  - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

**Item 7.01 Regulation FD Disclosure.**

On August 15, 2007, the Nuclear Regulatory Commission (NRC) issued a Confirmatory Order to FirstEnergy Nuclear Operating Company (FENOC), a wholly owned subsidiary of FirstEnergy Corp., regarding commitments made by FENOC in response to the NRC's Demand for Information (DFI). On May 14, 2007, the NRC issued a DFI to FENOC regarding the evaluation of two reports associated with the reactor pressure vessel head corrosion at the Davis-Besse Nuclear Power Station. FENOC responded to the DFI on June 13, 2007 and submitted supplemental information regarding its response to the NRC on July 16, 2007.

The Confirmatory Order, which is effective immediately, requires FENOC to take several actions, including, among others:

- Train selected employees by November 30, 2007 to recognize and communicate information that could have a regulatory impact;
- Use an outside consultant in January 2008 to review FirstEnergy staff's sensitivity to potentially important regulatory information (with a follow-up review in January 2009), reporting the results and any follow-on actions to the NRC; and
- Develop a formal review procedure for technical reports created for non-regulatory uses, to ensure recognition of the reports' possible regulatory impacts.

The complete text of the Confirmatory Order is available on the NRC's Web site at [www.nrc.gov](http://www.nrc.gov).

**Forward-Looking Statements:** This Form 8-K includes forward-looking statements based on information currently available to management. Such statements are subject to certain risks and uncertainties. These statements typically contain, but are not limited to, the terms "anticipate," "potential," "expect," "believe," "estimate" and similar words. Actual results may differ materially due to the speed and nature of increased competition and deregulation in the electric utility industry, economic or weather conditions affecting future sales and margins, changes in markets for energy services, changing energy and commodity market prices, replacement power costs being higher than anticipated or inadequately hedged, the continued ability of FirstEnergy's regulated utilities to collect transition and other charges or to recover increased transmission costs, maintenance costs being higher than anticipated, legislative and regulatory changes (including revised environmental requirements), and the legal and regulatory changes resulting from the implementation of the Energy Policy Act of 2005 (including, but not limited to, the repeal of the Public Utility Holding Company Act of 1935), the uncertainty of the timing and amounts of the capital expenditures needed to, among other things, implement the Air Quality Compliance Plan (including that such amounts could be higher than anticipated) or levels of emission reductions related to the Consent Decree resolving the New Source Review litigation, adverse regulatory or legal decisions and outcomes (including, but not limited to, the revocation of necessary licenses or operating permits and oversight) by the Nuclear Regulatory Commission (including, but not limited to, the Demand for Information issued to FENOC on May 14, 2007) as disclosed in FirstEnergy's SEC filings, the timing and outcome of various proceedings before the Public Utilities Commission of Ohio (including, but not

limited to, the distribution rate cases and the generation supply plan filing for the Ohio Companies and the successful resolution of the issues remanded to the PUCO by the Ohio Supreme Court regarding the Rate Stabilization Plan) and the Pennsylvania Public Utility Commission (including Penn's default service plan filing), the resolution of the Petitions for Review filed with the Commonwealth Court of Pennsylvania with respect to the transition rate plan filing for Met-Ed and Penelec, the continuing availability and operation of generating units, the ability of generating units to continue to operate at, or near full capacity, the inability to accomplish or realize anticipated benefits from strategic goals (including employee workforce initiatives), the anticipated benefits from voluntary pension plan contributions, the ability to improve electric commodity margins and to experience growth in the distribution business, the ability to access the public securities and other capital markets and the cost of such capital, the outcome, cost and other effects of present and potential legal and administrative proceedings and claims related to the August 14, 2003 regional power outage, any final adjustment in the purchase price per share under the accelerated share repurchase program announced March 2, 2007, the risks and other factors discussed from time to time in the registrant's SEC filings, and other similar factors. The registrant expressly disclaims any current intention to update any forward-looking statements contained herein as a result of new information, future events, or otherwise.

**SIGNATURE**

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
