1 Refer to “Earnings per share (EPS) and shares outstanding” in the “Consolidated financial information” section of this report for more information. 2 Refer to the “Measurement of performance” section of our Annual Report 2017 for the definitions of our key performance indicators. 3 Calculated as adjusted operating expenses / adjusted operating income before credit loss (expense) or recovery. 4 Based on the Swiss systemically relevant bank framework as of 1 January 2020. Refer to the “Capital management” section of this report for more information. 5 Calculated as operating income before credit loss (annualized as applicable) / average risk-weighted assets and average leverage ratio denominator, respectively. 6 Refer to the “Balance sheet, liquidity and funding management” section of this report for more information. 7 Includes invested assets for Personal & Corporate Banking. 8 Refer to “UBS shares” in the “Capital management” section of this report for more information. 9 Total book value per share and tangible book value per share in Swiss francs are calculated based on a translation of equity under our US dollar presentation currency. As a consequence of the restatement to a US dollar presentation currency, amounts may differ from those originally published in our quarterly and annual reports.

Changes to our functional and presentation currencies

Effective from 1 October 2018, the functional currency of UBS Group AG and UBS AG’s Head Office in Switzerland changed from Swiss francs to US dollars and that of UBS AG’s London Branch from British pounds to US dollars, in compliance with the requirements of International Accounting Standard (IAS) 21, *The Effects of Changes in Foreign Exchange Rates*. The presentation currency of UBS Group AG’s consolidated financial information, beginning with this fourth quarter 2018 report, has changed from Swiss francs to US dollars to align with the functional currency changes of significant group entities. Prior periods have been restated for this change in presentation currency. Assets, liabilities and total equity were converted to US dollars at closing exchange rates prevailing on the respective balance sheet dates, and income and expenses were translated at the respective average rates prevailing for the

relevant periods.

Recent developments

Recent developments

Changes to our functional and presentation currencies

As a consequence of many legal entity structural changes over recent years – notably the transfer of our Personal & Corporate Banking and Global Wealth Management businesses booked in Switzerland from UBS AG to UBS Switzerland AG and the creation of UBS Business Solutions AG, which houses a significant portion of the employees and associated costs that were previously held in UBS AG’s Head Office in Switzerland and UBS AG’s London branch – there is now a concentration of US dollar-influenced and -managed business activities in UBS AG’s Head Office in Switzerland and UBS AG’s London Branch. In addition, from the fourth quarter of 2018, for risk management purposes we adopted the US dollar as our risk neutral currency and have adjusted our structural risk positions accordingly. As a result of these changes, effective from 1 October 2018, the functional currency of UBS Group AG and UBS AG’s Head Office in Switzerland changed from Swiss francs to US dollars and that of UBS AG’s London Branch from British pounds to US dollars, in compliance with the requirements of International Accounting Standard (IAS) 21, *The Effects of Changes in Foreign Exchange Rates*.

The presentation currency of UBS Group AG’s consolidated financial information, beginning with this fourth quarter report, has changed from Swiss francs to US dollars to align with the functional currency changes of significant group entities. Prior periods have been restated for this presentation currency change. Assets, liabilities and total equity were converted to US dollars at closing exchange rates prevailing on the respective balance sheet dates, and income and expenses were translated at the respective average rates prevailing for the relevant periods. Additionally, *Other income* was restated to reflect releases of foreign currency translation (FCT) gains or losses from *Other comprehensive income* (OCI) to the income statement when calculated under US dollars as the presentation currency. The effect of such restatements for the first nine months of 2018 and full year 2017 was not material to these periods. The restatement of FCT balances in OCI will be provided in the Annual Report 2018, which will be published in March 2019. We did not restate our Basel III capital information due to immateriality.

We will continue to publish select financial and regulatory information in Swiss francs as part of our quarterly and annual reporting at www.ubs.com/investors. Business division results of Personal & Corporate Banking are presented in both Swiss francs and US dollars, and its management’s discussion and analysis is provided in Swiss francs, as its business activities are mainly managed in Swiss francs.

We expect that these functional and presentation currency changes, together with the related changes to our risk management framework and certain hedging programs, should increase our reporting Group operating income by approximately USD 300 million based on market implied forwards.

Regulatory and legal developments

TBTF framework in Switzerland

In November 2018, the Swiss Federal Council adopted a revision of the Capital Adequacy Ordinance (CAO), which featured the following elements: (i) gone concern capital requirements for the three Swiss domestic systemically important banks are set at 40% of the going concern capital requirements already in force; (ii) introduction of a risk-weighting approach for the treatment of systemically important banks' participations in their subsidiaries; (iii) group entities that provide services necessary for the continuation of a bank's business processes, including UBS Business Solutions AG, will now be subject to consolidated supervision by the Swiss Financial Market Supervisory Authority (FINMA).

The Federal Council is expected to initiate a separate consultation in the first half of 2019 regarding potential revisions to the gone concern capital requirements for the two Swiss global systemically important banks, including UBS.

Separately, in December 2018 the Swiss parliament approved changes to the tax treatment of too big to fail (TBTF) instruments issued by the holding companies of Swiss systemically important banks. The related new law aims to eliminate the additional tax burden imposed on systemically important banks as a result of required issuances of TBTF instruments at the holding company level.

Once the change is effective, we will issue new loss-absorbing additional tier 1 (AT1) capital instruments and total loss-absorbing capacity (TLAC) eligible senior unsecured debt directly out of UBS Group AG. At that point, we also expect UBS Group AG to assume outstanding capital and debt instruments previously issued by UBS Group Funding (Switzerland) AG as a means to manage the aforementioned tax burden.

NSFR implementation in Switzerland

In November 2018, the Swiss Federal Council announced that it would consider finalization of the net stable funding ratio (NSFR) requirement at the end of 2019. The NSFR requirement as originally proposed in 2017 could result in a significant increase in long-term funding requirements on a legal entity level.

Adjustments to the market risk framework

The Basel Committee has issued final revisions of the market risk framework. The revisions include adjustments to the risk sensitivity of the standardized approach, the calibration of certain elements of the framework and adjustments of the internal models approach. The revised standard comes into effect on 1 January 2022 along with the overall revised Basel III capital framework.

Basel Committee developments on the leverage ratio

The Basel Committee on Banking Supervision (BCBS) consulted on a targeted and limited revision of the leverage ratio's treatment of client cleared derivatives, outlining three options, two of which would recognize initial margin offset and could lead to a reduction of the Group Leverage Ratio Denominator (LRD) compared with Basel III requirements. The BCBS is also consulting on additional leverage ratio disclosure requirements to address leverage ratio window-dressing concerns, with proposed implementation no later than 1 January 2022.

Consultation on ordinance specifying FinSA

In October 2018, the Swiss government initiated a consultation on, among other items, the proposed Financial Services Ordinance (FinSO), which would specify the details of the Financial Services Act (FinSA). The act will come into force on 1 January 2020, as would the ordinances.

FinSO, together with FinSA and the Financial Institutions Act (FinIA), would introduce new investor protection rules, including significantly enhanced information and documentation requirements. We have begun preparing for implementation of the new rules.

Proposed BEAT regulations issued

In December 2018, the US Department of Treasury issued proposed regulations in connection with the base erosion and anti-abuse tax (BEAT), which was introduced into law as part of the Tax Cuts and Jobs Act in December 2017. BEAT is calculated on modified taxable income that includes otherwise tax-deductible payments made by a US taxpayer to non-US related parties. BEAT applies in a given year when it is higher than the regular federal corporate tax for that same year. The proposed regulations clarify that payments made by a US entity to a non-US related party are not subject to BEAT provided the income from such payments is either taxable in the hands of the non-US related party as US effectively connected income or the income relates to TLAC instruments. Consistent with our previous guidance, and taking the proposed regulations into account, we do not expect to incur material BEAT expenses for the foreseeable future.

EU equivalence for Swiss trading venues

In December 2018, the European Commission (EC) extended its equivalence decision for Swiss trading venues by six months, until the end of June 2019. The EC has stated that any further extension of its equivalence decision will be contingent upon the Federal Council's endorsement of a framework agreement.

If the EC does not extend recognition of Switzerland's trading venues beyond June 2019, the Swiss contingency measure would come into effect, which would introduce a new Swiss standard recognizing non-EU foreign trading venues that admit Swiss shares to trading, but disallowing trading in Swiss shares on EU trading venues. We would then be required to significantly alter our trading arrangements, a circumstance for which we have appropriately prepared. We expect that EU trading venues would comply with the Swiss measure, resulting in a shift of liquidity in shares issued in Switzerland from EU trading venues to Swiss trading venues.

UK withdrawal from the EU

We continue to prepare for the UK withdrawal from the EU in the expectation that the UK will leave the EU at the end of March 2019. Our plans are intended to ensure that we can continue to serve our clients (including in the event the UK leaves the EU without a binding withdrawal agreement).

As the expected effective date of the UK's exit approaches, it appears increasingly likely that any transition arrangements may be significantly limited in scope and may only be agreed upon close to the exit date, if at all.

We expect to complete the previously announced combined UK business transfer and cross-border merger of UBS Limited into UBS Europe SE on 1 March 2019, or shortly thereafter. Clients and other counterparties of UBS Limited who can be serviced by UBS AG's London Branch were generally migrated to UBS AG's London Branch in the fourth quarter of 2018.

The EC has adopted an equivalence decision that will permit UK authorized central counterparties (CCPs) to continue to provide clearing services in the EU for one year in a no-deal scenario. This would allow us to maintain derivatives exposures to UK CCPs in UBS Europe SE after the business transfer and merger.

We may vary our plans depending on developments and evolving regulatory requirements.

Developments related to the transition away from IBORs

In December 2018, FINMA issued guidance on risks related to a potential replacement of the interbank offered rates (IBORs), outlining legal and valuation risks as well as risks related to operational readiness for supervised institutions. FINMA will discuss risks with supervised institutions and, from January 2019 onwards, will contact those that are particularly affected, to assess how risks related to a possible replacement of IBORs are identified, mitigated and monitored.

We have a substantial number of contracts linked to IBORs. The new risk-free Alternative Reference Rates do not provide a term structure, which will require a change in the contractual terms of products currently indexed on terms other than overnight. We have established a cross-divisional, cross-regional governance structure and change program to address the scale and complexity of the transition.

Recent developments

Other developments

Increase of stake in and consolidation of UBS Securities China

In December 2018, we increased our shareholding in UBS Securities Co. Limited (UBSS) from 24.99% to 51% by completing a share purchase from existing shareholders. As a result we have consolidated UBSS in our financial statements under International Financial Reporting Standards (IFRS) and for regulatory capital purposes.

Through the acquisition and subsequent consolidation, we remeasured our former 24.99% holding at fair value, resulting in a pre-tax loss of USD 270 million recognized in *Other income*. The remeasurement loss is treated as an adjusting item and recognized within Corporate Center – Services. Common equity tier 1 (CET1) capital is not materially affected as the loss is offset by the release of a capital deduction for goodwill related to the former holding.

Worldline's acquisition of SIX Payment Services

On 30 November 2018, SIX and Worldline entered into a strategic partnership in the cards business under which SIX transferred its existing cards business to Worldline and received a 27% stake in Worldline.

In the income statement we recognized a gain of USD 460 million based on Worldline's share price at the closing date in proportion to our 17.31% equity ownership in SIX. The gain, of which 78% is reflected in Personal & Corporate Banking and 22% in Global Wealth Management, is treated as an adjusting item. Two thirds of the gain has been recognized in CET1 capital.

IFRS 16, Leases

We have adopted IFRS 16, *Leases*, as of 1 January 2019, fundamentally changing how we account for operating leases when acting as a lessee. Upon adoption, assets and liabilities will increase by approximately USD 3.5 billion, with a corresponding increase in risk-weighted assets (RWA) and leverage ratio denominator (LRD). As permitted by IFRS 16, we elected not to restate prior period information.

Changes to performance targets,
allocations and in segment reporting in the first quarter of 2019

Changes to our performance targets

At our 2018 Investor Update we announced changes to our annual performance targets, ambitions and capital and resource guidelines effective in 2019.

The table on the next page shows these for the Group and the business divisions. Our updated targets and ambitions take into account the effects of the changes in Corporate Center allocations, equity attribution and Corporate Center segment reporting. Performance targets and ambitions exclude, where applicable, items that management believes are not representative of the underlying performance of our businesses, such as restructuring-related charges and gains and losses on sales of businesses and real estate. The performance targets assume constant foreign currency translation rates unless indicated otherwise.

Changes in Corporate Center cost and resource allocation to business divisions

In order to further align Group and divisional performance, we are adjusting our methodology for the allocation of Corporate Center – Services funding costs and expenses to the business divisions.

At the same time, we are updating our funds transfer pricing (FTP) framework to better reflect the sources and usage of funding.

Together, these changes will increase the business divisions' adjusted cost / income ratios by approximately 2 percentage points and result in an increase of approximately USD 0.7 billion in Corporate Center operating profit / (loss) before tax, offset by higher expense allocations to the business divisions.

We will retain in Corporate Center funding costs for deferred tax assets, costs relating to our legal entity transformation program and other costs not attributable to or representative of the performance of the business divisions.

Alongside the update to allocations and our FTP framework, we are increasing the allocation of balance sheet resources from Corporate Center to the business divisions. For 2018, this will result in approximately USD 26 billion of additional risk-weighted assets (RWA) and approximately USD 100 billion of additional leverage ratio denominator (LRD) allocated from Corporate Center to the business divisions, consisting of:

- approximately USD 9 billion additional RWA and LRD associated with property, equipment and software, which will be allocated from Corporate Center – Services to business divisions;
- approximately USD 14 billion of operational risk RWA previously allocated to Corporate Center – Services and Corporate Center – Group Asset and Liability Management (Group ALM); and
- incremental RWA of approximately USD 3 billion and LRD of approximately USD 90 billion moved from Corporate Center – Group ALM to the business divisions, due to an increase in the allocation of high-quality liquid assets (HQLA) to the business divisions, reflecting the HQLA levels we expect to maintain, as well as the allocation of certain other assets centrally managed on behalf of the business divisions.

Recent developments

In addition to these changes and upon adoption of IFRS 16, *Leases*, as of 1 January 2019, we intend to additionally allocate approximately USD 3.5 billion of RWA and LRD from Corporate Center to the business divisions.

All of these changes are effective as of 1 January 2019 and we will provide restated prior-period information in advance of our first quarter results.

Alignment with the revised resource allocation methodology and further changes to our equity attribution framework

The aforementioned changes in resource allocation from Corporate Center to the business divisions will be reflected in the equity attribution to the business divisions. Furthermore, we are updating our equity attribution framework, revising the capital ratio for RWA from 11% to 12.5% and allocating to business divisions approximately USD 3 billion of attributed equity, which is related to certain common equity tier 1 (CET1) deduction items which were previously held centrally. In aggregate, we expect to allocate approximately USD 7.5 billion of additional attributed equity to the business divisions, of which approximately USD 3 billion will be allocated to the Investment Bank. The remaining attributed equity retained in Corporate Center will primarily relate to deferred tax assets, dividend accruals and Corporate Center – Non-core and Legacy Portfolio.

All of these changes are effective as of 1 January 2019 and we will provide restated prior-period information in advance of our first quarter results.

Changes in Corporate Center segment reporting

As announced in our third quarter 2018 report, as of 1 January 2019, we no longer separately assess the performance of Non-core and Legacy Portfolio, given its substantially reduced size and resource consumption. In addition, following the aforementioned changes to our methodology for allocating funding costs and expenses from Corporate Center – Services and Corporate Center – Group ALM to the business divisions, the operating loss retained in Corporate Center – Services and Corporate Center – Group ALM will be significantly reduced. As a consequence and in compliance with IFRS 8, *Operating Segments*, beginning with our first quarter 2019 report, we will provide results for total Corporate Center only and will not separately report Group ALM and Non-core and Legacy Portfolio. Furthermore, we will combine Group Treasury with Group ALM and the net retained operating income from our Group Treasury operations, including Group ALM, will be reported as a separate line item within Corporate Center; management's discussion and analysis for Group Treasury performance will be included in the Corporate Center section of our quarterly and annual reporting. Prior-period information will be restated.

Targets, ambitions and capital and resource guidelines 2019-2021

		Targets		Ambitions	Capital / resource guidelines

1 Net profit attributable to shareholders divided by average common equity tier 1 (CET1) capital. **2** Adjusted operating expenses divided by adjusted operating income before credit loss expense or recovery. Refer to the "Group Performance" section of this report and the UBS Group Annual Report 2017 for information on adjusting items. **3** CET1 capital divided by risk-weighted assets (RWA) calculated in accordance with the Basel III framework as applicable to Swiss systemically relevant banks (SRBs). **4** CET1 capital divided by leverage ratio denominator (LRD) calculated in accordance with Swiss SRB rules applicable as of 1

January 2020. **5** Business division adjusted profit before tax for the current period divided by business division adjusted profit before tax of comparison period, expressed as a percentage growth. For Asset Management, this metric excludes the impact of business exits. For Personal & Corporate Banking, it is measured in Swiss francs. **6** Over the cycle. **7** Business division adjusted operating expenses divided by business division adjusted operating income before credit loss expense or recovery expressed as a percentage. **8** Net new money for the current period (annualized as applicable), divided by invested assets at the beginning of the period, expressed as a percentage. For Asset Management, this metric excludes money markets from both numerator and denominator. **9** Business division adjusted operating profit before tax (annualized as applicable) divided by average attributed equity. Refer to “Equity attribution and return on attributed equity” in the “Capital management” section of this report for information on the attributed equity framework and to “Changes in Corporate Center cost allocations and equity attribution to business divisions as of the first quarter of 2019” in this section for changes to the framework effective 2019. **10** Repositioned from a minimum return to a performance target. **11** RWA or LRD attributed to the Investment Bank divided by total Group RWA or LRD, as applicable. Refer to the “Capital management” section of this report for information on RWA and LRD.

Group performance

Results: 2018

We recorded net profit attributable to shareholders of USD 4,897 million in 2018, which included a net tax expense of USD 1,468 million. In 2017, net profit attributable to shareholders was USD 969 million, which included a net tax expense of USD 4,305 million.

Profit before tax was USD 6,373 million in 2018 compared with USD 5,351 million in 2017, and adjusted profit before tax was USD 6,445 million compared with USD 6,295 million.

UBS's Board of Directors intends to propose a dividend of CHF 0.70 per share to shareholders for the financial year 2018. Subject to shareholder approval at the Annual General Meeting on 2 May 2019, the dividend will be paid out of capital contribution reserves on 8 May 2019 to shareholders of record as of 7 May 2019. The ex-dividend date will be 6 May 2019.

We are targeting repurchases of up to USD one billion of shares in 2019 under our announced share repurchase program.

Results: 4Q18 vs 4Q17

Profit before tax increased by USD 17 million or 2% to USD 862 million, mainly reflecting a decrease in operating expenses, largely offset by lower operating income. Operating income decreased by USD 235 million or 3%, mainly reflecting USD 172 million lower net interest income and other net income from fair value changes on financial instruments and a USD 94 million decrease in net fee and commission income. Operating expenses decreased by USD 252 million or 4%, primarily due to USD 177 million lower general and administrative expenses and USD 141 million lower personnel expenses, partly offset by USD 66 million higher depreciation, amortization and impairment of property, equipment, software and intangible assets.

In addition to reporting our results in accordance with International Financial Reporting Standards (IFRS), we report adjusted results that exclude items that management believes are not representative of the underlying performance of our businesses. Such adjusted results are non-GAAP financial measures as defined by US Securities and Exchange Commission (SEC) regulations. These adjustments include restructuring expenses related to our CHF 2.1 billion cost reduction program that was completed at the end of 2017 (referred to as our "legacy cost programs" in this report). We incurred residual restructuring expenses in connection with such legacy cost programs, as well as expenses relating to new restructuring initiatives, of USD 561 million for the full year 2018 and expect such amounts to be approximately USD 0.2 billion for the full year 2019.

For the purpose of determining adjusted results for the fourth quarter of 2018, we excluded a gain of USD 460 million related to investments in associates and a remeasurement loss of USD 270 million related to the increase of our shareholding in UBS Securities Co. Limited, as well as net restructuring expenses of USD 188 million. For the fourth quarter of 2017, we excluded gains of USD 153 million on sale of subsidiaries and businesses, gains of USD 29 million on sale of financial assets at fair value through OCI, expenses of USD 26 million related to the modification of terms for Deferred Contingent Capital Plan (DCCP) awards granted for

the performance years 2012 and 2013, and net restructuring expenses of USD 387 million.

On this adjusted basis, profit before tax for the fourth quarter of 2018 decreased by USD 216 million or 20% to USD 860 million, mainly driven by USD 243 million or 3% lower operating income.

Operating income: 4Q18 vs 4Q17

Total operating income decreased by USD 235 million or 3% to USD 6,972 million. On an adjusted basis, total operating income decreased by USD 243 million or 3% to USD 6,782 million, mainly reflecting a USD 172 million decrease in net interest income and other net income from fair value changes on financial instruments and USD 94 million lower net fee and commission income.

Net interest income and other net income from fair value changes on financial instruments

Total combined net interest income and other net income from fair value changes on financial instruments decreased by USD 172 million to USD 2,524 million, mainly driven by a decrease in the Investment Bank, primarily due to lower client activity in Equities and lower revenues in Corporate Client Solutions. This was partly offset by an increase in Corporate Center, mainly in Corporate Center – Group Asset and Liability Management.

The fourth quarter of 2018 included net interest income of USD 83 million, mainly in the Investment Bank, Global Wealth Management and Personal & Corporate Banking, which resulted from functional and presentation currency changes, together with related changes to our risk management framework and certain hedging programs.

Net fee and commission income

Net fee and commission income was USD 4,261 million compared with USD 4,355 million, primarily reflecting decreases in M&A and corporate finance fees, other fee and commission income and net brokerage fees, as well as higher other fee and commission expense. This was partly offset by higher investment fund fees and fees for portfolio management and related services.

Credit loss expense / recovery

We adopted IFRS 9, *Financial Instruments* effective 1 January 2018. IFRS 9 introduces a forward-looking expected credit loss (ECL) approach, which is intended to result in an earlier recognition of credit losses based on an ECL impairment approach compared with the incurred-loss impairment approach for financial instruments under IAS 39, *Financial Instruments: Recognition and Measurement* and the loss-provisioning approach for financial guarantees and loan commitments under IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*.

Total net credit loss expenses were USD 53 million in the fourth quarter of 2018, almost entirely reflecting a USD 52 million increase in losses from credit-impaired (stage 3) positions, mainly in Personal & Corporate Banking and to a lesser extent in the Investment Bank.

Other income

Other income was USD 241 million compared with USD 247 million. The fourth quarter of 2018 included a valuation gain of USD 460 million on our equity ownership in SIX related to the sale of SIX Payment Services to Worldline and a remeasurement loss of USD 270 million related to the increase of our shareholding in UBS Securities Co. Limited. The fourth quarter of 2017 included a gain of USD 153 million on sale of Asset Management's fund administration business in Luxembourg and Switzerland to Northern Trust and a gain of USD 29 million on the sale of our investment in the London Clearing House. Excluding these items, adjusted other income decreased by USD 14 million.

Operating expenses: 4Q18 vs 4Q17

Total operating expenses decreased by USD 252 million or 4% to USD 6,110 million. Excluding net restructuring expenses of USD 188 million (fourth quarter of 2017: USD 387 million), as well as expenses of USD 26 million in the Investment Bank related to modification of terms of DCCP awards granted for the performance years 2012 and 2013 in the fourth quarter of 2017, adjusted total operating expenses decreased by USD 27 million to USD 5,922 million.

Personnel expenses

Personnel expenses decreased by USD 141 million to USD 3,839 million on a reported basis, primarily due to a decrease in expenses for variable compensation and social security as well as lower net restructuring expenses.

On an adjusted basis, personnel expenses decreased by USD 47 million to USD 3,744 million, mainly due to the aforementioned decrease in expenses for variable compensation and social security.

General and administrative expenses

General and administrative expenses decreased by USD 177 million to USD 1,911 million. This was primarily due to lower net restructuring expenses. The fourth quarter of 2018 included a

net expense for the UK bank levy of USD 85 million compared with an expense of USD 90 million in the fourth quarter of 2017.

On an adjusted basis, general and administrative expenses decreased by USD 26 million to USD 1,839 million.

We believe that the industry continues to operate in an environment in which expenses associated with litigation, regulatory and similar matters will remain elevated for the foreseeable future and we continue to be exposed to a number of significant claims and regulatory matters. The outcome of many of these matters, the timing of a resolution, and the potential effects of resolutions on our future business, financial results or financial condition are extremely difficult to predict.

→ **Refer to “Provisions and contingent liabilities” in the “Consolidated financial information” section of this report and to “Material legal and regulatory risks arise in the conduct of our business” in the “Risk factors” section of our Annual Report 2017 for more information on litigation, regulatory and similar matters**

Depreciation, amortization and impairment

Depreciation, amortization and impairment of property, equipment, software and intangible assets was USD 360 million compared with USD 294 million, mainly reflecting higher expenses related to internally generated capitalized software.

On an adjusted basis, depreciation, amortization and impairment of property, equipment, software and intangible assets increased by USD 46 million, primarily due to the aforementioned increase in expenses for internally generated capitalized software.

Group performance

Tax: 4Q18 vs 4Q17

We recognized an income tax expense of USD 165 million for the fourth quarter of 2018 compared with an income tax expense of USD 3,234 million for the fourth quarter of 2017.

The fourth quarter 2018 income tax expense reflects current tax expenses of USD 235 million, which primarily relate to taxable profits of UBS Switzerland AG and other entities.

It also includes a net deferred tax expense of USD 205 million, which primarily relates to the amortization of DTAs previously recognized in relation to tax losses carried forward and deductible temporary differences to reflect their offset against profits for the quarter.

In addition, following corporate tax reform in the US at the end of 2017 and the reduction in timeframe between the end of our seven-year profit forecast period and the expiry of our brought-forward US tax losses, we have reviewed our approach to the remeasurement of our US DTAs. This review resulted in the recognition of a net tax benefit during the quarter of USD 275 million, comprised of the following:

- The write-off of a Swiss temporary difference DTA of USD 1,617 million relating to UBS AG's investment in our US intermediate holding company (US IHC), UBS Americas Holding LLC. The write-off occurred because the temporary difference between the tax and accounting values in respect of UBS AG's investment in the US IHC is no longer expected to reverse in the foreseeable future, reflecting the expected repatriation of a significant portion of future after-tax US earnings.
- A net increase in DTAs of USD 1,180 million, which is the sum of two items. The recognition of new US temporary difference DTAs of USD 2,134 million as a result of tax elections made in the quarter to capitalize certain historic real estate costs for US tax purposes that will be amortized over a period of up to 39 years. These elections also resulted in a reduction in recognized US tax loss DTAs of USD 954 million because expected future taxable profits that were otherwise available against which to utilize brought-forward tax losses were reduced by the expected future amount of capitalized real estate cost amortization.
- A current US state and local tax expense of USD 160 million resulting from the real estate capitalization elections described above.
- An increase in recognized US DTAs recorded at the level of UBS Americas Inc. of USD 1,367 million, reflecting the elimination of the seven-year profit forecast period limit for US tax loss DTAs as well as the transfer by UBS AG of US shareholdings in certain profitable subsidiaries to UBS Americas Inc.
- A decrease in recognized US DTAs for UBS AG of USD 495 million, which mainly relates to the transfer of the shareholdings referred to above.

The fourth quarter 2017 income tax expense of USD 3,234 million included a deferred tax expense of USD 3,025 million, which primarily related to a net write-down of DTAs in respect of the US federal corporate tax rate reduction included in the Tax Cuts and Jobs Act that was

enacted in that quarter. It also included a current tax expense of USD 209 million, which related to taxable profits of UBS Switzerland AG and other entities.

Tax loss DTAs at the level of UBS Americas Inc. will begin to be amortized with effect from 1 January 2019. For 2019, we expect a full-year tax rate of approximately 25%.

Total comprehensive income attributable to shareholders: 4Q18 vs 4Q17

Total comprehensive income attributable to shareholders was positive USD 1,588 million compared with negative USD 2,844 million. Net profit attributable to shareholders was USD 696 million compared with a net loss of USD 2,417 million and other comprehensive income (OCI) attributable to shareholders, net of tax, was positive USD 892 million compared with negative USD 428 million.

OCI related to cash flow hedges was USD 616 million in the fourth quarter of 2018, mainly reflecting a decrease in unrealized losses on US dollar hedging derivatives resulting from decreases in the relevant US dollar long-term interest rates. In the fourth quarter of 2017, OCI related to cash flow hedges was negative USD 274 million.

OCI related to own credit on financial liabilities designated at fair value was positive USD 368 million compared with negative USD 23 million and mainly reflected a widening of credit spreads in the fourth quarter of 2018.

Foreign currency translation OCI was negative USD 105 million in the fourth quarter of 2018, mainly resulting from the movement of the British pound, the Swiss franc and the euro against the US dollar during the quarter. OCI related to foreign currency translation in the same quarter last year was negative USD 96 million.

Defined benefit plan OCI was negative USD 31 million compared with positive USD 4 million. We recorded net pre-tax OCI losses of USD 224 million related to the non-Swiss pension plans, mainly driven by the UK defined benefit plans that recorded OCI losses of USD 156 million, primarily due to a negative return on plan assets. Net pre-tax OCI losses related to the Swiss pension plan amounted to USD 28 million. This reflected OCI losses of USD 702 million from the remeasurement of the defined benefit obligation, primarily due to an experience loss, reflecting the effects of differences between the previous actuarial assumptions and what actually occurred, and a decrease in the applicable discount rate. An additional OCI loss of USD 580 million was due to a negative return on plan assets. These losses were largely offset by an OCI gain of USD 1,253 million due to a decrease in the effect of the IFRS asset ceiling.

The total pre-tax OCI loss of USD 252 million was largely offset by a net tax benefit of USD 221 million due to the recognition of temporary difference DTAs in the US following our review of the approach used to remeasure our US DTAs and the timing for recognizing deferred taxes.

OCI associated with financial assets measured at fair value through OCI was positive USD 44 million compared with negative USD 39 million and reflected net unrealized gains following decreases in the relevant US dollar long-term interest rates in the fourth quarter of 2018.

→ **Refer to “Statement of comprehensive income” in the “Consolidated financial information” section of this report for more information**

→ **Refer to “Note 26 Pension and other post-employment benefit plans” in the “Consolidated financial statements” section of our Annual Report 2017 for more information on other comprehensive income related to defined benefit plans**

Sensitivity to interest rate movements

As of 31 December 2018, we estimate that a parallel shift in yield curves by +100 basis points could lead to a combined increase in annual net interest income of approximately USD 0.7 billion in Global Wealth Management and Personal & Corporate Banking. Of this increase, approximately USD 0.3 billion and USD 0.2 billion would result from changes in US dollar and euro interest rates, respectively.

The immediate effect on shareholders' equity of such a shift in yield curves would be a decrease of approximately USD 2.0 billion recognized in OCI, of which approximately USD 1.5 billion would result from changes in US dollar interest rates. The immediate effect on regulatory capital would be immaterial as OCI from cash flow hedges is not recognized in capital and the impact from debt instruments measured at fair value through OCI would be offset by a positive effect from pension fund assets and liabilities.

The aforementioned estimates are based on a hypothetical scenario of an immediate increase in interest rates, equal across all currencies and relative to implied forward rates applied to our banking book and financial assets measured at fair value through OCI. These estimates further assume no change to balance sheet size and structure, constant foreign exchange rates and no specific management action.

Key figures and personnel

Return on tangible equity: 4Q18 vs 4Q17

The annualized return on tangible equity (RoTE) was positive 6.2% compared with negative 20.3%, as the fourth quarter of 2017 included a net write-down of DTAs following a reduction in the US federal corporate tax rate after the enactment of the TCJA in the US. The annualized adjusted RoTE excluding deferred tax expense / benefit and DTAs was 4.9% compared with 8.3%.

Return on common equity tier 1 (CET1) capital

The annualized return on CET1 capital (RoCET1) was positive 8.0% in the fourth quarter of 2018 compared with negative 28.8% in the fourth quarter of 2017.

The RoCET1 for the full year 2018 was 14.2% compared with 3.0% for the full year 2017, mainly as the fourth quarter of 2017 included the aforementioned net write-down of DTAs.

Cost / income ratio: 4Q18 vs 4Q17

The cost / income ratio was 87.0% compared with 87.2%. On an adjusted basis, the cost / income ratio was 86.6% compared with 83.6%.

Risk-weighted assets: 4Q18 vs 3Q18

During the fourth quarter of 2018, risk-weighted assets (RWA) increased by USD 6.7 billion to USD 263.7 billion, reflecting increases from asset size and other movements of USD 6.9 billion and regulatory add-ons of USD 2.0 billion, partly offset by decreases driven by model updates of USD 1.4 billion, currency effects of USD 0.5 billion and methodology and policy changes of USD 0.3 billion.

→ **Refer to the “Capital management” section of this report for more information**

Common equity tier 1 capital ratio: 4Q18 vs 3Q18

Our CET1 capital ratio decreased 0.5 percentage points to 13.1% during the fourth quarter of 2018, reflecting a USD 6.7 billion increase in RWA.

→ **Refer to the “Capital management” section of this report for more information**

Leverage ratio denominator: 4Q18 vs 3Q18

During the fourth quarter of 2018, the leverage ratio denominator (LRD) decreased by USD 10 billion to USD 905 billion. This decrease was driven by asset size and other movements of USD 8 billion and by currency effects of USD 2 billion.

→ **Refer to the “Capital management” section of this report for more information**

Group performance

Common equity tier 1 leverage ratio: 4Q18 vs 3Q18

Our CET1 leverage ratio increased from 3.80% to 3.81% in the fourth quarter of 2018, reflecting a USD 10 billion decrease in the LRD.

→ **Refer to the “Capital management” section of this report for more information**

Going concern leverage ratio: 4Q18 vs 3Q18

Our going concern leverage ratio increased 0.2 percentage points to 5.2% as of 31 December 2018, reflecting an increase of USD 0.7 billion in going concern capital and the aforementioned USD 10 billion decrease in LRD.

→ **Refer to the “Capital management” section of this report for more information**

Net new money and invested assets

Management’s discussion and analysis of net new money and invested assets is provided in the “UBS business divisions and Corporate Center” section of this report.

Personnel: 4Q18 vs 3Q18

We employed 66,888 personnel as of 31 December 2018, a net increase of 1,332 compared with 30 September 2018. Corporate Center – Services personnel increased by 1,047, primarily due to higher staffing levels related to continued insourcing of certain activities from third-party vendors to our Business Solutions Centers, mainly in Group Technology. As a result, we have seen a decrease of 1,650 in outsourced personnel. Investment Bank and Global Wealth Management personnel increased by 248 and 65, respectively.

1 Adjusted results are non-GAAP financial measures as defined by SEC regulations. 2 Refer to the "Performance by business division and Corporate Center unit – reported and adjusted" table in this section for more information. 3 Generally reflects an indicative tax rate of 22% on pre-tax adjusting items. 4 Deferred tax expense / benefit in respect of taxable profits and any remeasurements of DTAs, such as the net write-down due to the Tax Cuts and Jobs Act enacted in the fourth quarter of 2017. 5 DTAs that do not qualify as CET1 capital, reflecting DTAs recognized for tax loss carry-forwards of USD 6,107 million as of 31 December 2018 (30 September 2018: USD 6,138 million; 31 December 2017: USD 5,947 million) as well as DTAs on temporary differences, excess over threshold of USD 586 million as of 31 December 2018 (30 September 2018: USD 99 million; 31 December 2017: USD 879 million), in accordance with Swiss SRB rules. Refer to the "Capital management" section of this report for more information. 6 Calculated as adjusted net profit / loss attributable to shareholders excluding amortization and impairment of goodwill and intangible assets and deferred tax expense / benefit (annualized as applicable), divided by average tangible equity attributable to shareholders excluding any DTAs that do not qualify as CET1 capital.

Outlook

While global economic activity continues to moderate, the overall outlook for economic growth remains positive, and asset prices have improved from the fourth quarter of 2018. Lack of progress in resolving geopolitical tensions, rising protectionism and trade disputes along with increased volatility, which affected investor sentiment and confidence in the

second half of the year and particularly in the fourth quarter of 2018, would affect client activity in the first quarter of 2019.

Lower invested assets as a result of market declines in the fourth quarter of 2018 are expected to affect recurring revenues in Global Wealth Management and Asset Management. Further improvements in market levels, as well as improvements in investor sentiment and client activity would contribute to mitigating revenue and profit growth headwinds.

We remain well positioned to capitalize on global wealth creation, which we expect will continue to sustain our strategy and financial performance. We will continue to execute our strategy with discipline, while focusing even more on balancing efficiency and investments for growth, to deliver on our capital return objectives and to create sustainable long-term value for our shareholders.

1 Refer to the "Measurement of performance" section of our Annual Report 2017 for the definitions of our key performance indicators. 2 Excluding minor functions with 116 advisors, USD 3 billion of invested assets, USD 0.5 billion of loans and USD 0.4 billion of net new money outflows in the fourth quarter of 2018. 3 Loans include customer brokerage receivables, which with the adoption of IFRS 9 effective 1 January 2018 have been reclassified to a separate reporting line on the balance sheet. 4 Represents advisors who exclusively serve ultra high net worth clients in a globally managed unit.

Global Wealth Management

Results: 4Q18 vs 4Q17

Profit before tax increased by USD 2 million to USD 793 million, including a USD 101 million valuation gain on our equity ownership in SIX related to the sale of SIX Payment Services to Worldline. Adjusted profit before tax decreased by USD 219 million or 22% to USD 769 million, reflecting higher operating expenses and lower operating income.

→ **Refer to the “Recent developments” section of this report for more information on the Worldline acquisition of SIX Payment Services**

Operating income

Total operating income increased by USD 38 million or 1% to USD 4,165 million. Excluding the aforementioned valuation gain, adjusted total operating income decreased by USD 62 million or 2% to USD 4,065 million, mainly driven by lower transaction-based income, partly offset by higher recurring net fee income.

Net interest income increased by USD 5 million to USD 1,075 million, due to an increase in net interest margin on deposits and higher loan volumes, partly offset by lower net income from Group structural risk management activities, higher funding costs for total loss-absorbing capacity and the expiration of an interest rate hedge portfolio at the end of 2017.

→ **Refer to the “Corporate Center – Group Asset and Liability Management” section of this report for more information**

Recurring net fee income increased by USD 61 million to USD 2,377 million, predominantly driven by an increase in mandate penetration, partly offset by lower average invested assets.

Transaction-based income decreased by USD 116 million to USD 614 million, mainly due to lower client activity, most notably in the Americas and Asia Pacific.

Other income increased by USD 96 million to USD 112 million. Excluding the aforementioned valuation gain, adjusted other income decreased by USD 5 million to USD 11 million.

Operating expenses

Total operating expenses increased by USD 36 million or 1% to USD 3,372 million and adjusted operating expenses increased by USD 157 million or 5% to USD 3,296 million. Personnel expenses decreased by USD 44 million to USD 1,882 million and adjusted personnel expenses decreased by USD 50 million to USD 1,865 million. This decrease was mainly due to lower expenses for compensation commitments to recruited financial advisors in the Americas and lower variable compensation, partly offset by increases in salaries and staffing levels.

General and administrative expenses increased by USD 88 million to USD 454 million and adjusted general and administrative expenses increased by USD 112 million to USD 453

million, driven predominantly by higher provisions for litigation matters, higher legal fees and higher regulatory-related expenses. Net expenses for services from Corporate Center and other business divisions decreased by USD 7 million to USD 1,021 million. Excluding a reduction in restructuring expenses of USD 103 million, adjusted net expenses for services increased by USD 95 million to USD 961 million, mainly reflecting higher expenses from Group Technology and Group Risk Control.

Net new money: 4Q18 vs 4Q17

Net new money outflows were USD 7.9 billion compared with inflows of USD 13.9 billion, an annualized net new money growth rate of negative 1.3% compared with positive 2.4%. Outflows mainly occurred in the Americas and in Switzerland, which included a large single outflow of USD 2.6 billion. Additionally, net new money was adversely affected by client deleveraging in Asia Pacific. Net new money outflows from ultra high net worth clients were USD 3.5 billion compared with inflows of USD 13.0 billion.

Invested assets: 4Q18 vs 3Q18

Invested assets decreased by USD 178 billion to USD 2,260 billion, mainly due to negative market performance of USD 171 billion, net new money outflows of USD 8 billion and negative currency effects of USD 5 billion, slightly offset by an increase of USD 8 billion related to the acquisition of subsidiaries and businesses. Mandate penetration decreased to 33.6% from 33.9%.

1 Comparative figures in this table may differ from those originally published in quarterly and annual reports due to organizational changes, restatements due to the retrospective adoption of new accounting policies, and events after the reporting period. 2 Recurring net fee income consists of fees earned on an ongoing basis such as portfolio management fees, asset-based investment fund fees, custody fees and other fees that are generated on client assets. 3 Transaction-based income comprises the non-recurring portion of fee income, mainly consisting of brokerage and transaction-based investment fund fees as well as credit card fees and other transaction-based income, together with net income from fair value changes on financial instruments. 4 Adjusted measures as defined by SEC regulations. 5 Reflects restructuring expenses related to legacy cost reduction. 6 “Measurement of performance” section of our Annual Report 2017 for the definitions of our key performance indicators. 7 “Capital management” section of this report for more information. 8 Represents risk-weighted assets held by Corporate Center – Group ALM that are directly associated with activity managed centrally or through other Corporate Center units. Refer to “Equity attribution and return on attributed equity” in the “Capital management” section of this report for more information. 9 Client assets are comprised of invested assets and other assets held for investment purposes or custody only. We do not measure net new money for Personal & Corporate Banking. 10 “Credit risk and control” section of this report for more information on (credit-)impaired exposures.

Results: 4Q18 vs 4Q17

Profit before tax increased by CHF 322 million to CHF 714 million, predominantly reflecting a CHF 359 million valuation gain on our equity ownership in SIX related to the sale of SIX Payment Services to Worldline. Adjusted profit before tax decreased by CHF 55 million or 13% to CHF 373 million.

→ **Refer to the “Recent developments” section of this report for more information on the Worldline acquisition of SIX Payment Services**

Effective from 1 January 2018, we have reclassified certain expenses for clearing, credit card add-on services and the client loyalty program, which are incremental and incidental to revenues on a prospective basis, to better align these expenses with their associated revenues within operating income. This resulted in a CHF 15 million reduction in total operating income in the fourth quarter of 2018, of which CHF 13 million related to transaction-based income, and a broadly corresponding decrease in total operating expenses, including a CHF 14 million reduction in general and administrative expenses.

Operating income

Total operating income increased to CHF 1,286 million from CHF 986 million, mainly reflecting the aforementioned valuation gain. Adjusted total operating income decreased to CHF 927 million from CHF 986 million, mainly reflecting lower transaction-based income including the aforementioned effect from the reclassification of expenses to revenues, as well as higher credit loss expenses.

Net interest income remained unchanged at CHF 525 million, with higher deposit revenues offset by higher funding costs for total loss-absorbing capacity and the expiration of an interest rate hedge portfolio at the end of 2017.

→ **Refer to the “Corporate Center – Group Asset and Liability Management” section of this report for more information**

Recurring net fee income was broadly unchanged at CHF 157 million.

Transaction-based income decreased by CHF 36 million to CHF 248 million, mainly due to lower fees in the Corporate Clients area, as well as the aforementioned reclassification from expenses to revenues.

Other income increased by CHF 355 million to CHF 373 million, primarily reflecting the aforementioned CHF 359 million valuation gain.

Net credit loss expenses were CHF 17 million, compared with a recovery of CHF 4 million in the fourth quarter of 2017, as impairments, primarily to a number of Corporate Clients loans, were partly offset by a release of CHF 14 million of stage 1 and 2 expected credit losses.

Operating expenses

Total operating expenses decreased by CHF 21 million or 4% to CHF 572 million and adjusted operating expenses decreased by CHF 3 million or 1% to CHF 554 million. This included a CHF 14 million reduction in general and administrative expenses due to the aforementioned reclassification from expenses to revenues. Net expenses for services from Corporate Center and other business divisions were stable at CHF 314 million while on an adjusted basis net expenses for services from Corporate Center and other business divisions increased by CHF 17 million to CHF 297 million. The changes reflected higher expenses for Group Technology, as well as strategic and regulatory initiatives.

Net new business volume growth for personal banking: 4Q18 vs 4Q17

The annualized net new business volume growth rate for our personal banking business was 2.2%, up from 1.0% in the same period in 2017. Net new client assets were positive, while net new loans were slightly negative, consistent with historical seasonal patterns.

Adjusted gross margin on invested assets (bps)	23	22	24	5	(4)	23	26
Personnel (full-time equivalents)	2,301	2,321	2,335	(1)	(1)	2,301	2,335

1 Comparative figures in this table have been restated for the change of the presentation currency from Swiss francs to US dollars with assets, liabilities and total equity converted to US dollars at closing exchange rates prevailing on the respective balance sheet dates, and income and expenses translated at the respective average rates prevailing for the relevant periods. Comparatives may additionally differ due to adjustments following organizational changes, restatements due to the retrospective adoption of new accounting standards or changes in accounting policies, and events after the reporting period. 2 Net management fees include transaction fees, fund administration revenues (including net interest and trading income from lending activities and foreign exchange hedging as part of the fund services offering), gains or losses from seed money and co-investments, funding costs, and other items that are not performance fees. Beginning 1 January 2018, net management fees additionally include fund and custody expenses recognized as contra revenues and previously included in operating expenses. Prior periods were not restated for this change. 3 Adjusted results are non-GAAP financial measures as defined by SEC regulations. 4 Reflects restructuring expenses related to legacy cost programs as well as expenses for new restructuring initiatives in 2018. 5 Refer to the “Measurement of performance” section of our Annual Report 2017 for the definitions of our key performance indicators. 6 Excluding the impact of business exits.

Prior-period information for the periods ending before 1 January 2018 has been restated. 7 Refer to the “Capital management” section of this report for more information. 8 Represents risk-weighted assets and leverage ratio denominator held by Corporate Center – Group ALM that are directly associated with activity managed centrally on behalf of the business divisions and other Corporate Center units. Refer to “Equity attribution and return on attributed equity” in the “Capital management” section of this report for more information.

Results: 4Q18 vs 4Q17

Profit before tax decreased by USD 125 million or 53% to USD 114 million, mainly as the fourth quarter of 2017 included a gain of USD 153 million on the sale of our fund administration business. Excluding this gain, adjusted profit before tax increased by USD 17 million or 15% to USD 134 million, mainly due to reduced operating expenses.

Operating income

Total operating income decreased by USD 160 million or 25% to USD 469 million. Excluding the aforementioned gain on the sale of our fund administration business, adjusted operating income decreased by USD 7 million or 1%. Net management fees decreased by USD 8 million to USD 440 million, mainly reflecting continued pressure on margins and the reclassification of fund and custody expenses from operating expenses to operating income in order to better align these costs with their associated revenues within operating income.

Performance fees increased marginally by USD 1 million to USD 28 million, driven by an increase in performance fees in Hedge Fund Businesses and Real Estate & Private Markets, largely offset by lower performance fees in Equities.

We expect to see a continuation of the trend of clients moving invested assets into lower-margin passive products, which is expected to have a dampening effect on margins.

Operating expenses

Total operating expenses decreased by USD 35 million, or 9%, to USD 355 million, and adjusted operating expenses decreased by USD 24 million or 7% to USD 335 million.

Personnel expenses decreased by USD 11 million to USD 166 million. On an adjusted basis, personnel expenses decreased by USD 11 million to USD 161 million, primarily driven by reduced expenses for variable compensation.

General and administrative expenses decreased by USD 14 million to USD 57 million, and on an adjusted basis by USD 11 million to USD 54 million. This was primarily due to reduced professional fees and marketing costs as well as the aforementioned reclassification of fund and custody expenses to operating income, partly offset by higher research expenses.

Net expenses for services from Corporate Center and other business divisions decreased by USD 9 million to USD 132 million, and on an adjusted basis by USD 2 million to USD 119 million. This reflected reduced expenses from Group Operations, strategic and regulatory initiatives, Group Risk as well as the aforementioned reclassification of custody expenses to operating income, partly offset by higher expenses from Group Technology.

Net new money: 4Q18 vs 4Q17

Excluding money market flows, net new money was negative USD 4.9 billion compared with net inflows of USD 10.0 billion, an annualized net new money growth rate of negative 2.6%

compared with positive 5.8%.

Invested assets: 4Q18 vs 3Q18

Invested assets decreased by USD 49 billion to USD 781 billion, reflecting negative market performance of USD 44 billion, negative currency effects of USD 3 billion (resulting primarily from the strengthening of the US dollar against the euro) and net new money outflows (including money market flows) of USD 2 billion.

1 Comparative figures in this table have been restated for the change of the presentation currency from Swiss francs to US dollars with assets, liabilities and total equity converted to US dollars at closing exchange rates prevailing on the respective balance sheet dates, and

income and expenses translated at the respective average rates prevailing for the relevant periods. Comparatives may additionally differ due to adjustments following organizational changes, restatements due to the retrospective adoption of new accounting standards or changes in accounting policies, and events after the reporting period. 2 Adjusted results are non-GAAP financial measures as defined by SEC regulations. 3 Reflects a gain on the sale of our remaining investment in IHS Markit. Figures presented for periods prior to the first quarter of 2018 relate to financial assets available for sale. With the adoption of IFRS 9 on 1 January 2018, certain financial assets were reclassified from available for sale under IAS 39 to measured at fair value through OCI under IFRS 9. 4 Reflects restructuring expenses related to legacy cost programs. 5 Relates to the removal of the service period requirement for DCCP awards granted for the performance years 2012 and 2013. 6 Refer to the “Measurement of performance” section of our Annual Report 2017 for the definitions of our key performance indicators. 7 Refer to the “Capital management” section of this report for more information. 8 Represents risk-weighted assets (RWA) and leverage ratio denominator (LRD) held by Corporate Center – Group ALM that are directly associated with activity managed centrally on behalf of the business divisions and other Corporate Center units. Refer to “Equity attribution and return on attributed equity” in the “Capital management” section of this report for more information. 9 Based on total RWA and LRD. 10 Refer to the “Risk management and control” section of this report for more information on (credit-)impaired loan exposures.

Results: 4Q18 vs 4Q17

Profit before tax decreased by USD 93 million, resulting in a loss of USD 47 million. Adjusted profit before tax decreased by USD 142 million or 84% to USD 26 million, mainly driven by lower revenues in Corporate Client Solutions and Equities.

Operating income

Total operating income decreased by USD 212 million, or 12%, to USD 1,538 million. Excluding a gain of USD 29 million on the sale of our investment in the London Clearing House in the fourth quarter of 2017, adjusted operating income decreased by USD 182 million to USD 1,538 million. This was primarily due to USD 283 million lower revenues in Corporate Client Solutions and Equities, partly offset by a USD 38 million increase in Foreign Exchange, Rates and Credit revenues. Credit loss expense decreased by USD 63 million to USD 18 million, mainly as the prior-year quarter included an expense related to a margin loan to a single client, following a significant decrease in the value of the collateral.

Corporate Client Solutions

Corporate Client Solutions revenues decreased by USD 191 million or 29% to USD 461 million, reflecting lower revenues across all areas.

Advisory revenues decreased to USD 115 million from USD 145 million, reflecting lower revenues from merger and acquisition transactions against a global fee pool increase of 27% and a decline in revenues from private transactions.

Equity Capital Markets revenues decreased to USD 122 million from USD 232 million, due to lower revenues from public offerings, where the global fee pool decreased 36%, as well as reduced revenues from private transactions.

Debt Capital Markets revenues decreased to USD 160 million from USD 190 million, reflecting lower investment-grade revenues as the global fee pool decreased 22%. Leveraged finance revenues were broadly unchanged against a global fee pool decrease of 32%.

Financing Solutions revenues decreased to USD 53 million from USD 69 million, primarily reflecting lower real estate finance revenues.

Investment Bank

Investor Client Services

Investor Client Services revenues decreased by USD 84 million or 7% to USD 1,095 million. Excluding the aforementioned gain on the sale of our investment in the London Clearing House in the fourth quarter of 2017, adjusted revenues decreased by USD 54 million, reflecting a decrease in Equities revenues, partly offset by an increase in Foreign Exchange, Rates and Credit revenues.

Equities

Equities revenues decreased by USD 120 million or 13% to USD 792 million. Excluding the aforementioned gain on the sale of our investment in the London Clearing House, revenues decreased by USD 92 million or 10% to USD 792 million on sharp declines in global equity markets, which led to reduced client activity levels.

Cash revenues decreased to USD 310 million from USD 326 million and Derivatives revenues decreased to USD 155 million from USD 202 million, reflecting lower client activity due to the aforementioned challenging market conditions.

Financing Services revenues decreased to USD 354 million from USD 362 million, driven by lower Prime Brokerage revenues from lower client activity.

Foreign Exchange, Rates and Credit

Foreign Exchange, Rates and Credit revenues increased by USD 38 million or 14% to USD 304 million. Foreign Exchange revenues increased on higher volatility and activity levels and included USD 53 million of revenues from Corporate Center - Group ALM for the rebalancing of the Group's currency exposures in connection with the change in functional and presentation currencies. Rates and Credit revenues decreased, mainly due to weaker trading performance in Credit flow products, reflecting the challenging market conditions during the quarter.

Operating expenses

Total operating expenses decreased by USD 119 million or 7% to USD 1,585 million. Excluding a reduction in restructuring expenses of USD 54 million, adjusted operating expenses decreased by USD 41 million or 3% to USD 1,512 million.

Personnel expenses decreased by USD 121 million to USD 537 million and adjusted personnel expenses decreased by USD 85 million to USD 535 million, mainly driven by lower salaries and variable compensation.

General and administrative expenses decreased by USD 7 million to USD 263 million, and on an adjusted basis by USD 4 million to USD 260 million, mainly as the fourth quarter of 2018 included a net expense for the UK bank levy of USD 61 million compared with an expense of USD 76 million in the fourth quarter of 2017, partly offset by higher professional fees.

Net expenses for services from Corporate Center and other business divisions increased to USD 782 million from USD 771 million and adjusted net expenses increased to USD 713 million from USD 664 million, mainly driven by higher net expenses from Group Technology.

Risk-weighted assets and leverage ratio denominator: 4Q18 vs 3Q18

Risk-weighted assets

Total risk-weighted assets (RWA), including RWA held by Corporate Center – Group Asset and Liability Management (Group ALM) on behalf of the Investment Bank, increased by USD 5 billion to USD 87 billion. This was mainly due to an increase in market risk RWA, reflecting higher average regulatory and stressed value-at-risk (VaR) levels, primarily in Equities following significant market volatility in the quarter.

→ **Refer to the “Capital management” section of this report for more information**

Leverage ratio denominator

The leverage ratio denominator (LRD), including LRD held by Corporate Center – Group ALM on behalf of the Investment Bank, decreased by USD 32 billion to USD 256 billion. LRD held by the Investment Bank decreased by USD 32 billion to USD 240 billion, mainly due to client-driven reductions and trade unwinds as well as lower derivative exposures driven by significant market volatility in the quarter. LRD held by Corporate Center – Group ALM on behalf of the Investment Bank was broadly unchanged at USD 16 billion.

1 Comparative figures in this table have been restated for the change of the presentation currency from Swiss francs to US dollars with assets, liabilities and total equity converted to US dollars at closing exchange rates prevailing on the respective balance sheet dates, and income and expenses translated at the respective average rates prevailing for the relevant periods. Comparatives may additionally differ due to adjustments following organizational changes, restatements due to the retrospective adoption of new accounting standards or changes in accounting policies, and events after the reporting period. 2 Adjusted results are non-GAAP financial measures as defined by SEC regulations. 3 Reflects restructuring expenses related to legacy cost programs. 4 Refer to the “Capital management” section of this report for more information. 5 Represents leverage ratio denominator held by Corporate Center – Group ALM that is directly associated with activity managed centrally on behalf of the business divisions and other Corporate Center units. Refer to “Equity attribution and return on attributed equity” in the “Capital management” section of this report for more information.

Results: 4Q18 vs 4Q17

Corporate Center – Services recorded a loss before tax of USD 488 million compared with a loss of USD 158 million in the same quarter of the previous year, and an adjusted loss before tax of USD 220 million, against a loss of USD 161 million.

Operating income

Operating income was negative USD 354 million compared with negative USD 46 million. Excluding the remeasurement loss of USD 270 million related to the increase of our shareholding in UBS Securities China in the fourth quarter of 2018, adjusted income was negative USD 85 million compared with negative USD 46 million. This was mainly driven by higher funding costs relating to Corporate Center – Services' balance sheet assets.

→ **Refer to the “Recent developments” section of this report for more information on the remeasurement loss related to UBS Securities China**

→ **Refer to the “Recent developments” section of this report for more information on the changes in Corporate Center cost allocations and equity attribution to business divisions as of the first quarter of 2019**

Operating expenses

Operating expenses before service allocations to business divisions and other Corporate Center units

Before allocations to business divisions and other Corporate Center units, total operating expenses decreased by USD 3 million to USD 2,422 million. Adjusted operating expenses before allocations increased by USD 162 million or 8% to USD 2,265 million.

Personnel expenses increased by USD 41 million to USD 1,052 million, and on an adjusted basis by USD 104 million to USD 982 million, mainly driven by continued insourcing of certain activities and staff from third-party vendors to our Business Solutions Centers.

General and administrative expenses decreased by USD 110 million to USD 1,035 million, and on an adjusted basis increased by USD 11 million to USD 969 million. This was mainly due to higher expenses from Group Technology, partly offset by a reduction in outsourcing costs following the aforementioned insourcing of certain activities and staff.

Depreciation expenses increased to USD 334 million from USD 268 million, primarily reflecting higher amortization expenses for internally generated capitalized software and asset impairment costs.

Services to / from business divisions and other Corporate Center units

Corporate Center – Services allocated net expenses of USD 2,289 million to the business divisions and other Corporate Center units, compared with USD 2,313 million. Adjusted

allocated net expenses for services to business divisions and other Corporate Center units were USD 2,129 million compared with USD 1,988 million, mainly reflecting the aforementioned cost movements.

Operating expenses after service allocations to / from business divisions and other Corporate Center units

Corporate Center – Services retains costs related to Group governance functions and other corporate activities, certain strategic and regulatory projects and certain restructuring expenses. Total operating expenses remaining in Corporate Center – Services after allocations were USD 133 million compared with USD 111 million, and USD 135 million compared with USD 115 million on an adjusted basis, mainly related to increased expenses for strategic and regulatory projects.

Personnel: 4Q18 vs 3Q18

As of 31 December 2018, Corporate Center – Services employed 30,364 personnel, a net increase of 1,047 compared with 30 September 2018. The increase came primarily from the continued insourcing of certain activities from third-party vendors to our Business Solutions Centers, mainly in Group Technology. As a result, we have seen a decrease of 1,650 in outsourced personnel.

Results: 4Q18 vs 4Q17

Corporate Center – Group Asset and Liability Management (Group ALM) recorded a loss before tax of USD 131 million compared with a loss before tax of USD 230 million in the fourth quarter of 2017. This improvement came mainly as a result of favorable market developments relating to hedge accounting, together with offsetting factors including own credit mark-to-market losses and changes to internal funds transfer pricing rates.

Operating income

Total operating income after allocations to business divisions and other Corporate Center units was negative USD 108 million compared with negative USD 213 million, mainly due to lower retained expense from Group structural risk management activities and gains in hedge accounting.

Total risk management net income before allocations to business divisions and other Corporate Center units was negative USD 182 million compared with negative USD 82 million, reflecting lower net income from business division-aligned risk management activities.

Business division-aligned risk management net income

Net income from business division-aligned risk management activities, before allocations to business divisions and other Corporate Center units, was USD 47 million compared with USD 160 million. This was mainly driven by the ongoing effect of negative Swiss franc and euro interest rates and the expiration of an interest rate hedge portfolio in November 2017.

In addition, during the third quarter of 2018, Group ALM's interest rate risk management capability was extended to the management of Global Wealth Management's interest rate risk in the US. This resulted in lower Group ALM income and an offsetting higher Global Wealth Management income. Previously, this income was realized in Group ALM and fully allocated to Global Wealth Management.

Capital investment and issuance net income

Net income from capital investment and issuance activities before allocations to business divisions and other Corporate Center units was negative USD 29 million compared with negative USD 25 million. Effective from the second quarter of 2018, additional net negative income from capital investment and issuance activities is allocated to Global Wealth Management and Personal & Corporate Banking as a result of changes we made to our internal funds transfer pricing rates. This was offset by incremental positive income from investment of the Group's equity due to a switch from Swiss francs to US dollars in the portfolio.

Group structural risk management net income

Net income from Group structural risk management activities before allocations to business divisions and other Corporate Center units was negative USD 200 million, compared with

negative USD 216 million.

Net interest expense from the management of Group ALM's portfolio of internal funding increased as a result of higher London Interbank Offered Rate (LIBOR) rates on floating rate liabilities and the inclusion of the interest expense on a portfolio of long-dated cross-currency swaps, following a change in accounting policy in the first quarter of 2018. The interest expense of that portfolio was previously recognized in *Other net income from fair value changes on financial instruments* (prior to 1 January 2018: *Net trading income*) and reported in *Accounting asymmetries related to economic hedges*. These effects were offset by the aforementioned changes made to our internal funds transfer pricing rates along with improved revenues from the management of the Group's high-quality liquid assets (HQLA).

Allocations to business divisions and other Corporate Center units

Total net income allocations from risk management activities to business divisions and other Corporate Center units were negative USD 74 million compared with positive USD 65 million. The drop mainly reflects the aforementioned lower net income from business division-aligned risk management activities, which is fully allocated to the business divisions, in particular Global Wealth Management and Personal & Corporate Banking. This is in addition to the aforementioned changes in internal funds transfer pricing rates and increases in income from invested equity.

Total risk management net income after allocations

Group ALM retained negative income of USD 109 million from its risk management activities after allocations, compared with negative USD 147 million, mainly resulting from the impacts of aforementioned changes in internal funds transfer pricing rates and improved revenues from the management of the Group's HQLA portfolio offset by higher net interest expense in Group ALM's portfolio of internal funding.

We expect retained income from risk management activities to be slightly more than negative USD 100 million per quarter and to improve over time.

→ **Refer to the "Recent developments" section of this report for more information on the changes in Corporate Center cost allocations and equity attribution to business divisions as of the first quarter of 2019**

Corporate Center

Accounting asymmetries related to economic hedges

Net income retained by Group ALM due to accounting asymmetries related to economic hedges was negative USD 82 million compared with negative USD 45 million, due to mark-to-market impacts of changes in UBS's own credit risk. This effect is partly offset by the aforementioned change in accounting policy in the first quarter of 2018 related to the interest expense on long-dated cross-currency swaps.

Hedge accounting ineffectiveness

Net income related to hedge accounting ineffectiveness was USD 52 million, compared with negative USD 7 million. This ineffectiveness arises primarily from changes in the spread between LIBOR and the overnight index swap (OIS) rate due to differences in the way these affect the valuation of the hedged items and hedging instruments through either the benchmark rate determining cash flows or the discount rate. In the fourth quarter of 2018, the spread between LIBOR and OIS tightened.

Other

Other net income was USD 30 million compared with negative USD 13 million. This was largely due to mark-to-market effects from bond issuances that are economically hedged but not designated into the hedge accounting programs, which benefited from the fall in long-end US dollar interest rates during the fourth quarter of 2018 and improved investment of equity income retained in Group ALM, in accordance with its share of attributed equity.

These effects were offset by a USD 53 million market-level execution fee for the rebalancing of the Group's currency exposures in connection with the change in functional and presentation currencies, paid internally to the Investment Bank.

Balance sheet, risk-weighted assets, leverage ratio denominator: 4Q18 vs 3Q18

Balance sheet assets

Balance sheet assets increased by USD 25 billion to USD 280 billion, primarily reflecting an increase in cash and balances at central banks as business divisions returned more funding to Group ALM.

→ **Refer to the "Balance sheet, liquidity and funding management" section of this report for more information**

Risk-weighted assets

Risk-weighted assets were unchanged at USD 12 billion as of 31 December 2018.

→ **Refer to the "Capital management" section of this report for more information**

Leverage ratio denominator

The leverage ratio denominator increased by USD 23 billion to USD 284 billion, consistent with the increase in balance sheet assets.

→ **Refer to the “Capital management” section of this report for more information**

Corporate Center

Results: 4Q18 vs 4Q17

Corporate Center – Non-core and Legacy Portfolio recorded a loss before tax of USD 94 million compared with a loss of USD 241 million.

Operating income

Total operating income improved by USD 13 million to negative USD 26 million, driven by non-recurring prior-year valuation losses on financial assets designated at fair value.

Operating expenses

Total operating expenses decreased by USD 134 million to USD 68 million, primarily reflecting a USD 108 million reduction in expenses for litigation, regulatory and similar matters. Net expenses for services from business divisions and other Corporate Center units decreased by USD 17 million, primarily as a result of lower service consumption from Corporate Center – Services.

Balance sheet, risk-weighted assets and leverage ratio denominator: 4Q18 vs 3Q18

Balance sheet assets

Balance sheet assets remained stable at USD 35 billion.

Risk-weighted assets

Risk-weighted assets decreased by USD 2 billion to USD 14 billion, mainly as a result of lower operational risk RWA.

→ **Refer to the “Capital management” section of this report for more information**

Leverage ratio denominator

The leverage ratio denominator (LRD), including LRD held by Group ALM on behalf of Non-core and Legacy Portfolio, decreased by USD 1 billion to USD 13 billion.

→ **Refer to the “Capital management” section of this report for more information**

Risk, treasury and capital management

Management report

Risk management and control

Risk management and control

This section provides information on key developments during the reporting period and should be read in conjunction with the “Risk management and control” section of our Annual Report 2017.

Credit risk

We adopted IFRS 9, *Financial Instruments*, effective as of 1 January 2018. IFRS 9 introduces a forward-looking expected credit loss (ECL) approach, which is intended to result in an earlier recognition of credit losses based on an ECL impairment approach compared with the incurred-loss impairment approach for financial instruments under IAS 39, *Financial Instruments: Recognition and Measurement* and the loss-provisioning approach for financial guarantees and loan commitments under IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*.

Total net credit loss expenses were USD 53 million in the fourth quarter of 2018, almost entirely reflecting a USD 52 million net increase in losses from credit-impaired (stage 3) positions, mainly in Personal & Corporate Banking and to a lesser extent in the Investment Bank.

Overall credit risk exposures were broadly unchanged during the fourth quarter of 2018.

We continue to manage our Swiss lending portfolios prudently and remain watchful for any signs of deterioration that could affect our counterparties.

Within the Investment Bank, our leveraged loan underwriting business continued to see a steady flow of transactions, the majority of which were sub-investment grade. Overall our ability to distribute this risk remained sound; however, with increased market volatility and more difficult credit markets observed towards the end of the quarter, we remain cautious. Loan underwriting exposures are held for trading, with fair values reflecting the market conditions at the end of the quarter.

Market risk

We continued to manage market risks at generally low levels of management value-at-risk (VaR). Average management VaR (1-day, 95% confidence level) increased to USD 11 million from USD 9 million in the previous quarter, mainly in the Investment Bank’s Equities business following significant market volatility.

There was one new Group VaR backtesting exception in the fourth quarter of 2018, and the total number of negative backtesting exceptions within the most recent 250-business-day window remained at 2. The FINMA VaR multiplier for market risk RWA remained unchanged at 3.

As of 31 December 2018, the interest rate sensitivity of our banking book to a +1 basis point parallel shift in yield curves was positive USD 1.0 million compared with positive USD 1.3 million as of 30 September 2018. The change in interest rate sensitivity was driven by a reduction in the target replication of Swiss franc equity following the change of UBS's functional currency from Swiss francs to US dollars.

→ **Refer to “Interest rate risk in the banking book” in the “Market risk” section of our Annual Report 2017 for more information on the management of interest rate risk in the banking book**

The interest rate sensitivity to a +1 basis point parallel shift in yield curves of the positions in the banking book that are valued through OCI was negative USD 24 million as of 31 December 2018. This OCI sensitivity was predominantly attributable to cash flow hedges denominated in US dollars and, to a lesser extent, in euros and Swiss francs. The OCI associated with cash flow hedges is not recognized for the purposes of calculating regulatory capital.

→ **Refer to “Sensitivity to interest rate movements” in the “Group performance” section of this report for more information on the effect of rising interest rates on equity, capital and net interest income**

Country risk

We remain watchful of developments in Europe and political shifts in a number of countries. Our direct exposure to peripheral European countries remains limited, although we have significant country risk exposure to major EU economies, including the UK, Germany and France. Italy's deficit and tensions between Italy and the EU, as well as the UK's process of exiting the EU, remain areas of concern.

→ **Refer to the “Recent developments” section of this report for more information on the UK withdrawal from the EU**

We are closely monitoring the growing risks stemming from ongoing US trade policy shifts, and their potential impact on key markets, economies and countries.

We also continue to closely monitor our direct exposure to China. A number of emerging markets, including Turkey and Argentina, are facing economic, political and market pressures. Our exposures to these countries are small and our exposure to other emerging market countries is well diversified.

→ **Refer to the “Risk management and control” section of our Annual Report 2017 for more information**

Operational risk

The pervasive consequential risk themes that continue to challenge UBS and the financial industry are operational resilience, conduct and culture, and financial crime.

Operational resilience remains a key focus for the firm as we continually enhance our ability to respond to disruptions and maintain effective day-to-day business activities. Cybersecurity and data protection are critical elements of operational resilience. Our cybersecurity objectives are set in line with prevailing international standards and our data protection standards are intended to align with applicable data protection regulations and standards. We are investing in preemptive and detective measures to defend against evolving and highly sophisticated cyberattacks to achieve our objectives and meet applicable standards. Our investment priorities focus on increasing readiness to detect and respond to cyber threats and data loss, employee training and behaviors, and application and infrastructure security (including vulnerability management).

Financial crime (including money laundering, terrorist financing, sanctions violations, fraud, bribery and corruption) continues to present a risk, as technological innovation and geopolitical developments increase the complexity of doing business and heightened regulatory attention persists. An effective financial crime prevention program remains essential for the firm. Money laundering and financial fraud techniques are becoming increasingly sophisticated, while geopolitical volatility makes the sanctions landscape more complex. We continue to invest heavily in our detection capabilities and core systems as part

of our financial crime prevention program, with a focus on improving these to meet regulatory expectations, in particular in the US.

Management of conduct risk is an integral part of our operational risk framework. In managing conduct risk, we continue to focus on embedding the framework, enhancing the management information and maintaining momentum on improving culture. Conduct-related management information is reviewed at the business and regional governance level, providing metrics on employee conduct, clients and markets. Furthermore, we continue to pursue behavioral initiatives, such as the “Principles of Good Supervision,” and provide mandatory compliance and risk training.

Throughout 2018 we maintained our focus on regulatory reporting, updating our regulatory process management framework and enhancing our regulatory developments tracking. We are also enhancing our operational risk framework assessment processes, including legal entity reporting, to ensure that these programs meet evolving regulatory expectations.

1 Statistics at individual levels may not be summed to deduce the corresponding aggregate figures. The minima and maxima for each level may occur on different days, and likewise, the VaR for each business line or risk type, being driven by the extreme loss tail of the corresponding distribution of simulated profits and losses for that business line or risk type, may well be driven by different days in the historical time series, rendering invalid the simple summation of figures to arrive at the aggregate total. 2 Difference between the sum of the standalone VaR for the business divisions and Corporate Center units and the VaR for the Group as a whole. 3 As the minimum and maximum occur on different days for different business divisions and Corporate Center units, it is not meaningful to calculate a portfolio diversification effect.

1 In the prevailing negative interest rate environment for the Swiss franc in particular, and to a lesser extent for the euro, interest rates for Global Wealth Management (excluding Americas) and Personal & Corporate Banking client transactions are generally floored at non-negative levels. Accordingly, for the purposes of this disclosure table, downward moves of 100 / 200 basis points are floored to ensure that the resulting shocked interest rates do not turn negative. The flooring results in non-linear sensitivity behavior.

Balance sheet, liquidity and funding management

Strategy, objectives and governance

This section provides balance sheet, liquidity and funding management information and should be read in conjunction with the “Treasury management” section of our Annual Report 2017, which provides more information about the Group’s strategy, objectives and governance for liquidity and funding management.

Balances disclosed in this section represent quarter-end positions, unless indicated otherwise. Intra-quarter balances fluctuate in the ordinary course of business and may differ from quarter-end positions.

Assets and liquidity management

Assets (31 December 2018 vs 30 September 2018)

As of 31 December 2018, balance sheet assets totaled USD 958 billion, an increase of USD 8 billion from 30 September 2018. Total assets excluding derivatives and cash collateral receivables on derivative instruments decreased by USD 3 billion, largely due to currency effects.

Cash and balances at central banks increased by USD 14 billion, primarily resulting from lower client-driven activity that reduced funding consumption by the business divisions. Receivables from securities financing transactions at amortized cost increased by USD 12 billion, mainly in Corporate Center – Group Asset and Liability Management (Group ALM), reflecting a reinvestment of higher cash balances resulting from the aforementioned changes in business division funding consumption, partly offset by client-driven decreases in our Foreign Exchange, Rates and Credit business within the Investment Bank. Derivatives and cash collateral receivables on derivative instruments increased by USD 12 billion, mainly in the Investment Bank, primarily reflecting fair value changes resulting from currency movements and increased client activity, as well as in Global Wealth Management.

These increases were partly offset by a USD 19 billion decrease in trading portfolio assets, primarily reflecting client-driven reductions and trade unwinds in the Investment Bank. Brokerage receivables decreased by USD 4 billion, mainly in our Equities business within the Investment Bank. Lending decreased by USD 3 billion, driven by lower Lombard loan balances in Global Wealth Management. Other financial assets at amortized cost and fair value decreased by USD 2 billion, mainly reflecting fair value changes in the Investment Bank. Non-financial assets and financial assets for unit-linked investment contracts decreased by USD 2 billion, driven by a decrease in unit-linked investment contracts, with a decrease also seen in the related liabilities.

Liquidity coverage ratio

In the fourth quarter of 2018, the UBS Group liquidity coverage ratio (LCR) increased by 1 percentage point to 136%, remaining above the 110% Group LCR minimum communicated by FINMA. The LCR increase was primarily driven by lower net cash outflows related to secured financing transactions. This was partly offset by decreased high-quality liquid assets due to

lower average cash balances.

→ **Refer to the “Treasury management” section of our Annual Report 2017 for more information on liquidity management and the liquidity coverage ratio**

Liquidity coverage ratio

USD billion, except where indicated

	Average 4Q18¹	Average 3Q18 ¹
High-quality liquid assets	173	177
Net cash outflows	127	131
Liquidity coverage ratio (%)	136	135

1 Calculated based on an average of 64 data points in the fourth quarter of 2018 and 63 data points in the third quarter of 2018.

Balance sheet, liquidity and funding management

Liabilities and funding management

Liabilities (31 December 2018 vs 30 September 2018)

Total liabilities increased to USD 905 billion as of 31 December 2018 from USD 898 billion as of 30 September 2018.

Derivatives and cash collateral payables on derivative instruments increased by USD 11 billion, in line with the aforementioned increases in derivative financial assets and cash collateral receivables. Customer deposits increased by USD 11 billion, primarily in Group ALM and Global Wealth Management.

Long-term debt issued decreased by USD 5 billion, driven by mark-to-market effects on debt issued designated at fair value within the Investment Bank. Long-term debt issued measured at amortized cost was broadly unchanged, as the issuance of a USD 0.5 billion equivalent Singapore dollar-denominated high-trigger loss-absorbing additional tier 1 capital instrument and USD 1.3 billion equivalent Japanese yen-denominated senior unsecured debt that contributes to our loss-absorbing capacity (TLAC) were largely offset by the maturity of USD 1.5 billion equivalent US dollar-denominated senior unsecured debt.

Short-term borrowings decreased by USD 4 billion, mainly reflecting net redemptions of commercial paper and certificates of deposit. Trading portfolio liabilities decreased by USD 4 billion, mainly reflecting client-driven decreases and mark-to-market effects in the Investment Bank. Non-financial liabilities and financial liabilities for unit-linked investment contracts decreased by USD 1 billion, mainly related to a decrease in unit-linked investment contracts, in line with the aforementioned reduction in related assets.

Payables from securities financing transactions and brokerage payables were broadly unchanged.

→ **Refer to “Bondholder information” at www.ubs.com/investors for more information on capital and senior debt instruments**

Equity

Equity attributable to shareholders increased to USD 53,309 million as of 31 December 2018 from USD 52,094 million as of 30 September 2018.

Total comprehensive income attributable to shareholders was USD 1,588 million, reflecting net profit of USD 696 million and other comprehensive income (OCI) of USD 892 million. OCI included cash flow hedge OCI of USD 616 million, OCI related to own credit of USD 368 million and OCI related to debt instruments at fair value of USD 44 million, partly offset by negative foreign currency translation OCI of USD 105 million and negative defined benefit plan OCI of USD 31 million.

Share premium increased by USD 113 million, mainly due to the amortization of deferred share-based compensation awards.

Net treasury share activity decreased equity attributable to shareholders by USD 486 million, mainly related to the purchase of shares to hedge future share delivery obligations under share-based compensation plans, and the repurchase of 7.3 million shares under the share repurchase program that was announced in January 2018. Share repurchases under the share repurchase program totaled USD 100 million during the quarter. For the full year 2018, we repurchased 48.3 million shares totaling CHF 750 million under the share repurchase program.

→ **Refer to the “Recent developments” section of this report for information on the change of our presentation currency and certain functional currencies to US dollars in the fourth quarter of 2018**

Off-balance sheet (31 December 2018 vs 30 September 2018)

Forward starting reverse repurchase agreements and forward starting repurchase agreements decreased by USD 15 billion and USD 9 billion, respectively, primarily in Group ALM, reflecting lower activity across the year-end period. Guarantees increased by USD 1 billion to USD 17 billion, primarily in Personal & Corporate Banking. Loan commitments were stable at USD 34 billion.

Net stable funding ratio

As of 31 December 2018, our estimated pro forma net stable funding ratio (NSFR) was 110%, an increase of 5 percentage points from 30 September 2018, primarily reflecting an increase in equity, as well as retail and wholesale deposit increases, issuances of gone concern loss-absorbing instruments and a reduction of trading portfolio assets.

The calculation of our pro forma NSFR includes estimates of the effect of the Basel Committee on Banking Supervision rules and will be refined when NSFR rule-making is completed in Switzerland and as regulatory interpretations evolve and new models and associated systems are enhanced.

→ **Refer to the “Treasury management” section of our Annual Report 2017 for more information on the net stable funding ratio**

Pro forma net stable funding ratio

<i>USD billion, except where indicated</i>	31.12.18	30.9.18

Capital management

This section provides information on key developments during the reporting period and should be read in conjunction with the “Capital management” section of our Annual Report 2017, which provides more information about our strategy, objectives and governance for capital management. Disclosures in this section are provided for UBS Group AG on a consolidated basis and focus on information in accordance with the Basel III framework as applicable to Swiss systemically relevant banks (SRBs).

Information in accordance with the Basel Committee on Banking Supervision framework for UBS Group AG consolidated and UBS AG consolidated, together with capital and other regulatory information for UBS AG standalone, UBS Switzerland AG standalone, UBS Limited standalone and UBS Americas Holding LLC consolidated, will be provided in our 31 December 2018 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups, which will be available from March 2019 under “Pillar 3 disclosures” at www.ubs.com/investors.

Capital and other regulatory information for UBS AG consolidated will be provided in our Annual Report 2018, which will be available from March 2019 under “Quarterly reporting” at www.ubs.com/investors.

UBS Group AG is a holding company and conducts substantially all of its operations through UBS AG and its subsidiaries. UBS Group AG and UBS AG have contributed a significant portion of their respective capital and provide substantial liquidity to subsidiaries, many of which are subject to regulations requiring compliance with minimum capital, liquidity and similar requirements.

Capital management

Total loss-absorbing capacity

The table below provides Swiss SRB going and gone concern information based on transitional arrangements and based on the final rules effective as of 1 January 2020. The remaining differences between the columns “Swiss SRB, including transitional arrangements” and “Swiss SRB as of 1.1.20” are fully related to the eligibility of instruments as required by the too big to fail provisions in the Swiss Capital Adequacy Ordinance applicable to Swiss SRBs, which are described in the “Swiss SRB total loss-absorbing capacity framework” in the “Capital management” section of our Annual Report 2017.

1 As of 31 December 2017, the phase-in deduction applied for the purpose of the CET1 capital calculation was 80%. These effects are fully phased in from 1 January 2018. Prudential filters applied to RWA and LRD are also fully phased in from 1 January 2018. 2 IFRS 9 expected credit loss effects are considered on a phased-in basis in accordance with the FINMA guidance. Refer to “Introduction and basis for preparation” of our 31 December 2018 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups, which will be available from March 2019, under “Pillar 3 disclosures” at www.ubs.com/investors for more information. 3 Low-trigger loss-absorbing additional tier 1 capital of USD 2,445 million was partly offset by required deductions for goodwill of USD 1,329 million. 4 Under the transitional rules of the Swiss SRB framework, outstanding low-trigger loss-absorbing tier 2 capital instruments are subject to amortization starting five years prior to their maturity, with the amortized portion qualifying as gone concern loss-absorbing capacity. 5 Instruments available to meet gone concern requirements are eligible until one year before maturity, with a haircut of 50% applied in the last year of eligibility. 6 Non-Basel III-compliant tier 2 capital instruments qualify as gone concern instruments.

Total loss-absorbing capacity and movement under Swiss SRB rules applicable as of 1 January 2020

Going concern capital and movement

As of 31 December 2018, our common equity tier 1 (CET1) capital decreased by USD 0.3 billion to USD 34.5 billion, as operating profit before tax was more than offset by current tax effects, accruals for capital returns to shareholders and our share repurchase program. Our loss-absorbing additional tier 1 (AT1) capital increased by USD 1.0 billion to USD 12.2 billion as of 31 December 2018, mainly due to the issuance of a USD 0.5 billion equivalent in a Singapore dollar-denominated high-trigger loss-absorbing AT1 capital instrument and USD 0.4 billion of Deferred Contingent Capital Plan (DCCP) award to be granted for the performance year 2018.

Gone concern loss-absorbing capacity and movement

Our total gone concern loss-absorbing capacity increased by USD 1.7 billion to USD 37.5 billion, primarily due to the issuance of USD 1.3 billion equivalent of two total loss-absorbing capacity (TLAC)-eligible senior unsecured debt instruments denominated in Japanese yen.

→ **Refer to “Bondholder information” at www.ubs.com/investors for more information on the eligibility of capital and senior unsecured debt instruments and on key features and terms and conditions of capital instruments**

Loss-absorbing capacity and leverage ratios

Our CET1 capital ratio decreased 0.5 percentage points to 13.1%, reflecting a USD 6.7 billion increase in RWA.

Our CET1 leverage ratio increased from 3.80% to 3.81% in the fourth quarter of 2018, reflecting a USD 10 billion decrease in the LRD.

Our gone concern loss-absorbing capacity ratio increased 0.3 percentage points to 14.2%, mainly driven by the increase in gone concern loss-absorbing capacity, offset by the aforementioned increase in RWA. Our gone concern leverage ratio increased 0.2 percentage points to 4.1%, due to the increase in gone concern loss-absorbing capacity and the decrease in the LRD.

Additional information

Sensitivity to currency movements

Effective from 1 October 2018, the functional currency of UBS Group AG and UBS AG's Head office in Switzerland changed from Swiss francs to US dollars. To minimize adverse effects from changes in currency rates against US dollar on our CET1 capital and CET1 capital ratio, we adjusted the currency mix in capital, within limits set by the Board of Directors, to balance the effect of foreign exchange movements. Limits are in place for the sensitivity of both CET1 capital and the capital ratio to an appreciation or depreciation of 10% in the value of US dollar against other currencies.

→ **Refer to the “Recent developments” section of this report for more information**

Risk-weighted assets

We estimate that a 10% depreciation of the US dollar against other currencies would have increased our RWA by USD 11 billion and our CET1 capital by USD 1.2 billion as of 31 December 2018 and reduced our CET1 capital ratio by 9 basis points. Conversely, we estimate that a 10% appreciation of the US dollar against other currencies would have reduced our RWA by USD 10 billion and our CET1 capital by USD 1.1 billion, and increased our CET1 capital ratio by 9 basis points.

→ **Refer to “Active management of sensitivity to currency movements” in the “Capital management” section of our Annual Report 2018, which will be available from March 2019, for more information**

Leverage ratio denominator

Our leverage ratio is also sensitive to foreign exchange movements, due to the currency mix of our capital and LRD. When adjusting the currency mix in capital, potential effects on the going concern leverage ratio are taken into account and the sensitivity of the going concern leverage ratio to an appreciation or depreciation of 10% in the value of the US dollar against other currencies is actively monitored.

We estimate that a 10% depreciation of the US dollar against other currencies would have increased our LRD by USD 57 billion and reduced our fully applied Swiss SRB going concern leverage ratio by 16 basis points. Conversely, we estimate that a 10% appreciation of the US dollar against other currencies would have reduced our LRD by USD 51 billion and increased our fully applied Swiss SRB going concern leverage ratio by 16 basis points.

The aforementioned sensitivities do not consider foreign currency translation effects related to defined benefit plans, other than those related to the currency translation of the net equity of foreign operations.

→ **Refer to “Active management of sensitivity to currency movements” in the “Capital management” section of our Annual Report 2018, which will be available from March**

2019, for more information

Estimated effect on capital from litigation, regulatory and similar matters subject to provisions and contingent liabilities

We have estimated the loss in capital that we could incur as a result of the risks associated with the matters described in “Provisions and contingent liabilities” in the “Consolidated financial information” section of this report. We have used for this purpose the advanced measurement approach (AMA) methodology that we use when determining the capital requirements associated with operational risks, based on a 99.9% confidence level over a 12-month horizon. The methodology takes into consideration UBS and industry experience for the AMA operational risk categories to which those matters correspond, as well as the external environment affecting risks of these types, in isolation from other areas.

On this standalone basis, we estimate the loss in capital that we could incur over a 12-month period as a result of our risks associated with these operational risk categories at USD 4.5 billion as of 31 December 2018, a reduction of USD 0.3 billion from 30 September 2018. This estimate is not related to and does not take into account any provisions recognized for any of these matters and does not constitute a subjective assessment of our actual exposure in any of these matters.

→ **Refer to “Operational risk” in the “Risk management and control” section of our Annual Report 2017 for more information**

→ **Refer to “Provisions and contingent liabilities” in the “Consolidated financial information” section of this report for more information**

Capital management

Risk-weighted assets

During the fourth quarter of 2018, risk-weighted assets (RWA) increased by USD 6.7 billion to USD 263.7 billion, reflecting increases from asset size and other movements of USD 6.9 billion and regulatory add-ons of USD 2.0 billion, partly offset by decreases driven by model updates of USD 1.4 billion, currency effects of USD 0.5 billion and methodology and policy changes of USD 0.3 billion.

Movement in risk-weighted assets by key driver

<i>USD billion</i>	RWA as of	Currency effects	Methodology and policy changes	Model updates /Regulatory changes	Asset size and other ¹	RWA as of
	30.9.18					31.12.18
Credit and counterparty credit risk ²	146.3	(0.3)	(0.3)	2.4	0.6 (0.8)	147.9
Non-counterparty-related risk	18.2	(0.2)			0.3	18.3
Market risk	11.6			(0.5)	1.4	20.0
Operational risk	80.9			(3.4)		77.6
Total	257.0	(0.5)	(0.3)	(1.4)	2.0	263.7

¹ Includes the Pillar 3 categories "Asset size," "Credit quality of counterparties," "Acquisitions and disposals" and "Other." Refer to the 31 December 2018 Pillar 3 report – UBS Group and significant regulated subsidiaries and sub-groups, which will be available from March 2019, under "Pillar 3 disclosures" at www.ubs.com/investors for more information. ² Includes settlement risk, credit valuation adjustments, equity exposures in the banking book and securitization exposures in the banking book.

Credit and counterparty credit risk

Credit and counterparty credit risk RWA increased by USD 1.6 billion to USD 147.9 billion as of 31 December 2018.

The net increase of USD 2.4 billion in RWA from model updates was primarily driven by the continued phase-in of RWA increases related to: probability of default (PD) and loss given default (LGD) changes from the implementation of revised models for Swiss residential mortgages and income-producing real estate; the new LGD model for unsecured financing and commercial self-used real estate; and calibration of aircraft leasing PD and LGD parameters, together resulting in an increase of USD 2.3 billion in Personal & Corporate Banking and USD 0.3 billion in Global Wealth Management. The aforementioned increases were partly offset by a decrease of USD 0.2 billion from the LGD parameter update for sovereigns, mainly in the Investment Bank.

In addition, regulatory add-ons increased RWA by USD 0.6 billion due to a higher internal ratings-based (IRB) multiplier on Investment Bank exposures to corporates.

A decrease of USD 0.3 billion from methodology and policy changes was due to a revision of methodology applied for Lombard lending transactions in Japan.

We expect that methodology changes and model updates, including the continued phase-in of RWA increases related to PD and LGD factors on Swiss mortgages, will increase credit and counterparty credit risk RWA by around USD 3 billion in the first quarter of 2019. The extent and timing of RWA increases may vary as methodology changes and model updates are completed and receive regulatory approval, and as regulatory multipliers are adjusted. In addition, changes in composition of the relevant portfolios and other factors will affect our RWA.

Furthermore, RWA will increase by approximately USD 3.5 billion in the first quarter of 2019 due to the implementation of IFRS 16, *Leases*.

1 Includes settlement risk, credit valuation adjustments, equity exposures in the banking book and securitization exposures in the banking book. 2 Non-counterparty-related risk includes deferred tax recognized for temporary differences (31 December 2018: USD 8.8 billion; 30 September 2018: USD 8.8 billion), property, equipment and software (31 December 2018: USD 9.3 billion; 30 September 2018: USD 9.2 billion) and other items (31 December 2018: USD 0.2 billion; 30 September 2018: USD 0.2 billion). 3 As of 31 December 2018, the effect of portfolio diversification across businesses, which was previously reflected in Corporate Center – Services market risk RWA, was included in the Investment Bank market risk RWA. 4 Represents RWA held by the respective business division or Corporate Center unit. 5 Represents RWA held by Corporate Center – Group ALM that are directly associated with activity managed centrally.

behalf of the business divisions and other Corporate Center units. Refer to “Equity attribution and retained equity” in this section for more information.

Capital management

Leverage ratio denominator

During the fourth quarter of 2018, the leverage ratio denominator (LRD) decreased by USD 10 billion to USD 905 billion. This decrease was driven by asset size and other movements of USD 8 billion and by currency effects of USD 2 billion.

Movement in leverage ratio denominator by key driver

	LRD as of	Currency	Asset size and	LRD as of
<i>USD billion</i>	30.9.18	effects	other	31.12.18
On-balance sheet exposures (excluding derivative exposures and SFTs) ¹	672.3	(1.5)	(7.7)	663.1
Derivative exposures	99.5	(0.3)	(3.8)	95.4
Securities financing transactions	125.5	(0.2)	5.6	130.9
Off-balance sheet items	31.1	(0.1)	(2.0)	29.0
Deduction items	(13.4)	0.0	(0.4)	(13.8)
Total	915.1	(2.1)	(8.4)	904.6

¹ Excludes derivative financial instruments, cash collateral receivables on derivative instruments, receivables from securities financing transactions, and margin loans as well as prime brokerage receivables and financial assets at fair value not held for trading, both related to securities financing transactions, which are presented separately under Derivative exposures and Securities financing transactions in this table.

The LRD movements described below exclude currency effects.

On-balance sheet exposures (excluding derivatives and securities financing transactions (SFTs)) decreased by USD 8 billion. A decrease in exposures in the Investment Bank, mainly resulting from client-driven reductions and trade unwinds within the Equities business, was partly offset by an increase in cash and balances in central banks in Corporate Center – Group Asset and Liability Management (Group ALM) as client-driven activity affected funding consumption by the business divisions.

Derivative exposures decreased by USD 4 billion, reflecting decreased notional amounts and add-on exposures under the current exposure method from a net increase of client-driven trade terminations and maturities across all businesses within the Investment Bank.

These decreases were partly offset by an increase in SFTs of USD 6 billion, primarily driven by reinvestment of cash and cash equivalents in Corporate Center – Group ALM and partly offset by lower prime brokerage receivables in the Investment Bank's Equities business.

In the first quarter of 2019, LRD will increase by approximately USD 3.5 billion due to the implementation of IFRS 16, *Leases*.

→ **Refer to the “Balance sheet, liquidity and funding management” section of this report for more information on balance sheet movements**

1 Represents the difference between the IFRS and the regulatory scope of consolidation, which is the applicable scope for the LRD calculation. 2 Consists of derivative financial instruments, cash collateral receivables on derivative instruments, receivables from securities financing transactions, and margin loans as well as prime brokerage receivables and financial assets at fair value not held for trading, but related to securities financing transactions, in accordance with the regulatory scope of consolidation, which are presented separately under Derivative exposures and Securities financing transactions. 3 Represents LRD held by the respective business division or Corporate Center unit. 4 Represents LRD held by Corporate Center – Group ALM that is directly associated with activity managed centrally on behalf of the business divisions and other Corporate Center units. Refer to “Equity attribution and return on attributed equity” in this section for more information.

Capital management

Equity attribution and return on attributed equity

Under our equity attribution framework, tangible equity is attributed based on a weighting of 50% each for average risk-weighted assets (RWA) and average leverage ratio denominator (LRD). Average RWA and LRD are converted to their common equity tier 1 (CET1) capital equivalents based on capital ratios of 11% and 3.75%, respectively. If the tangible attributed equity calculated under the weighted-driver approach is less than the CET1 capital equivalent of risk-based capital (RBC) for any business division, the CET1 capital equivalent of RBC is used as a floor for that business division.

LRD and RWA held by Corporate Center – Group Asset and Liability Management (Group ALM) directly associated with activities that Corporate Center – Group ALM manages centrally on behalf of the business divisions and other Corporate Center units are allocated to those business divisions and other Corporate Center units for the purpose of equity attribution. This allocation is primarily based on the level of high-quality liquid assets that is needed to meet the Group’s minimum liquidity coverage ratio requirement of 110%. Corporate Center – Group ALM retains attributed equity related to liquidity and funding surpluses, i.e., at levels above regulatory requirements, together with that related to its own activities.

In addition to tangible equity, we allocate equity to our businesses to support goodwill and intangible assets.

Furthermore, we attribute all remaining Basel III capital deduction items to Group items. These deduction items include deferred tax assets (DTAs) recognized for tax loss carry-forwards and DTAs on temporary differences in excess of the threshold, which together constitute the largest component of Group items, dividend accruals, unrealized gains from cash flow hedges and compensation- and own shares-related components.

→ **Refer to the “Capital management” section of our Annual Report 2017 for more information on the equity attribution framework**

→ **Refer to the “Recent developments” section of this report for more information on planned changes to the equity attribution framework**

Unaudited

Information in this section is presented for UBS Group AG on a consolidated basis unless otherwise specified. In preparing this financial information, the same accounting policies and methods of computation have been applied as in the UBS Group AG consolidated annual Financial Statements for the period ended 31 December 2017, except for the changes described in “Note 1 Basis of accounting” in the “Consolidated financial statements” section of the first, second and third quarter 2018 reports. The financial information presented is unaudited and does not constitute financial statements prepared in accordance with International Financial Reporting Standards (IFRS).

Changes to our functional and presentation currencies

Effective from 1 October 2018, the functional currency of UBS Group AG and UBS AG's Head Office in Switzerland changed from Swiss francs to US dollars and that of UBS AG's London Branch from British pounds to US dollars, in compliance with the requirements of International Accounting Standard (IAS) 21, *The Effects of Changes in Foreign Exchange Rates*. The presentation currency of UBS Group AG's consolidated financial information, beginning with this fourth quarter 2018 report, has changed from Swiss francs to US dollars to align with the functional currency changes of significant group entities. Prior periods have been restated for this change in presentation currency. Assets, liabilities and total equity were converted to US dollars at closing exchange rates prevailing on the respective balance sheet dates, and income and expenses were translated at the respective average rates prevailing for the relevant periods.

Effect of dilutive potential shares resulting from notional	107,685,855	107,610,429	13 ²	111,271,269	120,540,272

shares, in-the-money options and warrants outstanding					
Weighted average shares outstanding for diluted EPS	3,820,546,150	3,836,993,420	3,719,192,980	3,841,569,146	3,836,714,533

Earnings per share (USD)

Basic	0.19	0.34	(0.65)	1.31	0.26
Diluted	0.18	0.33	(0.65)	1.27	0.25

Shares outstanding

Shares issued	3,855,634,749	3,855,121,120	3,853,096,603		
Treasury shares	166,467,802	128,747,979	132,301,550		
Shares outstanding	3,689,166,947	3,726,373,141	3,720,795,053		

1 The weighted average shares outstanding for basic EPS are calculated by taking the number of shares at the beginning of the period, adjusted by the number of shares acquired or issued during the period, multiplied by a time-weighted factor for the period outstanding. As a result, balances are affected by the timing of acquisitions and issuances during the period.

The table below outlines the potential shares that could dilute basic earnings per share in the future, but were not dilutive for the periods presented.

<i>Number of shares</i>	31.12.18	30.9.18	31.12.17	31.12.18	31.12.17
Potentially dilutive instruments					
Employee share-based compensation awards	3,605,198	2,690,180	155,972,370 ²	3,605,198	24,124,341
Other equity derivative contracts	15,501,021	13,427,788	9,191,987	11,912,450	9,122,496
Total	19,106,219	16,117,968	165,164,357	15,517,648	33,246,837

2 Due to the net loss in the fourth quarter of 2017, a weighted average of 127,252,442 potential shares from unvested notional share awards and options outstanding were not included in the calculation of diluted EPS as they were anti-dilutive for the quarter ended 31

December 2017. Such shares are only taken into account for the diluted EPS calculation when their conversion to ordinary shares would decrease earnings per share or increase loss per share, in accordance with IAS 33, Earnings per Share.

Provisions and contingent liabilities

a) Provisions

The table below presents an overview of total provisions recognized under both IAS 37 and IFRS 9.

<i>USD million</i>	31.12.18	30.9.18	31.12.17
Provisions recognized under IAS 37	2,996	2,903	3,180
Provisions for off-balance sheet financial instruments ¹	79	80	34
Provisions for other credit lines ¹	37	37	0
Total provisions	3,112	3,019	3,214

¹ Provisions recognized in 2018 relate to exposures in the scope of the expected credit loss requirements of IFRS 9. 2017 provisions for off-balance sheet financial instruments relate to loss provisions recognized under IAS 37.

The following table presents additional information for provisions recognized under IAS 37.

<i>USD million</i>	Operational and similar risks¹	Litigation, regulatory matters²	Restructuring	Real estate	Employee benefits⁵	Other	Total
Balance as of 31 December 2017	44	2,508	331	137	70	91	3,180

costs								
Foreign currency translation / unwind of discount	1	(5)	(1)	0	(1)	0	(6)	
Balance as of 31 December 2018	46	2,445	224³	131⁴	70	78	2,996	

1 Comprises provisions for losses resulting from security risks and transaction processing risks. 2 Comprises provisions for losses resulting from legal, liability and compliance risks. 3 Primarily consists of personnel-related restructuring provisions of USD 50 million as of 31 December 2018 (30 September 2018: USD 48 million; 31 December 2017: USD 85 million) and provisions for onerous lease contracts of USD 170 million as of 31 December 2018 (30 September 2018: USD 167 million; 31 December 2017: USD 241 million). 4 Consists of reinstatement costs for leasehold improvements of USD 89 million as of 31 December 2018 (30 September 2018: USD 86 million; 31 December 2017: USD 95 million) and provisions for onerous lease contracts of USD 42 million as of 31 December 2018 (31 September 2018: USD 39 million; 31 December 2017: USD 42 million). 5 Includes provisions for sabbatical and anniversary awards.

Restructuring provisions primarily relate to onerous lease contracts and severance payments. The use of onerous lease provisions is driven by the maturities of the underlying lease contracts. Severance-related provisions are used within a short time period, usually within six months, but potential changes in amount may be triggered when natural staff attrition reduces the number of people affected by a restructuring and therefore the estimated costs.

Information on provisions and contingent liabilities in respect of litigation, regulatory and similar matters, as a class, is included in part b). There are no material contingent liabilities associated with the other classes of provisions.

b) Litigation, regulatory and similar matters

The Group operates in a legal and regulatory environment that exposes it to significant litigation and similar risks arising from disputes and regulatory proceedings. As a result, UBS (which for purposes of this disclosure may refer to UBS Group AG and / or one or more of its subsidiaries, as applicable) is involved in various disputes and legal proceedings, including litigation, arbitration, and regulatory and criminal investigations.

Such matters are subject to many uncertainties, and the outcome and the timing of resolution are often difficult to predict, particularly in the earlier stages of a case. There are also situations where the Group may enter into a settlement agreement. This may occur in order to avoid the expense, management distraction or reputational implications of continuing to contest liability, even for those matters for which the Group believes it should be exonerated. The uncertainties inherent in all such matters affect the amount and timing of any potential outflows for both matters with respect to which provisions have been established and other contingent liabilities. The Group makes provisions for such matters brought against it when, in the opinion of management after seeking legal advice, it is more likely than not that the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required, and the amount can be reliably estimated. Where these factors are otherwise satisfied, a provision may be established for claims that

have not yet been asserted against the Group, but are nevertheless expected to be, based on the Group's experience with similar asserted claims. If any of those conditions is not met, such matters result in contingent liabilities. If the amount of an obligation cannot be reliably estimated, a liability exists that is not recognized even if an outflow of resources is probable. Accordingly, no provision is established even if the potential outflow of resources with respect to such matters could be significant. Developments relating to a matter that occur after the relevant reporting period, but prior to the issuance of financial statements, which affect management's assessment of the provision for such matter, because, for example, the developments provide evidence of conditions that existed at the end of the reporting period, are adjusting events after the reporting period under IAS 10 and must be recognized in the financial statements for the reporting period.

UBS Group AG interim consolidated financial information (unaudited)

Provisions and contingent liabilities (continued)

Specific litigation, regulatory and other matters are described below, including all such matters that management considers to be material and others that management believes to be of significance due to potential financial, reputational and other effects. The amount of damages claimed, the size of a transaction or other information is provided where available and appropriate in order to assist users in considering the magnitude of potential exposures.

In the case of certain matters below, we state that we have established a provision, and for the other matters, we make no such statement. When we make this statement and we expect disclosure of the amount of a provision to prejudice seriously our position with other parties in the matter because it would reveal what UBS believes to be the probable and reliably estimable outflow, we do not disclose that amount. In some cases we are subject to confidentiality obligations that preclude such disclosure. With respect to the matters for which we do not state whether we have established a provision, either (a) we have not established a provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) we have established a provision but expect disclosure of that fact to prejudice seriously our position with other parties in the matter because it would reveal the fact that UBS believes an outflow of resources to be probable and reliably estimable.

With respect to certain litigation, regulatory and similar matters for which we have established provisions, we are able to estimate the expected timing of outflows. However, the aggregate amount of the expected outflows for those matters for which we are able to estimate expected timing is immaterial relative to our current and expected levels of liquidity over the relevant time periods.

The aggregate amount provisioned for litigation, regulatory and similar matters as a class is disclosed in the "Provisions" table in part a) above. It is not practicable to provide an aggregate estimate of liability for our litigation, regulatory and similar matters as a class of contingent liabilities. Doing so would require us to provide speculative legal assessments as to claims and proceedings that involve unique fact patterns or novel legal theories, that have not yet been initiated or are at early stages of adjudication, or as to which alleged damages have not been quantified by the claimants. Although we therefore cannot provide a numerical estimate of the future losses that could arise from litigation, regulatory and similar matters, we believe that the aggregate amount of possible future losses from this class that are more than remote substantially exceeds the level of current provisions. Litigation, regulatory and similar matters may also result in non-monetary penalties and consequences. For example, the Non-Prosecution Agreement (NPA) described in item 5 of this disclosure, which we entered into with the US Department of Justice (DOJ), Criminal Division, Fraud Section in connection with our submissions of benchmark interest rates, including, among others, the British Bankers' Association London Interbank Offered Rate (LIBOR), was terminated by the DOJ based on its determination that we had committed a US crime in relation to foreign exchange matters. As a consequence, UBS AG pleaded guilty to one count of wire fraud for conduct in the LIBOR matter, paid a fine and is subject to probation through January 2020. A guilty plea to, or conviction of, a crime could have material consequences for UBS. Resolution of regulatory proceedings may require us to obtain waivers of regulatory disqualifications to maintain certain operations, may entitle regulatory authorities to limit, suspend or terminate

licenses and regulatory authorizations, and may permit financial market utilities to limit, suspend or terminate our participation in such utilities. Failure to obtain such waivers, or any limitation, suspension or termination of licenses, authorizations or participations, could have material consequences for UBS.

The risk of loss associated with litigation, regulatory and similar matters is a component of operational risk for purposes of determining our capital requirements. Information concerning our capital requirements and the calculation of operational risk for this purpose is included in the "Capital management" section of this report.

Provisions and contingent liabilities (continued)

1. Inquiries regarding cross-border wealth management businesses

Tax and regulatory authorities in a number of countries have made inquiries, served requests for information or examined employees located in their respective jurisdictions relating to the cross-border wealth management services provided by UBS and other financial institutions. It is possible that the implementation of automatic tax information exchange and other measures relating to cross-border provision of financial services could give rise to further inquiries in the future. UBS has received disclosure orders from the Swiss Federal Tax Administration (FTA) to transfer information based on requests for international administrative assistance in tax matters. The requests concern a number of UBS account numbers pertaining to current and former clients and are based on data from 2006 and 2008. UBS has taken steps to inform affected clients about the administrative assistance proceedings and their procedural rights, including the right to appeal. The requests are based on data received from the German authorities, who seized certain data related to UBS clients booked in Switzerland during their investigations and have apparently shared this data with other European countries. UBS expects additional countries to file similar requests.

The Swiss Federal Administrative Court ruled in 2016 that, in the administrative assistance proceedings related to a French bulk request, UBS has the right to appeal all final FTA client data disclosure orders. On 30 July 2018, the Swiss Federal Administrative Court granted UBS's appeal by holding the French administrative assistance request inadmissible. The FTA filed a final appeal with the Swiss Federal Supreme Court.

Since 2013, UBS (France) S.A., UBS AG and certain former employees have been under investigation in France for alleged complicity in having illicitly solicited clients on French territory, regarding the laundering of proceeds of tax fraud, and of banking and financial solicitation by unauthorized persons. In connection with this investigation, the investigating judges ordered UBS AG to provide bail ("caution") of EUR 1.1 billion and UBS (France) S.A. to post bail of EUR 40 million, which was reduced on appeal to EUR 10 million.

In March 2017, the investigating judges issued a trial order ("ordonnance de renvoi") that charges UBS AG and UBS (France) S.A., as well as various former employees, with illicit solicitation of clients on French territory and with participation in the laundering of the proceeds of tax fraud. The trial on these charges in the court of first instance took place from 8 October 2018 until 15 November 2018. During the trial, the prosecutors and the French State requested penalties and civil monetary damages in connection with the money laundering charges aggregating EUR 5.3 billion. UBS believes that the amounts requested were not supported by the evidence presented or the law, and that there are strong legal defenses to the relevant charges. The court is expected to announce a judgment on 20 February 2019.

In 2016, UBS was notified by the Belgian investigating judge that it is under formal investigation ("inculpé") regarding the laundering of proceeds of tax fraud, of banking and

financial solicitation by unauthorized persons, and of serious tax fraud. In 2018, tax authorities and a prosecutor's office in Italy asserted UBS is potentially liable for taxes and penalties as a result of its activities in Italy from 2012 to 2017.

UBS has, and reportedly numerous other financial institutions have, received inquiries from authorities concerning accounts relating to the Fédération Internationale de Football Association (FIFA) and other constituent soccer associations and related persons and entities. UBS is cooperating with authorities in these inquiries.

Our balance sheet at 31 December 2018 reflected provisions with respect to matters described in this item 1 in an amount that UBS believes to be appropriate under the applicable accounting standard. As in the case of other matters for which we have established provisions, the future outflow of resources in respect of such matters cannot be determined with certainty based on currently available information and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that we have recognized.

2. Claims related to sales of residential mortgage-backed securities and mortgages

From 2002 through 2007, prior to the crisis in the US residential loan market, UBS was a substantial issuer and underwriter of US residential mortgage-backed securities (RMBS) and was a purchaser and seller of US residential mortgages. A subsidiary of UBS, UBS Real Estate Securities Inc. (UBS RESI), acquired pools of residential mortgage loans from originators and (through an affiliate) deposited them into securitization trusts. In this manner, from 2004 through 2007, UBS RESI sponsored approximately USD 80 billion in RMBS, based on the original principal balances of the securities issued.

UBS RESI also sold pools of loans acquired from originators to third-party purchasers. These whole loan sales during the period 2004 through 2007 totaled approximately USD 19 billion in original principal balance.

UBS was not a significant originator of US residential loans. A branch of UBS originated approximately USD 1.5 billion in US residential mortgage loans during the period in which it was active from 2006 to 2008, and securitized less than half of these loans.

UBS Group AG interim consolidated financial information (unaudited)

Provisions and contingent liabilities (continued)

Lawsuits related to contractual representations and warranties concerning mortgages and RMBS: When UBS acted as an RMBS sponsor or mortgage seller, it generally made certain representations relating to the characteristics of the underlying loans. In the event of a material breach of these representations, UBS was in certain circumstances contractually obligated to repurchase the loans to which the representations related or to indemnify certain parties against losses. In 2012, certain RMBS trusts filed an action in the US District Court for the Southern District of New York (SDNY) seeking to enforce UBS RESI's obligation to repurchase loans in the collateral pools for three RMBS securitizations issued and underwritten by UBS with an original principal balance of approximately USD 2 billion. In July 2018, UBS and the trustee entered into an agreement under which UBS will pay USD 850 million to resolve this matter. A significant portion of this amount will be borne by other parties that indemnified UBS. The settlement remains subject to court approval and proceedings to determine how the settlement funds will be distributed to RMBS holders. After giving effect to this settlement, UBS considers claims relating to substantially all loan repurchase demands to be resolved, and believes that new demands to repurchase US residential mortgage loans are time-barred under a decision rendered by the New York Court of Appeals.

Mortgage-related regulatory matters: Since 2014, the US Attorney's Office for the Eastern District of New York has sought information from UBS pursuant to the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), related to UBS's RMBS business from 2005 through 2007. On 8 November 2018, the DOJ filed a civil complaint in the District court for the Eastern District of New York (EDNY). The complaint seeks unspecified civil monetary penalties under FIRREA related to UBS's issuance, underwriting and sale of 40 residential mortgage backed securities transactions in 2006 and 2007.

Our balance sheet at 31 December 2018 reflected a provision with respect to matters described in this item 2 in an amount that UBS believes to be appropriate under the applicable accounting standard. As in the case of other matters for which we have established provisions, the future outflow of resources in respect of this matter cannot be determined with certainty based on currently available information and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that we have recognized.

3. Madoff

In relation to the Bernard L. Madoff Investment Securities LLC (BMIS) investment fraud, UBS AG, UBS (Luxembourg) S.A. (now UBS Europe SE, Luxembourg branch) and certain other UBS subsidiaries have been subject to inquiries by a number of regulators, including the Swiss Financial Market Supervisory Authority (FINMA) and the Luxembourg Commission de Surveillance du Secteur Financier (CSSF). Those inquiries concerned two third-party funds established under Luxembourg law, substantially all assets of which were with BMIS, as well as certain funds established in offshore jurisdictions with either direct or indirect exposure to BMIS. These funds faced severe losses, and the Luxembourg funds are in liquidation. The

documentation establishing both funds identifies UBS entities in various roles, including custodian, administrator, manager, distributor and promoter, and indicates that UBS employees serve as board members.

In 2009 and 2010, the liquidators of the two Luxembourg funds filed claims against UBS entities, non-UBS entities and certain individuals, including current and former UBS employees, seeking amounts aggregating approximately EUR 2.1 billion, which includes amounts that the funds may be held liable to pay the trustee for the liquidation of BMIS (BMIS Trustee).

A large number of alleged beneficiaries have filed claims against UBS entities (and non-UBS entities) for purported losses relating to the Madoff fraud. The majority of these cases have been filed in Luxembourg, where decisions that the claims in eight test cases were inadmissible have been affirmed by the Luxembourg Court of Appeal, and the Luxembourg Supreme Court has dismissed a further appeal in one of the test cases.

In the US, the BMIS Trustee filed claims against UBS entities, among others, in relation to the two Luxembourg funds and one of the offshore funds. The total amount claimed against all defendants in these actions was not less than USD 2 billion. In 2014, the US Supreme Court rejected the BMIS Trustee's motion for leave to appeal decisions dismissing all claims except those for the recovery of fraudulent conveyances and preference payments. In 2016, the bankruptcy court dismissed the remaining claims against the UBS entities. The BMIS Trustee appealed.

Provisions and contingent liabilities (continued)

4. Puerto Rico

Declines since 2013 in the market prices of Puerto Rico municipal bonds and of closed-end funds (funds) that are sole-managed and co-managed by UBS Trust Company of Puerto Rico and distributed by UBS Financial Services Incorporated of Puerto Rico (UBS PR) have led to multiple regulatory inquiries, as well as customer complaints and arbitrations with aggregate claimed damages of USD 2.9 billion, of which claims with aggregate claimed damages of USD 1.9 billion have been resolved through settlements, arbitration or withdrawal of the claim. The claims have been filed by clients in Puerto Rico who own the funds or Puerto Rico municipal bonds and / or who used their UBS account assets as collateral for UBS non-purpose loans; customer complaint and arbitration allegations include fraud, misrepresentation and unsuitability of the funds and of the loans.

A shareholder derivative action was filed in 2014 against various UBS entities and current and certain former directors of the funds, alleging hundreds of millions of US dollars in losses in the funds. In 2015, defendants' motion to dismiss was denied and a request for permission to appeal that ruling was denied by the Puerto Rico Supreme Court. In 2014, a federal class action complaint also was filed against various UBS entities, certain members of UBS PR senior management and the co-manager of certain of the funds, seeking damages for investor losses in the funds during the period from May 2008 through May 2014. Following denial of the plaintiffs' motion for class certification, the case was dismissed in October 2018.

In 2014 and 2015, UBS entered into settlements with the Office of the Commissioner of Financial Institutions for the Commonwealth of Puerto Rico (OCFI), the SEC and the Financial Industry Regulatory Authority (FINRA) in relation to their examinations of UBS's operations. We also understand that the DOJ is conducting a criminal inquiry into the impermissible reinvestment of non-purpose loan proceeds. We are cooperating with the authorities in this inquiry.

In 2011, a purported derivative action was filed on behalf of the Employee Retirement System of the Commonwealth of Puerto Rico (System) against over 40 defendants, including UBS PR, which was named in connection with its underwriting and consulting services. Plaintiffs alleged that defendants violated their purported fiduciary duties and contractual obligations in connection with the issuance and underwriting of USD 3 billion of bonds by the System in 2008 and sought damages of over USD 800 million. In 2016, the court granted the System's request to join the action as a plaintiff, but ordered that plaintiffs must file an amended complaint. In 2017, the court denied defendants' motion to dismiss the amended complaint.

Beginning in 2015, and continuing through 2017, certain agencies and public corporations of the Commonwealth of Puerto Rico (Commonwealth) defaulted on certain interest payments on Puerto Rico bonds. In 2016, US federal legislation created an oversight board with power to oversee Puerto Rico's finances and to restructure its debt. The oversight board has imposed a stay on the exercise of creditors' rights. In 2017, the oversight board placed certain of the

bonds into a bankruptcy-like proceeding under the supervision of a Federal District Judge. These events, further defaults, any further legislative action to create a legal means of restructuring Commonwealth obligations or to impose additional oversight on the Commonwealth's finances, or any restructuring of the Commonwealth's obligations may increase the number of claims against UBS concerning Puerto Rico securities, as well as potential damages sought.

Our balance sheet at 31 December 2018 reflected provisions with respect to matters described in this item 4 in amounts that UBS believes to be appropriate under the applicable accounting standard. As in the case of other matters for which we have established provisions, the future outflow of resources in respect of such matters cannot be determined with certainty based on currently available information and accordingly may ultimately prove to be substantially greater (or may be less) than the provisions that we have recognized.

UBS Group AG interim consolidated financial information (unaudited)

Provisions and contingent liabilities (continued)

5. Foreign exchange, LIBOR and benchmark rates, and other trading practices

Foreign exchange-related regulatory matters: Beginning in 2013 numerous authorities commenced investigations concerning possible manipulation of foreign exchange markets and precious metals prices. In 2014 and 2015, UBS reached settlements with the UK Financial Conduct Authority (FCA) and the US Commodity Futures Trading Commission (CFTC) in connection with their foreign exchange investigations, FINMA issued an order concluding its formal proceedings relating to UBS's foreign exchange and precious metals businesses, and the Board of Governors of the Federal Reserve System (Federal Reserve Board) and the Connecticut Department of Banking issued a Cease and Desist Order and assessed monetary penalties against UBS AG. In 2015, the DOJ's Criminal Division (Criminal Division) terminated the 2012 Non-Prosecution Agreement (NPA) with UBS AG related to UBS's submissions of benchmark interest rates and UBS AG pleaded guilty to one count of wire fraud, paid a fine and is subject to probation through January 2020. UBS has ongoing obligations to cooperate with these authorities and to undertake certain remediation measures. UBS has also been granted conditional immunity by the Antitrust Division of the DOJ (Antitrust Division) and by authorities in other jurisdictions in connection with potential competition law violations relating to foreign exchange and precious metals businesses. Investigations relating to foreign exchange and precious metals matters by certain authorities remain ongoing notwithstanding these resolutions.

Foreign exchange-related civil litigation: Putative class actions have been filed since 2013 in US federal courts and in other jurisdictions against UBS and other banks on behalf of putative classes of persons who engaged in foreign currency transactions with any of the defendant banks. UBS has entered into a settlement agreement that would resolve US federal court class actions relating to foreign currency transactions with the defendant banks and persons who transacted in foreign exchange futures contracts and options on such futures. The settlement agreement, which has been approved by the court, requires, among other things, that UBS pay an aggregate of USD 141 million and provide cooperation to the settlement classes. Certain class members have excluded themselves from that settlement and have filed individual actions in US and English courts against UBS and other banks alleging violations of US and European competition laws and unjust enrichment.

In 2015, a putative class action was filed in federal court against UBS and numerous other banks on behalf of persons and businesses in the US who directly purchased foreign currency from the defendants and alleged co-conspirators for their own end use. In March 2017, the court granted UBS's (and the other banks') motions to dismiss the complaint. The plaintiffs filed an amended complaint in August 2017. In March 2018, the court denied the defendants' motions to dismiss the amended complaint.

In 2016, a putative class action was filed in federal court in New York against UBS and numerous other banks on behalf of persons and entities who had indirectly purchased foreign exchange instruments from a defendant or co-conspirator in the US. The complaint asserts

claims under federal and state antitrust laws. In response to defendants' motion to dismiss, plaintiffs agreed to dismiss their complaint.

In 2017, two new putative class actions were filed in federal court in New York against UBS and numerous other banks on behalf of different proposed classes of indirect purchasers of currency, and a consolidated complaint was filed in June 2017. In March 2018, the court dismissed the consolidated complaint. In October 2018, the court granted plaintiffs' motion seeking leave to file an amended complaint.

Putative class actions were also filed against UBS and other banks in federal court in New York and other jurisdictions on behalf of putative classes of persons who had bought or sold physical precious metals and various precious metal products and derivatives. The complaints in these lawsuits asserted claims under the antitrust laws and the Commodity Exchange Act (CEA), and other claims. In July 2018, the court in New York granted UBS's motions to dismiss amended complaints in the putative class actions relating to gold and silver. In 2017, the court granted UBS's motion to dismiss the platinum and palladium action. Plaintiffs in the platinum and palladium action subsequently filed an amended complaint that did not allege claims against UBS.

Provisions and contingent liabilities (continued)

LIBOR and other benchmark-related regulatory matters: Numerous government agencies, including the SEC, the CFTC, the DOJ, the FCA, the UK Serious Fraud Office (SFO), the Monetary Authority of Singapore (MAS), the Hong Kong Monetary Authority (HKMA), FINMA, various state attorneys general in the US and competition authorities in various jurisdictions, have conducted or are continuing to conduct investigations regarding potential improper attempts by UBS, among others, to manipulate LIBOR and other benchmark rates at certain times. In 2012, UBS reached settlements relating to benchmark interest rates with the UK Financial Services Authority (FSA), the CFTC and the Criminal Division of the DOJ, and FINMA issued an order in its proceedings with respect to UBS relating to benchmark interest rates. In addition, UBS entered into settlements with the European Commission (EC) and with the Swiss Competition Commission (WEKO) regarding its investigation of bid-ask spreads in connection with Swiss franc interest rate derivatives. UBS has ongoing obligations to cooperate with the authorities with whom we have reached resolutions and to undertake certain remediation measures with respect to benchmark interest rate submissions. In December 2018 UBS entered into a settlement agreement with the New York and other state attorneys general under which it will pay USD 68 million to resolve claims by the attorneys general related to LIBOR. UBS has been granted conditional leniency or conditional immunity from authorities in certain jurisdictions, including the Antitrust Division of the DOJ and WEKO, in connection with potential antitrust or competition law violations related to certain rates. However, UBS has not reached a final settlement with WEKO as the Secretariat of WEKO has asserted that UBS does not qualify for full immunity.

LIBOR and other benchmark-related civil litigation: A number of putative class actions and other actions are pending in the federal courts in New York against UBS and numerous other banks on behalf of parties who transacted in certain interest rate benchmark-based derivatives. Also pending in the US and in other jurisdictions are a number of other actions asserting losses related to various products whose interest rates were linked to LIBOR and other benchmarks, including adjustable rate mortgages, preferred and debt securities, bonds pledged as collateral, loans, depository accounts, investments and other interest-bearing instruments. The complaints allege manipulation, through various means, of certain benchmark interest rates, including USD LIBOR, Euroyen TIBOR, Yen LIBOR, EURIBOR, CHF LIBOR, GBP LIBOR, USD and SGD SIBOR and SOR and Australian BBSW, and seek unspecified compensatory and other damages under varying legal theories.

USD LIBOR class and individual actions in the US: In 2013 and 2015, the district court in the USD LIBOR actions dismissed, in whole or in part, certain plaintiffs' antitrust claims, federal racketeering claims, CEA claims, and state common law claims. Although the Second Circuit vacated the district court's judgment dismissing antitrust claims, the district court again dismissed antitrust claims against UBS in 2016. Certain plaintiffs have appealed that decision to the Second Circuit. Separately, in 2018, the Second Circuit reversed in part the district court's 2015 decision dismissing certain individual plaintiffs' claims. UBS entered into an agreement in 2016 with representatives of a class of bondholders to settle their USD LIBOR class action. The agreement has received preliminary court approval and remains subject to final approval. In 2018, the district court denied plaintiffs' motions for class certification in the USD class actions for claims pending against UBS, and plaintiffs sought permission to appeal

that ruling to the Second Circuit. In July 2018, the Second Circuit denied the petition to appeal of the class of USD lenders and in November 2018 denied the petition of the USD exchange class. In January 2019, a putative class action was filed in the District Court for the Southern District of New York against UBS and numerous other banks on behalf of U.S. residents who, from 1 February 2014 through the present, directly transacted with a defendant bank in USD LIBOR instruments. The complaint asserts antitrust and unjust enrichment claims.

Other benchmark class actions in the US: In 2014, the court in one of the Euroyen TIBOR lawsuits dismissed certain of the plaintiff's claims, including a federal antitrust claim, for lack of standing. In 2015, this court dismissed the plaintiff's federal racketeering claims on the same basis and affirmed its previous dismissal of the plaintiff's antitrust claims against UBS. In 2017, this court also dismissed the other Yen LIBOR / Euroyen TIBOR action in its entirety on standing grounds, as did the court in the CHF LIBOR action. Also in 2017, the courts in the EURIBOR lawsuit dismissed the cases as to UBS and certain other foreign defendants for lack of personal jurisdiction. In October 2018, the court in the SIBOR / SOR action dismissed all but one of plaintiffs' claims against UBS. Plaintiffs in the CHF LIBOR and SIBOR / SOR actions have filed amended complaints following the dismissals, which UBS and other defendants have moved to dismiss. In November 2018, the court in the BBSW lawsuit dismissed the case as to UBS and certain other foreign defendants for lack of personal jurisdiction. Following that dismissal, plaintiffs in the BBSW action moved in January 2019 to file an amended complaint seeking to re-name UBS and certain other banks as defendants. UBS and other defendants also moved to dismiss the GBP LIBOR action in December 2016, but that motion was denied as to UBS in December 2018. UBS is moving for reconsideration of that decision in January 2019.

Government bonds: Putative class actions have been filed since 2015 in US federal courts against UBS and other banks on behalf of persons who participated in markets for US Treasury securities since 2007. A consolidated complaint was filed in 2017 in the SDNY alleging that the banks colluded with respect to, and manipulated prices of, US Treasury securities sold at auction and in the secondary market and asserting claims under the antitrust laws and for unjust enrichment. Defendants' motions to dismiss the consolidated complaint are pending.

Following filing of these complaints, UBS and reportedly other banks are responding to investigations and requests for information from various authorities regarding US Treasury securities and other government bond trading practices. As a result of its review to date, UBS has taken appropriate action.

UBS Group AG interim consolidated financial information (unaudited)

Provisions and contingent liabilities (continued)

With respect to additional matters and jurisdictions not encompassed by the settlements and orders referred to above, our balance sheet at 31 December 2018 reflected a provision in an amount that UBS believes to be appropriate under the applicable accounting standard. As in the case of other matters for which we have established provisions, the future outflow of resources in respect of such matters cannot be determined with certainty based on currently available information and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that we have recognized.

6. Swiss retrocessions

The Federal Supreme Court of Switzerland ruled in 2012, in a test case against UBS, that distribution fees paid to a firm for distributing third-party and intra-group investment funds and structured products must be disclosed and surrendered to clients who have entered into a discretionary mandate agreement with the firm, absent a valid waiver.

FINMA has issued a supervisory note to all Swiss banks in response to the Supreme Court decision. UBS has met the FINMA requirements and has notified all potentially affected clients.

The Supreme Court decision has resulted, and may continue to result, in a number of client requests for UBS to disclose and potentially surrender retrocessions. Client requests are assessed on a case-by-case basis. Considerations taken into account when assessing these cases include, among other things, the existence of a discretionary mandate and whether or not the client documentation contained a valid waiver with respect to distribution fees.

Our balance sheet at 31 December 2018 reflected a provision with respect to matters described in this item 6 in an amount that UBS believes to be appropriate under the applicable accounting standard. The ultimate exposure will depend on client requests and the resolution thereof, factors that are difficult to predict and assess. Hence, as in the case of other matters for which we have established provisions, the future outflow of resources in respect of such matters cannot be determined with certainty based on currently available information and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that we have recognized.

7. Investigation of UBS's role in initial public offerings in Hong Kong

The Hong Kong Securities and Futures Commission (SFC) has been conducting investigations into UBS's role as a sponsor of certain initial public offerings listed on the Hong Kong Stock Exchange. The SFC has previously indicated that it intended to take enforcement action against UBS and certain employees in relation to certain of these offerings. In March 2018, the SFC issued a decision notice in relation to one of the offerings under investigation. The notice provides for a fine of HKD 119 million and a suspension of UBS Securities Hong Kong Limited's ability to act as a sponsor for Hong Kong-listed initial public offerings for 18 months. UBS has appealed the decision.

UBS AG interim consolidated financial information (unaudited)

This section contains a comparison of selected financial and capital information between UBS Group AG consolidated and UBS AG consolidated. Information for UBS AG consolidated does not differ materially from UBS Group AG on a consolidated basis.

Comparison UBS Group AG consolidated versus UBS AG consolidated

The accounting policies applied under International Financial Reporting Standards (IFRS) to both UBS Group AG and UBS AG consolidated financial statements are identical. However, there are certain scope and presentation differences as noted below:

– Assets, liabilities, operating income, operating expenses and operating profit before tax relating to UBS Group AG and its directly held subsidiaries, including UBS Business Solutions AG, are reflected in the consolidated financial statements of UBS Group AG but not of UBS AG. UBS AG's assets, liabilities, operating income and operating expenses related to transactions with UBS Group AG and its directly held subsidiaries, including UBS Business Solutions AG and other shared services subsidiaries, are not subject to elimination in the UBS AG consolidated financial statements, but are eliminated in the UBS Group AG consolidated financial statements. UBS Business Solutions AG and other shared services subsidiaries of UBS Group AG charge other legal entities within the UBS AG consolidation scope for services provided, including a markup on costs incurred.

– UBS Group AG consolidated equity was USD 0.7 billion higher compared to the equity of UBS AG consolidated as of 31 December 2018, mainly driven by higher dividends paid by UBS AG to UBS Group AG compared with the dividend distributions of UBS Group AG, as well as higher retained

earnings in the UBS Group AG consolidated financial statements, largely related to the aforementioned markup charged by shared services subsidiaries of UBS Group AG to other legal entities in the UBS AG scope of consolidation. UBS Group AG is also the grantor of the majority of the compensation plans of the Group and recognizes share premium for equity-settled awards granted, largely offset by the treasury shares held to hedge the related share delivery obligation and those acquired as part of our share repurchase program. These effects were partly offset by additional share premium recognized at the UBS AG consolidated level related to the establishment of UBS Group AG and UBS Business Solutions AG, a wholly owned subsidiary of UBS Group AG.

– Going concern capital of UBS AG consolidated was USD 3.9 billion lower than going concern capital of UBS Group AG consolidated as of 31 December 2018, reflecting lower additional tier 1 (AT1) capital of USD 4.4 billion partly offset by higher common equity tier 1 (CET1) capital of USD 0.5 billion.

– CET1 capital of UBS AG consolidated was USD 0.5 billion higher than that of UBS Group AG consolidated as of 31 December 2018. The main drivers are differences in equity, in deductions for compensation-related regulatory capital components and in dividend accruals.

– Going concern loss-absorbing AT1 capital of UBS AG consolidated was USD 4.4 billion lower than that of UBS Group AG consolidated as of 31 December 2018, reflecting Deferred

Contingent Capital Plan awards and AT1 capital notes. These AT1 capital notes were issued by UBS Group Funding (Switzerland) AG, a direct subsidiary of UBS Group AG, after the implementation of the new Swiss SRB framework, and only qualify as gone concern loss-absorbing capacity at the UBS AG consolidated level.

1 Refer to the “Measurement of performance” section of our Annual Report 2017 for the definitions of our key performance indicators. 2 Based on the Swiss systemically relevant bank framework as of 1 January 2020. Refer to the “Capital management” section of this report for more information. 3 Calculated as operating income before credit loss (annualized as applicable) / average risk-weighted assets and average leverage ratio denominator, respectively. 4 Includes invested assets for Personal & Corporate Banking. 5 As of 31 December 2018, the breakdown of personnel by business division and Corporate Center unit was: Global Wealth Management: 23,554; Personal & Corporate Banking: 5,100; Asset Management: 2,273; Investment Bank: 4,928; Corporate Center – Services: 11,576; Corporate Center – Group ALM: 169; Corporate Center – Non-core and Legacy Portfolio: 44.

Currency translation rates

The following table shows the rates of the main currencies used to translate the financial information of UBS's operations with a functional currency other than the US dollar.

	Spot rate			Average rate¹					
	As of			For the quarter ended			For the year ended		
	31.12.18	30.9.18	31.12.17	31.12.18	30.9.18	31.12.17	31.12.18	31.12.17	
1 CHF	1.02	1.02	1.03	1.00	1.02	1.02	1.02	1.02	
1 EUR	1.15	1.16	1.20	1.14	1.16	1.19	1.18	1.14	
1 GBP	1.28	1.30	1.35	1.28	1.30	1.34	1.33	1.30	
100 JPY	0.91	0.88	0.89	0.89	0.89	0.89	0.91	0.89	

¹ Monthly income statement items of operations with a functional currency other than the US dollar are translated with month-end rates into US dollars. Disclosed average rates for a quarter represent an average of three month-end rates, weighted according to the income and expense volumes of all operations of the Group with the same functional currency for each month. Weighted average rates for individual business divisions may deviate from the weighted average rates for the Group.

Appendix
Abbreviations frequently used in our financial reports

A

ABS	asset-backed security
AEI	automatic exchange of information

TTC through the cycle

U

USD US dollar

V

VaR value-at-risk

This is a general list of the abbreviations frequently used in our financial reporting. Not all of the listed abbreviations may appear in this particular report.

Appendix
Information sources

Reporting publications

Annual publications: *Annual Report (SAP no. 80531)*: Published in English, this single-volume report provides a description of our Group strategy and performance; the strategy and performance of the business divisions and Corporate Center; a description of risk, treasury, capital management, corporate governance, corporate responsibility and our compensation framework, including information on compensation for the Board of Directors and the Group Executive Board members; and financial information, including the financial statements. *Auszug aus dem Geschäftsbericht (SAP no. 80531)*: This publication provides the translation into German of selected sections of the Annual Report. *Annual Review (SAP no. 80530)*: This booklet contains key information on our strategy and performance, with a focus on corporate responsibility at UBS. It is published in English, German, French and Italian. *Compensation Report (SAP no. 82307)*: The report discusses our compensation framework and provides information on compensation for the Board of Directors and the Group Executive Board members. It is available in English and German.

Quarterly publications: The quarterly financial report provides an update on our strategy and performance for the respective quarter. It is available in English.

How to order publications: The annual and quarterly publications are available in PDF at www.ubs.com/investors in the “UBS Group AG and UBS AG consolidated financial information” section, and printed copies can be requested from UBS free of charge. For annual publications refer to www.ubs.com/investors in the “Investor services” section, which can be accessed via the link on the left-hand side of the screen. Alternatively, they can be ordered by quoting the SAP number and the language preference, where applicable, from UBS AG, F4UK–AUL, P.O. Box, CH-8098 Zurich, Switzerland.

Other information

Website: The “Investor Relations” website at www.ubs.com/investors provides the following information on UBS: news releases, financial information, including results-related filings with the US Securities and Exchange Commission, information for shareholders, including UBS share price charts as well as data and dividend information, and for bondholders, the UBS corporate calendar and presentations by management for investors and financial analysts. Information on the internet is available in English, with some information also available in German.

Results presentations: Our quarterly results presentations are webcast live. A playback of most presentations is downloadable at www.ubs.com/presentations.

Messaging service: Email alerts to news about UBS can be subscribed to under "UBS news alert" at www.ubs.com/investors. Messages are sent in English, German, French or Italian, with an option to select theme preferences for such alerts.

Form 20-F and other submissions to the US Securities and Exchange Commission: We file periodic reports and submit other information about UBS to the US Securities and Exchange Commission (SEC). Principal among these filings is the annual report on Form 20-F, filed pursuant to the US Securities Exchange Act of 1934. The filing of Form 20-F is structured as a "wrap-around" document. Most sections of the filing can be satisfied by referring to parts of the annual report. However, there is a small amount of additional information in Form 20-F that is not presented elsewhere and is particularly targeted at readers in the US. Readers are encouraged to refer to this additional disclosure. Any document that we file with the SEC is available on the SEC's website www.sec.gov. Refer to www.ubs.com/investors for more information.

Cautionary Statement Regarding Forward-Looking Statements | This report contains statements that constitute “forward-looking statements,” including but not limited to management’s outlook for UBS’s financial performance and statements relating to the anticipated effect of transactions and strategic initiatives on UBS’s business and future development. While these forward-looking statements represent UBS’s judgments and expectations concerning the matters described, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from UBS’s expectations. These factors include, but are not limited to: (i) the degree to which UBS is successful in the ongoing execution of its strategic plans, including its cost reduction and efficiency initiatives and its ability to manage its levels of risk-weighted assets (RWA) and leverage ratio denominator (LRD), including to counteract regulatory-driven increases, liquidity coverage ratio and other financial resources, and the degree to which UBS is successful in implementing changes to its businesses to meet changing market, regulatory and other conditions; (ii) the continuing low or negative interest rate environment in Switzerland and other jurisdictions, developments in the macroeconomic climate and in the markets in which UBS operates or to which it is exposed, including movements in securities prices or liquidity, credit spreads, and currency exchange rates, and the effects of economic conditions, market developments, and geopolitical tensions on the financial position or creditworthiness of UBS’s clients and counterparties as well as on client sentiment and levels of activity; (iii) changes in the availability of capital and funding, including any changes in UBS’s credit spreads and ratings, as well as availability and cost of funding to meet requirements for debt eligible for total loss-absorbing capacity (TLAC); (iv) changes in or the implementation of financial legislation and regulation in Switzerland, the US, the UK, the European Union and other financial centers that have imposed, or resulted in, or may do so in the future, more stringent or entity-specific capital, TLAC, leverage ratio, liquidity and funding requirements, incremental tax requirements, additional levies, limitations on permitted activities, constraints on remuneration, constraints on transfers of capital and liquidity and sharing of operational costs across the Group or other measures, and the effect these will or would have on UBS’s business activities; (v) the degree to which UBS is successful in implementing further changes to its legal structure to improve its resolvability and meet related regulatory requirements and the potential need to make further changes to the legal structure or booking model of UBS Group in response to legal and regulatory requirements, proposals in Switzerland and other jurisdictions for mandatory structural reform of banks or systemically important institutions or to other external developments, and the extent to which

such changes will have the intended effects; (vi) UBS's ability to maintain and improve its systems and controls for the detection and prevention of money laundering and compliance with sanctions to meet evolving regulatory requirements and expectations, in particular in the US; (vii) the uncertainty arising from the timing and nature of the UK exit from the EU and the potential need to make changes in UBS's legal structure and operations as a result of such withdrawal; (viii) changes in UBS's competitive position, including whether differences in regulatory capital and other requirements among the major financial centers will adversely affect UBS's ability to compete in certain lines of business; (ix) changes in the standards of conduct applicable to our businesses that may result from new regulation or new enforcement of existing standards, including recently enacted and proposed measures to impose new and enhanced duties when interacting with customers and in the execution and handling of customer transactions; (x) the liability to which UBS may be exposed, or possible constraints or sanctions that regulatory authorities might impose on UBS, due to litigation, contractual claims and regulatory investigations, including the potential for disqualification from certain businesses or loss of licenses or privileges as a result of regulatory or other governmental sanctions, as well as the effect that litigation, regulatory and similar matters have on the operational risk component of our RWA; (xi) the effects on UBS's cross-border banking business of tax or regulatory developments and of possible changes in UBS's policies and practices relating to this business; (xii) UBS's ability to retain and attract the employees necessary to generate revenues and to manage, support and control its businesses, which may be affected by competitive factors; (xiii) changes in accounting or tax standards or policies, and determinations or interpretations affecting the recognition of gain or loss, the valuation of goodwill, the recognition of deferred tax assets and other matters; (xiv) UBS's ability to implement new technologies and business methods, including digital services and technologies and ability to successfully compete with both existing and new financial service providers, some of which may not be regulated to the same extent; (xv) limitations on the effectiveness of UBS's internal processes for risk management, risk control, measurement and modeling, and of financial models generally; (xvi) the occurrence of operational failures, such as fraud, misconduct, unauthorized trading, financial crime, cyberattacks, and systems failures; (xvii) restrictions on the ability of UBS Group AG to make payments or distributions, including due to restrictions on the ability of its subsidiaries to make loans or distributions, directly or indirectly, or, in the case of financial difficulties, due to the exercise by FINMA or the regulators of UBS's operations in other countries of their broad statutory powers in relation to protective measures, restructuring and liquidation proceedings; (xviii) the degree to which changes in regulation, capital or legal structure, financial results or other factors may affect UBS's ability to maintain its stated capital return objective; and (xix) the effect that these or other factors or unanticipated events may have on our reputation and the additional consequences that this may have on our business and performance. The sequence in which the factors above are presented is not indicative of their likelihood of occurrence or the potential magnitude of their consequences. Our business and financial performance could be affected by other factors identified in our past and future filings and reports, including those filed with the SEC. More detailed information about those factors is set forth in documents furnished by UBS and filings made by UBS with the SEC, including UBS's Annual Report on Form 20-F for the year ended 31 December 2017. UBS is not under any obligation to (and expressly disclaims any obligation to) update or alter its forward-looking statements, whether as a result of new information, future events, or otherwise.

Rounding | Numbers presented throughout this report may not add up precisely to the totals provided in the tables and text. Starting in 2018, percentages, percent changes, and adjusted results are calculated on the basis of unrounded figures. Information on absolute changes between reporting periods, which is provided in text and that can be derived from figures

displayed in the tables, is calculated on a rounded basis.

Tables | Within tables, blank fields generally indicate that the field is not applicable or not meaningful, or that information is not available as of the relevant date or for the relevant period. Zero values generally indicate that the respective figure is zero on an actual or rounded basis. Percentage changes are presented as a mathematical calculation of the change between periods.
