Morgan Stanley Finance LLC \$9,579,840 Trigger Autocallable Contingent Yield Notes

Linked to the Least Performing Underlying between the NASDAQ 100 Index® and the EURO STOXX 50® Index due September 19, 2028

Fully and Unconditionally Guaranteed by Morgan Stanley

Principal at Risk Securities

Investment Description

These Trigger Autocallable Contingent Yield Notes (the “Securities”) are unsecured and unsubordinated debt obligations of Morgan Stanley Finance LLC (“MSFL”) and are fully and unconditionally guaranteed by Morgan Stanley. The Securities provide a return **based on the least performing underlying** between the NASDAQ 100 Index® (the “NDX Index”) and the EURO STOXX 50 Index (the “SX5E Index,” and together with the NDX Index, the “Underlyings”). If the Index Closing Values of **both the NDX Index and the SX5E Index** (each, an “Underlying”) on a quarterly Observation Date (the “Observation Date Closing Values”) are equal to or greater than their respective Coupon Barriers, MSFL will make a Contingent Coupon payment with respect to that Observation Date. However, if the Index Closing Value of **either of the Underlyings** is below its respective Coupon Barrier, no coupon will accrue or be payable with respect to that Observation Date. In addition, MSFL will automatically call the Securities early if the Observation Date Closing Values for **both the NDX Index and the SX5E Index** on any quarterly Observation Date

beginning after approximately one year (September 16, 2019) are equal to or greater than their respective Initial Underlying Values. If the Securities are called, MSFL will pay the principal amount plus the Contingent Coupon for that Observation Date and no further amounts will be owed to you. If the Securities are not called prior to maturity and the Final Underlying Values of **both the NDX Index and the SX5E Index** are equal to or greater than their respective Coupon Barriers, MSFL will make a cash payment to you at maturity equal to the principal amount of your Securities plus the Contingent Coupon with respect to the Final Observation Date. If the Final Underlying Value of **either Underlying** is less than its Coupon Barrier, but the Final Underlying Values of **both the NDX Index and SX5E Index** are equal to or greater than their respective Downside Thresholds, MSFL will make a cash payment to you at maturity equal to the principal amount of your Securities, and no Contingent Coupon will be paid with respect to the Final Observation Date. However, if the Final Underlying Value of **either the NDX Index or the the SX5E Index** is less than its respective Downside Threshold, MSFL will pay you significantly less than the full principal amount, if anything, at maturity, resulting in a loss on your principal amount that is proportionate to the decline in the value of the **Underlying with the larger percentage decrease from its Initial Underlying Value to its Final Underlying Value (the “Least Performing Underlying”)**, even if the other Underlying appreciates or does not decline as much. These long-dated Securities may be appropriate for investors who seek an opportunity for potentially enhanced income in exchange for the risk of losing their principal at maturity and the risk of receiving no Contingent Coupons during the term of the Securities. Your return will be solely the Contingent Coupons, if any, and you will not participate in any appreciation in either of the Underlyings. Because all payments on the Securities are based on the least performing underlying between the NDX Index and the SX5E Index, the fact that the Securities are linked to two Underlyings does not provide any asset diversification benefits and instead means that a decline in the value beyond the relevant Coupon Barrier or Downside Threshold of either the NDX Index or the SX5E Index will result in no Contingent Coupon payments or a significant loss on your investment, even if the other Underlying appreciates or does not decline as much. **Investing in the Securities involves significant risks. The Issuer will not pay a quarterly Contingent Coupon if the Observation Date Closing Value for either of the Underlyings is below its respective Coupon Barrier. The Issuer will not automatically call the Securities if the Observation Date Closing Value of either of the Underlyings is below its respective Initial Underlying Value. You will lose a significant portion or all of your principal amount at maturity if the Securities are not called and the Final Underlying Value of either of the Underlyings is below its Downside Threshold. Generally, the higher the Contingent Coupon Rate for the Securities, the greater risk of loss on those Securities. If you sell the Securities prior to maturity, you may receive substantially less than the principal amount even if the values of both Underlyings are greater than their respective Downside Thresholds at the time of sale.**

All payments are subject to our credit risk. If we default on our obligations, you could lose a significant portion or all of your investment. These Securities are not secured obligations and you will not have any security interest in, or otherwise have any access to, any underlying reference asset or assets.

Features Key Dates

q **Automatically Callable:** MSFL will automatically call the Securities and pay you the principal amount plus the Contingent Coupon otherwise due for the quarterly Observation Date only if the Observation Date Closing Values of **both the NDX Index and the SX5E Index** on any quarterly Observation Date beginning September 16, 2019 are equal to or greater than their respective Initial Underlying Values, and no further payment will be made on the Securities. If the Securities are not called, investors will have the potential for downside equity market risk of the Least Performing Underlying at maturity.

q **Contingent Coupon:** If the Observation Date Closing Values of **both the NDX Index and the SX5E Index** on any quarterly Observation Date are equal to or greater than their respective Coupon Barriers, MSFL will make a Contingent Coupon payment with respect to that Observation Date. However, if the Observation Date Closing Value of **either Underlying** is below its Coupon Barrier, no coupon will be payable with respect to that Observation Date.

q **Contingent Downside Market Exposure at Maturity:** If, at maturity, the Securities have not been called and the Final Underlying Values of **both the NDX Index and the SX5E Index** are equal to or greater than their respective

Coupon Barriers, MSFL will make a cash payment to you at maturity equal to the principal amount of your Securities plus the Contingent Coupon with respect to the Final Observation Date. If the Final Underlying Value of **either Underlying** is less than its respective Coupon Barrier, but the Final Underlying Values of **both the NDX Index and the SX5E Index** are equal to or greater than their respective Downside Thresholds, MSFL will make a cash payment to you at maturity equal to the principal amount of your Securities, and no Contingent Coupon will be paid with respect to the Final Observation Date. However, if the Final Underlying Value of **either the NDX Index or the SX5E Index** is less than its respective Downside Threshold on the Final Observation Date, MSFL will repay less than the principal amount, if anything, at maturity, resulting in a significant loss on your principal amount that is proportionate to the decline in the value of the **Least Performing Underlying** from the Trade Date to the Final Observation Date. If you sell the Securities prior to maturity, you may receive substantially less than the principal amount even if the values of both Underlyings are greater than their respective Downside Thresholds at the time of sale. Any payment on the Securities is subject to our creditworthiness.

Trade Date	September 14, 2018
Settlement Date after the Trade Date)	September 19, 2018 (3 business days
Observation Dates	Quarterly, callable beginning September 16, 2019. See "Observation Dates and Coupon Payment Dates" on page 7 for details.
Final Observation Date*	September 14, 2028
Maturity Date*	September 19, 2028

* Subject to postponement in the event of a Market Disruption Event or for non-Index Business Days. See "Postponement of Determination Dates" in the accompanying product supplement.

NOTICE TO INVESTORS: THE SECURITIES ARE SIGNIFICANTLY RISKIER THAN CONVENTIONAL DEBT INSTRUMENTS. THE SECURITIES DO NOT GUARANTEE THE REPAYMENT OF THE FULL PRINCIPAL AMOUNT AT MATURITY, AND THE SECURITIES WILL HAVE DOWNSIDE MARKET RISK SIMILAR TO THE LEAST PERFORMING OF THE TWO UNDERLYINGS, SUBJECT TO THE RESPECTIVE DOWNSIDE THRESHOLDS AT MATURITY. THIS MARKET RISK IS IN ADDITION TO THE CREDIT RISK INHERENT IN PURCHASING OUR DEBT OBLIGATIONS. YOU SHOULD NOT PURCHASE THE SECURITIES IF YOU DO NOT UNDERSTAND OR ARE NOT COMFORTABLE WITH THE SIGNIFICANT RISKS INVOLVED IN INVESTING IN THE SECURITIES. THE SECURITIES WILL NOT BE LISTED ON ANY SECURITIES EXCHANGE.

YOU SHOULD CAREFULLY CONSIDER THE RISKS DESCRIBED UNDER "KEY RISKS" BEGINNING ON PAGE 8 OF THIS PRICING SUPPLEMENT IN CONNECTION WITH YOUR PURCHASE OF THE SECURITIES. EVENTS RELATING TO ANY OF THOSE RISKS, OR OTHER RISKS AND UNCERTAINTIES, COULD ADVERSELY AFFECT THE MARKET VALUE OF, AND THE RETURN ON, YOUR SECURITIES. YOU MAY LOSE A SIGNIFICANT PORTION OR ALL OF YOUR PRINCIPAL AMOUNT.

Security Offering

This pricing supplement relates to Securities linked to the least performing underlying between the NASDAQ 100 Index[®] and the EURO STOXX 50[®] Index. The Securities are offered at a minimum investment of \$1,000 in denominations of \$10 and integral multiples thereof.

Underlying	Initial Underlying	Coupon Barrier	Downside Threshold	Contingent Coupon Rate	CUSIP	ISIN
------------	-----------------------	----------------	-----------------------	---------------------------	-------	------

	Value				
NASDAQ 100 Index®	7,545.496	5,281.847, which is approximately 70% of the Initial Underlying Value	3,772.748, which is 50% of the Initial Underlying Value		
			1,672.32, which is	7.32% per annum	61768R872US61768R8723
EURO STOXX 50® Index	3,344.63	2,341.24, which is approximately 70% of the Initial Underlying Value	approximately 50% of the Initial Underlying Value		

See “Additional Information about Morgan Stanley, MSFL and the Securities” on page 2. The Securities will have the terms set forth in the accompanying prospectus, product supplement and index supplement and this pricing supplement.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these Securities or passed upon the adequacy or accuracy of this pricing supplement or the accompanying product supplement, index supplement or prospectus. Any representation to the contrary is a criminal offense. The Securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency or instrumentality, nor are they obligations of, or guaranteed by, a bank.

References to “MSFL” refer to only MSFL, references to “Morgan Stanley” refer to only Morgan Stanley and references to “we,” “our” and “us” refer to MSFL and Morgan Stanley collectively. In this document, the “Securities” refers to the Triggered Autocallable Contingent Yield Notes that are offered hereby. Also, references to the accompanying “prospectus”, “product supplement” and “index supplement” mean the prospectus filed by MSFL and Morgan Stanley dated November 16, 2017, the product supplement for auto-callable securities filed by MSFL and Morgan Stanley dated November 16, 2017 and the index supplement filed by MSFL and Morgan Stanley dated November 16, 2017, respectively.

You should rely only on the information incorporated by reference or provided in this pricing supplement or the accompanying product supplement, index supplement and prospectus. We have not authorized anyone to provide you with different information. We are not making an offer of these Securities in any state where the offer is not permitted. You should not assume that the information in this pricing supplement or the accompanying product supplement, index supplement and prospectus is accurate as of any date other than the date on the front of this document.

If the terms contained in this pricing supplement differ from those discussed in the product supplement, index supplement or prospectus, the terms contained in this pricing supplement will control.

The Issue Price of each Security is \$10. This price includes costs associated with issuing, selling, structuring and hedging the Securities, which are borne by you, and, consequently, the estimated value of the Securities on the Trade Date is less than \$10. We estimate that the value of each Security on the Trade Date is \$9.529.

What goes into the estimated value on the Trade Date?

In valuing the Securities on the Trade Date, we take into account that the Securities comprise both a debt component and a performance-based component linked to the Underlyings. The estimated value of the Securities is determined using our own pricing and valuation models, market inputs and assumptions relating to the Underlyings, instruments based on the Underlyings, volatility and other factors including current and expected interest rates, as well as an interest rate related to our secondary market credit spread, which is the implied interest rate at which our conventional fixed rate debt trades in the secondary market.

What determines the economic terms of the Securities?

In determining the economic terms of the Securities, including the Coupon Barriers, the Downside Thresholds and the Contingent Coupon Rate, we use an internal funding rate, which is likely to be lower than our secondary market credit spreads and therefore advantageous to us. If the issuing, selling, structuring and hedging costs borne by you were lower or if the internal funding rate were higher, one or more of the economic terms of the Securities would be more favorable to you.

What is the relationship between the estimated value on the Trade Date and the secondary market price of the Securities?

The price at which MS & Co. purchases the Securities in the secondary market, absent changes in market conditions, including those related to the Underlyings, may vary from, and be lower than, the estimated value on the Trade Date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that MS & Co. would charge in a secondary market transaction of this type and other factors. However, because the costs associated with issuing, selling, structuring and hedging the Securities are not fully deducted upon issuance, for a period of up to 12 months following the Settlement Date, to the extent that MS & Co. may buy or sell the Securities in the secondary market, absent changes in market conditions, including those related to the Underlyings, and to our secondary market credit spreads, it would do so based on values higher than the estimated value. We expect that those higher values will also be reflected in your brokerage account statements.

MS & Co. currently intends, but is not obligated, to make a market in the Securities, and, if it once chooses to make a market, may cease doing so at any time.

Investor Suitability

The Securities may be suitable for you if:

t You fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.

t You can tolerate a loss of all or a substantial portion of your investment and are willing to make an investment that will have the same downside market risk, subject to the respective Downside Thresholds at maturity, as the Least Performing Underlying.

t You accept that you may not receive a Contingent Coupon on some or all of the Coupon Payment Dates.

t You understand and accept the risks associated with the Underlyings.

t You believe both the NDX Index and the SX5E Index will close at or above their respective Coupon Barriers on the Observation Dates, and above their respective Downside Thresholds on the Final Observation Date.

t You are willing to invest in the Securities based on the Contingent Coupon Rate specified on the cover hereof.

t You understand that the linkage to two Underlyings does not provide any portfolio diversification benefits and instead means that a decline in the value beyond the relevant Coupon Barrier or Downside Threshold of either the NDX Index or the SX5E Index will result in no Contingent Coupon payments or a significant loss on your investment, respectively, even if the other Underlying appreciates.

The Securities may not be suitable for you if:

t You do not fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.

t You cannot tolerate a loss of all or a substantial portion of your investment, or are unwilling to make an investment that will have the same downside market risk, subject to the respective Downside Thresholds at maturity, as the Least Performing Underlying.

t You require an investment designed to provide a full return of principal at maturity.

t You do not understand and accept the risks associated with the Underlyings.

t You do not accept that you may not receive a Contingent Coupon on some or all of the Coupon Payment Dates.

t You believe that the value of one of the NDX Index or the SX5E Index will decline during the term of the Securities and is likely to close below its Coupon Barrier on the Observation Dates or below its Downside Threshold on the Final Observation Date.

t You are unwilling to invest in the Securities based on the Contingent Coupon Rate specified on the cover hereof.

t You are not comfortable with an investment linked to two Underlyings such that a decline in the value beyond the relevant Coupon Barrier or Downside

Edgar Filing: MORGAN STANLEY - Form 424B2

t You understand and accept that you will not participate in Threshold of either the NDX Index or the SX5E Index any appreciation in the values of the Underlyings and that your will result in no Contingent Coupon payments or a potential return is limited to the Contingent Coupons, if any. significant loss on your investment, respectively, even if the other Underlying appreciates .

t You can tolerate fluctuations in the value of the Securities prior to maturity that may be similar to or exceed the downside value fluctuations of the Least Performing Underlying. You seek an investment that participates in the appreciation in the values of the Underlyings or that has unlimited return potential.

t You do not seek guaranteed current income from this investment and are willing to forgo dividends paid on the stocks comprising the Underlyings. t You cannot tolerate fluctuations in the value of the Securities prior to maturity that may be similar to or exceed the downside value fluctuations of the Least Performing Underlying.

t You are willing to invest in Securities that may be called early or you are otherwise willing to hold the Securities to maturity, as set forth on the cover of this pricing supplement. t You prefer the lower risk, and therefore accept the potentially lower returns, of fixed income investments with comparable maturities and credit ratings.

t You accept that there may be little or no secondary market for the Securities and that any secondary market will depend in large part on the price, if any, at which MS & Co. is willing to trade the Securities. t You seek guaranteed current income from this investment or prefer to receive the dividends paid on the stocks comprising the Underlyings.

t You are willing to assume our credit risk, and understand that if we default on our obligations you may not receive any amounts due to you and could lose your entire investment. t You are unable or unwilling to invest in Securities that may be called early, or you are otherwise unable or unwilling to hold the Securities to maturity, as set forth on the cover of this pricing supplement, or you seek an investment for which there will be an active secondary market.

t You are not willing to assume our credit risk for all payments under the Securities, including any repayment of principal.

The investor suitability considerations identified above are not exhaustive. Whether or not the Securities are a suitable investment for you will depend on your individual circumstances, and you should reach an investment decision only after you and your investment, legal, tax, accounting and other advisors have carefully considered the suitability of an investment in the Securities in light of your particular circumstances. You should also review carefully the sections entitled “Key Risks” beginning on page 8 of this pricing supplement and “Risk

Factors” beginning on page 7 of the accompanying prospectus and page S-36 of the accompanying product supplement for risks related to an investment in the Securities. For additional information about the Underlyings, see the information set forth under “The NASDAQ 100 Index®” on page 20 and “The EURO STOXX 50® Index” on page 22.

Final Terms

Issuer Morgan Stanley Finance LLC
 Guarantor Morgan Stanley
 Issue Price \$10.00 per Security. The Securities are offered at a minimum investment of 100 Securities.
 Underlyings The NASDAQ 100 Index[®] (the “NDX Index”) and the EURO STOXX 50 Index (the “SX5E Index”)
 Principal Amount \$10.00 per Security
 Term 10 years, unless earlier called
 The Securities will be called automatically if the Observation Date Closing Values of **both the NDX Index and the SX5E Index** on any Observation Date beginning September 16, 2019 are **equal to or greater than** their respective Initial Underlying Values.

Automatic Call Feature If the Securities are called, MSFL will pay you the Principal Amount *plus* the Contingent Coupon otherwise due for that Observation Date on the Coupon Payment Date related to such Observation Date, and no further payments will be made on the Securities.

*The Securities will not be called if the Observation Date Closing Value of **either** of the Underlyings is below its respective Initial Underlying Value.*

If the Observation Date Closing Values of **both the NDX Index and the SX5E Index** are **equal to or greater than** their respective Coupon Barriers on any Observation Date, we will pay you the Contingent Coupon for that Observation Date on the relevant Coupon Payment Date.

If the Observation Date Closing Value of **either the NDX Index or the SX5E Index** is **less than** its Coupon Barrier on any Observation Date, the Contingent Coupon for that Observation Date will not accrue or be payable and that Contingent Coupon payment will be lost.

Contingent Coupon

Each Contingent Coupon is a fixed amount based on equal quarterly installments at the Contingent Coupon Rate, which is a per-annum rate. The Contingent Coupon amount of \$0.183 for each Security (based on the per-annum rate of 7.32%) would be applicable to each Observation Date on which the Index Closing Values of **both the NDX Index and the SX5E Index** are greater than or equal to their respective Coupon Barriers.

Contingent Coupon payments on the Securities are not guaranteed. MSFL will not pay you the Contingent Coupon for any Observation Date on which the Index Closing Value of either the NDX Index or the SX5E Index is less than its respective Coupon Barrier.

Contingent Coupon Rate The Contingent Coupon Rate is 7.32% per annum.

Edgar Filing: MORGAN STANLEY - Form 424B2

Observation Dates	Quarterly, callable beginning September 16, 2019. See “Observation Dates and Coupon Payment Dates” on page 7 for details.
Final Observation Date	September 14, 2028, subject to postponement in the event of a Market Disruption Event or for non-Index Business Days.
Coupon Payment Dates	With respect to each Observation Date as set forth under “Observation Dates and Coupon Payment Dates” on page 7. MSFL will pay you a cash payment on the Maturity Date linked to the performance of the Least Performing Underlying during the term of the Securities, as follows:

If the Securities have not been automatically called and the Final Underlying Values of **both the NDX Index and the SX5E Index are equal to or greater than** their respective Coupon Barriers, MSFL will pay you the \$10 Principal Amount plus the Contingent Coupon with respect to the Final Observation Date.

Payment at Maturity (per Security)	If the Securities have not been automatically called and the Final Underlying Value of either the NDX Index or the SX5E Index is less than its respective Coupon Barrier, but the Final Underlying Values of both the NDX Index and the SX5E Index are equal to or greater than their respective Downside Thresholds, MSFL will pay you the \$10 Principal Amount, and no Contingent Coupon will be paid with respect to the Final Observation Date.
------------------------------------	--

If the Securities have not been automatically called and the Final Underlying Value of **either the NDX Index or the SX5E Index** is **less than** its respective Downside Threshold, MSFL will pay you an amount calculated as follows:

$$\$10 \times (1 + \text{Underlying Return of the Least Performing Underlying})$$

In this case, you will lose a significant portion and could lose all of the Principal Amount in an amount proportionate to the decline of the Least Performing Underlying from the Trade Date to the Final Observation Date, even if the other Underlying appreciates or does not decline as much.

Observation Date Closing Value	With respect to each of the Underlyings, the Index Closing Value of such Underlying on any Observation Date
Least Performing Underlying	The Underlying with the larger percentage decrease from the Initial Underlying Value to the Final Underlying Value. With respect to each Underlying,

Underlying Return	$\frac{\text{Final Underlying Value} - \text{Initial Underlying Value}}{\text{Initial Underlying Value}}$
-------------------	---

Initial Underlying Value	With respect to the NDX Index, 7,545.496
Final Underlying Value	With respect to the SX5E Index, 3,344.63
Downside Threshold	With respect to each Underlying, the Index Closing Value of such Underlying on the Final Observation Date
	With respect to the NDX Index, 3,772.748, which is 50% of the Initial Underlying Value of such Underlying
	With respect to the SX5E Index, 1,672.32, which is approximately 50% of the Initial Underlying Value of such Underlying
	With respect to the NDX Index, 5,281.847, which is approximately 70% of the Initial Underlying Value of such Underlying
Coupon Barrier	With respect to the SX5E Index, 2,341.24, which is approximately 70% of the Initial Underlying Value of such Underlying
Record Date	The record date for each Contingent Coupon shall be the date one business day prior to such scheduled Coupon Payment Date; <i>provided</i> , however, that any Contingent Coupon payable at maturity or upon an automatic call shall be payable to the person to whom the Payment at Maturity or the payment upon an automatic call, as the case may be, shall be payable.
Trustee Calculation Agent	The Bank of New York Mellon MS & Co.

Investment Timeline

The Initial Underlying Values, Downside Thresholds and Coupon Barriers of both the NDX Index and the SX5E Index are determined. The Contingent Coupon Rate is set.

If the Observation Date Closing Values of **both** the NDX Index and the SX5E Index are equal to or greater than their respective Coupon Barriers on any Observation Date, MSFL will pay you a Contingent Coupon on the Coupon Payment Date. However, if the Observation Date Closing Value of **either Underlying** is below its Coupon Barrier, no coupon will be payable on the related Coupon Payment Date.

If the Observation Date Closing Values of **both** the NDX Index and the SX5E Index **are equal to or greater than their respective Initial Underlying Values** on any Observation Date beginning on September 16, 2019, the Securities will be called and MSFL will pay you a cash payment per Security equal to the Principal Amount *plus* the Contingent Coupon otherwise due for that Observation Date, and no further payments will be made on the Securities.

The Final Underlying Values are determined as of the Final Observation Date.

If the Securities have not been called and the Final Underlying Values of **both the NDX Index and the SX5E Index are equal to or greater than** their respective Coupon Barriers, MSFL will pay you the \$10 Principal Amount plus the Contingent Coupon with respect to the Final Observation Date.

If the Securities have not been called and the Final Underlying Value of **either the NDX Index or the SX5E Index** is less than its respective Coupon Barrier, but the Final Underlying Values of **both the NDX Index and the SX5E Index** are equal to or greater than their respective Downside Thresholds, MSFL will pay you the \$10 Principal Amount, and no Contingent Coupon will be paid with respect to the Final Observation Date.

However, if the Final Underlying Value of **either the NDX Index or the SX5E Index** is less than its respective **Downside Threshold**, MSFL will pay you an amount calculated as follows:

$\$10 \times (1 + \text{Underlying Return of the Least Performing Underlying})$ per Security

This amount will be significantly less than the \$10 Principal Amount by an amount proportionate to the negative Underlying Return of the Least Performing Underlying, and you could lose your entire investment.

Investing in the Securities involves significant risks. You may lose YOUR ENTIRE principal amount. Any payment on the Securities is subject to OUR creditworthiness. If we were to default on our payment obligations, you may not receive any amounts owed to you under the Securities and you could lose your entire investment.

The Issuer will not pay a quarterly Contingent Coupon if the Observation Date Closing Value for either of the Underlyings is below its respective Coupon Barrier. The Issuer will not automatically call the Securities if the Observation Date Closing Value of either of the Underlyings is below its respective Initial Underlying Value. You will lose a significant portion or all of your principal amount at maturity if the Securities are not called and the Final Underlying Value of either of the Underlyings is below its RESPECTIVE Downside Threshold.

9/14/2023	9/18/2023	9/14/2028 (Final Observation Date) Maturity Date	

* The Securities are not subject to an automatic call until the fourth Observation Date, which is September 16, 2019.

(1) Subject to postponement in the event of a Market Disruption Event or for non-Index Business Days. See “Postponement of Determination Dates” in the accompanying product supplement.

(2) If, due to a Market Disruption Event or otherwise, any Observation Date is postponed so that it falls less than two business days prior to the scheduled Coupon Payment Date, the Coupon Payment Date will be postponed to the second business day following that Observation Date as postponed, *provided* that the Coupon Payment Date with respect to the Final Observation Date will be the Maturity Date. No additional coupon will accrue on an account of any such postponement.

Key Risks

An investment in the Securities involves significant risks. Some of the risks that apply to the Securities are summarized here, but we urge you to also read the “Risk Factors” section of the accompanying prospectus and product supplement. You should also consult your investment, legal, tax, accounting and other advisers in connection with your investment in the Securities.

The Securities do not guarantee the payment of regular interest or the return of any principal. The terms of the Securities differ from those of ordinary debt securities in that the Securities do not guarantee the payment of regular interest or the return of any of the Principal Amount at maturity. Instead, if the Securities have not been called prior to maturity and if the Final Underlying Value of **either the NDX Index or the SX5E Index** is less than its respective Downside Threshold, you will be exposed to the decline in the value of the Least Performing Underlying from its Initial Underlying Value to its Final Underlying Value, on a 1-to-1 basis, resulting in a significant loss of your initial investment that is proportionate to the decline of the Least Performing Underlying over the term of the Securities, even if the other Underlying appreciates or does not decline as much. **You could lose your entire Principal Amount.**

You are exposed to the market risk of both Underlyings. Your return on the Securities is not linked to a basket consisting of the Underlyings. Rather, it will be contingent upon the independent performance of each of the NDX Index and the SX5E Index. Unlike an instrument with a return linked to a basket of underlying assets, in which risk is mitigated and diversified among all of the components of the basket, you will be exposed to the risks related to both the NDX Index and the SX5E Index. Poor performance by either of the Underlyings over the term of the Securities may negatively affect your return and will not be offset or mitigated by positive performance by the other Underlying. For the Securities to be automatically called or to receive any Contingent Coupon payment or contingent repayment of principal at maturity from MSFL, both Underlyings must close at or above their respective Initial Underlying Values, Coupon Barriers or Downside Thresholds, respectively, on the applicable Observation Date or Final Observation Date, as applicable. In addition, if not called prior to maturity, you may incur a loss proportionate to the negative return of the Least Performing Underlying even if the other Underlying appreciates during the term of the Securities. Accordingly, your investment is subject to the market risk of both Underlyings. Additionally, movements in the values of the Underlyings may be correlated or uncorrelated at different times during the term of the Securities, and such correlation (or lack thereof) could have an adverse effect on your return on the Securities. For example, the likelihood that one of the Underlyings will close below its Coupon Barrier on an Observation Date or below its Downside Threshold on the Final Observation Date will increase when the movements in the values of the Underlyings are uncorrelated. This results in a greater potential for a Contingent Coupon to not be paid during the term of the Securities and for a significant loss of principal at maturity if the Securities are not previously called. If the performance of the Underlyings is not correlated or is negatively correlated, the risk of not receiving a Contingent Coupon and of incurring a significant loss of principal at maturity is greater. In addition, correlation generally decreases for each additional Underlying to which the Securities are linked, resulting in a greater potential for a significant loss of principal at maturity.

Because the Securities are linked to the performance of the least performing between the NDX Index and the SX5E Index, you are exposed to greater risk of receiving no Contingent Coupon payments or sustaining a significant loss on your investment than if the Securities were linked to just the NDX Index or just the SX5E Index. The risk that you will not receive any Contingent Coupons and/or lose a significant portion or all of your

initial investment in the Securities is greater if you invest in the Securities as opposed to substantially similar securities that are linked to the performance of just the NDX Index or just the SX5E Index. With two Underlyings, it is more likely that either Underlying will close below its Coupon Barrier on the quarterly Observation Dates or below its Downside Threshold on the Final Observation Date than if the Securities were linked to only one of the Underlyings, and therefore it is more likely that you will not receive any Contingent Coupons or will receive an amount in cash significantly less than the principal amount on the Maturity Date.

The Contingent Coupon is based solely on the Observation Date Closing Values. Whether the Contingent Coupon will be paid with respect to an Observation Date will be based on the Observation Date Closing Values of both Underlyings. As a result, you will not know whether you will receive the Contingent Coupon with respect to any Coupon Payment Date until the related Observation Date. Moreover, because the Contingent Coupon is based solely on the Observation Date Closing Values on a specific Observation Date, if the Observation Date Closing Value of either the NDX Index or the SX5E Index is less than its respective Coupon Barrier, you will not receive any Contingent Coupon with respect to such Observation Date, even if the Index Closing Values of the Underlyings were higher on other days during the term of the Securities.

You will not receive any Contingent Coupon for any quarterly period where the Observation Date Closing Value of either the NDX Index or the SX5E Index is less than or equal to its Coupon Barrier. A Contingent Coupon will be paid with respect to a quarterly period only if the Observation Date Closing Values of **both the NDX Index and the SX5E Index** are greater than or equal to their respective Coupon Barriers. If the Observation Date Closing Values of **either** of the Underlyings is below its respective Coupon Barrier, the Issuer will not pay you a Contingent Coupon for that quarterly period. If, on each Observation Date over the term of the Securities, either the NDX Index or the SX5E Index closes below its respective Coupon Barrier, you will not receive any Contingent Coupons during the 10-year term of the Securities.

Investors will not participate in any appreciation in the values of either of the Underlyings. Investors will not participate in any appreciation in the values of either of the Underlyings from their respective Initial Underlying Values, and the return on the Securities will be limited to the Contingent Coupon, if any, that is paid with respect to each Observation Date on which the Observation Date Closing Values of both the NDX Index and the SX5E Index are greater than or equal to their respective Coupon Barriers prior to maturity or an automatic call. The return on the Securities will be limited to the Contingent Coupons, if any, regardless of the appreciation of either of the Underlyings, which could be significant. It is possible that, on most or all of the Observation Dates, the Index Closing Value of either Underlying could be below its respective Coupon Barrier so that you may receive few or no Contingent Coupons. In addition, if the Securities are not called prior to maturity, you may be exposed to the full downside market risk of the Least Performing Underlying and lose a significant portion or all of your investment despite not being able to participate in any potential appreciation of either of the Underlyings. If you do not earn sufficient Contingent Coupons over the term of the Securities, the overall return on the Securities may be less than the amount that would be paid on a conventional debt security of ours of comparable maturity.

You may incur a loss on your investment if you are able to sell your Securities prior to maturity. The Downside Thresholds are considered only at maturity. If you are able to sell your Securities in the secondary market prior to maturity, you may have to sell them at a loss relative to your initial investment even if the Index Closing Values of both Underlyings are above their respective Downside Thresholds at that time. If you hold the Securities to maturity and the Securities have not been called, MSFL will either repay you the full principal amount per Security (possibly in addition to the Contingent Coupon for the Final Observation Date), if the Final Underlying Values of both the NDX Index and the SX5E Index are equal to or greater than their respective Downside Thresholds, or if either of the Underlyings closes below its respective Downside Threshold on the Final Observation Date, MSFL will repay significantly less than the Principal Amount, if anything, at maturity, resulting in a loss on your Principal Amount that is proportionate to the decline in the value of the Least Performing Underlying from the Trade Date to the Final Observation Date.

Early redemption risk. The term of your investment in the Securities may be limited to as short as one year by the automatic call feature of the Securities. If the Securities are called prior to maturity, you will not be able to receive any further Contingent Coupons for any future Observation Dates, and you may be forced to invest in a lower interest rate environment and may not be able to reinvest at comparable terms or for similar returns. However, under no circumstances will the Securities be redeemed in the first year of the term of the Securities. Generally, the longer the Securities have been outstanding, the less likely it is that they will be automatically called, because the level of at least one of the Underlyings will necessarily have declined from its respective Initial Underlying Value if the Securities were not called following an Observation Date, and there will be less time remaining until maturity in which the level(s) of such Underlying(s) can recover.

A higher Contingent Coupon Rate and/or lower Coupon Barriers and Downside Thresholds may reflect greater expected volatility of the Underlyings, and greater expected volatility generally indicates an increased risk of declines in the levels of the Underlyings and, potentially, a significant loss at maturity. The economic terms for the Securities, including the Contingent Coupon Rate, the Coupon Barriers and the Downside Thresholds, are based, in part, on the expected volatility of the Underlyings at the time the terms of the Securities are set. "Volatility" refers to the frequency and magnitude of changes in the levels of the Underlyings. Higher expected volatility with respect to the Underlyings as of the Trade Date generally indicates a greater expectation as of that date that the Final Underlying Levels of either Underlying could ultimately be less than its Downside Threshold on the Final Observation Date, which would result in a loss of a significant portion or all of the Principal Amount. At the time the terms of the Securities are set, higher expected volatility will generally be reflected in a higher Contingent Coupon Rate and/or lower Coupon Barriers and Downside Thresholds, as compared to otherwise comparable securities. Therefore, a relatively higher Contingent Coupon Rate, which would increase the upside return if the Observation Date Closing Values are greater than or equal to the Coupon Barriers on the quarterly Observation Dates, may indicate an increased risk that the levels of the Underlyings will decrease substantially, which would result in few or no Contingent Coupons and a significant loss at maturity. In addition, and as described above in "The Securities do not guarantee the payment of regular interest or the return of any principal," in general, the higher potential return on the Securities as compared to the return payable on our ordinary debt securities with a comparable maturity indicates the risk that you may not receive a positive return on the Securities and may lose a significant portion or all of your investment. Further, relatively lower Downside Thresholds may not indicate that the Securities have a greater likelihood of a return of principal at maturity. You should be willing to accept the downside market risk of the Underlyings and the potential to lose a significant portion or all of your Principal Amount at maturity.

The Securities are subject to our credit risk, and any actual or anticipated changes to our credit ratings or our credit spreads may adversely affect the market value of the Securities. You are dependent on our ability to pay

all amounts due on the Securities, including Contingent Coupons, if any, and any payments upon an automatic call or at maturity, and therefore you are subject to our credit risk. If we default on our obligations under the Securities, your investment would be at risk and you could lose some or all of your investment. As a result, the market value of the Securities prior to maturity will be affected by changes in the market's view of our creditworthiness. Any actual or anticipated decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the market value of the Securities.

As a finance subsidiary, MSFL has no independent operations and will have no independent assets. As a finance subsidiary, MSFL has no independent operations beyond the issuance and administration of its securities and will have no independent assets available for distributions to holders of MSFL securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such holders will be limited to those available under the related guarantee by Morgan Stanley and that guarantee will rank *t* *pari passu* with all other unsecured, unsubordinated obligations of Morgan Stanley. Holders will have recourse only to a single claim against Morgan Stanley and its assets under the guarantee. Holders of securities issued by MSFL should accordingly assume that in any such proceedings they would not have any priority over and should be treated *pari passu* with the claims of other unsecured, unsubordinated creditors of Morgan Stanley, including holders of Morgan Stanley-issued securities.

The market price of the Securities will be influenced by many unpredictable factors. Several factors, many of which are beyond our control, will influence the value of the Securities in the secondary market and the price at which MS & Co. may be willing to purchase or sell the Securities in the secondary market. Although we expect that generally the Index Closing Values of the Underlyings on any day will affect the value of the Securities more than any other single factor, other factors that may influence the value of the Securities include:

- o the value and volatility (frequency and magnitude of changes in value) of the Underlyings,

- o whether the Observation Date Closing Value of either Underlying has been below its Coupon Barrier on any Observation Date,

- o dividend rates on the stocks comprising the Underlyings,

- o interest and yield rates in the market,

- o time remaining until the Securities mature,

- o geopolitical conditions and economic, financial, political, regulatory or judicial events that affect the Underlyings or equities markets generally and which may affect the Final Underlying Values,

the occurrence of certain events affecting either of the Underlyings that may or may not require an adjustment to its composition, and

o any actual or anticipated changes in our credit ratings or credit spreads.

Some or all of these factors will influence the terms of the Securities at the time of issuance and the price that you will receive if you sell your Securities prior to maturity, as the Securities are comprised of both a debt component and a performance-based component linked to the Underlyings, and these are the types of factors that also generally affect the values of debt securities and derivatives linked to the Underlyings. Generally, the longer the time remaining to maturity, the more the market price of the Securities will be affected by the other factors described above. The value of each of the Underlyings may be, and each has recently been, extremely volatile, and we can give you no assurance that the volatility will lessen. See “Historical Information” below. You may receive less, and possibly significantly less, than the Principal Amount per Security if you try to sell your Securities prior to maturity.

The Securities are linked to the EURO STOXX 50® Index and are subject to risks associated with investments in securities linked to the value of foreign equity securities. The Securities are linked to the value of foreign equity securities. Investments in securities linked to the value of foreign equity securities involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross-shareholdings in companies in certain countries. Although the equity securities included in the EURO STOXX 50® Index are traded in foreign currencies, the value of your Securities (as measured in U.S. dollars) will not be adjusted for any exchange rate fluctuations. Also, there is generally less publicly available information about foreign companies than about U.S. companies that are subject to the reporting requirements of the United States Securities and Exchange Commission, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements different from those applicable to U.S. reporting companies. The prices of securities issued in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws. Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times. Moreover, the economies in such countries may differ favorably or unfavorably from the economy in the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payment positions.

Investing in the Securities is not equivalent to investing in the Underlyings. Investing in the Securities is not equivalent to investing in either Underlying or the component stocks of either Underlying. Investors in the Securities will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to stocks that constitute the Underlyings. Further, you will not participate in any potential appreciation of either Underlying even though you may be exposed to its full decline at maturity. Additionally, the Underlyings are not “total return” indices, which, in addition to reflecting the market prices of the stocks that constitute the Underlyings, would also reflect dividends paid on such stocks. The return on the Securities will not reflect such a total return feature.

t Adjustments to the NASDAQ 100 Index® or the EURO STOXX 50® Index could adversely affect the value of the Securities. The Underlying Publisher of each of the NASDAQ 100 Index® and the EURO STOXX 50® Index is

responsible for calculating and maintaining such Underlying. The Underlying Publisher may add, delete or substitute the stocks constituting either Underlying or make other methodological changes required by certain corporate events relating to the stocks constituting either Underlying, such as stock dividends, stock splits, spin-offs, rights offerings and extraordinary dividends, that could change the value of the Underlying. The Underlying Publisher may discontinue or suspend calculation or publication of the Underlying at any time. In these circumstances, the Calculation Agent will have the sole discretion to substitute a Successor Underlying that is comparable to the discontinued Underlying, and is permitted to consider indices that are calculated and published by the Calculation Agent or any of its affiliates. Any of these actions could adversely affect the value of any of the Underlyings and, consequently, the value of the Securities.

The rate we are willing to pay for securities of this type, maturity and issuance size is likely to be lower than the rate implied by our secondary market credit spreads and advantageous to us. Both the lower rate and the inclusion of costs associated with issuing, selling, structuring and hedging the Securities in the Issue Price reduce the economic terms of the Securities, cause the estimated value of the Securities to be less than the Issue Price and will adversely affect secondary market prices – Assuming no change in market conditions or any other relevant factors, the prices, if any, at which dealers, including MS & Co., may be willing to purchase the Securities in secondary market transactions will likely be significantly lower than the Issue Price, because secondary market prices will exclude the issuing, selling, structuring and hedging-related costs that are included in the Issue Price and borne by you and because the secondary market prices will reflect our secondary market credit spreads and the bid-offer spread that any dealer would charge in a secondary market transaction of this type as well as other factors.

The inclusion of the costs of issuing, selling, structuring and hedging the Securities in the Issue Price and the lower rate we are willing to pay as issuer make the economic terms of the Securities less favorable to you than they otherwise would be.

However, because the costs associated with issuing, selling, structuring and hedging the Securities are not fully deducted upon issuance, for a period of up to 12 months following the Settlement Date, to the extent that MS & Co. may buy or sell the Securities in the secondary market, absent changes in market conditions, including those related to the Underlyings, and to our secondary market credit spreads, it would do so based on values higher than the estimated value, and we expect that those higher values will also be reflected in your brokerage account statements.

The estimated value of the Securities is determined by reference to our pricing and valuation models, which may differ from those of other dealers and is not a maximum or minimum secondary market price – These pricing and valuation models are proprietary and rely in part on subjective views of certain market inputs and certain assumptions about future events, which may prove to be incorrect. As a result, because there is no market-standard way to value these types of securities, our models may yield a higher estimated value of the Securities than those generated by others, including other dealers in the market, if they attempted to value the Securities. In addition, the estimated value on the Trade Date does not represent a minimum or maximum price at which dealers, including MS & Co., would be willing to purchase your Securities in the secondary market (if any exists) at any time. The value of your Securities at any time after the date of this pricing supplement will vary based on many factors that cannot be predicted with accuracy, including our

creditworthiness and changes in market conditions. See also “The market price of the Securities will be influenced by many unpredictable factors” above.

The Securities will not be listed on any securities exchange and secondary trading may be limited. The Securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the Securities. MS & Co. currently intends, but is not obligated, to make a market in the Securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Securities easily. Because we do not expect that other broker-dealers will participate significantly in the secondary market for the Securities, the price at which you may be able to trade your Securities is likely to depend on the price, if any, at which MS & Co. is willing to transact. If, at any time, MS & Co. were to cease making a market in the Securities, it is likely that there would be no secondary market for the Securities. Accordingly, you should be willing to hold your Securities to maturity.

Hedging and trading activity by our affiliates could potentially affect the value of the Securities. One or more of our affiliates and/or third-party dealers have carried out, and will continue to carry out, hedging activities related to the Securities (and to other instruments linked to the Underlyings), including trading in the stocks that constitute the Underlyings as well as in other instruments related to the Underlyings. As a result, these entities may be unwinding or adjusting hedge positions during the term of the Securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the Final Observation Date approaches. Some of our subsidiaries also trade the stocks that constitute the Underlyings and other financial instruments related to the Underlyings on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the Trade Date could have increased the Initial Underlying Value, and, as a result, could have increased the Coupon Barrier of either of the Underlyings, which is the level at or above which such Underlying must close on each Observation Date in order for you to earn a Contingent Coupon, and the Downside Threshold of either of the Underlyings, which if the Securities are not called prior to maturity, is the level at or above which such Underlying must close on the Final Observation Date in order for you to avoid being exposed to the negative performance of the Least Performing Underlying at maturity (in each case, depending also on the performance of the other Underlying). Additionally, such hedging or trading activities during the term of the Securities could potentially affect the values of the Underlyings on the Observation Dates and, accordingly, whether the Contingent Coupon is payable or whether the Securities are automatically called prior to maturity and, if the Securities are not called prior to maturity, the payout to you at maturity, if any (in each case, depending also on the performance of the other Underlying).

The Calculation Agent, which is our affiliate, will make determinations with respect to the Securities. As Calculation Agent, MS & Co. has determined the Initial Underlying Values, the Coupon Barriers and the Downside Thresholds and will determine the Observation Date Closing Levels and the Final Underlying Value of each Underlying, whether a Contingent Coupon is payable with respect to each Observation Date, whether a Market Disruption Event has occurred and the payment that you will receive upon a call or at maturity, if any. Moreover, certain determinations made by MS & Co., in its capacity as Calculation Agent, may require it to exercise discretion and make subjective judgments, such as with respect to the occurrence or nonoccurrence of Market Disruption Events. These potentially subjective determinations may affect the payout to you upon a call or at maturity, if any. For further information regarding these types of determinations, see “Description of Auto-Callable Securities—Postponement of Determination Dates,” “—Discontinuance of Any Underlying; Alteration of Method of Calculation” and “—Calculation Agent and Calculations” in the accompanying product supplement. In addition, MS & Co. has determined the estimated value of the Securities on the Trade Date.

The U.S. federal income tax consequences of an investment in the Securities are uncertain. There is no direct tlegal authority as to the proper treatment of the Securities for U.S. federal income tax purposes, and, therefore, significant aspects of the tax treatment of the Securities are uncertain.

Please read the discussion under “What Are the Tax Consequences of the Securities” in this pricing supplement concerning the U.S. federal income tax consequences of an investment in the Securities. We intend to treat a Security for U.S. federal income tax purposes as a single financial contract that provides for a coupon that will be treated as gross income to you at the time received or accrued, in accordance with your regular method of tax accounting. Under this treatment, the ordinary income treatment of the coupon payments, in conjunction with the capital loss treatment of any loss recognized upon the sale, exchange or settlement of the Securities, could result in adverse tax consequences to holders of the Securities because the deductibility of capital losses is subject to limitations. We do not plan to request a ruling from the Internal Revenue Service (the “IRS”) regarding the tax treatment of the Securities, and the IRS or a court may not agree with the tax treatment described herein. If the IRS were successful in asserting an alternative treatment for the Securities, the timing and character of income or loss on the Securities might differ significantly from the tax treatment described herein. For example, under one possible treatment, the IRS could seek to recharacterize the Securities as debt instruments. In that event, U.S. Holders (as defined below) would be required to accrue into income original issue discount on the Securities every year at a “comparable yield” determined at the time of issuance (as adjusted based on the difference, if any, between the actual and the projected amount of any contingent payments on the Securities) and recognize all income and gain in respect of the Securities as ordinary income. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the Securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features.

Non-U.S. Holders (as defined below) should note that we currently intend to withhold on any coupon paid to Non-U.S. Holders generally at a rate of 30%, or at a reduced rate specified by an applicable income tax treaty under an “other income” or similar provision, and will not be required to pay any additional amounts with respect to amounts withheld.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. While it is not clear whether the Securities would be viewed as similar to the prepaid forward contracts described in the notice, it is possible that any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect. The notice focuses on a number of issues, the most relevant of which for holders of the Securities are the character and timing of income or

loss and the degree, if any, to which income realized by non-U.S. investors should be subject to withholding tax. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Securities, including possible alternative treatments, the issues presented by this notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Hypothetical Payments on the Securities at Maturity

The examples below illustrate the payment upon a call or at maturity for a \$10 Security on a hypothetical offering of the Securities, with the following assumptions (the actual terms for the Securities were determined on the Trade Date and are specified on the cover hereof; amounts may have been rounded for ease of reference):

t Principal Amount: \$10

t Term: 10 years

t Hypothetical Initial Underlying Value:

o NDX Index: 7,500

o SX5E Index: 3,000

t Contingent Coupon Rate: 7.32% per annum (or 1.83% per quarter)

t Contingent Coupon: \$0.183 per quarter

t Observation Dates: Quarterly, callable after approximately 1 year

t Hypothetical Coupon Barriers:

o NDX Index: 5,250, which is 70% of the Hypothetical Initial Underlying Value of the NDX Index

o SX5E Index: 2,100, which is 70% of the Hypothetical Initial Underlying Value of the SX5E Index

t Hypothetical Downside Thresholds:

o NDX Index: 3,750, which is 50% of the Hypothetical Initial Underlying Value of the NDX Index

o SX5E Index: 1,500, which is 50% of the Hypothetical Initial Underlying Value of the SX5E Index

Example 1 — Securities are Called on the Fourth Observation Date

Date	Index Closing Value NDX Index	SX5E Index	Payment (per Security)
First Observation Date	6,900 (at or above Coupon Barrier)	3,150 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Second Observation Date	7,000 (at or above Coupon Barrier)	2,300 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Third Observation Date	6,500 (at or above Coupon Barrier)	2,250 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Fourth Observation Date	8,600 (at or above Coupon Barrier and Initial Underlying Value)	3,200 (at or above Coupon Barrier and Initial Underlying Value)	\$10.183 (Settlement Amount)
		Total Payment:	\$10.732 (7.32% return)

Both the NDX Index and SX5E Index close above their respective Coupon Barriers on the first three Observation Dates and therefore a Contingent Coupon is paid on each related Coupon Payment Date. Because both the NDX Index and the SX5E Index close above their respective Initial Underlying Values on the fourth Observation Date (which is one year after the Trade Date and is the first Observation Date on which the Securities are callable), the Securities are called after such Observation Date. MSFL will pay you on the call settlement date a total of \$10.183 per Security, reflecting your principal amount plus the applicable Contingent Coupon. When added to the Contingent Coupon payments of \$0.549 received in respect of the prior Observation Dates, MSFL will have paid you a total of \$10.732 per Security for a 7.32% total return on the Securities. No further amount will be owed to you under the Securities, and you do not participate in the appreciation of the Underlyings.

Example 2 — Securities are NOT Called and the Final Underlying Values of both the NDX Index and the SX5E Index are at or above their respective Coupon Barriers and Downside Thresholds.

Date	Index Closing Value NDX Index	SX5E Index	Payment (per Security)
First Observation Date	6,100 (at or above Coupon Barrier)	2,250 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Second Observation Date	6,600 (at or above Coupon Barrier)	3,100 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Third Observation Date	6,900 (at or above Coupon Barrier)	1,700 (below Coupon Barrier)	\$0 (Not Callable)
Fourth Observation Date	6,200 (at or above Coupon Barrier; below Initial Underlying Value)	2,000 (below Coupon Barrier and Initial Underlying Value)	\$0 (Not Callable)
Fifth to Thirty-Ninth Observation Dates	Various (all at or above Coupon Barrier; all below Initial Underlying Value)	Various (all below Coupon Barrier and Initial Underlying Value)	\$0 (Not Callable)

Final Observation Date	8,600 (at or above Coupon Barrier and Downside Threshold)	2,300 (at or above Coupon Barrier and Downside Threshold)	\$10.183 (Settlement Amount)
		Total Payment:	\$10.549 (5.49% return)

Both the NDX Index and the SX5E Index close above their respective Coupon Barriers on the first two Observation Dates and therefore a Contingent Coupon is paid on each related Coupon Payment Date. On each of the third to thirty-ninth Observation Dates, the NDX Index closes at or above its Coupon Barrier (but below its Initial Underlying Value, where applicable) but the SX5E Index closes below its Coupon Barrier. Therefore, no Contingent Coupon is paid on any related Coupon Payment Date. On the Final Observation Date, both the NDX Index and the SX5E Index close above their respective Coupon Barriers and Downside Thresholds. Therefore, at maturity, MSFL will pay you a total of \$10.183 per Security, reflecting your principal amount plus the applicable Contingent Coupon. When added to the total Contingent Coupon payments of \$0.366 received in respect of the prior Observation Dates, MSFL will have paid you a total of \$10.549 per Security for a 5.49% total return on the Securities over ten years. You do not participate in any appreciation of the Underlyings.

Example 3 — Securities are NOT Called and the Final Underlying Values of both the NDX Index and the SX5E Index are at or above their respective Downside Thresholds but the Final Underlying Value of one Underlying is below its respective Coupon Barrier

Date	Index Closing Value NDX Index	SX5E Index	Payment (per Security)
First Observation Date	6,100 (at or above Coupon Barrier)	2,200 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Second Observation Date	6,200 (at or above Coupon Barrier)	2,500 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Third Observation Date	7,500 (at or above Coupon Barrier)	1,850 (below Coupon Barrier)	\$0 (Not Callable)
Fourth Observation Date	6,900 (at or above Coupon Barrier; below Initial Index Value)	1,600 (below Coupon Barrier and Initial Index Value)	\$0 (Not Callable)
Fifth to Thirty-Ninth Observation Dates	Various (all at or above Coupon Barrier; all below Initial Index Value)	Various (all below Coupon Barrier and Initial Index Value)	\$0 (Not Callable)
Final Observation Date	4,800 (below Coupon Barrier, at or above Downside Threshold)	2,300 (at or above Coupon Barrier and Downside Threshold)	\$10.00 (Principal Amount)
		Total Payment:	\$10.366 (3.66% return)

Both the NDX Index and the SX5E Index close above their respective Coupon Barriers on the first two Observation Dates and therefore a Contingent Coupon is paid on each related Coupon Payment Date. On each of the third to thirty-ninth Observation Dates, the NDX Index closes at or above its Coupon Barrier (but below its Initial Index Value, where applicable) but the SX5E Index closes below its Coupon Barrier. Therefore, no Contingent Coupon is paid on any related Coupon Payment Date. On the Final Observation Date, both the NDX Index and the SX5E Index close above their respective Downside Thresholds, but the NDX Index closes below its Coupon Barrier. Therefore, at

maturity, MSFL will pay you a total of \$10.00 per Security, reflecting your Principal Amount, but you will not receive a Contingent Coupon with respect to the Final Observation Date. When added to the Contingent Coupon payments of \$0.366 received in respect of the prior Observation Dates, MSFL will have paid you a total of \$10.366 per Security for a 3.66% total return on the Securities over ten years.

Example 4 — Securities are NOT Called and the Final Underlying Value of one of the Underlyings is below its respective Downside Threshold

Date	Index Closing Value NDX Index	SX5E Index	Payment (per Security)
First Observation Date	6,600 (at or above Coupon Barrier)	2,150 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Second Observation Date	7,500 (at or above Coupon Barrier)	2,400 (at or above Coupon Barrier)	\$0.183 (Contingent Coupon — Not Callable)
Third Observation Date	6,500 (at or above Coupon Barrier)	1,750 (below Coupon Barrier)	\$0 (Not Callable)
Fourth Observation Date	6,550 (at or above Coupon Barrier; below Initial Underlying Value)	1,600 (below Coupon Barrier and Initial Underlying Value)	\$0 (Not Callable)
Fifth to Thirty-Ninth Observation Dates	Various (all below Coupon Barrier and Initial Underlying Value)	Various (all below Coupon Barrier and Initial Underlying Value)	\$0 (Not Callable)
			$\$10 + [\$10 \times \text{Underlying Return of the Least Performing Underlying}] =$
			$\$10 + [\$10 \times -60\%] =$
Final Observation Date	6,450 (at or above Coupon Barrier and Downside Threshold)	1,200 (below Coupon Barrier and Downside Threshold)	$\$10 - \$6 =$
			\$4 (Payment at Maturity)
		Total Payment:	\$4.366 (-56.34% return)

Both the NDX Index and the SX5E Index close above their respective Coupon Barriers on the first two Observation Dates, and, therefore a Contingent Coupon is paid on each related Coupon Payment Date. On each of the third and fourth Observation Dates, the NDX Index closes at or above its Coupon Barrier (but below its Initial Underlying Value, where applicable), but the SX5E Index closes below its Coupon Barrier. Therefore, no Contingent Coupon is paid on either related Coupon Payment Date. On each of the fifth to the thirty-ninth Observation Dates,

both the NDX Index and the SX5E Index close below their respective Coupon Barriers and thus no Contingent Coupon is paid on any related Coupon Payment Date. On the Final Observation Date, the NDX Index closes above its Coupon Barrier and Downside Threshold but the SX5E Index closes below its Coupon Barrier and Downside Threshold. Therefore, at maturity, investors are exposed to the downside performance of the Least Performing Underlying and MSFL will pay you \$4 per Security, which reflects the percentage decrease of the Least Performing Underlying from the Trade Date to the Final Observation Date. When added to the total Contingent Coupon payments of \$0.366 received in respect of the prior Observation Dates, MSFL will have paid you \$4.366 per Security, for a loss on the Securities of 56.34%.

The Securities differ from ordinary debt securities in that, among other features, MSFL is not necessarily obligated to repay the full amount of your initial investment. If the Securities are not called on any Observation Date, you may lose a significant portion or all of your initial investment. Specifically, if the Securities are not called and the Final Underlying Value of either Underlying is less than its respective Downside Threshold, you will lose 1% (or a fraction thereof) of your Principal Amount for each 1% (or a fraction thereof) that the Underlying Return of the Least Performing Underlying is less than zero. Any payment on the Securities, including any Contingent Coupon, payment upon an automatic call or the Payment at Maturity, is dependent on our ability to satisfy our obligations when they come due. If we are unable to meet our obligations, you may not receive any amounts due to you under the Securities.

The Issuer will not pay a quarterly Contingent Coupon if the Observation Date Closing Value for either of the Underlyings is below its respective Coupon Barrier. The Issuer will not automatically call the Securities if the Observation Date Closing Value of either of the Underlyings is below its respective Initial Underlying Value. You will lose a significant portion or all of your principal amount at maturity if the Securities are not called and the Final Underlying Value of either of the Underlyings is below its respective Downside Threshold.

What Are the Tax Consequences of the Securities?

Prospective investors should note that the discussion under the section called “United States Federal Taxation” in the accompanying product supplement does not apply to the Securities issued under this pricing supplement and is superseded by the following discussion.

The following is a general discussion of the material U.S. federal income tax consequences and certain estate tax consequences of the ownership and disposition of the Securities. This discussion applies only to investors in the Securities who:

- purchase the Securities in the original offering; and

- hold the Securities as capital assets within the meaning of Section 1221 of the Internal Revenue Code of 1986, as amended (the “Code”).

This discussion does not describe all of the tax consequences that may be relevant to a holder in light of the holder’s particular circumstances or to holders subject to special rules, such as:

- certain financial institutions;

- insurance companies;

- certain dealers and traders in securities or commodities;

- investors holding the Securities as part of a “straddle,” wash sale, conversion transaction, integrated transaction or constructive sale transaction;

- U.S. Holders (as defined below) whose functional currency is not the U.S. dollar;

- partnerships or other entities classified as partnerships for U.S. federal income tax purposes;

- regulated investment companies;

- real estate investment trusts; or

- tax-exempt entities, including “individual retirement accounts” or “Roth IRAs” as defined in Section 408 or 408A of the Code, respectively.

If an entity that is classified as a partnership for U.S. federal income tax purposes holds the Securities, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. If you are a partnership holding the Securities or a partner in such a partnership, you should consult your

tax adviser as to the particular U.S. federal tax consequences of holding and disposing of the Securities to you.

As the law applicable to the U.S. federal income taxation of instruments such as the Securities is technical and complex, the discussion below necessarily represents only a general summary. The effect of any applicable state, local or non-U.S. tax laws is not discussed, nor are any alternative minimum tax consequences or consequences resulting from the Medicare tax on investment income. Moreover, the discussion below does not address the consequences to taxpayers subject to special tax accounting rules under Section 451(b) of the Code.

This discussion is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations, all as of the date hereof, changes to any of which subsequent to the date hereof may affect the tax consequences described herein. Persons considering the purchase of the Securities should consult their tax advisers with regard to the application of the U.S. federal income tax laws to their particular situations as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

General

Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities or instruments that are similar to the Securities for U.S. federal income tax purposes, no assurance can be given that the IRS or a court will agree with the tax treatment described herein. We intend to treat a Security for U.S. federal income tax purposes as a single financial contract that provides for a coupon that will be treated as gross income to you at the time received or accrued in accordance with your regular method of tax accounting. In the opinion of our counsel, Davis Polk & Wardwell LLP, this treatment of the Securities is reasonable under current law; however, our counsel has advised us that it is unable to conclude affirmatively that this treatment is more likely than not to be upheld, and that alternative treatments are possible.

You should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments of the Securities). Unless otherwise stated, the following discussion is based on the treatment of each Security as described in the previous paragraph.

Tax Consequences to U.S. Holders

This section applies to you only if you are a U.S. Holder. As used herein, the term “U.S. Holder” means a beneficial owner of a Security that is, for U.S. federal income tax purposes:

a citizen or individual resident of the United States;

a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States, any state thereof or the District of Columbia; or

- an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

Tax Treatment of the Securities

Assuming the treatment of the Securities as set forth above is respected, the following U.S. federal income tax consequences should result.

Tax Basis. A U.S. Holder's tax basis in the Securities should equal the amount paid by the U.S. Holder to acquire the Securities.

Tax Treatment of Coupon Payments. Any coupon payment on the Securities should be taxable as ordinary income to a U.S. Holder at the time received or accrued, in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

Sale, Exchange or Settlement of the Securities. Upon a sale, exchange or settlement of the Securities, a U.S. Holder should recognize gain or loss equal to the difference between the amount realized on the sale, exchange or settlement and the U.S. Holder's tax basis in the Securities sold, exchanged or settled. For this purpose, the amount realized does not include any coupon paid at settlement and may not include sale proceeds attributable to an accrued coupon, which may be treated as a coupon payment. Any such gain or loss recognized should be long-term capital gain or loss if the U.S. Holder has held the Securities for more than one year at the time of the sale, exchange or settlement, and should be short-term capital gain or loss otherwise. The ordinary income treatment of the coupon payments, in conjunction with the capital loss treatment of any loss recognized upon the sale, exchange or settlement of the Securities, could result in adverse tax consequences to holders of the Securities because the deductibility of capital losses is subject to limitations.

Possible Alternative Tax Treatments of an Investment in the Securities

Due to the absence of authorities that directly address the proper tax treatment of the Securities, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. In particular, the IRS could seek to analyze the U.S. federal income tax consequences of owning the Securities under Treasury regulations governing contingent payment debt instruments (the "Contingent Debt Regulations"). If the IRS were successful in asserting that the Contingent Debt Regulations applied to the Securities, the timing and character of income thereon would be significantly affected. Among other things, a U.S. Holder would be required to accrue into income original issue discount on the Securities every year at a "comparable yield" determined at the time of their issuance, adjusted upward or downward to reflect the difference, if any, between the actual and the projected amount of any contingent payments on the Securities. Furthermore, any gain realized by a U.S. Holder at maturity or upon a sale, exchange or

other disposition of the Securities would be treated as ordinary income, and any loss realized would be treated as ordinary loss to the extent of the U.S. Holder's prior accruals of original issue discount and as capital loss thereafter. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the Securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features.

Other alternative federal income tax treatments of the Securities are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Securities. In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses on whether to require holders of "prepaid forward contracts" and similar instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; whether these instruments are or should be subject to the "constructive ownership" rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge; and appropriate transition rules and effective dates. While it is not clear whether instruments such as the Securities would be viewed as similar to the prepaid forward contracts described in the notice, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect. U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Securities, including possible alternative treatments and the issues presented by this notice.

Backup Withholding and Information Reporting

Backup withholding may apply in respect of payments on the Securities and the payment of proceeds from a sale, exchange or other disposition of the Securities, unless a U.S. Holder provides proof of an applicable exemption or a correct taxpayer identification number and otherwise complies with applicable requirements of the backup withholding rules. The amounts withheld under the backup withholding rules are not an additional tax and may be refunded, or credited against the U.S. Holder's U.S. federal income tax liability, provided that the required information is timely furnished to the IRS. In addition, information returns will be filed with the IRS in connection with payments on the Securities and the payment of proceeds from a sale, exchange or other disposition of the Securities, unless the U.S. Holder provides proof of an applicable exemption from the information reporting rules.

Tax Consequences to Non-U.S. Holders

This section applies to you only if you are a Non-U.S. Holder. As used herein, the term "Non-U.S. Holder" means a beneficial owner of a Security that is for U.S. federal income tax purposes:

- an individual who is classified as a nonresident alien;
- a foreign corporation; or
- a foreign estate or trust.

The term “Non-U.S. Holder” does not include any of the following holders:

a holder who is an individual present in the United States for 183 days or more in the taxable year of disposition and who is not otherwise a resident of the United States for U.S. federal income tax purposes;

certain former citizens or residents of the United States; or

a holder for whom income or gain in respect of the Securities is effectively connected with the conduct of a trade or business in the United States.

Such holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Securities.

Although significant aspects of the tax treatment of each Security are uncertain, we intend to withhold on any coupon paid to a Non-U.S. Holder generally at a rate of 30% or at a reduced rate specified by an applicable income tax treaty under an “other income” or similar provision. We will not be required to pay any additional amounts with respect to amounts withheld. In order to claim an exemption from, or a reduction in, the 30% withholding tax, a Non-U.S. Holder of the Securities must comply with certification requirements to establish that it is not a U.S. person and is eligible for such an exemption or reduction under an applicable tax treaty. If you are a Non-U.S. Holder, you should consult your tax adviser regarding the tax treatment of the Securities, including the possibility of obtaining a refund of any withholding tax and the certification requirement described above.

Section 871(m) Withholding Tax on Dividend Equivalents

Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% (or a lower applicable treaty rate) withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (each, an “Underlying Security”). Subject to certain exceptions, Section 871(m) generally applies to securities that substantially replicate the economic performance of one or more Underlying Securities, as determined based on tests set forth in the applicable Treasury regulations (a “Specified Security”). However, pursuant to an IRS notice, Section 871(m) will not apply to securities issued before January 1, 2019 that do not have a delta of one with respect to any Underlying Security. Based on our determination that the Securities do not have a delta of one with respect to any Underlying Security, our counsel is of the opinion that the Securities should not be Specified Securities and, therefore, should not be subject to Section 871(m).

Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. If Section 871(m) withholding is required, we will not be required to pay any additional amounts with respect to the amounts so withheld. You should consult your tax adviser regarding the potential application of Section 871(m) to the Securities.

U.S. Federal Estate Tax

Individual Non-U.S. Holders and entities the property of which is potentially includible in such an individual's gross estate for U.S. federal estate tax purposes (for example, a trust funded by such an individual and with respect to which the individual has retained certain interests or powers) should note that, absent an applicable treaty exemption, the Securities may be treated as U.S.-situs property subject to U.S. federal estate tax. Prospective investors that are non-U.S. individuals, or are entities of the type described above, should consult their tax advisers regarding the U.S. federal estate tax consequences of an investment in the Securities.

Backup Withholding and Information Reporting

Information returns will be filed with the IRS in connection with any coupon payment and may be filed with the IRS in connection with the payment at maturity on the Securities and the payment of proceeds from a sale, exchange or other disposition. A Non-U.S. Holder may be subject to backup withholding in respect of amounts paid to the Non-U.S. Holder, unless such Non-U.S. Holder complies with certification procedures to establish that it is not a U.S. person for U.S. federal income tax purposes or otherwise establishes an exemption. The amount of any backup withholding from a payment to a Non-U.S. Holder will be allowed as a credit against the Non-U.S. Holder's U.S. federal income tax liability and may entitle the Non-U.S. Holder to a refund, provided that the required information is timely furnished to the IRS.

FATCA

Legislation commonly referred to as "FATCA" generally imposes a withholding tax of 30% on payments to certain non-U.S. entities (including financial intermediaries) with respect to certain financial instruments, unless various U.S. information reporting and due diligence requirements have been satisfied. An intergovernmental agreement between the United States and the non-U.S. entity's jurisdiction may modify these requirements. FATCA generally applies to certain financial instruments that are treated as paying U.S.-source interest or other U.S.-source "fixed or determinable annual or periodical" income ("FDAP income"). Withholding (if applicable) applies to payments of U.S.-source FDAP income and, for dispositions after December 31, 2018, to payments of gross proceeds of the disposition (including upon retirement) of certain financial instruments treated as providing for U.S.-source interest or dividends. While the treatment of the Securities is unclear, you should assume that any coupon payment with respect to the Securities will be subject to the FATCA rules. It is also possible in light of this uncertainty that an applicable withholding agent will treat gross proceeds of a disposition (including upon retirement) of the Securities after 2018 as being subject to the

FATCA rules. If withholding applies to the Securities, we will not be required to pay any additional amounts with respect to amounts withheld. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the potential application of FATCA to the Securities.

The discussion in the preceding paragraphs under “What Are the Tax Consequences of the Securities,” insofar as it purports to describe provisions of U.S. federal income tax laws or legal conclusions with respect thereto, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of an investment in the Securities.

The NASDAQ 100 Index®

The NASDAQ-100 Index®, which is calculated, maintained and published by Nasdaq, Inc., is a modified capitalization-weighted index of 100 of the largest and most actively traded equity securities of non-financial companies listed on The NASDAQ Stock Market LLC. The NASDAQ-100 Index includes companies across a variety of major industry groups. At any moment in time, the value of the NASDAQ-100 Index equals the aggregate value of the then-current NASDAQ-100 Index share weights of each of the NASDAQ-100 Index component securities, which are based on the total shares outstanding of each such NASDAQ-100 Index component security, multiplied by each such security's respective last sale price on NASDAQ (which may be the official closing price published by NASDAQ), and divided by a scaling factor, which becomes the basis for the reported NASDAQ-100 Index value. For additional information about the NASDAQ-100 Index®, see the information set forth under "NASDAQ-100 Index®" in the accompanying index supplement.

"Nasdaq®," "NASDAQ-100" and "NASDAQ-100 Index®" are trademarks of Nasdaq, Inc. For more information, see "NASDAQ-100 Index®" in the accompanying index supplement.

The following table sets forth the published high and low closing values, as well as the end-of-quarter closing values, of the NASDAQ 100 Index® for each quarter in the period from January 1, 2013 through September 14, 2018. The closing value of the NASDAQ 100 Index® on September 14, 2018 was 7,545.496. We obtained the information in the table below from Bloomberg Financial Markets, without independent verification. The historical closing values of the NASDAQ 100 Index® should not be taken as an indication of future performance, and no assurance can be given as to the level of the NASDAQ 100 Index® on any Observation Date, including the Final Observation Date.

The EURO STOXX 50® Index

The EURO STOXX 50® Index was created by STOXX Limited, which is owned by Deutsche Börse AG and SIX Group AG. Publication of the EURO STOXX 50® Index began on February 26, 1998, based on an initial index value of 1,000 at December 31, 1991. The EURO STOXX 50® Index is composed of 50 component stocks of market sector leaders from within the STOXX 600 Supersector Indices, which includes stocks selected from the Eurozone. The component stocks have a high degree of liquidity and represent the largest companies across all market sectors. For additional information about the EURO STOXX 50® Index, see the information set forth under “EURO STOXX 50® Index” in the accompanying index supplement.

“EURO STOXX 50®” and “STOXX®” are registered trademarks of STOXX Limited. For more information, see “EURO STOXX 50® Index” in the accompanying index supplement.

The following table sets forth the published high and low closing values, as well as the end-of-quarter closing values, of the EURO STOXX 50® Index for each quarter in the period from January 1, 2013 through September 14, 2018. The closing value of the EURO STOXX 50® Index on September 14, 2018 was 3,344.63. We obtained the information in the table below from Bloomberg Financial Markets, without independent verification. The historical closing values of the EURO STOXX 50® Index should not be taken as an indication of future performance, and no assurance can be given as to the level of the EURO STOXX 50® Index on any Observation Date, including the Final Observation Date.

*Available information for the indicated period includes data for less than the entire calendar quarter and accordingly, the “Quarterly High,” “Quarterly Low” and “Quarterly Close” data indicated are for this shortened period only.

The graph below illustrates the performance of the EURO STOXX 50® Index from January 1, 2008 through September 14, 2018, based on information from Bloomberg.

* The dotted line indicates the Coupon Barrier of 2,341.24, which is approximately 70% of the Initial Underlying Value and the solid line indicates the Downside Threshold of 1,672.32, which is approximately 50% of the Initial Underlying Value.

Past performance is not indicative of future results.

Correlation of the Underlyings

The graph below illustrates the daily performance of the NASDAQ 100 Index® and the EURO STOXX 50® Index from January 1, 2008 through August 31, 2018. For comparison purposes, each Underlying has been “normalized” to have a closing value of 100 on January 1, 2008 by dividing the closing value of that Underlying on each Index Business Day by the closing value of that Underlying on January 1, 2008 and multiplying by 100. We obtained the closing values used to determine the normalized closing values set forth below from Bloomberg, without independent verification.

A closer relationship between the daily returns of two or more underlying assets over a given period indicates that such underlying assets have been more positively correlated. Lower (or more-negative) correlation among two or more underlying assets over a given period may indicate that it is less likely that those underlying assets will subsequently move in the same direction. Therefore, lower correlation among the Underlyings may indicate a greater potential for one of the Underlyings to close below its respective Coupon Barrier or Downside Threshold on an Observation Date, including the Final Observation Date, as applicable, because there may be a greater likelihood that at least one of the Underlyings will decrease in value significantly. However, even if the Underlyings have a higher positive correlation, one or both of the Underlyings may close below the respective Coupon Barrier(s) or Downside Threshold(s) on an Observation Date or the Final Observation Date, as applicable, as the Underlyings may both decrease in value. Moreover, the actual correlation among the Underlyings may differ, perhaps significantly, from their historical correlation. A higher Contingent Coupon Rate is generally associated with lower correlation among the Underlyings, which may indicate a greater potential for missed Contingent Coupons and/or a significant loss on your investment at maturity. See “Key Risks — You are exposed to the market risk of both Underlyings”, “—Because the Securities are linked to the performance of the least performing between the NDX Index and the SX5E Index, you are exposed to greater risk of receiving no Contingent Coupon payments or sustaining a significant loss on your investment than if the Securities were linked to just the NDX Index or just the SX5E Index” and “—A higher Contingent Coupon Rate and/or lower Coupon Barriers and Downside Thresholds may reflect greater expected volatility of the Underlyings, and greater expected volatility generally indicates an increased risk of declines in the levels of the Underlyings and, potentially, a significant loss at maturity.” herein.

Past performance and correlation of the Underlyings are not indicative of the future performance or correlation of the Underlyings.

Use of Proceeds and Hedging

The proceeds from the sale of the Securities will be used by us for general corporate purposes. We will receive, in aggregate, \$10 per Security issued, because, when we enter into hedging transactions in order to meet our obligations under the Securities, our hedging counterparty will reimburse the cost of the Agent's commissions. The costs of the Securities borne by you and described on page 2 above comprise the Agent's commissions and the cost of issuing, structuring and hedging the Securities. See also "Use of Proceeds" in the accompanying prospectus.

On or prior to the Trade Date, we hedged our anticipated exposure in connection with the Securities, by entering into hedging transactions with our affiliates and/or third party dealers. We expect our hedging counterparties to have taken positions in the constituent stocks of the Underlyings and in futures or options contracts on the Underlyings or the constituent stocks of the Underlyings. Any of these hedging or trading activities on or prior to the Trade Date could have increased the Initial Underlying Value, and, as a result, could have increased the Coupon Barrier of either of the Underlyings, which is the level at or above which such Underlying must close on each Observation Date in order for you to earn a Contingent Coupon, and the Downside Threshold of either of the Underlyings, which if the Securities are not called prior to maturity, is the level at or above which such Underlying must close on the Final Observation Date in order for you to avoid being exposed to the negative performance of the Least Performing Underlying at maturity (in each case, depending also on the performance of the other Underlying). In addition, through our affiliates, we are likely to modify our hedge position throughout the term of the Securities, including on the Final Observation Date, by purchasing and selling the stocks constituting the Underlyings, futures or options contracts on the Underlyings or their component stocks listed on major securities markets or positions in any other available securities or instruments that we may wish to use in connection with such hedging activities., including by purchasing or selling any such securities or instruments on the Final Observation Date. As a result, these entities may be unwinding or adjusting hedge positions during the term of the Securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the Final Observation Date approaches. We cannot give any assurance that our hedging activities will not affect the values of the Underlyings and, therefore, adversely affect the value of the Securities or the payment you will receive at maturity, if any, if not previously called.

Benefit Plan Investor Considerations

Each fiduciary of a pension, profit-sharing or other employee benefit plan subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") (a "Plan"), should consider the fiduciary standards of ERISA in the context of the Plan's particular circumstances before authorizing an investment in the Securities. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the Plan.

In addition, we and certain of our affiliates, including MS & Co., may each be considered a "party in interest" within the meaning of ERISA, or a "disqualified person" within the meaning of the Internal Revenue Code of 1986, as amended (the "Code"), with respect to many Plans, as well as many individual retirement accounts and Keogh plans (such accounts and plans, together with other plans, accounts and arrangements subject to Section 4975 of the Code, also "Plans"). Prohibited transactions within the meaning of ERISA or the Code would likely arise, for example, if the Securities are acquired by or with the assets of a Plan with respect to which MS & Co. or any of its affiliates is a service provider or other party in interest, unless the Securities are acquired pursuant to an exemption from the "prohibited transaction" rules. A violation of these "prohibited transaction" rules could result in an excise tax or other

liabilities under ERISA and/or Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory or administrative exemption.

The U.S. Department of Labor has issued five prohibited transaction class exemptions (“PTCEs”) that may provide exemptive relief for direct or indirect prohibited transactions resulting from the purchase or holding of the Securities. Those class exemptions are PTCE 96-23 (for certain transactions determined by in-house asset managers), PTCE 95-60 (for certain transactions involving insurance company general accounts), PTCE 91-38 (for certain transactions involving bank collective investment funds), PTCE 90-1 (for certain transactions involving insurance company separate accounts) and PTCE 84-14 (for certain transactions determined by independent qualified professional asset managers). In addition, ERISA Section 408(b)(17) and Code Section 4975(d)(20) provide an exemption for the purchase and sale of securities and the related lending transactions, provided that neither the issuer of the securities nor any of its affiliates has or exercises any discretionary authority or control or renders any investment advice with respect to the assets of the Plan involved in the transaction and provided further that the Plan pays no more, and receives no less, than “adequate consideration” in connection with the transaction (the so-called “service provider” exemption). There can be no assurance that any of these class or statutory exemptions will be available with respect to transactions involving the Securities.

Because we may be considered a party in interest with respect to many Plans, the Securities may not be purchased, held or disposed of by any Plan, any entity whose underlying assets include “plan assets” by reason of any Plan’s investment in the entity (a “Plan Asset Entity”) or any person investing “plan assets” of any Plan, unless such purchase, holding or disposition is eligible for exemptive relief, including relief available under PTCEs 96-23, 95-60, 91-38, 90-1, 84-14 or the service provider exemption or such purchase, holding or disposition is otherwise not prohibited. Any purchaser, including any fiduciary purchasing on behalf of a Plan, transferee or holder of the Securities will be deemed to have represented, in its corporate and its fiduciary capacity, by its purchase and holding of the Securities that either (a) it is not a Plan or a Plan Asset Entity and is not purchasing such Securities on behalf of or with “plan assets” of any Plan or with any assets of a governmental, non-U.S. or church plan that is subject to any federal, state, local or non-U.S. law that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code (“Similar Law”) or (b) its purchase, holding and disposition of these Securities will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or violate any Similar Law.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing the Securities on behalf of or with “plan assets” of any Plan consult with their counsel regarding the availability of exemptive relief.

The Securities are contractual financial instruments. The financial exposure provided by the Securities is not a substitute or proxy for, and is not intended as a substitute or proxy for, individualized investment management or advice for the benefit of any purchaser or holder of the Securities. The Securities have not been designed and will not be administered in a manner intended to reflect the individualized needs and objectives of any purchaser or holder of the Securities.

Each purchaser or holder of any Securities acknowledges and agrees that:

- the purchaser or holder or its fiduciary has made and shall make all investment decisions for the purchaser or holder and the purchaser or holder has not relied and shall not rely in any way upon us or our affiliates to act as a fiduciary
- (i) or adviser of the purchaser or holder with respect to (A) the design and terms of the Securities, (B) the purchaser or holder's investment in the Securities, or (C) the exercise of or failure to exercise any rights we have under or with respect to the Securities;
- (ii) we and our affiliates have acted and will act solely for our own account in connection with (A) all transactions relating to the Securities and (B) all hedging transactions in connection with our obligations under the Securities;
- (iii) any and all assets and positions relating to hedging transactions by us or our affiliates are assets and positions of those entities and are not assets and positions held for the benefit of the purchaser or holder;
- (iv) our interests are adverse to the interests of the purchaser or holder; and

neither we nor any of our affiliates is a fiduciary or adviser of the purchaser or holder in connection with any such

- (v) assets, positions or transactions, and any information that we or any of our affiliates may provide is not intended to be impartial investment advice.

Each purchaser and holder of the Securities has exclusive responsibility for ensuring that its purchase, holding and disposition of the Securities do not violate the prohibited transaction rules of ERISA or the Code or any Similar Law. The sale of any Securities to any Plan or plan subject to Similar Law is in no respect a representation by us or any of our affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by plans generally or any particular plan, or that such an investment is appropriate for plans generally or any particular plan. In this regard, neither this discussion nor anything provided in this document is or is intended to be investment advice directed at any potential Plan purchaser or at Plan purchasers generally and such purchasers of these Securities should consult and rely on their own counsel and advisers as to whether an investment in these Securities is suitable.

However, individual retirement accounts, individual retirement annuities and Keogh plans, as well as employee benefit plans that permit participants to direct the investment of their accounts, will not be permitted to purchase or

hold the Securities if the account, plan or annuity is for the benefit of an employee of Morgan Stanley, Morgan Stanley Wealth Management or their respective affiliates or a family member and the employee receives any compensation (such as, for example, an addition to bonus) based on the purchase of Securities by the account, plan or annuity.

Supplemental Plan of Distribution; Conflicts of Interest

MS & Co. is the agent for this offering. We have agreed to sell to MS & Co., and MS & Co. has agreed to purchase, all of the Securities at the issue price less the underwriting discount indicated on the cover of this document. UBS Financial Services Inc., acting as dealer, will receive from MS & Co. a fixed sales commission of \$0.35 for each Security it sells.

MS & Co. is our affiliate and a wholly owned subsidiary of Morgan Stanley, and it and other affiliates of ours expect to make a profit by selling, structuring and, when applicable, hedging the Securities.

MS & Co. will conduct this offering in compliance with the requirements of Rule 5121 of the Financial Industry Regulatory Authority, Inc. ("FINRA"), regarding a FINRA member firm's distribution of the securities of an affiliate and related conflicts of interest. MS & Co. or any of our other affiliates may not make sales in this offering to any discretionary account.

In order to facilitate the offering of the Securities, the agent may engage in transactions that stabilize, maintain or otherwise affect the price of the Securities. Specifically, the agent may sell more Securities than it is obligated to purchase in connection with the offering, creating a naked short position in the Securities, for its own account. The agent must close out any naked short position by purchasing the Securities in the open market. A naked short position is more likely to be created if the agent is concerned that there may be downward pressure on the price of the Securities in the open market after pricing that could adversely affect investors who purchase in the offering. As an additional means of facilitating the offering, the agent may bid for, and purchase, the Securities or the stocks constituting the Underlyings in the open market to stabilize the price of the Securities. Any of these activities may raise or maintain the market price of the Securities above independent market levels or prevent or retard a decline in the market price of the Securities. The agent is not required to engage in these activities, and may end any of these activities at any time. An affiliate of the agent has entered into a hedging transaction with us in connection with this offering of Securities. See "—Use of Proceeds and Hedging" above.

Validity of the Securities

In the opinion of Davis Polk & Wardwell LLP, as special counsel to MSFL and Morgan Stanley, when the Securities offered by this pricing supplement have been executed and issued by MSFL, authenticated by the trustee pursuant to the MSFL Senior Debt Indenture (as defined in the accompanying prospectus) and delivered against payment as contemplated herein, such Securities will be valid and binding obligations of MSFL and the related guarantee will be a valid and binding obligation of Morgan Stanley, enforceable in accordance with their terms, subject to

applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), *provided* that such counsel expresses no opinion as to (i) the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above and (ii) any provision of the MSFL Senior Debt Indenture that purports to avoid the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law by limiting the amount of Morgan Stanley's obligation under the related guarantee. This opinion is given as of the date hereof and is limited to the laws of the State of New York, the General Corporation Law of the State of Delaware and the Delaware Limited Liability Company Act. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the MSFL Senior Debt Indenture and its authentication of the Securities and the validity, binding nature and enforceability of the MSFL Senior Debt Indenture with respect to the trustee, all as stated in the letter of such counsel dated November 16, 2017, which is Exhibit 5-a to the Registration Statement on Form S-3 filed by Morgan Stanley on November 16, 2017.
