NATIONAL TECHTEAM, INC. AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The accompanying unaudited consolidated financial statements have been prepared by National TechTeam, Inc. ("TechTeam" or "Company") in accordance with generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly,

Edgar Filing: NATIONAL TECHTEAM INC /DE/ - Form 10-Q

they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three-month period ended March 31, 2002 are not necessarily indicative of the results that may be expected for the year ended December 31, 2002. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company and Subsidiaries' annual report on Form 10-K for the year ended December 31, 2001.

Certain reclassifications have been made to the 2001 financial statements in order to conform to the 2002 financial statement presentation.

NOTE A -- EARNINGS PER SHARE

Earnings per share is computed using the weighted average number of common shares and common share equivalents outstanding. Common share equivalents consist of stock options and are calculated using the treasury stock method.

NOTE B -- REVENUES FROM MAJOR CLIENTS

Revenues from clients that represented ten percent or more of total revenue are as follows:

NOTE E -- EFFECTS OF ACCOUNTING PRONOUNCEMENTS

In June 2001, the FASB issued SFAS 142, "Goodwill and Other Intangible Assets." Under Statement 142, goodwill and indefinite lived intangible assets are no longer amortized but are reviewed annually for impairment, or more frequently if impairment indicators arise. Separable intangible assets that have finite lives will continue to be amortized over their useful lives. In the fourth quarter of 2001, TechTeam announced that \$1.1 million of goodwill related to leasing operations would become impaired after adoption of SFAS 142. As of January 1, 2002 the Company adopted SFAS 142. Accordingly, the Company has taken a charge of \$1.1 million in the first quarter of 2002. Under SFAS 142, the charge recognized upon adoption of the statement is reported as the cumulative effect of an accounting change. Reported income and earnings per share adjusted to exclude goodwill amortization is as follows:

ITEM 2 -- MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain of the statements contained in this report that are not historical facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act. Our actual results may differ materially from those included in the forward-looking statements. We caution readers not to place undue reliance on these forward-looking statements, which reflect management's opinions only as of the date hereof. We do not undertake an obligation to revise or publicly release the results of any revisions to these forward-looking statements. You should carefully review the risk factors described in other documents the Company files from time to time with the SEC, including the Annual Report on Form 10-K for the year ended December 31, 2001.

OVERVIEW

NATIONAL TECHTEAM, INC. ("TechTeam" or "Company") is a global provider of information technology and business process outsourcing support services to entities, including Fortune 1000 companies, multinational companies, product providers, and governments. These services are provided with a single point of contact philosophy centralized on TechTeam's help desk support services. TechTeam also offers other services, including technology deployment and migration services, consulting, systems integration, training, and technical staffing. TechTeam provides support services in Europe through its subsidiaries: TechTeam Europe, NV/SA; TechTeam Europe, Ltd.; TechTeam Europe, GmbH, and TechTeam Europe AB.

National TechTeam is incorporated under the laws of the State of Delaware. The Company's common stock is traded on the Nasdaq Stock Market under the symbol "TEAM". TechTeam's client base includes Ford Motor Company, DaimlerChrysler, Deere & Company, Cendant Corporation, Liberty Mutual Insurance Company, Schering-Plough Research Institute, and other companies in the manufacturing, office equipment, insurance, logistics, hospitality, food service and retail industries, among others.

CORPORATE SERVICES

TechTeam's Corporate Services primarily consist of technical help desk services, technical staffing, systems integration, and training programs, integrated to provide total and flexible solutions for its customers.

HELP DESK SERVICES

TechTeam's help desk solutions provide corporate end users with around-the-clock technical support from the client's facilities or from TechTeam's help desk sites. TechTeam supports the full range of a client's IT and business process infrastructure, from network environments to computing systems, and shrink-wrap to advanced proprietary and acquired application systems. TechTeam's flexibility and business processes enable it to tailor its delivery to meet the needs of supporting the customer's IT environment, including proprietary business applications.

TechTeam follows a "single point of contact" (SPOC) model to enable the customer to consolidate its incident resolution support functions into a centralized help desk. TechTeam's technicians are specially trained in the customer's products and applications to diagnose problems and answer technical questions. The Company's technicians answer questions and diagnose technical problems ranging from application features and functionality to wide area network failures. If the technician is not able to resolve the problem with the end user, the call is escalated to the appropriate resource to solve the problem. Data collected by

Edgar Filing: NATIONAL TECHTEAM INC /DE/ - Form 10-Q

TechTeam technicians show trends in IT usage and trouble spots. TechTeam implements advanced data analytics to identify the cause(s) of problem areas. From this analysis, TechTeam offers to its clients improvement opportunities.

As end users often want different channels of communications to resolve problems other than the telephone, the Company has invested in and developed an integrated, Internet-enabled, help desk technology tool, called TechTeam's Support Portal. From the Support Portal web site, an individual seeking support may access a knowledge base to obtain solutions to problems, submit a problem for resolution to a support technician, or check the status of a help desk incident. TechTeam's incident management tool, the Global Call Center, has been integrated with knowledge management and solution products licensed from a number of leading software vendors. TechTeam's

10

customer management section of the portal provides the customer with access to detailed performance reports and other management tools. The Support Portal's knowledge management, data analytics, computer diagnostics and tracking technology are designed to help increase the Company's efficiency in providing support, improve the end user's experience with the help desk, and enable TechTeam's customers to benefit from lower cost and improved efficiency.

TechTeam has deployed the Support Portal technology internally and with many of its existing customers. The technology has improved the efficiency of the TechTeam's service delivery. The Support Portal is an important part of the Company's help desk solutions.

The Company operates major help desks in the United States from its Southfield and Dearborn, Michigan and Davenport, Iowa locations. From its facility in Brussels, Belgium, TechTeam has the capability to provide multilingual help desk support for its customers in as many as 20 languages. TechTeam also provides help desk services from many of its customers' sites.

TECHNICAL STAFFING

The Company maintains a staff of trained technical personnel to provide IT and business process support to its clients at their facilities. The Company recruits a technically proficient employee base. TechTeam enhances its employees' proficiency by providing access to its technical training programs. Training in new technology, in advanced operating systems like Windows 2000, XP and Unix, and in sophisticated applications such as SAP and PeopleSoft, allows TechTeam to provide its clients with highly skilled professionals trained and certified in the latest technology.

Further, the technical staffing business helps TechTeam to provide its employees with a diverse career path. As help desk technicians learn technology and use the Company's internal training programs, they can be migrated to technical staffing positions where they can increase their compensation and knowledge, while the Company retains its most valuable resources. TechTeam considers its career pathing program to be a competitive advantage relative to other staffing and help desk service providers and an excellent tool to prevent employee turnover.

Edgar Filing: NATIONAL TECHTEAM INC /DE/ - Form 10-Q

SYSTEMS INTEGRATION

TechTeam provides systems integration, technology deployment and implementation services from project planning and management, to full-scale network server and workstation installations. TechTeam offers a wide range of information technology services for the client, ranging from desk-side support to network monitoring. Through it's TechTeam Cyntergy, L.L.C. subsidiary, the Company offers deployment, training and implementation services to entities in hospitality, retail and food service industries throughout the United States.

TRAINING

TechTeam provides custom training and documentation solutions that include a wide spectrum of options including computer-based training (CBT), distance learning, course catalogs, registration, instructional design consultants, customized course materials, certified trainers, evaluation options, desk-side tutorials, and custom reports. The Company provides customized training programs for many of its customers' proprietary applications.

EQUIPMENT LEASING

TechTeam Capital Group, L.L.C. (Capital Group) previously wrote leases for computer, telecommunications, and other types of capital equipment, with initial lease terms ranging from 2 to 5 years. Effective March 31, 2000, TechTeam restructured Capital Group. At that time, the majority of the Capital Group staff was terminated, and Capital Group ceased actively looking for new leasing opportunities. Capital Group is currently running out its lease portfolio. With the exception of renewals of existing leases, the portfolio will run off in approximately one year. The Company cannot predict how many lease renewals it will receive or for how long they will be in effect.

11

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2002 COMPARED TO MARCH 31, 2001

Income Statement

Revenues decreased \$2.6 million or 10% from \$25.5 million in the first quarter of 2001, to \$22.9 million, in the first quarter of 2002. The decrease was primarily due to decreases in revenues from the Leasing Operations of \$2.5 million, Technical Staffing of \$1.6 million and Training of \$0.4 million which were in part offset by revenue increases in Systems Integration of \$0.6 million and Corporate Help Desk services of \$1.4 million. Leasing Operations decreased due to the Company's decision to cease looking for new leasing opportunities. Technical Staffing revenues decreased, in large part, due to the Company's two major automotive customers cuts in their subcontracted technical staff and "across-the-board" price reductions for the staff that remained engaged and reductions in the Company's Non-automotive staffing businesses including the ERP technical staffing business. Training revenues decreased primarily due to the discontinuance of the Company's training contract with Sun Microsystems, Inc. and a reduction in services provided to one of the Company's major automotive customers. System Integration revenues increased due to work for new customers acquired in the Cyntergy transaction finalized in the third quarter of 2001. Corporate Help Desk revenues increased principally due to increased business

Edgar Filing: NATIONAL TECHEAM INC /DE/ - Form 10-Q

with one of the Company's major automotive customers in both the US and Europe, and the acquisition of help desk businesses supporting the hospitality, retail and food service industries resulting from the Cyntergy transaction.

Gross Margin as a percentage of sales decreased from 23.3% in the first quarter of 2001, to 22.5% in the first quarter of 2002, or \$0.8 million, from \$5.9 million in the first quarter of 2001 to \$5.1 million in the first quarter of 2002. Overall, the decrease in margin can be attributed to both a decrease in business segment margin, which accounts for \$0.2 million of the total decrease, and a reduction in revenues, which accounts for \$0.6 million of the total decrease. By segment, the margin decrease in the leasing operations accounted for \$0.4 million of the total gross margin decrease, due evenly from a reduction in lower margins and lower revenues. The margin decrease in the technical staffing business accounted for \$0.5 million of the total decrease, two-thirds of which was due to lower margins caused by an "across-the-board" price reduction imposed by the Company's major automotive customers. Margins improved in the corporate help desk segment by \$0.1 million, due to increased revenue.

Selling, general and administrative expenses decreased from \$5.3 million in the first quarter of 2001 to \$3.9 million in the first quarter of 2002, or \$1.4 million. The reduction in selling, general and administrative charges was primarily due to the reduction in amortization charges of \$0.5 million, as a consequence of the change in accounting for goodwill and intangibles, see Note E -- Effects of Accounting Pronouncements, pg 9; certain write-downs to intangible assets taken in 2001; a reduction in employee recruiting and outside service expenses; a reduction in excess office space and numerous other cost saving measures.

The Michigan Single Business Tax decreased reflecting the expected lower levels of payroll and property in service in 2002 than was expected in the first quarter of last year for 2001.

Despite an increase in cash equivalents, interest income decreased in the first quarter of 2002, due to a decline in the earnings rate obtained from investing activities. The decline in the earnings rate is consistent with the decline the overall market interest rates over the past year. Interest expense decreased due to the reduction in the outstanding Notes related to the leasing business.

The Company recognized \$0.5 million of income tax expense on pretax income before the effect of the accounting change of \$1.1 million. The consolidated income tax expense includes a tax provision for European operations based on effective tax rates, which are not significantly different than the statutory rates, and includes a provision for US operations based on a effective tax rates which differs from the statutory rate due to certain nondeductible items.

As of January 1, 2002 the Company adopted SFAS 142. The Company has determined that goodwill related to leasing operations is impaired under SFAS 142. Accordingly, the Company has taken a charge of \$1.1 million in the first quarter of 2002.

SIGNIFICANT ACCOUNTING ESTIMATES

At March 31, 2002, the Company had deferred tax assets of \$1.5 million, primarily related to alternative minimum tax credit carry forwards in the United States, which do not expire. Realization of the deferred tax assets depends upon sufficient levels of future taxable income. Based on historical and expected future taxable income, the Company believes it is more likely than not that deferred tax assets will be realized. If at any time the Company believes that

Edgar Filing: NATIONAL TECHTEAM INC /DE/ - Form 10-Q

current or future taxable income will not support the realization of deferred tax assets, a valuation allowance would be provided.

The Company periodically reviews its estimate of residual values of leased assets, which consist principally of computer equipment. The values of the leased assets are impacted by a number of factors including the speed of technological change, the status of used computer equipment market, the attitude of customers regarding renewals of the leases and the ability of the Company to offer alternatives to its customers. There can be no assurances that the Company's estimates of residual values will accurately reflect future results.

LIQUIDITY AND CAPITAL RESOURCES

Balance Sheet

As of March 31, 2002 the Company's balance sheet reflects a high degree of liquidity and little financial leverage.

Cash, cash equivalents and marketable securities increased \$2.6 million in the first quarter of 2002 from \$35.6 million to \$38.2 million. The Company's working capital position increased by \$4.7 million in the first quarter of 2002, from \$47.1 million as of December 31, 2001 to \$51.8 million as of March 31, 2002.

The current portion of notes payable and long term liabilities decreased by \$1.7 million in the first quarter of 2002 from a balance of \$5.4 million on December 31, 2001 to \$3.7 million on March 31, 2002. The Company's debt to total asset ratio fell from 14.4% on December 31, 2001 to 12.2% as of March 31, 2002.

As of March 31, 2002 the Company's book value per share was \$6.79 and its market to book ratio was 64%.

Cash Flow Provided from Operations

Cash flow provided from operating activities was \$3.8 million in the first quarter of 2002. The positive cash flow was due to non-cash depreciation and amortization expense of \$3.7 million, primarily related to the leasing operations, and the net operating income of \$0.6 million for the quarter offset in part by the net changes in working capital of \$0.6 million.

Cash Flow Used by Investing Activities

Cash Flow used by investing activities was \$2.4 million in the first quarter of 2002. The Company received \$1.4 million from the sale of assets used in the leasing operations, offset by \$1.1 million to purchase assets to be used on help desk service projects and \$3.0 million to purchase marketable securities.

Cash Flow Used in Financing Activities

Cash flow used in financing activities was \$1.8 million, of which \$1.7 million was used to pay down debt related to leasing operations, in the first quarter of 2002.

The Company believes that cash flows from operations will continue to be sufficient to meet its ongoing working capital needs.

PART II -- OTHER INFORMATION

ITEM 1 -- LEGAL PROCEEDINGS

The Company is a party to legal proceedings that are routine and incidental to its business. Although the consequences of these proceedings are not presently determinable, in the opinion of management, they will not have a material adverse affect on the Company's liquidity, financial position or results of

Edgar Filing: NATIONAL TECHTEAM INC /DE/ - Form 10-Q

operations.

ITEM 6 -- EXHIBITS AND REPORTS ON FORM 8-K

- (a) Exhibits -- None
- (b) Reports on Form 8-K. No reports were filed on Form 8-K during the quarter ended March 31, 2001.
