FORWARD-LOOKING INFORMATION

Statements contained in this Quarterly Report on Form 10-Q that are not historical facts are forward-looking statements. In addition, Alabama National Bancorporation ("Alabama National"), through its senior management, from time to time makes forward-looking public statements concerning its expected future operations and performance and other developments. Such forward-looking statements are necessarily estimates reflecting Alabama National's best judgment based upon current information and involve a number of risks and uncertainties, and various factors could cause results to differ materially from those contemplated by such forward-looking statements. Such factors could include those identified from time to time in Alabama National's Securities and Exchange Commission filings and other public announcements, including the factors described in Alabama National's Annual Report on Form 10-K for the year ended December 31, 2000. With respect to the adequacy of the allowance for loan losses for Alabama National, these factors include the rate of growth in the economy, especially in the Southeast, the relative strength and weakness in the consumer and commercial credit sectors and in the real estate markets and the performance of the stock and bond markets. The forward-looking statements contained in this Quarterly Report speak only as of the date of this report, and Alabama National undertakes no obligation to revise these statements following the date of this Quarterly Report on Form 10-Q.

ALABAMA NATIONAL BANCORPORATION AND SUBSIDIARIES
 NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 SEPTEMBER 30, 2001

NOTE A - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months and nine months ended September 30, 2001 are subject to year-end audit and are not necessarily indicative of the results of operations to be expected for the year ending December 31, 2001. These interim financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in Alabama National's Form 10-K for the year ended December 31, 2000.

NOTE B - COMMITMENT AND CONTINGENCIES

Alabama National's subsidiary banks make loan commitments and incur contingent liabilities in the normal course of business, which are not reflected in the consolidated statements of condition.

NOTE C - RECENTLY ISSUED PRONOUNCEMENTS

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

Derivative Investments and Hedging Activities

Effective January 1, 2001, Alabama National BanCorporation adopted Statement of Financial Accounting Standard No. 133, Accounting for Derivative Instruments and Hedging Activities, ("Statement 133"). Statement 133 standardizes the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, by requiring that an entity recognize those items as assets or liabilities in the statement of financial position and measure them at fair value. If certain conditions are met, an entity may elect to designate a derivative instrument as a hedging instrument. Statement 133 generally provides for matching the timing of gain or loss recognition on the hedging instrument with the recognition of (a) the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk or (b) the earnings effect of the hedged forecasted transaction. Alabama National's derivative activities at September 30, 2001, relate solely to the interest rate lock commitments (IRLCs), which Alabama National has entered into with certain customers for specific short-term periods of time. These IRLCs relate to prospective mortgage loans, which Alabama National originates and then immediately transfers to secondary mortgage servicers. The transfer of these IRLCs allows Alabama National to pass financial risk associated with potential changes in interest rates on to secondary mortgage servicers. Alabama National also reduces its financial risk associated with mortgage lending by utilizing "best efforts" agreements with secondary mortgage servicers. These agreements relieve Alabama National of its liability to deliver if a mortgage loan fails to close. The adoption of Statement 133 as of January 1, 2001, did not have a material impact on the financial position or results of operations of Alabama National BanCorporation, as of and for the period ended September 30, 2001.

Business Combinations

In June 2001, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard No. 141, Business Combinations ("Statement 141"), which has an effective date of June 30, 2001 for all business combinations initiated after this date. This statement supercedes Accounting Principles Board Opinion No.16, Business Combinations, and FASB Statement No. 38, Accounting for Preacquisition Contingencies of Purchase Enterprises. This statement requires all business combinations within the scope of Statement 141 to be accounted for using the purchase method of accounting. For business combinations completed prior to June 30, 2001, Statement 141 requires companies to recognize intangible assets apart from goodwill and expand the disclosures relating to assets acquired and liabilities assumed. The adoption of

11

Statement 141 precludes Alabama National from accounting for any business acquisition consummated after June 30, 2001, as a pooling of interests.

Goodwill and Other Intangible Assets

In June 2001, the FASB issued Statement of Financial Accounting Standard No. 142, Goodwill and Other Intangible Assets ("Statement 142"), which is effective for all fiscal years beginning after December 31, 2001. This statement addresses the accounting treatment for intangible assets, which are acquired individually or with a group of other assets, in financial statements upon their acquisition. Statement 142 also addresses the accounting for goodwill and other intangible assets for periods after they have been initially recognized in the financial statements. Goodwill will cease to be amortized upon the adoption and implementation of Statement 142 and an annual test for the impairment of existing goodwill balances will be required. Alabama National is currently evaluating the impact that the adoption of Statement 142 will have on Alabama

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

National's financial statements.

NOTE D - MERGERS AND ACQUISITIONS

On January 31, 2001, Peoples State Bank of Groveland merged with a newly formed subsidiary of Alabama National, whereby Peoples State Bank became a wholly owned subsidiary of Alabama National. Pursuant to the Peoples State Bank merger each share of Peoples State Bank common stock was converted into 1.164 shares of Alabama National common stock. A total of 734,609 shares of Alabama National common stock were issued to Peoples State Bank shareholders. The Peoples State Bank merger was accounted for as a pooling of interests and, accordingly, financial statements for all periods have been restated to reflect the results of operations of the companies on a combined basis from the earliest period presented, except dividends per share.

Separate results of Alabama National and Peoples State Bank are presented below:

	Three months ended September 30,	
	2001	2000

(1) Includes \$314,000 of after-tax merger-related expenses during the nine months ended September 30, 2001.

(2) Includes \$467,000 of after-tax merger-related expenses during the nine months ended September 30, 2001.

On September 6, 2001, Alabama National entered into a merger agreement with Farmers National Bancshares, Inc. ("Farmers National"), a one-bank holding company headquartered in Opelika, Alabama. Under the terms of the merger agreement, Farmers National will merge with and into Alabama National, and

Farmers National's bank subsidiary, The Farmers National Bank of Opelika, will merge with and into First American Bank, headquartered in Decatur, Alabama.

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

Alabama National will issue shares of its common stock to existing shareholders of Farmers National at an exchange ratio of 0.53125 shares of Alabama National common stock for each share of Farmers National common stock. Instead of Alabama National common stock, shareholders of Farmers National can elect to receive \$17.27 in cash in exchange for each share of Farmers National common stock, subject to certain limitations. As of September 30, 2001, Farmers National had assets of \$194.5 million. The merger with Farmers National is expected to close in the fourth quarter of 2001. The merger is subject to Farmers National shareholder approval and certain regulatory approvals.

NOTE E - EARNINGS PER SHARE

NOTE F - TREASURY STOCK REPURCHASE PLAN

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

On October 17, 2001, the board of directors of Alabama National authorized the repurchase of up to 300,000 shares of its common stock either through open market purchases, private transactions, or both. The repurchased shares may be used for general corporate purposes, including potential future acquisitions and re-issuance under certain stock benefit plans of Alabama National. The number of shares actually acquired will be subject to management discretion and will depend on subsequent developments, market availability and other factors. The repurchase program does not obligate Alabama National to acquire any particular number of shares and may be suspended at any time at the company's discretion.

13

NOTE G - SEGMENT REPORTING

Alabama National's reportable segments represent the distinct major product lines it offers and are viewed separately for strategic planning purposes by management. Corporate overhead is comprised of compensation and benefits for certain members of management, merger-related costs, interest expense on parent company debt, amortization of intangibles and other expenses.

Item 2. Management's Discussion and Analysis
of Financial Condition and Results of Operations

Basis of Presentation

The following is a discussion and analysis of the consolidated financial condition of Alabama National and results of operations as of the dates and for the periods indicated. On January 31, 2001, Peoples State Bank of Groveland merged with a newly formed subsidiary of Alabama National, whereby Peoples State Bank became a wholly owned subsidiary of Alabama National. Pursuant to the Peoples State Bank merger each share of Peoples State Bank common stock was converted into 1.164 shares of Alabama National common stock. A total of 734,609 shares of Alabama National common stock were issued to Peoples State Bank shareholders. The Peoples State Bank merger was accounted for as a pooling of interests and, accordingly, financial statements for all periods have been

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

restated to reflect the results of operations of the companies on a combined basis from the earliest period presented, except dividends per share. All significant intercompany accounts and transactions have been eliminated. The accounting and reporting policies of Alabama National conform with generally accepted accounting principles and with general financial services industry practices.

This information should be read in conjunction with Alabama National's unaudited consolidated financial statements and related notes appearing elsewhere in this report and "Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing in Alabama National's Annual Report on Form 10-K for the year ended December 31, 2000.

Performance Overview

Alabama National's net income was \$7.51 million for the third quarter of 2001 (the "2001 third quarter"), compared to \$6.56 million for the third quarter of 2000 (the "2000 third quarter"). Net income for the nine months ended September 30, 2001 (the "2001 nine months") was \$20.33 million, compared to \$18.73 million for the nine months ended September 30, 2000 (the "2000 nine months"). Net income per diluted common share for the 2001 and 2000 third quarters was \$0.62 and \$0.55, respectively. For the 2001 nine months, net income per diluted common share was \$1.68, compared to \$1.57 for the 2000 nine months. Excluding after tax merger-related charges incurred during the first quarter of 2001 relating to the Peoples State Bank merger, Alabama National's net income for the 2001 nine months was \$21.11 million, compared to \$18.73 million for the 2000 nine months, and net income per diluted common share for the 2001 nine months and 2000 nine months was \$1.74 and \$1.57, respectively.

The annualized return on average assets for Alabama National was 1.16% for the 2001 third quarter, compared to 1.17% for the 2000 third quarter. The annualized return on average assets for Alabama National was 1.09% for the 2001 nine months, compared to 1.17% for the 2000 nine months. The annualized return on average stockholders' equity decreased for the 2001 third quarter to 16.07%, as compared to 16.37% for the 2000 third quarter. The annualized return on average stockholders' equity decreased for the 2001 nine months to 15.03%, as compared to 16.36% for the 2000 nine months. Excluding the after tax merger-related charges incurred during the first quarter of 2001 relating to the Peoples State Bank merger, the annualized return on average assets and annualized return on stockholders' equity for the 2001 nine months were 1.14% and 15.61%, respectively. Book value per share at September 30, 2001 was \$15.97, an increase of \$1.41 from year-end 2000. Tangible book value per share at September 30, 2001 was \$14.88, an increase of \$1.54 from year-end 2000. Alabama National paid cash dividends totaling \$0.69 on common shares during the 2001 nine months, compared to \$0.63 paid on common shares during the 2000 nine months.

15

Net Income

The principal reason for the increase in net income for each of the 2001 third quarter and the 2001 nine months, compared to the same periods in 2000, was the growth in noninterest income. During the 2001 third quarter noninterest income totaled \$11.7 million, compared to \$8.4 million in the 2000 third quarter, an increase of 40.4%. During the 2001 nine months, Alabama National recorded noninterest income of \$35.0 million compared to \$24.0 million during the 2000 nine months, an increase of 45.8%. During each of the 2001 third quarter, and 2001 nine months, the increase in noninterest income was attributable to

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

increased production and volume from the investment services division, securities brokerage division and from fees earned from the origination and sale of mortgages. Net interest income also increased slightly in each of the 2001 third quarter and 2001 nine months compared to the same periods in 2000. Net interest income is the difference between the income earned on interest bearing assets and the interest paid on deposits and borrowings used to support such assets. Net interest income increased by \$2.1 million, or 10.2%, to \$22.5 million during the 2001 third quarter, from \$20.4 million during the 2000 third quarter. Net interest income increased to \$64.0 million during the 2001 nine months, from \$59.6 million during the 2000 nine months, representing an increase of \$4.4 million, or 7.4%. The increases in noninterest income and net interest income were offset by increases in noninterest expense of \$3.6 million, to \$22.3 million for the 2001 third quarter, and \$12.3 million, to \$67.0 million for the 2001 nine months, compared to \$18.8 million and \$54.7 million, respectively for the same periods in 2000. The net income for the 2001 nine months includes after-tax merger-related charges relating to the Peoples State Bank merger totaling \$781,000. These charges on a pre-tax basis consist of approximately \$135,000 in legal and accounting fees, \$385,000 in employment-related expenses, \$300,000 in advisory fees/commissions, \$121,000 in technology conversion charges, and \$57,000 in other charges. These pre-tax charges increased noninterest expense for the 2001 nine months by \$997,000.

Average earning assets for the 2001 third quarter and nine months increased by \$312.3 million and \$331.9 million, respectively, as compared to the same periods in 2000. Average interest-bearing liabilities increased by \$263.2 million and \$289.6 million during the 2001 third quarter and nine months, respectively, as compared to the same periods in 2000. The average taxable equivalent rate earned on assets was 7.63% and 8.03% for the 2001 third quarter and 2001 nine months, compared to 8.78% and 8.60% for the 2000 third quarter and 2000 nine months, respectively. The average rate paid on interest-bearing liabilities was 4.30% and 4.80% for the 2001 third quarter and 2001 nine months, respectively, compared to 5.35% and 5.05% for the 2000 third quarter and 2000 nine months, respectively. The net interest margin was 3.81% and 3.76% for the 2001 third quarter and 2001 nine months, respectively, compared to 4.00% and 4.10% for the 2000 third quarter and 2000 nine months. The reduction in net interest margin is largely due to the effects of interest rate reductions by the Federal Reserve during the first nine months of 2001. Alabama National's interest earning assets have repriced more quickly than its interest-bearing liabilities. During the third quarter of 2001 Alabama National's net interest margin improved 7 basis points when compared to the net interest margin recorded in the 2001 second quarter. Management anticipates that as more interest-bearing liabilities mature and reprice that the net interest margin will continue to improve, absent any additional rate reductions by the Federal Reserve or significant changes in the general interest rate environment.

16

The following tables depict, on a taxable equivalent basis for the 2001 and 2000 third quarter and nine months, certain information related to Alabama National's average balance sheet and its average yields on assets and average costs of liabilities. Such yields or costs are derived by dividing income or expense by the average daily balance of the associated assets or liabilities.

18

The following tables set forth, on a taxable equivalent basis, the effect which varying levels of earning assets and interest-bearing liabilities and the applicable rates had on changes in net interest income for the 2001 third quarter and nine months, compared to the 2000 third quarter and nine months, respectively. For the purposes of these tables, changes, which are not solely attributable to volume or rate, are allocated to volume and rate on a pro rata basis.

The provision for loan losses represents a charge to current earnings necessary to maintain the allowance for loan losses at an appropriate level based on management's analysis of the potential risk in the loan portfolio. The amount of the provision is a function of the level of loans outstanding, the level of

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

non-performing loans, historical loan loss experience, the amount of loan losses actually charged against the allowance during a given period and current economic conditions. The provision for loan losses was \$919,000 for the 2001 third quarter, an increase of \$429,000 when compared with \$490,000 recorded in the 2000 third quarter. The provision for loan losses was \$2.2 million for the 2001 nine months, compared to \$1.8 million in the 2000 nine months. The increase during the 2001 third quarter and nine months is attributable to a higher level of net charge-offs, growth in the loan portfolio and an increase in nonperforming loans. The allowance for loan losses as a percentage of outstanding loans, net of unearned income, was 1.28% at September 30, 2001, compared to 1.31% at December 31, 2000.

Because of the inherent uncertainty of assumptions made during the assessment process, there can be no assurance that loan losses in future periods will not exceed the allowance for loan losses or that additional allocations to the allowance will not be required. See Asset Quality.

20

Total noninterest income for the 2001 third quarter was \$11.7 million, compared to \$8.4 million for the 2000 third quarter, an increase of 40.4%. For the 2001 nine months, noninterest income increased to \$35.0 million, compared to \$24.0 million for the 2000 nine months, an increase of 45.8%. The components of noninterest income include service charges on deposits, investment services revenue, securities brokerage and trust revenue, insurance commissions, and fees relating to the origination and sale of mortgage loans. Service charges on deposits for the 2001 third quarter and 2000 third quarter were \$2.3 million and \$2.1 million, respectively. For the 2001 nine months, service charge income increased to \$6.9 million, from \$6.1 million for the 2000 nine months. Revenue from the investment division totaled \$3.1 million in the 2001 third quarter, an increase of \$1.5 million, or 95.4%, as compared to \$1.6 million recorded in the 2000 third quarter. During the 2001 nine months, the investment division revenue totaled \$9.6 million, an increase of \$5.7 million, or 144.2%, as compared to \$3.9 million in the 2000 nine months. The substantial increase in revenue in the investment division was due to increased liquidity of community banks served by this division and the decline of interest rates during 2001, both of which led to increased demand for fixed income securities by its customers. Securities brokerage and trust revenue increased 12.8%, to \$2.1 million in the 2001 third quarter, compared to \$1.9 million in the 2000 third quarter. For the 2001 nine months, securities brokerage and trust revenue totaled \$6.6 million, as compared to \$5.5 million during the 2000 nine months, an increase of 21.7%. The increase in the securities brokerage and trust division during each period of 2001 is attributable to continued expansion in the number of customers and total customer assets under management by these departments. Insurance commissions totaled \$499,000 and \$1.5 million during the 2001 third quarter and 2001 nine months, respectively, as compared to \$402,000 and \$1.5 million recorded in the same periods during 2000. Fees generated from the origination and sale of mortgages increased to \$2.0 million for the 2001 third quarter, from \$890,000 in the 2000 third quarter, representing a 119.1% increase. During the 2001 nine months mortgage fees increased to \$5.2 million, from \$2.6 million during the 2000 nine months, an increase of 98.0%. This increase is primarily a result of declining interest rates and the impact the interest rate environment has on refinancing and new mortgage origination activity. Other noninterest income totaled \$1.0 million during each of the 2001 and 2000 third quarters. Other noninterest income increased to \$3.3 million during the 2001 nine months, an increase of 15.4%, compared to \$2.8 million recorded in the 2000 nine months.

Noninterest expense was \$22.3 million for the 2001 third quarter, compared to

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

\$18.8 million for the 2000 third quarter. For the 2001 nine months, noninterest expense was \$67.0 million, compared to \$54.7 million for the 2000 nine months. Noninterest expense includes salaries and employee benefits, commission based compensation, occupancy and equipment expenses and other expenses. Salaries and employee benefits were \$11.0 million for the 2001 third quarter, compared to \$9.8 million for the 2000 third quarter. For the 2001 nine months, salaries and employee benefits were \$33.1 million, compared to \$28.9 million in the 2000 nine months. The increase in salaries and employee benefits represents general staffing increases concurrent with expansion of offices and business lines and merit compensation increases. Commission based compensation was \$3.1 million for the 2001 third quarter, compared to \$1.5 million for the 2000 third quarter. For the 2001 nine months, commission based compensation was \$8.9 million, compared to \$3.6 million in the 2000 nine months. The increase in commission based compensation during these periods is attributable to increased production in the mortgage, securities brokerage and investment divisions. A significant portion of compensation in these areas is incentive based. Occupancy and equipment expense totaled \$2.4 million in the 2001 third quarter and \$2.3 million in the 2000 third quarter. Occupancy and equipment expense totaled \$7.4 million in the 2001 nine months and \$6.6 million in the 2000 nine months. The 2001 third quarter and nine months include expenses related to two banking branches opened in third and fourth quarters of 2000 and expenses related to two banking branches acquired during August of 2000, which expenses were not incurred for the full periods in 2000. Other noninterest expense increased to \$5.9 million in the 2001 third quarter, compared with \$5.2 million in the 2000 third quarter. Other noninterest expense was \$17.6 million in the 2001 nine months and \$15.5 million in the 2000 nine months.

21

Because of an increase in pre-tax income, income tax expense was \$3.5 million for the 2001 third quarter, compared to \$3.0 million for the 2000 third quarter. For the 2001 nine months, income tax expense was \$9.4 million, compared to \$8.4 million for the 2000 nine months. The effective tax rates for the 2001 third quarter and the 2001 nine months were 31.8% and 31.7%, respectively, compared to 31.1% for each of the same periods of 2000. These effective tax rates are impacted by items of income and expense that are not subject to federal or state taxation.

Earning Assets

Loans comprised the largest single category of Alabama National's earning assets on September 30, 2001. Loans, net of unearned income, were \$1.83 billion, or 69.0% of total assets at September 30, 2001, compared to \$1.71 billion, or 72.5%, at December 31, 2000. Loans grew \$119.1 million, or 7.0%, during the 2001 nine months, compared to the 2000 year-end. Average loans grew \$247.4 million, or 16.1%, during the 2001 nine months, compared to the 2000 nine months. The following table details the composition of the loan portfolio by category at the dates indicated:

The carrying value of investment securities increased \$121.9 million in the 2001 nine months, from \$60.8 million at December 31, 2000, to \$182.7 million at September 30, 2001. During the 2001 nine months, Alabama National purchased \$162.1 million of investment securities and received \$40.2 million from maturities, including principal paydowns of mortgage backed securities.

The carrying value of securities available for sale decreased \$37.1 million in the 2001 nine months from \$325.3 million at December 31, 2000, to \$288.2 million at September 30, 2001. Purchases of available for sale securities totaled \$112.9 million and maturities, calls, and sales of available for sale securities totaled \$156.9 million. During the 2001 nine months, unrealized gains on available for sale securities totaled \$4.3 million net of income taxes.

22

Trading account securities, which had a balance of \$2.8 million at September 30, 2001, are securities owned by Alabama National prior to sale and delivery to Alabama National's customers. It is the policy of Alabama National to limit positions in such securities to reduce its exposure to market and interest rate changes. Federal funds sold and securities purchased under agreements to resell totaled \$24.0 million at September 30, 2001 and \$30.3 million at December 31, 2000.

Deposits and Other Funding Sources

Deposits increased by \$61.8 million from year-end 2000, to \$1.87 billion at September 30, 2001. All categories of deposits experienced growth during the 2001 nine months, except time deposits greater than \$100,000. Included in time deposits greater than \$100,000 at September 30, 2001 and December 31, 2000, were \$34.0 million and \$87.1 million of brokered deposits, respectively. During the 2001 nine months, Alabama National decreased its reliance on brokered deposits

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

due to increases in the other categories of deposits and other funding sources. Excluding brokered deposits, time deposits greater than \$100,000 actually increased during the 2001 nine months.

Federal funds purchased and securities sold under agreements to repurchase totaled \$256.1 million at September 30, 2001, an increase of \$89.5 million from December 31, 2000. The treasury, tax and loan account increased to \$3.3 million at September 30, 2001, compared with \$900,000 at December 31, 2000. Short-term borrowings at September 30, 2001 totaled \$34.6 million, including a note payable to a third party bank of \$29.6 million and advances from the Federal Home Loan Bank ("FHLB") totaling \$5.0 million.

23

Alabama National's short-term borrowings at September 30, 2001 and December 31, 2000 are summarized as follows:

SHORT-TERM BORROWINGS
(Amounts in thousands)

Note payable to third party bank under secured master note agreement; rate varies with LIBOR and was 3.36375% and 7.4318% at September 30, 2001 and December 31, 2000, respectively; collateralized by Alabama National's stock in subsidiary banks.

FHLB debt due at various maturities ranging from April 23, 2001 through October 12, 2001; bearing interest at fixed and variable rates ranging from 5.08375% to 6.40% and 6.40% to 6.7575% at June 30, 2001 and December 31, 2000, respectively; collateralized by FHLB stock and certain first mortgages. All of these notes were called, matured or refinanced during the nine month period ended September 30, 2001.

FHLB open ended note payable; rate varies daily based on the FHLB Daily Rate Credit interest price and was 3.59% and 6.35% at September 30, 2001 and December 31, 2000, respectively; collateralized by FHLB stock and certain first mortgage loans.

Total short-term borrowings

Alabama National's long-term debt at September 30, 2001 and December 31, 2000 is summarized as follows:

LONG-TERM DEBT
(Amounts in thousands)

FHLB debt due April 23, 2004; rate varies with LIBOR and was

Asset Quality

Nonperforming loans are comprised of loans past due 90 days or more and still accruing interest, loans accounted for on a nonaccrual basis and loans in which the terms have been restructured to provide a reduction or deferral of interest or principal because of a deterioration in the financial position of the borrower. At September 30, 2001, Alabama National had no loans past due 90 days or more and still accruing interest. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that the collection of interest is doubtful. It is Alabama National's policy to place a delinquent loan on nonaccrual status when it becomes 90 days or more past due. When a loan is placed on nonaccrual status, all interest that is accrued on the loan is reversed and deducted from earnings as a reduction of reported interest. No additional interest is accrued on the loan balance until the collection of both principal and interest becomes reasonably certain. When a problem loan is finally resolved, there may ultimately be an actual writedown or charge-off of the principal balance of the loan which would necessitate additional charges to the allowance for loan losses.

At September 30, 2001, nonperforming assets totaled \$10.1 million, compared to \$5.1 million at year-end 2000. Nonperforming assets as a percentage of loans plus other real estate were 0.55% at September 30, 2001, compared to 0.30% at December 31, 2000. The increase in nonperforming assets is attributable to the current slowdown in the national economy. Although the level of nonperforming assets has increased since year-end 2000, the current levels are still below industry averages. The following table presents Alabama National's nonperforming assets for the dates indicated.

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

NONPERFORMING ASSETS
(Amounts in thousands, except percentages)

	September 30, 2001 -----

Net charge-offs to average loans.....	0.09
Nonperforming assets to period-end loans and other real estate owned.....	0.55
Nonperforming loans to period-end loans.....	0.45

25

Net loan charge-offs for the 2001 nine months totaled \$2.1 million or 0.09% (annualized) of average loans for the period. The allowance for loan losses as a percentage of total loans, net of unearned income, was 1.28% at September 30, 2001, compared to 1.31% at December 31, 2000. The following table analyzes activity in the allowance for loan losses for the 2001 nine months.

ANALYSIS OF THE ALLOWANCE FOR LOAN LOSSES

26

The loan portfolio is periodically reviewed to evaluate the outstanding loans and to measure both the performance of the portfolio and the adequacy of the allowance for loan losses. This analysis includes a review of delinquency trends, actual losses and internal credit ratings. Based on this analysis, management considers the allowance for loan losses at September 30, 2001 to be adequate to cover possible loan losses in the portfolio as of that date. However, because of the inherent uncertainty of assumptions made during the evaluation process, there can be no assurance that loan losses in future periods will not exceed the allowance for loan losses or that additional allocations to the allowance will not be required.

Interest Rate Sensitivity

Alabama National monitors and manages the pricing and maturity of its assets and liabilities in order to diminish the potential adverse impact that changes in interest rates could have on net interest income. The principal monitoring technique employed by Alabama National is simulation analysis, which technique is augmented by "gap" analysis.

In simulation analysis, Alabama National reviews each individual asset and liability category and its projected behavior in various different interest rate environments. These projected behaviors are based upon management's past experiences and upon current competitive environments, including the various environments in the different markets in which Alabama National competes. Using this projected behavior and differing rate scenarios as inputs, the simulation analysis generates as output a projection of net interest income. Alabama National also periodically verifies the validity of this approach by comparing actual results with those that were projected in previous models. See Market Risk.

Another technique used by Alabama National in interest rate management is the measurement of the interest sensitivity "gap," which is the positive or negative dollar difference between assets and liabilities that are subject to interest rate repricing within a given period of time. Interest rate sensitivity can be managed by repricing assets and liabilities, selling securities available for sale, replacing an asset or liability at maturity or by adjusting the interest

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

rate during the life of an asset or liability.

Alabama National evaluates interest sensitivity risk and then formulates guidelines regarding asset generation and repricing, and sources and prices of off-balance sheet commitments in order to decrease interest sensitivity risk. Alabama National uses computer simulations to measure the net income effect of various interest rate scenarios. The modeling reflects interest rate changes and the related impact on net income over specified periods of time.

27

The following table illustrates Alabama National's interest rate sensitivity at September 30, 2001, assuming relevant assets and liabilities are collected and paid, respectively, based upon historical experience rather than their stated maturities.

-
- (1) Excludes nonaccrual loans of \$8,224,000.
 - (2) Excludes available for sale equity securities of \$12,681,000.
 - (3) Excludes matured certificates which have not been redeemed by the customer and on which no interest is accruing.
 - (4) Includes treasury, tax and loan account of \$3,325,000.

Alabama National generally benefits from increasing market rates of interest when it has an asset-sensitive gap and generally benefits from decreasing market rates of interest when it is liability sensitive. Alabama National is liability sensitive through the one year time frame, except for the zero through three month period. However, Alabama National's gap analysis is not a precise indicator of its interest sensitivity position. The analysis presents only a static view of the timing of maturities and repricing opportunities, without taking into consideration that changes in interest rates do not affect all assets and liabilities equally. For example, rates paid on a substantial portion of core deposits may change contractually within a relatively short time frame, but those rates are viewed by management as significantly less interest-sensitive than market-based rates, such as those paid on non-core deposits. Accordingly, management believes that a liability-sensitive gap position is not as indicative of Alabama National's true interest sensitivity as it would be for an organization which depends to a greater extent on purchased funds to support earning assets. Net interest income may be affected by other significant factors in a given interest rate environment, including changes in the volume and mix of earning assets and interest-bearing liabilities.

28

Market Risk

Alabama National's earnings are dependent on its net interest income which is the difference between interest income earned on all earning assets, primarily loans and securities, and interest paid on all interest bearing liabilities, primarily deposits. Market risk is the risk of loss from adverse changes in market prices and rates. Alabama National's market risk arises primarily from inherent interest rate risk in its lending, investing and deposit gathering activities. Alabama National seeks to reduce its exposure to market risk through actively monitoring and managing its interest rate risk. Management relies upon static "gap" analysis to determine the degree of mismatch in the maturity and repricing distribution of interest earning assets and interest bearing liabilities which quantifies, to a large extent, the degree of market risk inherent in Alabama National's balance sheet. Gap analysis is further augmented by simulation analysis to evaluate the impact of varying levels of prevailing interest rates and the sensitivity of specific earning assets and interest bearing liabilities to changes in those prevailing rates. Simulation analysis consists of evaluating the impact on net interest income given changes from 200 basis points below to 200 basis points above the current prevailing rates. Management makes certain assumptions as to the effect varying levels of interest rates have on certain earning assets and interest bearing liabilities, which assumptions consider both historical experience and consensus estimates of outside sources.

With respect to the primary earning assets, loans and securities, certain features of individual types of loans and specific securities introduce uncertainty as to their expected performance at varying levels of interest rates. In some cases, prepayment options exist whereby the borrower may elect to repay the obligation at any time. These prepayment options make anticipating

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

the performance of those instruments difficult given changes in prevailing rates. At September 30, 2001, mortgage backed securities with a carrying value of \$384.1 million, or 14.5% of total assets, and essentially every loan, net of unearned income, (totaling \$1.83 billion, or 69.0% of total assets), carried such prepayment options. Management believes that assumptions used in its simulation analysis about the performance of financial instruments with such prepayment options are appropriate. However, the actual performance of these financial instruments may differ from management's estimates due to several factors, including the diversity and financial sophistication of the customer base, the general level of prevailing interest rates and the relationship to their historical levels, and general economic conditions. The difference between those assumptions and actual results, if significant, could cause the actual results to differ from those indicated by the simulation analysis.

Deposits totaled \$1.87 billion, or 70.4% of total assets, at September 30, 2001. Since deposits are the primary funding source for earning assets, the associated market risk is considered by management in its simulation analysis. Generally, it is anticipated that deposits will be sufficient to support funding requirements. However, the rates paid for deposits at varying levels of prevailing interest rates have a significant impact on net interest income and therefore, must be quantified by Alabama National in its simulation analysis. Specifically, Alabama National's spread, the difference between the rates earned on earning assets and rates paid on interest bearing liabilities, is generally higher when prevailing rates are higher. As prevailing rates reduce, the spread tends to compress, with severe compression at very low prevailing interest rates. This characteristic is called "spread compression" and adversely effects net interest income in the simulation analysis when anticipated prevailing rates are reduced from current rates. Management relies upon historical experience to estimate the degree of spread compression in its simulation analysis. Management believes that such estimates of possible spread compression are reasonable. However, if the degree of spread compression varies from that expected, the actual results could differ from those indicated by the simulation analysis.

29

The following table illustrates the results of simulation analysis used by Alabama National to determine the extent to which market risk would affect net interest margin for the next twelve months if prevailing interest rates increased or decreased the specified amounts from current rates. Because of the inherent use of estimates and assumptions in the simulation model used to derive this information, the actual results of the future impact of market risk on Alabama National's net interest margin may differ from that found in the table.

MARKET RISK (Amounts in thousands)

Change in Prevailing Interest Rates (1)	As of September 30, 2001		As of December 31, 2000	
	Net Interest Income Amount	Change from Income Amount	Net Interest Income Amount	Change Income A

(1) Assumes an immediate rate change of this magnitude.

30

Liquidity and Capital Adequacy

Alabama National's net loan to deposit ratio was 97.9% at September 30, 2001, compared to 94.7% at year-end 2000. Alabama National's liquid assets as a percentage of total deposits were 7.3% at September 30, 2001, compared to 6.6% at year-end 2000. At September 30, 2001, Alabama National had unused federal funds lines of approximately \$120.7 million, unused lines at the Federal Home Loan Bank of \$115.6 million and an unused credit line with a third party bank of \$5.4 million. During the 2001 second quarter, the maximum credit amount under this third party bank facility was increased from \$32.0 million to \$35.0 million. Alabama National also has access to approximately \$148.0 million via a credit facility with the Federal Reserve Bank of Atlanta. At September 30, 2001 and year-end 2000, there were no outstanding borrowings under this Federal Reserve credit facility. Management analyzes the level of off-balance sheet assets such as unfunded loan commitments and outstanding letters of credit as they relate to the levels of cash, cash equivalents, liquid investments, and available funds lines in an attempt to minimize the possibility that a potential liquidity shortfall will exist. Based on this analysis, management believes that Alabama National has adequate liquidity to meet short-term operating requirements. However, no assurances can be given in this regard.

Alabama National's stockholders' equity increased by \$17.9 million from December 31, 2000, to \$189.5 million at September 30, 2001. This increase was attributable to the following (in thousands):

Net income.....	\$20,327
Dividends.....	(8,163)
Issuance of stock from treasury.....	372
Additional paid in capital related to stock based compensation.....	1,052
Changes incidental to merger.....	(10)
Increase in unrealized gain on securities available for sale, net of deferred taxes.....	4,298

Net increase.....	\$17,876
	=====

A strong capital position is vital to the continued profitability of Alabama National because it promotes depositor and investor confidence and provides a solid foundation for future growth of the organization. The capital of Alabama National and its subsidiary banks (the "Banks") exceeded all prescribed regulatory capital guidelines at September 30, 2001. Under the capital guidelines of their regulators, Alabama National and the Banks are currently required to maintain a minimum risk-based total capital ratio of 8%, with at least 4% being Tier 1 capital. Tier 1 capital consists of common stockholders' equity, qualifying perpetual preferred stock, and minority interests in equity accounts of consolidated subsidiaries, less goodwill. In addition, Alabama National and the Banks must maintain a minimum Tier 1 leverage ratio (Tier 1 capital to total assets) of at least 3%, but this minimum ratio is increased by

Edgar Filing: ALABAMA NATIONAL BANCORPORATION - Form 10-Q

100 to 200 basis points for other than the highest rated institutions. The following table sets forth the risk-based and leverage ratios of Alabama National and each subsidiary bank at September 30, 2001:

	Tier 1 Risk Based -----	Total Risk Based -----
Alabama National BanCorporation.....	8.88%	10.08%
National Bank of Commerce of Birmingham.....	9.84	10.95
