns regarding Social Security and the reduced enrollment in defined benefit retirement plans may further increase the demand for private sector retirement solutions. The impact of any legislative actions or new government programs relating to retirement solutions on our business and financial performance will depend substantially on the level of private sector involvement and our ability to participate in any such programs. We believe we are well positioned to take advantage of any future developments involving participation in any such programs by private sector providers.

Tax-advantaged status: Many of the retirement savings, accumulation and protection products we sell qualify for tax-advantaged status. Changes in U.S. tax laws that alter the tax benefits of certain investment vehicles could have a material effect on demand for our products.

Increasing Longevity and Aging of the U.S. Population

We believe that the increasing longevity and aging of the U.S. population will affect (i) the demand, types of and pricing for our products and (ii) the levels of our AUM and assets under administration ("AUA"). As the "baby boomer" generation prepares for a longer retirement, we believe that demand for retirement savings, growth and income products will grow. The impact of this growth may be offset to some extent by asset outflows as an increasing percentage of the population begins withdrawing assets to convert their savings into income.

Competition

Our Ongoing Business operates in highly competitive markets. We face a variety of large and small industry participants, including diversified financial institutions, investment managers and insurance companies. These companies compete in one form or another for the growing pool of retirement assets driven by a number of exogenous factors such as the continued aging of the U.S. population

and the reduction in safety nets provided by governments and corporations. In many segments, product differentiation is difficult as product development and life cycles have shortened. In addition, we have experienced pressure on fees as product unbundling and lower cost alternatives have emerged. As a result, scale and the ability to provide value-added services and build long-term relationships are important factors to compete effectively. We believe that our leading presence in the retirement market and resulting relationships with millions of participants, diverse range of capabilities (as a provider of retirement, investment management and insurance products and services) and broad distribution network uniquely position us to effectively serve consumers' increasing demand for retirement savings, income and protection solutions.

Seasonality and Other Quarterly Matters

Our business results can vary from quarter to quarter as a result of seasonal factors. For all of our segments, the first quarter of each year typically has elevated operating expenses, reflecting higher payroll taxes and certain other expenses that tend to be concentrated in the first quarters. The effects of expense seasonality may be less during 2015 than previous years due to the timing of investments to support new product launches and distribution expansion. Additionally, alternative investment income tends to be lower in the first quarters. Other seasonal factors that affect the reporting segments making up our Ongoing Business include:

Retirement

The first quarters tend to have the highest level of recurring deposits in Corporate Markets, due to the increase in participant contributions from the receipt of annual bonus award payments or annual lump sum matches and profit sharing contributions made by many employers. Corporate Market withdrawals also tend to increase in the first quarters as departing sponsors change providers at the start of a new year.

In the third quarters, education tax-exempt markets typically have the lowest recurring deposits.

The fourth quarters tend to have the highest level of single/transfer deposits due to new Corporate Market plan sales as sponsors transfer from other providers when contracts expire at the fiscal or calendar year-end. Recurring deposits in the Corporate Market may be lower in the fourth quarters as higher paid participants scale back or halt their contributions upon reaching the annual maximums allowed for the year. Finally, Corporate Market withdrawals tend to increase in the fourth quarters, as in the first quarters, due to departing sponsors.

Investment Management

The first quarters tend to have lower investment income from carried interest income recorded from investments in private equity, and also tend to have the lowest performance fees.

In the fourth quarters, performance fees are typically higher due to certain performance fees being associated with calendar-year performance against established benchmarks and hurdle rates.

Individual Life

The fourth quarters tend to have the highest levels of universal life insurance sales. This seasonal pattern is typical for the industry.

Employee Benefits

The first quarters tend to have the highest Group Life loss ratio. There are a number of factors that might contribute to this trend, such as delayed claims filings during the end of calendar year holiday season. Sales for Group Life and Stop Loss also tend to be the highest in the first quarters, as most of our contracts have January start dates in alignment with the start of our clients' fiscal years.

The third quarters tend to have the second highest Group Life and Stop Loss sales, as a large number of our contracts have July start dates in alignment with the start of our clients' fiscal years.

In addition to these seasonal factors, our results are impacted by the annual review of assumptions related to policyholder liabilities and deferred policy acquisition costs ("DAC"), value of business acquired ("VOBA")

(collectively, "DAC/VOBA") and other intangibles, which we generally complete in the third quarter of each year, and annual remeasurement related to our employee benefit plans, which we generally complete in the fourth quarter of each year.

Strategic Investment Program

On June 2, 2015, we announced that we would incur \$350.0 million of expenses over the next four years as it relates to IT simplification, digital and analytics and cross-enterprise initiatives ("Strategic Investment Program"). During the fourth quarter of 2015, we expect to incur approximately \$25 million to \$35 million of expenses on these projects. For the nine months ended September 30, 2015, we incurred \$44.8 million of expenses related to the Strategic Investment Program, which are reported in the Corporate segment.

Operating Measures

This MD&A includes a discussion of Operating earnings before income taxes and Operating revenues, each of which is a measure that is not determined in accordance with U.S. GAAP, because our management uses these measures to manage our businesses and allocate our resources. We generally use these measures to provide our investors with useful information regarding our financial performance. In particular, these measures facilitate a comparison of period-to-period results without the effect of the volatility created by certain changes in the financial markets that affect our financial results as reported under U.S. GAAP. Other companies may use similarly titled non-U.S. GAAP financial measures that are calculated differently from the way we calculate such measures, and accordingly, our non-U.S. GAAP financial measures may not be comparable to similar measures used by other companies.

We also discuss certain operating measures, described below, as well as Operating earnings before income taxes and Operating revenues, which provide useful information about our Ongoing Business and the operational factors underlying our financial performance. See the Segments Note to these Condensed Consolidated Financial Statements in Part I, Item 1. of this Quarterly Report on Form 10-Q for a description of the adjustments made to reconcile Income (loss) before income taxes to Total operating earnings before income taxes and the adjustments made to reconcile Total revenues to Total operating revenues.

AUM and AUA

A substantial portion of our fees, other charges and margins are based on AUM. AUM represents on-balance sheet assets supporting customer account values/liabilities and surplus as well as off-balance sheet institutional/mutual funds. Customer account values reflect the amount of policyholder equity that has accumulated within retirement, annuity and UL products. AUM includes general account assets managed by our Investment Management segment in which we bear the investment risk, separate account assets in which the contract owner bears the investment risk and institutional/mutual funds, which are excluded from our balance sheets. AUM-based revenues increase or decrease with a rise or fall in the amount of AUM, whether caused by changes in capital markets or by net flows.

AUM is principally affected by net deposits (i.e., new deposits, less surrenders and other outflows) and investment performance (i.e., interest credited to contract owner accounts for assets that earn a fixed return or market performance for assets that earn a variable return). Separate account AUM and institutional/mutual fund AUM include assets managed by our Investment Management segment, as well as assets managed by third-party investment managers. Our Investment Management segment reflects the revenues earned for managing affiliated assets for our other segments as well as assets managed for third parties.

AUA represents accumulated assets on contracts pursuant to which we either provide administrative services or product guarantees for assets managed by third parties. These contracts are not insurance and assets are excluded from the Condensed Consolidated Financial Statements. Fees earned on AUA are generally based on the number of participants, asset levels and/or the level of services or product guarantees that are provided.

Our consolidated AUM/AUA includes eliminations of AUM/AUA managed by our Investment Management segment that is also reflected in other segments' AUM/AUA and adjustments for AUM not reflected in any segments.

Sales Statistics

In our discussion of our segment results under "Results of Operations—Segment by Segment," we sometimes refer to sales activity for various products. The term "sales" is used differently for different products, as described more fully below. These sales statistics do not correspond to revenues under U.S. GAAP and are used by us as operating measures underlying our financial performance.

Net flows are deposits less redemptions (including benefits and other product charges).

Sales for Individual Life products are based on a calculation of weighted average annual premiums ("WAP"). Sales for Employee Benefits products are based on a calculation of annual premiums, which represents regular premiums on new policies, plus a portion of new single premiums.

WAP is defined as the amount of premium for a policy's first year that is eligible for the highest first year commission rate, plus a varying portion of any premium in excess of this base amount, depending on the product. WAP is a key measure of recent sales performance of our products and is an indicator of the general growth or decline in certain lines of business. WAP is not equal to premium revenue under U.S. GAAP. Renewal premiums on existing policies are included in U.S. GAAP premium revenue in addition to first year premiums and thus changes in persistency of existing in-force business can potentially offset growth from current year sales.

Total gross premiums and deposits are defined as premium revenue and deposits for policies written and assumed. This measure provides information as to growth and persistency trends related to premium and deposits.

Other Measures

Total annualized in-force premiums are defined as a full year of premium at the rate in effect at the end of the period. This measure provides information as to the growth and persistency trends in premium revenue.

Interest adjusted loss ratios are defined as the ratio of benefits expense to premium revenue exclusive of the discount component in the change in benefit reserve. This measure reports the loss ratio related to mortality on life products and morbidity on health products.

In-force face amount is defined as the total life insurance coverage in effect as of the end of the period presented for business written and assumed. This measure provides information as to changes in policy growth and persistency with respect to death benefit coverage.

In-force policy count is defined as the number of policies written and assumed with coverage in effect as of the end of the period. This measure provides information as to policy growth and persistency.

New business policy count (paid) is defined as the number of policies issued during the period for which initial premiums have been paid by the policyholder. This measure provides information as to policy growth from sales during the period.

Results of Operations - Company Condensed Consolidated

The following table presents summary condensed consolidated financial information for the periods indicated:

(\$ in millions)	Three Months Ended September		Nine Months Ended September	
	30, 2015	2014	30, 2015	2014
Revenues:				
Net investment income	\$1,126.7	\$1,163.6	\$3,435.3	\$3,430.1
Fee income	871.8	908.9	2,644.0	2,738.0
Premiums	1,128.8	595.1	2,404.8	1,825.4
Net realized capital gains (losses)	299.1	186.0	39.3	(365.1)
Other revenue	106.7	101.0	315.3	316.8
Income (loss) related to consolidated investment entities:				
Net investment income	175.4	248.0	529.3	630.0
Changes in fair value related to collateralized loan obligations	11.0	(6.5)	(23.6)	(4.1)
Total revenues	3,719.5	3,196.1	9,344.4	8,571.1
Benefits and expenses:				
Interest credited and other benefits to contract owners/policyholders	2,454.8	1,732.9	5,275.5	4,396.2
Operating expenses	750.9	767.3	2,290.7	2,315.1
Net amortization of Deferred policy acquisition costs and Value of business acquired	316.3	30.6	587.5	272.4
Interest expense	46.4	47.2	150.4	142.3
Operating expenses related to consolidated investment entities:				
Interest expense	66.7	56.6	203.9	152.3
Other expense	4.1	1.7	8.6	5.7
Total benefits and expenses	3,639.2	2,636.3	8,516.6	7,284.0
Income (loss) before income taxes	80.3	559.8	827.8	1,287.1
Income tax expense (benefit)	(35.9)	37.4	128.8	74.2
Net income (loss)	116.2	522.4	699.0	1,212.9
Less: Net income (loss) attributable to noncontrolling interest	75.9	116.6	183.9	296.7
Net income (loss) available to our common shareholders	\$40.3	\$405.8	\$515.1	\$916.2

The following table presents AUM and AUA as of the dates indicated:

(\$ in millions)	September 30, 2015	2014
AUM and AUA:		
Retirement and Investment Solutions:		
Retirement	\$288,349.7	\$348,593.7
Annuities	26,700.9	26,790.1
Investment Management	249,439.0	259,757.3
Insurance Solutions:		
Individual Life	15,485.9	16,118.7
Employee Benefits	1,809.7	1,796.8
Eliminations/Other	(171,336.4) (179,064.2
Total Ongoing Business	410,448.8	473,992.4
Closed Blocks:		
Closed Block Variable Annuity	38,229.2	43,550.2
Closed Block Institutional Spread Products	1,509.9	1,767.9
Closed Block Other	214.9	532.5
Total Closed Blocks	39,954.0	45,850.6
Total AUM and AUA	\$450,402.8	\$519,843.0
AUM	268,932.9	279,021.5
AUA	181,469.9	240,821.5
Total AUM and AUA	\$450,402.8	\$519,843.0

The following table presents the relative contributions of each segment to Operating earnings before income taxes for the periods indicated and a reconciliation of Operating earnings before income taxes to Income (loss) before income taxes:

(\$ in millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Retirement and Investment Solutions:				
Retirement	\$80.5	\$117.2	\$333.4	\$367.9
Annuities	50.5	78.3	180.1	197.3
Investment Management	45.6	58.6	139.5	163.3
Insurance Solutions:				
Individual Life	(10.8) 39.8	70.3	134.3
Employee Benefits	44.2	37.0	122.5	91.7
