**Table of Contents**

**MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited)**

**NOTE A Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles applicable to interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management of Mobile Mini, Inc. (Mobile Mini or the Company), all adjustments (which include normal recurring adjustments) necessary to present fairly the financial position, results of operations, and cash flows for all periods presented have been made. All significant inter-company balances and transactions have been eliminated.

The local currency of the Company's foreign operations is translated to U.S. currency for the Company's condensed consolidated financial statements for each period being presented and the Company is subject to foreign exchange rate fluctuations in connection with the Company's European and Canadian operations.

The condensed consolidated balance sheet at December 31, 2009, has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements.

The results of operations for the nine month period ended September 30, 2010, are not necessarily indicative of the operating results that may be expected for the entire year ending December 31, 2010. Demand from some of the Company's customers is somewhat seasonal. Demand for leases of the Company's portable storage units by large retailers is stronger from September through December because these retailers need to store additional inventory for the holiday season. Many of these retailers usually return these leased units to the Company early in the following year. This seasonality has generally caused lower utilization rates for the Company's lease fleet and a marginal decrease in cash flow during the first quarter of the year. Over the last few years, the Company reduced the percentage of units it reserves for this seasonal business in comparison to the levels it allocated in earlier years, decreasing the impact of this seasonality on the Company's operations.

These condensed consolidated financial statements should be read in conjunction with the Company's December 31, 2009 consolidated financial statements and accompanying notes thereto, which are included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission (SEC) on March 1, 2010.

**NOTE B Recent Accounting Pronouncements**

*Transfers of Financial Assets.* In June 2009, the Financial Accounting Standards Board (FASB) issued guidance that changes the information a reporting entity provides in its financial statements about the transfer of financial assets and continuing interests held in transferred financial assets. The standard amends previous accounting guidance by removing the concept of qualified special purpose entities. This accounting standard became effective for the Company for transfers occurring on or after January 1, 2010. The Company adopted this accounting standard and it did not have a material effect on its consolidated financial statements and related disclosures.

**NOTE C Fair Value Measurements**

The Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants. Fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, the Company adopted the suggested accounting guidance for the three levels of inputs that may be used to measure fair value:

- Level 1 Observable inputs such as quoted prices in active markets for identical assets or liabilities;
- Level 2 Observable inputs, other than Level 1 inputs in active markets, that are observable either directly or indirectly; and
- Level 3 Unobservable inputs for which there is little or no market data, which require the reporting entity to develop its own assumptions.

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued**

Assets and liabilities measured at fair value on a recurring basis are as follows (in thousands):

		<b>Quoted Prices in Active Markets for Identical Assets (Level 1)</b>	<b>Significant Other Observable Inputs (Level 2)</b>	<b>Significant Unobservable Inputs (Level 3)</b>	<b>Valuation Technique</b>
<b>Interest Rate Swap Agreements</b>	<b>Fair Value</b>				
December 31, 2009	\$ (7,703)	\$	\$ (7,703)	\$	(1)
September 30, 2010	\$ (3,407)	\$	\$ (3,407)	\$	(1)

(1) The Company's interest rate swap agreements are not traded on a market exchange. As a result, the fair values are determined using valuation models that include assumptions about the LIBOR yield curve at the reporting dates as well as counterparty credit risk and the Company's own non-performance risk. The Company has consistently applied these calculation techniques to all periods presented. At December 31, 2009 and September 30, 2010, the fair value of interest rate swap

agreements is  
 recorded in  
 accrued liabilities  
 in the Company's  
 condensed  
 consolidated  
 balance sheets.

#### NOTE D Fair Value of Financial Instruments

The Company determines the estimated fair value of financial instruments using available market information and valuation methodologies. Considerable judgment is required in estimating fair values. Accordingly, the estimates may not be indicative of the amounts the Company could realize in current market exchanges.

The carrying amounts of cash, receivables, accounts payable and accrued liabilities approximate fair values based on the liquidity of these financial instruments or based on their short-term nature. The carrying amounts of the Company's borrowings under its credit facility and notes payable approximate fair value. The fair values of the Company's notes payable and credit facility are estimated using discounted cash flow analyses, based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. Based on the borrowing rates currently available to the Company for bank loans with similar terms and average maturities, the fair value of the Company's notes payable and credit facility debt at December 31, 2009 and September 30, 2010, approximated their respective book values. The fair value of the Company's \$150.0 million aggregate principal amount of 6.875% senior notes due 2015 (the "Mobile Mini Notes") and its \$200.0 million aggregate principal amount of 9.750% senior notes originally issued by Mobile Storage Group, Inc. due 2014 (the "MSG Notes" and together with the Mobile Mini Notes, the "Senior Notes"), is based on the latest sales price of the notes at the end of each period obtained from a third-party institution. The carrying value and the fair value of the Company's Senior Notes are as follows:

	<b>December 31, 2009</b>	<b>September 30, 2010</b>
	<b>(In thousands)</b>	
Carrying value	\$ 345,402	\$ 340,031
Fair value	\$ 348,500	\$ 348,528

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued****NOTE E Earnings Per Share**

The Company issued preferred stock that participates in distributions of earnings on the same basis as shares of common stock. As such, the Company adopted the accounting guidance for the standards regarding the computation of earnings per share (EPS) for securities other than common stock that contractually entitle the holder to participate in dividends and earnings of the Company. Earnings for the period are required to be allocated between the common and preferred shareholders based on their respective rights to receive dividends. Basic net income per share is then calculated by dividing income allocable to common stockholders by the weighted-average number of common shares outstanding, net of shares subject to repurchase by the Company, during the period. The Company is not required to present basic and diluted net income per share for securities other than common stock. Accordingly, the following net income per share amounts only pertain to the Company's common stock. The Company calculates diluted net income per share under the if-converted method unless the conversion of the preferred stock is anti-dilutive to basic net income per share. To the extent the inclusion of preferred stock is anti-dilutive, the Company calculates diluted net income per share under the two-class method. Potential common shares include restricted common stock, which is subject to risk of forfeiture and incremental shares of common stock issuable upon the exercise of stock options and upon the conversion of convertible preferred stock using the treasury stock method.

The following is a reconciliation of net income and weighted-average shares of common stock outstanding for purposes of calculating basic and diluted earnings per share for the three month and nine month periods ended September 30:

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>

Stock options	438	935	508	980
Nonvested share-awards	103	56	313	35

**NOTE F Share-Based Compensation**

At September 30, 2010, the Company had one active share-based employee compensation plan. There are two expired compensation plans, one of which still has outstanding options subject to exercise or termination. No additional options can be granted under the expired plans. Stock option awards under these plans were granted with an exercise price per share equal to the fair market value of the Company's common stock on the date of grant. Each outstanding option must expire no later than 10 years from the date it was granted, unless exercised or forfeited before the expiration date, and historically options are granted with vesting over a 4.5 year period. The Company has not granted any stock option awards in 2010. The total value of the Company's stock option awards is expensed over the related employee's service period on a straight-line basis.

The Company also awards restricted stock, also called nonvested share-awards in this discussion, under the existing share-based compensation plans. The majority of the Company's nonvested share-awards vest in equal annual installments over a five year period. The total value of these awards is expensed on a straight-line basis over the service period of the employees receiving the awards. The service period is the time during which the employees receiving awards must remain employees for the shares granted to fully vest.

In addition, the Company awards nonvested share-awards to certain executive officers with vesting subject to performance conditions. Vesting of these nonvested share-awards is dependent upon the respective officers fulfilling the service period requirements as well as the Company achieving certain EBITDA targets in each of the next four years. The 2010 target was established by the Company's Board of Directors on February 22, 2010, at which point the value of each nonvested share-award was \$15.21. The Company is required to assess the probability that such performance conditions will be met. If the likelihood of the performance conditions being met is deemed probable, the Company will recognize the expense using the accelerated attribution method. The accelerated attribution method could result in as much as 50% of the total value of the shares being recognized in the first year of the service period if the likelihood of attaining each of the four future targets is assessed as probable. For these performance based awards, the accelerated attribution method has been used to recognize the expense.

In June 2008, in connection with the Company's acquisition of Mobile Storage Group (MSG), the Company awarded nonvested share-awards that vested or will vest over a period of between one and five years. The total value of these awards is expensed on a straight-line basis over the service period.

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued**

The following table sets forth unrecognized compensation costs related to the Company's share-based compensation plan as of September 30, 2010:

	<b>September 30, 2010 (In thousands)</b>	<b>Weighted-Average Recognition Period (Years)</b>
Share-awards	\$ 17,505	2.9
Stock option awards	\$ 188	0.6

The following table summarizes the share-based compensation expense and capitalized amounts for the three months and nine months ended September 30:

	<b>Three Months Ended September 30, 2009 2010 (In thousands)</b>		<b>Nine Months Ended September 30, 2009 2010 (In thousands)</b>	
Gross share-based compensation	\$ 1,883	\$ 1,923	\$ 5,359	\$ 5,023

Share-based compensation expense	\$ 1,825	\$ 1,882	\$ 5,106	\$ 4,905

A summary of stock option activity within the Company's share-based compensation plans and changes for the nine months ended September 30, 2010 is as follows:

	<b>Number of Shares (In thousands)</b>	<b>Weighted Average Exercise Price</b>
Balance at December 31, 2009	1,656	\$ 17.01
Exercised	(77)	\$ 11.38
Canceled/expired	(130)	\$ 18.72
Balance at September 30, 2010	1,449	\$ 17.16

The intrinsic value of options exercised during the nine months ended September 30, 2010 was approximately \$367,000.

A summary of nonvested share-awards activity within the Company's share-based compensation plans and changes for the nine months ended September 30, 2010 is as follows:

	<b>Number of Shares (In thousands)</b>	<b>Weighted Average Grant Date Fair Value</b>
Nonvested at December 31, 2009	1,213	\$ 16.05
Awarded	176	\$ 15.74
Released	(105)	\$ 18.26

Forfeited	(90)	\$	15.74
Nonvested at September 30, 2010	1,194	\$	15.83

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued**

A summary of fully-vested stock options and stock options expected to vest, as of September 30, 2010, is as follows:

	<b>Number of Shares (In thousands)</b>	<b>Weighted Average Exercise Price</b>	<b>Weighted Average Remaining Contractual Term</b>	<b>Aggregate Intrinsic Value (In thousands)</b>
Outstanding	1,449	\$ 17.16	3.11	\$ 1,821
Vested and expected to vest	1,430	\$ 17.03	3.08	\$ 1,821
Exercisable	1,430	\$ 16.99	3.07	\$ 1,821

The fair value of each stock option award is estimated on the date of the grant using the Black-Scholes option pricing model. No stock options were granted during the nine month period ended September 30, 2010.

**NOTE G Inventories**

Inventories are valued at the lower of cost (principally on a standard cost basis that approximates the first-in, first-out (FIFO) method) or market. Market is the lower of replacement cost or net realizable value. Inventories primarily consist of raw materials, supplies, work-in-process and finished goods, all related to manufacturing, remanufacturing and maintenance, primarily for the Company's lease fleet and its units held for sale. Raw materials principally consist of raw steel, wood, glass, paint, vinyl and other assembly components used in manufacturing and remanufacturing processes. Work-in-process primarily represents units being built that are either pre-sold or being built to add to the Company's lease fleet upon completion. Finished portable storage units primarily represent ISO (International Organization for Standardization) containers held in inventory until the containers are either sold as is, remanufactured and sold, or units in the process of being remanufactured to be compliant with the Company's lease fleet standards before transferring the units to its lease fleet. There is no certainty when the Company purchases the containers whether they will ultimately be sold, remanufactured and sold, or remanufactured and moved into its lease fleet. Units that are determined to go into the Company's lease fleet undergo an extensive remanufacturing process that includes installing its proprietary locking system, signage, painting and sometimes its proprietary security doors. Inventories consist of the following at the dates indicated:

	<b>December 31, 2009</b>	<b>September 30, 2010</b>
	<b>(In thousands)</b>	
Raw material and supplies	\$ 15,750	\$ 15,456
Work-in-process	589	216
Finished portable storage units	5,808	4,845
	<b>\$ 22,147</b>	<b>\$ 20,517</b>

**NOTE H Income Taxes**

The Company files U.S. Federal tax returns, U.S. State tax returns, and foreign tax returns. The Company has identified the Company's U.S. Federal tax return as the Company's major tax jurisdiction. The Company's tax years for 2008 and 2009 are subject to tax examination by the U.S. Internal Revenue Service (IRS) through September 15, 2012 and 2013, respectively. No reserves for uncertain income tax positions have been recorded and the Company did not record a cumulative effect adjustment. The Company does not anticipate that the total amount of unrecognized tax benefit related to any particular tax position will change significantly within the next 12 months.

The Company uses a two-step approach to recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more

likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued**

The Company's policy for recording interest and penalties associated with audits is to record such items as a component of income before taxes. Penalties and associated interest costs, if any, are recorded in leasing, selling and general expenses in the Condensed Consolidated Statements of Income.

**NOTE I Property, Plant and Equipment**

Property, plant and equipment are stated at cost, net of accumulated depreciation. Depreciation is calculated using the straight-line method over the assets' estimated useful lives. Residual values are determined when the property is constructed or acquired and range up to 25%, depending on the nature of the asset. In the opinion of management, estimated residual values do not cause carrying values to exceed net realizable value. Normal repairs and maintenance to property, plant and equipment are expensed as incurred. When property or equipment is retired or sold, the net book value of the asset, reduced by any proceeds, is charged to gain or loss on the retirement of fixed assets and is included in leasing, selling and general expenses in the Condensed Consolidated Statements of Income. Property, plant and equipment consist of the following at the dates indicated:

	<b>December 31, 2009</b>	<b>September 30, 2010</b>
	<b>(In thousands)</b>	
Land	\$ 11,129	\$ 11,116
Vehicles and equipment	76,037	78,769
Buildings and improvements	15,012	14,744
Office fixtures and equipment	26,404	26,923
	128,582	131,552
Less accumulated depreciation	(44,422)	(52,325)
Total property, plant and equipment	\$ 84,160	\$ 79,227

**NOTE J Lease Fleet**

Mobile Mini has a lease fleet primarily consisting of remanufactured and differentiated steel portable storage containers, manufactured steel offices, and wood office units that are leased to customers under short-term operating lease agreements with varying terms. Depreciation is calculated using the straight-line method over the estimated useful life of the Company's units, after the date that the Company put the unit in service, and are depreciated down to their estimated residual values. The Company's steel units are depreciated over 30 years with an estimated residual value of 55%. Wood office units are depreciated over 20 years with an estimated residual value of 50%. Van trailers, which are a small part of the Company's fleet, are depreciated over seven years to a 20% residual value. The Company has other non-core products that have various other measures of useful lives and residual values. Van trailers and other non-core products are only added to the fleet as a result of acquisitions of portable storage businesses.

In the opinion of management, estimated residual values do not cause carrying values to exceed net realizable value. The Company continues to evaluate these depreciation policies as more information becomes available from other comparable sources and the Company's own historical experience. Normal repairs and maintenance to the portable storage and mobile office units are expensed as incurred.

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued**

Lease fleet consists of the following at the dates indicated:

	<b>December 31, 2009</b>	<b>September 30, 2010</b>
	<b>(In thousands)</b>	
Steel storage containers	\$ 618,265	\$ 615,551
Steel and wood offices	530,152	530,738
Van trailers	5,557	4,174
Other (chassis and ancillary products)	2,651	2,705
	1,156,625	1,153,168
Accumulated depreciation	(101,297)	(115,599)
	\$ 1,055,328	\$ 1,037,569

**NOTE K Derivatives**

In the normal course of business, the Company's operations are exposed to fluctuations in interest rates. The Company addresses a portion of these risks through a controlled program of risk management that includes the use of derivative financial instruments. The objective of controlling these risks is to limit the impact of fluctuations in interest rates on earnings.

The Company's primary interest rate risk exposure results from changes in short-term U.S. dollar interest rates. In an effort to manage variable interest rate exposures, the Company may enter into interest rate swap agreements, which convert its floating rate debt to a fixed-rate and which it designates as cash flow hedges. Interest expense on the notional amounts under these agreements is accrued using the fixed rates identified in the swap agreements.

The Company had interest rate swap agreements with an aggregate notional amount of \$200 million at September 30, 2010. The fixed interest rates on the Company's eight swap agreements range from 3.25% to 4.71%, averaging 4.03%. Three swap agreements mature in the fourth quarter of 2010 and five swap agreements mature in 2011.

The following tables summarize information related to the Company's derivatives. All of the Company's derivatives are designated as effective hedging instruments in cash flow hedging relationships.

**Interest Rate Swap Agreements**

	<b>Balance Sheet Location</b>	<b>Fair Value (In thousands)</b>
December 31, 2009	Accrued liabilities	\$ (7,703)
September 30, 2010	Accrued liabilities	\$ (3,407)

**NOTE L Segment Reporting**

The Company has operations in the United States, Canada, the United Kingdom and The Netherlands. All of the Company's branches operate in their local currency and although the Company is exposed to foreign exchange rate fluctuations in other foreign markets where the Company leases and sells the Company's products, the Company does not believe this will have a significant impact on the Company's results of operations. Currently, the Company's branch operation is the only segment that concentrates on the Company's core business of leasing. Financial results of geographic regions are aggregated into one reportable segment since their operations have similar economic characteristics. Each branch has similar economic characteristics covering all products leased or sold, including similar products and services, processes for delivering these services, customer base, sales personnel, advertising, yard facilities, general and administrative costs and the method of branch management. Management's allocation of resources, performance evaluations and operating decisions are not dependent on the mix of a branch's products. The Company does not attempt to allocate shared revenue nor general, selling and leasing expenses to the different configurations of portable storage and office products for lease and sale. The branch operations include the leasing and sales of portable storage units, portable offices and combination units configured for both storage and office space. The Company leases to businesses and consumers in the general geographic area surrounding each branch. Historically, the operation included the Company's manufacturing facilities, which was responsible for the purchase, manufacturing and refurbishment of products for leasing and sale, as well as for manufacturing certain delivery equipment.

In managing the Company's business, management focuses on growing leasing revenues, particularly in existing markets where it can take advantage of the operating leverage inherent in its business model, EBITDA and earnings per share.

Discrete financial data on each of the Company's products is not available and it would be impractical to collect and maintain financial data in such a manner. Accordingly, reportable segment information is the same as contained in the Company's Condensed Consolidated Financial Statements.

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued**

The tables below represent the Company's revenue from customers and long-lived assets, consisting of lease fleet and property, plant and equipment.

Revenues from customers:

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2010</b>	<b>2009</b>	<b>2010</b>
	<b>(In thousands)</b>			
North America (1)	\$ 77,874	\$ 70,126	\$ 243,530	\$ 203,393
United Kingdom	13,454	13,927	41,144	38,288
The Netherlands	758	564	2,500	1,657
Total revenues	\$ 92,086	\$ 84,617	\$ 287,174	\$ 243,338

(1) Includes revenues in the United States of \$77.0 million and \$69.3 million for the three month period and \$241.2 million and \$201.0 million for the nine month period ended September 30, 2009 and 2010, respectively.

Long-lived assets:

	<b>December 31, 2009</b>	<b>September 30, 2010</b>
	<b>(In thousands)</b>	
North America (1)	\$ 1,002,675	\$ 979,095

The Netherlands	4,457	4,129
Total long-lived assets	\$ 1,139,488	\$ 1,116,796

- (1) Includes long lived assets of \$988.9 million and \$965.3 million in the United States at December 31, 2009 and September 30, 2010, respectively.

#### NOTE M Comprehensive Income

Comprehensive income, net of tax, consisted of the following at the dates indicated:

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2010</b>	<b>2009</b>	<b>2010</b>
	<b>(In thousands)</b>			
Net income	\$ 8,120	\$ 5,469	\$ 21,813	\$ 12,658
Net unrealized gain on derivatives	263	957	1,509	2,629
Foreign currency translation adjustment	(2,298)	8,051	8,931	(497)
Total comprehensive income	\$ 6,085	\$ 14,477	\$ 32,253	\$ 14,790

The components of accumulated other comprehensive loss, net of tax, were as follows:

	<b>December 31, 2009</b>	<b>September 30, 2010</b>
	<b>(In thousands)</b>	
Accumulated net unrealized loss on derivatives	\$ (4,733)	\$ (2,104)
Foreign currency translation adjustment	(21,058)	(21,555)
Total accumulated other comprehensive loss	\$ (25,791)	\$ (23,659)

**Table of Contents****MOBILE MINI, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited) Continued****NOTE N Integration, Merger and Restructuring Expenses**

In connection with the acquisition of MSG, the Company recorded accruals for costs to be incurred to exit overlapping MSG lease properties, property shut down costs, costs of MSG's severance agreements, costs for asset verification and for damaged assets. The Company was able to combine the lease fleets of Mobile Mini and MSG and reduce the Company's capital expenditures for the lease fleet going forward. In addition, following the acquisition, the Company restructured its manufacturing operations and reduced overhead. In connection with these activities, the Company recorded costs for severance agreements and recorded impairment charges to write down certain assets previously used in conjunction with the manufacturing operations and inventories.

The following table details accrued integration, merger and restructuring obligations (included in accrued liabilities in the Condensed Consolidated Balance Sheets) and related activity for the period ended September 30, 2010:

	<b>Severance and Benefits</b>	<b>Lease Abandonment Costs</b>	<b>Acquisition Integration</b>	<b>Total</b>
	<b>(In thousands)</b>			
Accrued obligations as of December 31, 2009	\$ 465	\$ 5,742	\$ 3	\$ 6,210
Integration, merger and restructuring expenses	2,057		1,615	3,672
Cash paid	(2,412)	(1,451)	(1,618)	(5,481)
Accrued obligations as of September 30, 2010	\$ 110	\$ 4,291	\$	\$ 4,401

These accrued obligations are expected to be paid out through the year 2014.

The following amounts are included in integration, merger and restructuring expenses for the periods indicated:

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2010</b>	<b>2009</b>	<b>2010</b>
Severance and benefits	\$ 630	\$ 96	\$ 3,859	\$ 2,057
Lease abandonment costs			26	
Acquisition integration	902	422	5,490	1,615
Integration, merger and restructuring expenses	\$ 1,532	\$ 518	\$ 9,375	\$ 3,672

**NOTE O Condensed Consolidating Financial Information  
Supplemental Indentures**

In connection with the acquisition of MSG, Mobile Mini entered into a Supplemental Indenture pursuant to which the New Mobile Mini Guarantors became Guarantors under Mobile Mini's Indenture relating to the Senior Notes. Mobile Mini also entered into the MSG Supplemental Indenture (the MSG Notes) pursuant to which Mobile Mini became an Issuer for all purposes under the MSG Indenture and the New MSG Guarantors became Guarantors for all purposes under the MSG Indenture.

As a result of the Supplemental Indentures described above, the same subsidiaries of the Company are guarantors under each of the MSG Notes and the Senior Notes.

The following tables present the condensed consolidating financial information of Mobile Mini, Inc., representing the subsidiaries of the Guarantors of the Senior Notes and MSG Notes and the Non-Guarantor Subsidiaries. Separate financial statements of the subsidiary guarantors are not presented because the guarantee by each 100% owned subsidiary guarantor is full and unconditional, joint and several, and management has determined that such

information is not material to investors.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

*The following discussion of our financial condition and results of operations should be read together with our December 31, 2009 consolidated financial statements and the accompanying notes thereto which are included in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 1, 2010, and amended on September 27, 2010. This discussion contains forward-looking statements. Forward-looking statements are based on current expectations and assumptions that involve risks and uncertainties. Our actual results may differ materially from those anticipated in our forward-looking statements.*

**Overview**

**General**

We are the world's leading provider of portable storage solutions, with a total lease fleet of approximately 248,900 portable storage and office units at September 30, 2010. We offer a wide range of portable storage products in varying lengths and widths with an assortment of differentiated features such as our patented locking systems, multiple doors, electrical wiring and shelving.

We derive most of our revenues from the leasing of portable storage containers and offices. In addition to our leasing business, we also sell portable storage containers and occasionally sell office units. Our sales revenues represented 10.2% and 9.5% of total revenues for the nine months ended September 30, 2009 and 2010, respectively.

Prior to acquiring Mobile Storage Group (MSG) in 2008, we grew both organically and through smaller acquisitions, which we used to gain a presence in new markets. Traditionally, we enter new markets through the acquisition of the business of a smaller local competitor and then implement our business model, which is usually more focused on customer service and marketing than the acquired business or other market competitors. Given our current utilization levels, we are currently entering new markets through greenfield locations by migrating idle fleet to low-cost operational yards. These greenfield operational yards do not have all the overhead associated with a fully staffed branch as they typically only have drivers and yard personnel to handle deliveries and pick-ups of our fleet. A new location will generally have fairly low operating margins during its early years, but as our marketing efforts help us penetrate the new market and we increase the number of units on rent at the new location, we are typically able to reach company average levels of profitability after several years. The costs associated with opening a greenfield operational yard are lower than a fully staffed branch which should have a comparatively positive effect on margins. When we enter a new market, we incur certain costs in developing new infrastructure. For example, advertising and marketing costs will be incurred and certain minimum levels of staffing and delivery equipment will be put in place regardless of the new market's revenue base. Once we have achieved revenues during any period that are sufficient to cover our fixed expenses, we are able to generate relatively high margins on incremental lease revenues. Therefore, each additional unit rented in excess of the break-even level contributes significantly to profitability. Conversely, any additional fixed expenses require us to achieve additional revenue in order to maintain our margins. When we refer to our operating leverage in this discussion, we are describing the impact on margins once we either cover our fixed costs or if we incur additional fixed costs.

The level of non-residential construction activity is an important external factor that we examine to determine the direction of our business. Customers in the construction industry represented approximately 31% of our leased units at September 30, 2010 and because of the degree of operating leverage we have, increases or decreases in non-residential construction activity can have a significant effect on our operating margins and net income. Beginning in the second quarter of 2008, the level of our construction related business slowed down and then declined. The decline continued and adversely affected our results of operations in 2009. Although it has not returned to pre-2009 levels, the level of our construction related business began to stabilize in 2010.

In managing our business, we focus on growing leasing revenues, particularly in existing markets where we can take advantage of the high operating leverage inherent in our business model. Our goal is to maintain a stable operating margin and, after the economy returns to normalized conditions, a steady growth rate in leasing revenues.

## **Table of Contents**

We are a capital-intensive business, so in addition to focusing on earnings per share, we focus on adjusted EBITDA to measure our operating results. We calculate this number by first calculating EBITDA, which we define as net income before interest expense, debt restructuring or extinguishment expense (if applicable), provision for income taxes, depreciation and amortization. This measure eliminates the effect of financing transactions that we enter into and it provides us with a means to track internally generated cash from which we can fund our interest expense and our lease fleet growth. In comparing EBITDA from year to year, we typically further adjust EBITDA to exclude the effect of what we consider transactions or events not related to our core business operations to arrive at what we define as adjusted EBITDA. The GAAP financial measure that is most directly comparable to EBITDA is net cash provided by operating activities.

Because EBITDA, EBITDA margin, adjusted EBITDA and adjusted EBITDA margin are non-GAAP financial measures as defined by the SEC, we include below in this report reconciliations of EBITDA to the most directly comparable financial measures calculated and presented in accordance with U.S. generally accepted accounting principles.

We present EBITDA and EBITDA margin because we believe it provides useful information regarding our ability to meet our future debt payment requirements, capital expenditures and working capital requirements and that it provides an overall evaluation of our financial condition. EBITDA margin is calculated by dividing consolidated EBITDA by total revenues. The GAAP financial measure that is most directly comparable to EBITDA margin is operating margin, which represents operating income divided by revenues. More emphasis should not be placed on EBITDA margin than the corresponding GAAP measure. In addition, EBITDA is a component of certain financial covenants under our revolving credit facility and is used to determine our available borrowing capacity and the credit facility's applicable interest rate in effect at the end of each measurement period. EBITDA has certain limitations as an analytical tool and should not be used as a substitute for net income, cash flows or other consolidated income or cash flow data prepared in accordance with U.S. generally accepted accounting principles or as a measure of our profitability or our liquidity.

In particular, EBITDA, as defined, does not include:

Interest expense because we borrow money to partially finance our capital expenditures, primarily related to the expansion of our lease fleet, interest expense is a necessary element of our cost to secure this financing to continue generating additional revenues.

Debt restructuring or extinguishment expense as historically defined in our revolving credit facility, debt restructuring or debt extinguishment expenses are not deducted in our various calculations made under our facility and are treated no differently than interest expense. As discussed above, interest expense is a necessary element of our cost to finance a portion of the capital expenditures needed for the growth of our business.

Income taxes EBITDA, as defined, does not reflect income taxes or the requirements for any tax payments.

Depreciation and amortization because we are a leasing company, our business is very capital intensive and we hold acquired assets for a period of time before they generate revenues, cash flow and earnings; therefore, depreciation and amortization expense is a necessary element of our business.

When evaluating EBITDA as a performance measure, and excluding the above-noted charges, all of which have material limitations, investors should consider, among other factors, the following:

increasing or decreasing trends in EBITDA;

how EBITDA compares to levels of debt and interest expense; and

whether EBITDA historically has remained at positive levels.

Because EBITDA, as defined, excludes some but not all items that affect our cash flow from operating activities, EBITDA may not be comparable to similarly titled performance measures presented by other companies.

Adjusted EBITDA represents EBITDA plus the sum of certain transactions that are excluded when internally evaluating our operating performance. Management believes adjusted EBITDA is a more meaningful evaluation and comparison of our core business when comparing period over period results without regard to transactions that potentially distort the performance of our core business operating results.

**Table of Contents**

The table below is a reconciliation of EBITDA to net cash provided by operating activities for the periods indicated:

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2010</b>	<b>2009</b>	<b>2010</b>

EBITDA	36,989	32,478	110,029	91,032
Integration, merger and restructuring expenses, other (1)	1,532	518	9,375	3,942
Adjusted EBITDA	\$ 38,521	\$ 32,996	\$ 119,404	\$ 94,974
EBITDA margin(2)	40.2%	38.4%	38.3%	37.4%
Adjusted EBITDA margin(2)	41.8%	39.0%	41.6%	39.0%

(1) Integration,  
merger and  
restructuring

expenses represent costs that we incurred in connection with the MSG acquisition and the expenses in conjunction with the continued restructuring of our operations and other excludes one-time expenses incurred in the applicable period. Included in these costs are integration, merger and non-cash restructuring expenses of \$.9 million and \$.4 million for the three months ended September 30, 2009 and 2010, respectively and \$6.7 million and \$1.9 million for the nine months ended September 30, 2009 and 2010, respectively. Additionally, we incurred \$1.2 million of integration, merger and non-cash restructuring expenses in the three months ended December 31, 2009.

- (2) EBITDA margin and adjusted EBITDA margin are calculated as EBITDA and adjusted EBITDA, divided by our total revenues expressed as a percentage.

In managing our business, we measure our EBITDA margins from year to year and based upon the size of our branches. We use this comparison, for example, to study internally the effect that increased costs have on our margins. As capital is invested in our established branch locations, we achieve higher EBITDA margins on that capital than we achieve on capital invested to establish a new branch, because our fixed costs are already in place in connection with the established branches. The fixed costs are those associated with yard and delivery equipment, as well as advertising, sales, marketing and office expenses. With a new market or branch, we must first fund and absorb the start-up costs for setting up the new branch facility, hiring and developing the management and sales team and developing our marketing and advertising programs. A new branch will have lower EBITDA margins in its early years until the branch increases the number of units they have on rent. Because this operating leverage creates higher operating margins on incremental lease revenue, which we realize on a branch-by-branch basis when the branch achieves leasing revenues sufficient to cover the branch's fixed costs, leasing revenues in excess of the break-even amount produce large increases in profitability. Conversely, absent growth in leasing revenues, the EBITDA margin at a branch would be expected to remain relatively flat on a period-by-period comparative basis if expenses remained the same or would decrease if fixed costs increased.

**Table of Contents****Accounting and Operating Overview**

Our leasing revenues include all rent and ancillary revenues we receive for our portable storage, combination storage/office and mobile office units. Our sales revenues include sales of these units to customers. Our other revenues consist principally of charges for the delivery of the units we sell. Our principal operating expenses are (1) cost of sales; (2) leasing, selling and general expenses; and (3) depreciation and amortization, primarily depreciation of the portable storage units and portable offices in our lease fleet. Cost of sales is the cost of the units that we sold during the reported period and includes both our cost to buy, transport, remanufacture and modify used ocean-going containers and our cost to manufacture portable storage units and other structures. Leasing, selling and general expenses include, among other expenses, payroll and related payroll costs, advertising and other marketing expenses, real property lease expenses, commissions, repair and maintenance costs of our lease fleet and transportation equipment and corporate expenses for both our leasing and sales activities. Our repairs on wood office units require more maintenance cost than our portable storage units and have become a larger part of our lease fleet repair and maintenance expense over the past several years. Annual repair and maintenance expenses on our leased units have averaged approximately 3.4% of lease revenues over the last three fiscal years and are included in leasing, selling and general expenses. We expense our normal repair and maintenance costs as incurred (including the cost of periodically repainting units).

Our principal asset is our lease fleet, which has historically maintained value close to its original cost. The steel units in our lease fleet (other than van trailers) are depreciated on the straight-line method over our units' estimated useful life of 30 years after the date the unit is placed in service, with an estimated residual value of 55%. The depreciation policy is supported by our historical lease fleet data which shows that we have been able to obtain comparable rental rates and sales prices irrespective of the age of our container lease fleet. Our wood mobile office units are depreciated over 20 years to 50% of original cost. Van trailers, which constitute a small part of our fleet, are depreciated over seven years to a 20% residual value. Van trailers, which are only added to the fleet as a result of acquisitions of portable storage businesses, are of much lower quality than storage containers and consequently depreciate more rapidly. We also have other non-core products that are added to our fleet as a result of acquisitions that have various other measures of useful lives and residual values.

The table below summarizes those transactions that effectively maintained the net book value of our lease fleet at \$1.1 billion at December 31, 2009, and \$1.0 billion at September 30, 2010:

	<b>Dollars (In thousands)</b>	<b>Units</b>
Lease fleet at December 31, 2009, net	\$ 1,055,328	257,208
Purchases:		
Container purchases, including freight	120	24

Other (3)	402	(259)
Cost of sales from lease fleet	(13,154)	(9,024)
Effect of exchange rate changes	(847)	
Depreciation	(14,455)	
Lease fleet at September 30, 2010, net	\$ 1,037,569	248,857

(1) Does not  
include any

routine  
maintenance,  
which is  
expensed as  
incurred.

(2) These units  
include the net  
additional units  
that were the  
result of  
splitting steel  
containers into  
one or more  
shorter units,  
such as splitting  
a 40-foot  
container into  
two 20-foot  
units, or one  
25-foot unit and  
one 15-foot unit  
and include  
units moved  
from finished  
goods to the  
lease fleet.

(3) Includes net  
transfers to and  
from property,  
plant and  
equipment and  
net non-sale  
disposals and  
recoveries of the  
lease fleet.

**Table of Contents**

The table below outlines the composition of our lease fleet (by book value and unit count) at September 30, 2010:

	<b>Book Value (In thousands)</b>	<b>Number of Units</b>	<b>Percentage of Units</b>
Steel storage containers	\$ 615,551	201,173	81%
Steel and wood offices	530,738	41,702	17%
Van trailers	4,174	5,982	2%
Other (chassis and ancillary products)	2,705		
	1,153,168		
Accumulated depreciation	(115,599)		
	\$ 1,037,569	248,857	100%

Appraisals on our fleet are conducted on a regular basis by an independent appraiser selected by our lenders. The appraiser does not differentiate in value based upon the age of the container or the length of time it has been in our fleet. The latest orderly liquidation value appraisal was conducted in April 2010 by AccuVal Associates, Incorporated. Based on this appraisal, on which our borrowings under our revolving credit facility are based, our lease fleet liquidation appraisal value as of September 30, 2010, is approximately \$821.5 million.

During the last five fiscal years, our annual utilization levels averaged 75.9% and ranged from a low of 59.2% in 2009 to a high of 82.9% in 2005. Historically our utilization is somewhat seasonal, with the low normally being realized in the first quarter and the high realized in the fourth quarter of each year. However, with the challenging economic business environment we have seen a decline in our utilization rates compared to the same period in the prior year. Our average utilization rate for the third quarter of 2010 was 53.3%, compared to 56.9% in the third quarter of 2009. Our third quarter utilization rate progressed during the quarter and increased to 54.1% at September 30, 2010.

**RESULTS OF OPERATIONS**

**Three Months Ended September 30, 2010, Compared to  
Three Months Ended September 30, 2009**

Total revenues for the quarter ended September 30, 2010 decreased by \$7.5 million, or 8.1%, to \$84.6 million from \$92.1 million for the same period in 2009. Leasing revenues for the quarter decreased by \$6.5 million, or 7.9%, to \$75.6 million from \$82.1 million for the same period in 2009. This decrease in leasing revenues resulted from a 10.3% reduction in the average number of units on lease, driven by the weak economy and the general decline in the level of non-residential construction activity. This decrease was partially offset by a 2.7% increase in our yield that was primarily driven by increases in ancillary income and product mix. Our sales of portable storage and office units for the quarter ended September 30, 2010 decreased by 12.5%, to \$8.3 million from \$9.5 million during the same period in 2009. The decrease in sales revenues primarily reflects the general reduction in business activity relating to weak economic conditions. Leasing revenues, as a percentage of total revenues for the quarters ended September 30, 2010 and 2009, were 89.3% and 89.2%, respectively. Our leasing business continues to be our primary focus and leasing revenues have and continue to be the predominant part of our revenue mix.

Cost of sales is the cost related to our sales revenues only. Cost of sales was 64.9% and 65.5% of sales revenue for the quarters ended September 30, 2010 and 2009, respectively. Our gross margins increased to 35.1% for the quarter ended September 30, 2010, compared to 34.5% for the same period in 2009.

Leasing, selling and general expenses decreased \$1.1 million, or 2.4%, to \$46.2 million for the quarter ended September 30, 2010, from \$47.3 million for the same period in 2009. This decrease is primarily due to large reductions in our workforce and migrating a number of our branches to lower cost operational yards. In addition to a reduction in payroll costs, we benefited from lower insurance and advertising costs as compared to the prior period. Integration, merger and restructuring expenses decreased \$1.0 million to \$0.5 million for the quarter ended September 30, 2010 from \$1.5 million for the quarter ended September 30, 2009. These expenses primarily represent

costs associated with reductions to our workforce, costs for repositioning our assets and a reduction in our manufacturing operations. Other continuing costs related to integration, merger and restructuring will be expensed as incurred.

## **Table of Contents**

Adjusted EBITDA, decreased \$5.5 million, or 14.3%, to \$33.0 million, compared to \$38.5 million for the same period in 2009. Adjusted EBITDA margins were 39.0% and 41.8% of total revenues for the three months ended September 30, 2010 and 2009, respectively. The decrease is due to a decline in revenues, which were partially offset by our cost cutting efforts.

Depreciation and amortization expenses decreased \$0.5 million, or 5.2%, to \$8.7 million in the quarter ended September 30, 2010, compared to \$9.2 million during the same period in 2009. The decrease is attributable to the reduced scope of our manufacturing operations and reductions in our lease fleet, and is partially offset by investment in additional technology and communication equipment and delivery equipment.

Interest expense decreased \$0.4 million to \$14.2 million for the quarter ended September 30, 2010, compared to \$14.6 million for the same period in 2009. This decrease is primarily attributable to lower average debt outstanding during the quarter, principally due to the use of operating cash flow to reduce our debt over the last 12 months. The weighted average interest rate on our debt for the three months ended September 30, 2010 was 6.7% compared to 6.2% for the three months ended September 30, 2009, excluding amortizations of debt issuance and other costs.

Taking into account the amortizations of debt issuance and other costs, the weighted average interest rate was 7.2% in the 2010 quarter compared to 6.8% in the 2009 quarter.

Deferred financing costs write-off in 2010 represents that portion of deferred financing costs associated with the \$50.0 million Company elected reduction in the ABL Credit Agreement. See Liquidity and Capital Resources Revolving Credit Facility.

Provision for income taxes was based on our annual estimated effective tax rate. The tax rate for the quarter ended September 30, 2010 was 39.5%, compared to 38.3% during the same period in 2009. Our consolidated tax provision includes the expected tax rates for our operations in the United States, Canada, United Kingdom and The Netherlands. Net income for the three months ended September 30, 2010 was \$5.5 million compared to net income of \$8.1 million for the same period in 2009. Our third quarter net income results include integration, merger and restructuring expenses of \$0.5 million and \$1.5 million (approximately \$0.3 million and \$1.0 million after tax), for the three months ended September 30, 2010 and 2009, respectively.

### **Nine Months Ended September 30, 2010, Compared to Nine Months Ended September 30, 2009**

Total revenues for the nine months ended September 30, 2010 decreased by \$43.9 million, or 15.3%, to \$243.3 million from \$287.2 million for the same period in 2009. Leasing revenues for the nine months decreased by \$37.3 million, or 14.6%, to \$218.7 million from \$256.0 million for the same period in 2009. This decrease in leasing revenues resulted from a 17.3% reduction in the average number of units on lease, driven by the weak economy and the general decline in the level of non-residential construction activity. This decrease was partially offset by a 3.3% increase in our yield that was primarily driven by increases in ancillary income and product mix. Our sales of portable storage and office units for the nine months ended September 30, 2010 decreased by 21.4%, to \$23.1 million from \$29.4 million during the same period in 2009. The decrease in sales revenues primarily reflects the general reduction in business activity relating to weak economic conditions. Leasing revenues, as a percentage of total revenues for the nine months ended September 30, 2010 and 2009, were 89.9% and 89.1%, respectively. Our leasing business continues to be our primary focus and leasing revenues have and continue to be the predominant part of our revenue mix.

Cost of sales is the cost related to our sales revenues only. Cost of sales was 66.0% and 67.0% of sales revenue for the nine months ended September 30, 2010 and 2009, respectively. Our gross margins increased 1.0 percentage point to 34.0% for the nine months ended September 30, 2010, compared to 33.0% for the same period in 2009.

Leasing, selling and general expenses decreased \$14.6 million, or 9.9%, to \$133.4 million for the nine months ended September 30, 2010, from \$148.0 million for the same period in 2009. This decrease is primarily due to large reductions in our workforce and migrating a number of our branches to lower cost operational yards. In addition to a reduction in payroll costs, we benefited from lower insurance and advertising costs as compared to the prior period.

## **Table of Contents**

Integration, merger and restructuring expenses for the nine months ended September 30, 2010 were \$3.7 million compared to \$9.4 million for the same period in 2009. These expenses primarily represent costs associated with reductions to our workforce, costs for repositioning our assets and a reduction in our manufacturing operations. Other continuing costs related to integration, merger and restructuring will be expensed as incurred.

Adjusted EBITDA, decreased \$24.4 million, or 20.5%, to \$95.0 million, compared to \$119.4 million for the same period in 2009. Adjusted EBITDA margins were 39.0% and 41.6% of total revenues for the nine months ended September 30, 2010 and 2009, respectively. The decrease is due to a decline in revenues, which were partially offset by our cost cutting efforts.

Depreciation and amortization expenses decreased \$3.0 million, or 10.0%, to \$26.9 million in the nine months ended September 30, 2010, compared to \$29.9 million during the same period in 2009. The decrease is attributable to the reduced scope of our manufacturing operations and reductions in our lease fleet, and is partially offset by investment in additional technology and communication equipment and delivery equipment.

Interest expense decreased \$1.7 million to \$43.1 million for the nine months ended September 30, 2010, compared to \$44.8 million for the same period in 2009. This decrease is primarily attributable to lower average debt outstanding during the quarter, principally due to the use of operating cash flow to reduce our debt over the last 12 months. The weighted average interest rate on our debt for the nine months ended September 30, 2010 was 6.6% compared to 6.2% for the nine months ended September 30, 2009, excluding amortizations of debt issuance and other costs. Taking into account the amortizations of debt issuance and other costs, the weighted average interest rate was 7.2% in 2010 and was 6.7% in 2009.

Deferred financing costs write-off in 2010 represents that portion of deferred financing costs associated with the \$50.0 million Company elected reduction in the ABL Credit Agreement. See Liquidity and Capital Resources Revolving Credit Facility.

Provision for income taxes was based on our annual estimated effective tax rate. The tax rate for the nine months ended September 30, 2010 was 38.1%, compared to 38.2% during the same period in 2009. Our consolidated tax provision includes the expected tax rates for our operations in the United States, Canada, United Kingdom and The Netherlands.

Net income for the nine months ended September 30, 2010 was \$12.7 million compared to net income of \$21.8 million for the same period in 2009. Net income results include integration, merger and restructuring expenses of \$3.7 million and \$9.4 million, (approximately \$2.3 million and \$5.8 million after tax) for the nine months ended September 30, 2010 and 2009, respectively.

## **LIQUIDITY AND CAPITAL RESOURCES**

Leasing is a capital-intensive business that requires us to acquire assets before they generate revenues, cash flow and earnings. The assets that we lease have very long useful lives and require relatively little recurrent maintenance expenditures. Most of the capital we have historically deployed in our leasing business has been used to expand our operations geographically, to increase the number of units available for lease at our leasing locations, and to add to the mix of products we offer. During recent years, our operations have generated annual cash flow that exceeds our pre-tax earnings, particularly due to cash flow from operations and the deferral of income taxes caused by accelerated depreciation that is used for tax accounting. In 2008 and 2009, we were cash flow positive (after capital expenditures but excluding acquisitions). This positive cash flow trend has continued for the nine month period ended September 30, 2010.

During the past three years, our capital expenditures and acquisitions have been funded by our operating cash flow and from borrowings under our revolving credit facility. Our operating cash flow is generally weakest during the first quarter of each fiscal year, when customers who leased containers for holiday storage return the units and as a result of seasonal weather in some of our markets. During 2009 and the nine months ended September 30, 2010, we cut back significantly on our capital expenditures and were able to fund these expenditures with cash flow from operations. We currently expect this trend to continue throughout 2010. In addition to cash flow generated by operations, our principal current source of liquidity is our revolving credit facility described below.

## **Table of Contents**

*Revolving Credit Facility.* On June 27, 2008, we entered into a \$900.0 million ABL Credit Agreement (the Credit Agreement) with Deutsche Bank AG New York Branch and the other lenders party thereto. In August 2010, we entered into a Second Amendment to the Credit Agreement that, among other things, allows a permitted refinancing of our senior notes as well as restricted payments and acquisitions to occur without financial covenant restrictions provided we have \$250 million in pro forma excess borrowing availability (as defined in the Credit Agreement). We also elected to reduce the Credit Agreement by \$50.0 million to \$850.0 million, which reduces our ongoing unused line fees. All amounts outstanding under the Credit Agreement are due on June 27, 2013. The obligations of Mobile Mini and our subsidiary guarantors under the Credit Agreement are secured by a blanket lien on substantially all of our assets. At September 30, 2010, we had approximately \$433.1 million of borrowings outstanding and \$352.0 million of additional borrowing availability under the Credit Agreement, based upon borrowing base calculations as of such date. We were in compliance with the terms of the Credit Agreement as of September 30, 2010.

Amounts borrowed under the Credit Agreement and repaid during the term may be reborrowed. Outstanding amounts under the Credit Agreement will bear interest, at our option, at either (i) LIBOR plus a defined margin, or (ii) the Agent bank's prime rate plus a margin. The applicable margins for each type of loan will range from 2.25% to 2.75% for LIBOR loans and 0.75% to 1.25% for base rate loans depending upon our debt ratio, as defined in the Credit Agreement, at the measurement date. Based on our debt ratio at September 30, 2010, our applicable interest rate margins for LIBOR loans will be LIBOR plus 2.75% and prime plus 1.25% for base rate loans until the next measurement date which is the end of each fiscal quarter and becomes effective the month following management's communication to the lenders.

The Credit Agreement provides for U.K. borrowings, denominated in either Pounds Sterling or Euros, by the Company's subsidiary Mobile Mini U.K. Limited, based upon a U.K. borrowing base and additionally supported by the U.S. and Canada borrowing base, if necessary. For U.S. borrowings, which are denominated in U.S. dollars, the borrowing base is based upon a U.S. and Canada borrowing base.

Availability of borrowings under the Credit Agreement is subject to a borrowing base calculation based upon a valuation of our eligible accounts receivable, eligible container fleet, eligible inventory (including containers held for sale, work-in-process and raw materials), machinery and equipment and real property, each multiplied by an applicable advance rate or limit.

*Senior Notes.* The Company and its subsidiary, Mobile Storage Group, Inc. (MSG) has two series of outstanding senior notes: the Company's \$150 million aggregate principal amount of 6.875% senior notes due 2015 (the Mobile Mini Notes) and its \$200 million aggregate principal amount of 9.750% senior notes originally issued by Mobile Storage Group, Inc. due 2014 (the MSG Notes) and together with the Mobile Mini Notes, the Senior Notes). As of the date hereof, \$150.0 million of the Mobile Mini Notes and \$192.9 million of the MSG Notes remain outstanding.

In connection with the acquisition of MSG, Mobile Mini entered into a supplemental indenture pursuant to which MSG's guarantor subsidiaries under the MSG Notes became Guarantors under the Mobile Mini Notes. Similarly, Mobile Mini entered into a supplemental Indenture pursuant to which Mobile Mini became an Issuer under the MSG Notes and Mobile Mini's guarantor subsidiaries under the Mobile Mini Notes became Guarantors for all purposes under the MSG Notes.

As a result of the supplemental indentures described above, the same subsidiaries of the Company are guarantors under each of the MSG Notes and the Mobile Mini Notes.

The Senior Notes include covenants, indemnities and events of default that are customary for indentures of this type, including restrictions on the incurrence of additional debt, sales of assets and payment of dividends. Management does not believe that the covenants in the Senior Notes limit the Company's ability to pursue its intended business strategy or its future financing needs. We were in compliance with the covenants of the Senior Notes as of September 30, 2010.

As discussed above, the August 2010 Second Amendment to the Credit Agreement provides, among other things, for a permitted refinancing of our Senior Notes under certain conditions.

*Operating Activities.* Our operations provided net cash flow of \$42.2 million for the nine months ended September 30, 2010, compared to \$68.6 million during the same period in 2009. The \$26.4 million decrease in cash provided by

operations primarily resulted from changes in working capital and a decrease in net income from fewer units on rent, after giving effect to non-cash items. We used this net cash flow to fund operations and repay debt.

## **Table of Contents**

*Investing Activities.* Net cash provided by investing activities was \$5.4 million for the nine months ended September 30, 2010, compared to \$1.7 million for the same period in 2009. Capital expenditures for our lease fleet were \$11.2 million and proceeds from sale of lease fleet units were \$20.3 million for the nine months ended September 30, 2010, compared to capital expenditures of \$16.5 million and proceeds of \$25.4 million for the same period in 2009. Our capital expenditures for our lease fleet decreased 32.0% in the first nine months of 2010, compared to the same period in 2009 as we remanufactured fewer units due to our utilization rate. As a result of the current economic conditions, we anticipate our near-term investing activities will be primarily focused on remanufacturing units acquired in acquisitions to meet our lease fleet standards as these units are placed on lease. Capital expenditures for property, plant and equipment, net of proceeds from sales of property, plant and equipment, were \$3.7 million for the nine months ended September 30, 2010, compared to \$7.3 million for the same period in 2009. The amount of cash that we use during any period in investing activities is almost entirely within management's discretion. We have no contracts or other arrangements pursuant to which we are required to purchase a fixed or minimum amount of capital goods in connection with any portion of our business.

*Financing Activities.* Net cash used in financing activities was \$47.9 million during the nine months ended September 30, 2010 compared to \$62.9 million for the same period in 2009. During the nine months ended September 30, 2010, we made net repayments of \$48.8 million of debt.

At September 30, 2010, we have interest rate swap agreements under which we effectively fixed the interest rate payable on \$200.0 million of borrowings under our Credit Agreement so that the rate is based upon a spread from a fixed rate, rather than a spread from the LIBOR rate. The fair value of our interest rate swap agreements resulted in amounts being recognized in other comprehensive income for the nine months ended September 30, 2010, of \$2.6 million net of applicable income taxes of \$1.7 million.

## **CONTRACTUAL OBLIGATIONS AND COMMITMENTS**

Our contractual obligations primarily consist of our outstanding balance under our revolving credit facility and \$340.0 million of Senior Notes, (net of unamortized discounts of \$2.8 million) together with other unsecured notes payable obligations and obligations under capital leases. We also have operating lease commitments for: (1) real estate properties for the majority of our locations with remaining lease terms typically ranging from 1 to 16 years; (2) delivery, transportation and yard equipment, typically under a five-year lease with purchase options at the end of the lease term at a stated or fair market value price; and (3) office related equipment.

At September 30, 2010, primarily in connection with the issuance of our insurance policies, we provided certain insurance carriers and others with approximately \$12.0 million in letters of credit.

We currently do not have any obligations under purchase agreements or commitments. Historically, we have entered into capitalized lease obligations from time to time and as a result of the acquisition of MSG, have commitments for \$3.0 million in remaining capital lease obligations at September 30, 2010.

## **OFF-BALANCE SHEET TRANSACTIONS**

We do not maintain any off-balance sheet transactions, arrangements, obligations or other relationships with unconsolidated entities or others that are reasonably likely to have a material current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

## **SEASONALITY**

Demand from some of our customers is somewhat seasonal. Demand for leases of our portable storage units by large retailers is stronger from September through December because these retailers need to store more inventory for the holiday season. These retailers usually return these leased units to us early in the following year. This seasonality has historically caused lower utilization rates for our lease fleet and a marginal decrease in cash flow during the first quarter of each year. Over the last few years, we reduced the percentage of our units we reserve for this seasonal business in comparison with the levels we allocated in earlier years, decreasing the impact of this seasonality on our operations.

## **EFFECTS OF INFLATION**

Our results of operations for the periods discussed in this report have not been significantly affected by inflation.

**Table of Contents****CRITICAL ACCOUNTING POLICIES, ESTIMATES AND JUDGMENTS**

Our significant accounting policies are disclosed in Note 1 to our consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009. The following discussion addresses our most critical accounting policies, some of which require significant judgment.

Our consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles, or GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses during the reporting period. These estimates and assumptions are based upon our evaluation of historical results and anticipated future events, and these estimates may change as additional information becomes available. The SEC defines critical accounting policies as those that are, in management's view, most important to our financial condition and results of operations and those that require significant judgments and estimates. Management believes that our most critical accounting policies relate to:

*Revenue Recognition.* Lease and leasing ancillary revenues and related expenses generated under portable storage and mobile office units are recognized on a straight-line basis. Delivery and hauling revenues and expenses from our portable storage and mobile office units are recognized when these services are earned. We recognize revenues from sales of containers and mobile office units upon delivery when the risk of loss passes, the price is fixed and determinable and collectability is reasonably assured. We sell our products pursuant to sales contracts stating the fixed sales price with our customers.

*Share-Based Compensation.* We account for share-based compensation using the modified-prospective-transition method and recognize the fair-value of share-based compensation transactions in the consolidated statements of income. The fair value of our share-based awards is estimated at the date of grant using the Black-Scholes option pricing model. The Black-Scholes valuation calculation requires us to estimate key assumptions such as future stock price volatility, expected terms, risk-free rates and dividend yield. Expected stock price volatility is based on the historical volatility of our stock. We use historical data to estimate option exercises and employee terminations within the valuation model. The expected term of options granted is derived from an analysis of historical exercises and remaining contractual life of stock options, and represents the period of time that options granted are expected to be outstanding. The risk-free interest rate is based on the U.S. Treasury yield in effect at the time of grant. We historically have not paid cash dividends, and do not currently intend to pay cash dividends, and thus have assumed a 0% dividend rate. If our actual experience differs significantly from the assumptions used to compute our share-based compensation cost, or if different assumptions had been used, we may have recorded too much or too little share-based compensation cost. In the past we have issued stock options and restricted stock, which we also refer to as nonvested share-awards. For stock options and nonvested share-awards subject solely to service conditions, we recognize expense using the straight-line method. For nonvested share-awards subject to service and performance conditions, we are required to assess the probability that such performance conditions will be met. If the likelihood of the performance condition being met is deemed probable, we will recognize the expense using the accelerated attribution method. In addition, for both stock options and nonvested share-awards, we are required to estimate the expected forfeiture rate of our stock grants and only recognize the expense for those shares expected to vest. If the actual forfeiture rate is materially different from our estimate, our share-based compensation expense could be materially different. We had approximately \$0.2 million of total unrecognized compensation costs related to stock options at September 30, 2010 that are expected to be recognized over a weighted-average period of 0.6 years and \$17.5 million of total unrecognized compensation costs related to nonvested share-awards at September 30, 2010 that are expected to be recognized over a weighted-average period 2.9 years. See Note F to the Condensed Consolidated Financial Statements for a further discussion on share-based compensation.

**Table of Contents**

*Allowance for Doubtful Accounts.* We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We establish and maintain reserves against estimated losses based upon historical loss experience and evaluation of past due accounts receivable. Management reviews the level of the allowances for doubtful accounts on a regular basis and adjusts the level of the allowances as needed. If we were to increase the factors used for our reserve estimates by 25%, it would have the following approximate effect on our net income and diluted earnings per share:

	<b>Three Months Ended</b>		<b>Nine Months Ended</b>	
	<b>September 30,</b>		<b>September 30,</b>	
	<b>2009</b>	<b>2010</b>	<b>2009</b>	<b>2010</b>
	<b>(In thousands except per share data)</b>			
As Reported:				
Net income	\$ 8,120	\$ 5,469	\$ 21,813	\$ 12,658
Diluted earnings per share	\$ 0.19	\$ 0.12	\$ 0.51	\$ 0.29

As adjusted for change in estimates:

Net income	\$ 8,063	\$ 5,417	\$ 21,530	\$ 12,398
Diluted earnings per share	\$ 0.19	\$ 0.12	\$ 0.50	\$ 0.28

If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances could be required.

*Impairment of Goodwill.* We assess the impairment of goodwill and other identifiable intangibles on an annual basis or whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Some factors we consider important that could trigger an impairment review include the following:

significant under-performance relative to historical, expected or projected future operating results;

significant changes in the manner of our use of the acquired assets or the strategy for our overall business;

our market capitalization relative to net book value; and

significant negative industry or general economic trends.

We operate one reportable segment, which is comprised of three operating segments that also represent our reporting units (North America, the U.K. and The Netherlands). All of our goodwill was allocated among these three reporting units. We perform an annual impairment test on goodwill at December 31 using the two-step process required under GAAP. The first step is a screen for potential impairment, while the second step measures the amount of the impairment, if any. In addition, we will perform impairment tests during any reporting period in which events or changes in circumstances indicate that an impairment may have incurred. At September 30, 2010, there were no significant negative changes to the future projected cash flows or to the general or specific economic trends since the last annual test indicating the need for testing goodwill recoverability. At December 31, 2009, we performed the first step of the two-step impairment test and compared the fair value of each reporting unit to its carrying value. In assessing the fair value of the reporting units, we considered both the market approach and the income approach. Under the market approach, the fair value of the reporting unit is based on quoted market prices of companies comparable to the reporting unit being valued. Under the income approach, the fair value of the reporting unit is based on the present value of estimated cash flows. The income approach is dependent on a number of significant management assumptions, including estimated future revenue growth rates, gross margins on sales, operating margins, capital expenditures, tax payments and discount rates. Each approach was given equal weight in arriving at the fair value of the reporting unit. As of December 31, 2009, none of the reporting units with goodwill had estimated fair values less than their individual net asset carrying values, therefore step two was not required.

In step two of the impairment test, we are required to determine the implied fair value of the goodwill and compare it to the carrying value of the goodwill. We allocated the fair value of the reporting units to the respective assets and

liabilities of each reporting unit as if the reporting units had been acquired in separate and individual business combinations and the fair value of the reporting units was the price paid to acquire the reporting units. The excess of the fair value of the reporting units over the amounts assigned to their respective assets and liabilities is the implied fair value of goodwill. We reconciled the fair values of our three reporting units in the aggregate to our market capitalization at December 31, 2009.

*Impairment of Long-Lived Assets.* We review property, plant and equipment and intangibles with finite lives (those assets resulting from acquisitions) for impairment when events or circumstances indicate these assets might be impaired. We test impairment using historical cash flows and other relevant facts and circumstances as the primary basis for our estimates of future cash flows. This process requires the use of estimates and assumptions, which are subject to a high degree of judgment. If these assumptions change in the future, whether due to new information or other factors, we may be required to record impairment charges for these assets.

**Table of Contents**

**Depreciation Policy.** Our depreciation policy for our lease fleet uses the straight-line method over the estimated useful life of our units, after the date that we put the unit in service. Our steel units are depreciated over 30 years with an estimated residual value of 55%. Wood offices units are depreciated over 20 years with an estimated residual value of 50%. Van trailers, which are a small part of our fleet, are depreciated over 7 years to a 20% residual value. We have other non-core products that have various other measures of useful lives and residual values. Van trailers and other non-core products are only added to the fleet as a result of acquisitions of portable storage businesses.

We periodically review our depreciation policy against various factors, including the results of our lenders independent appraisal of our lease fleet, practices of other competitors in our industry, profit margins we are achieving on sales of depreciated units and lease rates we obtain on older units. If we were to change our depreciation policy on our steel units from a 55% residual value and a 30-year life to a lower or higher residual value and a shorter or longer useful life, such change could have a positive, negative or neutral effect on our earnings, with the actual effect being determined by the change. For example, a change in our estimates used in our residual values and useful life would have the following approximate effect on our net income and diluted earnings per share as reflected in the table below.

	Salvage Value	Useful Life in Years	Three Months Ended September 30,		Nine Months Ended September 30,	
			2009	2010	2009	2010
(In thousands except per share data)

April 2009

(2) Prior to  
April 2009

**Insurance Reserves.** Our worker's compensation, auto and general liability insurance are purchased under large deductible programs. Our current per incident deductibles are: worker's compensation \$250,000, auto \$500,000 and general liability \$100,000. We provide for the estimated expense relating to the deductible portion of the individual

claims. However, we generally do not know the full amount of our exposure to a deductible in connection with any particular claim during the fiscal period in which the claim is incurred and for which we must make an accrual for the deductible expense. We make these accruals based on a combination of the claims development experience of our staff and our insurance companies, and, at year end, the accrual is reviewed and adjusted, in part, based on an independent actuarial review of historical loss data and using certain actuarial assumptions followed in the insurance industry.

## **Table of Contents**

A high degree of judgment is required in developing these estimates of amounts to be accrued, as well as in connection with the underlying assumptions. In addition, our assumptions will change as our loss experience is developed. All of these factors have the potential for significantly impacting the amounts we have previously reserved in respect of anticipated deductible expenses, and we may be required in the future to increase or decrease amounts previously accrued.

Our health benefit programs are considered to be self insured products; however, we buy excess insurance coverage that limits our medical liability exposure. Additionally, our medical program includes a total aggregate claim exposure and we are currently accruing and reserving to the total projected losses.

*Contingencies.* We are a party to various claims and litigation in the normal course of business. Management's current estimated range of liability related to various claims and pending litigation is based on claims for which our management can determine that it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. Because of the uncertainties related to both the probability of incurred and possible range of loss on pending claims and litigation, management must use considerable judgment in making reasonable determination of the liability that could result from an unfavorable outcome. As additional information becomes available, we will assess the potential liability related to our pending litigation and revise our estimates. Such revisions in our estimates of the potential liability could materially impact our results of operation. We do not anticipate the resolution of such matters known at this time will have a material adverse effect on our business or consolidated financial position.

*Deferred Taxes.* In preparing our consolidated financial statements, we recognize income taxes in each of the jurisdictions in which we operate. For each jurisdiction, we estimate the actual amount of taxes currently payable or receivable as well as deferred tax assets and liabilities attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which these temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

A valuation allowance is provided for those deferred tax assets for which it is more likely than not that the related benefits will not be realized. In determining the amount of the valuation allowance, we consider estimated future taxable income as well as feasible tax planning strategies in each jurisdiction. If we determine that we will not realize all or a portion of our deferred tax assets, we will increase our valuation allowance with a charge to income tax expense or offset goodwill if the deferred tax asset was acquired in a business combination. Conversely, if we determine that we will ultimately be able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced with a credit to income tax expense except if the valuation allowance was created in conjunction with a tax asset in a business combination.

*Purchase Accounting.* We account for acquisitions under the purchase method. Under the purchase method of accounting, the price paid by us, including the value of the redeemable convertible preferred stock, if any, is allocated to the assets acquired and liabilities assumed based upon the estimated fair values of the assets and liabilities acquired and the fair value of the convertible redeemable participating preferred stock issued at the date of acquisition. The excess of the purchase price over the fair value of the net assets and liabilities acquired represents goodwill that is subject to annual impairment testing.

*Earnings Per Share.* Basic net income per share is calculated by dividing income allocable to common stockholders by the weighted-average number of common shares outstanding, net of shares subject to repurchase by us during the period. Income allocable to common stockholders is net income less the earnings allocable to preferred stockholders. Diluted net income per share is calculated under the if-converted method unless the conversion of the preferred stock is anti-dilutive to basic net income per share. To the extent the inclusion of preferred stock is anti-dilutive, we calculate diluted net income per share under the two-class method. Potential common shares include restricted common stock and incremental shares of common stock issuable upon the exercise of stock options and vesting of nonvested stock awards and upon conversion of convertible preferred stock using the treasury stock method.

There have been no changes in our critical accounting policies, estimates and judgments during the nine month period ended September 30, 2010.

**Table of Contents**

**RECENT ACCOUNTING PRONOUNCEMENTS**

*Transfers of Financial Assets.* In June 2009, the FASB issued guidance that changes the information a reporting entity provides in its financial statements about the transfer of financial assets and continuing interests held in transferred financial assets. The standard amends previous accounting guidance by removing the concept of qualified special purpose entities. This accounting standard became effective for the Company for transfers occurring on or after January 1, 2010. The Company adopted this accounting standard and it did not have a material effect on our consolidated financial statements and related disclosures.

*Multiple Element Arrangements.* In September 2009, the FASB issued new accounting guidance related to the revenue recognition of multiple element arrangements. The new guidance states that if vendor specific objective evidence or third party evidence for deliverables in an arrangement cannot be determined, companies will be required to develop a best estimate of the selling price to separate deliverables and allocate arrangement consideration using the relative selling price method. This guidance is effective for the Company for arrangements entered into after January 1, 2011. The Company currently does not expect this to have a material impact on its financial statements and disclosures.

**CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING STATEMENTS**

This section and other sections of this report contain forward-looking information about our financial results and estimates and our business prospects that involve substantial risks and uncertainties. From time to time, we also may provide oral or written forward-looking statements in other materials we release to the public. Forward-looking statements are expressions of our current expectations or forecasts of future events. You can identify these statements by the fact that they do not relate strictly to historic or current facts. They include words such as anticipate , estimate , expect , project , intend , plan , believe , will , and other words and terms of similar meaning in connection with a discussion of future operating or financial performance. In particular these include statements relating to future actions, future performance or results, expenses, the outcome of contingencies, such as legal proceedings and financial results. Factors that could cause actual results to differ materially from projected results include, without limitation:

- a continued economic slowdown in the U.S. and/or the U.K. that affects any significant portion of our customer base, or the geographic regions where we operate in those countries;

- our ability to manage growth at existing or new locations;

- our European operations may divert our resources from other aspects of our business;

- our ability to obtain borrowings under our credit facility or additional debt or equity financing on acceptable terms;

- changes in the supply and price of used containers;

- changes in the supply and cost of the raw materials we use in refurbishing or remanufacturing storage units;

- competitive developments affecting our industry, including pricing pressures in newer markets;

- the timing and number of new branches that we open or acquire;

- our ability to protect our patents and other intellectual property;

- currency exchange and interest rate fluctuations;

- governmental laws and regulations affecting domestic and foreign operations, including tax obligations, union formation and zoning laws;

- changes in generally accepted accounting principles;

- changes in local zoning laws affecting either our ability to operate in certain areas or our customer's ability to use our products;

- any changes in business, political and economic conditions due to the threat of future terrorist activity in the U.S. and other parts of the world and related U.S. military action overseas; and

- increases in costs and expenses, including the cost of raw materials, real estate and employment costs.

We cannot guarantee that any forward-looking statement will be realized, although we believe we have been prudent in our plans and assumptions. Achievement of future results is subject to risks, uncertainties and inaccurate assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could vary materially from past results and those anticipated, estimated or projected. Investors should bear this in mind as they consider forward-looking statements. We undertake no obligation to

publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our Form 10-Q, 8-K and 10-K reports filed with the SEC. Our Form 10-K filing for the fiscal year ended December 31, 2009, listed various important factors that could cause actual results to differ materially from expected and historic results. We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. Readers can find them in Item 1A of that filing and this filing under the heading

## **Table of Contents**

**Risk Factors** . You may obtain a copy of our Form 10-K by requesting it from the Company's Investor Relations Department at (480) 894-6311 or by mail to Mobile Mini, Inc., 7420 S. Kyrene Road, Suite 101, Tempe, Arizona 85283. Our filings with the SEC, including the Form 10-K, may be accessed through Mobile Mini's website at [www.mobilemini.com](http://www.mobilemini.com), and at the SEC's website at <http://www.sec.gov>. Material on our website is not incorporated in this report, except by express incorporation by reference herein.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

*Interest Rate Swap Agreement.* We seek to reduce earnings and cash flow volatility associated with changes in interest rates through a financial arrangement intended to provide a hedge against a portion of the risks associated with such volatility. We continue to have exposure to such risks to the extent they are not hedged.

Interest rate swap agreements are the only instruments we use to manage interest rate fluctuations affecting our variable rate debt. At September 30, 2010, we had interest rate swap agreements under which we pay a fixed rate and receive a variable interest rate on a notional amount of \$200 million. For the nine months ended September 30, 2010, comprehensive income included \$2.6 million, net of applicable income taxes of \$1.7 million, related to the fair value of our interest rate swap agreements.

*Impact of Foreign Currency Rate Changes.* We currently have branch operations outside the United States and we bill those customers primarily in their local currency which is subject to foreign currency rate changes. Our operations in Canada are billed in the Canadian Dollar, operations in the United Kingdom are billed in Pound Sterling and operations in The Netherlands are billed in the Euro. We are exposed to foreign exchange rate fluctuations as the financial results of our non-United States operations are translated into U.S. Dollars. The impact of foreign currency rate changes has historically been insignificant with our Canadian operations, but we have more exposure to volatility with our European operations. In order to help minimize our exchange rate gain and loss volatility, we finance our European entities through our revolving credit facility which allows us, at our option, to borrow funds locally in Pound Sterling denominated debt.

### **ITEM 4. CONTROLS AND PROCEDURES**

*Evaluation of Disclosure Controls and Procedures.*

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that, as of the end of the period covered by this quarterly report on Form 10-Q, the Company's disclosure controls and procedures, subject to the limitations as noted below, were effective such that the information relating to the Company required to be disclosed in our SEC reports (i) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (ii) is accumulated and communicated to the Company's management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

*Changes in Internal Controls.*

There were no changes in our internal controls over financial reporting that have occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents****PART II. OTHER INFORMATION****ITEM 1A. RISK FACTORS**

We refer you to documents filed by us with the SEC, specifically Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009, which identify important risk factors that could materially affect our business, financial condition and future results. We also refer you to the factors and cautionary language set forth in the section entitled Cautionary Statements Regarding Forward-looking Statements in Management's Discussion and Analysis of this quarterly report on Form 10-Q. This quarterly report on Form 10-Q, including the condensed consolidated financial statements and related notes should be read in conjunction with such risks and other factors for a full understanding our operations and financial condition. The risks described in our Form 10-K and herein are not the only risks facing Mobile Mini. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or operating results. The risk factors included in our Annual Report on Form 10-K, as amended, for the fiscal year ended December 31, 2009 have not materially changed.

**ITEM 6. EXHIBITS**

<b>Number</b>	<b>Description</b>
10.1 *	Schedules to the ABL Credit Agreement, dated June 27, 2008, between Mobile Mini, Deutsche Bank AG New York Branch and other lenders party thereto.
