NOTE 1 ORGANIZATION AND BASIS OF PRESENTATION

Altisource Portfolio Solutions S.A. (which may be referred to as Altisource, the Company, we, us or our) together with its subsidiaries is a provider of services focused on high value, knowledge-based functions principally related to real estate and mortgage portfolio management, asset recovery and customer relationship management. Utilizing integrated technology that includes decision models and behavioral based scripting engines, we provide solutions that improve clients' performance and maximizes their returns.

We are publicly traded on the NASDAQ Global Select market under the symbol ASPS. We were incorporated under the laws of Luxembourg on November 4, 1999 as Ocwen Luxembourg S.à r.l., renamed Altisource Portfolio Solutions S.à r.l. on May 12, 2009 and converted into Altisource Portfolio Solutions S.A. on June 5, 2009. We became a publicly traded company as of August 10, 2009, see Separation below.

In February 2010, we acquired all of the outstanding membership interests of The Mortgage Partnership of America, L.L.C. (MPA). MPA was formed as a Missouri limited liability company to serve as the manager of Best Partners Mortgage Cooperative, Inc. (BPMC) doing business as Lenders One Mortgage Cooperative (Lenders One). Lenders One is a national alliance of independent mortgage bankers (Members) that provides its Members with education and training along with revenue enhancing, cost reducing and market share expanding opportunities (see Note 3).

We conduct our operations through three reporting segments: Mortgage Services, Financial Services and Technology Products. In addition, we report our corporate related expenditures as a separate segment (see Note 15 for a description of our segments).

Separation

On August 10, 2009 (the Separation Date), we became a stand-alone public company in connection with our separation from Ocwen Financial Corporation (Ocwen) (the Separation). Prior to the Separation, our businesses were wholly-owned subsidiaries of Ocwen. On the Separation Date, Ocwen distributed all of the Altisource common stock to Ocwen's shareholders (the Distribution). Ocwen's shareholders received one share of Altisource common stock for every three shares of Ocwen common stock held as of August 4, 2009 (the Record Date). In addition, holders of Ocwen's 3.25% Contingent Convertible Unsecured Senior Notes due 2024 received one share of Altisource common stock deemed held on an as if converted basis. For such notes, the conversion ratio of 82.1693 shares of Ocwen common stock for every \$1,000 in aggregate principal amount of notes held on the Record Date was calculated first, and then we applied the distribution ratio of one share of Altisource common stock for every three shares of Ocwen common stock on an as converted basis to determine the number of shares each note holder received.

In connection with the Separation, we entered into various agreements with Ocwen that define our relationship after the Separation including a Separation Agreement, a Tax Matters Agreement, an Employee Matters Agreement, an Intellectual Property Agreement, a Data Center and Disaster Recovery Agreement, a Technology Products Services Agreement, a Transition Services Agreement and certain long-term servicing contracts (collectively, the Agreements).

Basis of Presentation

Our historical financial statements include the assets and liabilities (accounted for at the historical values carried by Ocwen prior to the Separation), revenues and expenses directly attributable to our operations. Beginning August 10, 2009, after our assets and liabilities were formally contributed by Ocwen pursuant to the terms of a Separation Agreement, our financial statements have been presented on a consolidated basis for financial reporting purposes. Our condensed consolidated financial statements include the assets and liabilities, revenues and expenses directly attributable to our operations. All significant inter-company and inter-segment transactions and accounts have been eliminated upon consolidation.

For periods prior to the Separation Date, these condensed consolidated financial statements include allocations of expenses from Ocwen for corporate functions including insurance, employee benefit plan expense and allocations for certain centralized administration costs for executive management, treasury, real estate, accounting, auditing, tax, risk management, internal audit, human resources and benefits administration (See Note 2).

The condensed consolidated financial statements for the three and nine months ended September 30, 2009 also do not necessarily reflect what the Company's condensed consolidated results of operations, financial position and cash flows

would have been had the Company operated as an independent company during that entire period. For instance, as an independent public company, we incur costs in excess of those allocated by Ocwen for maintaining a separate Board of Directors, obtaining a separate audit, relocating certain executive management and hiring additional personnel.

ALTISOURCE PORTFOLIO SOLUTIONS S.A.
Notes to Condensed Consolidated Financial Statements
(continued)

Prior to our acquisition of MPA, MPA and Lenders One entered into a management agreement that ends on December 31, 2025. MPA was formed to act on behalf of Lenders One and its Members principally to provide its Members with education and training along with revenue enhancing, cost reducing and market share expanding opportunities. For providing these services MPA receives payment from Lenders One, and in some instances the vendors, based upon the benefits achieved for the Members. The management agreement provides MPA with broad powers such as recruiting members for Lenders One, collection of fees and other obligations from Members of Lenders One, processing of all rebates owed to Lenders One, day-to-day operation of Lenders One and negotiation of contracts with vendors including signing contracts on behalf of Lenders One.

The management agreement between MPA and Lenders One, pursuant to which MPA is the management company of Lenders One, represents a variable interest in a variable interest entity. MPA determined that they are the primary beneficiary of Lenders One as they have the power to direct the activities that most significantly impact Lenders One's economic performance and the obligation to absorb losses or the right to receive benefits. As a result, Lenders One is presented in the accompanying condensed consolidated financial statements on a consolidated basis with the interests of the Members reflected as Non-controlling Interest on the Condensed Consolidated Balance Sheets. At September 30, 2010, Lenders One had total assets of \$6.2 million and liabilities of \$0.2 million.

We have prepared our condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of SEC Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete condensed consolidated financial statements. In the opinion of management, all adjustments considered necessary to fairly state the results for the interim periods presented have been included. The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of our condensed consolidated financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto contained in our Form 10-K filed with the SEC on March 17, 2010 which contains a summary of our significant accounting policies. Certain footnote detail is also omitted from the condensed consolidated financial statements unless there is a material change from the information included in the Form 10-K.

Foreign Currency Translation

Our reporting currency is the U.S. dollar. Other foreign currency assets and liabilities that are considered monetary items are translated at exchange rates in effect at the balance sheet date. Foreign currency revenues and expenses are translated at transaction date exchange rates. These exchange gains and losses are included in the determination of net income.

Fair Value of Financial Instruments

The fair value of financial instruments, which primarily include Cash and Cash Equivalents, Restricted Cash, Accounts Receivable, net and Accounts Payable and Accrued Expenses at September 30, 2010 and December 31, 2009, are carried at amounts that approximate their fair value due to the short-term nature of these amounts. In addition, we entered into a put option arrangement with some of the predecessor owners of MPA in conjunction with the acquisition. The arrangement allows the holders to put a portion of the Altisource shares issued as consideration to Altisource at a predetermined price. Altisource calculated the fair value of this put option arrangement on the acquisition date at \$1.3 million by utilizing a Black-Scholes option pricing model (see Note 3). The fair value calculation is deemed to be a Level 3 calculation. The fair value of the put at September 30, 2010 of \$0.8 million was valued using the following assumptions:

	Assumptions
Risk-free Interest Rate	0.19% 0.96%

Expected Stock Price Volatility	35%	58%
Expected Dividend Yield		
Expected Option Life (in years)	0.5	3.5
Contractual Life (in years)		
Fair Value	\$ 0.01	\$3.88

The put option agreement is a written derivative valued similar to stock options and is included within Other Non-current Liabilities on the Condensed Consolidated Balance Sheet. The fair value of the put option agreements will be determined each quarter until such puts are either exercised or forfeited with any changes in value included as a component of Other Income (Expense), net in the Condensed Consolidated Statements of Operations.

NOTE 2 TRANSACTIONS WITH RELATED PARTIES

Ocwen remains our largest customer. Following the Separation, Ocwen is contractually obligated to purchase certain Mortgage Services and Technology Products from us under service agreements. These agreements extend for eight years from the Separation Date subject to termination under certain provisions. Ocwen is not restricted from redeveloping these services. We settle amounts with Ocwen on a daily, weekly or monthly basis based upon the nature of the services and when the service is completed.

We consider certain services to be derived from Ocwen's loan servicing portfolio rather than provided to Ocwen because such services are charged to the mortgagee and/or the investor and are not expenses to Ocwen. Ocwen, or services derived from Ocwen's loan servicing portfolio, as a percentage of each of our segment revenues and as a percentage of consolidated revenues was as follows for the three and nine months ended September 30:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Mortgage Services	65%	72%	66%	73%
Technology Products	36%	41%	36%	45%
Financial Services	<1%	<1%	<1%	<1%
Consolidated Revenues	51%	48%	50%	46%

We record revenues we earn from Ocwen under the various long-term servicing contracts at rates we believe to be market rates as they are consistent with one or more of the following: the fees we charge to other customers for comparable services; the rates Ocwen pays to other service providers; fees commensurate with market surveys prepared by unaffiliated firms; and prices being charged by our competitors.

Allocation of Corporate Costs

The condensed consolidated financial statements for the three and nine months ended September 30, 2009 include allocations of expenses from Ocwen for corporate functions including insurance, employee benefit plan expense and allocations for certain centralized administration costs for executive management, treasury, real estate, accounting, auditing, tax, risk management, internal audit, human resources and benefits administration. Ocwen determined these allocations using proportional cost allocation methods including the use of relevant operating profit, fixed assets, sales and payroll measurements. Specifically, personnel and all associated costs, including compensation, benefits, occupancy and other costs, were allocated based on the estimated percentage of time spent by the individual in the various departments. External costs such as audit fees, legal fees, business insurance and other were allocated based on a combination of the sales, fixed assets and operating profits of the department whichever is most appropriate given the nature of the expense. Total corporate costs allocated to the Company, were \$4.3 million for the nine months ended September 30, 2009 (\$0.5 million for the 2009 third quarter). The charges for these functions are included primarily in Selling, General and Administrative Expenses in the Condensed Consolidated Statements of Operations. However, these amounts may not be representative of the costs necessary for the Company to operate as a separate standalone entity.

In addition, prior to the Separation, Ocwen had allocated interest expense to us based upon our portion of assets to Ocwen's total assets which is included in Other Income (Expense) Net in the Condensed Consolidated Statements of Operations.

Transition Services

In connection with the Separation, Altisource and Ocwen entered into a transition services agreement under which services in such areas as human resources, vendor management, corporate services, six sigma, quality assurance, quantitative analytics,

treasury, accounting, tax, risk management, legal, strategic planning, compliance and other areas are provided to the counterparty for up to two years from the Separation Date. For the nine months ended September 30, 2010, Altisource billed Ocwen \$1.2 million (\$0.5 million for the third quarter), and Ocwen billed Altisource \$0.8 million (\$0.2 million for the third quarter) for services provided under this agreement. These amounts are reflected as a component of Selling, General and Administrative expenses in the Condensed Consolidated Statements of Operations.

NOTE 3 ACQUISITION OF MPA

In February 2010, we acquired all of the outstanding membership interests of MPA pursuant to a Purchase and Sale Agreement. MPA serves as the manager of Lenders One, a national alliance of independent mortgage bankers. The alliance was established in 2000 and as of September 30, 2010 consisted of more than 170 members.

Consideration for the transaction consisted of cash, common stock and put option agreements:

<i>(in thousands)</i>	Consideration
Cash	\$ 29,000
Common Stock	23,900
Put Option Agreements at Fair Value	1,289
Working Capital Adjustment	835
Total Consideration	\$ 55,024

The common stock consisted of 959,085 shares of Altisource's common stock valued at \$24.92 per share based on the closing price of Altisource common stock on February 11, 2010. A portion of which (314,135 shares) will be held in escrow two years from the closing date of the acquisition to secure MPA's indemnification obligations under the Purchase and Sale Agreement. In addition, we entered into three put option agreements with certain of the sellers whereby each seller has the right, with respect to an aggregate of 0.5 million shares of our common stock, to put up to 25% of eligible shares each year for a total of four years at a price equal to \$16.84 per share. The fair value of the put was initially established at the date of acquisition (\$1.3 million) using the following assumptions:

	Assumptions	
Risk-free Interest Rate	0.345%	1.914%
Expected Stock Price Volatility	40%	55%
Expected Dividend Yield		
Expected Option Life (in years)	1	4
Contractual Life (in years)		
Fair Value	\$ 0.74	\$3.90

The preliminary allocation of the purchase price is as follows:

(in thousands)

Cash	\$ 2,170
Accounts Receivable	4,279
Prepaid Expenses and Other Current Assets	321
Premises and Equipment	18
Identifiable Intangible Assets	43,600

Accounts Payable and Accrued Expenses	(2,176)
Other Current Liabilities	(138)
Non-controlling Interests	(3,268)
Total Purchase Price	\$ 55,024

During the second quarter of 2010, Altisource finalized its calculation of the Working Capital Adjustment within the 90 day period allocated by the purchase contract. The value was revised from \$2.1 million to \$0.8 million resulting in an offsetting decrease to Goodwill. The payment of the Working Capital Adjustment was made during the third quarter.

Management has assigned the following lives to identified assets acquired as a result of the acquisition:

	Estimated Life (in Years)
Premises and Equipment	2 5
Management Agreement ⁽¹⁾	15
Trademarks ⁽¹⁾	15
Non-compete ⁽¹⁾	4
Goodwill	Indefinite

(1) The identifiable assets are subject to amortization on a straight-line basis as this best approximates the benefit period related to these assets.

The goodwill arising from the acquisition, which was assigned to our Mortgage Services segment, consists of various components principally in-place workforce and anticipated revenue synergies given MPA's market presence and future enhancements to our services including the development of origination services. All goodwill and intangible assets related to the acquisition of MPA are expected to be amortizable and deductible for income tax purposes.

Edgar Filing: Altisource Portfolio Solutions S.A. - Form 10-Q

We entered into employee agreements with certain key employees of MPA who also received the majority of our shares issued in connection with the acquisition.

Revenue and Net Income Attributable to Altisource from the date of acquisition through September 30, 2010, included in the Company's Condensed Consolidated Statements of Operations, are as follows.

<i>(in thousands)</i>	Three Months Ended September 30, 2010	Nine Months Ended September 30, 2010
Revenue	\$ 5,585	\$ 11,412
Net Income Attributable to Altisource	1,768	1,812

Acquisition-related transaction costs are included in Selling, General and Administrative and Expenses in the Condensed Consolidated Statements of Operations.

Facility Closure Costs

During 2009, we accrued facility closure costs (included in other current and other non-current liabilities in the Condensed Consolidated Balance Sheet) primarily consisting of lease exit costs (expected to be paid through 2014) and severance for the closure of two facilities. The following table summarizes the activity, all recorded in our Financial Services segment, for the nine months ended September 30, 2010:

<i>(in thousands)</i>	Lease Costs

Payments	(204)
Balance, September 30, 2010	712
Less: Long-Term Portion	503
Facility Closure Cost Accrual, Current Portion	\$ 209

We do not expect additional significant costs related to the closure of these facilities.

NOTE 9 EQUITY BASED COMPENSATION

We provide stock-based awards as a form of compensation for certain employees and officers. We have issued stock-based awards in the form of stock options and restricted stock units. We recorded total stock compensation expense of \$2.1 million for the nine months ended September 30, 2010 (\$1.2 million for the quarter). The compensation expense is included in Selling, General and Administrative Expenses in the accompany Condensed Consolidated Statements of Operations.

During the nine months ended September 30, 2010, the Company granted 0.9 million stock options with exercise prices ranging between \$22.00 and \$25.00 per share depending on the grant date. The vesting schedule for the options has a time-based component, in which 25% of the options vest in equal increments over four years, and a market-based component, in which up to 75% of the options could vest in equal increments over three years commencing upon the achievement of certain performance criteria related to our stock price and the annualized rate of return to investors. Two-thirds of the market-based options would begin to vest over three years if the stock price realizes a compounded annual gain of at least 20% over the exercise price, so long as the stock price is at least double the exercise price. The remaining third of the market-based options would begin to vest over three years if the stock price realizes a 25% gain, so long as the stock price is at least triple the exercise price.

The fair value of the time-based options was determined using the Black-Scholes options pricing model while a lattice (binomial) model was used to determine the fair value of the market-based options using the following assumptions as of the grant date:

	Black-Scholes		Binomial	
Risk-free Interest Rate	2.82%	3.20%	0.02%	3.66%
Expected Stock Price Volatility		48%		52%
Expected Dividend Yield				
Expected Option Life (in years)		7		
Contractual Life (in years)				10
Fair Value	\$ 11.71	\$13.00	\$10.05 and	\$12.35

As of September 30, 2010, estimated unrecognized compensation costs related to share-based payments amounted to \$9.4 million which we expect to recognize over a weighted-average remaining requisite service period of

approximately 3.5 years.

Through the date of Separation, Interest Expense (net) included an interest charge from Ocwen which represented an allocation of Ocwen's total interest expense calculated based on our assets in comparison to Ocwen's total assets. This charge was \$1.3 million for the nine months ending September 30, 2009 (\$0.2 million for the third quarter).

Subsequent to the date of Separation, we are no longer subject to the interest charge from Ocwen.

NOTE 13 INCOME TAXES

For periods prior to the Separation Date, we are included in Ocwen's tax returns. Our responsibility with respect to these periods is governed by a tax sharing agreement. In accordance with this agreement, U.S. income taxes were allocated as if they had been calculated on a separate company basis except that benefits for any net operating losses will be provided to the extent such loss is

utilized in the consolidated U.S. federal tax return. The provision for income taxes prior to the Separation Date has been determined on a pro-forma basis as if we had filed separate income taxes under our current structure for the periods presented.

The Company revised its estimated effective tax rate related to 2010 operations for the full year to 12.5% in the second quarter of 2010. The revised estimate was due to the receipt of a favorable ruling in June 2010 regarding the treatment of certain intangibles that exist for purposes of determining the Company's taxable income. The ruling is retroactive to the Separation Date. As a result of the ruling, the Company recognized a \$3.4 million credit attributable to 2009 in the second quarter 2010 which is not included in the estimate of the full year effective tax rate. Income tax provision on income before income tax differs from amounts that would be computed by applying the Luxembourg federal corporate income tax rate of 28.6% primarily because of the effect of enacted tax statutes in multiple jurisdictions, the treatment of intangibles for tax purposes and differing tax rates outside of Luxembourg. This ruling did not have a material impact on our deferred tax assets or liabilities.

The Distribution was intended to be a tax-free transaction under Section 355 of the Internal Revenue Code (the Code). To the extent Ocwen recognizes tax under Section 355 of the Code, Altisource has agreed to indemnify Ocwen. We do not believe we have a material obligation under this indemnity as separately Ocwen recognized substantially all of the gain it has in the assets that comprise Altisource as a result of the restructuring in accordance with other provisions of the Code.

NOTE 14 EARNINGS PER SHARE

Basic earnings per share (EPS) is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the assumed conversion of all dilutive securities. On August 10, 2009, the Distribution by Ocwen was completed to the Ocwen stockholders of one share of Altisource common stock for every 3 shares of Ocwen common stock held as of August 4, 2009. In addition, holders of Ocwen's 3.25% Contingent Convertible Unsecured Senior Notes due 2024 received one share of Altisource common stock deemed held on an as if converted basis. For such notes, the conversion ratio of 82.1693 shares of Ocwen common stock for every \$1,000 in aggregate principal amount of notes held on August 4, 2009 was calculated first, and then we applied the distribution ratio of one share of Altisource common stock for every three shares of Ocwen common stock on an as converted basis to determine the number of shares each note holder received. Basic and diluted earnings per share for the three and nine months ended September 30, 2010 and 2009 are calculated as follows:

A total of 0.2 million options that were anti-dilutive have been excluded from the computation of diluted EPS for the three and nine months ended September 30, 2010. These options were anti-dilutive because their exercise price was greater than the average market price of our stock. Also, excluded from the computation of diluted EPS in both 2010 periods are 0.7 million options granted for shares that are issuable upon the achievement of certain market and performance criteria related to our stock price and an annualized rate of return to investors that have not been met at this point.

NOTE 15 SEGMENT REPORTING

Our business segments reflect the internal reporting that we use to evaluate operating performance and to assess the allocation of our resources by our Chief Executive Officer.

Our segments are based upon our organizational structure which focuses primarily on the services offered.

We classify our businesses into three reportable segments. *Mortgage Services* consists of mortgage portfolio management services that span the mortgage lifecycle. *Financial Services* principally consists of unsecured asset recovery and customer relationship management. *Technology Products* consists of modular, comprehensive integrated technological solutions for loan servicing, vendor management and invoice presentment as well as providing infrastructure support. In addition, our *Corporate Items and Eliminations* segment prior to the Separation Date includes eliminations of transactions between the reporting segments as well as expenditures recognized by us related to the Separation. Subsequent to the Separation Date, in addition to the previously mentioned items, this segment also includes costs recognized by us related to corporate support functions such as finance, legal, human resources and consumer behavior.

SECTION 1 OVERVIEW

Altisource is a provider of services focused on high value, knowledge-based functions principally related to real estate and mortgage portfolio management, asset recovery and customer relationship management. Utilizing integrated technology that includes decision models and behavioral based scripting engines, we provide solutions that improve clients' performance and maximize their returns.

Our objective is to become a global knowledge process provider initially focused on the entire mortgage services lifecycle and credit to cash lifecycle management spaces. We intend to achieve this objective by executing on our strategies of penetrating existing customers, acquiring new customers, increasing quality and reducing costs and investing in new service offerings.

A. Separation

On August 10, 2009, Altisource became a stand-alone public company in connection with our Separation from Ocwen. In connection with the Separation, Altisource and Ocwen entered into Agreements that address the allocation of assets and liabilities between them and that define their relationship after the Separation. Additional information may be found in Note 1 to the condensed consolidated financial statements.

B. Basis of Presentation

The accompanying condensed consolidated financial statements present the historical results of operations, assets and liabilities attributable to the Altisource businesses. For periods prior to the Separation Date, these condensed consolidated financial statements include allocations of expenses from Ocwen for certain corporate functions. Total corporate costs allocated to the Company were \$4.3 million for the nine months ended September 30, 2009 (\$0.5 million in 2009 for the third quarter). The charges for these functions are included primarily in Selling, General and Administrative Expenses in the Condensed Consolidated Statements of Operations. In addition, Ocwen had allocated interest expense to us based upon our portion of assets to Ocwen's total assets which is reflected as Interest Expense in the Condensed Consolidated Statements of Operations. Other than transition services, there have been no allocations of Ocwen expenses charged to us since the Separation Date.

In February 2010, we acquired all of the outstanding membership interests of MPA. MPA was formed with the purpose of managing BPMC which operates as Lenders One. Lenders One is a national alliance of independent mortgage bankers that provides its Members with education and training along with revenue enhancing, cost reducing and market share expanding opportunities. The results of operations of BPMC are consolidated under the variable interest model since the acquisition date.

For periods prior to the Separation, the condensed consolidated financial statements also do not necessarily reflect what the Company's consolidated results of operations, financial position and cash flows would have been had the Company operated as an independent company during the entirety of the periods presented. For instance, as an independent public company, Altisource incurs costs in excess of those previously allocated by Ocwen for maintaining a separate Board of Directors, obtaining a separate audit, relocating certain executive management and hiring additional personnel.

Factors Affecting Comparability

In addition to the items noted within the *Basis of Presentation* section presented above, the following additional item may impact the comparability of our results:

During 2010, to further align the interests of management with shareholders, we expanded our use of equity compensation. For the nine months ended September 30, 2010, we have recognized \$2.1 million (\$1.2 million in the third quarter) of equity compensation expense as compared to \$0.3 million for the full year ending December 31, 2009. As a result of the share price doubling as compared to the grant price during June 2010, performance criteria were met for certain option grants which triggered vesting of the award and acceleration in the expense recognition of these grants. This contributed to the increase in equity compensation expense in the third quarter of 2010;

Edgar Filing: Altisource Portfolio Solutions S.A. - Form 10-Q

During the nine months ended September 30, 2009, we recognized \$3.4 million (\$1.5 million during the third quarter) of one-time costs in anticipation of the Separation from Ocwen; and

During the nine months ended September 30, 2009, we recognized \$2.3 million in facility closure costs in Selling, General and Administrative Expenses and a \$2.3 million litigation settlement gain in Other Income (both of which were recorded in the third quarter) in our Financial Services segment.

Service Revenue consists of amounts attributable to our fee based services. Reimbursable Expenses consists of amounts that we incur on behalf of our customers in performing our fee based services, but we pass such costs directly on to our customers without any additional markup. Cooperative Non-controlling Interests is attributable to the Members of Lenders One.

We have continued to grow both Total Revenue and Service Revenue in our Mortgage Services segment primarily driven by the development and execution of default oriented mortgage services over an expanding national delivery platform. Our acquisition of MPA has also contributed to the increase from the prior year. Our largest customer, Ocwen, recently expanded its residential loan portfolio to almost 500,000 loans as of September 30, 2010 with its acquisition of the HomeEq residential loan portfolio of approximately 130,000 loans. Due to the timing of the HomeEq referrals received from Ocwen, the impact of Ocwen's acquisition had a limited impact to Altisource's revenues for the third quarter.

With respect to our Financial Services segment, contributing factors to the general decline in revenues include reduced placements from our largest customer for this segment partially offset by placements from other customers. In addition, we continue to build out a global delivery platform for collections which sometimes results in lower revenues per account although at higher margins.

Technology Products revenues have generally increased as Ocwen has increased its residential loan portfolio and headcount resulting in additional fees.

Our revenues are seasonal. More specifically, Financial Services revenue tends to be higher in the first half of the year, particularly the first quarter, as borrowers may utilize tax refunds to pay debts. Mortgage Services revenue is impacted by Real Estate Owned (REO) sales which tend to be at their lowest level during winter months and highest during summer months.

Table of Contents**Management's Discussion and Analysis of
Financial Condition and Results of Operations***(continued)**Cost of Revenue*

Cost of revenue principally includes payroll and employee benefits associated with personnel employed in customer service and operations roles, fees paid to external providers related to provision of services, reimbursable expenses, technology and telephony expenses as well as depreciation and amortization of operating assets. The components of cost of revenue were as follows for the periods ended September 30, 2010 and 2009:

In evaluating the performance of our segments, we generally neutralize the impact of pass-through items for which we earn no margin by excluding reimbursable expenses from Cost of Revenue and computing gross margin based upon Service Revenue.

On a consolidated basis, our gross margins based on Service Revenue for the nine months ended September 30, 2010 increased as a result of the composition of revenues being more weighted towards the higher margin Mortgage Services segment, the recent acquisition of MPA and our ability to efficiently scale our operations as our referral base grows.

Compensation and benefits costs have grown year to date as we scaled to support the national rollout of services and in anticipation of the growth in Ocwen's residential loan portfolio. Sequentially, compensation and benefit costs have remained relatively flat. In addition, for periods subsequent to the Separation Date, we treat compensation costs

associated with segment executive management and segment marketing activities as a component of Selling, General and Administrative Expenses.

Outside fees and services primarily increased in our Mortgage Services segment consistent with greater revenues.

Outside fees and services also increased when compared to the prior year in our Financial Services segment as we increased our use of external collectors. In the third quarter, outside fees and services for Financial Services began to decline slightly as we transitioned more work from external collectors to employees.

Technology and communication costs increased in both periods related to costs associated with the new data center. In addition, in the third quarter technology and communications costs increased as a result of the addition of new facilities and the expansion of bandwidth at existing facilities to handle the increased demands expected in the fourth quarter.

Table of Contents**Management's Discussion and Analysis of
Financial Condition and Results of Operations***(continued)**Selling, General and Administrative Expenses*

Selling, general and administrative expenses include payroll, employee benefits, occupancy and other costs associated with personnel employed in executive, sales, marketing, human resources, consumer behavior, internal audit and finance roles. This category also includes professional fees, depreciation and amortization on non-operating assets. The components of Selling, General and Administrative Expenses were as follows for the periods ended September 30, 2010 and 2009:

Similar to gross margins, we evaluate operating margins by comparing Operating Income over Service Revenue to neutralize the impact of pass-through items for which we earn no margin.

When calculated based on Service Revenue, our operating margins for the three and nine months ended September 30, 2010 improved slightly when compared to the similar prior year period.

Compensation and Benefits has increased from the prior year primarily as a result of the cost of being a separate public company and the need to have separate support functions such as accounting, legal and human resources as well as to the previously mentioned reclassification of certain executive and marketing related compensation costs

from cost of revenues. In addition, equity compensation for senior executives is recognized within Selling, General and Administrative Expenses.

Costs associated with Professional Services have increased over the prior year after we consider the impact of 2009 one-time costs of \$3.4 million year to date (\$1.5 million for the third quarter) related to the Separation and \$2.3 million year to date (all recorded in the third quarter) related to facility closure costs in our Financial Services segment. The increase in Professional Services is primarily attributable to costs associated with being a separate public company including increased audit and legal fees as well as insurance.

Occupancy Related Costs increased in 2010 primarily as a result of our expansion of services which led to new leased facilities in India and the United States. The year to date increase was partially offset by decreases associated with lease facility closures in Financial Services in the third quarter of 2009.

Amortization of Intangible Assets increased as a result of the intangibles acquired in connection with the acquisition of MPA (see Notes 3 and 7 to the condensed consolidated financial statements).

EBITDA

Altisource evaluates performance based on several factors of which a primary financial measure is income before interest, tax, depreciation and amortization (*EBITDA*). We believe that this non-GAAP financial measure is useful to investors and analysts

- 28 -

Table of Contents**Management's Discussion and Analysis of
Financial Condition and Results of Operations***(continued)*

in analyzing and assessing our overall business performance since we utilize this information for making operating decisions, for compensation decisions and for forecasting and planning future periods. While the Company uses non-GAAP financial measures as a tool to enhance its understanding of certain aspects of its financial performance and to provide incremental insight into the underlying factors and trends affecting both the Company's performance and its cash-generating potential, the Company does not consider these measures to be a substitute for, or superior to, the information provided by GAAP financial measures. Consistent with this approach, the Company believes that disclosing non-GAAP financial measures to the readers of its financial statements provides such readers with useful supplemental data that, while not a substitute for GAAP financial measures, allows for greater transparency in the review of its financial and operational performance and enables investors to more fully understand trends in its current and future performance.

N/M not meaningful.

We evaluate EBITDA margins against Service Revenue internally to neutralize the impact of pass-through items for which we earn no margin.

EBITDA margins based on Service Revenue declined year to date principally due to a decline in performance of Financial Services and scaling our operations to support the national rollout of services and the anticipated growth in Ocwen's residential loan portfolio. In addition, during 2010, to further align the interests of management with shareholders, we expanded our use of equity compensation. For the nine months ended September 30, 2010, we have recognized \$2.2 million (\$1.2 million in the third quarter) of equity compensation expense as compared to \$0.3 million for the full year ending December 31, 2009. We expect EBITDA as a percent of service revenue to improve in the fourth quarter as we begin to more fully realize the benefit of Ocwen's acquisition of the residential loan portfolio of HomEq and leverage our larger operational structure.

Income Taxes

For the third quarter Altisource's effective tax rate was 18.8%, which is higher than our estimated effective tax rate for the full year due to permanent differences recognized in the quarter. The year to date effective tax rate is 5.2% which includes the impact of credits recognized in the second quarter associated with 2009. Income tax provision on income before income tax differs from amounts that would be computed by applying the Luxembourg federal corporate income tax rate of 28.6% primarily because of the effect of enacted tax statutes in multiple jurisdictions, the treatment of intangibles for tax purposes and differing tax rates outside of Luxembourg.

SECTION 3 SEGMENT RESULTS OF OPERATIONS

The following section provides a discussion of pre-tax results of operations of our business segments for the periods ended September 30, 2010 and 2009. Transactions between segments are accounted for as third-party arrangements for purposes of presenting segment results of operations. Intercompany transactions primarily consist of information technology infrastructure services and charges for the use of certain REAL products from our Technology Products segment to our other two segments. Generally, we reflect these charges within technology and communication in the segment receiving the services, except for consulting services, which we reflect in professional services.

Service Revenue for our Mortgage Services segment has consistently grown for the periods presented primarily as a result of our development and rollout of default oriented Mortgage Services over our expanding national delivery platform, the growth in Ocwen's residential loan portfolio and the acquisition of MPA in February 2010. Ocwen's acquisition of the HomeEq residential loan portfolio had limited impact to our revenues for the third quarter since we generally did not receive referrals until very late in September.

Altisource continues to expand its default services. As of September 30, 2010, we:

Provide REO brokerage disposition services on over 8,500 properties (compared to approximately 5,700 properties as of June 30, 2010); and

Managed property preservation services nationally for over 13,500 properties (compared to over 10,200 properties as of June 30, 2010).

In addition, we announced during the first quarter call that we had finalized a confidential agreement to provide asset management services to a potentially significant customer. We began performing services for this client in September and expect to begin revenue recognition in the fourth quarter.

Members United and Acquisition MPA

We are committed to providing a full suite of mortgage services in 2011 to assist mortgage originators including valuation, title, fulfillment and flood certification services. Through our acquisition of MPA and the recently signed agreement with Members United Corporate Federal Credit Union (Members United), we have preferred access to over 2,000 diverse financial institutions which we believe constitutes 7% of the total origination market. In addition, for members of MPA we believe that over time we can work with Ocwen and other partners to provide additional avenues to sell loans beyond the current preferred investor

arrangements resulting in improved capital markets execution. We expect this will facilitate the sale of our services to the members.

MPA and its consolidated subsidiary contributed \$11.4 million of revenue, including \$4.1 million attributable to non-controlling interests, and \$3.9 million of EBITDA since the February 2010 acquisition date. This revenue and EBITDA was a sequential improvement and was substantially in line with our internal projections which included a forecasted decline in origination volumes during 2010. We expect this decline to be somewhat mitigated given the accelerated pace of new members joining the cooperative. Through September 30, 2010, MPA has over 170 Members.

In our Mortgage Services segment, we generate the majority of our revenue by providing outsourced services that span the lifecycle of a mortgage loan primarily for Ocwen or with respect to the residential loan portfolio serviced by Ocwen. In addition to our relationship with Ocwen, we have relationships with some of the leading capital markets firms, commercial banks, hedge funds, insurance companies, credit unions and lending institutions. We provide products that enhance their ability to make informed investment decisions and manage their core operations. With the acquisition of MPA in February 2010 and our strategic marketing agreement with Members United, we took a significant step in our evolution to become a full service provider in the mortgage services vertical and gained increased access to a growing group of mid-tier mortgage bankers and credit unions.

Asset Management Services. Asset management services principally include property preservation, property inspection, REO asset management and REO brokerage. In the first quarter of 2010, we completed our national network for property preservation services and, including our real estate broker referral network, have national coverage for REO dispositions. The increase in revenue has mostly been driven by our property preservation services to date; however, the increase in REO brokerage referrals should ultimately drive additional revenues as we dispose of these properties on behalf of our clients.

Component Services and Other. The increase in component services year over year is due to an expanded relationship with an existing customer beginning in the second quarter of 2009 and the inclusion of MPA's results.

Residential Property Valuation. As one of the more mature services in our portfolio, residential property valuations are subject to market conditions. During the third quarter of 2010, we saw a sequential increase in revenues as a result of Ocwen's residential loan portfolio growth, including the HomEq portfolio, resulting in the ordering of more valuations, particularly broker price opinions. We expect to see this increased level of referrals to continue during the fourth quarter.

Table of Contents**Management's Discussion and Analysis of
Financial Condition and Results of Operations***(continued)*

Closing and Title Services. This business includes legacy services such as pre-foreclosure title services as well as an expanded array of title services that were rolled out during 2010 and 2009 principally around REO purchase transactions. During 2010, we are focused on rolling out our title agency business in key markets which we believe will drive significant revenue growth in 2011 at attractive margins. We expect to obtain agency status in California in the fourth quarter.

Default Management Services. This group includes support services whereby we provide non-legal back-office support for foreclosure, bankruptcy and eviction attorneys as well as non-judicial foreclosure services in California and Nevada through our trustee company Western Progressive, LLC. We do not execute or notarize any foreclosure affidavits. During the third quarter, we experienced a slight sequential decline in revenue. This decline since the second quarter was principally caused by the timing of referrals which were more heavily weighted towards the end of September (resulting in less revenue being recognized in the quarter) and the elongation of the time it takes to process foreclosures which resulted in us extending the period over which we recognize revenue for some states.

Primarily during the second and third quarter, we began scaling our operations to support the national rollout of services and in anticipation of the growth in Ocwen's residential loan portfolio. These costs have principally included increased compensation and benefit and technology costs. Due to the number of persons we were hiring as well as training time, it was necessary to hire these resources several months prior to the completion of Ocwen's acquisition of the HomeEq residential loan portfolio. We expect to begin utilizing these expanded operations to generate additional revenue in the fourth quarter and throughout 2011.

Selling, General and Administrative Expenses increased principally as a result of the classification of certain compensation and benefit costs related to segment management and marketing previously being captured either in Cost of Revenue or as a component of the Corporate segment now being captured in Selling, General and Administrative Expenses. In addition, professional services fees such as those associated with the external audit have increased as a result of being a public company. Such costs are allocated to the segments based upon expected hours to be incurred per segment by the vendor.

Our operating margins for the nine months ended September 30, 2010 based on Service Revenue remained relatively flat as the significant additional facility costs as a result of scaling our operations were substantially offset by revenue growth.

Financial Services revenue declined both for the quarter and year to date when compared to the prior year.

Sequentially, revenues declined \$1.0 million due to decreased placements from our largest customer. We were able to partially offset this decline by increased placements from a customer we began servicing in 2009 as well as growth in revenue from other customers.

Our strategy for 2010 continues to be focused on improving margins principally via improving revenue per collector, expanding our quality initiatives and investing in new technology. In addition, in the fourth quarter of 2010, we named a new President for the segment.

In our Financial Services segment, we generate the majority of our revenue from asset recovery management fees we earn for collecting amounts due to our customers and from fees we earn for performing customer relationship management for our customers.

Asset Recovery Management. Our revenues associated with contingency collections declined in both periods principally due to lower placements and a shift in placements to operations that provide lower per collector revenue, but higher margin.

Customer Relationship Management. Our revenues associated with customer relationship management declined over both periods as we sought to wind down our relationship with one customer due to unsatisfactory margins as well as due to the seasonal nature of the business. In the third quarter, we expanded our relationship with another customer.

Our Cost of Revenues, net of reimbursable expenses, decreased principally due to a reduction in compensation and benefits as a result of a lower number of collectors and reduced commissions. In addition, we continue to seek ways to reduce technology and communication costs for this segment.

During the nine months ended September 30, 2009, we recognized \$2.3 million (all recorded in the third quarter) in facility closure costs. Excluding these costs, Selling, General and Administrative Expenses in both 2010 periods were consistent with the comparative 2009 periods.

Financial Services EBITDA declined \$1.2 million year over year despite a revenue decline of \$4.0 million which reflects the cost savings initiatives we undertook in the second half of 2009 and the wind-down of business from a lower margin customer relationship management client in 2010. Sequentially EBITDA declined in part due to the seasonality of the business as well as the previously mentioned decline in placements. The facility closure costs discussed above were offset by a litigation settlement of \$2.3 million awarded to us during the third quarter of 2009.

The primary focus of the Technology Products segment continues to be supporting the growth of Mortgage Services and Ocwen as well as the cost reduction and quality initiatives on-going within the Financial Services segment. During the first quarter, we re-organized the management team of Technology Products by naming a new President for the segment. We are focused on enhancing our development and infrastructure capabilities to support both our expansion efforts and those of Ocwen. In addition, we remain focused on the longer-term commercialization of our service offerings to expand their applicability to a broader audience.

Beginning with the second quarter of 2009, we began generating the majority of our revenue within this segment from our REALSuite of services, and we expect this trend to continue for the foreseeable future.

REALSuite. Our REALSuite revenue is primarily driven by REALServicing® which is our comprehensive residential loan servicing platform. Increases in both year-to-date and quarterly revenues were driven by increases in REALServicing

attributable to an expanded agreement with a non-related third party customer and the growth in Ocwen's residential loan portfolio.

IT Infrastructure Services. Our IT infrastructure services revenues declined when compared to the comparable periods in 2009 primarily due to lower intercompany billings (which we eliminate in consolidation but include in our segment presentation) and reduced charges to Ocwen. Sequentially, Revenue increased slightly as Ocwen expanded their operations to support the acquisition of the HomeEq residential loan portfolio.

Cost of Revenue margins decreased both year to date and in the third quarter as a result of an increase in compensation and benefits as we added personnel to enhance our service capabilities, support our growth and commercialize our products. In addition, in the third quarter, technology and communications costs increased both as a result of the addition of new facilities and the expansion of bandwidth at existing facilities to handle the increased demands expected in the fourth quarter.

Selling, General and Administrative Expenses increased both year to date and in the third quarter as a result of increased occupancy charges associated with the new data center. Sequentially, Selling, General and Administrative Expenses increased primarily as a result of costs incurred in preparing for the HomeEq transaction.

Technology Products EBITDA increased year over year but declined quarter over quarter. Sequentially, margins decreased as higher revenues were more than offset by increased compensation and occupancy costs associated with the new data center as described above. The Company is increasing expenditures in technology software and hardware to support its commercialization efforts, Ocwen's growing servicing portfolio and Altisource's growth.

Table of Contents**Management's Discussion and Analysis of
Financial Condition and Results of Operations***(continued)***SECTION 4 LIQUIDITY AND CAPITAL RESOURCES*****Liquidity***

We believe that we have the ability to generate more than sufficient cash from our current operations for the next twelve months to meet anticipated cash requirements. Anticipated cash requirements principally include operational expenditures such as compensation and benefits, working capital requirements and spending for capital expenditures. We generate significant excess cash that we will seek to deploy in a disciplined manner. Principally, we will continue to invest in compelling services that we believe will generate high margins. In addition, we may seek to acquire a limited number of companies that fit our strategic objectives. Finally, given the tax inefficiency of dividends, the low returns earned on cash held and our desire to only perform a limited number of acquisitions, we believe one of the best ways to return value to shareholders is a share repurchase program. On May 19, 2010, our shareholders authorized us to purchase up to 3,784,618 shares of our common stock in the open market. During the third quarter of 2010, we purchased 86,098 shares of our common stock on the open market at an average price of \$26.81, leaving 3,698,520 shares still available for purchase. Subsequently, during October, we purchased an additional 65,317 shares. As of October 25, 2010, we have repurchased a total of 151,415 shares at an average share price of \$26.39.

Cash Flows

The following table presents our cash flows for the nine months ended September 30:

Cash Flow from Operating Activities

Cash flow from operating activities consists of two components: (i) net income adjusted for depreciation, amortization and certain other non-cash items and (ii) working capital. For the nine months ended September 30, 2010, we generated \$33.3 million in positive cash flow from operations which reflects our increased profitability adjusted for non-cash items as our businesses have expanded. Our working capital requirements increased significantly during the third quarter as a result of our expanded Asset Management and Default Management services within our Mortgage Services segment and the increase in associated referrals.

Cash Flow from Investing Activities

The largest use of cash flow for investing activities was the acquisition of MPA in February 2010 for which the purchase consideration included \$29.0 million in cash. In addition, we saw an increase in purchases of premises and equipment and technology to support our expansion of operations and in anticipated growth in Ocwen's residential loan portfolio.

Cash Flow from Financing Activities

During 2010, cash flow from financing activities primarily includes activity associated with stock option exercises, share repurchases and payments to non-controlling interest owners as a result of the acquisition of MPA. Prior to our Separation from Ocwen, we participated in a centralized cash management program with Ocwen. We made a significant amount of our cash disbursements through centralized payable systems which were operated by Ocwen, and a significant amount of our cash receipts

were received by us and transferred to centralized accounts maintained by Ocwen. There were no formal financing arrangements with Ocwen. Prior to the Separation we recorded all cash receipts and disbursement activity between Ocwen and us through invested equity in the Condensed Consolidated Balance Sheets and as net distributions in the Condensed Consolidated Statements of Equity and Cash Flows because we considered such amounts to have been distributed to Ocwen.

Liquidity Requirements after September 30, 2010

Between October 1 and October 25, 2010, we repurchased 65,317 shares at a total cost of \$1.7 million.

During the fourth quarter 2010, we expect to distribute \$2.1 million to non-controlling interests.

Management is not aware of any other trends or events, commitments or uncertainties which have not otherwise been disclosed that will or are likely to impact liquidity in a material way.

Capital Resources

Given our ability to generate cash flow which is sufficient to fund both current operations as well as expansion activities, we require very limited capital. Were we to need additional capital, we believe we have adequate access to both debt and equity capital markets.

Commitments and Contingencies

For details of these transactions, see Note 16 to the condensed consolidated financial statements.

SECTION 5 CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We prepare our condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States. In applying many of these accounting principles, we need to make assumptions, estimates and/or judgments that affect the reported amounts of assets, liabilities, revenues and expenses in our condensed consolidated financial statements. We base our estimates and judgments on historical experience and other assumptions that we believe are reasonable under the circumstances. These assumptions, estimates and/or judgments, however, are often subjective. Actual results may be affected negatively based on changing circumstances. If actual amounts are ultimately different from our estimates, the revisions are included in our results of operations for the period in which the actual amounts become known.

Our critical accounting policies are described in the MD&A section in our 2009 Form 10-K. Such policies have not changed during 2010.

SECTION 6 OTHER MATTERS

Related Party - Ocwen

For the nine months ended September 30, 2010, approximately \$90.7 million of the Mortgage Services, \$0.1 million of the Financial Services and \$13.6 million of the Technology Products segment revenues were from services provided to Ocwen or sales derived from Ocwen's loan servicing portfolio. Services provided to Ocwen included residential property valuation, real estate asset management and sales, trustee management services, property inspection and preservation, closing and title services, charge-off second mortgage collections, core technology back office support and multiple business technologies including our REALSuite of products. We provided all services at rates we believe to be comparable to market rates.

In connection with the Separation, Altisource and Ocwen entered into various agreements that address the allocation of assets and liabilities between them and that define their relationship after the Separation including a Separation Agreement, a Tax Matters Agreement, an Employee Matters Agreement, an Intellectual Property Agreement, a Data Center and Disaster Recovery Agreement, a Technology Products Services Agreement, a Transition Services Agreement and certain long-term servicing contracts (collectively, the Agreements) (see Note 4 to our 2009 Form 10-K). For the nine months ended September 30, 2010, Altisource billed Ocwen \$1.2 million (\$0.5 million for the third quarter), and Ocwen billed Altisource \$0.8 million (\$0.2 million for the third quarter) for services provided under the Transition Services Agreement. These amounts are reflected as a component of Selling, General and Administrative expenses in the accompanying Condensed Consolidated Statements of Operations.

SECTION 7 FORWARD LOOKING STATEMENTS

This Quarterly Report contains forward-looking statements that relate to, among other things, our future financial and operating results. In many cases, you can identify forward-looking statements by terminology such as *may*, *will*, *should*, *expect*, *intend*, *plan*, *anticipate*, *believe*, *estimate*, *predict*, *potential* or *continue* or the negative and other comparable terminology including, but not limited to, the following:

assumptions related to the sources of liquidity and the adequacy of financial resources;

assumptions about our ability to grow our business;

assumptions about our ability to reduce our cost structure;

expectations regarding collection rates and placements in our Financial Services segment;

estimates regarding the calculation of our effective tax rate; and

estimates regarding our reserves and valuations.

Forward-looking statements are not guarantees of future performance and involve a number of assumptions, risks and uncertainties that could cause actual results to differ materially. Important factors that could cause actual results to differ materially from those suggested by the forward-looking statements include, but are not limited to, the risks discussed in *Risk Factors* in our Registration Statement on Form 10 and the following:

our ability to retain existing customers and attract new customers;

general economic and market conditions;

governmental regulations, taxes and policies; and

availability of adequate and timely sources of liquidity.

We caution you not to place undue reliance on these forward-looking statements which reflect our view only as of the date of this report. We are under no obligation (and expressly disclaim any obligation) to update or alter any forward-looking statements contained herein to reflect any change in our expectations with regard thereto or change in events, conditions or circumstances on which any such statement is based.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Our financial market risk consists primarily of foreign currency exchange risk.

Foreign Currency Exchange Risk

We consider the US Dollar to be our functional currency worldwide and the majority of our servicing agreements are denominated in US Dollars. Where required locally, we incur certain costs, primarily lease and payroll costs, in local currencies which include the Euro and Indian Rupee. Costs incurred in local currencies expose us to foreign exchange rate fluctuations to the extent our foreign positions remain un-hedged.

Item 4. Controls and Procedures.

a) Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15a-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this quarterly report. Based on such evaluation, such officers have concluded that our disclosure controls and procedures as of the end of the period covered by this quarterly report were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms, and to ensure that such information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

b) Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ending September 30, 2010, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
