AMP Holding Inc.
Annual Report on Form 10-K
For the Year Ended December 31, 2012

When used in this Report, the words “anticipate”, “expect”, “plan”, “believe”, “seek”, “estimate” and similar expressions are intended to identify forward-looking statements. These are statements that relate to future periods and include, but are not limited to, statements about the features, benefits and performance of our products, our ability to introduce new product offerings and increase revenue from existing products, expected expenses including those related to selling and marketing, product development and general and administrative, our beliefs regarding the health and growth of the market for our products, anticipated increase in our customer base, expansion of our products functionalities, expected revenue levels and sources of revenue, expected impact, if any, of legal proceedings, the adequacy of liquidity and capital resource, and expected growth in business. Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those projected. These risks and uncertainties include, but are not limited to, market acceptance for our products, our ability to attract and retain customers for existing and new products, our ability to control our expenses, our ability to recruit and retain employees, legislation and government regulation, shifts in technology, global and local business conditions, our ability to effectively maintain and update our product and service portfolio, the strength of competitive offerings, the prices being charged by those competitors and the risks discussed elsewhere herein. These forward-looking statements speak only as of the date hereof. We expressly disclaim any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

All references in this Form 10-K that refer to the “Company”, “AMP Holding”, “AMP”, “we,” “us” or “our” are to AMP Holding Inc. and unless otherwise differentiated, its wholly-owned subsidiary, AMP Electric Vehicles Inc.

PART I

Item 1. Business

On December 28, 2009, AMP Holding Inc. entered into and closed a Share Exchange Agreement with the AMP shareholders pursuant to which we acquired 100% of the outstanding securities of AMP in exchange for 14,890,904 shares of our common stock. Considering that, following the merger, the AMP Shareholders control the majority of our outstanding voting common stock and we effectively succeeded our otherwise minimal operations to those that are theirs, AMP is considered the accounting acquirer in this reverse-merger transaction. A reverse-merger transaction is considered, and accounted for as, a capital transaction in substance; it is equivalent to the issuance of AMP securities for our net monetary assets, which are de minimus, accompanied by a recapitalization. Accordingly, we have not recognized any goodwill or other intangible assets in connection with this reverse merger transaction. AMP is the surviving and continuing entities and the historical financials following the reverse merger transaction will be those of AMP. We were a “shell company” (as such term is defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended) immediately prior to our acquisition of AMP pursuant to the terms of the Share Exchange Agreement. As a result of such acquisition, we were initially focused on developing automotive electric drive trains but have subsequently shifted our focus to the design, engineering, marketing and sale of both repowered and new class 3 through 6 commercial trucks with an all-electric drivetrain and battery system. Consequently, we believe that acquisition caused us to cease to be a shell company as we no longer have nominal operations. Since that time, we have devoted the majority of our resources to the development of an all-electric drive system capable of moving heavy large vehicles ranging from full size SUV’s up to and including Medium Duty Commercial trucks.

Additionally, as a subsequent event, in February 2013 AMP Holding formed a new wholly owned subsidiary, AMP Trucks Inc., an Indiana corporation. On March 13, 2013 AMP Trucks Inc. closed on the acquisition of assets of

Workhorse Custom Chassis LLC (“Workhorse”). The assets included in this transaction were: the Workhorse® brand, access to the dealer network of 440 dealers nationwide, intellectual property, and all physical assets which include the approximately 250,000 sq. ft. of facilities on 48 acres of land in Union City, Indiana (the “Workhorse Assets”). We believe this acquisition propels AMP Holding Inc. into the unique position as a medium duty OEM which we believe will be capable of producing new chassis with electric, propane, compressed natural gas, and hybrid configurations, as well as gasoline drive systems.

Overview

Our vision is to bring electrification to medium duty trucks that are popular with fleets and small businesses. 91% of the 300,000 plus step vans on the road today travel fewer than 100 miles per day. A significant number of these are being utilized for fixed route deliveries that have the vehicle returning to the same location on a daily basis. Our initial focus is to either sell a repower solution for these up to 20,000 # GVW (Gross Vehicle Weight) step vans or produce a new chassis with similar specifications that is powered by an all-electric drive system. If the customer requests it, we could provide them with a chassis that is powered by an alternative fuel i.e. propane or CNG. In the event the customer still wants a percentage of their fleet to be gasoline powered vehicles, we will be able to provide those as well. Buses and other similar Class 3 through Class 6 commercial trucks could potentially be part of our future product mix since the newly acquired assembly plant is capable of producing a wide range of vehicles.

We believe our specialization in larger vehicles, specifically medium duty trucks, addresses a need in the best possible market for electric vehicles. The combination of our ability to produce, service and support a full line of vehicles ranging from traditional gasoline up to and including 100% electric power sets us apart from the competition and puts us in a very unique position.

Table of Contents

We intend to take advantage of our unique status and the reputation we have built as a leader in the electrification of larger vehicles to become a world leader in the emerging electric vehicle (EV) marketplace. Our expansion to the commercial medium duty truck segment is a logical step in that the execution of such vehicles allows the Company to leverage the technology and knowledge gained in the development of drivetrains for larger passenger vehicles.

Our powertrains encompass complete motor assemblies, battery packs, computers and software required for vehicle electrification. In the case of a repower, this assembly or kit will be shipped to one of our dealers that have been trained in the proper installation of the electrification system. They will then perform the repower at their facility which is in proximity to the customer's operations and then return the vehicle to the customer in a matter of days. In the event the electrification kit is for a new vehicle, the kit will be assembled at AMP's Loveland, Ohio facility and then shipped to be installed in a new chassis at our newly acquired truck chassis assembly plant.

AMP's approach to the electrification market is to provide 100% electric vehicles with industry-leading technology at a low upfront investment. AMP has developed a very cost effective solution for manufacturing new electric vehicles and repowering existing gasoline and diesel vehicles. This results in a unique market opportunity for AMP, one that is potentially greater than most electric vehicle competitors in the market today. By using the best of breed, award winning existing brands, AMP can focus its resources specifically on advanced electric drive train solutions. Further, by using well designed base vehicles, AMP can leverage the safety, handling and amenities invested into many of today's vehicles while not "reinventing" the base vehicle. The result is a well featured vehicle with the added advantages of having zero emissions, a quieter ride and a fraction of the ongoing operating and maintenance costs.

Market for Electric Vehicles

Most experts agree that the electric vehicle industry is here to stay and is expected to grow, although there have been recent indications that the market for consumer vehicles has been growing at a slower than anticipated rate. There are various infrastructure issues that are being slowly resolved, at different levels of aggressiveness depending on country, state or city. These include providing battery charging stations. The industry has turned to private investment and government support programs for assistance to overcome these hurdles.

Because crude oil is a finite resource, we expect the cost of gasoline will only trend upward over time which in turn will drive market demand for EVs.

Market Strategy

AMP's initial target was the mid-size and larger SUV market. AMP is leveraging its experience from developing electric SUV's to creating class 3 through 6 commercial electric trucks. Approximately one year ago, AMP signed a development agreement with Navistar International Inc. ("Navistar") to develop a 100% electric drive system for a specific Navistar vehicle that was produced with the VT365 and VT265 diesel engine in 2004 and 2005. One of these development project vehicles will shortly complete durability testing by an independent third party and then move to field testing with a large package delivery company.

Our strategy is to provide infrastructure and logistical support for our vehicles through the 400 plus Workhorse truck dealer network throughout the country that we now have access to following the acquisition of the Workhorse Asset. Additionally, the ability to provide a broad-based multiple fuel solution will provide customers with a one-stop solution for all of their vehicle needs in this class and type of vehicle.

Research and Development

The majority of our research and development is conducted in-house at our facilities near Cincinnati, Ohio. Additionally, we contract with engineering firms to assist with validation and certification requirements as well as specific vehicle integration tasks.

Competition

There are two primary competitors in the medium duty EV truck segment in the US market: Smith Electric Truck, and Electric Vehicles International (EVI). Smith has sold approximately 400 electric trucks since their inception and they are the largest manufacturer in the country. EVI is in the process of delivering 100 vehicles that UPS ordered in 2010 and it is our understanding that this order represents a significant portion of their overall business.

We believe the most dramatic difference between AMP and the other competitors in the medium duty truck market is the price. Our research indicates that our retail price may be approximately 67% of the retail price of a comparable product. We also stand out as the only manufacturer capable of providing a cost effective repower solution for existing vehicles.

While there are many overseas electric car companies, there are only a few overseas companies that have vehicles in the category of medium duty trucks.

Table of Contents

Intellectual Property

The company has multiple pending U.S. patent applications and also plans to pursue appropriate foreign patent protection on those inventions. The company also has five pending trademark applications and two issued trademark registrations in the U.S. with intent to pursue foreign trademark registration as well.

Government Regulation

We are in the business of manufacturing, modifying and selling medium duty trucks, and accordingly we are subject to laws related to truck sales and operation.

The United States' laws related to truck manufacturers regulate registration, safety criteria, type approval, inspection, maintenance, testing, etc. of trucks. Complying with the regulations of truck development and manufacturing is costly and could significantly affect our ability to become profitable. In addition, failure to comply with these laws could subject our Company to penalties, which could include severe fines or the removal of government approval to conduct business. Although we fully intend to comply with all applicable rules and regulations, we cannot assure that we will be able to do so.

Number of Employees

We currently have 22 employees, 20 full time and 2 part-time, of which 4 are administrative/sales, 1 is finance, 1 is human resource, 10 are engineering/R&D, and 6 are manufacturing. None of our employees are represented by a labor union. We have not experienced any work stoppages and consider our relations with our employees to be good. Currently, we have 4 fewer employees compared to December 31, 2011 due primarily to attrition and layoffs to balance resources with our product program development schedule.

Agreements

Momentum Dynamics and BARTA (Berks County Regional Transportation Authority)

On December 29, 2012, the Company entered into an Agreement with Momentum Dynamics to engineer, develop, and produce two development vehicles for BARTA in Reading, Pennsylvania. We are seeking to have this project generate the following:

- promote the use of AMP products for other similar applications i.e. rental car shuttle buses, motel and hotel shuttle buses, school buses, and other hospitality shuttle bus applications,
 - network the AMP products through the Momentum Dynamic sales channel, and
- promote the sale of AMP products to the Departments of Transportation throughout the US.

Navistar International Truck

In April of 2012 we signed a development agreement with Navistar International Truck. The scope of work for this project was to repower two 2004 vintage W1652 vehicles, which were originally produced by Navistar. Their customer, a large package delivery company, has an interest in repowering these vehicles with something other than the current diesel engine that is in this vehicle. Navistar was interested in working with them to repower these vehicles with either electric or some other fuel system. With electric being the most desirable if the customer's price point could be met, AMP was subcontracted by Navistar to perform the electric repower, and in August of 2012 AMP delivered the first vehicle to Navistar. The vehicle passed their initial performance requirements which were based on their end customer's specifications. In October 2012 Navistar turned the project over to AMP to work directly with

them to provide a 100% electric repowered vehicle. Since that time, AMP has been working through the customer requirements and is in the final stages of testing and durability. Once all testing is completed we plan on finalizing purchase orders that are currently in the discussion phase.

Item 1A. Risk Factors

We require capital for our operations as we are currently significantly undercapitalized and if we are unable to raise capital in the near future we will cease operations.

Our cash balance by mid-April 2013 may be near zero. This will impact the payment of our outstanding accounts payable balance. If we do not raise capital in the immediate future, we will be required to lay off additional employees. We are currently evaluating several options for financing, but there are no guarantees that we will raise capital or that if we do raise the capital it will be on acceptable terms.

Our limited operating history makes it difficult for us to evaluate our future business prospects and make decisions based on those estimates of our future performance.

We have basically been a research and development company since beginning operations in February 2007. We have a limited operating history and have generated limited revenue. As we move more toward a manufacturing environment it is difficult, if not impossible, to forecast our future results based upon our historical data. Because of the uncertainties related to our lack of historical operations, we may be hindered in our ability to anticipate and timely adapt to increases or decreases in revenues or expenses. If we make poor budgetary decisions as a result of unreliable historical data, we could be less profitable or incur losses, which may result in a decline in our stock price.

Table of Contents

Failure to successfully integrate the Workhorse ® brand, logo, intellectual property, patents and assembly plant in Union City, Indiana into our operations could adversely affect our business and results of operations.

As part of our strategy to become an OEM, in March 2013, we have acquired Workhorse and the Workhorse Assets including the Workhorse ® brand, logo, intellectual property, patents and assembly plant in Union City, Indiana. The Workhorse acquisition may expose us to operational challenges and risks, including the diversion of management's attention from our existing business, the failure to retain key Workhorse dealers and our ability to commence operations at the plant in Union City, Indiana. Our ability to sustain our growth and maintain our competitive position may be affected by our ability to successfully integrate the Workhorse Assets.

AMP's results of operations have not resulted in profitability and we may not be able to achieve profitability going forward.

AMP has incurred net losses amounting to \$21,371,258 for the period from inception (February 20, 2007) through December 31, 2012. In addition, as of December 31, 2012, AMP has a working capital deficiency of \$2,344,694. If we incur additional significant operating losses, our stock price may decline, perhaps significantly.

Our management is developing plans to alleviate the negative trends and conditions described above. Our business plan has changed from concentrating on EV SUV's to EV medium duty trucks, but is still speculative and unproven. There is no assurance that even if we successfully implement our business plan, that we will be able to curtail our losses. Further, as we are a development stage enterprise, we expect that net losses and the working capital deficiency will continue.

Our business, prospects, financial condition and operating results will be adversely affected if we cannot reduce and adequately control the costs and expenses associated with operating our business, including our material and production costs.

We incur significant costs and expenses related to procuring the materials, components and services required to develop and produce our electric vehicles. As a result, our current cost projections are considerably higher than the projected revenue stream that such vehicles will produce. As a result we are continually working on initiatives to reduce our cost structure so that we may effectively compete.

We currently do not have long-term supply contracts with guaranteed pricing which exposes us to fluctuations in component, materials and equipment prices. Substantial increases in these prices would increase our operating costs and could adversely affect our business, prospects, financial condition and operating results.

Because we currently do not have long-term supply contracts with guaranteed pricing, we are subject to fluctuations in the prices of the raw materials, parts and components and equipment we use in the production of our vehicles. Substantial increases in the prices for such raw materials, components and equipment would increase our operating costs and could reduce our margins if we cannot recoup the increased costs through increased vehicle prices. Any attempts to increase the announced or expected prices of our vehicles in response to increased costs could be viewed negatively by our customers and could adversely affect our business, prospects, financial condition and operating results.

We depend upon key personnel and need additional personnel.

Our success depends on the continuing services of James E. Taylor, Chairman of the Board, Stephen Burns, CEO, and Martin J. Rucidlo, President. The loss of any of these individuals could have a material and adverse effect on our business operations. Additionally, the success of the Company's operations will largely depend upon its ability to

successfully attract and maintain competent and qualified key management personnel. As with any company with limited resources, there can be no guarantee that the Company will be able to attract such individuals or that the presence of such individuals will necessarily translate into profitability for the Company. Our inability to attract and retain key personnel may materially and adversely affect our business operations.

We must effectively manage the growth of our operations or our company will suffer.

To manage our growth, we believe we must continue to implement and improve our operational, manufacturing, and research and development departments. We may not have adequately evaluated the costs and risks associated with this expansion, and our systems, procedures, and controls may not be adequate to support our operations. In addition, our management may not be able to achieve the rapid execution necessary to successfully offer our products and services and implement our business plan on a profitable basis. The success of our future operating activities will also depend upon our ability to expand our support system to meet the demands of our growing business. Any failure by our management to effectively anticipate, implement, and manage the changes required to sustain our growth would have a material adverse effect on our business, financial condition, and results of operations.

Our business requires substantial capital, and if we are unable to maintain adequate financing sources our profitability and financial condition will suffer and jeopardize our ability to continue operations.

We require substantial capital to support our operations. If we are unable to maintain adequate financing, or other sources of capital are not available, we could be forced to suspend, curtail or reduce our operations, which could harm our revenues, ability to achieve profitability, financial condition and business prospects.

Table of Contents

We face competition. A few of our competitors have greater financial or other resources, longer operating histories and greater name recognition than we do and one or more of these competitors could use their greater resources and/or name recognition to gain market share at our expense or could make it very difficult for us to establish market share.

In the electric medium duty truck market in the United States, we compete with a few other manufacturers, including EVI and Smith Electric, who have more significant financial resources, established market positions, long-standing relationships with customers and dealers, and who have more significant name recognition, technical, marketing, sales, financial and other resources than we do. Each of these companies is currently selling an electric vehicle or is working to develop, market and sell advanced technology vehicles in the United States market. The resources available to our competitors to develop new products and introduce them into the marketplace exceed the resources currently available to us. As a result, our competitors may be able to compete more aggressively and sustain that competition over a longer period of time that we can. This intense competitive environment may require us to make changes in our products, pricing, licensing, services, distribution, or marketing to develop a market position. Each of these competitors has the potential to capture market share in our target markets which could have an adverse effect on our position in our industry and on our business and operating results.

If we are unable to keep up with advances in electric vehicle technology, we may suffer a decline in our competitive position.

There are companies in the electric vehicle industry that have developed or are developing vehicles and technologies that compete or will compete with our vehicles. We cannot assure that our competitors will not be able to duplicate our technology or provide products and services similar to ours more efficiently. If for any reason we are unable to keep pace with changes in electric vehicle technology, particularly battery technology, our competitive position may be adversely affected. We plan to upgrade or adapt our vehicles and introduce new models in order to continue to provide electric vehicles that incorporate the latest technology. However, there is no assurance that our research and development efforts will keep pace with those of our competitors.

Our electric vehicles compete for market share with vehicles powered by other vehicle technologies that may prove to be more attractive than ours.

Our target market currently is serviced by manufacturers with existing customers and suppliers using proven and widely accepted fuel technologies. Additionally, our competitors are working on developing technologies that may be introduced in our target market. If any of these alternative technology vehicles can provide lower fuel costs, greater efficiencies, greater reliability or otherwise benefit from other factors resulting in an overall lower total cost of ownership, this may negatively affect the commercial success of our vehicles or make our vehicles uncompetitive or obsolete.

We currently have a limited customer base and expect that a significant portion of our future sales will be from a limited number of customers and the loss of any of these high volume customers could materially harm our business.

A significant portion of our projected future revenue, if any, is generated from a limited number of vehicle customers. Additionally, much of our business model is focused on building relationships with large customers. Currently we have no contracts with customers that include long-term commitments or minimum volumes that ensure future sales of vehicles. As such, a customer may take actions that affect us for reasons that we cannot anticipate or control, such as reasons related to the customer's financial condition, changes in the customer's business strategy or operations or as the result of the perceived performance or cost-effectiveness of our vehicles. The loss of or a reduction in sales or anticipated sales to our most significant customers could have an adverse effect on our business, prospects, financial condition and operating results.

Changes in the market for electric vehicles could cause our products to become obsolete or lose popularity.

The modern electric vehicle industry is in its infancy and has experienced substantial change in the last few years. To date, demand for and interest in electric vehicles has been slower than forecasted by industry experts. As a result, growth in the electric vehicle industry depends on many factors, including, but not limited to:

- continued development of product technology, especially batteries
- the environmental consciousness of customers
- the ability of electric vehicles to successfully compete with vehicles powered by internal combustion engines
- limitation of widespread electricity shortages; and
- whether future regulation and legislation requiring increased use of non-polluting vehicles is enacted

We cannot assume that growth in the electric vehicle industry will continue. Our business may suffer if the electric vehicle industry does not grow or grows more slowly than it has in recent years or if we are unable to maintain the pace of industry demands.

Table of Contents

The unavailability, reduction, elimination or adverse application of government subsidies, incentives and regulations could have an adverse effect on our business, prospects, financial condition and operating results.

We believe that, currently, the availability of government subsidies and incentives is an important factor considered by our customers when purchasing our vehicles, and that our growth depends in part on the availability and amounts of these subsidies and incentives. Any reduction, elimination or discriminatory application of government subsidies and incentives because of budgetary challenges, policy changes, the reduced need for such subsidies and incentives due to the perceived success of electric vehicles or other reasons may result in the diminished price competitiveness of the alternative fuel vehicle industry.

We may be unable to keep up with changes in electric vehicle technology and, as a result, may suffer a decline in our competitive position.

Our current products are designed for use with, and are dependent upon, existing electric vehicle technology. As technologies change, we plan to upgrade or adapt our products in order to continue to provide products with the latest technology. However, our products may become obsolete or our research and development efforts may not be sufficient to adapt to changes in or to create the necessary technology. As a result, our potential inability to adapt and develop the necessary technology may harm our competitive position.

The failure of certain key suppliers to provide us with components could have a severe and negative impact upon our business.

We rely on a small group of suppliers to provide us with components for our products. If these suppliers become unwilling or unable to provide components, there are a limited number of alternative suppliers who could provide them. Changes in business conditions, wars, governmental changes, and other factors beyond our control or which we do not presently anticipate could affect our ability to receive components from our suppliers. Further, it could be difficult to find replacement components if our current suppliers fail to provide the parts needed for these products. A failure by our major suppliers to provide these components could severely restrict our ability to manufacture our products and prevent us from fulfilling customer orders in a timely fashion.

Product liability or other claims could have a material adverse effect on our business.

The risk of product liability claims, product recalls, and associated adverse publicity is inherent in the manufacturing, marketing, and sale of electrical vehicles. Although we have product liability insurance for our consumer and commercial products, that insurance may be inadequate to cover all potential product claims. We also carry liability insurance on our products. Any product recall or lawsuit seeking significant monetary damages either in excess of our coverage, or outside of our coverage, may have a material adverse effect on our business and financial condition. We may not be able to secure additional product liability insurance coverage on acceptable terms or at reasonable costs when needed. A successful product liability claim against us could require us to pay a substantial monetary award. Moreover, a product recall could generate substantial negative publicity about our products and business and inhibit or prevent commercialization of other future product candidates. We cannot provide assurance that such claims and/or recalls will not be made in the future.

We may have to devote substantial resources to implementing a retail product distribution network.

Dealers are often hesitant to provide their own financing to contribute to our product distribution network. As a result, we anticipate that we may have to provide financing or other consignment sale arrangements for dealers. A capital investment such as this presents many risks, foremost among them being that we may not realize a significant return on our investment if the network is not profitable. Our inability to collect receivables from dealers could cause us to

suffer losses. Lastly, the amount of time that our management will need to devote to this project may divert them from performing other functions necessary to assure the success of our business.

Vehicle dealer and distribution laws could adversely affect our ability to sell our commercial electric vehicles.

Sales of our vehicles are subject to international, state and local vehicle dealer and distribution laws. To the extent such laws prevent us from selling our vehicle to customers located in a particular jurisdiction or require us to retain a local dealer or distributor or establish and maintain a physical presence in a jurisdiction in order to sell vehicles in that jurisdiction, our business, prospects, financial condition and operating results could be adversely affected.

Regulatory requirements may have a negative impact upon our business.

While our products are subject to substantial regulation under federal, state, and local laws, we believe that our products are or will be materially in compliance with all applicable laws. However, to the extent the laws change, or if we introduce new products in the future, some or all of our products may not comply with applicable federal, state, or local laws. Further, certain federal, state, and local laws and industrial standards currently regulate electrical and electronics equipment. Although standards for electric vehicles are not yet generally available or accepted as industry standards, our products may become subject to federal, state, and local regulation in the future. Compliance with these regulations could be burdensome, time consuming, and expensive.

Our products are subject to environmental and safety compliance with various federal and state regulations, including regulations promulgated by the EPA, NHTSA, and various state boards, and compliance certification is required for each new model year. The cost of these compliance activities and the delays and risks associated with obtaining approval can be substantial. The risks, delays, and expenses incurred in connection with such compliance could be substantial.

Table of Contents

Our success may be dependent on protecting our intellectual property rights.

We rely on trade secret protections to protect our proprietary technology. Our success will, in part, depend on our ability to obtain trademarks and patents. We are working on obtaining patents and trademarks registered with the United States Patent and Trademark Office but have not finalized any as of this date. Although we have entered into confidentiality agreements with our employees and consultants, we cannot be certain that others will not gain access to these trade secrets. Others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets.

We may be exposed to liability for infringing upon the intellectual property rights of other companies.

Our success will, in part, depend on our ability to operate without infringing on the proprietary rights of others. Although we have conducted searches and are not aware of any patents and trademarks which our products or their use might infringe, we cannot be certain that infringement has not or will not occur. We could incur substantial costs, in addition to the great amount of time lost, in defending any patent or trademark infringement suits or in asserting any patent or trademark rights, in a suit with another party.

Our electric vehicles make use of lithium-ion battery cells, which, if not appropriately managed and controlled, on rare occasions have been observed to catch fire or vent smoke and flames. If such events occur in our electric vehicles, we could face liability for damage or injury, adverse publicity and a potential safety recall, any of which could adversely affect our business, prospects, financial condition and operating results.

The battery packs in our electric vehicles use lithium-ion cells, which have been used for years in laptop computers and cell phones. On rare occasions, if not appropriately managed and controlled, lithium-ion cells can rapidly release the energy they contain by venting smoke and flames in a manner that can ignite nearby materials.

Our facilities could be damaged or adversely affected as a result of disasters or other unpredictable events. Any prolonged disruption in the operations of our facility would adversely affect our business, prospects, financial condition and operating results.

We engineer and assemble our electric vehicles in a facility in Loveland, Ohio. Any prolonged disruption in the operations of our facility, whether due to technical, information systems, communication networks, accidents, weather conditions or other natural disaster, or otherwise, whether short or long-term, would adversely affect our business, prospects, financial condition and operating results.

We have not paid dividends in the past and do not expect to pay dividends in the future. Any return on investment may be limited to the value of our common stock.

We have never paid cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. The payment of dividends on our common stock will depend on earnings, financial condition and other business and economic factors affecting the company at such time as the board of directors may consider relevant. If we do not pay dividends, our common stock may be less valuable because a return on investment will only occur due to stock price appreciation.

Our stock price and trading volume may be volatile, which could result in substantial losses for our stockholders.

The equity trading markets may experience periods of volatility, which could result in highly variable and unpredictable pricing of equity securities. The market price of our common stock could change in ways that may or may not be related to our business, our industry or our operating performance and financial condition. In addition, the

trading volume in our common stock may fluctuate and cause significant price variations to occur. We have experienced significant volatility in the price of our stock. We cannot assure that the market price of our common stock will not fluctuate or decline significantly in the future. In addition, the stock markets in general can experience considerable price and volume fluctuations.

We have not voluntarily implemented various corporate governance measures, in the absence of which, shareholders may have more limited protections against interested director transactions, conflict of interest and similar matters.

Recent Federal legislation, including the Sarbanes-Oxley Act of 2002, has resulted in the adoption of various corporate governance measures designed to promote the integrity of the corporate management and the securities markets. Some of these measures have been adopted in response to legal requirements. Others have been adopted by companies in response to the requirements of national securities exchanges, such as the NYSE or the NASDAQ, on which their securities are listed. Prospective investors should bear in mind our current lack of Sarbanes Oxley measures in formulating their investment decisions.

We may be exposed to potential risks relating to our internal controls over financial reporting and our ability to have those controls attested to by our independent auditors.

As directed by Section 404 of the Sarbanes-Oxley Act of 2002 ("SOX 404"), the Securities and Exchange Commission adopted rules requiring smaller reporting companies, such as our company, to include a report of management on the company's internal controls over financial reporting in their annual reports for fiscal years ending on or after December 15, 2007. We were required to include the management report in annual reports starting with the year ending December 31, 2009. Previous SEC rules required a non-accelerated filer to include an attestation report in its annual report for years ending on or after June 15, 2010. Section 989G of the Dodd-Frank Act added SOX Section 404(c) to exempt from the attestation requirement smaller issuers that are neither accelerated filers nor large accelerated filers under Rule 12b-2. Under Rule 12b-2, subject to periodic and annual reporting criteria, an "accelerated filer" is an issuer with market value of \$75 million, but less than \$700 million; a "large accelerated filer" is an issuer with market value of \$700 million or greater. As a result, the exemption effectively applies to companies with less than \$75 million in market capitalization. Item 9a of this filing, Controls and Procedures, indicates the company's controls and procedures were not effective.

The trading of our common stock is limited under the SEC's penny stock regulations, which will adversely affect the liquidity of our common stock.

The trading price of our common stock is currently less than \$5.00 per share and, as a result, our common stock is considered a "penny stock", and trading in our common stock would be subject to the requirements of Rule 15g-9 under the Exchange Act. Under this rule, broker/dealers who recommend low-priced securities to persons other than established customers and accredited investors must satisfy special sales practice requirements. Generally, the broker/dealer must make an individualized written suitability determination for the purchaser and receive the purchaser's written consent prior to the transaction.

SEC regulations also require additional disclosure in connection with any trades involving a "penny stock," including the delivery, prior to any penny stock transaction, of a disclosure schedule explaining the penny stock market and its associated risks. These requirements severely limit the liquidity of securities in the secondary market because few broker or dealers are likely to undertake these compliance activities. In addition to the applicability of the penny stock rules, other risks associated with trading in penny stocks could also be price fluctuations and the lack of a liquid market. An active and liquid market in our common stock may never develop due to these factors.

Penny Stock Rules

The Securities and Exchange Commission has adopted rules that regulate broker-dealer practices in connection with transactions in penny stocks. Penny stocks are generally equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system).

Table of Contents

Our shares constitute penny stock under the Securities and Exchange Act. The shares will remain penny stocks for the foreseeable future. The classification of penny stock makes it more difficult for a broker-dealer to sell the stock into a secondary market, which makes it more difficult for a stockholder to liquidate his or her shares. Any broker-dealer engaged by the purchaser for the purpose of selling his or her shares in the Company will be subject to Rules 15g-1 through 15g-10 of the Securities and Exchange Act. Rather than creating a need to comply with those rules, some broker-dealers will refuse to attempt to sell penny stock.

The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, to deliver a standardized risk disclosure document, which:

- contains a description of the nature and level of risk in the market for penny stock in both public offerings and secondary trading
- contains a description of the broker's or dealer's duties to the customer and of the rights and remedies available to the customer with respect to a violation of such duties or other requirements of the Securities Act of 1934, as amended
- contains a brief, clear, narrative description of a dealer market, including "bid" and "ask" price for the penny stock and the significance of the spread between the bid and ask price
- contains a toll-free telephone number for inquiries on disciplinary actions
- defines significant terms in the disclosure document or in the conduct of trading penny stocks
- contains such other information and is in such form (including language, type, size and format) as the Securities and Exchange Commission shall require by rule or regulation

The broker-dealer also must provide, prior to effecting any transaction in a penny stock, to the customer:

- the bid and offer quotations for the penny stock
- the compensation of the broker-dealer and its salesperson in the transaction
- the number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock
- monthly account statements showing the market value of each penny stock held in the customer's account

In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from those rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written acknowledgment of the receipt of a risk disclosure statement, a written agreement to transactions involving penny stocks, and a signed and dated copy of a written suitability statement. These disclosure requirements will have the effect of reducing the trading activity in the secondary market for our stock because it will be subject to these penny stock rules. Therefore, stockholders may have difficulty selling their securities.

From May 10, 2011 through December 20, 2011, the Company compensated JCI as placement agent for assisting in the sale of the securities by paying it commissions in the aggregate amount of \$376,950 and issuing the placement agent common stock purchase warrants to purchase 628,246 shares of the Company's common stock at an exercise price of \$0.60 per share.

On May 25, 2011, the Company granted the below stock options and common stock purchase warrants to James Taylor and Stephen Burns, officers and directors of the Company, for achieving various milestones and targets over the last six months including the continuous raising of and management of operational funds, the development of an operational plan that addresses product development, production readiness, vehicle certification planning and start of the certification process, the addition of key personnel to fulfill operational requirements such as procurement, engineering and finance, the establishment of a number of channels to market and initial agreements with distributors including the Distribution Agreement with Northern Lights Energy ehf. ("NLE"), an Icelandic company that operates in the energy and transportation sectors, pursuant to which the Company will manufacture, assemble, produce, and sell Company products to NLE in exchange for granting NLE the exclusive right within the country of Iceland. The Company issued Mr. Taylor a stock option to acquire 500,000 shares of common stock at an exercise price of \$0.60 per share for a period of five years and a common stock purchase warrant to acquire 500,000 shares of common stock at an exercise price of \$2.00 per share for a period of five years. The Company issued Mr. Burns a stock option to acquire 500,000 shares of common stock at an exercise price of \$0.60 per share for a period of five years and a common stock purchase warrant to acquire 500,000 shares of common stock at an exercise price of \$2.00 per share for a period of five years.

On June 28, 2011, the Board of Directors of the Company adopted the 2011 Incentive Stock Plan providing for the issuance of up to 1,000,000 stock options to employees, officers, directors or consultants of the Company. On June 30, 2011, the Company issued stock options to acquire 505,000 shares of common stock to employees and consultants under the 2010 Incentive Stock Plan or 2011 Incentive Stock Plan at an exercise price of \$0.70 per share for a period of two years.

From January 6, 2012 through August 3, 2012, the Company entered into Securities Purchase Agreements and Security Agreements with several accredited investors (the "2012 Investors") providing for the sale by the Company to the 2012 Investors of Secured Convertible Debentures in the aggregate amount of \$1,939,250 (the "2012 Notes"). In addition to the 2012 Notes, the 2012 Investors also received common stock purchase warrants (the "2012 Warrants") to acquire 1,939,250 shares of common stock of the Company. The 2012 Warrants were exercisable for three years at an exercise price of \$0.50. The Company received the proceeds in connection with these financings between January 6, 2012 and August 3, 2012. Further, a shareholder, director and officer, converted secured and unsecured loans provided to the Company from September 30, 2011 to June 5, 2012 in the aggregate amount of \$389,250 into the 2012 Notes and 2012 Warrants. In November 2012, the Company entered into a Note and Warrant Amendment and Conversion Agreement whereby the holders and the 2012 Investors converted all principal and interest under the 2012 Notes into 10,227,070 shares of common stock. Further, the exercise price of the 2012 Warrants was reduced to \$0.25 per share.

In March 2012 the Company settled outstanding invoices for consulting services totaling \$60,000 by issuing 177,515 shares of common stock.

On August 10, 2012, Company granted James Taylor options to purchase 300,000 shares of the Company's common stock at an exercise price of \$0.15 per share. The options expire after five years with 100,000 options vesting immediately and 100,000 options vesting each of the following two years on the anniversary date.

On August 20, 2012, the Company entered into an Investment Agreement (“Investment Agreement”) with Kodiak Capital Group, LLC (“Kodiak”). Pursuant to the Investment Agreement, Kodiak has committed to purchase up to \$7,500,000 of the Company’s common stock during the period commencing upon the effective date of a registration statement registering the shares of common stock underlying the equity line (the “Equity Line”) and continuing for 24 months. The aggregate number of shares issuable by the Company and purchasable by Kodiak under the Investment Agreement will be determined by the purchase prices for the common stock, as determined under the terms of the Investment Agreement. Upon execution of the Investment Agreement, the Company issued to Kodiak 1,875,000 commitment shares of newly-issued common stock.

Contemporaneously with the execution and delivery of the Investment Agreement, the Company and Kodiak executed and delivered a Registration Rights Agreement (“Registration Rights Agreement”) pursuant to which the Company has agreed to provide certain registration rights under the 1933 Act, and the rules and regulations promulgated thereunder, and applicable state securities laws.

The Company may draw on the facility from time to time, as and when it determines appropriate in accordance with the terms and conditions of the Investment Agreement. The amount that the Company is entitled to put in any one notice shall be up to \$75,000, at the Company's election. Kodiak’s purchase price for each put is set at ninety percent (90%) of the lowest posted closing bid price of the Company’s common stock during the five (5) trading days after the date of the put notice. The Company will not be entitled to put shares to Kodiak unless (a) there is an effective registration statement under the Securities Act to cover the sale of the shares to Kodiak, (b) the Company’s common stock continues to be quoted on the OTC Bulletin Board, or becomes listed on a national securities exchange, and (c) the issuance of the shares would not cause Kodiak’s beneficial ownership to exceed 9.99% of the outstanding shares.

Pursuant to the terms of the Registration Rights Agreement, the Company has agreed to use its best efforts to file a registration statement with the SEC to register the sale to Kodiak of shares of common stock issued or issuable under the Investment Agreement.

On August 24, 2012, Martin J. Rucidlo was engaged by the Company to serve as the President of the Company. Mr. Rucidlo replaced Stephen S. Burns who resigned as President. Mr. Burns continues to serve as a director as well as Chief Executive Officer, Secretary and Treasurer of the Company. On August 24, 2012, Mr. Rucidlo entered into a letter agreement with the Company pursuant to which he was appointed as the President of the Company in consideration of an annual salary of \$125,000. As additional compensation, the Company granted Mr. Rucidlo options to purchase 300,000 shares of the Company’s common stock at an exercise price of \$0.21 per share. The options will expire three years from the vesting period with 90,000 options vesting upon the signing of the Agreement and 105,000 options vesting each of the following two years on the anniversary date of the Agreement for a total of 300,000 shares.

In September 2012, the Company settled outstanding invoices for legal services totaling \$40,000 by issuing 400,000 shares of common stock.

On March 13, 2013 the Company agreed to compensate a business development consultant for work performed relating to the Workhorse Custom Chassis purchase by issuing 1,125,000 shares of common stock at a cost basis of \$0.20 per share and a cash payment of \$25,000. Additionally, on March 13, 2013 the Company agreed to compensate a consultant that performed due diligence work related to the Workhorse Custom Chassis purchase by issuing 50,000 shares of common stock at a cost basis of \$0.23 per share.

On March 15, 2013 the Company established the 2013 Incentive Stock Plan to retain directors, executives and selected employees and consultants and reward them for making major contributions to the success of the Company. The total number of shares of common stock that may be purchased by Options, Stock Awards, or Restricted Stock Purchase Offers may not exceed 5,000,000. The exercise price of the options shall be no less than 100% of the Fair Market Value of the stock as of the date of grant, unless the holder owns more than 10% of the Company Stock in which case the Fair Market Value shall be no less than 110%. The exercise period shall be no more than five years. No shares shall become exercisable until the first anniversary date. Shares exercisable on the first anniversary date shall be 20% or more. On March 15, 2013 the Company granted 1,100,000 common stock options, from the 2013 Incentive Stock Plan, to certain executives and employees of the Company for work on the Workhorse Custom Chassis purchase. The options are exercisable at \$0.29 per share for a period of five years and vest 20% on March 15, 2014, 20% on March 15, 2015, 20% on March 15, 2016 and 40% on March 15, 2017.

Forward Looking Statements

Some of the statements contained in this Form 10-K that are not historical facts are "forward-looking statements" which can be identified by the use of terminology such as "estimates," "projects," "plans," "believes," "expects," "anticipates," "intends," or the negative or other variations, or by discussions of strategy that involve risks and uncertainties. We urge you to be cautious of the forward-looking statements, that such statements, which are contained in this Form 10-K, reflect our current beliefs with respect to future events and involve known and unknown risks, uncertainties and other factors affecting our operations, market growth, services, products and licenses. No assurances can be given regarding the achievement of future results, as actual results may differ materially as a result of the risks we face, and actual events may differ from the assumptions underlying the statements that have been made regarding anticipated events. Factors that may cause actual results, our performance or achievements, or industry results, to differ materially from those contemplated by such forward-looking statements include without limitation:

- Our ability to attract and retain management
- Our ability to raise capital when needed and on acceptable terms and conditions
- The intensity of competition
- General economic conditions
- Changes in regulations
- Whether the market for electric vehicles continues to grow, and, if it does, the pace at which it may grow
- Our ability to compete against large competitors in a rapidly changing market for electric vehicles

All written and oral forward-looking statements made in connection with this Form 10-K that are attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. Given the uncertainties that surround such statements, you are cautioned not to place undue reliance on such forward-looking statements.

Our Plan of Operation should be read in conjunction with our financial statements included herein.

Overview

On December 28, 2009, AMP Holding Inc. entered into and closed a Share Exchange Agreement with the AMP shareholders pursuant to which we acquired 100% of the outstanding securities of AMP in exchange for 14,890,904 shares of our common stock. Considering that, following the merger, the AMP Shareholders control the majority of our outstanding voting common stock and we effectively succeeded our otherwise minimal operations to those that are theirs, AMP is considered the accounting acquirer in this reverse-merger transaction. A reverse-merger transaction is considered, and accounted for as, a capital transaction in substance; it is equivalent to the issuance of AMP securities for our net monetary assets, which are de minimus, accompanied by a recapitalization. Accordingly, we have not recognized any goodwill or other intangible assets in connection with this reverse merger transaction. AMP is the surviving and continuing entities and the historical financials following the reverse merger transaction will be those of AMP. We were a "shell company" (as such term is defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended) immediately prior to our acquisition of AMP pursuant to the terms of the Share Exchange Agreement. As a result of such acquisition, we were initially focused on developing automotive electric drive trains but have subsequently shifted our focus to the design, engineering, marketing and sale of both repowered and new class 3 through 6 commercial trucks with an all-electric drivetrain and battery system. Consequently, we believe that acquisition caused us to cease to be a shell company as we no longer have nominal operations. Since that time, we

have devoted the majority of our resources to the development of an all-electric drive system capable of moving heavy large vehicles ranging from full size SUV's up to and including Medium Duty Commercial trucks.

Additionally, as a subsequent event, in February 2013 AMP Holding formed a new wholly owned subsidiary, AMP Trucks Inc., an Indiana corporation. On March 13, 2013 AMP Trucks Inc. closed on the acquisition of assets of Workhorse Custom Chassis LLC ("Workhorse"). The assets included in this transaction were: the Workhorse® brand, access to the dealer network of 440 dealers nationwide, intellectual property, and all physical assets which include the approximately 250,000 sq. ft. of facilities on 48 acres of land in Union City, Indiana (the "Workhorse Assets"). We believe this acquisition propels AMP Holding Inc. into the unique position as a medium duty OEM which we believe will be capable of producing new chassis with electric, propane, compressed natural gas, and hybrid configurations, as well as gasoline drive systems.

Results of Operations

Year Ended December 31, 2012 Compared to Year Ended December 31, 2011

Revenue. Revenue was \$272,098 for the year ended December 31, 2012 and consisted of a limited number of converted experimental vehicles. Revenue was \$190,035 for the year ended December 31, 2011 and consisted of a limited number of customer conversions.

Expenses. Our expenses for the year ended December 31, 2012 were \$4,544,587 and included payroll and payroll taxes (\$1,773,232), stock based compensation (\$338,853), legal and professional (\$709,883), advertising (429,483), and batteries, motors and supplies (\$240,907). Our expenses for the year ended December 31, 2011 were \$8,895,746 and included payroll and payroll taxes (\$2,903,916), stock based compensation (\$2,002,891), batteries, motors and supplies (\$1,131,467), consulting (\$759,791), and legal and professional (\$546,866). The major reasons for the decrease in comparing the year ended 2012 to 2011 was a change in emphasis from automotive to truck development (battery, motors, and supply expense dropped by \$890,560), a reduction in the number of employees (payroll and payroll taxes dropped by \$1,130,684), and a decrease in stock based compensation (dropped by \$1,664,038). These three items accounted for 85% of the \$4,351,159 decrease in expense from 2011 to 2012.

Table of Contents

Net loss. Net loss for the years ended December 31, 2012 and 2011 were \$4,272,489 and \$8,705,711, respectively.

Liquidity and Capital Resources

As of December 31, 2012, we had current assets of \$93,846 including cash of \$39,819 and current liabilities of \$2,438,540. As of December 31, 2011, we had current assets of \$267,717 including cash of \$89,488 and current liabilities of \$1,936,648.

Operating Activities

Our operating activities from continuing operations resulted in net cash used by operations of \$2,201,281 for the year ended December 31, 2012 compared to net cash used by operations of \$5,878,893 for the year ended December 31, 2011. The net cash used by operations for the year ended December 31, 2012 reflects a net loss of \$4,272,489 offset by the following items that reconcile net loss from operations to cash used by operations: stock based compensation of \$338,853, amortized discount on convertible debentures of \$91,493, depreciation of \$63,629, loss on sale of assets of \$14,454, interest expense of \$106,164 on convertible debentures converted to common stock, and \$773,000 of legal and professional services accepted as consideration for issuance of common stock. The net cash used by operations for the year ended December 31, 2012 was also impacted by the following changes in operating assets and liabilities: increases in accounts payable of \$399,497, accounts payable, related parties of \$124,916 and customer deposits of \$35,000, and decreases in inventory of \$80,998, prepaid expenses and deposits of \$38,185, and accounts receivable of \$5,019. The net cash used by operations for the year ended December 31, 2011 reflects a net loss of \$8,705,711 offset by the following items that reconcile net loss from operations to cash used by operations: stock based compensation of \$2,002,891, depreciation of \$58,037, and loss on sale of assets of \$7,644. The net cash used by operations for the year ended December 31, 2011 was also impacted by the following changes in operating assets and liabilities: increases in account payables of \$915,945, inventory of \$122,000, prepaid expenses and deposits of \$41,355, and accounts payable, related parties of \$5,026, and decreases in accounts receivable of \$53,023 and customer deposits of \$52,393.

Investing Activities

Our investing activities for the year ended December 31, 2012 resulted in net cash outflow of \$22,753 including \$28,753 for the acquisition of equipment offset by proceeds of \$6,000 from the sale of equipment. Our investing activities for the year ended December 31, 2011 resulted in net cash outflow of \$156,750 for the acquisition of prototype vehicles, equipment and software.

Financing Activities

Our financing activities resulted in a cash inflow of \$2,174,365 for the year ended December 31, 2012 and included cash inflows from the issuance of convertible debentures of \$1,939,250 and shareholder advances, net of repayments, of \$246,000 and cash outflows for payments on long-term debt of \$10,885. During December 2012 accounts payable of \$513,636 were converted to notes payable. Our financing activities resulted in a cash inflow of \$5,739,838 for the year ended December 31, 2011 and included cash inflows from the issuance of common stock of \$5,427,016, shareholder advances, net of repayments, of \$269,000 and proceeds from long-term debt of \$50,000 and cash outflows for payments on long-term debt of \$6,178. Equipment valued at \$14,937 was acquired through debt financing in December 2011.

Presently, due to the lack of revenue we are not able to meet our operating and capital expenses. There is doubt about our ability to continue as a going concern, as the continuation of our business is dependent upon successful roll out of our products and maintaining a break even or profitable level of operations. We have incurred operating losses since

inception, and this is likely to continue through the fiscal year ending December 31, 2013. Our independent auditors, for the year ended December 31, 2012, have issued an opinion on our financial statements that raise substantial doubt about our ability to continue as a going concern.

We require funds to enable us to address our minimum current and ongoing expenses, expand marketing and promotion activity connected with the development and marketing of our products and to generate market share. Our cash on hand will not be sufficient to satisfy all of our cash requirements as we continue to progress and expand. We estimate that we will require between \$8,000,000 and \$12,000,000 to carry out our business plan for the next twelve months. Because we cannot anticipate when we will be able to generate significant revenues from sales, we will need to raise additional funds to continue to finalize engineering design and validation, develop new business, respond to competitive pressures and to respond to unanticipated requirements or expenses. If we are not able to generate significant revenues from the sale of our products, we will not be able to maintain our operations or achieve a profitable level of operations.

Table of Contents

The financial requirements of our Company will be dependent upon the financial support through credit facilities and additional sales of our equity securities. The issuance of additional equity securities by us may result in a significant dilution in the equity interests of our current shareholders. Should additional financing be needed, there is no assurance that we will be able to obtain further funds required for our continued operations, or that additional financing will be available to us when needed, or if available, that it can be obtained on commercially reasonable terms. If we are not able to obtain the additional financing on a timely basis, we will not be able to meet our other obligations as they become due and we will be forced to scale down or perhaps even cease our operations.

We can give no assurance that we will be successful in implementing any phase, all phases of the proposed business plan, or that we will be able to continue as a going concern.

Credit Facility

Presently we have no revolving Credit Facility established. There is no guarantee that we will be able to enter into an agreement to establish a line of credit or that if we do enter into such agreement that it will be on favorable terms.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Federal Tax Credit Qualification by the IRS

The Company has been qualified by the IRS for a vehicle federal tax credit of up to \$7,500. The Company joins a list of plug-in electric drive motor vehicle manufacturers, including Ford Motor Company, General Motors Corporation, Tesla, Toyota, and 13 EV manufacturers in all, qualifying purchasers for up to a \$7,500 tax credit when purchasing an electric vehicle.

Additionally, many states offer additional sales tax exemptions and zero emission tax credits of up to \$5,000 that can also be applied to the purchase.

California Air Resources Board Approval

On February 20, 2013 the California Air Resource Board (CARB) approved the medium to heavy duty AMP commercial truck for sale in the state of California. Most other states use this approval for sale of vehicles in their state.

Critical Accounting Policies and Estimates

The following accounting principles and practices of AMP are set forth to facilitate the understanding of data presented in the consolidated financial statements:

Nature of operations

A development stage company, AMP is a technology-driven business that that plans to deliver a full-performance, all electric, powertrain for medium duty commercial vehicles. Operating with three specific approaches, AMP converts existing internal combustion engine based vehicles to all electric powertrains, provides original equipment manufacturers (OEM's) with AMP designed and integrated modular electric components, and provides electric

powertrain engineering to end-users. AMP has not recorded significant revenue since inception in February 2007, and is developing its operations through a sale, design and manufacturing facility located near Cincinnati, Ohio.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Property and depreciation

Property and equipment is recorded at cost. Depreciation is provided on the straight-line and accelerated methods over the estimated useful lives of the respective assets.

Advertising

Advertising and public relation costs are charged to operations when incurred. Advertising and public relation expense was approximately \$429,000 and \$294,000 for the years ended December 31, 2012 and 2011, respectively, and \$1,266,000 for the period from inception to December 31, 2012.

Table of Contents

Income taxes

With the consent of its shareholders, at the date of inception, AMP elected under the Internal Revenue Code to be taxed as an S corporation. Since shareholders of an S corporation are taxed on their proportionate share of the Company's taxable income, an S corporation is generally not subject to either federal or state income taxes at the corporate level. On December 28, 2009 pursuant to the merger transaction the company revoked its election to be taxed as an S-corporation. As no taxable income has occurred from the date of this merger to December 31, 2012 cumulative deferred tax assets of approximately \$4,828,000 are fully reserved, and no provision or liability for federal or state income taxes has been included in the financial statements. Net operating losses of approximately \$3,600,000 are available for carryover to be used against taxable income generated through 2030, net operating losses of approximately \$6,700,000 are available for carryover to be used against taxable income generated through 2031, and net operating losses of approximately \$3,900,000 are available for carryover to be used against taxable income generated through 2032. The Company had not filed income tax returns during its period as a shell company.

Research and development costs

Research and development costs are expensed as they are incurred. Research and development expense incurred was approximately \$2,077,000 and \$4,835,000 for the years ended December 31, 2012 and 2011, respectively, and \$11,691,000 for the period from inception to December 31, 2012 consisting of consulting, payroll and payroll taxes, engineering temporaries, purchased supplies, legal fees, parts and small tools.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
AMP Holding Inc. (A Developing Stage Company)
Cincinnati, Ohio

We have audited the accompanying balance sheets of AMP Holding Inc. (A Development Stage Company) as of December 31, 2012 and 2011 and the related statements of operations, stockholders' equity (deficit), and cash flows for the years then ended and for the period from inception, February 20, 2007, to December 31, 2012. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of AMP Holding Inc. as of December 31, 2012 and 2011, and the results of its operations and its cash flows for the years then ended and for the period from inception, February 20, 2007, to December 31, 2012 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As described in note 1, the Company has not had significant sales and has negative working capital and stockholder's deficits, which raise substantial doubt about its ability to continue as a going concern. Management's plan in regard to this matter is also discussed in note 1. The financial statements do not include any adjustments that might result from the outcome of these uncertainties.

Notes to Financial Statements

December 31, 2012 and 2011
and for the Period From Inception,
February 20, 2007 to December 30, 2012

1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

The following accounting principles and practices are set forth to facilitate the understanding of data presented in the financial statements:

Nature of operations

AMP Holding Inc., formerly known as Title Starts Online, Inc. (the Company), incorporated in the State of Nevada in 2007 with \$3,100 of capital from the issuance of common shares to the founding shareholder. On August 11, 2008 the Company received a Notice of Effectiveness from the U.S. Securities and Exchange Commission, and on September 18, 2008, the Company closed a public offering in which it accepted subscriptions for an aggregate of 200,000 shares of its common stock, raising \$50,000 less offering costs of \$46,234. With this limited capital the Company did not commence operations and remained a “shell company” (as defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended).

On December 28, 2009, the Company entered into and closed a Share Exchange Agreement with the Shareholders of Advanced Mechanical Products, Inc. (n/k/a AMP Electric Vehicles, Inc.) (AMP) pursuant to which the Company acquired 100% of the outstanding securities of AMP in exchange for 14,890,904 shares of the Company’s common stock. Considering that, following the merger, the AMP Shareholders control the majority of the outstanding voting common stock of the Company, and effectively succeeded the Company’s otherwise minimal operations to those that are AMP. AMP is considered the accounting acquirer in this reverse-merger transaction. A reverse-merger transaction is considered and accounted for as a capital transaction in substance; it is equivalent to the issuance of AMP securities for net monetary assets of the Company, which are de minimus, accompanied by a recapitalization. Accordingly, goodwill or other intangible assets have not been recognized in connection with this reverse merger transaction. AMP is the surviving entity and the historical financials following the reverse merger transaction will be those of AMP. The Company was a shell company immediately prior to the acquisition of AMP pursuant to the terms of the Share Exchange Agreement. As a result of such acquisition, the Company operations are now focused on the design, marketing and sale of modified automobiles with an all-electric power train and battery systems. Consequently, we believe that acquisition has caused the Company to cease to be a shell company as it now has operations. The Company formally changed its name to AMP Holding Inc. on May 24, 2010.

Since the acquisition, the Company has devoted the majority of its resources to the development of an all-electric drive system capable of moving heavy large vehicles ranging from full size SUV’s up to and including Medium Duty Commercial trucks. Additionally, as a subsequent event in February, 2013 AMP Holding Inc. formed a new wholly owned subsidiary, AMP Trucks Inc., an Indiana corporation. On March 13, 2013 AMP Trucks Inc. closed on the acquisition of an asset purchase of Workhorse Custom Chassis. The assets included in this transaction include: The Workhorse brand, access to the dealer network of 440 dealers nationwide, intellectual property, and all physical assets which include the approximately 250,000 sq. ft. of facilities on 48 acres of land in Union City, Indiana. This acquisition allows AMP Holding Inc. the position as a medium duty OEM capable of producing new chassis with electric, propane, compressed natural gas, and hybrid configurations, as well as gasoline drive systems. Revenues since the inception of the Company, February 20, 2007, through the date of these financial statements have not been significant and consist of customer vehicle conversions and sales of converted experimental vehicles.

Development stage company

Based on the Company's business plan, it is a development stage company since planned principal operations resulting in revenue have not fully commenced. Accordingly, the Company presents its financial statements in conformity with the accounting principles generally accepted in the United States of America that apply to developing enterprises. As a development stage enterprise, the Company discloses its retained earnings (or deficit accumulated) during the development stage and the cumulative statements of operations and cash flows from commencement of development stage to the current balance sheet date. The development stage began in 2007 when the Company was organized.

Basis of presentation

The financial statements have been prepared on a going concern basis, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, the Company has limited revenues and has negative working capital and stockholders' deficits. During 2012 the lack of liquidity delayed the Company from paying its employees their full salaries. Employee layoffs have occurred and additional layoffs are considered as a means of conserving cash. These conditions raise substantial doubt about the ability of the Company to continue as a going concern.

In view of these matters, continuation as a going concern is dependent upon the continued operations of the Company, which in turn is dependent upon the Company's ability to meet its financial requirements, raise additional capital, and the success of its future operations. The financial statements do not include any adjustments to the amount and classification of assets and liabilities that may be necessary should the Company not continue as a going concern.

The Company has continued to raise capital. Management believes the proceeds from these offerings, future offerings, and the Company's anticipated revenue provides an opportunity to continue as a going concern. If additional funding is required, the Company plans to obtain working capital from either debt or equity financing from the sale of common, preferred stock, and/or convertible debentures. Obtaining such working capital is not assured.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates.

Certain reclassifications were made to the prior year financial statements to conform to the current year presentation. These reclassifications had no effect on previously reported results of operation or stockholders' equity (deficit).

Financial instruments

The carrying amounts of financial instruments including cash, accounts receivable, inventory, cash overdraft, accounts payable and short-term debt approximate fair value because of the relatively short maturity of these instruments.

Inventory

Inventory, stated at cost, includes a vehicle which may be converted for sale.

and for the Period From Inception,

Property and depreciation

Property and equipment is recorded at cost. Major renewals and improvements are capitalized while replacements, maintenance and repairs, which do not improve or extend the lives of the respective assets, are expensed. When property and equipment is retired or otherwise disposed of, a gain or loss is realized for the difference between the net book value of the asset and the proceeds realized thereon. Depreciation is calculated using the straight-line method, based upon the following estimated useful lives:

Software: 6 years

Equipment: 5 years

Vehicles and prototypes: 3 - 5 years

Capital stock

On April 22, 2010 the directors of the Company approved a forward stock split of the common stock of the Company on a 14:1 basis. On May 12, 2010 the stockholders of the Company voted to approve the amendment of the certificate of incorporation resulting in a decrease of the number of shares of Common stock. The Company filed a 14c definitive information statement with the Securities and Exchange Commission and mailed the same to its shareholders. Management filed the certificate of amendment decreasing the authorized shares of common stock with the State of Nevada on September 8, 2010.

The capital stock of the Company is as follows:

Preferred Stock - The Company has authorized 75,000,000 shares of preferred stock with a par value of \$.001 per share. These shares may be issued in series with such rights and preferences as may be determined by the Board of Directors. The Series A Stock is convertible, at any time at the option of the holder, into common shares of the Company based on a conversion price of \$0.336 per share. The holders of the Series A Stock are not entitled to convert the Series A Stock and receive shares of common stock such that the number of shares of common stock held by them in the aggregate and their affiliates after such conversion or exercise does not exceed 4.99% of the then issued and outstanding shares of common stock. The Series A Stock has voting rights on an as converted basis, does not pay dividends, and does not provide any liquidation rights.

Common Stock - The Company has authorized 250,000,000 shares of common stock with a par value of \$.001 per share.

Revenue recognition / customer deposits

It is the Company's policy that revenues will be recognized in accordance with SEC Staff Bulletin (SAB) No. 104, "Revenue Recognition". Under SAB 104, product revenues (or service revenues) are recognized when persuasive evidence of an arrangement exists, delivery has occurred (or service has been performed), the sales price is fixed and determinable, and collectability is reasonably assured. Customer deposits include monies from customers to reserve a production slot for conversion of an OEM power train to the AMP all electric power train. The final retail price and delivery date are yet to be determined. Customer deposits are subject to a full refund at the request of the customer.

Advertising

Advertising and public relation costs are charged to operations when incurred. Advertising and public relation expense was approximately \$429,000 and \$294,000 for the years ended December 31, 2012 and 2011, respectively, and \$1,266,000 for the period from inception to December 31, 2012 consisting primarily of consulting fees and travel and related expenses for attendance at car shows and industry expositions.

December 31, 2012 and 2011
and for the Period From Inception,
February 20, 2007 to December 30, 2012

Income taxes

With the consent of its shareholders, at the date of inception, AMP elected under the Internal Revenue Code to be taxed as an S corporation. Since shareholders of an S corporation are taxed on their proportionate share of the Company's taxable income, an S corporation is generally not subject to either federal or state income taxes at the corporate level. On December 28, 2009 pursuant to the merger transaction the Company revoked its election to be taxed as an S-corporation.

As no taxable income has occurred from the date of this merger to December 31, 2012 cumulative deferred tax assets of approximately \$4,828,000 are fully reserved, and no provision or liability for federal or state income taxes has been included in the financial statements. Net operating losses of approximately \$3,600,000 are available for carryover to be used against taxable income generated through 2030, net operating losses of approximately \$6,700,000 are available for carryover to be used against taxable income generated through 2031, and net operating losses of approximately \$3,900,000 are available for carryover to be used against taxable income generated through 2032. The Company had not filed income tax returns during its period as a shell company.

Uncertain tax positions

The Company adopted the provisions of Accounting for Uncertainty in Income Taxes. Those provisions clarify the accounting and recognition for income tax positions taken or expected to be taken in the Company's income tax returns. The Company's income tax filings are subject to audit by various taxing authorities. The years of filings open to these authorities and available for audit are 2009 - 2011. The Company's policy with regard to interest and penalties is to recognize interest through interest expense and penalties through other expense. No interest or penalties with regard to income tax filings were incurred in 2012 or 2011, or since the period of inception, February 20, 2007. In evaluating the Company's tax provisions and accruals, future taxable income, and the reversal of temporary differences, interpretations and tax planning strategies are considered. The Company believes their estimates are appropriate based on current facts and circumstances.

Research and development costs

The Company expenses research and development costs as they are incurred. Research and development expense incurred was approximately \$2,077,000 and \$4,835,000 for the years ended December 31, 2012, and 2011, respectively, and \$11,691,000 for the period from inception to December 31, 2012, consisting of consulting, payroll, payroll taxes, engineering temporaries, purchased supplies, legal fees, parts and small tools.

Basic and diluted loss per share

Basic loss per share is computed by dividing net loss available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. For all periods, all of the Company's common stock equivalents were excluded from the calculation of diluted loss per common share because they were anti-dilutive, due to the Company's net losses.

Stock based compensation

The Company accounts for its stock based compensation in accordance with “Share-Based Payments” (codified in FASB ASC Topic 718 and 505). The Company recognizes in its statement of operations the grant-date fair value of stock options and warrants issued to employees and non-employees. The fair value is estimated on the date of grant using a lattice-based valuation model that uses assumptions concerning expected volatility, expected term, and the expected risk-free rate of return. For the awards granted, the expected volatility was estimated by management as 50% based on a range of forecasted results. The expected term of the awards granted was assumed to be the contract life of the option or warrant (one, two, three, five or ten years as determined in the specific arrangement). The risk-free rate of return was based on market yields in effect on the date of each grant for United States Treasury debt securities with a maturity equal to the expected term of the award.

Related party transactions

Certain stockholders and stockholder family members have advanced funds or performed services for the Company. These services are believed to be at market rates for similar services from non-related parties. Related party accounts payable are segregated in the balance sheet. An experimental vehicle was sold to a stockholder in 2012 for \$50,000 and in 2010 for \$25,000, which also approximates the selling price to non-related parties.

Subsequent events

The Company evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements.

On January 29, 2013, the Company entered into a subscription agreement with an accredited investor pursuant to which the investor purchased 500,000 shares of the Company's common stock at a cost basis of \$0.20 per share, for a purchase price of \$100,000, together with a common stock purchase warrant to acquire 250,000 shares of common stock at \$0.40 per share for a period of three years.

In addition, on January 29, 2013, an accredited investor loaned the Company \$100,000. In consideration of such loan, the Company issued a Promissory Note which bears interest at 10% per annum and matures on January 29, 2014. The Note can be prepaid in whole or in part at any time without the consent of the holder provided that the Company shall pay all accrued interest on the principal to date of such prepayment. On February 21, 2013, the Company and the holder entered into a Conversion Agreement pursuant to which the parties converted the Note of January 29, 2013 into 500,000 shares of common stock of the Company at a cost basis of \$0.20 per share and a common stock purchase warrant to acquire 250,000 shares of common stock of the Company. The warrant is exercisable for three years at an exercise price of \$0.40.

On March 4, 2013, AMP Trucks Inc. ("AMP Trucks"), an Indiana corporation and a wholly-owned subsidiary of the Company, entered into an Asset Purchase Agreement with Workhorse Custom Chassis, LLC ("Workhorse"), an Illinois limited liability company and a wholly-owned affiliate of Navistar International Corporation, to purchase certain assets including the Workhorse ® brand, logo, intellectual property, patents and assembly plant in Union City, Indiana (the "Assets"). On March 13, 2013, AMP Trucks closed the acquisition of the Assets from Workhorse for a purchase price of \$5,000,000 of which \$2,750,000 was paid in cash and the delivery of a Secured Debenture (the "Debenture") in the principal amount of \$2,250,000. The Debenture is secured pursuant to a Security Agreement (the "Security Agreement") and a Mortgage, Security Agreement, Assignment of Rents and Fixture Filing (the "Mortgage") entered between AMP Trucks and Workhorse. Pursuant to the Security Agreement, AMP Trucks granted Workhorse a security interest in all of the assets of AMP Trucks in order to secure the prompt payment, performance and discharge in full of all of obligations of AMP Trucks under the Debenture. Pursuant to the Mortgage, the Debenture is secured by the real estate and related assets of the plant located in Union City, Indiana. The Debenture matures three years from its effective date of March 13, 2013 (the "Maturity Date") and interest associated with the Debenture is 10% per annum, which is payable on the Maturity Date. AMP Trucks may prepay outstanding principal and interest of the Debenture in full at any time. In the event AMP Trucks prepays outstanding principal and interest, it shall pay an amount equal to all outstanding principal and interest multiplied by 105%. AMP Trucks is obligated on \$2,250,000 in face amount of the Debenture. The Debenture is a debt obligation arising other than in the ordinary course of business which constitute direct financial obligations of AMP Trucks. The Company and AMP Electric Vehicles Inc., a wholly

owned subsidiary of the Company, guaranteed the payment of the Debenture.

On March 13, 2013, the Company entered into a subscription agreement with various accredited investors pursuant to which the investors purchased 17,925,000 shares of the Company's common stock at a cost basis of \$0.20 per share, for a purchase price of \$3,585,000, together with common stock purchase warrants to acquire 8,962,500 shares of common stock at \$0.40 per share for a period of three years.

2. LONG-TERM DEBT

Long-term debt consists of the following:

Note payable, Bank due in monthly installments of \$635 including interest at 5.04% with the final payment due August 2015. The note is secured by equipment with a net book value of \$17,831 at December 31, 2012	\$18,761	\$25,254
Note payable, vendor due in monthly installments of \$439 including interest at 8.00% with the final payment due December 2014. The note is secured by equipment with a net book value of \$11,700 at December 31, 2012	10,545	14,937
Note payable to the City of Loveland, due in annual installments of \$10,241 including interest with the final payment due October 2016. Interest rate amended to 8.00%. The note is unsecured and contains restrictions on the use of proceeds.	50,000	50,000
Note payable, vendor due in monthly installments of \$5,000 for the first half of 2013, escalating to final payment of \$43,736 in March 2014. Note is noninterest bearing and is unsecured.	281,236	-
Note payable, vendor due in monthly installments of \$2,000 plus interest at 4% for the first half of 2013, escalating to final payment of \$18,461 plus interest at 4% in December 2014. Note is unsecured.	232,400	-
	592,942	90,191
Less current portion	230,756	20,641
Long term debt	\$362,186	\$69,550

Aggregate maturities of long-term debt are as follows:

2013	\$230,756
2014	337,283
2015	14,738
2016	10,165
	\$592,942

The note payable to the City of Loveland contains job creation incentives whereby each annual payment may be forgiven by the City upon the Company meeting minimum job creation benchmarks. This loan agreement amended the incentives to 30 full time employees within the City of Loveland with payroll totaling \$135,000 by July 31, 2013 and 40 employees with payroll totaling \$175,000 by July 31, 2014, continuing with an average of 40 employees with payroll totaling \$175,000 thereafter. The proceeds from this loan were to be used for qualified disbursements only, and the Company has been notified it did not meet the requirements for qualified disbursements and for forgiveness of the 2012 principal and interest payment, which is now past due. In 2013 the Company will be required to make payments to an escrow account totaling \$22,900.

3. CONVERTIBLE DEBENTURES

From January 6, 2012 through August 3, 2012, the Company entered into Securities Purchase Agreements and Security Agreements with several accredited investors (the "2012 Investors") providing for the sale by the Company to the 2012 Investors of Secured Convertible Debentures in the aggregate amount of \$1,939,250 (the "2012 Notes"). The Company received the proceeds in connection with these financings between January 6, 2012 and August 3, 2012. Further a shareholder, director and officer converted secured and unsecured loans provided to the Company from September 30, 2011 to June 5, 2012 in the aggregate amount of \$389,250 into the 2012 Notes and 2012 Warrants. The 2012 Notes were to mature one year from their respective effective dates (the "Maturity Dates") and interest associated with the 2012 Notes was 10% per annum, payable on the Maturity Dates. In November 2012, the Company entered into a Note and Warrant Amendment and Conversion Agreement whereby the holders and the 2012 Investors converted all principal and interest under the 2012 Notes into 10,227,070 shares of common stock. Further, the exercise price of the 2012 Warrants was reduced to \$0.25 per share.

In addition to the 2012 Notes, the 2012 Investors also received common stock purchase warrants (the "2012 Warrants") to acquire 1,939,250 shares of common stock of the Company. The 2012 Warrants are exercisable for three years at an exercise price of \$0.50 per share, reduced to \$0.25 per share as noted above. The value of the detachable 2012 Warrants was determined using a lattice-based valuation model that used an expected volatility, estimated by management as 50% based on a range of forecasted results, and an expected risk-free rate of return, based on market yields in effect on the grant dates for United States Treasury debt securities with a three year maturity. The \$91,493 value of the detachable 2012 Warrants was recorded as an increase in additional paid-in capital and a discount against the 2012 Notes. The discount on the 2012 notes was amortized as interest expense during the period that the 2012 Notes were outstanding. Amortization charged to the Statement of Operations is \$91,493 for the year ended December 31, 2012.

The 2012 Notes and the 2012 Warrants carry standard anti-dilution provisions but in no event may the conversion price be reduced below \$0.25. Further, the 2012 Investors will have the right to participate in the next financing on a pro-rata basis up to \$1,000,000.

4. SHAREHOLDER AND RELATED PARTY ADVANCES

On November 30, 2009, a shareholder, director and officer of the company advanced \$43,000 to the Company for working capital needs. In consideration of such advance, the Company issued a promissory note with interest at 3% per annum due November 1, 2011. The maturity date for this note was extended to November 30, 2013.

In addition, on September 30, 2011, October 31, 2011, May 30, 2012, May 31, 2012 and June 5, 2012 the same shareholder advanced \$62,000, \$200,000, \$12,250, \$15,000 and \$100,000, respectively, to the Company for working capital needs. In consideration of these advances, the Company issued promissory notes with interest rates from 6% to 10% per annum due September 30, 2012. On June 30, 2012, these secured and unsecured loans in the aggregate amount of \$389,250 were converted into the 2012 notes and 2012 warrants.

In 2012 this shareholder also advanced \$33,600 to the Company for working capital needs, of which \$18,600 was repaid during 2012. In consideration of the \$15,000 remaining advance, the Company issued a promissory note with interest at 10% per annum due October 5, 2013.

During 2012 shareholders and related parties advanced \$500,000 to the Company for working capital needs. In consideration of such advances, the Company issued promissory notes with interest at 10% per annum due October 16, 2013. The notes are unsecured and require the Company to designate part of the proceeds of financing in excess of \$2,000,000 to be used for repayment of these notes. The Company is in violation of this covenant in 2013 as the "Subsequent Events" footnote to the financial statements reflects financing in excess of \$2,000,000 and repayment of these notes has not occurred.

5. LEASE OBLIGATIONS

On October 1, 2011 the Company began leasing operating facilities under an agreement expiring on September 30, 2018. Future minimum monthly lease payments under the agreement are currently \$12,231 and increase 3% in October of each year. Prepaid expenses and deposits include a security deposit equal to \$12,275. Aggregate maturities of lease obligations are as follows:

2013	\$ 147,876
2014	152,312
2015	156,881
2016	161,588
2017	166,436
2018	127,614
	\$ 912,707

The Company also leased office space for approximately \$1,000 per month on a month to month agreement through May 2012 and two apartments for approximately \$2,200 per month on month to month agreements through January 2012. Prior to October 2011 the Company leased operating facilities under terms of an operating type lease with monthly payments of \$8,500. Prior to December 2009 the Company leased office/warehouse space under terms of an operating type lease with monthly payments of \$1,650. Total rent expense under these operating type leases for the years ended December 31, 2012 and 2011 was \$148,569 and \$139,894, respectively, and \$451,998 for the period from inception to December 31, 2012.

6. STOCK BASED COMPENSATION

Options to directors, officers and employees

The Company maintains, as adopted by the board of directors, the 2012 Incentive Stock Plan, the 2011 Incentive Stock Plan and the 2010 Incentive Stock Plan (the plans) providing for the issuance of up to 6,000,000 options to employees, officers, directors or consultants of the Company. Incentive stock options granted under the plans may only be granted with an exercise price of not less than fair market value of the Company's common stock on the date of grant (110% of fair market value for incentive stock options granted to principal stockholders). Non-qualified stock options granted under the plans may only be granted with an exercise price of not less than 85% of the fair market value of the Company's common stock on the date of grant. Awards under the plans may be either vested or unvested options. The unvested options vest ratably over eight quarters for options with a five or three year term and after one year for options with a two year term.

In addition to the plans, the Company has granted, on various dates, stock options to directors, officers and employees to purchase common stock of the Company. The terms, exercise prices and vesting of these awards vary.

Warrants to accredited investors

From December 2010 through December 2011, common stock sold by the Company included common stock purchase warrants to acquire shares of common stock of the Company. For each ten shares sold, each investor received a warrant to purchase five shares of common stock for a period of two years at an exercise price of \$0.80 per share. In November 2012, the purchase warrants were modified to change the exercise period from two years to three years. The \$112 cost of this modification is included in stock based compensation expense for the year ended

December 31, 2012.

From January 2012 through August 2012, the 2012 Investors received 2012 Warrants to acquire common stock of the Company. The 2012 Warrants are exercisable for three years at an exercise price of \$0.50. In November 2012, the Company entered into a Note and Warrant Amendment and Conversion Agreement whereby the holders and the 2012 Investors converted all principal and interest under the 2012 Notes into shares of common stock. Further, the exercise price of the 2012 Warrants was reduced to \$0.25 per share. The \$20,795 cost of the reduction in the exercise price for accredited investors is included in stock based compensation expense for the year ended December 31, 2012.

7. RECENT PRONOUNCEMENTS

In May 2011 the FASB issued FASB Accounting Standards Update ("ASU") 2011-04, "Fair Value Measurement." The ASU is the result of joint efforts by the FASB and IASB to develop a single, converged fair value framework, that is, converged guidance on how (not when) to measure fair value and on what disclosures to provide about fair value measurements. While the ASU is largely consistent with existing fair value measurement principles in U.S. GAAP, it expands ASC 820's existing disclosure requirements for fair value measurements and makes other amendments. The ASU is effective for interim and annual reporting periods beginning after December 15, 2011. The Company has evaluated the provisions of ASU 2011-04 and has determined that it does not have a material impact on the Company's disclosures.

In December 2011, the FASB issued ASU No. 2011-11, "Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities" ("ASU No. 2011-11"). This ASU requires companies to disclose both net and gross information about assets and liabilities that have been offset, if any, and the related arrangements. The disclosures under this new guidance are required to be provided retrospectively for all comparative periods presented for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The Company has evaluated the provisions of ASU 2011-11 and has determined that it does not have a material impact on the Company's disclosures regarding financial condition, results of operations or cash flows.

In August 2012, the FASB issued ASU 2012-03, Technical Amendments and Corrections to SEC Sections – Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 114, Technical Amendments Pursuant to SEC Release No. 33-9250, and Corrections Related to FASB Accounting Standards Update 2010-22. Because the amendments in this ASU reflect only guidance modifications that the SEC had previously issued, the amendments have no incremental impact on the reporting entity.

In October 2012, the FASB issued ASU 2012-04, Technical Corrections and Improvements. The amendments in this update clarify the Codification or corrects unintended application of guidance and includes amendments identifying when the use of fair value should be linked to the definition of fair value in Topic 820, Fair Value Measurements. Amendments to the Codification without transition guidance are effective upon issuance for both public and nonpublic entities. For public entities, amendments subject to transition guidance will be effective for fiscal periods beginning after December 15, 2012.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

As of the end of the period covered by this Annual Report, our Chief Executive Officer and Interim Chief Financial Officer performed an evaluation of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on the evaluation and the identification of the material weaknesses in internal control over financial reporting described below, our Chief Executive Officer and Interim Chief Financial Officer concluded that, as of December 31, 2012, the Company's disclosure controls and procedures were not effective.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our Chief Executive Officer and Interim Chief Financial Officer have conducted an assessment of our internal control over financial reporting as of December 31, 2012. Management's assessment of internal control over financial reporting was conducted using the criteria in Internal Control over Financial Reporting – Guidance for Smaller Public Companies issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. In connection with management's assessment of our internal control over financial reporting as required under Section 404 of the Sarbanes-Oxley Act of 2002, we identified the following material weaknesses in our internal control over financial reporting as of December 31, 2012:

1. The Company has not established adequate financial reporting monitoring activities to mitigate the risk of management override, specifically because there are few employees and only one officer with management functions and therefore there is lack of segregation of duties.
2. There is a strong reliance on outside consultants to review and adjust the annual and quarterly financial statements, to monitor new accounting principles, and to ensure compliance with GAAP and SEC disclosure requirements.
3. There is a strong reliance on the external attorneys to review and edit the annual and quarterly filings and to ensure compliance with SEC disclosure requirements.
4. A formal audit committee has not been formed.

Because of the material weaknesses noted above, management has concluded that we did not maintain effective internal control over financial reporting as of December 31, 2012, based on Internal Control over Financial Reporting - Guidance for Smaller Public Companies issued by COSO.

Remediation of Material Weaknesses in Internal Control over Financial Reporting

As a small business, without a viable business and revenues, the Company does not have the resources to install a dedicated staff with deep expertise in all facets of SEC disclosure and GAAP compliance. As is the case with many small businesses, the Company will continue to work with its external auditors and attorneys as it relates to new accounting principles and changes to SEC disclosure requirements. The Company has found that this approach worked well in the past and believes it to be the most cost effective solution available for the foreseeable future.

The Company will conduct a review of existing sign-off and review procedures as well as document control protocols for critical accounting spreadsheets. The Company will also increase management's review of key financial documents and records.

As a small business, the Company does not have the resources to fund sufficient staff to ensure a complete segregation of responsibilities within the accounting function. However, Company management does review, and will increase the review of, financial statements on a monthly basis, and the Company's external auditor conducts reviews on a quarterly basis. These actions, in addition to the improvements identified above, will minimize any risk of a potential material misstatement occurring.

This Annual Report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to rules that permit the Company to provide only management's report in this annual report.

Table of Contents

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the fourth quarter ended December 31, 2012 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. On May 16, 2012, Paul Gonzales resigned as the Chief Financial Officer of the Company. Richard Calme, then current Controller, was appointed by the Company to serve as the Interim Chief Financial Officer. No new controller was hired. Martin J. Rucidlo, President, assists in reviewing financial information.

Item 9B. Other Information

Cash

The cash balance in mid-April 2013 is near zero. This will impact the payment of our outstanding accounts payable balance.

Payroll

On September 30, 2011, the September month-end payroll was adjusted to delay payment to AMP's officers and to pay its executives a reduced amount due to receipt of funds timing. These deferrals were paid on October 31, 2011. The December 31, 2011 payroll was paid on January 10, 2012 while the officers and executive payroll for December 2011 was further delayed until February 2, 2012 due to timing of receipt of funds. The March 2012 payroll for officers and executives has also been delayed and the remaining workforce was paid approximately 70% of their pay. Additionally, the Board of Directors agreed to defer their fees until significant investor funds are received. Board compensation has not been paid since August 2011. The 30% due employees for the March 2012 payroll was paid on April 30, 2012. April 2012 payroll for salaried employees was delayed and paid on May 7, 2012. Executive pay for April, 2012 has not been paid as of April 2013. May 2012 salaried payroll was delayed and paid on June 5, 2012. May 2012 executive pay has not been paid as of April 2013. Salaried June 2012 payroll was delayed and paid on July 6, 2012. June 2012 executive pay has not been paid as of April 2013. July 2012 payroll, including executive pay, was paid on time. August 2012 executive pay has not been paid as of April, 2013. September 2012 payroll was paid in full. October 2012 pay for executives and two salaried employees was delayed and has not been paid as of April 2013. Half of salaried payroll for November 2012 was delayed and paid on December 10, 2012; the other half of November 2012 salaried payroll and all executive pay was delayed and paid on December 21, 2012. Hourly payroll for December 2012 was delayed and paid on January 4, 2013. Salaried and executive payroll for December 2012 was delayed and paid on January 22, 2013. Hourly payroll for January 2013 was delayed and paid on February 6, 2013. Half of salaried and executive pay for January 2013 was delayed and paid on February 15, 2013; the other half was paid on February 21, 2013. All of February and March 2013 payroll was paid on time. Board and executive compensation for 2012 that was not paid as of December 31, 2012 has been included in the financial statements for the year ended December 31, 2012. Board and executive compensation for 2011 that was not paid as of December 31, 2011 has been included in the financial statements for the year ended December 31, 2011.

Accounts Payable

The company has numerous delinquent current obligations to suppliers, employees and business contracts. As of December 31, 2012 the accounts payable balance is \$1,253,228. Obligations are being prioritized for payment as the timing of receipt of funds allows. Proactive communications to suppliers for delinquent current obligations have been ongoing. Additionally, several suppliers have been offered common stock of the Company in exchange of foregoing the balance due to them. The two largest payables, totaling \$513,636 were converted to promissory notes during

December 2012 with monthly payment plans extending to March and December 2014.

Key Personnel Changes

Effective January 1, 2012, Lerick Chissus, Director of Supply Chain Management left the company to pursue other opportunities. His function is being performed with internal Company resources.

Effective February 1, 2012 Al Pizzimenti, Director of Vehicle Engineering, left the company. His function is being performed by Don Wires.

CORPORATE GOVERNANCE

Governance Policies of the Board of Directors

The Board of Directors has adopted Governance Policies of the Board of Directors to assist the Board in the exercise of its duties and responsibilities and to serve the best interests of the Company and its stockholders. These policies provide a framework for the conduct of the Board's business.

Committees

The Board of Directors is currently evaluating committee charters with the goal of establishing the following committees: Governance Committee, Compensation Committee, Personnel Committee, and Audit Committee. The Board of Directors does not have a standing nominating committee. Nominations for election to the Board of Directors may be made by the Board of Directors or by any shareholder entitled to vote for the election of directors in accordance with our bylaws and Nevada law.

Meetings may be held from time to time to consider matters for which approval of our Board of Directors is desirable or is required by law.

Code of Ethics

We have implemented a corporate code of ethics.

Company Policies

The Company has established the following written policies that have been distributed and reviewed with all Company employees: Approval policy, Purchase Requisition policy, Conflict of Interest policy, "Do the Right Thing (ethics) policy and a Travel and Expense policy.

Compensation of Directors

We have entered into the following arrangement:

On October 11, 2010, Mr. Taylor entered into a letter agreement with the Company pursuant to which he was appointed as a director of the Company in consideration of an annual fee of \$40,000. Additionally, the Company granted Mr. Taylor options to purchase 325,000 shares of the Company's common stock at \$0.68 per share. The options will expire five years from the vesting period with 75,000 options vesting upon the signing of the agreement and 50,000 every six months thereafter for a total of 325,000 shares.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934, as amended, requires our directors and executive officers and persons who own more than 10% of the issued and outstanding shares of our common stock to file reports of initial ownership of common stock and other equity securities and subsequent changes in that ownership with the SEC. Officers, directors and greater than ten percent stockholders are required by SEC regulation to furnish us with copies of all Section 16(a) forms they file. To our knowledge, based solely on a review of the copies of such reports furnished to us and written representations that no other reports were required, during the fiscal year ended December 31, 2012 all Section 16(a) filing requirements applicable to our officers, directors and greater than 10% beneficial owners were complied with.

Employment Agreements

James E. Taylor Employment Agreement

On December 8, 2010, James E. Taylor entered into an employment agreement with the Company pursuant to which he was appointed as the Chief Executive Officer and Vice-Chairman of the Company in consideration of an annual salary of \$300,000. Additionally, Mr. Taylor will be eligible for annual bonuses with a target amount of 100% of his salary. The actual amount of any bonus may be more or less than such target and will be determined by the board of directors in its absolute discretion. Half of the bonus may be paid, in the Company's discretion, in unregistered shares of common stock at a price per share equal to the weighted average closing price per share of the common stock over the twenty most recent trading days prior to such grant. In addition to the salary and any bonus, Mr. Taylor will be entitled to receive health and fringe benefits that are generally available to the Company's management employees. As additional compensation, the Company granted Mr. Taylor options to acquire 1,200,000 shares of common stock at an exercise price of \$0.72 per share for a period of ten years. The Company also provided Mr. Taylor with a common stock purchase warrant to acquire 600,000 shares of common stock exercisable at any time in the five years following the signing of the agreement at an exercise price of \$2.00 per share. Effective August 10, 2012, Mr. Taylor resigned as the CEO of the Company and continues to serve as the Chairman of the Board of Directors. As of December 31, 2012, payroll in the amount of \$87,500 was due and payable and included in accounts payable, based on terms of Mr. Taylor's employment agreement.

Stephen S. Burns Employment Agreement

On December 8, 2010, Stephen S. Burns entered into an employment agreement with the Company pursuant to which he was appointed as the President of the Company in consideration of an annual salary of \$200,000, however, only 50% of the salary (\$100,000) will be payable at this time. The remaining 50% of the salary will accrue and be deferred until the board of directors elects to increase the salary to include all or a portion of the deferred salary based on certain events. Additionally, Mr. Burns will be eligible for annual bonuses with a target amount of 100% of his salary. The actual amount of any bonus may be more or less than such target and will be determined by the Board in its absolute discretion. Half of the bonus may be paid, in the Company's discretion, in unregistered shares of common stock at a price per share equal to the weighted average closing price per share of the common stock over the twenty most recent trading days prior to such grant. In addition to the salary and any bonus, Mr. Burns will be entitled to receive health and fringe benefits that are generally available to the Company's management employees in accordance with the then existing terms and conditions of the Company's policies. As additional compensation, the Company granted Mr. Burns options to acquire 300,000 shares of common stock at an exercise price of \$0.72 per share for a period of ten years. The Company also provided Mr. Burns with a common stock purchase warrant to acquire 300,000 shares of Common Stock exercisable at any time in the five years following the signing of the agreement at an exercise price of \$2.00 per share. Effective August 24, 2012, Mr. Burns resigned as President and continues to serve as a director as well as Chief Executive Officer, Secretary and Treasurer of the Company. As of December 31, 2012, payroll in the amount of \$108,335 was due and payable and included in accounts payable, based on terms of Mr. Burns's employment agreement.

Martin J. Rucidlo Employment Agreement

On August 24, 2012, Martin J. Rucidlo was engaged by the Company to serve as the President of the Company. Mr. Rucidlo replaced Stephen S. Burns who resigned as President and continues to serve as a director as well as Chief Executive Officer, Secretary and Treasurer of the Company. On August 24, 2012, Mr. Rucidlo entered into a letter agreement with the Company pursuant to which he was appointed as the President of the Company in consideration of an annual salary of \$125,000. As additional compensation, the Company granted Mr. Rucidlo options to purchase 300,000 shares of the Company's common stock at an exercise price of \$0.21 per share. The options will expire three years from the vesting period with 90,000 options vesting upon the signing of the Agreement and 105,000 options vesting each of the following two years on the anniversary date of the Agreement for a total of 300,000 shares. As of December 31, 2012, payroll in the amount of \$52,085 was due and payable and included in accounts payable, based on terms of Mr. Rucidlo's employment agreement.

Paul V. Gonzales Employment Agreement

On January 12, 2011, Paul V. Gonzales entered into an employment agreement with the Company pursuant to which he was appointed as the Chief Financial Officer of the Company in consideration of an annual salary of \$150,000. Additionally, Mr. Gonzales will be eligible for annual bonuses with a target amount of 100% of his salary. The actual amount of any bonus may be more or less than such target and will be determined by the CEO of the Company in his discretion pursuant to certain guidelines and parameters set by the Board of Directors. Half of the bonus may be paid, in the CEO's discretion in unregistered shares of common stock at a price per share equal to the weighted average closing price per share of the common stock over the twenty most recent trading days prior to such grant. In addition to the salary and any bonus, Mr. Gonzales will be entitled to receive health and fringe benefits that are generally available to the Company's management employees. As additional compensation, the Company granted Mr. Gonzales options to acquire 200,000 shares of common stock at an exercise price of \$0.81 per share for a period of ten years. On May 16, 2012, Mr. Gonzales resigned as the Chief Financial Officer of the Company. As of December 31, 2012, payroll in the amount of \$37,500 was due and payable and included in accounts payable, based on terms of Mr. Gonzales's employment agreement.

** Less than 1%

- (1) Except as otherwise indicated, the address of each beneficial owner is c/o Advanced Mechanical Products, Inc., 100 Commerce Drive, Loveland, Ohio 45140
- (2) Applicable percentage ownership is based on 76,622,130 shares of common stock outstanding as of April 10, 2013, together with securities exercisable or convertible into shares of common stock within 60 days of April 10, 2013 for each stockholder. Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to securities. Shares of common stock that are currently exercisable or exercisable within 60 days of April 10, 2012 are deemed to be beneficially owned by the person holding such securities for the purpose of computing the percentage of ownership of such person, but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Transactions with Related Persons

At no time during the last two fiscal years has any executive officer, director or any member of these individuals' immediate families, any corporation or organization with whom any of these individuals is an affiliate or any trust or estate in which any of these individuals serves as a trustee or in a similar capacity or has a substantial beneficial interest been indebted to the Company or was involved in any transaction in which the amount exceeded \$120,000 and such person had a direct or indirect material interest.

Procedures for Approval of Related Party Transactions

Our Board of Directors is charged with reviewing and approving all potential related party transactions. All such related party transactions must then be reported under applicable SEC rules. We have not adopted other procedures for review, or standards for approval, of such transactions, but instead review them on a case-by-case basis.
