## Exhibit 99.1

**AMERISERV FINANCIAL REPORTS EARNINGS FOR THE FIRST QUARTER OF 2015**

JOHNSTOWN, PA AmeriServ Financial, Inc. (NASDAQ: ASRV) reported first quarter 2015 net income available to common shareholders of \$1,316,000, or \$0.07 per diluted common share. This represented a 40% increase in earnings per share from the first quarter of 2014 where net income available to common shareholders totaled \$877,000 or \$0.05 per diluted common share. The following table highlights the Company's financial performance for the quarters ended March 31, 2015 and 2014:

	First Quarter 2015	First Quarter 2014	\$ Change	% Change
Net income	\$1,369,000	\$930,000	\$439,000	47.2%
Net income available to common shareholders	\$1,316,000	\$877,000	\$439,000	50.1%
Diluted earnings per share	\$ 0.07	\$ 0.05	\$ 0.02	40.0%

Jeffrey A. Stopko, President and Chief Executive Officer, commented on the first quarter 2015 financial results: Our improved financial performance in the first quarter of 2015 resulted from a combination of revenue growth and non-interest expense reduction. Specifically, solid loan and deposit growth in our community banking business contributed to an increase of \$409,000, or 4.8%, in net interest income. Non-interest expense in the first quarter of 2015 declined as expected by \$328,000 or 3.1% as we are realizing the savings from several profitability improvement initiatives that were implemented in late 2014. We will focus on successfully executing our business plans to further improve profitability in 2015 while continuing to maintain excellent asset quality.

The Company's net interest income in the first quarter of 2015 increased by \$409,000, or 4.8%, when compared to the first quarter of 2014. The Company's net interest margin of 3.57% for the first quarter of 2015 was comparable with the net interest margin of 3.56% for the first quarter 2014 and eight basis points better than the 3.49% margin reported for the more recently reported fourth quarter 2014 performance. The Company has been able to increase net interest income and modestly improve its net interest margin by both growing its earning assets and controlling its cost of funds through disciplined deposit pricing. Specifically, the earning asset growth has occurred in the loan portfolio as total loans averaged \$842 million in the first quarter of 2015 which is \$54 million, or 6.9%, higher than the \$787 million average for the first quarter of 2014. This loan growth reflects the successful results of the Company's sales calling efforts, with an emphasis on generating commercial loans and owner occupied commercial real estate loans particularly through its loan production offices. Interest income in 2015 has also benefitted from an increased

dividend from the FHLB of Pittsburgh and reduced premium amortization on mortgage backed securities due to slower mortgage prepayment speeds. Overall, total interest income has increased by \$428,000, or 4.2%, in the first quarter of 2015. Total interest expense for the first quarter of 2015 has been well controlled as it increased by only \$19,000, or 1.2%, due to the Company's proactive efforts to reduce deposit costs. Even with this reduction in deposit costs, the Company still experienced growth in deposits which we believe reflects the loyalty of our core deposit base and ongoing efforts to cross sell new loan customers into deposit products. Specifically, total deposits averaged a record level of \$897 million for the first quarter of 2015 which is \$41 million, or 4.8%, higher than the \$856 million average for the first quarter of 2014. The Company is pleased that a meaningful portion of this deposit growth occurred in non-interest bearing demand deposit accounts. This decreased interest expense for deposits has been offset by a \$56,000 increase in the interest cost for borrowings as the Company has utilized more FHLB term advances to extend borrowings and provide protection against rising interest rates.

The Company recorded a \$250,000 provision for loan losses in the first quarter of 2015 compared to no provision for loan losses in the first quarter of 2014. This provision in the first quarter of 2015 was needed to support the continuing growth of the loan portfolio and cover net loan charge-offs. The Company experienced net loan charge-offs of \$184,000, or 0.09% of total loans, in the first quarter of 2015 compared to modest net loan recoveries of \$5,000 in the first quarter of 2014. Overall, the Company continued to maintain outstanding asset quality in the first quarter of 2015. At March 31, 2015, non-performing assets totaled \$3.0 million, or only 0.36% of total loans.

When determining the provision for loan losses, the Company considers a number of factors, some of which include periodic credit reviews, non-performing assets, loan delinquency and charge-off trends, concentrations of credit, loan volume trends and broader local and national economic trends. In summary, the allowance for loan losses provided a strong 390% coverage of non-performing loans, and 1.14% of total loans, at March 31, 2015, compared to 400% coverage of non-performing loans, and 1.16% of total loans, at December 31, 2014.

Total non-interest income in the first quarter of 2015 increased by \$180,000, or 5.1%, from the first quarter of 2014. Increased revenue from bank owned life insurance, mortgage loan sales, and trust and investment advisory fees were the main factors causing the increase. Specifically, revenue from bank owned life insurance increased by \$176,000 due to the receipt of a death claim while gains realized on residential mortgage loan sales into the secondary market increased by \$90,000 due to increased refinance activity. Trust and investment advisory fees increased by \$24,000 due to successful new business development efforts. These positive items were partially offset by a \$59,000 reduction in deposit service charges due to fewer overdraft fees and a \$57,000 decrease in gains realized on investment security transactions as the Company did not execute any sale transactions in the first quarter of 2015.

The Company's total non-interest expense in the first quarter of 2015 decreased by \$328,000, or 3.1%, when compared to the first quarter of 2014. Salaries and employee benefits were down by \$241,000, or 3.8%, due to 29 fewer full time equivalent employees as certain employees who elected to participate in an early retirement program in late 2014 were not replaced in order to achieve efficiencies identified as part of a profitability improvement program. Professional fees also declined by \$97,000 due to lower legal fees and recruitment costs in the first quarter of 2015. The remainder of the key non-interest expense categories were relatively consistent between years reflecting the Company's focus on reducing and controlling costs. Finally, the Company recorded an income tax expense of \$617,000, or an effective tax rate of 31.1%, in the first quarter of 2015 which is higher when compared to the income tax expense of \$389,000, or an effective tax rate of 29.5%, for the first quarter of 2014. The higher income tax expense and effective tax rate is due to the Company's increased earnings in the first quarter of 2015.

The Company had total assets of \$1.1 billion, shareholders' equity of \$116 million, a book value of \$5.06 per common share and a tangible book value of \$4.42 per common share at March 31, 2015. The Company continued to maintain strong capital ratios that exceed the regulatory defined well capitalized status and had a tangible common equity to tangible assets ratio of 7.64% at March 31, 2015.

This news release may contain forward-looking statements that involve risks and uncertainties, as defined in the Private Securities Litigation Reform Act of 1995, including the risks detailed in the Company's Annual Report and Form 10-K to the Securities and Exchange Commission. Actual results may differ materially.
