NEW JERSEY MINING COMPANY NOTES TO FINANCIAL STATEMENTS (Unaudited)

1. Basis of Presentation:

The unaudited financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America for interim financial information, as well as the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation of the interim financial statements have been included. Operating results for the six-month period ended June 30, 2005 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2005.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-KSB/A for the year ended December 31, 2004.

2. Description of Business

New Jersey Mining Company ("the Company") was incorporated as an Idaho corporation on July 18, 1996. The Company's primary business is exploring for and developing gold, silver and base-metal resources in Idaho.

Item 2. Management's Discussion and Analysis of Financial Condition and Plan of Operation

General

This report contains both historical and prospective statements concerning the Company and its operations. Prospective statements (known as "forward-looking statements") may or may not prove true with the passage of time because of future risks and uncertainties. The Company cannot predict what factors might cause actual results to differ materially from those indicated by prospective statements.

Plan of Operation

The Company is executing its plan to continue exploration for gold, silver and base metal deposits in the greater Coeur d'Alene Mining District of northern Idaho. The Company has three advanced-stage properties with reserves. One of the properties, the Silver Strand, owned by the Company has recently received a go-ahead decision from the U.S. Forest Service (USFS) and will be readied for production with production planned for June 2006. A favorable decision had been made in March of this year but an appeal by the Idaho Conservation League (ICL) has delayed commencement of operations. The ICL appeal was denied and the March decision was affirmed recently.

At the Golden Chest mine production commenced in May 2005 from the Katie Dora vein which was developed by a ramp in 2004. It is planned to mine about 3,000 tonnes grading 13 grams/tonne gold in 2005 from the Katie Dora reserves. The third advanced property, the Coleman vein in the New Jersey

Area of Interest has an open pit which can be operated to fill out the mill production capacity, if necessary. Sulfide concentrates were produced in the second quarter of 2005 and sold to Barrick Goldstrike Mines, Inc. in Nevada. Other gold-bearing products were produced and sold to a gold refiner. Total gold production in the second quarter of 2005 was 76 troy ounces, most of which was from the Golden Chest mine. The second quarter was the startup phase for the Golden Chest mining operation. Currently, the production rate is approximately 300 troy ounces per quarter.

An exploration drilling program, consisting of three 150-meter core holes, is planned for the fourth quarter of 2005 depending on the availability of funding. Drilling will be done at the Golden Chest mine to test the continuity of deep mineralization discovered in 2004 on the Idaho vein. Reconnaissance exploration will continue to be done in the Company's area of interests in the greater Coeur d'Alene Mining District.

The Company has sufficient funding to execute the planned production schedule for the next 12 months, as well as fund necessary management tasks such as auditing/accounting and SEC reporting. However, additional funding will be needed to execute the exploration plan and fund preparations for the development of the Silver Strand mine in 2005. The most likely source of additional funding is an equity offering.

The Company currently has seven employees and uses consultants or contractors for some project tasks. There are no plans to hire additional employees.

Item 3. Controls and Procedures

An evaluation was performed by the Company's president and principal financial officer of the effectiveness of the design and operation of the Company's disclosure controls and procedures. And on that evaluation, the Company's president and principal financial officer concluded that disclosure controls and procedures were effective as of June 30, 2005, in ensuring that all material information required to be filed in this quarterly report has been made known to them in a timely fashion.

There has been no change in the Company's internal controls over financial reporting during the quarter ended June 30, 2005, that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

None

Item 2. Recent Sales of Unregistered Securities; Use of Proceeds from Registered Securities.

Neither the constituent instruments defining the rights of the registrant's securities filers nor the rights evidenced by the registrant's outstanding common stock have been modified, limited or qualified.

The Company issued 66,250 shares of restricted common stock to President Fred W. Brackebusch for management services rendered in the second quarter of 2005. A price of \$0.40 per share was used to calculate the number of shares to be issued. In Management's opinion, the securities were issued pursuant to exemptions from registration under Section 4(2) of the Securities Act of 1933 as amended.

The Company issued 10,400 shares of restricted common stock to Mine Systems Design, Inc., a Company controlled by our President, Fred W. Brackebusch, for office rent and mining equipment in the second quarter of 2005. A price of \$0.40 per share was used to calculate the number of shares to be issued. In Management's opinion, the securities were issued pursuant to exemptions from registration under Section 4(2) of the Securities Act of 1933 as amended.

During the second quarter of 2005, the Company issued 25,080 shares at an average price of \$0.40 to various accredited and sophisticated individuals for services performed. In Management's opinion the securities were issued pursuant to exemptions from registration under Section 4(2) and Rule 506 of Regulation D of the Securities Act of 1933 as amended.

Item 3. Defaults Upon Senior Securities

The registrant has no outstanding senior securities.

Item 4. Submission of Matters to a Vote of Security Holders

None

Item 5. Other Information

On July 13, 2005, Director Charles F. Asher passed away. Chuck was an original member of the Board of Directors of New Jersey Mining Company and will be missed. There are no plans to fill this position on the Board of Directors. There are currently five persons on the Board of Directors.

Item 6. Exhibits
