Fellow Shareholders:

We are pleased to submit this 2005 Annual Report for Foxby Corp., and to welcome our new shareholders who find the Fund's flexible total return investment approach attractive. As a non-diversified, closed end fund seeking total return, the Fund uses a flexible strategy in the selection of securities, and is not limited by the issuer's location, size, or market capitalization. The Fund may invest in equity and fixed income securities of both new and seasoned U.S. and foreign issuers, including securities convertible into common stock and debt securities. The Fund also may employ aggressive and speculative investment techniques, such as selling securities short, employing futures and options, derivatives, and borrowing money for investment purposes, an approach known as "leveraging," and may invest defensively in high grade money market instruments.

At year end, the Fund's top ten holdings comprised approximately 46% of net assets. As a percent of net assets, investments in U.S. equities accounted for about 72% and foreign equities about 30%, reflecting leverage of about 2%. Precious metals mining, our largest industry sector investment, accounted for about 21% of net assets. As the Fund pursues its total return objective through this flexible approach, these holdings and allocations are, of course, subject to change at any time. By way of comparison, at December 31, 2004, the Fund's top ten holdings comprised approximately 33% of total assets and as a percent of net assets, investments in U.S. equities accounted for about 94% and foreign equities about 21%, reflecting leverage of about 14%. Precious metals mining, our largest industry sector investment at that time as well, accounted for about 14% of net assets.

Market Review and Outlook

During the year the Federal Open Market Committee (FOMC) continued to raise its key overnight Federal funds target rate, which at year end stood at 4.25%. The minutes of the last meeting of the FOMC revealed, however, that Committee members seemed to lack a consensus as to how many interest rate raises would be needed to control inflation and that additional raises "would probably not be large." Despite raising the rate to 4.25% by December 13, the Committee reiterated that "only some further measured policy firming is likely to be needed."

Surveying the economic scene, we note that the National Association of Realtors reported 2005 sales of existing homes set a record for a fifth consecutive year, although fourth quarter sales showed weakness. Recent inflationary pressure from employment rates, salary changes, and raw material prices has also been weak. Oil price increases, however, may spur inflation to the extent not offset by decreases in consumer goods spending.

The Fund's strategy in view of these conditions during the year was to seek companies with financial strength and growth prospects, or other special features, and employ leverage from time to time. To balance its long precious metals company positions, the Fund entered into a short sale on a precious metals company deemed less attractive in the second half. The Fund also employed S&P 500 futures in a market timing strategy at year end. For the year,

Edgar Filing: FOXBY CORP. - Form N-CSR

the Fund's total net asset value return was a negative 2.72% on a total market return on the American Stock Exchange of a negative 7.66%. Over the course of future market fluctuations, the Fund will seek opportunities to optimize its holdings to enhance performance for a higher total return.

As outgoing Federal Reserve Board Chairman Alan Greenspan, has so often said, the fear of inflation may be as important as inflation itself. Accordingly, if labor costs or raw material prices increase, we might expect the FOMC to continue to raise short term interest rates higher to combat inflation fears. But, the FOMC's use of this strategy may be somewhat limited since currently shorter term interest rates already are generally higher than longer term rates. Historically when short term rates are much higher than long term rates for an extended period, recessions have begun. Thus, should the consumer lose faith in the economy from, for example, a decline in housing markets, the FOMC might risk an increase in inflation to restore consumer confidence and the economy by lowering rates, notwithstanding the potential inflationary impact.

Litigation Settled

We are pleased to have announced on January 6, 2006 that the Fund and Richard J. Shaker entered into a settlement of litigation pending in Maryland. Under the terms of the settlement, the management fee paid to Foxby's investment adviser, CEF Advisers, Inc., was reduced to an annual rate of 0.50% of Foxby's average daily net assets. Mr. Shaker and his co-plaintiffs have agreed to refrain from engaging in future efforts to seek control of Foxby. The settlement was approved by the Board of Directors of the Fund. The parties have filed a Stipulation of Dismissal with the Court. Mr. Shaker and his clients have sold their stake in Foxby, 397,300 shares, to Investor Service Center, Inc., an affiliate of CEF Advisers, for a total of \$893,925. Affiliates of management now own approximately 24.4% of the Fund's shares.

We appreciate your support and thank you for investing with Foxby.

Sincerely,

/s/ Thomas B. Winmill

valued at cost adjusted for amortization of premiums and accretion of discounts. Securities denominated in foreign currencies are translated into U.S. dollars at prevailing exchange rates. Securities for which quotations are not readily available or reliable and other assets may be valued as determined in good faith under the direction of and pursuant to procedures established by the Fund's Board of Directors. Investment transactions are accounted for on the trade date (the date the order to buy or sell is executed). Dividend income and distributions to shareholders are recorded on the ex-dividend date and interest income is recorded on the accrual basis. Withholding taxes on foreign dividends have been provided for in accordance with the Fund's understanding of the applicable country's tax rules and rates. In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(3) No provision has been made for U.S. income taxes because the Fund's current intention is to continue to qualify as a regulated investment company under the Internal Revenue Code and to distribute to its shareholders substantially all of its taxable income and net realized gains. Foreign securities held by the Fund may be subject to foreign taxation. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests. At December 31, 2005, the Fund had net capital loss carryovers that may be used to offset future realized capital gains for federal income tax purposes of \$16,793,145, of which \$8,986,140, \$6,343,522, \$414,304, \$837,334, and \$211,845 expires in 2008, 2009, 2010, 2011, and 2013, respectively.

As of December 31, 2005, the components of distributable earnings on a tax basis were as follows:

Capital loss carryover	\$(16,793,145)
"Post-October* net capital losses	(280,364)
Unrealized appreciation	756,003

	\$(16,317,506)
	=====

Federal income tax regulations permit "post-October" net capital losses to be deferred and recognized on the tax return of the next succeeding taxable year.

Accounting principles generally accepted in the United States of America require certain components of net assets to be reclassified between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share. For the year ended December 31, 2005, the Fund reclassified \$438,412 from accumulated investment loss to paid-in capital.

(4) The Fund retains CEF Advisers, Inc. as its Investment Manager. Under the terms of the Investment Management Agreement, the Investment Manager receives a management fee, payable monthly, based on the average daily net assets of the Fund. Effective December 20, 2005 the annual rate of management fee compensation was changed to 1/2 of 1% from 1%. Certain officers and directors of the Fund are officers and

directors of the Investment Manager. The Fund reimbursed the Investment Manager

Edgar Filing: FOXYBY CORP. - Form N-CSR

\$11,802 for providing at cost certain administrative services comprised of compliance and accounting services during the year ended December 31, 2005. Through arrangements with the Fund's custodian and cash management, credits realized as a result of uninvested cash balances were used to reduce custody and transfer agency expenses, respectively. For financial reporting purposes, the Fund includes these credits as an expense offset in the Statement of Operations.

(5) Purchases and sales of investment securities (excluding short term investments) aggregated \$1,831,882 and \$3,071,223, respectively, for the year ended December 31, 2005.

At December 31, 2005, for federal income tax purposes the aggregate cost of securities was \$5,898,440 and net unrealized appreciation was \$756,003 comprised of gross unrealized appreciation of \$1,159,217 and gross unrealized depreciation of \$403,214.

(6) The Fund may engage in transactions in futures contracts. Upon entering into a futures contract, the Fund is required to deposit with the broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as the "initial margin." Subsequent payments ("variation margin") are made or received by the Fund each day, depending on the daily fluctuation of the value of the contract. The daily change in the contract is included in unrealized appreciation/depreciation on investments and futures contracts. The Fund realizes a gain or loss when the contract is closed. Futures transactions sometimes may reduce returns or increase volatility. In addition, futures can be illiquid and highly sensitive to changes in their underlying security, interest rate or index, and as a result can be highly volatile. A small investment in certain futures could have a potentially large impact on a Fund's performance. At December 31, 2005 the Fund had no open futures contracts. At December 31, 2005, the Fund had \$541,642 of investments pledged as collateral for the variation margin account.

(7) The Fund, Global Income Fund, Inc., Midas Fund, Inc., and Midas Special Equities Fund, Inc. (the "Borrowers") have entered into a committed secured line of credit facility with State Street Bank & Trust Company ("Bank"). Global Income Fund, Inc. is a closed-end investment company advised by the Investment Manager Midas Fund, Inc. and Midas Special Equities Fund, Inc. are open-end investment companies advised by Midas Management Corporation, an affiliate of the Investment Manager. The Bank also acts as the Fund's custodian. The aggregate amount of the line of credit is \$9,000,000 and the borrowing of each Borrower is collateralized by the underlying investments of such Borrower. The Bank will make revolving loans to a Borrower not to exceed in the aggregate outstanding at any time with respect to any one Borrower the least of \$9,000,000 or the maximum amount permitted pursuant to each Borrower's investment policies or as permitted under the Act. The commitment fee on this facility is 0.10% per annum on the unused portion of the commitment, based on a 360-day year. All loans under this facility will be available at the Borrower's option of (i) overnight Federal funds or (ii) LIBOR (30, 60, 90 days), each as in effect from time to time, plus 0.75% per annum, calculated on the basis of actual days elapsed for a 360-day year. For the year ended December 31, 2005, the weighted average interest rate was 3.76% based on the balances outstanding during the period and the weighted average amount outstanding was \$378,055.

(8) Of the 2,602,847 shares of common stock outstanding at December 31, 2005, Investor Service Center, Inc., an affiliate of the Fund's Investment Manager, owned 634,200 shares or 24.4% of the total shares outstanding.

(9) In the Circuit Court for Baltimore City, Maryland, Civil Action No. 24-C-04-007613 filed on October 4, 2004, a group comprised of Richard J. Shaker, Phillip Goldstein, Rajeev Das, and Andrew Dakos sued the Fund and its directors, alleging various breaches by the directors of fiduciary duty under

Edgar Filing: FOXBY CORP. - Form N-CSR

Maryland law and seeking declaratory and injunctive relief. The lawsuit generally arose out of the Fund's 2004 annual meeting of stockholders and the Fund's Bylaws. On December 20, 2005 the parties entered into a settlement of the lawsuit. Under the terms of the settlement, the management fee paid to the Investment Manager was reduced to an annual rate of 0.50% of Foxby's average daily net assets. The plaintiffs agreed to refrain from engaging in future efforts to seek control of Foxby. The settlement was approved by the Board of Directors of the Fund.

Notes to Financial Statements (concluded)

The parties have filed a Stipulation of Dismissal with the Court. In connection with these and other legal matters, total legal expenses incurred by the Fund were \$316,704 and \$83,200 for the years ended December 31, 2005 and 2004, respectively. Total litigation expenses incurred by the Fund on its own behalf and as advances of legal and other expenses to the Fund's directors before insurance recoveries reimbursed to the Fund pursuant to its director's and officer's liability insurance policy were \$881,450 and \$36,512 for the years ended December 31, 2005 and 2004, respectively. - (a) Includes \$0.06 of gains resulting from the buy back of treasury shares at a discount to net asset value.
 - (b) Total return on market value basis is calculated assuming a purchase of common stock on the opening of the first day and sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total return on net asset value basis will be higher than total return on market value basis in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total return on net asset value basis will be lower than total return on market value basis in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total return calculated for a period of less than one year is not annualized. The calculation does not reflect brokerage commissions, if any.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Foxby Corp.:

We have audited the accompanying statement of assets and liabilities of Foxby Corp. (the "Fund"), including the schedule of investments as of December 31, 2005, the related statement of operations and cash flows for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the four years in the period then ended and the nine months ended December 31, 2002, and the year ended March 31, 2002. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit. The financial highlights for the year ended March 31, 2001 were audited by other auditors whose report dated May 14, 2001 expressed an unqualified opinion on the financial highlights.

We conducted our audits in accordance with auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an

Edgar Filing: FOXBY CORP. - Form N-CSR

opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2005 by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Foxby Corp. as of December 31, 2005, the results of its operations and cash flows, the changes in its net assets, and the financial highlights for the periods noted above, in conformity with accounting principles generally accepted in the United States of America.

We do not sell shareholder personal information to third parties. We will collect and use shareholder personal information only to service shareholder accounts. DIVIDEND REINVESTMENT PLAN

The Fund has adopted a Dividend Reinvestment Plan (the "Plan"). Under the Plan, each dividend and capital gain distribution, if any, declared by the Fund on outstanding shares will, unless elected otherwise by each shareholder by notifying the Fund in writing at any time prior to the record date for a particular dividend or distribution, be paid on the payment date fixed by the Board of Directors or a committee thereof in additional shares. If the Market Price (as defined below) per share is equal to or exceeds the net asset value per share at the time shares are valued for the purpose of determining the number of shares equivalent to the cash dividend or capital gain distribution (the "Valuation Date"), participants will be issued additional shares equal to

Edgar Filing: FOXBY CORP. - Form N-CSR

the amount of such dividend divided by the greater of that net asset value per share or 95% of that Market Price per share. If the Market Price per share is less than such net asset value on the Valuation Date, participants will be issued additional shares equal to the amount of such dividend divided by the Market Price. The Valuation Date is the day before the dividend or distribution payment date or, if that day is not an American Stock Exchange trading day, the next trading day. For all purposes of the Plan: (a) the Market Price of the shares on a particular date shall be the average closing market price on the five trading days the shares traded ex-dividend on the Exchange prior to such date or, if no sale occurred on any of these days, then the mean between the closing bid and asked quotations, for the shares on the Exchange on such day, and (b) net asset value per share on a particular date shall be as determined by or on behalf of the Fund.

BOARD OF DIRECTORS' REVIEW OF THE INVESTMENT MANAGEMENT AGREEMENT

The annual continuance of the investment management agreement (the "Agreement") between the Fund and the investment manager, CEF Advisers, Inc., was approved at a meeting of the Board of Directors held in March 2005. The semi-annual report to shareholders for the fiscal period ended June 30, 2005 includes a discussion of the factors which the Board of Directors considered in the approval of the continuance of the Agreement. In addition, at a meeting held on September 14, 2005, the Board of Directors approved an amended investment management agreement ("Amended Agreement") between the Fund and the investment manager. The Amended Agreement is substantially similar to the Agreement, except that it provides for a reduction in the investment management fee from 1.00% of the Fund's average daily net assets to 0.50% of the Fund's average daily net assets. The Amended Agreement became effective on December 20, 2005.

AMENDED PROXY VOTING POLICIES AND PROCEDURES

Midas Dollar Reserves, Inc.
Midas Fund, Inc.
Midas Special Fund, Inc.
Global Income Fund, Inc.
Foxby Corp.

Global Income Fund, Inc. and Foxby Corp. (the "Funds") delegates the responsibility for voting proxies of portfolio companies held in each Fund's portfolio to Institutional Shareholder Services, Inc. ("ISS"). The Proxy Voting Guidelines of ISS (see attached) are incorporated by reference herein as a Fund's proxy voting policies and procedures, as supplemented by the terms hereof. Each Fund retains the right to override the delegation to ISS on a case-by-case basis, in which case the ADDENDUM - NON-DELEGATED PROXY VOTING POLICIES AND PROCEDURES supercede the Proxy Voting Guidelines of ISS in their entirety. In all cases, a Fund's proxies will be voted in the best interests of the Fund.

With respect to a vote upon which a Fund overrides the delegation to ISS, to the extent that such vote presents a material conflict of interest between the Fund and its investment adviser or any affiliated person of the Investment Manager, a Fund will disclose such conflict to, and obtain consent from, its Independent Directors, or a committee thereof, prior to voting the proxy.

January 1, 2004

ADDENDUM NON-DELEGATED PROXY VOTING POLICIES AND PROCEDURES

These proxy voting policies and procedures are intended to provide general guidelines regarding the issues they address. As such, they cannot be "violated." In each case the vote will be based on maximizing shareholder value over the long term, as consistent with overall investment objectives and policies.

Board and Governance Issues

Board of Director Composition

Edgar Filing: FOXBY CORP. - Form N-CSR

Typically, we will not object to slates with at least a majority of independent directors.

We generally will not object to shareholder proposals that request that the board audit, compensation and/or nominating committees include independent directors exclusively.

Approval of IRPAF

We will evaluate on a case-by-case basis instances in which the audit firm has a significant audit relationship with the company to determine whether we believe independence has been compromised.

We will review and evaluate the resolutions seeking ratification of the auditor when fees for financial systems design and implementation substantially exceed audit and all other fees, as this can compromise the independence of the auditor.

We will carefully review and evaluate the election of the audit committee chair if the audit committee recommends an auditor whose fees for financial systems design and implementation substantially exceed audit and all other fees, as this can compromise the independence of the auditor.

Increase Authorized Common Stock

We will generally support the authorization of additional common stock necessary to facilitate a stock split.

We will generally support the authorization of additional common stock.

Blank Check Preferred Stock

Blank check preferred is stock with a fixed dividend and a preferential claim on company assets relative to common shares. The terms of the stock (voting, dividend and conversion rights) are determined at the discretion of the Board when the stock is issued. Although such an issue can in theory be used for financing purposes, often it has been used in connection with a takeover defense. Accordingly, we will generally evaluate the creation of blank check preferred stock.

Classified or "Staggered" Board

On a classified (or staggered) board, directors are divided into separate classes (usually three) with directors in each class elected to overlapping three-year terms. Companies argue that such Boards offer continuity in direction which promotes long-term planning. However, in some instances they may serve to deter unwanted takeovers since a potential buyer would have to wait at least two years to gain a majority of Board seats.

We will vote on a case-by-case basis on issues involving classified boards.

Supermajority Vote Requirements

Supermajority vote requirements in a company charter or bylaws require a level of voting approval in excess of simple majority. Generally, supermajority provisions require at least 2/3 affirmative vote for passage of issues.

We will vote on a case-by-case basis regarding issues involving supermajority voting.

Edgar Filing: FOXBY CORP. - Form N-CSR

Restrictions on Shareholders to Act by Written Consent

Written consent allows shareholders to initiate and carry out a shareholder action without waiting until the annual meeting or by calling a special meeting. It permits action to be taken by the written consent of the same percentage or outstanding shares that would be required to effect the proposed action at a shareholder meeting.

We will generally not object to proposals seeking to preserve the right of shareholders to act by written consent.

Restrictions on Shareholders to Call Meetings

We will generally not object to proposals seeking to preserve the right of the shareholders to call meetings.

Limitations, Director Liability and Indemnification

Because of increased litigation brought against directors of corporations and the increase costs of director liability insurance, many states have passed laws limiting director liability for those acting in good faith. Shareholders, however, often must opt into such statutes. In addition, many companies are seeking to add indemnification of directors to corporate bylaws.

We will generally support director liability and indemnification resolutions because it is important for companies to be able to attract the most qualified individuals to their Boards.

Reincorporation

Corporations are in general bound by the laws of the state in which they are incorporated. Companies reincorporate for a variety of reasons including shifting incorporation to a state where the company has its most active operations or corporate headquarters, or shifting incorporation to take advantage of state corporate takeovers laws.

We typically will not object to reincorporation proposals.

Cumulative Voting

Cumulative voting allows shareholders to cumulate their votes behind one or a few directors running for the board that is, cast more than one vote for a director thereby helping a minority of shareholders to win board representation. Cumulative voting generally gives minority shareholders an opportunity to effect change in corporate affairs.

We typically will not object to proposals to adopt cumulative voting in the election of directors.

Dual Classes of Stock

In order to maintain corporate control in the hands of a certain group of shareholders, companies may seek to create multiple classes of stock with differing rights pertaining to voting and dividends.

We will vote on a case-by-case basis dual classes of stock. However, we will typically not object to dual classes of stock.

Limit Directors Tenure

Edgar Filing: FOXBY CORP. - Form N-CSR

In general, corporate directors may stand for re-election indefinitely. Opponents of this practice suggest that limited tenure would inject new perspectives into the boardroom as well as possibly creating room for directors from diverse backgrounds; however, continuity is important to corporate leadership and in some instances alternative means may be explored for injecting new ideas or members from diverse backgrounds into corporate boardrooms.

Accordingly, we will vote on a case-by-case basis regarding attempts to limit director tenure.

Minimum Director Stock Ownership

The director share ownership proposal requires that all corporate directors own a minimum number of shares in the corporation. The purpose of this resolution is to encourage directors to have the same interest as other shareholders.

We normally will not object to resolutions that require corporate directors to own shares in the company.

Executive Compensation

Disclosure of CEO, Executive, Board and Management Compensation

On a case-by-case basis, we will support shareholder resolutions requesting companies to disclose the salaries of top management and the Board of Directors.

Compensation for CEO, Executive, Board and Management

We typically will not object to proposals regarding executive compensation if we believe the compensation clearly does not reflect the current and future circumstances of the company.

Formation and Independence of Compensation Review Committee

We normally will not object to shareholder resolutions requesting the formation of a committee of independent directors to review and examine executive compensation. Stock Options for Board and Executives

We will generally review the overall impact of stock option plans that in total offer greater than 25% of shares outstanding because of voting and earnings dilution.

We will vote on a case-by-case basis option programs that allow the repricing of underwater options.

In most cases, we will oppose stock option plans that have option exercise prices below the marketplace on the day of the grant.

Generally, we will support options programs for outside directors subject to the same constraints previously described.

Employee Stock Ownership Plan (ESOPs)

We will generally not object to ESOPs created to promote active employee ownership. However, we will generally oppose any ESOP whose purpose is to prevent a corporate takeover.

Changes to Charter or By-Laws

Edgar Filing: FOXBY CORP. - Form N-CSR

We will conduct a case-by-case review of the proposed changes with the voting decision resting on whether the proposed changes are in shareholder best interests.

Confidential Voting

Typically, proxy voting differs from voting in political elections in that the company is made aware of shareholder votes as they are cast. This enables management to contact dissenting shareholders in an attempt to get them to change their votes.

We generally will not object to confidential voting.

Equal Access to Proxy

Equal access proposals ask companies to give shareholders access to proxy materials to state their views on contested issues, including director nominations. In some cases they would actually allow shareholders to nominate directors. Companies suggest that such proposals would make an increasingly complex process even more burdensome.

In general, we will not oppose resolutions for equal access proposals.

Golden Parachutes

Golden parachutes are severance payments to top executives who are terminated or demoted pursuant to a takeover. Companies argue that such provisions are necessary to keep executives from "jumping ship" during potential takeover attempts.

We will not object to the right of shareholders to vote on golden parachutes because they go above and beyond ordinary compensation practices. In evaluating a particular golden parachute, we will examine if considered material total management compensation, the employees covered by the plan, and the quality of management and all other factors deemed pertinent.

Mergers and Acquisitions

Mergers, Restructuring and Spin-offs

A merger, restructuring, or spin-off in some way affects a change in control of the company assets. In evaluating the merit of each issue, we will consider the terms of each proposal. This will include an analysis of the potential long-term value of the investment.

On a case by case basis, we will review management proposals for merger or restructuring to determine the extent to which the transaction appears to offer fair value and other proxy voting policies stated are not violated.

Poison Pills

Poison pills (or shareholder rights plans) are triggered by an unwanted takeover attempt and cause a variety of events to occur which may make the company financially less attractive to the suitor. Typically, directors have enacted these plans without shareholder approval. Most poison pill resolutions deal with putting poison pills up for a vote or repealing them altogether.

Edgar Filing: FOXBY CORP. - Form N-CSR

We typically will not object to most proposals to put rights plans up for a shareholder vote. In general, poison pills will be reviewed for the additional value provided to shareholders, if any.

Anti-Greenmail Proposals

Greenmail is the payment a corporate raider receives in exchange for his/her shares. This payment is usually at a premium to the market price, so while greenmail can ensure the continued independence of the company, it discriminates against other shareholders.

We generally will support anti-greenmail provisions.

Opt-Out of State Anti-takeover Law

A strategy for dealing with anti-takeover issues has been a shareholder resolution asking a company to opt-out of a particular state anti-takeover laws.

We generally will not object to bylaws changes requiring a company to opt out of state anti-takeover laws. Resolutions requiring companies to opt into state anti-takeover statutes generally will be subject to further review for appropriateness.

Other Situations

In the event an issue is not addressed in the above guidelines, we will determine on a case-by-case basis any proposals that may arise from management or shareholders. To the extent that a proposal from management does not infringe on shareholder rights, we will generally support management position. We may also elect to abstain or not vote on any given matter.

8. EXECUTIVE AND DIRECTOR COMPENSATION

Votes with respect to equity-based compensation plans should be determined on a CASE-BY-CASE basis. Our methodology for reviewing compensation plans primarily focuses on the transfer of shareholder wealth (the dollar cost of pay plans to shareholders instead of simply focusing on voting power dilution). Using the expanded compensation data disclosed under the SEC rules, ISS will value every award type. ISS will include in its analyses an estimated dollar cost for the proposed plan and all continuing plans. This cost, dilution to shareholders equity, will also be expressed as a percentage figure for the transfer of shareholder wealth, and will be considered along with dilution to voting power. Once ISS determines the estimated cost of the plan, we compare it to a company-specific dilution cap. Our model determines a company-specific allowable pool of shareholder wealth that may be transferred from the company to plan participants, adjusted for:

Long-term corporate performance (on an absolute basis and relative to a standard industry peer group and an appropriate market index),

Cash compensation, and

Categorization of the company as emerging, growth, or mature. These adjustments are pegged to market capitalization.

Generally vote AGAINST plans in which the CEO participates if there is a disconnect between the CEO pay and company performance (an increase in pay and a decrease in performance) and the main source of the pay increase (over half) is equity-based. A decrease in performance is based on negative one- and three-year total shareholder returns. An increase in pay is based on the CEO total direct compensation (salary, cash bonus, present value of stock options, face value of restricted stock, face value of long-term incentive plan payouts, and all other compensation) increasing over the previous year.
