**CRESTOR OUTCOMES STUDY JUPITER CLOSES EARLY DUE
TO UNEQUIVOCAL EVIDENCE OF BENEFIT**

AstraZeneca today announced it has decided to stop the CRESTOR JUPITER clinical study early based on a recommendation from an Independent Data Monitoring Board and the JUPITER Steering Committee, which met on March 29, 2008. The study will be stopped early because there is unequivocal evidence of a reduction in cardiovascular morbidity and mortality amongst patients who received CRESTOR when compared to placebo.

JUPITER (Justification for the Use of statins in Primary prevention: an Intervention Trial Evaluating Rosuvastatin) was designed to determine if treating patients with no evidence of pre-existing cardiovascular disease and low to normal LDL-C but elevated C-reactive protein (CRP) with CRESTOR 20mg once daily would reduce major cardiovascular events. CRP is a recognized marker of inflammation and is associated with an increased risk of atherosclerotic cardiovascular events.

The JUPITER study team has initiated activities to close this large multi-center study. Over 15,000 trial participants will be scheduled by their investigator for final assessments at over 1,200 sites in 26 countries. Data from these visits will be collected and reviewed to allow a full and complete analysis and final results of the study will be published once the analysis is complete.

JUPITER is one study from the global research initiative known as the GALAXY programme, which has now recruited more than 64,000 patients from 55 countries worldwide, to investigate the impact of CRESTOR on cardiovascular risk reduction and patient outcomes.

Disclosure Rules DTR 3.1.4R

We hereby inform you that on 28 March 2008 the following Directors of AstraZeneca PLC were granted options under the AstraZeneca Share Option Plan over the Company's USD0.25 Ordinary Shares.

Name of Director	Number of shares over which option is granted	Exercise price per share	Period when exercisable	Total number of shares under option
D R Brennan	193,856	1882p	28.3.11-27.3.18	See below
S Lowth	70,138	1882p	28.3.11-27.3.18	88,803
J S Patterson	68,862	1882p	28.3.11-27.3.18	305,396

The options will become exercisable on 28 March 2011 subject to certain performance conditions. The conditions, which will not be subject to any retesting, are that the earnings per share of the Company must increase by the increase in the UK Retail Prices Index plus 5% per annum on average over three years, and that no significant unforeseen event has taken place which, in the reasonable opinion of the Remuneration Committee, has resulted in major reputational damage to AstraZeneca, and the circumstances of which are exceptional enough to justify the option not vesting and becoming exercisable. Failure to satisfy either or both of these conditions will result in the lapse of the option in its entirety.

David R Brennan, a Director of the Company, has previously received grants of options over the Company's American Depositary Shares (ADSs). One ADS equals one Ordinary Share. Following the grant of options referred to above, David Brennan has options over 432,959 Ordinary Shares and 355,246 ADSs.

A summary of the Plan, including a more detailed explanation of the performance target(s), can be found in the AstraZeneca Annual Report and Form 20-F Information 2007 which is available on the Company's website www.astrazeneca.com.
