NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions in Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and adjustments) considered necessary for a fair presentation of the condensed consolidated financial statements have been included. Results for interim periods should not be considered indicative of results to be expected for a full year. Reference should be made to the consolidated financial statements and notes thereto contained in our Annual Report on Form 10-K for the fiscal year ended February 22, 2013 ("Form 10-K"). The Condensed Consolidated Balance Sheet as of February 22, 2013 was derived from the audited Consolidated Balance Sheet included in our Form 10-K.

As used in this Quarterly Report on Form 10-Q ("Report"), unless otherwise expressly stated or the context otherwise requires, all references to "Steelcase," "we," "our," "Company" and similar references are to Steelcase Inc. and its subsidiaries in which a controlling interest is maintained. Unless the context otherwise indicates, reference to a year relates to the fiscal year, ended in February of the year indicated, rather than a calendar year. Additionally, Q1, Q2, Q3 and Q4 reference the first, second, third and fourth quarter, respectively, of the fiscal year indicated. All amounts are in millions, except share and per share data, data presented as a percentage or as otherwise indicated.

2. NEW ACCOUNTING STANDARDS

In February 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The guidance requires an entity to present significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income if the amount is reclassified to net income in its entirety in the same reporting period. This presentation may be either on the face of the statement where net income is presented or as a separate disclosure in the notes to the financial statements. For other significant amounts not required to be reclassified in their entirety to net income in the same reporting period, a cross reference to other disclosures that provide additional detail about the reclassification amounts is required. The Company adopted these provisions in Q1 2014, applied prospectively. This update impacts disclosures only, and therefore adoption did not have an impact on our consolidated financial position, results of operations or cash flows. The disclosures required by this update are included in Note 4.

In July 2012, the FASB amended Accounting Standards Codification ("ASC") 350, Intangibles — Goodwill and Other. This amendment is intended to reduce the cost and complexity of the annual impairment test for indefinite-lived intangible assets other than goodwill by providing entities an option to perform a qualitative assessment to determine whether further impairment testing is necessary. The Company adopted the amended provisions in Q1 2014. This amendment impacts impairment testing steps only, and therefore adoption did not have an impact on our consolidated financial position, results of operations or cash flows.

3. EARNINGS PER SHARE

Earnings per share is computed using the two-class method. The two-class method determines earnings per share for each class of common stock and participating securities according to dividends or dividend equivalents and their respective participation rights in undistributed earnings. Participating securities include performance units and restricted stock units in which the participants have non-forfeitable rights to dividend equivalents during the performance period. Diluted earnings per share includes the effects of certain performance units in which the participants have forfeitable rights to dividend equivalents during the performance period.

5. FAIR VALUE

The carrying amounts for many of our financial instruments, including cash and cash equivalents, accounts and notes receivable, accounts and notes payable, short-term borrowings and certain other liabilities, approximate their fair value due to their relatively short maturities. Our short-term investments, foreign exchange forward contracts and long-term investments are measured at fair value on the Condensed Consolidated Balance Sheets.

Our total debt is carried at cost and was \$287.1 and \$289.0 as of November 22, 2013 and February 22, 2013, respectively. The fair value of our total debt is measured using a discounted cash flow analysis based on current market interest rates for similar types of instruments and was approximately \$319 and \$321 as of November 22, 2013 and February 22, 2013, respectively.

We periodically use derivative financial instruments to manage exposures to movements in foreign exchange rates and interest rates. The use of these financial instruments modifies the exposure of these risks with the intention to reduce our risk of short-term volatility. We do not use derivatives for speculative or trading purposes.

The portion of inventories determined by the LIFO method was \$71.4 as of November 22, 2013 and \$70.2 as of February 22, 2013.

7. COMPANY-OWNED LIFE INSURANCE

Our investments in company-owned life insurance (“COLI”) policies are recorded at their net cash surrender value. Prior to Q3 2014, our investments in whole life COLI policies were intended to be utilized as a long-term funding source for post-retirement medical benefits, deferred compensation and supplemental retirement plan obligations, and our investments in variable life COLI policies were primarily considered a source of corporate liquidity.

During Q3 2014, we reduced the variable life COLI balances by withdrawing basis of \$74.5 (tax-free) and invested the cash proceeds in short-term investments. The remaining investments in whole life and variable life COLI policies are intended to be utilized as a long-term funding source for post-retirement medical benefits, deferred compensation and supplemental retirement plan obligations, which as of November 22, 2013 aggregated approximately \$147, with a related deferred tax asset of approximately \$56. The designations of our COLI investments as funding sources for our benefit obligations does not result in these investments representing a committed funding source for these obligations. They are subject to claims from creditors, and we can designate them to another purpose at any time.

The costs associated with the long-term benefit obligations that the investments are intended to fund are recorded in Operating expenses on the Condensed Consolidated Statements of Income. As these costs exceed the net returns in cash surrender value, normal insurance expenses and any death benefit gains (“COLI income”) related to our investments in COLI policies, we began recording all COLI income in Operating expenses on the Condensed Consolidated Statements of Income during Q3 2014.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

In Q3 2014, we determined that it was more likely than not that the fair value of our Asia Pacific reporting unit (in the Other category) had fallen below its carrying value. The decline in the estimated fair value of the Asia Pacific reporting unit was driven in part by continued quarterly operating losses during 2014, which were substantially below previous expectations. These losses were primarily the result of lower than expected revenue in most markets, especially China, Australia and Japan. The sales shortfalls are partially due to the impact of weaker than expected economic conditions in the region. During Q3 2014, senior management completed a comprehensive review of the Asia Pacific business unit during a visit to the region, including an update of our near-term financial projections, taking into consideration current industry and market conditions and business model challenges facing our Asia Pacific business unit. As a result, we determined that lower levels of near-term revenue growth and profitability were more likely than not and thus, we completed an interim goodwill impairment evaluation for the Asia Pacific reporting unit.

Our goodwill impairment evaluation is a two step process. In step one, we compare the fair value of each reporting unit to its carrying value. If the fair value of the reporting unit exceeds the carrying value, goodwill is not impaired and no further testing is required. If the fair value of the reporting unit is less than the carrying value, we perform step two to measure the amount of impairment loss, if any. In step two, the reporting unit's fair value is allocated to all of the assets and liabilities of the reporting unit, including any unrecognized intangible assets, in a hypothetical analysis that calculates the implied fair value of goodwill in the same manner as if the reporting unit was being acquired in a business combination. If the implied fair value of the reporting unit's goodwill is less than the carrying value, the difference is recorded as an impairment loss.

We estimated the fair value of the Asia Pacific reporting unit using the income approach, which calculates the fair value of the reporting unit based on the present value of its estimated future cash flows. Cash flow projections are based on management's estimates of economic and market trends, revenue growth rates, cost structure and other expectations about the anticipated short-term and long-term operating results. The discount rate used is based on the weighted-average cost of capital adjusted for the relevant risk associated with business-specific characteristics and the uncertainty related to the business's ability to execute on the projected cash flows. The estimation of the fair value of the reporting unit represents a Level 3 measurement.

Based on the step one and step two analyses, we recorded a \$12.3 goodwill impairment charge in Q3 2014, and there is no remaining net goodwill in the Asia Pacific reporting unit as of November 22, 2013. Additionally, a charge of \$0.6 was recorded in Asia Pacific for impairment of other intangible assets. We tested the recoverability of the Asia Pacific long-lived assets (other than goodwill and intangible assets) and concluded that these assets were not impaired. For all other reporting units, we determined that there were no events requiring an interim goodwill impairment evaluation in Q3 2014. We will continue to evaluate goodwill on an annual basis in Q4 and whenever events or changes in circumstances, such as significant adverse changes in business climate or operating results, changes in management's business strategy or significant declines in our stock price, indicate that there may be a potential indicator of impairment.

9. STOCK INCENTIVE PLAN

Performance Units

In Q1 2014, we awarded 419,724 performance units ("PSUs") to our executive officers. Of the PSUs awarded, 209,862 units are earned after a three-year performance period, from 2014 through 2016, based on our total shareholder return relative to a comparison group of companies, which is a market condition, and, if earned, will be issued in the form of shares of Class A Common Stock. The number of shares that may be earned can range from 0% to 200% of the target amount; therefore, the maximum number of shares that can be issued under this award is 419,724. These PSUs are expensed and recorded in Additional paid-in capital on the Condensed Consolidated Balance Sheets over the performance periods. We used the Monte Carlo simulation model to calculate the fair value of these PSUs on the date of grant. The model resulted in a weighted average grant date fair value of \$15.51 per unit for these PSUs, compared to \$11.92 and \$16.56 per unit for PSUs granted in 2013 and 2012, respectively.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The weighted average grant date fair values were determined using the following assumptions:

	2014 Awards	2013 Awards	2012 Awards	
Three-year risk-free interest rate (1)	0.3	% 0.5	% 1.4	%
Expected term	3 years	3 years	3 years	
Estimated volatility (2)	44.7	% 49.8	% 50.9	%

(1) Based on the U.S. government bond benchmark on the grant date.

(2) Represents the historical price volatility of the Company's common stock for the three-year period preceding the grant date.

The remaining 209,862 PSUs awarded during Q1 2014 are earned after a three-year performance period, from 2014 through 2016, based on our three-year average return on invested capital, which is a performance condition, and, if earned, will be issued in the form of shares of Class A Common Stock. The number of shares that may be earned can range from 0% to 200% of the target amount, therefore the maximum number of shares that can be issued under this award is 419,724. These units are expensed and recorded in Additional paid-in capital on the Condensed Consolidated Balance Sheets over the performance periods based on the probability that the performance condition will be met. The expense recorded will be adjusted as the estimate of the total number of PSUs that will ultimately be earned changes. The weighted average grant date fair value of these PSUs was \$12.66. The fair value is equal to the closing stock price on the date of grant.

For all PSUs awarded in Q1 2014, dividend equivalents are calculated based on the actual number of shares earned at the end of the performance period equal to the dividends that would have been payable on the earned shares had they been held during the entire performance period as Class A Common Stock. At the end of the performance period, the dividend equivalents are paid in the form of cash or Class A Common Stock at the discretion of the Board of Directors. In addition, these awards will be forfeited if the participant leaves the Company for reasons other than retirement, disability or death or if the participant engages in any competition with us, as defined in the plan and determined by the Administrative Committee in its discretion. If a change in control occurs at least six months following the award date, the target awards will be deemed to be earned and a pro rata number of units will be vested and paid based upon the length of time within the performance period which has elapsed prior to the effective date of the change in control.

The total PSU expense and associated tax benefit for all outstanding awards for the three and nine months ended November 22, 2013 and November 23, 2012 are as follows:

	Three Months Ended		Nine Months Ended	
	November 22, 2013	November 23, 2012	November 22, 2013	November 23, 2012
Performance Units

As of November 22, 2013, there was \$3.2 of remaining unrecognized compensation cost related to nonvested PSUs, which is expected to be recognized over a remaining weighted-average period of 1.8 years.

Restricted Stock Units

During the nine months ended November 22, 2013, we awarded 1,092,941 restricted stock units ("RSUs"), of which 321,775 were awarded to our executive officers. These RSUs have restrictions on transfer, the

majority of which lapse three years after the date of grant, at which time the units will be issued as unrestricted shares of Class A Common Stock. Holders of RSUs receive cash dividends equal to the dividends we declare and pay on our Class A Common Stock, which are included in Dividends paid on the Condensed Consolidated Statements of Cash Flows. These awards are subject to forfeiture if a participant leaves our company for reasons other than retirement, disability, death or termination by us without cause prior to the vesting date. RSUs are expensed and recorded in Additional paid-in capital on the Condensed Consolidated Balance Sheets over the requisite service period based on the value of the underlying shares on the date of grant.

The RSU expense and associated tax benefit (expense) for all outstanding awards for the three and nine months ended November 22, 2013 and November 23, 2012 are as follows:

Nonvested as of November 22, 2013	2,027,684	\$11.69

As of November 22, 2013, there was \$10.5 of remaining unrecognized compensation cost related to nonvested RSUs, which is expected to be recognized over a weighted-average period of 2.3 years.

10. REPORTABLE SEGMENTS

Our reportable segments consist of the Americas segment, the EMEA segment and the Other category. Unallocated corporate expenses are reported as Corporate.

The Americas segment serves customers in the U.S., Canada and Latin America with a portfolio of integrated architecture, furniture and technology products marketed to corporate, government, healthcare, education and retail customers through the Steelcase, Coalesse, Details, Nurture by Steelcase and Turnstone brands.

The EMEA segment serves customers in Europe, the Middle East and Africa primarily under the Steelcase and Coalesse brands, with an emphasis on freestanding furniture systems, storage and seating solutions.

The Other category includes Asia Pacific, Designtex and PolyVision. Asia Pacific serves customers in Asia and Australia primarily under the Steelcase brand with an emphasis on freestanding furniture systems, storage and seating solutions. Designtex designs and sells surface materials including textiles and wall coverings which are specified by architects and designers directly to end-use customers primarily in North America. PolyVision manufactures ceramic steel surfaces for use in multiple applications, but primarily for sale to third-party fabricators to create static whiteboards sold in the primary and secondary education markets in the U.S. and Europe.

Corporate costs include unallocated portions of shared service functions such as information technology, human resources, finance, executive, corporate facilities, legal and research.

11. RESTRUCTURING ACTIVITIES

In Q3 2014, we announced restructuring actions in EMEA to safeguard our global competitiveness through changes in our EMEA manufacturing footprint. We have initiated procedures with the applicable works councils regarding the closure of a manufacturing facility in Germany. In connection with this project, we expect to incur approximately \$20 to \$25 of cash restructuring costs, with approximately \$15 to \$20 related to employee termination costs and approximately \$5 related to business exit and other related costs. We incurred \$0.6 of business exit and other related costs in the EMEA segment in connection with these actions during the three months ended November 22, 2013.

In Q1 2014, we announced restructuring actions in EMEA to reorganize the sales, marketing and support functions in France. In Q2 2014, we completed negotiations with the works councils related to these actions. We currently estimate the cash restructuring costs associated with these actions will be approximately \$7, with approximately \$6 related to employee termination costs and approximately \$1 of business exit and other related costs. We incurred \$0.9 and \$5.6 of employee termination costs in the EMEA segment during the three and nine months ended November 22, 2013, respectively. We incurred \$0.9 of business exit and other related costs in the EMEA segment in connection with these actions during the nine months ended November 22, 2013.

In Q2 2013, we announced plans to integrate PolyVision's global technology business into the Steelcase Education Solutions group. We incurred \$0.1 and \$1.1 of business exit and other related costs in the Americas segment during the three and nine months ended November 22, 2013. These restructuring actions are substantially complete.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations:

This management's discussion and analysis of financial condition and results of operations should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended February 22, 2013. Reference to a year relates to the fiscal year, ended in February of the year indicated, rather than the calendar year, unless indicated by a specific date. Additionally, Q1, Q2, Q3 and Q4 reference the first, second, third and fourth quarter, respectively, of the fiscal year indicated. All amounts are in millions, except share and per share data, data presented as a percentage or as otherwise indicated.

Non-GAAP Financial Measures

This item contains certain non-GAAP financial measures. A "non-GAAP financial measure" is defined as a numerical measure of a company's financial performance that excludes or includes amounts so as to be different than the most directly comparable measure calculated and presented in accordance with GAAP in the condensed consolidated statements of income, balance sheets or statements of cash flows of the company. Pursuant to the requirements of Regulation G, we have provided a reconciliation below of non-GAAP financial measures to the most directly comparable GAAP financial measure.

The non-GAAP financial measures used are: (1) organic revenue growth (decline), which represents the change in revenue excluding estimated currency translation effects and the impacts of acquisitions and divestitures, and (2) adjusted operating income (loss), which represents operating income (loss) excluding restructuring costs and goodwill and intangible asset impairment charges. These measures are presented because management uses this information to monitor and evaluate financial results and trends. Therefore, management believes this information is also useful for investors.

Overview

In Q3 2014, organic revenue growth was 8% compared to the prior year. The Americas posted organic revenue growth of 11% over the prior year, marking its fifteenth consecutive quarter of organic growth. In the Americas, Q3 2014 orders grew approximately 9% over the prior year, and order patterns during the quarter resulted in a customer backlog at the end of the quarter which was approximately 15% higher than the prior year. EMEA experienced an organic revenue decline of 2% due to the challenging economic environment in Western Europe, and revenue trends by market continue to be mixed. Additionally, EMEA Q3 2014 orders declined by approximately 10% compared to the prior year. The Other category experienced organic revenue growth of 3%, as growth in PolyVision and Designtex was partially offset by a decline in Asia Pacific.

Q3 2014 Compared to Q3 2013

We recorded net income of \$23.0 in Q3 2014 and \$23.6 in Q3 2013. Improved operating results in Q3 2014 were more than offset by the impact of goodwill and intangible asset impairment charges of \$12.9 and a higher effective tax

rate.
Revenue was \$784.8 in Q3 2014 compared to \$727.2 in Q3 2013. Organic revenue growth was 8% after adjusting for currency translation effects and the impact of a dealer divestiture, net of acquisitions. The Americas

17

Table of Contents

organic revenue growth was 11% compared to the prior year and reflected a higher mix of project business from some of the company's largest corporate customers. EMEA and Asia Pacific (included in the Other category) experienced small organic revenue declines, which included higher levels of competitive discounting compared to the prior year. Operating income was \$39.3 in Q3 2014 compared to \$38.4 in the prior year. Q3 2014 adjusted operating income of \$53.9 increased by \$9.5 compared to Q3 2013 adjusted operating income of \$44.4. The improvement was driven by strength in the Americas, partially offset by operating losses in EMEA and the Other category compared to profitability in the prior year.

Cost of sales was 69.0% of revenue in Q3 2014, a 50 basis point increase compared to Q3 2013. The year-over-year improvement in the Americas was offset by higher cost of sales in EMEA and Asia Pacific, which were primarily driven by higher competitive discounting and adjustments to slow-moving inventory reserves.

Operating expenses in Q3 2014 of \$189.8 increased by \$5.0 compared to Q3 2013 operating expenses of \$184.8. Q3 2014 included unfavorable currency translation effects of \$1.0, lower operating expenses of \$0.2 related to a dealer divestiture, net of acquisitions and \$3.9 of lower variable compensation. The remaining increase of \$8.1 primarily related to increased spending on marketing, product development and other initiatives in the Americas, net of various cost reduction efforts in EMEA.

Goodwill and intangible asset impairment charges in Q3 2014 totaled \$12.9 and related to Asia Pacific within the Other category. See Note 8 to the condensed consolidated financial statements for additional information regarding the impairment charges.

We recorded restructuring costs of \$1.7 in Q3 2014 primarily associated with actions in EMEA announced in Q1 2014. In Q3 2013, we recorded restructuring costs of \$6.0, \$3.0 of which was associated with the North America plant closures announced in Q4 2011 and \$1.6 associated with the integration of PolyVision's global technology business into the Steelcase Education Solutions group.

Income tax expense in Q3 2014 reflects an effective tax rate of approximately 40% compared to approximately 37% in Q3 2013. The higher rate is being driven by losses in EMEA, which result in deferred tax assets in various jurisdictions for which full valuation allowances have been recorded. Income tax expense in Q3 2014 also reflects the non-deductible nature of the goodwill and intangible asset impairment charges and includes \$4.0 of other net discrete tax benefits.

Year-to-Date 2014 Compared to Year-to-Date 2013

We recorded year-to-date 2014 net income of \$63.8 compared to year-to-date 2013 net income of \$66.3. Improved operating results in year-to-date 2014 were more than offset by the impact of goodwill and intangible asset impairment charges, a higher effective tax rate, losses in the cash surrender value of variable life company-owned life insurance ("COLI") compared to gains in the prior year-to-date period and lower other income, net.

Year-to-date 2014 revenue increased \$62.2 or 2.9% compared to year-to-date 2013. After adjusting for currency translation effects and the net impacts of acquisitions and a divestiture, organic revenue growth was \$50.1 or 2%. We realized organic revenue growth of 5% in the Americas, while EMEA and the Other category declined by 6% and 1%, respectively.

Year-to-date 2014 operating income grew to \$111.7 compared to \$104.5 in the prior year. Year-to-date operating income included \$12.9 of goodwill and intangible asset impairment charges. Year-to-date 2014 adjusted operating income improved to \$134.0 from \$119.3 in the prior year. The improvement was driven by strength in the Americas, partially offset by higher operating losses in EMEA and lower operating income in the Other category compared to the prior year.

Year-to-date 2014 cost of sales was 68.5%, a 70 basis point improvement compared to year-to-date 2013. The improvement was primarily driven by benefits associated with organic revenue growth and net benefits from pricing adjustments and recent restructuring actions in the Americas, partially offset by higher competitive discounting in EMEA and Asia Pacific.

Year-to-date 2014 operating expenses of \$563.8 increased \$21.3 compared to the same period last year. The comparison included additional operating expenses of \$3.9 related to dealer acquisitions, net of a divestiture, unfavorable currency translation effects of \$2.2, \$0.2 of higher variable compensation and \$2.1 of increased environmental reserves. The remaining increase of \$12.9 over the prior year primarily related to increased spending on

marketing, product development and other initiatives in the Americas, net of various cost reduction efforts in EMEA and Asia Pacific.

18

Table of Contents

Goodwill and intangible asset impairment charges in year-to-date 2014 totaled \$12.9 and related to Asia Pacific within the Other category.

We recorded year-to-date 2014 restructuring costs of \$9.4 compared to \$14.8 for year-to-date 2013. The year-to-date 2014 amount included \$8.0 associated with actions in EMEA. The year-to-date 2013 amount included \$11.0 associated with the North America plant closures announced in Q4 2011.

Our year-to-date 2014 effective tax rate was approximately 38% compared to approximately 35% in year-to-date 2013. The higher rate is being driven by the losses in EMEA, which result in deferred tax assets in various jurisdictions for which full valuation allowances have been recorded. Year-to-date 2014 income taxes also reflect the non-deductible nature of the goodwill and intangible asset impairment charges and include \$6.6 of other net discrete tax benefits.

Other income, net increased in Q3 2014 primarily due to higher equity in income of unconsolidated ventures.

Investment losses in year-to-date 2014 of \$0.6 compare to investment gains of \$3.5 in year-to-date 2013. The declines were primarily due to losses in the cash surrender value of variable life COLI during year-to-date 2014 versus gains in year-to-date 2013. Other income, net declined in year-to-date 2014 due to higher foreign currency losses, partially offset by higher equity in income of unconsolidated ventures. The decline in was also due to a \$2.1 gain recognized on the sale of a small equity investment in Q1 2013.

Adjusted operating income	\$66.6	11.9	%	\$47.1	9.4	%	\$184.8	11.6	%	\$147.2	9.6	%

Operating income in the Americas of \$66.6 in Q3 2014 increased by \$24.5 compared to Q3 2013 operating income of \$42.1. Adjusted operating income increased by \$19.5 in Q3 2014 compared to Q3 2013. The improvement was driven by organic revenue growth, various cost reduction efforts in manufacturing and logistics and net benefits from pricing adjustments and recent restructuring actions, offset in part by increased spending on marketing, product development and other initiatives and the impact of a higher mix of project business. The \$37.6 improvement in year-to-date 2014 adjusted operating income was due to similar factors impacting the Q3 2014 results.

The Americas revenue represented 71.2% of consolidated revenue in Q3 2014. Revenue for Q3 2014 was \$558.5 compared to \$503.2 in Q3 2013. After adjusting for \$1.9 of currency translation effects, organic revenue growth was \$57.2 or 11% compared to the prior year. Current quarter orders and customer backlog grew 9% and 15%, respectively, compared to the prior year. Revenue growth in Q3 2014 is categorized as follows:

Product categories — Eight out of nine categories grew in Q3 2014, led by Architectural Solutions, Details and Wood. The Technology category declined compared to the prior year.

- Vertical markets** — Insurance Services, State and Local Government and Healthcare experienced strong growth while Manufacturing declined year-over-year.

Geographic regions — All Business Groups grew, led by double-digit growth in the East and West Business Groups.

Contract type — Project business had strong growth, while continuing business grew modestly and marketing programs were nearly flat.

Year-to-date 2014 organic revenue growth was \$77.7 or 5%.

Cost of sales improved 80 basis points to 67.3% of revenue in Q3 2014 compared to 68.1% of revenue in Q3 2013. The improvement was largely driven by the benefits from organic revenue growth, various cost reduction efforts in manufacturing and logistics and net benefits from pricing adjustments and recent restructuring actions, offset in part by the impact of a higher mix of project business. Year-to-date 2014 cost of sales improved by 190 basis points and was affected by the same factors as the Q3 2014 results.

Operating expenses increased by \$2.8 in Q3 2014 compared to the same period last year but decreased as a percentage of sales. The increase primarily related to higher spending on marketing, product development and other initiatives, partially offset by \$3.0 of lower variable compensation expense. Year-to-date 2014 operating expenses increased by \$16.0. The increase primarily related to \$1.4 of increased variable compensation and higher spending on sales, marketing, product development and other initiatives.

There were net restructuring costs of zero in Q3 2014. Year-to-date 2014 restructuring costs were \$1.2 and related to the completion of the integration of PolyVision's global technology business into the Steelcase Education Solutions group. Restructuring costs of \$5.0 in Q3 2013 and \$13.2 in year-to-date 2013 primarily related to the consolidation of manufacturing facilities announced in Q4 2011.

EMEA

The EMEA segment serves customers in Europe, the Middle East and Africa primarily under the Steelcase and Coalesse brands, with an emphasis on freestanding furniture systems, seating and storage solutions.

The operating loss in EMEA of \$3.7 in Q3 2014 represents a decrease of \$4.5 compared to operating income of \$0.8 in Q3 2013. The adjusted operating loss of \$2.2 in Q3 2014 compared to adjusted operating income of \$1.3 in the same period of the prior year. The higher losses were primarily driven by the organic revenue decline (including higher levels of competitive discounting), adjustments to sales allowances and slow-moving inventory reserves and various inefficiencies in manufacturing and logistics, offset in part by lower operating expenses. The year-to-date 2014 adjusted operating loss of \$21.1 compared to the year-to-date 2013 operating loss of \$11.6. The decline was driven by the same factors impacting our Q3 2014 results.

EMEA revenue represented 20.1% of consolidated revenue in Q3 2014. Revenue for Q3 2014 was \$158.0 compared to \$157.1 in Q3 2013. After adjusting for \$6.2 of currency translation effects and \$1.5 of revenue from a dealer divestiture, net of acquisitions, the organic revenue decline was \$3.8 or 2%. The year-to-date 2014 organic revenue decline was \$26.3 or 6%. For Q3 2014, organic growth in Germany, the United Kingdom and Iberia was more than offset by declines in France and the Middle East and Africa (as a group). For year-to-date 2014, organic revenue growth in the export markets of the central, eastern and southern parts of Europe (as a group) was more than offset by declines across Western Europe.

Cost of sales climbed to 75.1% of revenue in Q3 2014 from 71.0% of revenue in Q3 2013, a 410 basis point erosion. Year-to-date 2014 cost of sales eroded 260 basis points to 75.4%. The erosions in both Q3 2014 and year-to-date 2014 were primarily driven by the impact of the organic revenue decline (including higher levels of competitive discounting), adjustments to sales allowances and slow-moving inventory reserves and various inefficiencies in manufacturing and logistics.

Q3 2014 operating expenses decreased by \$2.6. Unfavorable currency translation effects were more than offset by the benefits from recent restructuring actions and cost containment efforts. The year-to-date 2014 operating expenses decreased by \$4.0 as \$3.9 of additional operating expenses related to dealer acquisitions, net of a divestiture, and unfavorable currency translation effects were more than offset by the benefits from recent restructuring actions and cost containment efforts.

Restructuring costs of \$1.5 and \$8.0 in Q3 2014 and year-to-date 2014, respectively, were primarily associated with the reorganization of the sales, marketing and support functions in France initiated in Q1 2014.

Other

The Other category includes Asia Pacific, Designtex and PolyVision. Asia Pacific serves customers in Asia and Australia primarily under the Steelcase brand with an emphasis on freestanding furniture systems, storage and seating solutions. Designtex designs and sells surface materials including textiles and wall coverings which are specified by architects and designers directly to end-use customers through a direct sales force. PolyVision

The Other category reported an operating loss of \$13.6 in Q3 2014 compared to operating income of \$2.1 in Q3 2013. The Q3 2014 results include goodwill and intangible asset impairment charges of \$12.9 related to Asia Pacific. The adjusted operating loss of \$0.5 in Q3 2014 compared to adjusted operating income of \$2.6 in Q3 2013. A higher operating loss in Asia Pacific and lower operating income at Designtex were partially offset by higher operating income at PolyVision. Year-to-date 2014 adjusted operating income decreased by \$3.2 compared to year-to-date 2013. Year-to-date 2014 adjusted operating income results were affected by the same factors as our Q3 2014 results. Q3 2014 revenue increased by \$1.4 or 2.1%. Excluding currency translation effects, the organic revenue growth was \$2.1 or 3% for Q3 2014. The increase was primarily driven by increased revenues at PolyVision and Designtex. Year-to-date 2014 revenue decreased \$2.4 or 1.2% compared to the prior year. Excluding currency translation effects, the organic revenue decline was \$1.3 or 1%. The decline was largely driven by Asia Pacific (primarily in China and Japan).

Cost of sales as a percent of revenue was 68.4% in Q3 2014 compared to 65.2% in Q3 2013, a 320 basis point erosion. Year-to-date 2014 cost of sales eroded 170 basis points to 66.9% compared to year-to-date 2013. The erosions in both Q3 2014 and year-to-date 2014 were primarily driven by a higher competitive discounting and adjustments to slow-moving inventory reserves in Asia Pacific.

Q3 2014 operating expenses increased by \$1.4 compared to Q3 2013. This increase was primarily driven by sales and marketing investments at Designtex. Year-to-date 2014 operating expenses decreased by \$0.9 compared to year-to-date 2013. This decrease was primarily driven by cost containment efforts in Asia Pacific.

STEELCASE INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The increase in operating expenses for Q3 2014 was primarily due to higher earnings associated with deferred compensation and higher unallocated spending levels across the corporate functions. The increase in operating expenses for year-to-date 2014 was primarily due to higher earnings associated with deferred compensation and higher unallocated variable compensation expense. Additionally, year-to-date 2014 includes \$2.1 for environmental remediation costs associated with previously-owned manufacturing sites.

Liquidity and Capital Resources

Based on current business conditions, we target a minimum of \$75 to \$150 in cash and cash equivalents and short-term investments to fund day-to-day operations, including seasonal disbursements, particularly the annual payment of accrued variable compensation and retirement plan contributions in Q1 of each fiscal year. In addition, we may carry additional liquidity for potential investments in strategic initiatives and as a cushion against economic volatility.

Liquidity Sources	November 22, 2013	February 22, 2013
Cash and cash equivalents	\$ 149.1	\$ 150.4
Short-term investments	147.9	100.5
Whole life company-owned life insurance	112.7	109.6
Variable life company-owned life insurance	39.4	116.2
Availability under credit facilities	167.2	174.2
Total liquidity	\$616.3	\$650.9

As of November 22, 2013, we held a total of \$297.0 in cash and cash equivalents and short-term investments. The majority of our short-term investments are located in the U.S. Of our total \$149.1 in cash and cash equivalents, approximately 63% was located in the U.S. and the remaining 37% was located outside of the U.S., primarily in France, Hong Kong, Mexico, China and Canada. The amounts located outside the U.S. would be taxable if repatriated to the U.S., but we do not anticipate repatriating such amounts or needing them for operations in the U.S. Such amounts are considered permanently reinvested in foreign subsidiaries, available to repay intercompany debt or to be utilized to meet local working capital requirements.

The majority of our short-term investments are maintained in a managed investment portfolio, which primarily consists of U.S. agency debt securities and corporate debt securities.

As of November 22, 2013, the majority of our investments in COLI have been earmarked to offset long-term benefit obligations. However, COLI can be used as a source of liquidity if needed. We believe the financial strength of the issuing insurance companies associated with our COLI policies is sufficient to meet their obligations. COLI investments are recorded at their net cash surrender value.

Availability under credit facilities may be reduced by the use of cash and cash equivalents and short-term investments for purposes other than the repayment of debt as a result of constraints related to our maximum leverage ratio covenant. See Liquidity Facilities for more information.

Net cash provided by operating activities	\$97.0	\$129.8

The reduction in cash provided by operating activities in year-to-date 2014 compared to year-to-date 2013 was primarily due to higher utilization of foreign tax credits in year-to-date 2013 and a higher use of working capital in year-to-date 2014, partially offset by an increase in cash generated from operating results after consideration of the non-cash goodwill and intangible asset impairment charges.

Cash used in investing activities

Cash Flow Data — Investing Activities	Nine Months Ended	
	November 22, 2013	November 23, 2012
Capital expenditures	\$(51.9) \$(49.9

Liquidations of short-term investments	80.4	47.5
Other	(2.0) (16.1
Net cash used in investing activities	\$(24.9) \$(49.7

Capital expenditures in year-to-date 2014 were primarily related to investments in product development, manufacturing operations, and spending on corporate facilities related to campus consolidation. The increase in liquidations of short-term investments in year-to-date 2014 compared to year-to-date 2013 mainly took place in Q1 2014 and was primarily due to funding requirements for increased variable compensation payments.

During Q3 2014, we reduced our variable life COLI investments by withdrawing basis of \$74.5 (tax-free). This reduction in variable life COLI is directly related to the increase in purchases of short term investments.

In Q1 2013, we sold a corporate aircraft for cash proceeds of \$13.7. Additionally, in year-to-date 2013, we acquired three dealers within the EMEA segment for cash consideration of approximately \$6.1.

We paid dividends of \$0.10 per common share during each of the first three quarters of 2014 and \$0.09 per share during each of the first three quarters of 2013.

In Q3 2014, we made common stock repurchases of 64,553 shares to satisfy participants' tax withholding obligations upon the vesting of performance unit and restricted stock unit grants. As of the end of Q3 2014, we had \$109.9 of remaining availability under the \$250 share repurchase program approved by our Board of Directors in Q4 2008.

Off-Balance Sheet Arrangements

During Q3 2014, no material change in our off-balance sheet arrangements occurred.

Contractual Obligations

During Q3 2014, no material change in our contractual obligations occurred.

Liquidity Facilities

Our total liquidity facilities as of November 22, 2013 were:

Liquidity Facilities	November 22, 2013
Global committed bank facility	\$125.0
Various uncommitted lines	42.2
Total credit lines available	167.2
Less: Borrowings outstanding	—
Available capacity	\$167.2

We have a \$125 global committed five-year unsecured revolving syndicated credit facility which was entered into in Q1 2013. The facility requires us to satisfy financial covenants including a maximum leverage ratio covenant and a minimum interest coverage ratio covenant. Additionally, the facility requires us to comply with certain other covenants, including a restricted payment covenant which establishes a maximum level of dividends and/or other equity-related distributions or payments (such as share repurchases) we may make in any fiscal year. As of November 22, 2013, we were in compliance with all covenants under the facility.

The various uncommitted lines may be changed or canceled by the banks at any time. There were no outstanding borrowings under the uncommitted facilities as of November 22, 2013. In addition, we have a revolving letter of credit agreement for \$13.5 of which \$11.4 was utilized primarily related to our self-insured workers' compensation programs as of November 22, 2013. There were no draws on our standby letters of credit during Q3 2014.

Total consolidated debt as of November 22, 2013 was \$287.1. Our debt primarily consists of \$249.9 in term notes due in 2021 with an effective interest rate of 6.6%. In addition, we have a term loan with a balance as of November 22, 2013 of \$36.8. This term loan has a floating interest rate based on 30-day LIBOR plus 3.35% and is due in 2017. The term notes are unsecured, the term loan is secured by two corporate aircraft, and neither the term notes nor the term loan contain financial covenants or are cross-defaulted to other debt facilities.

Liquidity Outlook

Our current cash and cash equivalents and short-term investment balances, funds available under our credit facilities, funds available from COLI and cash generated from future operations are expected to be sufficient to finance our known or foreseeable liquidity needs. We believe the timing, strength and continuity of the economic recovery across the EMEA and Asia Pacific geographies we serve remain uncertain which may continue to dampen our level of cash generation from operations. We continue to maintain a conservative approach to liquidity and maintain flexibility over significant uses of cash including our capital expenditures and discretionary operating expenses.

Our significant funding requirements include operating expenses, non-cancelable operating lease obligations, capital expenditures, variable compensation and retirement plan contributions, dividend payments and debt service obligations.

Table of Contents

We currently expect capital expenditures to approximate \$80 in 2014 compared to \$74 in 2013. This amount includes global product development projects and manufacturing investments in both EMEA and the Americas. Additionally, the amount includes the initial costs related to the construction of a new manufacturing location in the Czech Republic.

On December 18, 2013, we announced a quarterly dividend on our common stock of \$0.10 per share, or \$12.6, to be paid in Q4 2014. Future dividends will be subject to approval by our Board of Directors.

Critical Accounting Estimates

During Q3 2014, there have been no changes in the items that we have identified as critical accounting estimates.

Forward-looking Statements

From time to time, in written and oral statements, we discuss our expectations regarding future events and our plans and objectives for future operations. These forward-looking statements generally are accompanied by words such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “forecast,” “intend,” “may,” “possible,” “potential,” “predict,” “project,” words, phrases or expressions. Forward-looking statements involve a number of risks and uncertainties that could cause actual results to vary from our expectations because of factors such as, but not limited to, competitive and general economic conditions domestically and internationally; acts of terrorism, war, governmental action, natural disasters and other Force Majeure events; changes in the legal and regulatory environment; our restructuring activities; changes in raw materials and commodity costs; currency fluctuations; changes in customer demand; and the other risks and contingencies detailed in this Report, our most recent Annual Report on Form 10-K and our other filings with the Securities and Exchange Commission. We undertake no obligation to update, amend, or clarify forward-looking statements, whether as a result of new information, future events, or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk:

The nature of market risks (i.e., the risk of loss arising from adverse changes in market rates and prices) faced by us as of November 22, 2013 is the same as disclosed in our Annual Report on Form 10-K for the year ended February 22, 2013. We are exposed to market risks from foreign currency exchange, interest rates, commodity prices and fixed income and equity prices, which could affect our operating results, financial position and cash flows.

Foreign Exchange Risk

During Q3 2014, no material change in foreign exchange risk occurred.

Interest Rate Risk

During Q3 2014, no material change in interest rate risk occurred.

Fixed Income and Equity Price Risk

During Q3 2014, no material change in fixed income and equity price risk occurred.

Item 4. Controls and Procedures:

(a) Disclosure Controls and Procedures. Our management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)), as of November 22, 2013. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of November 22, 2013, our disclosure controls and procedures were effective in

(1) recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act and (2) ensuring that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our

Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Internal Control Over Financial Reporting. There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act) during our third fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
