GRUPO SIMEC ANNOUNCES RESULTS OF OPERATIONS FOR THE FIRST NINE MONTHS OF 2008

GUADALAJARA, MEXICO, October 28, 2008- Grupo Simec, S.A.B. de C.V. (AMEX:SIM) ("Simec") announced today its results of operations for the nine-month period ended September 30, 2008.

Acquisition of Corporacion Aceros DM, S.A. de C.V.

On February 21, 2008, we entered into an agreement to acquire 100% of the shares of Corporacion Aceros DM, S.A. de C.V. and certain of its affiliates ("Grupo San"), and on May 30, 2008 said acquisition was consummated. Grupo San is a long products steel mini-mill and the second-largest corrugated rebar producer in Mexico. Grupo San's operations are based in San Luis Potosi, Mexico. Its plants and 1,450 employees produce 600 thousand tons of finished products annually.

With this acquisition, Simec and Industrias CH, S.A.B. de C.V. ("ICH") position themselves as the second-largest producer of rebar and the largest steel producer in Mexico, with a production capacity of approximately 4.5 million tons of liquid steel and 3.8 million tons of finished products.

With this strategic acquisition, Simec and ICH will achieve a more diversified product mix, with 40% of sales in Mexico and 60% outside Mexico, both of which will allow them to better address the natural cycles of the steel industry on the domestic and global levels. Additionally, Simec has already identified significant synergies and economies of scale that will increase the company's operating margins. Grupo San's central location in San Luis Potosi, where Simec is not currently present, also represents a strong competitive advantage since it provides several strategic benefits mainly related to distribution, given its proximity to Mexico's main cities, sea ports, and borders.

In addition, Grupo San has aggressive expansion plans in its rebar business, which ICH and Simec will support and promote to satisfy the growing demand for this product, resulting from the Mexican Government's aggressive infrastructure plan.

The financial statements of Simec include the operations of Grupo San since June 1, 2008.

Pursuant to Mexican Financial Reporting Standards "Bulletin B-7 Acquisitions of Business," Simec is in the process of calculating the goodwill and other intangible assets in the acquisition of Grupo San.

DIRECTOR REPORT

CONSOLIDATED

Acquisition of Corporacion Aceros DM, S.A. de C.V.

On February 21, 2008, we entered into an agreement to acquire 100% of the shares of Corporacion Aceros DM, S.A. de C.V. and certain of its affiliates ("Grupo San"), and on May 30, 2008 said acquisition was consummated. Grupo San is a long products steel mini-mill and the second-largest corrugated rebar producer in Mexico. Grupo San's operations are based in San Luis Potosi, Mexico. Its plants and 1,450 employees produce 600 thousand tons of finished products annually.

With this acquisition, Simec and Industrias CH, S.A.B. de C.V. ("ICH") position themselves as the second-largest producer of rebar and the largest steel producer in Mexico, with a production capacity of approximately 4.5 million tons of liquid steel and 3.8 million tons of finished products.

With this strategic acquisition, Simec and ICH will achieve a more diversified product mix, with 40% of sales in Mexico and 60% outside Mexico, both of which will allow them to better address the natural cycles of the steel industry on the domestic and global levels. Additionally, Simec has already identified significant synergies and economies of scale that will increase the company's operating margins. Grupo San's central location in San Luis Potosi, where Simec is not currently present, also represents a strong competitive advantage since it provides several strategic benefits mainly related to distribution, given its proximity to Mexico's main cities, sea ports, and borders.

In addition, Grupo San has aggressive expansion plans in its rebar business, which ICH and Simec will support and promote to satisfy the growing demand for this product, resulting from the Mexican Government's aggressive infrastructure plan.

The financial statements of Simec include the operations of Grupo San since June 1, 2008.

QUARTER: 2 YEAR: 2008

FINANCIAL STATEMENT NOTES

CONSOLIDATED

(1) Operations preparation bases and summary of significant accounting policies:

Grupo Simec, S.A. de C.V. and its Subsidiaries ("the Company") are subsidiaries of Industrias CH, S.A. de C.V. ("ICH"), and their main activities consist of the manufacturing and sale of steel products primarily destined for the construction sector of Mexico and other countries.

Significant accounting policies and practices followed by the Companies which affect the principal captions of the financial statements are described below:

a. Financial statement presentation - Below is a summary of the most significant accounting policies and practices used in the preparation of the consolidated financial statements, in conformity with Mexican Financial Reporting Standards (MFRS), which include Bulletins and Circulars issued by the Accounting Principles Commission (CPC) of the Mexican Institute of Public Accountants (IMCP) which have not been amended, replaced or abrogated by MFRS issued by the Mexican Financial Reporting Standards Research and Development Board (Consejo Mexicano para la Investigacion y Desarrollo de Normas de Informacion Financiera, A.C. (CINIF)).

b. Principles of Consolidation - As part of the financial debt restructuring agreement into during 1997, Compania Siderurgica de Guadalajara, S.A. de C.V. ("CSG") assumed all of the debt of the Company in return for an equity interest in its subsidiaries. As a result of the above, the Company is the principal shareholder of CSG, and CSG is the principal shareholder of the other subsidiaries that Grupo Simec, S.A. de C.V. ("Simec") controlled before the restructuring.

The main subsidiaries of CSG are the following:

- o Compania Siderurgica de California, S.A. de C.V.
- o Industrias del Acero y del Alambre, S.A. de C.V.
- o Pacific Steel Inc.
- o SimRep Corporation and PAV Republic and Subsidiaries
- o Corporacion Aceros DM, S.A. de C.V.

All significant intercompany balances and transactions have been eliminated in consolidation.

c. Cash and cash equivalents - The Company considers short-term investments with original maturities not greater than three months to be cash equivalent. Cash equivalents include temporary investments and Mexican Government Treasury Bonds, and are stated at market value, which approximates cost plus earned interest. Any increase in market value is credited to operations for the period.

d. Inventories - Domestic subsidiaries' inventories are recorded initially at

Edgar Filing: GROUP SIMEC SA DE CV - Form 6-K

average cost under the direct costing system. Foreign subsidiaries' inventories are valued on a last-in, first-out (LIFO). For translation effects into MFRS the inventories have been adjusted from LIFO to average cost under the direct costing system.

Billet finished goods and work in process, raw materials and materials, supplies and rollers - At the average cost.

The Company presents as non-current inventories the rollers and spare parts, which according to historical data and production trends will not be used within a one-year period.

e. Derivative financial instruments - The Company is using derivative financial instruments for hedging risks associated with natural gas prices and conducted studies on historical consumption, future requirements and commitments; thus it avoided exposure to risks other than the normal operating risks. Management of the Company examines its financial risks by continually analyzing price, credit and liquidity risks.

To mitigate the risks associated with changes in natural gas prices occurring naturally as a result of the supply and demand on international markets, the Company uses natural gas cash-flow exchange contracts or natural gas swaps to offset fluctuations in the price of natural gas, whereby the Company receives a floating price and pays a fixed price. Fluctuations in natural gas prices from volumes consumed are recognized as part of the Company's operating costs.

Derivative financial instruments are recognized in the balance sheet at fair value, which is initially represented by the amount of consideration agreed on. Such fair value is restated at the end of each month based on the new estimate. The Company periodically evaluates the changes in the cash flows of derivative instruments to analyze if the swaps are highly effective for mitigating the exposure to natural gas price fluctuations. In 2008, 2007 and 2006, the fair value of derivatives not qualifying as accounting hedging instruments was recorded currently against results of operations in the year. In the case of instruments qualifying as derivative accounting hedging instruments of the cash flow type, the fair value and subsequent changes were recorded under stockholders' equity as Comprehensive income, net of the deferred tax effect.

The effectiveness of hedging instruments is determined at the time the derivative financial instruments are designated as hedging, and this is evaluated periodically. A highly effective instrument is such in which the changes in the fair value of cash flows of primary position are offset on a periodic or cumulative basis, by the changes in the fair value or cash flows of the hedging instruments within a range of 80% and 125%.

At September 30, 2008, the Company has contracts for hedging risks associated with natural gas prices, that are estimated and recognized according to the MFRS C-10 "Derivative Financial Instruments".

f. Property, plant and equipment - Property, plant and equipment of domestic origin are restated by using factors derived from The National Consumer Price Index ("NCPI") from the date of their acquisition, and imported machinery and equipment are restated by applying devaluation and inflation factors of the country of origin, until December 31, 2007. Depreciation recorded in the consolidated statement of income (loss) is computed based upon the estimated useful life and the restated cost of each asset. In addition, Financial expense incurred during the construction period is capitalized as construction in progress. The estimated useful lives of assets as of September 30, 2008 are as follows:

Edgar Filing: GROUP SIMEC SA DE CV - Form 6-K

	Years -----

Machinery and equipment	10 to 40
Buildings and improvements (Republic)..	10 to 25
Land improvements (Republic)	5 to 25
Machinery and equipment (Republic)	5 to 20

g. Other assets - Organization and pre-operating expenses are capitalized and their amortization is calculated by the straight-line method over a period of 20 years.

h. Seniority premiums and severance payments - According to Federal Labor Law, employees are entitled to seniority premiums after fifteen years or more of services. These premiums are recognized as expenses in the years in which the services are rendered, using actuarial calculations based on the projected unit credit method, and since 1996 by applying real interest and salary increases.

Any other payments to which employees may be entitled in case of separation, disability or death, are charged to operations in the period in which they become payable.

i. Pension plan - Until 1995, the Company provided pension benefits for all personnel with a minimum of 10 years of service and 35 years of age. The Company had established an irrevocable trust for its contributions, which were based on actuarial calculations. In December 1995, the board of directors of the Company, in agreement with the trade union, discontinued these benefits and related contributions to the trust fund. This decision was made because of the new Mexican pension fund system, Administradoras de Fondos para el Retiro, which establishes similar benefits for the employees. The balance of the trust fund will be applied to the retirement benefits of qualifying employees until the fund is exhausted due to the irrevocable status of the fund.

The Company does not have any contractual obligation regarding the payment of pensions of retirements.

j. Income taxes - In 1999, the Mexican Institute of Public Accountants issued Bulletin D-4, "Accounting for Income and Asset Taxes and Employee Profit Sharing", which is effective for all fiscal years beginning January 1, 2000. The Company and its subsidiaries are included in the consolidated tax returns of the company's parent.

Any exchange differences incurred with regard to assets or liabilities denominated in foreign currency are charged to operations of the period and are included in financial income (expense) in the accompanying consolidated statements of income (loss).

For consolidation purposes, the financial statements of the foreign subsidiaries, were translated into pesos in conformity with Mexican accounting Bulletin MFRS B-15, Transactions in Foreign Currency.

- Applying the prevailing historical exchange rate for nonmonetary assets and liabilities and for stockholders' equity accounts.
- Applying the prevailing the historical exchange rate at the consolidated balance sheet date for revenues and expenses during the reporting period
- The resulting effect of translation, the process of consolidation and to apply the participation method, is recorded in stockholders' equity under the accumulated effect by conversion forming part of the Comprehensive Income.

Additionally, no single customer accounted for a significant amount of the Company's sales, and there were no significant accounts receivable from a single customer or affiliate at September 30, 2008 sales to five customers accounted for approximately 29.8% of the Republic's sales. m. Other income (expenses) - Other income (expenses) shown in the consolidated statements of operations primarily includes other financial operations.

(2) Financial Debt:

At September 30, 2008, Simec's total consolidated debt consisted of U.S. \$54.8 million; U.S. \$30 million is a credit bank, U.S. \$21.5 million is a credit from GE Capital and U.S. \$302,000 of 8 7/8% medium-term notes ("MTN's") due 1998 (accrued interest at September 30, 2008 was U.S. \$380,583). At December 31, 2007, Simec's total consolidated debt consisted of U.S. \$302,000 of 8 7/8% medium-term notes ("MTN's") due 1998 (accrued interest at December 31, 2007 was U.S. \$363,703).

(3) Commitments and contingent liabilities:

a. Pacific Steel, Inc. (a wholly-owned subsidiary located in the U.S.A.) has been named in various claims and suits relating to the generation, storage, transport, disposal and cleanup of materials classified as hazardous waste. The Company has accrued approximately Ps. 11,804 (U.S. \$1,093,762) at September 30, 2008, (included in accrued liabilities) relating to these actions; the reduction of this reserve from previous levels reflects clean-up activities undertaken by Simec. Management believes the ultimate liability with respect to this matter will not exceed the amounts that have been accrued.

b. The Company is subject to various other legal proceeding and claims, which have arisen, in the ordinary course of its business. It is the opinion of management that their ultimate resolution will not have a material adverse effect on the Company's consolidated financial position or consolidated results of operations.
