None.

PART I

Item 1. Description of Business.

INTRODUCTION.

AirTrax, Inc. ("AirTrax" or "Company") was incorporated in the State of New Jersey on April 17, 1997. On May 19, 1997, the Company entered into a merger agreement with a predecessor company that was incorporated on May 10, 1995. The Company was the surviving company in the merger.

Effective November 5, 1999, the Company merged with MAS Acquisition IX Corp (MAS), and was the surviving company in the merger. Pursuant to the Agreement and Plan of Merger, as amended, each share of common stock of MAS was converted to 0.00674 shares of AirTrax. After giving effect to fractional and other reductions, MAS shareholders received 57,280 shares of AirTrax as a result of the merger.

As used in this Form 10-KSB, the terms "Company" or "AirTrax" refers to AirTrax, Inc. and companies previously acquired.

AirTrax is a development stage company that has developed an omni-directional wheel technology intended to be used for various commercial applications.

The Company's maintains its administrative office at 870B Central Avenue, Hammonton, New Jersey 08037, its telephone number is (609) 567-7800, and its web-site is www.airtrax.com.

THE COMPANY.

OMNI-DIRECTIONAL TECHNOLOGY.

Prior History.

Omni directional vehicle technology has been the subject of research and development by universities, the Department of Defense, and industry for over 25 years. A Swedish inventor patented an early stage omni-directional wheel. Thereafter, the technology was purchased by the United States Navy and was advanced at the Naval Surface Warfare Center. The US Navy held the patent until its expiration in 1990. In 1996, the Navy transferred this technology to the Company for commercialization through a Cooperative Research and Development Agreement (CRADA).

Technology Description.

Since the technology transfer under the CRADA agreement, the Company has examined and redesigned many aspects of the system for use in various applications including forklifts and other material handling equipment. In this regard, the Company refined control software and hardware, and tested a variety of drive component features on its pilot omni directional forklift trucks and scissors-lifts. Extensive demonstrations of prototype vehicles for commercial and military users in combination with market research enabled the Company to direct its initial development efforts towards the material handling products, offering the best probability for successful market entry.

Management designed other aspects of its machine to complement the unique functionality of its omni-directional technology. In so doing, the Company achieved a virtually maintenance free unit which allows the operator free and unrestricted movement during operation. Each motor is AC powered eliminating brushes and commutators of conventional DC powered motors. The motors also are lubricated for life eliminating the need for grease jobs and fittings. The transmission uses a synthetic lubricant which is sealed for life. The joystick controls all vehicle movement, therefore conventional drive trains, steering racks, hydraulic valve levers, and foot pedals for braking and acceleration are all non-existent.

On a four-wheel omni-directional vehicle employing the Company's technology, each wheel has a separate electric or hydraulic motor, and the unit is capable of traveling in any direction. The motion of the vehicle is controlled by coordinating all four wheels through a microprocessor that receives input from an operator-controlled joystick. As stated above, the joystick controls all vehicle movement (starting, steering, and stopping). The framework of the Company's omni-directional forklift consists primarily of a steel frame mobilized with four omni-directional wheels. The electric or hydraulic motor for each wheel turns its own wheel hub. Each wheel hub is encircled with multiple tapered rollers that are offset 45 degrees. The tapered rollers, covered with polyurethane, are extremely durable. By independently controlling the rotation of each wheel, the vehicle has the capability of traveling in any direction. The technology allows the vehicle to move forward, laterally, diagonally, or completely rotate within its own footprint, thereby allowing it to move into confined spaces without difficulty. The navigational options of an omni-directional vehicle are virtually limitless. The omni-directional wheel can be manufactured in almost any size depending upon the application. For instance, management believes the wheel can be used on miniature vehicles or massive load-carrying vehicles.

Presently, the Company has incorporated omni-directional technology into four pilot forklifts and one scissors lift.

EXISTING AND PROPOSED PRODUCTS.

ATX Series Omni-Directional Forklift.

The Company anticipates that its omni-directional forklift will be available in the ATX and ATX-E series with rated lift capacities ranging from 3000 through 6000 pound, in increments of 1000 pounds.

ATX Series. The ATX series is the standard version featuring the revolutionary omni-directional technology. As described above, conventional steering racks and foot pedals are non-existent allowing impediment free ingress and egress. This forklift will deliver unequalled maneuverability providing significantly improved operating efficiencies in the materials handling industry. This model is expected to retail at prices higher than comparably sized standard forklifts.

ATX-E Series. This series will include the omni-directional technology, and will have a feature that permits the upper section of the forklift to extend and retract very similar to a reach forklift. The extend/retract feature effectively reduces the overall dimension of the machine while carrying a load to approximately 84 inches enabling it to traverse an eight-foot aisle sideways. At this time, the Company has initiated but not completed the engineering design and analysis of the ATX-E Series.

The Company expects the retail price of the ATX series forklift (3000 pound capacity rated) to range between \$35,900 to \$37,900 per unit. The retail price of a similar rated, standard (non-omni-directional) forklift ranges from \$18,000 to \$27,500 per unit. The ATX-E Series is expected to retail approximately \$5,000 more than the ATX-Series.

Omni-directional Wheelchair.

The Company has conducted a preliminary design of an omni-directional wheel for wheelchair applications. It will require additional funds to complete a structural and ergonomic design of a proto-type wheelchair, as well as to construct the proto-type for further evaluation and testing. Although management recognizes the potential utilitarian benefit of an omni-directional wheelchair, as well as the significant market potential, the Company cannot predict when it will be able to successfully develop and omni-directional wheelchair.

Military Products.

During 1999, the Company was awarded a Phase I research contract under the Department of Defense's Small Business Innovation Research program (SBIR) to develop an omni-directional Multiple Purpose Mobility Platform (MP2). Under the Phase I base contract, the Company studied the application of the omni-directional technology for military use and was supervised by the Naval Air Warfare Center Aircraft Division in Lakehurst, New Jersey. The contemplated use includes the installation of jet engines on military aircraft and the transportation of munitions and other military goods. The Company completed the Phase I base contract in 1999 and was subsequently awarded a Phase I option from NAWC to further define the uses of the MP2. In July 2000, the Company was awarded a Phase II research contract under the SBIR program. Under the Phase II contract, the Company will further study the feasibility of the MP2 for military purposes, and will culminate with the construction of one or more proto-type devices. This contract (with the option) will not exceed 42 months with contract revenues ranging from \$750,000 to \$1 million. Following the Phase II contract, the Company will seek a Phase III Indefinite Delivery, Indefinite Quantity (IDIQ) contract which will enable any branch of the US military to purchase product or services from the Company with a limit of \$25 million over a 5 year period. The Company has been advised by the US Navy that a non-SBIR sponsor (within a segment of the US Navy) for the MP2 program must be identified before a Phase II option is exercised and a Phase III IDIQ contract is awarded. Although management believes the underlying omni-directional technology for the proposed MP2 has significant potential for both commercial and military applications, the Company cannot predict whether any appreciable sales beyond the Phase II contract will result from the SBIR program.

In February 2002, the Company announced that a team consisting of General Dynamics Armament Systems of Burlington, Vermont, and the Company along with several other contractors has been selected for a contract award under a Broad Agency Announcement (BAA) issued by the U.S. Office of Naval Research Future Naval Capabilities in late 2001. The BAA relates to a semi-autonomous omni-directional, material-handling robot that can move cargo from the topside of a Navy vessel to spaces within the ship with minimum human oversight. The Company's omni-directional vehicle technology is a fundamental building block of this system. The contract recently has been formally awarded to General Dynamics, and the Company expects to receive the subcontract from General Dynamics during April 2002. The contract will consist of a base and option periods of approximately 12 months each. The Company estimates the prime contract to be approximately \$3.3 million, consisting of base award of approximately \$300,000, with the balance to be awarded at the option of the Navy. The Company expects to receive approximately \$755,000 of the total contract, of which \$55,000 is allocable to the base period with the balance allocable to the option period.

Other Products.

Since 1995, the Company and its predecessor have manufactured and sold a helicopter ground-handling device. Sales to date have been limited, and management believes that future sales will be insignificant. Although it has a patent on an omni-directional ground-handling device, the Company does not expect to develop this product at this time.

During 2000, the Company completed a feasibility study for a hybrid power supply module for forklifts and other battery powered mobility machines. It is designed to replace a standard battery enabling operation on either gas or battery power. The module will consist of a generator coupled to a specially designed battery with micro-processor controls. Its unique hybrid feature will enable a forklift to be powered indoors by battery without noise or exhaust pollution, and by gas in non-pollution sensitive areas. The battery is designed to re-charge during fossil fuel use thereby eliminating re-charging downtime customarily experienced by battery-powered forklifts. The Company has filed a patent application for the unique features of the hybrid power module. The further development of this product will be subject to available funds to complete an engineering design of module, consequently, the Company cannot predict whether it will be able to successfully develop this product.

CURRENT OPERATIONS.

Since 1995, substantially all of the Company's resources and operations have directed towards the development of the omni-directional wheel and related components for forklift and other material handling applications. Many of its components, including the unique shaped wheels, motors, and frames, have been specially designed by the Company and specially manufactured. Three pilot models of the commercial omni-directional forklift are currently operational. Additional testing and minor component refinement will be required prior to commercial production and sale. Testing by Underwriters Laboratory (UL), and by the Company to meet the stability standards of the American National Standards Institute (ANSI B56) also will be required. The Company anticipates that required testing will occur immediately after the establishment of commercial production, as UL testing must be performed on vehicles manufactured at the final assembly facility. However, the establishment of production and commercial sale of its ATX series forklift will be contingent upon the receipt of funds for working capital as described in Item 6. Management's Discussion and Analysis or Plan of Operation. Although management does not anticipate any material functionality defects during the final test period, the results of additional testing and component refinement may delay the initiation of product sales. Initial sales of the ATX series will be limited to 3,000 pound capacity rated models. Delivery of initial orders is anticipated to occur within 12 to 16 weeks from placement.

MANUFACTURING AND SUPPLIERS.

As of this date, the Company has not entered into a formal agreement for assembly and initial rollout of its forklift. In January 2002, the Company announced that it had reached an agreement in principle with an assembler located in New Brunswick, Canada. More recently, the Company and the assembler were unable to reach a mutually acceptable formal agreement, and the parties have terminated discussions regarding assembly of the vehicle, however discussions continue for parts fabrication and supply. Prior to this proposed arrangement, during 2001, the Company reported that it was unable to conclude its previously announced arrangement with Management Assistance & Concepts Corporation (MACC). As a result of MACC 's inability to meet the terms of the agreement, the Company retained a non-refundable deposit from MACC in the amount of \$50,000.

The Company has identified a number of potential contractors to provide the necessary assembly capabilities. However, in order for it to commence operations, the Company will need working capital for start-up costs, parts inventory, and other operational costs. The Company continues to seek sources of capital necessary to fund these costs (See Item 6. Management's Discussions and Analysis or Plan of Operation).

Components for the Company's forklifts consist of over the counter products and proprietary products that have been specially designed and manufactured by various suppliers in collaboration with the Company. The Company believes that continual refinements of certain components will occur during the first six months of initial production in response to user feedback. The Company will strive to improve product functionality which may require additional refinements in the future. The need for additional refinements on a continuing basis may slow projected product sales.

The Company considers the specially designed and manufactured products proprietary, and has entered into exclusive contractual agreements with certain suppliers to protect the proprietary nature of these products. These arrangements prohibit the supplier from producing the same or similar products for other companies. In addition, while the Company maintains single sources for the over the counter components, it believes that other sources are available if necessary.

MARKETING.

The Company has begun establishing a dealer network nationally and internationally for its forklift product line. Each dealer is an existing equipment distributor who will be granted a designated territory. In addition, each dealer will be required to purchase a number of forklifts commensurate with the size of its territory. In March 2001, the Company hired a director of dealer sales to establish a national dealer network. The Company initiated dealer solicitation during the second quarter of 2001. Further dealer solicitation will occur upon the commencement of a commercial production schedule. In addition, the Company plans to increase user awareness through direct mailings, television advertising, and trade shows.

MARKETS

Forklifts.

The Company's initial market focus will be directed to the forklift market. The Company believes the commercial version of the omni-directional forklift will revolutionize the materials handling and warehousing industries creating

potential markets globally. Industry data indicates that during 1998 approximately 174,000 and 550,000 units were sold in the United States and worldwide, respectively (Modern Materials Handling). Based upon an average per unit sale price of \$28,500 (Company estimate), the total market in the United States would approximate \$5 billion in 1998. This amount represents sales of a broad range of vehicles with price ranges from \$18,000 to \$27,500 for a standard 3000 pound rated vehicle to \$80,000 or more for specialty narrow aisle or side loaders. Of the total market, management expects to compete with mid-range electrical and gas powered riders, and some specialty narrow aisle or side loaders.

Man Lifts.

Man lifts are used in the construction and warehousing industries, and are ideally suited for omni directional technology. According to data provided by the United Department of Commerce, this market consists of approximately \$1.2 billion in annual sales. Man lifts range in size from single user lifts to large off road machines. Of the total market, the Company expects to compete with a range of indoor man lifts.

COMPETITION

The Company expects to confront competition from existing products, such as standard and very narrow aisle (VNA) forklifts, and from competing technologies. Competition with standard forklifts, which retails from \$18,000 to \$27,500, will be on the basis of utility, price, and reliability. The Company believes that it will compete favorably with a standard forklift for reliability, and that a purchase decision will be based upon weighing the operational advantages of the Company's products against its higher purchase price. VNA and sideloader forklifts retail between \$75,000 to \$150,000 and higher, and while the Company's ATX Series forklift is not very narrow aisle it can perform narrow aisle functions at a significantly less cost. The Company also is aware of multi-directional forklifts now being offered by other manufacturers that retail from \$42,000 and higher for the standard version. These newer products have improved operational features, however they are unable to travel in all directions, and hence are not omni-directional. These machines have to stop, turn all four wheels, and then proceed to drive in the sideward direction. Despite these improved operational features, management believes these manufacturers have adhered to older conventional methods and have added a substantial amount of parts to their forklifts to achieve the ability to move sideways, which contrasts with the design and features of the Company's product as discussed previously herein. Therefore to that extent, the Company believes that it maintains a competitive advantage to these newer products.

In addition to the above, many of these manufacturers are subsidiaries of major national and international equipment companies, and have significantly greater financial, engineering, marketing, distribution, and other resources than the Company. In addition, the patent on omni-directional technology expired in 1990. Although the Company has received patent protection for certain aspects of its technology, no assurances can be given that such patent protection will effectively thwart competition.

PATENTS AND PROPRIETARY RIGHTS

In January 2002, the Company received a US patent (#6,340,065) encompassing certain aspects of the omni-directional wheel, as well as features specific to the forklift, with two divisional patent applications pending. The Company also anticipates that it will make future patent applications relating to various other aspects of its omni-directional technology. Recently, the Company filed a patent application for its power module. The Company also has made a preliminary filing for foreign patent protection comporting with the patent application filed in the United States. At this time, no foreign patents have been issued for any of the Company's technology. The Company also seeks to protect its proprietary technology through exclusive supply contracts with manufacturers for specially designed and manufactured components. In December 1997, the Company was awarded a patent for an omni-directional helicopter ground-handling device.

BACKLOG

The Company had no backlog for the year ended December 31, 2001. There is no seasonal impact on the Company's sales.

FACILITIES

The Company maintains its administrative offices at 870B Central Avenue, Hammonton, New Jersey 08361 on premises owned by the president of the Company. As of December 31, 2000, the arrangement between the parties has been rent-free. In addition, the Company maintains limited offices at H&R Industries, Inc. ("H&R Industries"), located at 100 Park Avenue, Warminster, Pennsylvania 18974. H&R Industries provides contract manufacturing and assembly services to the Company. As of December 31, 2000, the arrangement between the parties has been rent-free.

PRODUCT LIABILITY

Due to nature of the Company's business, the Company may face claims for product liability resulting from the use or operation of the Company's forklifts or other products.

Presently, the Company does not maintain any product liability insurance. It intends to obtain such insurance commensurate with the initial shipment of its omni-directional forklifts.

EMPLOYEES

As of December 31, 2000, the Company has five employees which includes its President and Executive Vice President. The Company has no collective bargaining agreements with its employees and believes its relations with its employees are good.

Item 2. Description of Property.

The Company maintains its administrative offices at 870B Central Avenue, Hammonton, New Jersey 08037 on premises owned by the president of the Company. As of December 31, 2000, the arrangement between the parties has been rent-free. In addition, the Company maintains limited offices at H&R Industries, Inc. ("H&R Industries"), located at 100 Park Avenue, Warminster, Pennsylvania 18974. H&R Industries provides contract manufacturing and assembly services to the Company. As of December 31, 2000, the arrangement between the parties has been rent-free.

Item 3. Legal Proceedings.

In accordance with the agreements relating to the merger transaction with MAS Acquisition IX Corp. ("MAS"), the Company was required to issue 114,867 shares of common stock to MAS shareholders and make a cash payment to an affiliate of the majority shareholder of MAS in the amount of \$50,000. Following the merger, the Company asserted claims against the affiliate and majority shareholder relating to certain representations attendant to the transaction made by such parties. The claims involved the amount of the common stock and the cash payable by the Company. During the first quarter of 2001, the parties settled the disagreement, pursuant to which the Company agreed to a total payment of \$28,806.47 and 57,272 shares of common stock to be issued the MAS shareholders.

On August 16, 2001, a supplier filed a complaint against the Company in Superior Court of New Jersey, Cumberland County alleging non payment of goods delivered to the Company. On January 3, 2002, a judgment was entered into against the Company in this matter in the amount of approximately \$35,0000. The parties have agreed to settle the matter with the Company required to make a minimum regular payments on the account.

In addition, the Company from time to time is subject to routine litigation incidental to its business from claims by various parties such vendors and suppliers. Management does not believe the resolution of these matters will have a material adverse impact upon the financial condition of the Company or results of operation.

Item 4. Submission of Matters to Vote of Security Holders.

None

PART II

Item 5. Market Price of and Dividends on the Registrant's Common Equity and Related Stockholder Matters.

The Company's common stock has traded on the NASDAQ OTC Bulletin Board since March 6, 2000 under the symbol "AITX". Prior to such time, the Company's common stock traded on the National Quotation Bureau's "pink sheets".

The table below sets forth the high and low bid prices of the Common stock of the Company as reported by NASDAQ. The quotations reflect inter-dealer prices, without retail mark-up, mark-down, or commissions and may not necessarily represent actual transactions. There is an absence of an established trading market for the Company's common stock, as the market is limited, sporadic and highly volatile. The absence of an active market may have an effect upon the high and low

priced as reported.

2000	Low Bid	High Bid
1st Quarter	\$2.25	\$2.25
2nd Quarter	1.50	2.50
3rd Quarter	1.50	1.875
4th Quarter	1.4375	1.75

2001	Low Bid	High Bid
1st Quarter	\$1.63	\$2.75

2nd Quarter	1.90	3.38
3rd Quarter	2.25	1.60
4th Quarter	0.65	1.90

As of December 31, 2001, there are 732 shareholders of record of the Company's common stock. Although there are no restrictions on the Company's ability to declare or pay dividends, the Company has not declared or paid any dividends since its inception and does not anticipate paying dividends in the future.

Item 6. Management's Discussion and Analysis or Plan of Operation.

The following discusses the financial results of the Company for the periods indicated.

Results of Operations

Fiscal year end 2001 compared with fiscal year end 2000.

The Company has been a development stage company for the 2001 and 2000 periods and has not engaged in full scale operations for the periods indicated. The limited revenues for the periods have been derived from the sales of a non-omni-directional product and from contracts with the United States Navy that relate to the research and potential application of omni-directional technology for military use. Consequently, management believes that the year to year comparisons described below are not indicative of future year to year comparative results.

Revenues for fiscal 2001 were \$220,287 representing an increase of \$136,823 from revenues of \$83,464 for the 2000 period. Revenues for the 2001 period consisted of \$2,096 in sales of a non omni-directional product and \$218,191 in contract revenues from the United States Navy. Revenues for the 2000 period consisted of \$31,082 in sales of a non omni-directional product and \$52,383 in contract revenues from the United States Navy.

Cost of sales for 2001 was \$107,912 which reflects an increase of \$99,859 from \$7,453 in 2000. Cost of sales consists of principally of salaries, travel expenses and consulting fees payable to third parties incurred in connection with the performance of the contract with the US Navy.

General and administrative expenses which includes administrative salaries, depreciation and overhead for the 2001 period totaled \$966,895 which represents an increase of \$232,665 from \$734,230 incurred in 2000. The increase is due primarily to a \$305,986 write off of unusable inventory offset by lower prototype development costs and lower payroll and related taxes. The lower prototype development costs reflects the transition of the omni-direction product from development stage to actual production. Interest expense totaled \$28,208 for the 2001 period, representing an increase of \$5,447 from \$22,761 for the 2000 period. In 2001, the Company received \$50,925 in other income, which contrasts with \$26 received in the prior period. The amount in 2001 reflects a non-refundable deposit in the amount of \$50,000 received from a prospective manufacturer with the balance allocated to interest income, while the amount in 2000 is entirely interest income. In 2001, the Company received \$64,901 from the sale of its net operating losses and tax credits (as described further in Liquidity and Capital Resources below). This amount contrasts with \$61,285 received during 2000. In addition, during 2000 the Company received \$122,288 from the sale of its prior years (pre 2000) losses and credits.

The accumulated loss for 2001 was \$766,902 or a loss of \$0.16 per share contrasted with a loss of \$497,381 or a loss of \$0.12 per share for 2000.

Liquidity and Capital Resources

Since its inception, the Company has financed its operations through the private placement of its common stock. During 1999, the Company raised approximately \$872,268 net of offering costs from the private placement of its common stock. During 2000 and 2001, the Company raised approximately \$430,858 and \$348,600, respectively, net of offering costs from the private placement of its common stock.

As of December 31, 2001, the Company's working capital deficit was \$247,269.

During 2000, the Company was approved by the State of New Jersey for its technology tax transfer program pursuant to which the Company could sell its net operating losses and research and development credits as calculated under state law. During 2000, the Company received \$122,561 for losses and credits that accrued through December 31, 1999. During 2001, the Company received \$56,400 from the sale of its losses and credits (see Note 6 to financial statements).

The Company anticipates that its cash requirements for the foreseeable future will be significant. In particular, management expects substantial expenditures for inventory and product production in anticipation of the rollout of its omni-directional forklift. Funds required to initiate production are estimated to be \$1,500,000. The Company intends to fund its operations through the issuance of equity and/or debt securities. Presently, the Company is seeking capital from one or more funding sources; however, at this time no arrangement has been finalized. No assurances can be given that the Company will be successful in obtaining sufficient capital to fund the initiation of its production

activities. If the Company is unable to obtain sufficient funds in the near future, such event will delay the rollout of its product and likely will have a material adverse impact on the Company and its business prospects. In order to facilitate additional funding, on December 15, 2000, a majority of shareholders approved the increase of its authorized capital stock of the Company to 10,000,000 common shares.

Fixed assets, net of accumulated depreciation, totaled \$67,219 on December 31, 2001.

Disclosure Regarding Forward Looking Statements and Cautionary Statements.

Forward Looking Statements. Certain of the statements contained in this Annual Report on Form 10-KSB includes "forward looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended ("Exchange Act"). All statements other than statements of historical facts included in this Form 10-KSB regarding the Company's financial position, business strategy, and plans and objectives of management for future operations and capital expenditures, and other matters, are forward looking statements. These forward looking statements are based upon management's expectations of future events. Although the Company believes the expectations reflected in such forward looking statements are reasonable, there can be no assurances that such expectations will prove to be correct. Additional statements concerning important factors that could cause actual results to differ materially from the Company's expectations ("Cautionary Statements") are disclosed below in the Cautionary Statements section and elsewhere in this Form 10-KSB. All written and oral forward looking statements attributable to the Company or persons acting on behalf of the Company subsequent to the date of this Form 10-KSB are expressly qualified in their entirety by the Cautionary Statements.

Cautionary Statements. Certain risks and uncertainties are inherent in the Company's business. In addition to other information contained in this Form 10-KSB, the following Cautionary Statements should be considered when evaluating the forward looking statements contained in this Form 10-KSB:

NEED FOR ADDITIONAL CAPITAL. The Company will require additional capital immediately and long term to meet its ongoing operating requirements. The immediate need includes funds to complete the final testing of its pilot model forklifts. In the future, in order to initiate full scale production, the Company will require significant funds for inventory, manufacturing costs and for other working capital needs. The Company intends on raising the capital through a private or public financing of debt or equity. Presently, the Company has no commitment for any such funding. No assurances can be given that the Company will be successful in obtaining such financing on terms acceptable to the Company or on any terms. The inability to obtain such financing could have a material adverse affect on the Company.

LACK OF COMMERCIAL PRODUCT. The Company has developed the pilot version of its unique, omni-directional forklift. The commercial introduction of the product is subject, however, to additional testing and component

refinement. Due to the unique performance attributes of the forklift, the forklift will undergo a series of unprecedented tests relating to these attributes. Although management has performed substantially all of these tests or is otherwise confident of the performance capabilities of the forklift, nonetheless, is conceivable that final testing could result in certain components requiring redesign which could delay the commercial introduction of the forklift.

LACK OF A DETERMINED PRODUCT PRICES AND IMPACT ON PROFIT MARGINS.

The Company is assessing present and projected component pricing in order to establish a pricing policy for the ATX Series forklifts. The Company has not completed its assessment as current prices for certain forklift components reflect special development charges which are expected to be reduced as order volume for such components increase and as manufacturing efficiencies improve. The Company intends to price its forklifts so as to maximize sales yet provide sufficient operating margins. Given the uniqueness of its product, the Company is uncertain of pricing sensitivity of product in the market. Consequently, the pricing policy for its forklifts may be subject to change, and actual sales or operating margins may be less than projected.

LIMITED OPERATING HISTORY. The Company is a development stage company, and, together with its predecessor, has been in operation since 1995. However, since 1995, the Company's operations have been limited to the development of its omni-directional products, and limited revenue has been generated during this period. Consequently, its business may be subject to the many risks and pitfalls commonly experienced by development stage companies.

LACK OF INDICATIONS OF PRODUCT ACCEPTABILITY. The success of the Company will be dependent upon its ability to sell omni-directional products in quantities sufficient to yield profitable results. To date, the Company has received limited indications of the commercial acceptability of its omni-directional forklift. Accordingly, the Company can not predict whether its omni-directional products can be marketed and sold in a commercial manner.

PROTECTION OF INTELLECTUAL PROPERTY. The success of the Company will be dependent, in part, upon the protection of its proprietary omni-directional technology from competitive use. The patent for the omni-directional wheel expired in 1990. The Company, however, has received a patent protection of certain other aspects of its omni-directional wheel, and for features specific to its forklift. In addition to the patent applications, the Company relies on a combination of trade secrets, nondisclosure agreements and other contractual provisions to protect its intellectual property rights. Nevertheless, these measures may be inadequate to safeguard the Company's underlying technology. If these measures do not protect the intellectual property rights, third parties could use the Company's technology, and its ability to compete in the market would be reduced significantly. In addition, if the sale of the Company's product extends to foreign countries, the Company may not be able to effectively protect its intellectual property rights in such foreign countries.

In the future, the Company may be required to protect or enforce its patents and patent rights through patent litigation against third parties, such as infringement suits or interference proceedings. These lawsuits could be expensive, take significant time, and could divert management's attention from other business concerns. These actions could put the Company's patents at risk of being invalidated or interpreted narrowly, and any patent applications at risk of not

issuing. In defense of any such action, these third parties may assert claims against the Company. The Company cannot provide any assurance that it will have sufficient funds to vigorously prosecute any patent litigation, that it will prevail in any of these suits, or that the damages or other remedies awarded, if any, will be commercially valuable. During the course of these suits, there may be public announcements of the results of hearings, motions and other interim proceedings or developments in the litigation. If securities analysts or investors perceive any of these results to be negative, it could cause the price of the Company's common stock to decline.

LACK OF ESTABLISHED DISTRIBUTION CHANNELS. The Company does not have an established channel of distribution for its forklift product line. It intends on establishing a network of designated dealers throughout the United States at such time as it receives working capital funds sufficient to commence operations. Although the Company has received indications of interest from a number of equipment distributors, to date, such indications have been limited. The Company can not predict whether it will be successful in establishing its intended dealer network.

FEATURES OF PREFERRED STOCK. The Company has 275,000 shares of preferred stock outstanding that are held by an affiliate of the President. The stock carries a 10 for 1 voting right and a stated value of \$5.00 per share. The preferred stock carries a liquidation preference equal to the stated value and an annual, cumulative dividend of five percent, in preference to the common shareholders. In addition, the holder may elect to receive the dividend in the form of common stock at a deep discount to the market price (see Item 12 Certain Relationships and Related Transactions).

MANAGEMENT. The ability of the Company to successfully conduct its business affairs will be dependent upon the capabilities and business acumen of current management including Peter Amico, the Company's President. Accordingly, shareholders must be willing to entrust all aspects of the business affairs of the Company to its current management. Further, the loss of any one of the Company's management team could have a material adverse impact on its continued operation.

CONTROL EXERCISED BY MANAGEMENT. The existing officers and directors will control approximately 70% of the shareholder votes. This control by management is in the form of common stock and preferred stock that has 10 for 1 voting rights. Consequently, management will control the vote on all matters brought before shareholders, and holders of common stock may have no power in corporate decisions usually brought before shareholders.

NATURE OF BUSINESS/INSURANCE. The manufacture, sale and use of omni-directional forklifts and other mobility or material handling equipment is generally considered to be an industry of a high risk with a high incidence of serious personal injury or property loss. In addition, although the Company intends to provide on-site safety demonstrations, the unique, sideways movement of the forklift may heighten potential safety risks. Despite the fact that the Company intends to maintain sufficient liability insurance for the manufacture and use of its products, one or more incidents of personal injury or property loss resulting from the operation of its products could have a material adverse impact on the business of the Company.

COMPETITION. Although management believes its product will have significant competitive advantages to conventional forklifts, the Company will be competing in an industry populated by some of the foremost equipment and vehicle manufacturers in the world. All of these companies have greater financial, engineering and other resources than the Company. No assurances can be given that any advances or developments made by such companies will not supersede the competitive advantages of the Company's omni-directional forklift. In addition, many of the Company's competitors have long-standing arrangements with equipment distributors and carry one or more of competitive products in addition to forklifts. These distributors are prospective dealers for the Company. It therefore is conceivable that some distributors may be loath to enter into any relationships with the Company for fear of jeopardizing existing relationships with one or more competitors.

PENNY STOCK REGULATION. The Company's common stock may be deemed a "penny stock" under federal securities laws. The Securities and Exchange Commission has adopted regulations that define a "penny stock" generally to be any equity security that has a market price of less than \$5.00 per share, subject to certain exceptions. These regulations impose additional sales practice requirements on any broker/dealer who sell such securities to other than established investors and accredited investors. For transactions covered by this rule, the broker/dealer must make certain suitability determinations and must receive the purchaser's written consent prior to purchase. Additionally, any transaction may require the delivery prior to sale of a disclosure schedule prescribed by the Commission. Disclosure also is required to be made of commissions payable to the broker/dealer and the registered representative, as well as current quotations for the securities. Finally, monthly statements are required to be sent disclosing recent price information for the penny stock held in the account of the customers and information on the limited market in penny stocks. These requirements generally are considered restrictive to the purchase of such stocks, and may limit the market liquidity for such securities.

Item 7. Financial Statements.

The Financial Statements that constitute Item 7 of this Annual Report on Form 10-KSB are included in Item 13 below.

Item 8. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

PART III

Item 9. Directors, Executive Officers, Promoters and Control Persons.

The directors and executive officers of the Company, their ages, and the positions they hold are set forth below. The directors of the Company hold office until the next annual meeting of stockholders of the Company and until their successors in office are elected and qualified. All officers serve at the discretion of the Board of Directors.

OFFICERS AND DIRECTORS

Name	Age	Title
Peter Amico	58	President and Chairman
D. Barney Harris	41	Executive Vice President and Director
John Watt Jr.	64	Secretary and Director
Frank A. Basile, Esq.	65	Director
James Hudson	57	Director
William Hungerville	67	Director

Peter Amico - Mr. Amico is the founder of the Company and has been President and Chairman of the Company and its predecessor since its inception in April 1995. Prior to 1995, Mr. Amico was president and majority shareholder of Titan Aviation and Helicopter Services, Inc. ("Titan"). He has an extensive background in sales and in structural design. His career in sales has spanned over thirty years and he has held sales positions at Firestone Tire & Rubber and Union Steel Products, Inc. As a consequence of helicopter accident involving Titan, Mr. Amico filed for bankruptcy protection in 1996.

D. Barney Harris - Mr. Harris has been a Director of the Company since December 1998 and a Vice President since July 1999. From 1997 to July 1999, Mr. Harris was employed by UTD, Inc. Prior to 1997, Mr. Harris was employed by EG&G as a Senior Engineer and Manager of the Ocean Systems Department where he was responsible for the activities of 45 scientists, engineers and technicians. During this period while performing contract services for the US Navy, he was principally responsible for the design of the omni-directional wheel presently used by the Company. Mr. Harris received his B.S.M.E. from the United States Merchants Marine Academy in 1982.

John Watt Jr. - Mr. Watt has been Secretary and a Director of the Company since August 1998. Since March 2001, Mr. Watt has retired from full time employment and currently is performing limited consulting services to the Company. From 1990 to the March 2001, he has been the President of Watt-Bollard Associates, Inc., a manufacturers' representative sales agency located in Fort Washington, Pennsylvania.

James Hudson - Mr. Hudson has been a Director of the Company since May 1998. From 1980 to present, he has been President of Grammer, Dempsey & Hudson, Inc., a steel distributor located in Newark, New Jersey.

Frank A. Basile, Esq. - Mr. Basile has been a Director of the Company since April 1999. Mr. Basile has been a practicing attorney since 1963 and is president of the law firm Basile & Testa located in Vineland, New Jersey. The firm was one of seven law firms selected by the State of New Jersey to represent the State in a class action lawsuit against the tobacco industry.

William Hungerville - Mr. Hungerville has been a director since February 2002. Since 1998, Mr. Hungerville has been retired from full time employment. From 1974 to 1998, he was the sole owner of a pension administrative service firm. Mr. Hungerville is a graduate of Boston College, and attended an MBA program at Harvard University for 2 years.

Item 10. Executive Compensation.

The compensation for all directors and officers individually for services rendered to the Company for the fiscal years ended December 31, 1999, 2000 and 2001 are set forth in the following table:

SUMMARY COMPENSATION

Name and Principal Position	Year	Long Term			
		Annual Compensation	Compensation Awards (5)		
		Salary	Bonus	Other	Securities underlying Options #
		(\$)	(\$)	(\$)	
Peter Amico(1)	2001	\$75,000(2)	-0-	-0-	50,000(4)
Chairman and President	2000	\$75,000(2)	-0-	-0-	50,000(4)
	1999	\$84,065(2)	-0-	\$6,500(3)	25,000

-
- (1). The Company and Mr. Amico are parties to an employment agreement governing Mr. Amico's employment with the Company (see below).
 - (2). Mr. Amico's annual salary under his employment agreement for 1999, 2000 and 2001 is \$75,000. In 2001, \$54,454 was paid with the balance deferred for future payment. In 2000, \$65,538 was paid with the balance deferred for future payment. In 1999, the amount includes an amount accrued from 1998.
 - (3). During 1999, Mr. Amico was paid a finder's fee in connection with certain private placements.
 - (4). The Company and Mr. Amico are parties to an employment agreement governing Mr. Amico's employment with the Company (see below). The agreement grants to Mr. Amico annual stock options in the amount of not to exceed 50,000 shares. The options accrue if unexercised. In 2000, Mr. Amico exercised options for 100,000 shares which included options for prior years. No options were exercised during 2001 by Mr. Amico.
 - (5). The Company has no Long Term Compensation Awards other than the stock options indicated.

The Company and Peter Amico, as President, have entered into a written employment agreement for a period from April 1997 to June 2000. The agreement was extended to December 31, 2000. Pursuant to the agreement, Mr. Amico receives a salary of \$75,000 per year for fiscal 1999 through June 2000. In addition, the agreement provides Mr. Amico with stock options to acquire up to a maximum of 50,000 shares per annum. Of the options, 10,000 shares are exercisable for a total consideration of a \$1.00 beginning year three of the contract, 25,000 shares are exercisable at 30% of the lowest price paid for the stock in the 30 day period preceding exercise for each year of the contract, and 15,000 shares are exercisable at 15% of the lowest price paid for the stock in the 30 day period preceding exercise beginning year three of the contract.

The Company and D. Barney Harris, as Vice President, have entered into a written employment agreement for period of five years. Pursuant to the agreement, Mr. Harris receives an annual salary of \$75,000, subject to annual review by the Company. In addition, Mr. Harris is entitled to receive annual stock options not exceeding 25,000 shares of common stock, of which 2,500 shares are exercisable for a total consideration of \$1.00, 10,000 shares are exercisable at 35% of the lowest price paid for the stock in the 30 day period preceding exercise for each year of the contract, and 12,500 shares are exercisable at 17.5% of the lowest price paid for the stock in the 30 day period preceding exercise for each year of the contract.

Option Grants in Fiscal Year 2001

President

And Chairman

(1). Pursuant to his employment agreement, Mr. Amico receives options for a total of 50,000 shares of common stock per annum, of which; 10,000 shares exercisable for a total consideration of a \$1.00 or \$0.0001 per share, 25,000 shares exercisable at 30% of the lowest price paid for the stock in the 30 day period preceding exercise, and 15,000 shares exercisable at 15% of lowest price paid for the stock in the 30 day period preceding exercise. The date of grant is deemed to be April 1, 2001, the anniversary date of Mr. Amico's employment agreement. The market price on date of grant reflects the price of the common stock on such date. The options do not carry an expiration date.

President and

Chairman

Edgar Filing: AIRTRAX INC - Form 10KSB

(1). Pursuant to his employment agreement, Mr. Amico received options for a total of 50,000 shares of common stock per annum, of which; 10,000 shares exercisable for a total consideration of a \$1.00 or \$0.0001 per share, 25,000 shares exercisable at 30% of the lowest price paid for the stock in the 30 day period preceding exercise, and 15,000 shares exercisable at 15% of lowest price paid for the stock in the 30 day period preceding exercise. The value of the unexercised options were calculated using the closing price of \$0.75 as of December 31, 2001.

Compensation of Directors

The Company's directors are compensated at the rate of \$250 per meeting and are reimbursed for expenses incurred by them in connection with the Company's business. In addition, each director receives per year a stock option to purchaser 5,000 shares of common stock exercisable at \$0.50 per share.

Other than as described above, the Company does not have any other form of compensation payable to its officers or directors, including any stock option plans, stock appreciation rights, or long term incentive plan awards for the periods indicated in the table.

Item 11. Security Ownership of Certain Beneficial Owners and Management.

The following table identifies as of March 31, 2002 information regarding the current directors and executive officers of the Company and those persons or entities who beneficially own more than 5% of its common stock and Preferred Stock of the Company:

Name(1)	Percentage of		Percentage of

officers as a

group (6 persons)

(1). The address of each beneficial owner is the address of the Company.

(2). Based on 5,373,803 shares of common stock outstanding as of March 31,

2002, except that shares of common stock underlying options or warrants exercisable within 60 days of the date hereof are deemed to be outstanding for purposes of calculating the beneficial ownership of securities of the holder of such options or warrants.

- (3). Based upon 275,000 outstanding shares of preferred stock after giving effect to the 10 for 1 voting rights.
- (4). Includes 1,714,629 shares held by Arcon Corp., a corporation wholly owned by Mr. Amico (Arcon), 100,000 shares held by Mr. Amico individually, and stock options for 50,000 shares exercisable pursuant to Mr. Amico's employment agreement during 2002, however, excludes common stock that may be issued to Arcon as a dividend on the preferred stock (see Item 12 Certain Transactions).
- (5). Represents shares held by Arcon.
- (6). Includes 5,000 shares issuable upon exercise of director's options for 2001.
- (7). Includes 113,000 shares held jointly with his spouse, and 5,000 shares issuable upon exercise of director's options for 2002.
- (8). Includes 90,000 shares held individually, 12,046 shares held by an affiliate, 10,000 shares held by Mr. Basile's spouse, and 15,000 shares issuable upon exercise of director's options for years 2000, 2001 and 2002.
- (9). Includes 11,300 shares held individually, 44,500 shares held by an affiliate and 10,000 shares issuable upon exercise of director's options for 2001 and 2002.
- (10). Includes 1,500 shares held by his spouse and 5,000 shares issuable upon exercise of director's options for 2002.

(11). Includes (4),(6),(7),(8),(9), and (10).

Item 12. Certain Relationships and Related Transactions.

Arcon Cop., a corporation wholly owned by the Company's chairman and president, owns 275,000 shares of preferred stock of the Company. Each share of Preferred Stock is entitled to 10 voting rights on all matters on which shareholders are entitled to vote. The preferred stock has a stated value per share of \$5.00 and an annual dividend per share equal to 5% of the stated value. Dividends are cumulative and the holder has a right during any quarter to waive any cash dividend and receive the dividend in the form of common stock at a price per share equal to 30% of the lowest private offering or trading price of the common stock. The preferred stock is not convertible into common stock, however, has a preference over common stockholders upon liquidation equal to the stated value per share. At December 31, 1998, unpaid dividends on the preferred stock totaled \$92,114. An additional \$68,750 in dividends accrued during each of the years 1999 and 2000. During 1999, the holder received cash dividends of \$40,498, and dividends in the form of 305,737 shares of common stock, which were valued at \$120,366. During 2000, the holder received dividends in the form of 95,558 shares of common stock, which were valued at \$56,751. At December 31, 2001, \$11,999 in dividends remained unpaid. During 2001, an additional \$68,750 of dividends accrued and is unpaid as of year-end. The conversion of the entirety of the accrued dividends to common stock under the features of the preferred stock could result in the issuance of 246,731 shares of common stock to Arcon Corp.

Arcon Corp. has made loans from time to time to the Company in varying amounts. As of December 31, 2001, a loan in the amount of \$26,211 is outstanding. The loan is due on demand and bears interest at 12%. In July 2000, Arcon Corp. purchased 33,334 shares of common stock at a price per share of \$1.50 for a total consideration of \$50,001.

Mrs. Patricia Amico, the wife of the Company's President, performed services to the Company during 1999, 2000 and 2001. The amount of such services totaled \$8,099, \$9,930, and \$9,126, respectively. Mr. Timothy Smith, the son in law of the Company's President, performed services to the Company during 1999 and 2000. The amount of such services totaled \$17,236 and \$4,644.

Mr. John Watt, a director of the Company, received commissions during fiscal 2000 from certain suppliers and fabricators that conduct business with the Company. The amount of such commission for each year was less than \$10,000.

Mr. Frank Basile, a director of the Company, is a partner of a law firm that performed legal services to the Company during fiscal 2000 and 2001. The billing amount for such services for each year was less than \$10,000.

During 2001, each director of the Company, other than Mr. Amico, received a stock option to acquire 5,000 shares of common stock at a price per share of \$0.50.

Board of Directors

AirTrax, Inc.

I have audited the accompanying balance sheet of AirTrax, Inc. (a development stage company) as of December 31, 2001, and the related statements of operations and deficit accumulated during development stage, changes in stockholders' equity (deficit), and cash flows for the years ended December 31, 2001 and 2000. These financial statements are the responsibility of the Company management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted the audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of AirTrax, Inc. as of December 31, 2001, and the results of its operations and its cash flows for the years ended December 31, 2001 and 2000 in conformity with accounting principles generally accepted in the United States of America.

AIRTRAX, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS

December 31, 2001

1.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business

The Company was formed April 17, 1997. It has designed a forklift vehicle using omni-directional technology obtained under a contract with the United States Navy Surface Warfare Center in Panama City, Florida. The right to exploit this technology grew out of a Cooperative Research and Development Agreement with the Navy. Significant resources have been devoted during the past three years to the construction of a prototype of this omni-directional forklift vehicle. It is expected to be in full commercial production during 2002. At that time, it will be offered to industrial users.

The Company has also developed a traditional helicopter ground handling machine which has been marketed by the Company on a limited basis.

Development Stage Accounting

The Company is a development stage company, as defined in Statement of Financial Accounting Standards No. 7. Generally accepted accounting principles that apply to established operating enterprises govern the recognition of

revenue by a development stage enterprise and the accounting for costs and expenses. From inception to December 31, 2001, the Company has been in the development stage and all its efforts have been devoted to the development of a forklift vehicle with omni-directional technology that is suitable for market. Only small amounts of revenue have been realized through December 31, 2001.

Basis of Presentation

The Company has incurred losses from inception to December 31, 2001 of \$2,569,225. Activities have been financed primarily through private placements of equity securities. The Company may need to raise additional capital through the issuance of debt or equity securities to fund its operations.

Cash

For purposes of the statements of cash flows, the Company considers all short-term debt securities purchased with a maturity of three months or less to be cash equivalents.

Inventory

Inventory consists principally of component parts and supplies which will be used to assemble forklift vehicles. Inventories are stated at the lower of cost (determined on a first in-first out basis) or market.

F-6

AIRTRAX, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS

December 31, 2001

1.

(continued)

Fixed Assets

Fixed assets are recorded at cost. Depreciation is computed by using accelerated methods, with useful lives of seven years for furniture and shop equipment and five years for computers and automobiles.

Income Taxes

Deferred income taxes are recorded to reflect the tax consequences or benefits to future years of temporary differences between the tax bases of assets and liabilities, and of net operating loss carryforwards.

Intangible Assets

Patents

The Company incurred costs to acquire and protect certain patent rights. These costs were capitalized and are being amortized over a period of fifteen years on a straight-line basis.

Prototype Equipment

The cost of developing and constructing the prototype omni-directional helicopter handling vehicle and the omni-directional forklift vehicle is expensed as incurred.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimated.

Fair Value of Financial Instruments

The carrying amounts of the Company's financial instruments, which include cash equivalents, accounts receivable, accounts payable and accrued liabilities, approximate their fair values at December 31, 2001.

Advertising Costs

The Company expenses advertising costs when the advertisement occurs. Advertising costs amounted to \$78,255 in 2001 and \$28,440 in 2000.

F-7

AIRTRAX, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS

December 31, 2001

1.

(continued)

Segment Reporting

Management treats the operations of the Company as one segment.

Revenue Recognition

Revenue is realized from product sales and consulting services. Recognition occurs upon delivery of goods or services.

Common Stock

Common stock is often issued in return for product, services, and as dividends on the preferred stock. These issuances are assigned values equal to the value of the product or service received or the market value of the common stock, with appropriate discounts, whichever is most clearly evident.

1.

RELATED PARTY TRANSACTIONS

During the year 2000, there were several transactions with officers, and directors, and affiliates involving the common stock of the Company. A total of 95,558 shares of common stock of the Company were issued in lieu of cash dividends on the preferred stock in the amount of \$56,751, as permitted by the terms of the preferred stock issue. The preferred stock is wholly owned by the majority shareholder (see Note 4 for description of the preferred stock). This majority shareholder is a corporation wholly owned by the president of the Company. A total of 129,999 shares were issued to the president and a vice president of the Company pursuant to their respective employment agreements, yielding a total of \$60,851. Three non-employee directors each received 5,000 shares of common stock upon exercise of their director options, which yielded \$7,500. In addition, the majority stockholder purchased 33,334 shares for \$50,001. Finally, a board member received 5,539 shares of common stock in exchange for professional services rendered to the Company, valued at \$9,000, and an affiliate of a board member received 2,097 shares of common stock in exchange for professional services rendered to the Company, valued at \$6,208.

The majority shareholder corporation made loans to the Company prior to 2001. The related notes accrue interest at 12%, which totaled \$2,797 for the year 2001. The unpaid balance of principal and interest was \$26,111 at December 31, 2001, and was due on demand.

F-8

AIRTRAX, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS

December 31, 2001

2.

(continued)

During 2001, two non-employee directors exercised their director options, receiving a total of 10,000 shares of common stock in return for services valued at \$5,000. Two directors received a total of 60,026 shares in return for services valued at \$46,629, and an affiliate of a director received 2,657 shares in return for services valued at \$3,985.

Since June 1999, the Company has made its headquarters in premises owned by the Company president, which to date has been rent free.

3.

PRIVATE PLACEMENT OFFERINGS

The Company conducted private placement offerings during 2001 and 2000. These offerings were exempt under the Securities Act of 1933, as amended, and the rules and regulations promulgated thereunder. A total of 235,999 shares of common stock was sold under the offerings during 2001, and 330,719 shares were sold during 2000. These sales resulted in net proceeds of \$348,600 and \$430,858, respectively.

4.

PREFERRED STOCK

The Company is authorized to issue 500,000 shares of preferred stock, without par value. At December 31, 2001, 275,000 of these shares had been issued. Each of these shares entitles the holder to a 5% cumulative dividend based on a \$5 per share stated value. If sufficient cash is not available, or at the option of the shareholder, these dividends may be paid in common stock. If payment is in stock, it is to be valued at a price calculated at thirty percent of the lower of the last price traded in either a public or private transaction during the applicable quarter. This issue of preferred stock also provides a voting right of 10 votes for each share. The holder of this preferred stock is the majority shareholder of the Company, which is a corporation wholly owned by the Company's President and Chairman.

During 2000, the holder of the preferred stock received dividends in the form of 95,558 shares of common stock, which were valued at \$56,751. At December 31, 2000, \$11,999 in dividends remained unpaid. An additional \$68,750 of dividends accrued during 2001 and was not paid. The majority shareholder may acquire 246,731 shares of common stock as accrued and unpaid dividends under the features of the preferred stock.

The characteristics of the remaining 225,000 preferred shares authorized have not been specified.

\$ (.12)

Stock options were granted to three employees, of which two are officers, and five directors which became exercisable during 2001. These are described in Note 9. In addition, dividends accrued on the preferred stock during 2000 and 2001 (see Note 4) which at the option of the preferred shareholder, could be paid in common stock. These shares were not included in the calculation of earnings per share because such inclusion would have an antidilutive effect.

F-10

AIRTRAX, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2001

1.

INCOME TAXES

The Company has experienced losses each year since its inception. As a result, it has incurred no Federal income tax. The Internal Revenue Code allows net operating losses (NOL s) to be carried forward and applied against future profits for a period of twenty years. At December 31, 2001, the Company had NOL carryforwards of \$2,782,004 available for Federal taxes and \$775,403 for New Jersey taxes. The potential tax benefit of the state NOL s has been recognized on the books of the Company; the potential benefit of the Federal NOL s has been offset by a valuation allowance. If not used, these Federal carryforwards will expire as follows:

1
 \$206,952
 2
 129,092
 1
 486,799
 2
 682,589
 3
 501,169
 4
 775,403

During the year 2001, the Company realized \$56,400 from the sale, as permitted by New Jersey law, of its rights to use the New Jersey NOL S and research and development credits that had accrued during 2000. These potential New Jersey offsets are, thus, no longer available to the Company.

Under Statement of Financial Accounting Standards No. 109, recognition of deferred tax assets is permitted unless it is more likely than not that the assets will not be realized. The Company has recorded deferred tax assets as follows:

Current

Non-current

Total

Deferred Tax Assets

\$309,696

\$682,244

\$991,940

Valuation Allowance

239,910

682,244

922,154

Balance Recognized

\$ 69,786

\$ -

\$ 69,786

The entire balance of the valuation allowance relates to Federal taxes. Since state tax benefits for years prior to 2001 have been realized, no reserve is deemed necessary for the benefit of state tax losses of 2001.

There were no noncash investing activities during either 2001 or 2000. The following noncash financing activities occurred:

a.

Shares of common stock were issued for services during 2001 and 2000, totaling 97,183 and 65,331, respectively.

b.

Preferred stock dividends were partially satisfied by the issuance during 2000 of 95,558 shares of common stock.

F-12

AIRTRAX, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2001

9.

CONTINGENCIES

On November 5, 1999, the Company merged with MAS Acquisition IX Corp. (MAS). Pursuant to the merger agreement, the Company was to issue 114,867 shares of common stock to former shareholders of MAS. A disagreement arose and there was a delay in the issuance of the shares. The matter was settled in 2001 with the issuance of 57,434 shares.

The Company has employment agreements with its president, vice president, and one two other employees. The president's contract, which expires June 30, 2002, provides in part for options permitting the president to acquire up to 50,000 shares of common stock per year, with portions of these options accumulating if not exercised. Options were exercised for 100,000 shares during 2000, yielding proceeds of \$48,376. At December 31, 2001, the president had the right to acquire 50,000 shares at option prices. There were no options exercised during 2001 by the president. At December 31, 2001, the president had the right to acquire 50,000 shares at option prices.

Contracts with each of the other employees provide in part for options permitting the acquisition of up to 25,000 shares per year. None of these options was exercised during 2001 and they remained outstanding at December 31, 2001.

Options to purchase 5,000 shares each were issued during 2001 to five non-employee members of the Board of Directors. Two members exercised their options during the year. The other options must be exercised during 2002 or they will expire.

At December 31, 2001, there were 115,000 shares of common stock reserved to satisfy the options outstanding, as described above.

A judgment was entered against the Company in January 2002 in the approximate amount of \$35,000. The Company has arranged to settle the judgment with the creditor.

F-13

(b). Reports on Form 8-K.

On November 11, 2001, the Company filed a Form 8-K to report a resignation of a director (Items 6 and 7). On December 6, 2001, the Company filed a Form 10-K/A to amend the prior filing.

On December 6, 2001, the Company filed a Form 8-K to report a letter issued to shareholders dated December 3, 2001 (Items 5 and 7).
