HERITAGE COMMERCE CORP
Notes to Consolidated Financial Statements
March 31, 2007
(Unaudited)

1) Basis of Presentation

The unaudited consolidated financial statements of Heritage Commerce Corp (the “Company”) and its wholly owned subsidiary, Heritage Bank of Commerce (“HBC”), have been prepared pursuant to the rules and regulations for reporting on Form 10-Q. Accordingly, certain information and notes required by accounting principles generally accepted in the United States of America (“GAAP”) for annual financial statements are not included herein. The interim statements should be read in conjunction with the consolidated financial statements and notes that were included in the Company’s Form 10-K for the year ended December 31, 2006. The Company has also established the following unconsolidated subsidiary grantor trusts: Heritage Capital Trust I; Heritage Statutory Trust I; Heritage Statutory Trust II; and Heritage Commerce Corp Statutory Trust III which are Delaware Statutory business trusts formed for the exclusive purpose of issuing and selling trust preferred securities.

HBC is a commercial bank serving customers located in Santa Clara, Alameda, and Contra Costa counties of California. No customer accounts for more than 10 percent of revenue for HBC or the Company. Management evaluates the Company’s performance as a whole and does not allocate resources based on the performance of different lending or transaction activities. Accordingly, the Company and its subsidiary operate as one business segment.

In the Company’s opinion, all adjustments necessary for a fair presentation of these consolidated financial statements have been included and are of a normal and recurring nature. All intercompany transactions and balances have been eliminated.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ significantly from these estimates.

Certain amounts reported in previous consolidated financial statements have been reclassified to conform to the 2007 presentation.

The results for the three months ended March 31, 2007 are not necessarily indicative of the results expected for any subsequent period or for the entire year ending December 31, 2007.

Adoption of New Accounting Standards

In February, 2006, FASB issued Statement 155, *Accounting for Certain Hybrid Instruments*. This standard amended the guidance in Statement 133, *Accounting for Derivative Instruments and Hedging Activities*, and Statement 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. Statement 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only and principal-only strips are not subject to the requirements of Statement 133. Statement 155 is effective for all financial instruments acquired or issued after the beginning of an entity’s first fiscal year that begins after September 15, 2006. The adoption of this standard did not have a material impact on the Company’s financial statements.

In March, 2006, FASB issued Statement 156, *Accounting for Servicing of Financial Assets - An Amendment of FASB Statement No. 140*. This standard amends the guidance in Statement 140, with respect to the accounting for separately recognized servicing assets and servicing liabilities. Among other requirements, Statement 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in certain situations, including a transfer of loans with servicing retained that meets the requirements for sale accounting. Statement 156 is effective as of the beginning of an entity's first fiscal year that begins after September 15, 2006. The adoption of this standard did not have a material impact on the Company's financial statements.

In June 2006, FASB issued FASB Interpretation ("FIN") 48, *Accounting for Uncertainty in Income Taxes*. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement 109, *Accounting for Income Taxes*. This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This Interpretation is effective for fiscal years beginning after December 15, 2006.

The Company adopted FASB Interpretation 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"), as of January 1, 2007. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. The adoption of this standard did not have a material impact on the Company's financial statements.

The Company and its subsidiaries are subject to U.S. federal income tax as well as income tax of the State of California. The Company is no longer subject to examination by taxing authorities for years before 2003. The Company does not expect the total amount of unrecognized tax benefits to significantly increase in the next twelve months.

The Company recognizes interest and/or penalties related to income tax matters in income tax expense. The Company did not have any amounts accrued for interest and penalties at March 31, 2007.

In September 2006, the FASB Emerging Issues Task Force finalized Issue No. 06-5, *Accounting for Purchases of Life Insurance - Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4 (Accounting for Purchases of Life Insurance)*. This issue requires that a policyholder consider contractual terms of a life insurance policy in determining the amount that could be realized under the insurance contract. It also requires that if the contract provides for a greater surrender value if all individual policies in a group are surrendered at the same time, that the surrender value be determined based on the assumption that policies will be surrendered on an individual basis. Lastly, the issue discusses whether the cash surrender value should be discounted when the policyholder is contractually limited in its ability to surrender a policy. This issue is effective for fiscal years beginning after December 15, 2006. The adoption of this issue did not have a material impact on the financial statements.

Newly Issued but not yet Effective Accounting Standards

In September 2006, the FASB Emerging Issues Task Force finalized Issue No. 06-4, *Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements*. This issue requires that a liability be recorded during the service period when a split-dollar life insurance agreement continues after participants' employment or retirement. The required accrued liability will be based on either the post-employment benefit cost for the continuing life insurance or based on the future death benefit depending on the contractual terms of the underlying agreement. This issue is effective for fiscal years beginning after December 15, 2007. Adoption of EITF Issue 06-4 is not expected to have a material effect on the Company's financial statements. In 2005, the Company began recognizing the cost of continuing life insurance coverage under split-dollar arrangements. The recorded liability for split-dollar life insurance coverage was \$1,249,000 and \$1,082,000 at March 31, 2007 and 2006, respectively.

In September 2006, FASB issued Statement 157, *Fair Value Measurements*. This Statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles ("GAAP"), and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The adoption of this standard is not expected to have a material impact on the Company's financial statements.

In February 2007, FASB issued Statement 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. This statement provides companies with an option to report selected financial assets and liabilities at fair value. The Standard's objective is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. The standard requires companies to provide additional information that will help investors and other users of financial statements to more easily understand the effect of the company's choice to use fair value on its earnings. It also requires entities to display the fair value of those assets and liabilities for which the company has chosen to use fair value on the face of the balance sheet. The new Statement does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in Statements 157, *Fair Value Measurements*, and 107, *Disclosures about Fair Value of Financial Instruments*. This Statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company has not completed its evaluation of Statement

159's potential effects on its financial statements.

2) Securities Available-for-Sale

The following table shows the gross unrealized losses and fair value of the Company's securities with unrealized losses aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at March 31, 2007:

	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(Dollars in thousands)					
U.S. Treasuries	\$ -	\$ -	\$ 6,000	\$ (15)	\$ 6,000	\$ (15)
U.S. Government Agencies	13,449	(13)	19,507	(150)	32,956	(163)
Mortgage-Backed Securities	6,257	(27)	70,486	(2,604)	76,743	(2,631)
Municipals - Tax Exempt	-	-	7,971	(127)	7,971	(127)
Collateralized Mortgage Obligations	-	-	3,272	(134)	3,272	(134)
Total	\$ 19,706	\$ (40)	\$ 107,236	\$ (3,030)	\$ 126,942	\$ (3,070)

As of March 31, 2007, the Company held 95 securities, of which 65 had fair values below amortized cost. Fifty-six securities have been carried with an unrealized loss for over 12 months. Unrealized losses were primarily due to higher interest rates. No security sustained a downgrade in credit rating. The issuers are of high credit quality and all principal amounts are expected to be paid when securities mature. The fair value is expected to recover as the securities approach their maturity date and/or market rates decline. Because the Company has the ability and intent to hold these securities until a recovery of fair value, which may be maturity, the Company does not consider these securities to be other-than-temporarily impaired at March 31, 2007.

Securities classified as U.S. Government Agencies as of March 31, 2007 were issued by the Federal National Mortgage Association, Federal Home Loan Mortgage Corporation, and the Federal Home Loan Bank.

The securities portfolio of the Company is also used as collateral to meet requirements imposed as a condition of deposit by some depositors such as political subdivisions (public funds) bankruptcy trustees and other contractual obligations such as repurchase agreements. Securities with fair value of \$50,394,000 and \$61,210,000 as of March 31, 2007 and 2006 were pledged to secure public and certain other deposits as required by law or contract and other contractual obligations. A portion of these deposits can only be secured by U.S. Treasury securities. The Company has not used interest rate swaps or other derivative instruments to hedge fixed rate loans or to otherwise mitigate interest rate risk.

3) Stock-Based Compensation

The Company has a stock option plan (the "Plan") for directors, officers, and key employees. The Plan provides for the grant of incentive and non-qualified stock options. The Plan provides that the option price for both incentive and non-qualified stock options will be determined by the Board of Directors at no less than the fair value at the date of grant. Options granted vest on a schedule determined by the Board of Directors at the time of grant. Generally, options vest over four years. All options expire no later than ten years from the date of grant. As of March 31, 2007, there are 415,793 shares available for future grants under the Plan. Option activity under the Plan is as follows:

Total Stock Options	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Options Outstanding at January 1, 2007	752,983	\$ 16.56		
Granted	7,000	\$ 27.17		
Exercised	(14,885)	\$ 10.47		
Forfeited or expired	(3,881)	\$ 22.78		
Options Outstanding at March 31, 2007	741,217	\$ 16.75	6.9	\$ 6,478,000
Exercisable at March 31, 2007	425,018	\$ 13.37	5.6	\$ 5,151,000

Information related to the stock option plan during the quarter ended March 31, 2007 and 2006 follows:

	2007	2006
Intrinsic value of options exercised	\$ 220,000	\$ 805,000
Cash received from option exercise	\$ 156,000	\$ 555,000
Tax benefit realized from option exercises	\$ 78,000	\$ 292,000

Weighted average fair value of options granted	\$ 7.62	\$ 8.56
--	---------	---------

As of March 31, 2007, there was \$2,214,000 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the Company's stock plan. That cost is expected to be recognized over a weighted-average period of approximately 2 years.

The following table presents the assumptions used to estimate the fair value of options granted during the three months periods ending March 31, 2007 and 2006, respectively:

	2007	2006
Expected life in months ⁽¹⁾	72	84
Volatility ⁽¹⁾	20%	24%
Risk-free interest rate ⁽²⁾	4.71%	4.56%
Expected dividends ⁽³⁾	0.88%	0.89%

8

- (1) Estimate based on historical experience. Volatility is based on the historical volatility of the stock over the most recent period that is generally commensurate with the expected life of the option.
- (2) Based on the U.S. Treasury constant maturity interest rate with a term consistent with the expected life of the options granted.
- (3) The Company began paying cash dividends on common stock in 2006. Each grant's dividend yield is calculated by annualizing the most recent quarterly cash dividend and dividing that amount by the market price of the Company's common stock as of the grant date.

The Company estimates the impact of forfeitures based on the Company's historical experience with previously granted stock options in determining stock option expense. The Company issues new shares of common stock to satisfy stock option exercises.

The Company awarded 51,000 restricted shares of common stock to Walter T. Kaczmarek, President and Chief Executive Officer of the Company, pursuant to the terms of a Restricted Stock Agreement dated March 17, 2005. The grant price was \$18.15. Under the terms of the Restricted Stock Agreement, the restricted shares will vest 25% per year at the end of years three, four, five and six, provided Mr. Kaczmarek is still with the Company. Compensation cost associated with the restricted stock issued is measured based on the market price of the stock at the grant date and is expensed on a straight-line basis over the service period. Restricted stock compensation expense for the three months ended March 31, 2007 and 2006 was \$38,000.

4) Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted average common shares outstanding. Diluted earnings per share reflects potential dilution from outstanding stock options, using the treasury stock method. There were 220,946 and 132,224 stock options for three months ended March 31, 2007 and 2006, respectively, considered to be antidilutive and excluded from the computation of diluted earnings per share. For each of the periods presented, net income is the same for basic and diluted earnings per share. Reconciliation of weighted average shares used in computing basic and diluted earnings per share is as follows:

	Three Months Ended	
	March 31,	
	2007	2006
Weighted average common shares outstanding		
- used		
in computing basic earnings per share	11,602,120	11,821,817
Dilutive effect of stock options outstanding,		
using the treasury stock method	218,515	217,721
Shares used in computing diluted earnings per		
share	11,820,635	12,039,538

5) Comprehensive Income

Comprehensive income includes net income and other comprehensive income, which represents the changes in net assets during the period from non-owner sources. The Company's sources of other comprehensive income are unrealized gains and losses on securities available-for-sale and I/O strips, which are treated like available-for-sale securities, and the liability related to the Company's supplemental retirement plan. The items in other comprehensive income are presented net of deferred income tax effects. Reclassification adjustments result from gains or losses on securities that were realized and included in net income of the current period that also had been included in other comprehensive income as unrealized gains and losses. The Company's comprehensive income was as follows:

**Three Months Ended
March 31,**

2007 2006

(Dollars in thousands)

Net Income	\$	4,033	\$	4,376
Other comprehensive income (loss):				
Unrealized gains (losses) on available-for-sale of securities and I/O strips during the period		462		(1,186)
Deferred income tax		(194)		498
Net unrealized gains (losses) on available-for-sale securities and I/O strips, net of deferred income tax		268		(688)
Pension liability adjustment during the period		26		279
Deferred income tax		(11)		(117)
Pension liability adjustment, net of deferred income tax		15		162
Other comprehensive income (loss)		283		(526)
Comprehensive income	\$	4,316	\$	3,850

6) Supplemental Retirement Plan

The Company has a supplemental retirement plan covering current and former key executives and directors (“Plan”). The Plan is a nonqualified defined benefit plan. Benefits are unsecured as there are no Plan assets. The following table presents the amount of periodic cost recognized for the three months ended March 31, 2007 and 2006:

**Three Months Ended
March 31,**

2007 2006

(Dollars in thousands)

Components of net periodic benefits cost				
Service cost	\$	184	\$	200
Interest cost		155		138
Prior service cost		9		9
Amortization of loss		17		36
Net periodic cost	\$	365	\$	383

7) Commitments and Contingencies

Financial Instruments with Off-Balance Sheet Risk

HBC is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its clients. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk, in excess of the amounts recognized in the balance sheets.

HBC's exposure to credit loss in the event of non-performance of the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those

instruments. HBC uses the same credit policies in making commitments and conditional obligations as it does for loans. Credit risk is the possibility that a loss may occur because a party to a transaction fails to perform according to the terms of the contract. HBC controls the credit risk of these transactions through credit approvals, limits, and monitoring procedures. Management does not anticipate any significant losses as a result of these transactions.

Commitments to extend credit as of March 31, 2007 and December 31, 2006 were as follows:

	March 31, 2007	December 31, 2006
	(Dollars in thousands)	
Commitments to extend credit	\$ 337,419	\$ 310,200
Standby letters of credit	12,036	12,020
	\$ 349,455	\$ 322,220

Generally, commitments to extend credit as of March 31, 2007 are at variable rates, typically based on the prime rate (with a margin). Commitments generally expire within one year.

Commitments to extend credit are agreements to lend to a client as long as there is no violation of conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses. Since some of the commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. HBC evaluates each client's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by HBC upon the extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies but may include cash, marketable securities, accounts receivable, inventory, property, plant and equipment, income-producing commercial properties, and/or residential properties. Fair value of these instruments is not material.

Standby letters of credit are written with conditional commitments issued by HBC to guarantee the performance of a client to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to clients.

8) Acquisition

On February 8, 2007, the Company, HBC and Diablo Valley Bank ("Diablo") entered into an Agreement and Plan of Merger (the "Merger Agreement"), pursuant to which among other things, Diablo will merge with and into HBC, with HBC surviving the merger (the "Merger") in a cash and stock transaction valued at approximately \$70 million. The Merger Agreement has been unanimously approved by the Board of Directors of the Company, HBC and Diablo. The Merger is subject to regulatory approval and approval by the Diablo shareholders. The Company has completed the application process with the SEC and has filed the necessary applications with the banking regulators. The transaction is expected to close during the second or third quarter of 2007. As of December 31, 2006, Diablo reported total assets of approximately \$249 million.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND

RESULTS OF OPERATIONS

Discussions of certain matters in this Report on Form 10-Q may constitute forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and as such, may involve risks and uncertainties. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies, and expectations, are generally identifiable by the use of words such as "believe", "expect", "intend", "anticipate", "estimate", "project", "assume", "plan", "forecast" or similar expressions. These forward-looking statements relate to, among other things, expectations of the business environment in which the Company operates, projections of future performance, potential future performance, potential future credit experience, perceived opportunities in the market, and statements regarding the Company's mission and vision. The Company's actual results, performance, and achievements may differ materially from the results, performance, and achievements expressed or implied in such forward-looking statements due to a wide range of factors. These factors include, but are not limited to, consummation of the acquisition of Diablo Valley

Bank and the successful integration of its business, customers, employees and operations with the Company, changes in interest rates, reducing interest margins or increasing interest rate risk, general economic conditions nationally or, in the State of California, legislative and regulatory changes adversely affecting the business in which the Company operates, monetary and fiscal policies of the US Government, real estate valuations, the availability of sources of liquidity at a reasonable cost, competition in the financial services industry, and other risks. All of the Company's operations and most of its customers are located in California. In addition, acts and threats of terrorism or the impact of military conflicts have increased the uncertainty related to the national and California economic outlook and could have an effect on the future operations of the Company or its customers, including borrowers. See "Item 1A - Risk Factors" in this Report on Form 10-Q and in Item 1-A- Risk Factors" in our Annual Report on Form 10-K for the Year ended December 31, 2006 for further discussions of factors that could cause actual result to differ from forward looking statements. The Company does not undertake, and specifically disclaims any obligation, to update any forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

EXECUTIVE SUMMARY

This summary is intended to identify the most important matters on which management focuses when it evaluates the financial condition and performance of the Company. When evaluating financial condition and performance, management looks at certain key metrics and measures. The Company's evaluation includes an analysis including comparisons with peer group financial institutions and with its own performance objectives established in the internal planning process.

The primary activity of the Company is commercial banking. The Company's operations are located entirely in the southern and eastern regions of the general San Francisco Bay area of California in the counties of Santa Clara, Alameda and Contra Costa. The largest city in this area is San Jose and the Company's market includes the headquarters of a number of technology based companies in the region known commonly as Silicon Valley. The Company's customers are primarily closely held businesses and professionals.

On February 8, 2007, the Company entered into an Agreement and Plan of Merger (the "Merger Agreement") with Diablo Valley Bank, a California banking corporation, pursuant to which among other things, Diablo will merge with and into Heritage Commerce Bank, the Company's bank subsidiary, with HBC surviving the merger in a cash and stock transaction valued at the time of the agreement at approximately \$70 million. The details of the Agreement are set forth in the Company's Annual Report on Form 10K for the year ended December 31, 2006. The transaction is subject to Diablo shareholder and regulatory approval from the Federal Reserve Board and the California Department of Financial Institutions. The transaction is expected to close in June or July of 2007.

Performance Overview

For the three months ended March 31, 2007, net income was \$4.0 million, or \$0.34 per diluted share, compared to \$4.4 million, or \$0.36 per diluted share, for the three months ended March 31, 2006. The Company's Return on Average Assets was 1.57% and Return on Average Equity was 13.12% for the first quarter of 2007 compared to 1.59% and 15.53% a year ago.

The following are major factors impacting the Company's results of operations:

- Net interest income decreased 4% to \$11.7 million in the first quarter of 2007 from \$12.2 million in the first quarter of 2006, primarily due to a decrease in average interest earning assets.
- Noninterest income decreased 13% to \$2.5 million in the first quarter of 2007 from \$2.9 million in the first quarter of 2006, due to a \$671,000 nonrecurring gain on the sale of the Capital Group loan portfolio in the first quarter of 2006.
- The efficiency ratio was 58.26% in the first quarter of 2007, compared to 58.08% in the first quarter of 2006.
- A reverse provision for loan losses of \$236,000 was recorded in the first quarter of 2007, compared to a reverse provision of \$489,000 a year ago. The reverse provision in 2007 was due to continued improvement in credit quality and a decrease in total loans.

The following are important factors in understanding our current financial condition and liquidity position:

- Total assets declined by \$49 million, or 4%, to \$1.07 billion at March 31, 2007 from \$1.12 billion at March 31, 2006.
- Gross loan balances (including loans held for sale) decreased by \$14 million, or 2%, from March 31, 2006 to March 31, 2007.

Deposits

Growth in deposits is an important metric management uses to measure market share. The Company's depositors are primarily located in its primary market area. Depending on loan demand and other funding requirements, the Company occasionally obtains deposits from wholesale sources including deposit brokers. The Company had \$43 million in brokered deposits at March 31, 2007. The Company also seeks deposits from title insurance companies and real estate exchange facilitators. The Company has a policy to monitor all deposits that may be sensitive to interest rate changes to help assure that liquidity risk does not become excessive due to concentrations.

Lending

Our lending business originates primarily through our branch offices. The economy in our primary service area has continued to stabilize in 2007. Commercial loans increased from March 31, 2006 primarily from increased loan demand reflecting the improving economy in our primary service area. Commercial real estate mortgage loans increased from March 31, 2006, primarily due to general improvements in commercial income property markets. We will continue to use and improve existing products to expand market share at current locations.

Net Interest Income

The management of interest income and interest expense is fundamental to the performance of the Company. Net interest income, the difference between interest income and interest expense, is the largest component of the Company's total revenue. Management closely monitors both net interest income and the net interest margin (net interest income divided by average earning assets).

Increases in short-term interest rates contributed to growth in net interest income since the interest rate earned on a majority of the Company's loan portfolio adjusts with the prime rate. Approximately 77% of the Company's loan portfolio is indexed to the prime rate. The Federal Open Market Committee ("FOMC") increased short term rates in one quarter percent increments in January, March, May, and June of 2006. The prime rate increased from 7.25% in January of 2006 to 8.25% in June of 2006. The prime rate has remained at 8.25% since June of 2006. The improvement in net interest margin in the first quarter of 2007 from a year ago is largely attributable to the FOMC action. Because of its focus on commercial lending to closely held businesses, the Company continues to have a high percentage of floating rate loans and other assets. Given the current volume, mix and repricing characteristics of our interest-bearing liabilities and interest-earning assets, we believe our interest rate spread is expected to increase slightly in a rising rate environment, and decrease slightly in a declining interest rate scenario.

The Company, through its asset and liability policies and practices, seeks to maximize net interest income without exposing the Company to an excessive level of interest rate risk. Interest rate risk is managed by monitoring the pricing, maturity and repricing options of all classes of interest bearing assets and liabilities.

Management of Credit Risk

Because of its focus on business banking, loans to single borrowing entities are often larger than would be found in a more consumer oriented bank with many smaller, more homogenous loans. The average size of its relationships makes the Company more susceptible to larger losses. As a result of this concentration of larger risks, the Company has maintained an allowance for loan losses which is substantially higher than would be indicated by its actual historic loss experience.

Noninterest Income

While net interest income remains the largest single component of total revenues, noninterest income is an important component. A significant percentage of the Company's noninterest income is associated with its SBA lending activity, either as gains on the sale of loans sold in the secondary market or servicing income from loans sold in the secondary market with retained servicing rights.

Risks associated with the continuation of this level of noninterest income from SBA lending include the possibility that the federal government will eliminate or change SBA programs in a manner that becomes less attractive to the Company or to SBA borrowers. Further, change in the secondary market for SBA loans could reduce gains on sale. Higher than expected prepayments of SBA loans on which the Company has retained servicing could reduce the carrying value of the associated servicing asset and interest only strip.

Noninterest Expense

Management considers the control of operating expenses to be a critical element of the Company's performance. Over the last three years, the Company has undertaken several initiatives to reduce its noninterest expense and improve its efficiency. These initiatives included a reduction in staff and the consolidation of operations under the common Heritage Bank brand and restructuring each department. Management monitors progress in reducing noninterest expense through review of the Company's efficiency ratio. The Company's efficiency ratio was 58.26% in the first quarter of 2007 compared with 58.08% in the first quarter of 2006.

Capital Management and Share Repurchases

Heritage Commerce Corp and Heritage Bank of Commerce meet the regulatory definition of “well capitalized” at March 31, 2007. As part of its asset and liability process, the Company continually assesses its capital position to take into consideration growth, expected earnings, risk profile and potential corporate activities that it may choose to pursue. On February 7, 2006, the Board of Directors authorized the repurchase of up to an additional \$10 million of common stock through June 30, 2007.

Starting in 2006, the Company initiated the payment of quarterly cash dividends. The Company’s general policy is to pay cash dividends within the range of typical peer payout ratios, provided that such payments do not adversely affect our financial condition and are not overly restrictive to our growth capacity. On February 6, 2007, the Company declared a \$0.06 per share quarterly cash dividend. The dividend was paid on March 15, 2007, to shareholders of record on February 22, 2007. The Company expects to pay quarterly dividends through 2007.

RESULTS OF OPERATIONS

The Company earns income from two primary sources. The first is net interest income, which is interest income generated by earning assets less interest expense on interest-bearing liabilities. The second is noninterest income, which primarily consists of gains from the sale of loans, loan servicing fees, and customer service charges and fees as well as non-customer sources such as Company-owned life insurance. The majority of the Company’s noninterest expenses are operating costs that relate to providing a full range of banking services to our customers.

Net Interest Income and Net Interest Margin

In the first quarter of 2007, net interest income was \$11.7 million, compared to \$12.2 million in the first quarter of 2006. The level of net interest income depends on several factors in combination, including growth in earning assets, yields on earning assets, the cost of interest-bearing liabilities, the relative volumes of earning assets and interest-bearing liabilities, and the mix of products which comprise the Company's earning assets, deposits, and other interest-bearing liabilities. To maintain its net interest margin, the Company must manage the relationship between interest earned and paid.

The following Distribution, Rate and Yield table presents the average amounts outstanding for the major categories of the Company's balance sheet, the average interest rates earned or paid thereon, and the resulting net interest margin on average interest earning assets for the periods indicated. Average balances are based on daily averages.

Distribution, Rate and Yield

**For the Three Months Ended
March 31,**

	Average Balance	2007 Average Income / Expense	Average Yield / Rate	Average Balance	2006 Interest Income / Expense	Average Yield / Rate
Assets:						
Loans, gross	\$ 719,243	\$ 14,670	8.27%	\$ 740,397	\$ 14,721	8.06%
Securities	173,320	1,953	4.57%	201,074	1,792	3.61%
Interest bearing deposits in other financial institutions	2,624	32	4.95%	2,838	18	2.57%
Federal funds sold	44,417	579	5.29%	65,560	729	4.51%
Total interest earning assets	939,604	\$ 17,234	7.44%	1,009,869	\$ 17,260	6.93%
Cash and due from banks	35,331			36,959

Demand, noninterest bearing	218,039			235,288		
Other liabilities	23,244			23,781		
Total liabilities	915,333			999,980		

Edgar Filing: HERITAGE COMMERCE CORP - Form 10-Q

Shareholders' equity	124,642		114,268	
Total liabilities and shareholders' equity	\$ 1,039,975		\$ 1,114,248	
Net interest income / margin	\$ 11,731	5.06%	\$ 12,191	4.90%

Note: Yields and amounts earned on loans include loan fees of \$0 and \$261,000 for the three month periods ended March 31, 2007 and 2006, respectively. Nonaccrual loans are included in the average balance calculation above.

The Volume and Rate Variances table below sets forth the dollar difference in interest earned and paid for each major category of interest-earning assets and interest-bearing liabilities for the noted periods, and the amount of such change attributable to changes in average balances (volume) or changes in average interest rates. Volume variances are equal to the increase or decrease in the average balance times the prior period rate, and rate variances are equal to the increase or decrease in the average rate times the prior period average balance. Variances attributable to both rate and volume changes are equal to the change in rate times the change in average balance and are included below in the average volume column.

Volume and Rate Variances

	Three Months Ended March 31, 2007 vs. 2006		
	Increase (Decrease) Due to Change In:		
	Average Volume	Average Rate	Net Change
	(Dollars in thousands)		
Income from the interest earning assets:			
Loans, gross	\$ (428)	\$ 377	\$ (51)
Securities	(313)	474	161
Interest bearing deposits in other financial institutions	(3)	17	14
Federal funds sold	(276)	126	(150)
Total interest income from interest earnings assets	\$ (1,020)	\$ 994	\$ (26)
Expense from the interest bearing liabilities:			
Demand, interest bearing	\$ (119)	\$ 46	\$ (73)
Savings and money market	(215)	417	202
Time deposits, under \$100	(31)	75	44
Time deposits, \$100 and over	(69)	260	191
Brokered time deposits, \$100 and over	56	46	102
Notes payable to subsidiary grantor trusts	-	19	19
Securities sold under agreement to repurchase	(69)	18	(51)
Total interest expense on interest bearing liabilities	\$ (447)	\$ 881	\$ 434
Net interest income	\$ (573)	\$ 113	\$ (460)

The Company's net interest margin, expressed as a percentage of average earning assets, was 5.06% in the first quarter of 2007 relative to 4.90% in the first quarter of 2006, an increase of 16 basis points. A substantial portion of the Company's earning assets are variable-rate loans that re-price when the Company's prime lending rate is changed, versus a large base of core deposits that are generally slower to re-price. This causes the Company's balance sheet to be slightly asset-sensitive, which means that all else being equal, the Company's net interest margin will be lower during periods when short-term interest rates are falling and higher when rates are rising. This effect was visible during 2006, when the Company's net interest margin rose in correlation to increases in short-term market interest rates.

Net interest income for 2007 decreased \$460,000, or 4% from first quarter of 2006. The decrease in 2007 was due to the decrease in average earning assets. Average interest earning assets decreased 7% in the first quarter of 2007 from the first quarter of 2006. This decrease was primarily attributable to decreases in average loans and Federal funds sold. Average loans outstanding, including loans held for sale, decreased \$21.2 million in the first quarter of 2007 over the average in the first quarter of 2006. Average Federal funds sold decreased \$21.1 million in the first quarter of 2007 from the first quarter of 2006. Average interest bearing liabilities decreased 9% in the first quarter of 2007 from the first quarter of 2006. The Company's average rate paid on interest bearing liabilities increased to 3.31% in the first

quarter of 2007 from 2.77% in the first quarter of 2006.

Provision for Loan Losses

Credit risk is inherent in the business of making loans. The Company sets aside an allowance or reserve for loan losses through charges to earnings, which are shown in the income statement as the provision for loan losses. Specifically identifiable and quantifiable losses are immediately charged off against the allowance. The loan loss provision is determined by conducting a monthly evaluation of the adequacy of the Company's allowance for loan losses, and charging the shortfall, if any, to the current month's expense. A credit provision for loan losses is recorded if the allowance would otherwise be more than warranted because of a significant decrease in impaired loans or total loans or material net recoveries during a quarter. This has the effect of creating variability in the amount and frequency of charges to the Company's earnings. The loan loss provision and level of allowance for each period is dependent upon many factors, including loan growth, net charge-offs, changes in the composition of the loan portfolio, delinquencies, management's assessment of the quality of the loan portfolio, the valuation of problem loans and the general economic conditions in the Company's market area.

15

In the first quarter of 2007, the Company had a credit provision for loan losses of \$236,000, compared to a credit provision for loan losses of \$489,000 in the first quarter of 2006. The allowance for loan losses represented 1.29%, and 1.40% of total loans at March 31, 2007 and 2006, respectively. See additional discussion under the caption "Allowance for Loan Losses."

Noninterest Income

The following table sets forth the various components of the Company's noninterest income for the periods indicated:

	For the Three Months		Increase (decrease)	
	Ended		2007 versus 2006	
	March 31,		Amount	Percent
	2007	2006		
(Dollars in thousands)				
Gain on sale of loans	\$ 1,011	\$ 1,497	\$ (486)	-32%
Servicing income	517	468	49	10%
Increase in cash surrender value of life insurance	345	347	(2)	-1%
Service charges and fees on deposit accounts	274	327	(53)	-16%
Other	368	255	113	44%
Total noninterest income	\$ 2,515	\$ 2,894	\$ (379)	-13%

For the three months ended March 31, 2007, noninterest income was \$2.5 million compared to \$2.9 million for the first quarter of 2006, due to a \$671,000 pre-tax gain on sale of the Capital Group loan portfolio in the first quarter of 2006.

Noninterest income is primarily comprised of the gain on sale of SBA and other guaranteed loans, SBA loan-servicing income, and increase in cash surrender value of the Company owned life insurance. The Company has an ongoing program of originating SBA loans and selling the government guaranteed portion in the secondary market, while retaining the servicing of the whole loans.

Gains or losses on SBA loans held for sale are recognized upon completion of the sale, and are based on the difference between the net sales proceeds and the relative fair value of the guaranteed portion of the loan sold compared to the relative fair value of the unguaranteed portion. The servicing assets that result from the sale of SBA loans, with servicing rights retained, are amortized over the lives of the loans using a method approximating the interest method.

Gain on sales of SBA loans contributed \$1.0 million during the first quarter of 2007, compared to \$0.8 million for the three months ended March 31, 2006. The Company sold its Capital Group loan portfolio, which consisted primarily of "factoring" type loans, during the first quarter of 2006, resulting in a gain on sale of \$0.7 million. In first quarter 2007, the increase in cash surrender value of the Company owned life insurance was approximately the same as 2006. The decrease in deposit service charges and fees on deposit accounts was primarily because higher interest rates applied to collected balances created a waiver of (or credit against) service charges for many business customers.

Noninterest Expense

The following table sets forth the various components of the Company's noninterest expense for the periods indicated:

	For the Three Months		Increase (decrease)	
	Ended		2007 versus 2006	
	March 31,		Amount	Percent
	2007	2006		
	(Dollars in thousands)			
Salaries and employee benefits	\$ 4,888	\$ 5,109	\$ (221)	-4%
Occupancy	765	777	(12)	-2%
Professional fees	337	513	(176)	-34%
Low income housing investment losses and writedowns	237	264	(27)	-10%
Client services	230	300	(70)	-23%
Advertising and promotion	212	210	2	1%
Data processing	203	181	22	12%
Furniture and equipment	110	109	1	1%

Other	1,257	1,210	47	4%
Total noninterest expense	\$ 8,300	\$ 8,761	\$ (461)	-5%

The following table indicates the percentage of noninterest expense in each category:

	For The Three Months Ended March 31,			
	2007	Percent of Total	2006	Percent of Total
	(Dollars in thousands)			
Salaries and employee benefits	\$ 4,888	59%	\$ 5,109	58%
Occupancy	765	9%	777	9%
Professional fees	337	4%	513	6%
Low income housing investment losses and writedowns	237	3%	264	3%
Client services	230	3%	300	3%
Advertising and promotion	212	3%	210	3%
Data processing	203	2%	181	2%
Furniture and equipment	110	1%	109	1%
Retirement plan expense	61	1%	88	1%
Other	1,257	15%	1,210	14%
Total noninterest expense	\$ 8,300	100%	\$ 8,761	100%

For the three months ended March 31, 2007, noninterest expense decreased \$461,000, or 5%, from the same period in 2006. The efficiency ratio was 58.26% for the three months ended March 31, 2007, compared to 58.08% for the three months ended March 31, 2006.

Salaries and employee benefits, the single largest component of noninterest expenses decreased \$221,000 for the three months ended March 31, 2007 from the same period in 2006. The decrease was primarily attributable to a reduction in bonus and employee stock option plan expense. Salaries and employee benefits as a percentage of total noninterest expense increased to 59% for the three months ended March 31, 2007 from 58% for the three months ended March 31, 2006.

Occupancy decreased \$12,000 for the three months ended March 31, 2007 from same period in 2006. The decrease was primarily a result of lower premises repairs expense and premises insurance expense for the three months ended March 31, 2007. Occupancy cost as a percentage of total noninterest expense remained fairly constant at 9% for the three months ended March 31, 2007 and 2006.

17

Professional fees decreased \$176,000 for the three months ended March 31, 2007 from the same period in 2006. The decrease was primarily attributable to decreases in audit expenses. Professional fees as a percentage of total noninterest expense decreased to 4% for the three months ended March 31, 2007 from 6% for the three months ended March 31, 2006.

Low income housing investment losses and writedowns decreased \$27,000 for the three months ended March 31, 2007 from the same period in 2006. The decrease was primarily attributable to the lower amortization expense from two funds. Low income housing investment losses and writedowns as a percentage of total expense remained constant at 3% for the three months ended March 31, 2007 and 2006.

Client services decreased \$70,000 for the three months ended March 31, 2007 from the same period in 2006. The decrease was primarily attributable to the decrease in service fees charged to the Company from third party vendors who have certain deposit accounts. Client services as a percentage of total noninterest expense remained constant at 3% for the three months ended March 31, 2007 and 2006.

Advertising and promotion costs increased \$2,000 for the three months ended March 31, 2007 from the same period in 2006. The increase was primarily attributable to certain new sponsorships and promotions in 2007. Advertising and promotion as a percentage of total expense remained constant at 3% for the three months ended March 31, 2007 and 2006.

Data processing expense increased \$22,000 for the three months ended March 31, 2007 from the same period in 2006. The increase was primarily attributable to a higher volume of data processing. Data processing expense as a percentage of total noninterest expense remained fairly constant at 2% for the three months ended March 31, 2007 and 2006.

Furniture and equipment expense increased \$1,000 for the three months ended March 31, 2007 from the same period in 2006. The increase was primarily attributable to increase in small equipment purchases. Furniture and equipment expense as a percentage of total noninterest expense remained fairly constant at 1% for the three months ended March 31, 2007 and 2006.

Retirement plan expense decreased \$27,000 for the three months ended March 31, 2007 from the same period in 2006. The Company increased the term life insurance coverage for directors in the first quarter of 2006 resulting higher expense. No adjustment was made in 2007. Retirement plan expense as a percentage of total noninterest expense remained fairly constant at 1% for the three months ended March 31, 2007 and 2006.

Other noninterest expenses increased \$47,000 for the three months ended March 31, 2007 from the same period in 2006. The increase was primarily attributable to increases in telephone expense and stationery and supplies for business operations. Other noninterest expense as a percentage of total noninterest expense increased to 15% for the three months ended March 31, 2007 from 14% for the three months ended March 31, 2006.

Income Tax Expense

Income tax expense for the three months ended March 31, 2007 was \$2.1 million, compared to \$2.4 million for the same period in 2006. The following table shows the effective income tax rate for each period indicated.

	For the Three Months Ended March 31,	
	2007	2006
Effective income tax rate	34.76%	35.77%

The difference in the effective tax rate compared to the combined federal and state statutory tax rate of 42% is primarily the result of the Company's investment in life insurance policies whose earnings are not subject to taxes, tax credits related to investments in low income housing and investments in tax-free municipal securities. The effective tax rate in the first quarter of 2007 is lower compared to the first quarter of 2006 because pre-tax income decreased while benefits from tax advantaged investments did not.

FINANCIAL CONDITION

As of March 31, 2007, total assets were \$1.07 billion, compared to \$1.12 billion as of March 31, 2006. Total securities available-for-sale (at fair value) were \$165 million, a decrease of 11% from \$186 million for 2006. The total loan portfolio (excluding loans held for sale) was \$701 million, an increase of 1% from \$696 million for 2006. Total deposits were \$884 million, a decrease of 5% from \$935 million for 2006. Securities sold under agreement to repurchase decreased \$11 million, or 42%, to \$15 million at March 31, 2007, from \$26 million at March 31, 2006.

Securities Portfolio

The following table reflects the amortized cost and fair market values for each category of securities at the dates indicated:

Investment Portfolio

	March 31, 2007		March 31, 2006		December 31, 2006	
	(Dollars in thousands)					
Securities available-for-sale (at fair value)						
U.S. Treasury	\$	5,985	\$	5,905	\$	5,963
U.S. Government Agencies		53,081		73,794		59,396
Mortgage-Backed		89,479		90,837		90,186
Municipals - Tax Exempt		7,844		8,117		8,142
Collateralized Mortgage Obligations		8,411		7,515		8,611
Total	\$	164,800	\$	186,168	\$	172,298

The following table summarizes the amounts and distribution of the Company's securities available-for-sale and the weighted average yields at March 31, 2007:

	March 31, 2007									
	Within One		After One and		After Five and		After Ten Years		Total	
	Year		Within Five		Within					
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
(Dollars in thousands)										
Securities available-for-sale (at fair value)										
U.S. Treasury	\$ 5,985	3.50%	\$ -	-	\$ -	-	\$ -	-	\$ 5,985	3.50%
U.S. Government Agencies	28,878	5.13%	24,203	4.68%	-	-	-	-	53,081	4.92%

Municipals - non-taxable	3,780	2.80%	4,064	3.14%	-	-	-	-	7,844	2.98%
Collateralized Mortgage Obligations	-	-	-	-	5,273	5.60%	3,138	3.08%	8,411	4.66%
Total	\$ 38,643	4.65%	\$ 30,227	4.40%	\$ 12,192	4.94%	\$ 83,738	4.47%	\$ 164,800	4.53%

The investment securities portfolio is the second largest component of the Company's interest earning assets, and the structure and composition of this portfolio is important to any analysis of the financial condition of the Company. The investment portfolio serves the following purposes: (i) it can be readily reduced in size to provide liquidity for loan balance increases or deposit balance decreases; (ii) it provides a source of pledged assets for securing certain deposits and borrowed funds, as may be required by law or by specific agreement with a depositor or lender; (iii) it can be used as an interest rate risk management tool, since it provides a large base of assets, the maturity and interest rate characteristics of which can be changed more readily than the loan portfolio to better match changes in the deposit base and other funding sources of the Company; (iv) it is an alternative interest-earning use of funds when loan demand is weak or when deposits grow more rapidly than loans; and (v) it can enhance the Company's tax position by providing partially tax exempt income.

The Company classifies all of its securities as "Available-for-Sale". Accounting rules also allow for trading or "Held-to-Maturity" classifications, but the Company has no securities that would be classified as such. Even though management currently has the intent and the ability to hold the Company's securities for the foreseeable future, they are all currently classified as available-for-sale to allow flexibility with regard to the active management of the Company's investment portfolio. FASB Statement 115 requires available-for-sale securities to be marked to market with an offset to accumulated other comprehensive income, a component of shareholders' equity. Monthly adjustments are made to reflect changes in the market value of the Company's available-for-sale securities.

The Company's investment portfolio is currently composed primarily of: (i) U.S. Treasury and Government Agency issues for liquidity and pledging; (ii) mortgage-backed securities, which in many instances can also be used for pledging, and which generally enhance the yield of the portfolio; (iii) municipal obligations, which provide tax free income and limited pledging potential; and (iv) collateralized mortgage obligations, which generally enhance the yield of the portfolio. The amortized cost of securities pledged as collateral for repurchase agreements, public deposits and for other purposes as required or permitted by law was \$52 million and \$62 million at March 31, 2007 and 2006, respectively.

Except for obligations of U.S. government agencies, no securities of a single issuer exceeded 10% of shareholders' equity at March 31, 2007. The Company has not used interest rate swaps or other derivative instruments to hedge fixed rate loans or to otherwise mitigate interest rate risk.

In the first quarter of 2007, the investment portfolio declined by \$21 million, or 11%, and decreased to 15% of total assets at March 31, 2007 from 17% at March 31, 2006. The overall change is not significant. U.S. Treasury and U.S. Agency securities decreased to 36% of the portfolio at March 31, 2007 from 43% at March 31, 2006. The decrease was primarily due to maturities of U.S. Government Agency securities. Municipal securities, mortgage-backed securities and collateralized mortgage obligations remained fairly constant in the portfolio in the first quarter of 2007 compared to the first quarter of 2006. The Company invests in securities with the available cash based on market conditions and the Company's cash flow.

Loans

The Company's loans represent the largest portion of invested assets, substantially greater than the securities portfolio or any other asset category, and the quality and diversification of the loan portfolio is an important consideration when reviewing the Company's financial condition.

Gross loans (including loans held for sale) represented 67% of total assets at March 31, 2007, as compared to 65% at March 31, 2006. The ratio of net loans to deposits increased to 78% at March 31, 2007 from 73% at March 31, 2006. Demand for loans remains relatively strong in many areas within the Company's markets and competition continues to intensify. To help ensure that we remain competitive, we make every effort to be flexible and creative in our approach to structure loans.

The Loan Distribution table that follows sets forth the Company's gross loans outstanding and the percentage distribution in each category at the dates indicated.

	March 31,		March 31,		December 31, 2006	
	2007	% to Total	2006	% to Total	2006	% to Total
	(Dollars in thousands)					
Commercial	\$ 294,010	42%	\$ 262,625	38%	\$ 300,611	42%
Real estate - mortgage	239,082	34%	232,790	34%	239,041	33%
Real estate - land and construction	128,663	19%	156,468	22%	143,834	20%
Home equity	36,067	5%	41,429	6%	38,976	5%
Consumer	2,620	0%	1,495	0%	2,422	0%
Total loans	700,442	100%	694,807	100%	724,884	100%
Deferred loan costs	624		1,058		870	
Allowance for loan losses	(9,014)		(9,748)		(9,279)	
Loans, net	\$ 692,052		\$ 686,117		\$ 716,475	

Total loans (exclusive of loans held of sale) were \$701 million at March 31, 2007, compared to \$696 million at March 31, 2006. The Company's allowance for loan losses was \$9.0 million, or 1.29% of total loans, at March 31, 2007, as

compared to \$9.7 million, or 1.40% of total loan, at March 31, 2006. As of March 31, 2007 and 2006, the Company had \$3.3 million and \$2.5 million, respectively, in nonperforming assets.

The Company's loan portfolio is concentrated in commercial loans, primarily manufacturing, wholesale, and services, and real estate, with the balance in land development and construction and home equity and consumer loans. The change in the Company's loan portfolio in the first quarter of 2007 from 2006 is primarily due to the increase in the commercial loan portfolio and commercial real estate mortgage loan portfolio, partially offset by a decrease in the real estate land and construction loan portfolio due to payoffs in the first quarter of 2007 and more competitive in this type of loans. The Company does not have any concentrations by industry or group of industries in its loan portfolio, however, 58% and 63% of its net loans were secured by real property as of March 31, 2007 and 2006. While no specific industry concentration is considered significant, the Company's lending operations are located in areas that are dependent on the technology and real estate industries and their supporting companies.

The Company's commercial loans are made for working capital, financing the purchase of equipment or for other business purposes. Such loans include loans with maturities ranging from thirty days to one year and "term loans," with maturities normally ranging from one to five years. Short-term business loans are generally intended to finance current transactions and typically provide for periodic principal payments, with interest payable monthly. Term loans normally provide for floating interest rates, with monthly payments of both principal and interest.

The Company is an active participant in the Small Business Administration (“SBA”) and U.S. Department of Agriculture guaranteed lending programs, and has been approved by the SBA as a lender under the Preferred Lender Program. The Company regularly makes SBA-guaranteed loans; however, the guaranteed portion of these loans may be sold in the secondary market depending on market conditions. Once it is determined that they will be sold, these loans are classified as held for sale and carried at the lower of cost or market. In the event of the sale of the guaranteed portion of an SBA loan, the Company retains the servicing rights for the sold portion.

As of March 31, 2007, real estate mortgage loans of \$239 million consist of adjustable and fixed rate loans secured by commercial property, and loans secured by first mortgages on 1-4 family residential properties of \$0.9 million. Home equity lines of credit are secured by junior deeds of trust on 1-4 family residential properties totaling \$36 million. Properties securing the real estate mortgage loans are primarily located in the Company’s market area. While no specific industry concentration is considered significant, the Company’s lending operations are located in market areas that are dependent on the technology and real estate industries and their supporting companies. Real estate values in portions of Santa Clara County and neighboring San Mateo County are among the highest in the country at present. The Company’s borrowers could be adversely impacted by a downturn in these sectors of the economy, which could reduce the demand for loans and adversely impact the borrowers’ ability to repay their loans.

The Company’s real estate term loans consist primarily of loans made based on the borrower’s cash flow and are secured by deeds of trust on commercial and residential property to provide a secondary source of repayment. The Company restricts real estate term loans to no more than 80% of the property’s appraised value or the purchase price of the property, depending on the type of property and its utilization. The Company offers both fixed and floating rate loans. Maturities on such loans are generally between five and ten years (with amortization ranging from fifteen to twenty-five years and a balloon payment due at maturity); however, SBA and certain other real estate loans that are easily sold in the secondary market may be granted for longer maturities.

The Company’s real estate land and construction loans are primarily short term interim loans to finance the construction of commercial and single family residential properties. The Company utilizes underwriting guidelines to assess the likelihood of repayment from sources such as sale of the property or permanent mortgage financing prior to making the construction loan.

The Company makes consumer loans for the purpose of financing automobiles, various types of consumer goods, and other personal purposes. Additionally, the Company makes home equity lines of credit available to its clientele. Consumer loans generally provide for the monthly payment of principal and interest. Most of the Company’s consumer loans are secured by the personal property being purchased or, in the instances of home equity loans or lines, real property.

With certain exceptions, state chartered banks are permitted to make extensions of credit to any one borrowing entity up to 15% of the bank’s capital and reserves for unsecured loans and up to 25% of the bank’s capital and reserves for secured loans. For HBC, these lending limits were \$24 million and \$39 million at March 31, 2007.

Loan Maturities

The following table presents the maturity distribution of the Company’s loans as of March 31, 2007. The table shows the distribution of such loans between those loans with predetermined (fixed) interest rates and those with variable (floating) interest rates. Floating rates generally fluctuate with changes in the prime rate as reflected in the western edition of The Wall Street Journal. As of March 31, 2007, approximately 77% of the Company’s loan portfolio consisted of floating interest rate loans.

Loan Maturities

Over One

	Due in One Year or Less	Year But Less than Five Years	Over Five Years	Total
	(Dollars in thousands)			
Commercial	\$ 275,982	\$ 12,971	\$ 5,057	\$ 294,010
Real estate - mortgage	103,816	74,364	60,902	239,082
Real estate - land and construction	128,591	72	-	128,663
Home equity	36,067	-	-	36,067
Consumer	2,019	601	-	2,620
Total loans	\$ 546,475	\$ 88,008	\$ 65,959	\$ 700,442
Loans with variable interest rates	\$ 515,428	\$ 20,740	\$ 64	\$ 536,232
Loans with fixed interest rates	31,047	67,268	65,895	164,210
Total loans	\$ 546,475	\$ 88,008	\$ 65,959	\$ 700,442

Loan Servicing

As of March 31, 2007 and 2006, \$194 million and \$181 million, respectively, in SBA and U.S. Department of Agriculture loans were serviced by the Company to others.

Activity for loan servicing rights was as follows:

	For the Three Months Ended	
	March 31,	
	2007	2006
	(Dollars in thousands)	
Beginning of period balance at January 1,	\$ 2,154	\$ 2,171
Additions	316	289
Amortization	(280)	(299)
End of period balance at March 31,	\$ 2,190	\$ 2,161

Loan servicing income is included in Accrued Interest and Other Assets on the balance sheet and reported net of amortization. There was no valuation allowance as of March 31, 2007 and 2006, as the fair market value of the assets was greater than the carrying value.

Activity for I/O strip receivables was as follows:

	For the Three Months Ended	
	March 31,	
	2007	2006
	(Dollars in thousands)	
Beginning of period balance at January 1,	\$ 4,537	\$ 4,679
Additions	21	312
Amortization	(464)	(321)
Unrealized holding gain (loss)	(163)	(119)
End of period balance at March 31,	\$ 3,931	\$ 4,551

Nonperforming Assets

Financial institutions generally have a certain level of exposure to asset quality risk, and could potentially receive less than a full return of principal and interest if a debtor becomes unable or unwilling to repay. Since loans are the most significant assets of the Company and generate the largest portion of its revenues, the Company's management of asset quality risk is focused primarily on loan quality. Banks have generally suffered their most severe earnings declines as a result of customers' inability to generate sufficient cash flow to service their debts, or as a result of the downturns in national and regional economies which have brought about declines in overall property values. In addition, certain debt securities that the Company may purchase have the potential of declining in value if the obligor's financial capacity to repay deteriorates.

To help minimize credit quality concerns, we have established a sound approach to credit that includes well-defined goals and objectives and well-documented credit policies and procedures. The policies and procedures identify market

segments, set goals for portfolio growth or contraction, and establish limits on industry and geographic credit concentrations. In addition, these policies establish the Company's underwriting standards and the methods of monitoring ongoing credit quality. The Company's internal credit risk controls are centered in underwriting practices, credit granting procedures, training, risk management techniques, and familiarity with loan and lease customers as well as the relative diversity and geographic concentration of our loan portfolio.

The Company's credit risk may also be affected by external factors such as the level of interest rates, employment, general economic conditions, real estate values, and trends in particular industries or geographic markets. As a multi-community independent bank serving a specific geographic area, the Company must contend with the unpredictable changes of both the general California and, particularly, primary local markets. The Company's asset quality has suffered in the past from the impact of national and regional economic recessions, consumer bankruptcies, and depressed real estate values.

Nonperforming assets are comprised of the following: Loans for which the Company is no longer accruing interest; loans 90 days or more past due and still accruing interest (although they are generally placed on non-accrual when they become 90 days past due unless they are both well secured and in the process of collection); loans restructured where the terms of repayment have been renegotiated, resulting in a deferral of interest or principal; and other real estate owned (“OREO”). Management’s classification of a loan as “nonaccrual” is an indication that there is reasonable doubt as to the full recovery of principal or interest on the loan. At that point, the Company stops accruing interest income, reverses any uncollected interest that had been accrued as income, and begins recognizing interest income only as cash interest payments are received as long as the collection of all outstanding principal is not in doubt. The loans may or may not be collateralized, and collection efforts are continuously pursued. Loans may be restructured by management when a borrower has experienced some change in financial status causing an inability to meet the original repayment terms and where the Company believes the borrower will eventually overcome those circumstances and make full restitution. OREO consists of properties acquired by foreclosure or similar means that management is offering or will offer for sale.

The following table provides information with respect to components of the Company’s non-performing assets at the dates indicated:

Nonperforming Assets

	2007	March 31, 2006	December 31, 2006
	(Dollars in thousands)		
Nonaccrual loans	\$ 3,315	\$ 2,292	\$ 3,866
Loans 90 days past due and still accruing	-	238	451
Total nonperforming loans *	3,315	2,530	4,317
Other real estate owned	-	-	-
Total nonperforming assets	\$ 3,315	\$ 2,530	\$ 4,317
Nonperforming assets as a percentage of loans plus other real estate owned	0.47%	0.36%	0.60%

The balance of nonperforming assets at March 31, 2007 represents an increase of \$0.8 million, or 31%, from March 31, 2006 levels. Nonperforming assets decreased by \$1.0 million, or 23%, compared to December 31, 2006.

While the current level of nonperforming assets is relatively low, we recognize that an increase in the dollar amount of nonaccrual loans is possible in the normal course of business as we expand our lending activities. We also expect occasional foreclosures as a last resort in the resolution of some problem loans.

Allowance for Loan Losses

The allowance for loan losses is an estimate of the losses in our loan portfolio. The allowance is based on two basic principles of accounting: (1) Statement of Financial Accounting Standards (“Statement”) No. 5 “Accounting for Contingencies,” which requires that losses be accrued when they are probable of occurring and estimable and (2) Statement No. 114, “Accounting by Creditors for Impairment of a Loan,” which requires that losses be accrued based on the differences between the impaired loan balance and value of collateral, if the loan is collateral dependent, or present value of future cash flows or values that are observable in the secondary market.

Management conducts a critical evaluation of the loan portfolio monthly. This evaluation includes periodic loan by loan review for certain loans to evaluate impairment, as well as detailed reviews of other loans (either individually or

in pools) based on an assessment of the following factors: past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, collateral values, loan volumes and concentrations, size and complexity of the loans, recent loss experience in particular segments of the portfolio, bank regulatory examination and independent loan review results, and current economic conditions in the Company's marketplace, in particular the state of the technology industry and the real estate market. This process attempts to assess the risk of loss inherent in the portfolio by segregating loans into two categories for purposes of determining an appropriate level of the allowance: Loans graded "Pass through Special Mention" and those graded "Substandard."

Loans are charged against the allowance when management believes that the uncollectibility of the loan balance is confirmed. The Company's methodology for assessing the appropriateness of the allowance consists of several key elements, which include the formula allowance and specific allowances.

Specific allowances are established for impaired loans. Management considers a loan to be impaired when it is probable that the Company will be unable to collect all amounts due according to the original contractual terms of the note agreement. When a loan is considered to be impaired, the amount of impairment is measured based on the fair value of the collateral if the loan is collateral dependent or on the present value of expected future cash flows.

The formula portion of the allowance is calculated by applying loss factors to pools of outstanding loans. Loss factors are based on the Company's historical loss experience, adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the evaluation date. The adjustment factors for the formula allowance may include existing general economic and business conditions affecting the key lending areas of the Company, in particular the real estate market, credit quality trends, collateral values, loan volumes and concentrations, the technology industry and specific industry conditions within portfolio segments, recent loss experience in particular segments of the portfolio, duration of the current business cycle, and bank regulatory examination results. The evaluation of the inherent loss with respect to these conditions is subject to a higher degree of uncertainty.

Loans that demonstrate a weakness, for which there is a possibility of loss if the weakness is not corrected, are categorized as "classified." Classified loans include all loans considered as substandard, doubtful, and loss and may result from problems specific to a borrower's business or from economic downturns that affect the borrower's ability to repay or that cause a decline in the value of the underlying collateral (particularly real estate). The principal balance of classified loans, which consist of all loans internally graded as substandard, was \$25 million and \$14 million, respectively, at March 31, 2007 and 2006.

In adjusting the historical loss factors applied to the respective segments of the loan portfolio, management considered the following factors:

- Levels and trends in delinquencies, non-accruals, charge offs and recoveries
 - Trends in volume and loan terms
 - Lending policy or procedural changes
- Experience, ability, and depth of lending management and staff
 - National and local economic trends and conditions
 - Concentrations of credit

There can be no assurance that the adverse impact of any of these conditions on HBC will not be in excess of the current level of estimated losses.

It is the policy of management to maintain the allowance for loan losses at a level adequate for risks inherent in the loan portfolio. On an ongoing basis, we have engaged outside firms to independently assess our methodology and perform independent credit reviews of our loan portfolio. The Company's credit review consultants, the FRB and the DFI also review the allowance for loan losses as an integral part of the examination process. Based on information currently available, management believes that the loan loss allowance is adequate. However, the loan portfolio can be adversely affected if California economic conditions and the real estate market in the Company's market area were to weaken. Also, any weakness of a prolonged nature in the technology industry would have a negative impact on the local market. The effect of such events, although uncertain at this time, could result in an increase in the level of nonperforming loans and increased loan losses, which could adversely affect the Company's future growth and profitability. No assurance of the ultimate level of credit losses can be given with any certainty.

The following table summarizes the Company's loan loss experience, as well as provisions and charges to the allowance for loan losses and certain pertinent ratios for the periods indicated:

Allowance for Loan Losses

For the Three Months Ended

		March 31,			For the Year Ended December 31, 2006
		2007		2006	
		(Dollars in thousands)			
Balance, beginning of period / year	\$	9,279	\$	10,224	\$ 10,224
Net charge-offs		(29)		13	(442)
Provision for loan losses		(236)		(489)	(503)
Balance, end of period/ year	\$	9,014	\$	9,748	\$ 9,279

RATIOS:

Net charge-offs to average loans outstanding					
*		0.02%		-0.01%	0.06%
Allowance for loan losses to average loans *		1.29%		1.41%	1.32%
Allowance for loan losses to total loans *		1.29%		1.40%	1.28%
Allowance for loan losses to nonperforming					
loans		272%		385%	215%

* Average loans and total loans exclude loans held for sale

24

A reverse provision for loan losses of \$236,000 was recorded in the first quarter of 2007, compared to a reverse provision of \$489,000 a year ago. The reverse provision in the first quarter of 2007 was primarily due to a \$1.0 million decrease in nonperforming loans and a \$24.7 million decrease in total loans from the fourth quarter of 2006.

Net loans charged-off reflect the realization of losses in the portfolio that were recognized previously through provisions for loan losses. Net charge-offs were \$29,000 in the first quarter of 2007, as compared to net recoveries of \$13,000 in the first quarter of 2006. Historical net loan charge-offs are not necessarily indicative of the amount of net charge-offs that the Company will realize in the future.

Deposits

The composition and cost of the Company's deposit base are important components in analyzing the Company's net interest margin and balance sheet liquidity characteristics, both of which are discussed in greater detail in other sections herein. Our net interest margin is improved to the extent that growth in deposits can be concentrated in historically lower-cost deposits such as non-interest-bearing demand, NOW accounts, savings accounts and money market deposit accounts. The Company's liquidity is impacted by the volatility of deposits or other funding instruments, or, in other words, by the propensity of that money to leave the institution for rate-related or other reasons. Potentially, the most volatile deposits in a financial institution are jumbo certificates of deposit, meaning time deposits with balances that equal or exceed \$100,000, as customers with balances of that magnitude are typically more rate-sensitive than customers with smaller balances.

The following table summarizes the distribution of deposits:

Deposits

	March 31, 2007		March 31, 2006		December 31, 2006	
	Balance	% to Total	Balance	% to Total	Balance	% to Total
			(Dollars in thousands)			
Demand, noninterest bearing	\$ 221,206	25%	\$ 243,816	26%	\$ 231,841	27%
Demand, interest bearing	141,395	16%	154,277	16%	133,413	16%
Savings and money market	351,005	40%	352,304	38%	307,266	36%
Time deposits, under \$100	30,730	3%	33,003	4%	31,097	4%
Time deposits, \$100 and over	96,813	11%	115,293	12%	111,017	13%
Brokered deposits, \$100 and over	42,748	5%	36,040	4%	31,959	4%
Total deposits	\$ 883,897	100%	\$ 934,733	100%	\$ 846,593	100%

Total deposits at March 31, 2007 decreased \$51 million, or 5%, compared to March 31, 2006. At March 31, 2007, noninterest bearing demand deposits decreased \$23 million, or 9%, from March 31, 2006 primarily due to decreases in business checking accounts. Interest bearing demand deposits decreased \$13 million, or 8%, primarily because the Company reduced certain high yield accounts; savings and money market deposits decreased \$1 million, or less than 1%; time deposits decreased \$20.8 million, or 14%; and brokered deposits increased \$7 million, or 19%.

At March 31, 2007 and 2006, less than 1%, of deposits were from public sources and approximately 14% of deposits were from real estate exchange company, title company and escrow accounts.

The Company obtains deposits from a cross-section of the communities it serves. The Company's business is not seasonal in nature. The Company had brokered deposits totaling approximately \$43 million, and \$36 million at March 31, 2007 and 2006, respectively. These brokered deposits generally mature within one to three years. Brokered deposits are generally less desirable because of higher interest rates. The Company is not dependent upon funds from sources outside the United States.

The following table indicates the maturity schedule of the Company's time deposits of \$100,000 and over as of March 31, 2007:

Deposit Maturity Distribution

	Balance	% of Total
	(Dollars in thousands)	
Three months or less	\$ 51,737	37%
Over three months through six months	32,518	23%
Over six months through twelve months	37,234	27%
Over twelve months	18,072	13%
Total	\$ 139,561	100%

The Company focuses primarily on providing and servicing business deposit accounts that are frequently over \$100,000 in average balance per account. The account activity for some account types and client types necessitates appropriate liquidity management practices by the Company to ensure its ability to fund deposit withdrawals.

Return on Equity and Assets

The following table indicates the ratios for return on average assets and average equity, dividend payout, and average equity to average assets for the first quarter of 2007 and 2006:

	Three Months Ended	
	March 31,	
	2007	2006
Return on average assets	1.57%	1.59%
Return on average equity	13.12%	15.53%
Dividend payout ratio	17.33%	13.51%
Average equity to average assets	11.99%	10.26%

Liquidity and Asset/Liability Management

Liquidity refers to the Company's ability to maintain cash flows sufficient to fund operations, and to meet obligations and other commitments in a timely and cost-effective fashion. At various times the Company requires funds to meet short-term cash requirements brought about by loan growth or deposit outflows, the purchase of assets, or liability repayments. To manage liquidity needs properly, cash inflows must be timed to coincide with anticipated outflows or sufficient liquidity resources must be available to meet varying demands. The Company manages liquidity in such a fashion as to be able to meet unexpected sudden changes in levels of its assets or deposit liabilities without maintaining excessive amounts of balance sheet liquidity. Excess balance sheet liquidity can negatively impact the interest margin.

An integral part of the Company's ability to manage its liquidity position appropriately is the Company's large base of core deposits, which are generated by offering traditional banking services in its service area and which have, historically, been a stable source of funds. In addition to core deposits, the Company has the ability to raise deposits through various deposit brokers if required for liquidity purposes. The Company's net loan to deposit ratio increased to 78% at March 31, 2007 from 73% at March 31, 2006, due to a decrease in deposits.

To meet liquidity needs, the Company maintains a portion of its funds in cash deposits at other banks, in Federal funds sold and in securities available for sale. The primary liquidity ratio is composed of net cash, non-pledged securities, and other marketable assets, divided by total deposits and short-term liabilities minus liabilities secured by investments or other marketable assets. As of March 31, 2007, the Company's primary liquidity ratio was 20.85%, comprised of \$68.8 million in securities available for sale of maturities of up to five years, less \$10.9 million of securities that were pledged to secure public and certain other deposits as required by law and contract, Federal funds sold of \$90.4 million, and \$33.7 million cash and due from banks, as a percentage of total unsecured deposits of \$873.0 million.

As of March 31, 2006, the Company's primary liquidity ratio was 23.13%, comprised of \$90.2 million in securities available for sale of maturities of up to five years, less \$10.8 million of securities that were pledged to secure public and certain other deposits as required by law and contract, Federal funds sold of \$94.2 million and \$40.1 million in cash and due from banks, as a percentage of total unsecured deposits of \$924.0 million.

The following table summarizes the Company's borrowings under its Federal funds purchased, security repurchase arrangements and lines of credit for the quarters indicated:

	March 31,	
	2007	2006
	(Dollars in thousands)	
Average balance		
year-to-date	\$ 21,651	\$ 32,553
Average interest rate		
year-to-date	2.56%	2.34%
Maximum month-end		
balance during the quarter	\$ 21,800	\$ 32,700
Average rate at March 31,	2.56%	2.34%

Capital Resources

At March 31, 2007, the Company had total shareholders' equity of \$126 million, which included \$62 million in common stock and \$66 million in retained earnings.

The Company paid cash dividends totaling \$0.7 million, or \$0.06 per share, in the first quarter of 2007. The Company anticipates paying future dividends within the range of typical peer payout ratios provided, however, that no assurance can be given that earnings and/or growth expectations in any given year will justify the payment of such a dividend.

On February 7, 2006, the Board of Directors authorized the repurchase of up to \$10 million of common stock through June 30, 2007. Shares may be repurchased in open market purchases or in privately negotiated transactions as permitted under applicable rules and regulations. The repurchase program may be modified, suspended or terminated by the Board of Directors at any time without notice. The extent to which the Company repurchases its shares and the timing of such repurchases will depend upon market conditions and other corporate considerations.

The Company uses a variety of measures to evaluate capital adequacy. Management reviews various capital measurements on a regular basis and takes appropriate action to ensure that such measurements are within established internal and external guidelines. The external guidelines, which are issued by the Federal Reserve Board and the FDIC, establish a risk-adjusted ratio relating capital to different categories of assets and off-balance sheet exposures. There are two categories of capital under the Federal Reserve Board and FDIC guidelines: Tier 1 and Tier 2 Capital. Our Tier 1 Capital currently includes common shareholders' equity and the proceeds from the issuance of trust preferred securities (trust preferred securities are counted only up to a maximum of 25% of Tier 1 capital), less intangible assets, the unrealized net gains/losses (after tax adjustments) on securities available for sale and I/O Strips, which are carried at fair market value. Our Tier 2 Capital includes the amount of allowances for loan losses and off balance sheet credit losses.

The following table summarizes risk-based capital, risk-weighted assets, and risk-based capital ratios of the Company:

	March 31,		December 31,	
	2007	2006	2006	
	(Dollars in thousands)			
Capital components:				
Tier 1 Capital	\$ 150,525	\$ 139,704	\$	147,600
Tier 2 Capital	9,492	9,921	9,756	
Total risk-based capital	\$ 160,017	\$ 149,625	\$	157,356
Risk-weighted assets	\$ 844,645	\$ 835,679	\$	855,715

Edgar Filing: HERITAGE COMMERCE CORP - Form 10-Q

Average assets for capital purposes \$ 1,043,076 \$ 1,118,272 \$ 1,087,502

				Minimum Regulatory Requirements
Capital ratios				
Total risk-based capital	18.9%	17.9%	18.4%	8.00%
Tier 1 risk-based capital	17.8%	16.7%	17.3%	4.00%
Leverage ⁽¹⁾	14.4%	12.5%	13.6%	4.00%

(1) Tier 1 capital divided by average assets (excluding goodwill).

27

The table above presents the capital ratios of the Company computed in accordance with applicable regulatory guidelines and compared to the standards for minimum capital adequacy requirements under the FDIC's prompt corrective action authority as of March 31, 2007.

At March 31, 2007 and 2006, and December 31, 2006, the Company's capital met all minimum regulatory requirements. As of March 31, 2007, management believes that HBC was considered "Well Capitalized" under the Prompt Corrective Action Provisions.

Market Risk

Market risk is the risk of loss to future earnings, to fair values, or to future cash flows that may result from changes in the price of a financial instrument. The value of a financial instrument may change as a result of changes in interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributed to all market risk sensitive financial instruments, including securities, loans, deposits and borrowings, as well as the Company's role as a financial intermediary in customer-related transactions. The objective of market risk management is to avoid excessive exposure of the Company's earnings and equity to loss and to reduce the volatility inherent in certain financial instruments.

Interest Rate Management

The Company's market risk exposure is primarily that of interest rate risk, and it has established policies and procedures to monitor and limit earnings and balance sheet exposure to changes in interest rates. The Company does not engage in the trading of financial instruments, nor does the Company have exposure to currency exchange rates.

The principal objective of interest rate risk management (often referred to as "asset/liability management") is to manage the financial components of the Company in a manner that will optimize the risk/reward equation for earnings and capital in relation to changing interest rates. The Company's exposure to market risk is reviewed on a regular basis by the Asset/Liability Committee ("ALCO"). Interest rate risk is the potential of economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a loss of current fair market values. The objective is to measure the effect on net interest income and to adjust the balance sheet to minimize the inherent risk while at the same time maximizing income. Management realizes certain risks are inherent, and that the goal is to identify and accept the risks. Management uses two methodologies to manage interest rate risk: (i) a standard GAP analysis; and (ii) an interest rate shock simulation model.

The planning of asset and liability maturities is an integral part of the management of an institution's net interest margin. To the extent maturities of assets and liabilities do not match in a changing interest rate environment, net interest margin may change over time. Even with perfectly matched repricing of assets and liabilities, risks remain in the form of prepayment of loans or securities or in the form of delays in the adjustment of rates of interest applying to either earning assets with floating rates or to interest bearing liabilities. The Company has generally been able to control its exposure to changing interest rates by maintaining primarily floating interest rate loans and a majority of its time certificates with relatively short maturities.

Interest rate changes do not affect all categories of assets and liabilities equally or at the same time. Varying interest rate environments can create unexpected changes in prepayment levels of assets and liabilities, which may have a significant effect on the net interest margin and are not reflected in the interest sensitivity analysis table. Because of these factors, an interest sensitivity gap report may not provide a complete assessment of the exposure to changes in interest rates.

The Company uses modeling software for asset/liability management to simulate the effects of potential interest rate changes on the Company's net interest margin, and to calculate the estimated fair values of the Company's financial instruments under different interest rate scenarios. The program imports current balances, interest rates, maturity dates

and repricing information for individual financial instruments, and incorporates assumptions on the characteristics of embedded options along with pricing and duration for new volumes to project the effects of a given interest rate change on the Company's interest income and interest expense. Rate scenarios consisting of key rate and yield curve projections are run against the Company's investment, loan, deposit and borrowed funds portfolios. These rate projections can be shocked (an immediate and parallel change in all base rates, up or down), ramped (an incremental increase or decrease in rates over a specified time period), based on current trends and econometric models or economic conditions stable (unchanged from current actual levels).

The Company applies a market value ("MV") methodology to gauge its interest rate risk exposure as derived from its simulation model. Generally, MV is the discounted present value of the difference between incoming cash flows on interest earning assets and other investments and outgoing cash flows on interest bearing liabilities and other liabilities. The application of the methodology attempts to quantify interest rate risk as the change in the MV which would result from a theoretical 200 basis point (1 basis point equals 0.01%) change in market interest rates. Both a 200 basis point increase and a 200 basis point decrease in market rates are considered.

At March 31, 2007, it was estimated that the Company's MV would increase 28.6% in the event of a 200 basis point increase in market interest rates. The Company's MV at the same date would decrease 13.0% in the event of a 200 basis point decrease in market interest rates.

Presented below, as of March 31, 2007 and 2006, is an analysis of the Company's interest rate risk as measured by changes in MV for instantaneous and sustained parallel shifts of 200 basis points in market interest rates:

	September 30, 2006				September 30, 2005			
	\$ Change in Market Value	% Change in Market Value	Market Value as a % of Present Value of Assets MV Ratio	% Change (bp) Dollars in thousands	\$ Change in Market Value	% Change in Market Value	Market Value as a % of Present Value of Assets MV Ratio	% Change (bp)
Change in rates								
+ 200 bp	\$ 55,254	28.6%	23.44%	522	\$ 41,775	18.8%	23.96%	379
0 bp	\$ -	0.0%	18.22%	0	\$ -	0.0%	20.17%	0
- 200 bp	\$ (25,106)	-13.0%	15.85%	(237)	\$ (66,765)	-30.1%	14.1%	(607)

Management believes that the MV methodology overcomes three shortcomings of the typical maturity gap methodology. First, it does not use arbitrary repricing intervals and accounts for all expected future cash flows. Second, because the MV method projects cash flows of each financial instrument under different interest rate environments, it can incorporate the effect of embedded options on an institution's interest rate risk exposure. Third, it allows interest rates on different instruments to change by varying amounts in response to a change in market interest rates, resulting in more accurate estimates of cash flows.

However, as with any method of gauging interest rate risk, there are certain shortcomings inherent to the MV methodology. The model assumes interest rate changes are instantaneous parallel shifts in the yield curve. In reality, rate changes are rarely instantaneous. The use of the simplifying assumption that short-term and long-term rates change by the same degree may also misstate historic rate patterns, which rarely show parallel yield curve shifts. Further, the model assumes that certain assets and liabilities of similar maturity or period to repricing will react in the same way to changes in rates. In reality, certain types of financial instruments may react in advance of changes in market rates, while the reaction of other types of financial instruments may lag behind the change in general market rates. Additionally, the MV methodology does not reflect the full impact of annual and lifetime restrictions on changes in rates for certain assets, such as adjustable rate loans. When interest rates change, actual loan prepayments and actual early withdrawals from certificates may deviate significantly from the assumptions used in the model. Finally, this methodology does not measure or reflect the impact that higher rates may have on adjustable-rate loan clients' ability to service their debt. All of these factors are considered in monitoring the Company's exposure to interest rate risk.

CRITICAL ACCOUNTING POLICIES

General

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The financial information contained within our consolidated financial statements is, to a significant extent, based on approximate measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained either when earning income, recognizing an expense, recovering an asset or relieving a liability. In certain instances, we use a discount factor and prepayment assumptions to determine the present value of assets and liabilities. A change in the

discount factor or prepayment speeds could increase or decrease the values of those assets and liabilities which would result in either a beneficial or adverse impact to our financial results. We use historical loss factors as one factor in determining the inherent loss that may be present in our loan portfolio. Actual losses could differ significantly from the historical factors that we use. The Company adopted Statement 123R on January 1, 2006, and elected the modified prospective method for expensing stock options, under which prior periods are not revised for comparative purposes. Other estimates that we use are related to the expected useful lives of our depreciable assets. In addition, GAAP itself may change from one previously acceptable method to another method, although the economics of our transactions would be the same.

Allowance for Loan Losses

The allowance for loan losses is an estimate of the losses in our loan portfolio. Our accounting for estimated loan losses is discussed under the heading "Allowance for Loan Losses" beginning on page 23.

Loan Sales and Servicing

The amounts of gains recorded on sales of loans and the initial recording of servicing assets and I/O strips are based on the estimated fair values of the respective components. In recording the initial value of the servicing assets and the fair value of the I/O strips receivable, the Company uses estimates which are made on management's expectations of future prepayment and discount rates.

Stock Based Compensation

We grant stock options to purchase our common stock to our employees and directors under the 2004 Plan. We also granted our chief executive officer restricted stock when he joined the Company. Additionally, we have outstanding options that were granted under an option plan from which we no longer make grants. The benefits provided under all of these plans are subject to the provisions of FASB Statement 123(Revised), "Share-Based Payments," which we adopted effective January 1, 2006. We elected to use the modified prospective application in adopting Statement 123R and therefore have not restated results for prior periods. The valuation provisions of Statement 123R apply to new awards and to awards that are outstanding on the adoption date and subsequently modified or cancelled. Our results of operations for first quarter of 2007 and 2006 were impacted by the recognition of non cash expense related to the fair value of our share-based compensation awards as discussed in Note 3 to the consolidated financial statements.

The determination of fair value of stock-based payment awards on the date of grant using the Black-Scholes model is affected by our stock price, as well as the input of other subjective assumptions. These assumptions include, but are not limited to, the expected term of stock options and our expected stock price volatility over the term of the awards. Our stock options have characteristics significantly different from those of traded options, and changes in the assumptions can materially affect the fair value estimates.

Statement 123R requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. If actual forfeitures vary from our estimates, we will recognize the difference in compensation expense in the period the actual forfeitures occur or when options vest.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a financial institution, the Company's primary component of market risk is interest rate volatility. Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on most of the Company's assets and liabilities, and the market value of all interest-earning assets, other than those which have a short term to maturity. Based upon the nature of the Company's operations, the Company is not subject to foreign exchange or commodity price risk. The Company has no market risk sensitive instruments held for trading purposes. As of March 31, 2007, the Company does not use interest rate derivatives to hedge its interest rate risk.

The information concerning quantitative and qualitative disclosure or market risk called for by Item 305 of Regulation S-K is included as part of Item above. See page 28.

ITEM 4 - CONTROLS AND PROCEDURES

Disclosure Control and Procedures

The Company has carried out an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of March 31, 2007. As defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), disclosure controls and procedures are controls and procedures designed to reasonably assure that information required to be disclosed in our reports filed or submitted under the Exchange Act are recorded, processed, summarized and reported on a timely basis. Disclosure controls are also designed to reasonably assure that such information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Based upon their evaluation, our Chief Executive Officer and Chief Financial Officer concluded the Company's disclosure controls were effective as of March 31, 2007, the period covered by this report on Form 10Q.

During the three months ended March 31, 2007, there were no changes in our internal controls over financial reporting that materially affected, or are reasonably likely to affect, our internal controls over financial reporting.

Part II — OTHER INFORMATION

ITEM 1 - LEGAL PROCEEDINGS

The Company is involved in certain legal actions arising from normal business activities. Management, based upon the advice of legal counsel, believes the ultimate resolution of all pending legal actions will not have a material effect on the financial statements of the Company.

ITEM 1A - RISK FACTORS

A description of the risk factors associated with our business is contained in Part I, Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the fiscal year ended December 31, 2006 filed with the Securities and Exchange Commission. These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the Securities and Exchange Commission. There are no material changes in the "Risk Factors" previously disclosed in the Annual Report on Form 10-K for the year ended December 31, 2006.

ITEM 2 - UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

In February 2006, the Company's Board of Directors authorized the purchase of up to \$10 million of its common stock, which represents approximately 455,000 shares, or 4%, of its outstanding shares at current market price. The Share repurchase authorization is valid through June 30, 2007.

The Company intends to finance the purchase using its available cash. Shares may be repurchased by the Company in open market purchases or in privately negotiated transactions as permitted under applicable rules and regulations. The repurchase program may be modified, suspended or terminated by the Board of Directors at any time without notice. The extent to which the Company repurchases its shares and the timing of such repurchases will depend upon market conditions and other corporate considerations.

As of March 31, 2007, repurchases of equity securities are presented in the table below.

Settlement Date	Total Number of Shares Purchased	Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Approximate Dollar of Shares That May Yet Be Purchased Under the Plan	
3/9/2007	5,000	\$ 25.21	5,000	\$	1,965,942
3/12/2007	5,000	\$ 25.32	5,000	\$	1,839,343
3/13/2007	5,000	\$ 25.90	5,000	\$	1,709,859
3/14/2007	5,000	\$ 25.73	5,000	\$	1,581,220
3/15/2007	5,000	\$ 25.98	5,000	\$	1,451,316
3/16/2007	5,000	\$ 25.45	5,000	\$	1,324,053
3/19/2007	5,000	\$ 24.86	5,000	\$	1,199,757
	35,000		35,000		

ITEM 3 - DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4 - SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There was no submission of matters to a vote of security holders during the three months ended March 31, 2007.

ITEM 5 - OTHER INFORMATION

None

ITEM 6 - EXHIBITS

<u>Exhibit</u>	<u>Description</u>
31.1	Certification of Registrant's Chief Executive Officer Pursuant To Section 302 of the Sarbanes-Oxley Act of 2003
