SOFTECH, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

A. DESCRIPTION OF THE BUSINESS AND BASIS OF PRESENTATION

SofTech, Inc. (the Company) was formed in Massachusetts on June 10, 1969. The Company is engaged in the development, marketing, distribution and support of computer software solutions that serve the Product Lifecycle Management (PLM) industry. The Company's operations are organized geographically with offices in the U.S. and in Italy. The Company also has resellers in Asia and Europe.

The Company has been actively engaged in acquiring and filing new U.S. patents, evaluating alternatives for monetizing its existing patents and investigating the acquisition of specific patents already awarded that might enhance shareholder value.

The unaudited consolidated financial statements of the Company include the accounts of SofTech, Inc. and its wholly-owned subsidiaries, Information Decisions, Inc., Workgroup Technology Corporation, HomeView, Inc., SofTech, GmbH and SofTech, Srl. All significant intercompany accounts and transactions have been eliminated in consolidation.

Our unaudited consolidated financial statements presented herein have been prepared pursuant to the rules of the Securities and Exchange Commission (the SEC) for quarterly reports on Form 10Q and do not include all of the information and footnote disclosures required by generally accepted accounting principles in the United States of America (GAAP). These statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended May 31, 2015 included in our Annual Report on Form 10K (Annual Report), which was filed with the SEC on August 31, 2015. In the opinion of management, the consolidated financial statements include all adjustments necessary for the fair presentation of the consolidated financial position, results of operations, and cash flows of the Company as of and for these interim periods.

HOMEVIEW, INC.

The Company established a wholly-owned subsidiary, HomeView, Inc. on April 7, 2015 in Massachusetts. HomeView, a technology being developed by HomeView, Inc., is a secure, intelligent home asset management and maintenance system. HomeView allows homeowners to create a virtual home manual that logs, manages and tracks personal assets and attributes about the property. Home ownership is made easier by managing user manuals, warranty

periods, service records, maintenance reminders and other projects with HomeView. Our plans are to offer this technology as a hosted solution wherein the software would reside on our servers.

CADRA SALE

On October 18, 2013, the Company sold substantially all of the assets of its CADRA product line, including all intellectual property related to that technology but specifically excluding cash, billed accounts receivable and liabilities other than the deferred maintenance liability associated with CADRA customer maintenance contracts for support services (the CADRA Sale), to Mentor Graphics Corporation (Mentor), pursuant to an Asset Purchase Agreement dated August 30, 2013 (the Asset Purchase Agreement). The aggregate consideration for the CADRA Sale is up to \$3.95 million. Through November 30, 2015, the Company has received a total of approximately \$3.5 million from Mentor and could receive up to an additional \$423,000 based upon the CADRA revenue generated by Mentor for the period from February 1, 2015 through October 31, 2016. In accordance with the terms of the Asset Purchase Agreement such additional payments would be received in two installments on or before April 1, 2016 and 2017.

In conjunction with completing the CADRA Sale, the Company entered into a one-year, exclusive Distributorship Agreement with Mentor allowing us to market and support the CADRA technology as a reseller throughout Europe (except Germany) at a thirty percent (30%) gross margin. That arrangement was extended through January 31, 2016 on a non-exclusive basis. Under the new arrangement, gross margin on software remained at 30% and the gross margin on support contracts increased to either 35% or 40% dependent on annual purchase volume.

B. SIGNIFICANT ACCOUNTING POLICIES

USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The most significant estimates included in the financial statements pertain to revenue recognition, the allowance for doubtful accounts receivable, the fair value estimate of the Holdback Payment and Earn-Out Payments and the valuation of long term assets including goodwill, capitalized patent costs, capitalized software development costs and deferred tax assets. Actual results could differ from those estimates.

SOFTWARE DEVELOPMENT COSTS

The Company accounts for its software development costs in accordance with Accounting Standards Codification (ASC) 985-20, *Software-Costs of Computer Software to Be Sold, Leased or Marketed* and ASC 350-40, *Intangibles-Goodwill and Other- Internal Use-Software*. ASC 985-20 is applicable to costs incurred to develop or purchase software to be sold, leased or otherwise marketed as a separate product or as part of a product or process. ASC 350-40 is applicable to costs incurred to develop or obtain software solely to meet an entity's internal needs and for which no substantive plan exists or is being developed to externally market the software. ASC 350-40 also covers technology that would be offered as a hosted solution.

Under ASC 985-20, costs that are incurred in researching and developing a computer software product are charged to expense until technological feasibility has been established for the product. Once technological feasibility is established, software development costs are capitalized until the product is available for general release to customers.

Under ASC 350-40 there are three distinct stages associated with development software which include 1) preliminary project; 2) application development; and 3) post implementation-operation. Costs should be capitalized after each of the following has occurred:

- The preliminary project stage has been completed;
- Management with the relevant authority authorizes the project;
- Management with the relevant authority commits to fund the project;
- It is probable that the project will be completed; and
- It is probable that the software will be used for the intended purpose.

Capitalization stops after the software is substantially complete.

Capitalized costs are amortized using the straight-line method over the estimated economic life of the product, generally three years. The Company evaluates the realizability of the assets and the related periods of amortization on a regular basis. Judgment is required in determining when costs should begin to be capitalized under both standards as well as the technology's economic life.

During the three and six months ended November 30, 2014, the Company did not capitalize software development costs. During the three and six months ended November 30, 2015, the Company capitalized approximately \$113,000 and \$231,000 of its software development costs, respectively. Amortization expense related to capitalized software development costs for the three and six months ended November 30, 2015 was approximately \$12,000 and \$28,000, respectively, as compared to approximately \$28,000 and \$56,000 for the comparable periods in the prior fiscal year.

INCOME TAXES

The provision for income taxes is based on the earnings or losses reported in the consolidated financial statements. The Company recognizes deferred tax liabilities and assets for the expected future tax consequences of events that have been recognized in the Company's financial statements or tax returns. Deferred tax liabilities and assets are determined based on the difference between the financial statement carrying amounts and tax bases of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. The Company provides a valuation allowance against deferred tax assets if it is more likely than not that some or all of the deferred tax assets will not be realized.

REVENUE RECOGNITION

The Company follows the provisions of ASC 985-605, *Software Revenue Recognition*, for transactions involving the licensing of software and software support services. Revenue from software license sales is recognized when persuasive evidence of an arrangement exists, delivery of the product has been made, there is a fixed fee and collectability is reasonably assured. The Company does not provide for a right of return. For multiple element arrangements, total fees are allocated to each of the undelivered elements based upon vendor specific objective evidence (VSOE) of their fair values, with the residual amount recognized as revenue for the delivered elements, using the residual method set forth in ASC 985-605. Revenue from customer maintenance support agreements is deferred and recognized ratably over the term of the agreements, typically one year. Revenue from engineering, consulting and training services is recognized as those services are rendered using a proportional performance model.

The Company follows the provisions of ASC 605, *Revenue Recognition* for transactions that do not involve the licensing of software or software support services as in the case of the recent sale of its patents. Revenue from the sale of patents is recorded when persuasive evidence of an arrangement exists, delivery has taken place, there is a fixed fee and collectability is reasonably assured. These conditions are no different from those when the Company licenses software.

For multiple element arrangements accounted for under ASC 605-25, a determination is made as to which elements have stand-alone value, and are therefore separable. Total fees are then allocated to each of the separate elements based upon the relative selling price method. Under that method the allocation of fees to the separate elements is based on VSOE, or if it doesn't exist, then based on third party evidence of selling price. If neither exists, then the allocation is based on management's best estimate of the selling price.

ACCOUNTING FOR GOODWILL

The Company accounts for goodwill pursuant to ASC 350, *Intangibles - Goodwill and Other*. This requires that goodwill be reviewed annually, or more frequently as a result of an event or change in circumstances, for possible impairment with impaired assets written down to fair value. Additionally, existing goodwill and intangible assets must be assessed and classified within the standard's criteria.

As of May 31, 2015, the Company conducted its annual impairment test of goodwill by comparing the fair value of the reporting unit to the carrying amount of the underlying assets and liabilities of its single reporting unit. The Company determined that the fair value of the reporting unit exceeded the carrying amount of the assets and liabilities, therefore no impairment existed as of the testing date. The Company concluded that no facts or circumstances arose during the three and six months ended November 30, 2015 to warrant an interim impairment test.

CAPITALIZED PATENT COSTS

Costs related to patent applications are capitalized as incurred and are amortized once the patent application is accepted or are expensed if the application is finally rejected. Patent costs are amortized over their estimated economic lives under the straight-line method, and are evaluated for impairment when events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable through the estimated undiscounted future cash flows from the use of the associated patent. Capitalized patent costs totaled approximately \$3,000 and \$5,000 for the three and six month periods ended November 30, 2015, respectively, as compared to \$2,000 for both the three and six month periods ended November 30, 2014.

LONG-LIVED ASSETS

The Company periodically reviews the carrying value of all intangible and other long-lived assets. If indicators of impairment exist, the Company compares the undiscounted cash flows estimated to be generated by those assets over their estimated economic life to the related carrying value of those assets to determine if the assets are impaired. If the carrying value of the asset is greater than the estimated undiscounted cash flows, the carrying value of the assets

would be decreased to their fair value through a charge to operations. As of November 30, 2015, the Company does not have any long-lived assets it considers to be impaired.

FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash, accounts receivable, Earn-Out Payments, related party notes receivable, accounts payable, notes payable accrued expenses, long-term debt and capital lease obligations. The Company's estimate of the fair value of these financial instruments approximates their carrying value due to the short term maturity of the assets and liabilities at November 30, 2015.

FAIR VALUE OF FINANCIAL INSTRUMENTS

Accounting guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Under this guidance, the Company is required to classify certain assets based on the fair value hierarchy, which groups fair value-measured assets based upon the following levels of inputs:

·
Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

·
Level 2 Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability;

·
Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e. supported by little or no market activity).

The assets maintained by the Company that are required to be measured at fair value on a recurring basis are the Earn-Out Payments associated with the Company's sale of the CADRA product line. As of November 30, 2015, the maximum amount that could be received by the Company under the Asset Purchase Agreement totaled \$423,000. The

actual amount to be received is dependent on the amount of CADRA revenue produced by Mentor for the period from February 1, 2015 through October 31, 2016.

The following table summarizes the valuation of the Company's assets and liabilities measured at fair value on a recurring basis as of November 30, 2015:

	<i>(in thousands)</i>					
	Total	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)		
Assets:						
Earn-Out Payments	\$ 325	\$ -	\$ -	\$ 325		
Total assets at fair value	\$ 325	\$ -	\$ -	\$ 325		

The following table summarizes the valuation of the Company's assets and liabilities measured at fair value on a recurring basis as of May 31, 2015:

	<i>(in thousands)</i>					
	Total	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)		
Assets:						
Earn-Out Payments	\$ 376	\$ -	\$ -	\$ 376		
Total assets at fair value	\$ 376	\$ -	\$ -	\$ 376		

The table below provides a summary of the changes in fair value of the Level 3 classified Holdback Payment and Earn-Out Payments asset for the six month period ended November 30, 2015.

	<i>(in thousands)</i>	
Fair value at May 31, 2014	\$	895
Payments received		(604)
Change in fair value		85
Fair value at May 31, 2015		376
Change in fair value		(51)
Fair value at November 30, 2015	\$	325

The fair value of the Earn-Out Payments expected to be collected within twelve months of the balance sheet date have been classified as current assets and the remainder as non-current assets in the accompanying consolidated balance sheets. The Company has estimated the fair value of the Earn-Out Payments using a discounted cash flow approach.

This valuation is based upon several factors including; i) management's estimate of the amount and timing of future CADRA revenues, ii) the timing of receipt of payments from Mentor, and iii) a discount rate of 7%.

A change in any of these unobservable inputs can significantly change the fair value of the asset. The change in fair value of the Earn-Out Payments recognized in the Consolidated Statements of Operations for the three and six months ended November 30, 2015 resulted in losses of approximately (\$61,000) and (\$51,000), respectively. The change in fair value of the Earn-Out Payments recognized in the Consolidated Statements of Operations for the three and six months ended November 30, 2014 resulted in income of approximately \$21,000 and \$60,000, respectively.

FOREIGN CURRENCY TRANSLATION

The functional currency of the Company's foreign operations is the Euro. As a result, assets and liabilities are translated at period-end exchange rates and revenues and expenses are translated at the average exchange rates. Adjustments resulting from translation of such financial statements are classified in accumulated other comprehensive loss. Foreign currency gains and losses arising from transactions were included in the statements of operations. For the three and six month periods ended November 30, 2015, the Company recorded a net loss from foreign currency related transactions of approximately \$23,000, and \$16,000, respectively, as compared to approximately \$28,000 and \$43,000, respectively, for the comparable periods in the prior fiscal year, to Other expense in the unaudited Consolidated Statements of Operations.

NET (LOSS) INCOME PER COMMON SHARE

For the three and six month periods ended November 30, 2015, 1,619 and 619, respectively, options to purchase common shares were anti-dilutive and were excluded from the basic and diluted earnings per share calculation. For the three and six month periods ended November 30, 2014, 2,368 and 1,184, respectively, options to purchase common shares were anti-dilutive and were excluded from the basic and diluted earnings per share calculation.

STOCK-BASED COMPENSATION

Stock-based compensation expense for all stock-based payment awards made to employees and directors is measured based on the grant-date fair value of the award. The Company estimated the fair value of each share-based award using the Black-Scholes option valuation model. The Black-Scholes option valuation model incorporates assumptions as to stock price volatility, the expected life of options, a risk-free interest rate and dividend yield. The Company recognizes stock-based compensation expense on a straight-line basis over the requisite service period of the award.

In May 2011, the 2011 Equity Incentive Plan (the 2011 Plan) was approved by the Company's shareholders, pursuant to which 150,000 shares of our common shares are reserved for issuance. Any shares subject to any award under the 2011 Plan that expires, is terminated unexercised or is forfeited will be available for awards under the 2011 Plan. The Company may grant stock options, restricted stock, restricted stock units, stock equivalents and awards of shares of common stock that are not subject to restrictions or forfeiture under the 2011 Plan. As of November 30, 2015, 149,500 options were awarded.

The following table summarizes option activity under the 2011 Stock Option Plan:

	Number of Options	Weighted Average Exercise Price Per Share	Weighted-Average Remaining Life (in years)	Aggregate Intrinsic Value
Outstanding options at May 31, 2014	129,500	1.88	9.74	20,825

Outstanding options at November 30, 2015	149,500 \$	1.75	8.07 \$	5,625
Exercisable at November 30, 2015	114,867 \$	1.77	7.92 \$	5,063

The Company determined the volatility for options granted using the historical volatility of the Company's common stock. The expected life of options has been determined utilizing the simplified method as prescribed in ASC 718, *Compensation, Stock Compensation*. The expected life represents an estimate of the time options are expected to remain outstanding. The risk-free interest rate is based on a treasury instrument whose term is consistent with the expected life of the stock options. The Company has not paid, and does not anticipate paying, cash dividends on its common stock; therefore, the expected dividend yield is assumed to be zero.

For the three and six month periods ended November 30, 2015, the Company expensed approximately \$27,000 and \$58,000 of stock-based compensation, respectively, as compared to approximately \$32,000 and \$59,000 in the comparable prior periods.

REDEEMABLE COMMON STOCK

During the year ended May 31, 2013, the Company issued 50,000 shares of common stock, \$0.10 par value (the Common Stock), at a purchase price of \$5.00 per share to accredited investors (collectively, the Investors) in separate private placement transactions for total proceeds of \$250,000. These transactions were completed pursuant to a Securities Purchase Agreement (the Agreement) which the Company entered into with each of the respective Investors. In lieu of registration rights, each \$25,000 investment entitled the Investors to a fee of \$6,000 (the Fee) to be paid in six equal quarterly installments during the eighteen month period following the investment. The Agreement also provided the Investors with the right to require the Company to redeem the Common Stock held by such Investors (the Put Option) for \$5.50 per share in cash for a 30 day period ending between June 1, 2014 and June 30, 2014. Each of the Investors exercised their Put Option and the Common Stock was repurchased by the Company at the agreed upon Put Option price of \$5.50 per share for a total of \$275,000 during the first quarter of fiscal 2015.

During the fiscal quarter ended August 31, 2014, in a transaction structured in a similar fashion to the above described Agreement, the Company issued 110,000 shares of the Common Stock at a purchase price of \$5.00 per share to Joseph P. Daly, an accredited investor and existing Company shareholder, in a private placement transaction for total proceeds of \$550,000. This transaction was completed pursuant to a securities purchase agreement whereby Mr. Daly shall have the right to require the Company to repurchase some or all of the shares at \$7.00 per share during the ninety (90) day period immediately following the three-year anniversary of the transaction. Upon completion of the transaction, the 110,000 shares of Common Stock issued pursuant to the security purchase agreement were recorded as redeemable common stock at its redemption value of \$770,000 and accretion of \$220,000 was recorded to additional paid in capital.

During the fiscal quarter ended November 30, 2014, the Company issued an additional 60,000 shares of the Common Stock at a purchase price of \$5.00 per share to four accredited investors (collectively, the New Investors) in private placement transactions for total proceeds of \$300,000. These transactions were completed pursuant to Securities Purchase Agreements (the New Agreements) entered into with each of the respective New Investors. In lieu of registration rights, each \$50,000 investment entitles the New Investors to a fee (the New Investors Fees) of \$5,000 to be paid in eight equal quarterly installments during the twenty-four month period (the Payment Period) following the investment. The New Agreements also provide the New Investors with the right to require the Company to redeem the Common Stock held by such New Investors for \$7.00 per share in cash for a 30 day period following the Payment Period. Upon completion of these transactions, the 60,000 shares of Common Stock issued pursuant to the New Agreements were recorded as redeemable common stock at its redemption value of \$420,000 and accretion of \$120,000 was recorded to additional paid in capital.

During the fiscal quarter ended November 30, 2015, the Company issued an additional 10,000 shares of the Common Stock at a purchase price of \$5.00 per share to an accredited investor in private placement transactions for total proceeds of \$50,000. This transaction was completed pursuant to a Securities Purchase Agreement entered into with the investor. In lieu of registration rights, the investor is entitled to a fee of \$5,000 to be paid in eight equal quarterly installments during the twenty-four month period (the Payment Period) following the investment. The Securities Purchase Agreement also provides the investor with the right to require the Company to redeem the Common Stock

held by such investor for \$7.00 per share in cash for a 30 day period following the Payment Period. Upon completion of this transaction, the 10,000 shares of Common Stock issued pursuant to the Securities Purchase Agreement was recorded as redeemable common stock at its redemption value of \$70,000 and accretion of \$20,000 was recorded to additional paid in capital.

The Company first assessed the redeemable Common Stock to determine whether each of these instruments should be accounted for as a liability in accordance with ASC 480, *Distinguishing Liabilities from Equity*. In that the put option is optionally redeemable by the holder, the Common Stock was not required to be accounted for as a liability. Next, the Company assessed each put option within the redeemable Common Stock as a potential embedded derivative pursuant to the provisions of ASC 815, *Derivatives and Hedging*, and concluded that the put option did not meet the net settlement criteria within the definition of a derivative. Therefore, the Company has accounted for the redeemable Common Stock in accordance with ASC 480-10-S99, *Classification and Measurement of Redeemable Securities*, which provides that securities that are optionally redeemable by the holder for cash or other assets are classified outside of permanent equity in temporary equity.

RECENT ACCOUNTING PRONOUNCEMENTS

In May 2015, the FASB issued ASU No. 2015-08, "Business Combinations (Topic 805): Pushdown Accounting Amendments to SEC Paragraphs Pursuant to Staff Accounting Bulletin No. 115." The amendments in this ASU amend various SEC paragraphs pursuant to the issuance of Staff Accounting Bulletin No. 115, Topic 5: Miscellaneous Accounting, regarding various pushdown accounting issues, and did not have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-05, "Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement." The amendments in this ASU provide guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The amendments do not change the accounting for a customer's accounting for service contracts. As a result of the amendments, all software licenses within the scope of Subtopic 350-40 will be accounted for consistent with other licenses of intangible assets. The amendments in this ASU are effective for public business entities for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. An entity can elect to adopt the amendments either: (1) prospectively to all arrangements entered into or materially modified after the effective date; or (2) retrospectively. The Company is currently assessing the impact that ASU 2015-05 will have on its consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-03, "Interest Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." The amendments in this ASU are intended to simplify the presentation of debt issuance costs. These amendments require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU. The amendments in this ASU are effective for public business entities for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted for financial statements that have not been previously issued. The Company does not expect the adoption of ASU 2015-03 to have a material impact on its consolidated financial statements.

In February 2015, the FASB issued ASU No. 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis." The amendments in this ASU are intended to improve targeted areas of consolidation guidance for legal entities such as limited partnerships, limited liability corporations, and securitization structures (collateralized debt obligations, collateralized loan obligations, and mortgage-backed security transactions). In addition to reducing the number of consolidation models from four to two, the new standard simplifies the FASB Accounting Standards Codification and improves current GAAP by placing more emphasis on risk of loss when determining a controlling financial interest, reducing the frequency of the application of related-party guidance when determining a controlling financial interest in a variable interest entity ("VIE"), and changing consolidation conclusions for public and private companies in several industries that typically make use of limited partnerships or VIEs. The amendments in this ASU are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. ASU 2015-02 may be applied retrospectively in previously issued financial statements for one or more years with a cumulative-effect adjustment to retained earnings as of the beginning of the first year restated. The Company does not expect the adoption of ASU 2015-02 to have a material impact on its consolidated financial statements.

Accounting Standards Update (ASU) 2014-16, Derivatives and Hedging (Topic 815) Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity was issued by the FASB in November 2014. The primary purpose of the ASU is to eliminate the use of different methods in practice and thereby reduce existing diversity under GAAP in the accounting for hybrid financial instruments issued

in the form of a share. ASU 2014-16 is effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The Company does not believe that this guidance will have a material impact on its consolidated results of operations or financial position or disclosures.

Accounting Standards Update (ASU) 2014-15, Presentation of Financial Statements-Going Concern (Subtopic 205-40) Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern was issued by the FASB in August 2014. The primary purpose of the ASU is to provide guidance in GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The amendments should reduce diversity in the timing and content of footnote disclosure. ASU 2014-15 is effective for the annual period ending after December 15, 2016, and for the annual periods and interim periods thereafter. Early adoption is permitted. The Company is in the process of evaluating if this guidance will have a material impact on its consolidated results of operations or financial position or disclosures.

ASU 2014-12, Compensation-Stock Compensation (Topic 718) Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period was issued by the FASB in June 2014. ASU 2014-12 requires that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. ASU 2014-12 is effective for public business entities for annual periods and interim periods within the annual periods beginning after December 15, 2015. Early adoption is permitted. The Company does not believe this guidance will have a material impact on its consolidated results of operations or financial position.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, (Topic 606). The ASU is the result of a joint project by the FASB and the International Accounting Standards Board (IASB) to clarify the principles for recognizing revenue and to develop a common revenue standard for GAAP and International Financial Reporting Standards (IFRS) that would: remove inconsistencies and weaknesses, provide a more robust framework for addressing revenue issues, improve comparability of revenue recognition practices across entities, jurisdictions, industries, and capital markets, improve disclosure requirements and resulting financial statements, and simplify the presentation of financial statements. The core principle of the new guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU is effective for annual and interim reporting periods beginning after December 15, 2017, based on ASU 2015-14. Early application is permitted but not before the original effective date of December 15, 2016. The Company is currently assessing the impact of this guidance.

C. GEOGRAPHICAL INFORMATION

The Company operates in one reportable segment and is engaged in the development, marketing, distribution and support of computer aided design and product data management and collaboration computer solutions. The Company's operations are organized geographically with offices in the U.S. and Italy. Components of revenue and long-lived assets (consisting primarily of intangible assets, capitalized software and property, plant and equipment) by geographic location, are as follows (in thousands):

	Three Month Periods Ended	
	November 30, 2015	November 30, 2014
Revenue:		
North America	\$ 1,043	\$ 859
Europe	274	177
Asia	3	-
Eliminations	(16)	(9)
Consolidated Total	\$ 1,304	\$ 1,027

	Six Month Periods Ended	
	November 30, 2015	November 30, 2014
Revenue:		
North America	\$ 1,818	\$ 1,541
Europe	482	366
Asia	6	-
Eliminations	(21)	(16)
Consolidated Total	\$ 2,285	\$ 1,891

Long Lived Assets:	As of	As of

	November 30,		May 31,	
	2015		2015	
North America	\$	2,026	\$	1,797
Europe		41		41
Consolidated Total	\$	2,067	\$	1,838

D. DEBTESSIGPR

On June 20, 2014, the Company entered into a promissory note agreement (the Note) with EssigPR, Inc. (EssigPR), a Puerto Rico corporation and related party of the Company. The Note is a three (3) year borrowing arrangement with EssigPR as the lender. The Note is a \$750,000 term loan maturing on April 1, 2017, that accrues interest at a 9.5% interest rate, paid quarterly in arrears. The principal on the Note was to be paid from the deferred payments (Holdback Payment and Earn-Out Payments) due over the next three years from Mentor in connection with their purchase of the CADRA product line.

On October 1, 2014, the Company entered into an additional short term borrowing arrangement with EssigPR (Short Term Note) whereby it was agreed that the Company would retain \$300,000 of the Holdback Payment due from Mentor in October 2014 rather than utilize those monies to pay down the above described Note. The interest rate on the Short Term Note is 9.5%, payable quarterly in arrears. The Short Term Note can be repaid at any time without penalty and was due in full on April 10, 2015. EssigPR was awarded 5,000 fully vested stock options to purchase SofTech common stock at \$1.00 per share. The stock options will expire on October 1, 2024 if not exercised. The Short Term Note arrangement did not increase the total principal amount of debt owed to EssigPR. Rather, the arrangement had the effect of establishing new payoff terms for that portion of the debt owed to EssigPR under the Note.

On April 2, 2015, the Short Term Note was amended to extend the due date by three months from April 10, 2015 to July 10, 2015. EssigPR was awarded 2,500 fully vested stock options to purchase SofTech common stock at \$1.00 per share. The stock options will expire on April 2, 2025 if not exercised.

During the three months ended August 31, 2015, the Short Term Note was amended to extend the due date to October 10, 2015 and to increase the borrowings by \$200,000 in exchange for 2,500 fully vested stock options to purchase SofTech common stock at \$1.00 per share. The stock options will expire on July 15, 2025 if not exercised.

During the three months ended November 30, 2015, the Short Term Note was amended to extend the due date to January 10, 2016 and to increase the borrowings by \$254,000.

On January 8, 2016, the Short Term Note was amended to extend the due date to April 10, 2016.

On the occurrence and continuance of an event of default under the Note that is not cured after written notice from EssigPR, all or any part of the indebtedness under the Note may become immediately due at the option of EssigPR. Under the Note, events of default are (1) a default in the payment of any money owed by the Company to EssigPR under the Note or in any other transaction or (2) a default in the Company's performance of any obligation to EssigPR under the Note or any other agreement between the two parties, whether such agreement is presently existing or entered into in the future. If the Company dissolves, becomes insolvent, or makes an assignment for the benefit of creditors, all such indebtedness under the Note shall become automatically due and payable.

EssigPR is owned by Joseph P. Daly, a related party of the Company whose beneficial ownership was approximately 19.6% of the Company's outstanding common stock as of November 30, 2015.

SHORT TERM ADVANCES FROM RELATED PARTIES

Robert Anthonyson, an Officer, Director and beneficial owner of 19.5% of Company common shares as of November 30, 2015, loaned the Company \$50,000 on July 29, 2015 which was repaid to Mr. Anthonyson during the second quarter of fiscal year 2016. Joseph Mullaney, an Officer, Director and beneficial owner of 11.2% of Company common shares as of November 30, 2015, loaned the Company \$19,300 on September 1, 2015 which was repaid during the second quarter of fiscal year 2016.

BLUEVINE

In September 2015, the Company arranged for a credit line of up to \$80,000 with BlueVine Capital, Inc. (BlueVine). The borrowing arrangement with BlueVine as the lender allows the Company to receive an advance of 85% of the total value of specified invoices. During the three month period ended November 30, 2015 the Company received advances totaling approximately \$27,000 against three invoices from one customer. These three invoices were paid subsequent to November 30, 2015.

Subsequent to the end of the fiscal quarter, the Company received an advance of \$23,000 from BlueVine under the above described credit line against four invoices from one customer. These four invoices were also repaid subsequent to November 30, 2015.

E. NOTE RECEIVABLE, RELATED PARTY

Joseph Mullaney, the Company s CEO, was extended a non-interest bearing note in the amount of \$134,000 related to a stock transaction in May, 1998. The note is partially secured by the Company stock acquired in that transaction. The Company does not expect repayment within the next twelve months.

F. STOCK PURCHASE AGREEMENT

In June 2013, the Company purchased 170,000 shares of common stock from Greenleaf, The Ronda E. Stryker and William D. Johnston Foundation, and The L. Lee Stryker 1974 Irrevocable Trust fbo Ronda E. Stryker, for a purchase price of \$62,900 or \$0.37 per share as detailed in Note K to the consolidated financial statements as of May 31, 2013. On August 8, 2014 the Company repurchased Greenleaf's remaining 101,411 shares at \$0.37 per share for a total of approximately \$37,000.

G. SUBSEQUENT EVENTS

The Company has evaluated all events and transactions that occurred after the balance sheet and through the date that the financial statements were issued.

Subsequent to the end of the fiscal quarter, the Company received an advance of \$23,000 from BlueVine under the above described credit line against four invoices from one customer. These four invoices were also repaid subsequent to November 30, 2015.

On January 8, 2016, the Short Term Note between the Company and EssigPR was amended to extend the due date by three months from January 10, 2016 to April 10, 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This report includes forward-looking statements. These forward-looking statements are often identified by words such as may, will, should, could, would, expect, intend, plan, anticipate, believe, estimate, similar expressions. These statements are only predictions and involve estimates, assumptions and uncertainties that could cause actual results to differ materially from those expressed. You should not place any undue reliance on these forward-looking statements.

You should be aware that our actual results could differ materially from those contained in forward-looking statements due to a number of factors, including our ability to:

- generate sufficient cash flow from our operations or other sources to fund our working capital needs and growth initiatives;
- maintain good relationships with our lenders;
- comply with the covenant requirements of our loan agreements;
- successfully introduce and attain market acceptance of any new products and/or enhancements of existing products;
- attract and retain qualified personnel;
- prevent obsolescence of our technologies;
- maintain agreements with our critical software vendors;
- secure renewals of existing software maintenance contracts, as well as contracts with new maintenance customers; and
- secure new business, both from existing and new customers.

The forward-looking statements speak only as of the date on which they are made, and, except to the extent required by federal securities laws, we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. References in this prospectus to the Company, we, our, and us refer to the registrant, SofTech, Inc., and its wholly owned subsidiaries.

The following discussion and results of operations should be read in conjunction with the consolidated financial statements and the notes to those statements included in the previously filed Form 10-K. This discussion includes forward-looking statements that involve risk and uncertainties.

Overview

We operate in one reportable segment and are engaged in the development, marketing, distribution and support of computer software solutions that enable companies to manage the entire lifecycle of their products from conception through design and manufacture, to service and disposal, all of which is known in the industry as Product Lifecycle Management (PLM). These solutions include software technology offerings for Computer Aided Design (CAD), which we describe below as the *CADRA* product offering and Product Data Management (PDM) and collaboration technologies, which we describe below as our *ProductCenter* and *Connector* technologies. The *CADRA* technology is marketed by the Company in Europe (other than Germany) under the terms of a distribution agreement (the Distributorship Agreement) with Mentor Graphics Corporation (Mentor), which acquired that technology from us in October 2013. In addition, we offer a technology platform that allows for data exchange between various third party technology offerings which we describe as our *Connector* offering. We deliver these enterprise level PLM solutions, with comprehensive out-of-the-box capabilities, to meet the needs of manufacturers of all sizes quickly and cost-effectively. Our operations are organized geographically in the U.S. and Europe. We have sales and customer support offices in the U.S. and Italy. We also operate through resellers in North America, Europe and Asia. For geographical information about our operating revenues and assets, see Note E to the consolidated financial statements included in the Company s Form 10-K for the fiscal year ended May 31, 2015.

The Company has been actively engaged in acquiring and filing new patent applications, evaluating alternatives for monetizing its existing patents and investigating the acquisition of specific patents already awarded that might enhance our value. It is expected that this kind of activity will become an increasing area of focus and investment over the coming years.

Developing HomeView Technology

One such patent filed in 2012 described an information management system for the residential property market. During fiscal 2015 and 2016 we have invested a substantial amount of time in, among other things, researching this market, reviewing various business models, creating specifications for the technology and developing the technology. Our plans are to offer this technology, under the name HomeView , as a hosted solution wherein the software would reside on our servers. By the end of the second quarter of fiscal 2015 we had completed the preliminary project stage and met the other conditions for capitalizing development costs under ASC 350-40. While this technology is aimed at the needs of the residential property market, the skillsets of our PLM engineers are very similar to the requirements for this technology.

In December 2015, the mobile version of HomeView was approved on iTunes and is now available for download at no charge. We are continuing to develop the technology and expect multiple new releases for the foreseeable future. We expect to be introducing this product to the market in the third quarter of fiscal 2016, through attendance and participation at multiple trade events as well as conducting other market outreach activities.

ProductCenter

From fiscal years 2006 through 2014 our ProductCenter technology experienced year over year revenue declines. We identified multiple causes for this historical negative revenue trend including, among other things: (i) an increased number of competitive offerings in the marketplace, (ii) elongation of purchase decisions by customers of a technology that already had a long sales cycle, and (iii) uncertain economic conditions. ProductCenter revenue increased in fiscal 2015 by 14.6% as compared to the prior fiscal year. For the three and six months ended November 30, 2015, ProductCenter product line revenue increased 16.4% and 14.9% from the same periods in the prior fiscal year.

This is the fifth consecutive fiscal quarter in which ProductCenter revenue experienced double-digit revenue growth as compared to the same period in the prior fiscal year. The percentage increases ranged from 13.0% in the three month period ended August 31, 2015 compared to the same period in the prior year to 34.8% in the three month period ended May 31, 2015 compared to the same period in the prior year. The growth has come from existing customers that have expanded their usage of the technology. While the pipeline signals continued growth, the timing of orders has been difficult to predict accurately in the past.

Connector

The Connector technology is offered only as an annual subscription. During fiscal year 2015, subscription billings increased by 38.4% as compared to the same period in the prior fiscal year. For the three and six months ended November 30, 2015, subscription billings increased by 433% and 95.6%, respectively, as compared to the same periods in the prior fiscal year.

CADRA Sale

CADRA is a drafting and design software package for the professional mechanical engineer.

On October 18, 2013, the Company sold substantially all of the assets of its CADRA product line, including all intellectual property related to that technology but specifically excluding cash, billed accounts receivable and liabilities other than the deferred maintenance liability associated with CADRA customer maintenance contracts for support services (the CADRA Sale), to Mentor pursuant to an Asset Purchase Agreement dated August 30, 2013 (the Asset Purchase Agreement). The aggregate consideration for the CADRA Sale is up to \$3.95 million, which is comprised of (i) \$3.2 million, \$2.88 million of which was paid on the closing date and \$320,000 (representing a 10% holdback) payable on the one year anniversary of the closing date subject to any indemnification claims, (the Holdback Payment), and (ii) earn-out payments of up to an aggregate \$750,000 over the three-year period subsequent to the closing date (the Earn-Out Payments), based on 10% of the net revenue generated by the CADRA business, subject to the terms of the Earn-Out Agreement dated August 30, 2013 (the Earn-Out Agreement). The Holdback Payment of \$320,000 was received on October 20, 2014. No indemnification claims against the Company were made by Mentor during the period of indemnification which has now expired. Mentor has paid the Company \$327,000 of the maximum \$750,000 of Earn-Out Payments related to CADRA revenue generated by Mentor from the transaction date to January 31, 2015.

In conjunction with completing the CADRA Sale, the Company entered into a one-year, exclusive Distributorship Agreement with Mentor allowing us to market and support the CADRA technology as a reseller throughout Europe (except Germany) at a thirty percent (30%) gross margin. That arrangement was extended through January 31, 2016 on a non-exclusive basis. Under the new arrangement gross margin on software remained at 30% and the gross margin on support contracts increased to 35% or 40% dependent on volume.

We are in the process of restructuring our business subsequent to the CADRA Sale to enable us to successfully operate as a significantly smaller company and to seek new sources of revenue and possible new strategic initiatives. We currently contemplate pursuing the activities described below and other strategic initiatives that the board of directors may subsequently determine are in the best interests of the shareholders.

Activities following the CADRA Sale

PLM Business

Subsequent to the completion of the CADRA Sale, we have continued to offer our ProductCenter and Connector technologies to design and manufacturing companies. Our ProductCenter technology manages the engineering data and electronic files of discrete parts designed in third party proprietary design technologies offered primarily by SolidWorks, PTC and Autodesk. The Connector platform is a technology that allows for a direct interface between Aras Innovator, a third-party PLM solution which features modern, web-based technology, and various well-established CAD technologies. The Aras technology is offered under a subscription revenue model as is our Connector technology. We entered into a partnership agreement with Aras in 2012, pursuant to which we provide distribution and consulting services, as further described below. For a description of the risks related to our PLM business, see **Risk Factors** **Risks Related to Our Business** in our Form 10-K for fiscal year 2015.

Distribution Activity

In connection with the CADRA Sale, we entered into a Distribution Agreement with Mentor to market and support the CADRA technology throughout Europe (except Germany), for a minimum of one year following the sale, through its wholly-owned subsidiary in Italy, SofTech, Srl. As described above, we have extended this agreement on a non-exclusive basis through January 31, 2016. The margin to be earned by SofTech for this distribution activity pursuant to the existing Distributorship Agreement was consistent with the margin earned by distributors in the industry. In addition, we will continue to market and distribute third party technologies from Aras as we have since 2012.

Consulting

SofTech has been engaged in the PLM market since 1993. Our consulting group is composed of deeply experienced, long tenured experts solving very complex problems relating to data migration, customization, data control, access, version control, connectivity between proprietary systems and a myriad of other problems encountered by our customers.

Exploring Strategic Initiatives

A core tenet of the management team's strategy following the Recapitalization Transaction in 2011 has been to actively consider ways to monetize some or all of SofTech's assets and to pursue new strategic initiatives, such as potential business combinations, sale transactions or strategic partnerships.

Developing Remaining Patent Estate. The Company has filed three provisional patents and purchased the rights to one provisional patent since March 2011. These patents remain in process at the United States Patent and Trademark Office, and the Company intends to continue to pursue the resolution to these filings. These patents generally relate to methods of accumulating buyers' information in a database in ways that allow the information to be shared with sellers so as to allow the sellers to make targeted, relevant offers to the buyers. While these patents, which could generally be considered eCommerce related, pertain to technologies that are not directly related to our historical revenue producing business activities, we believe they may have applications in those areas.

Analyzing the potential of the technologies described in these patents and the business case for us to invest in efforts to commercialize any of them is part of an ongoing evaluation. While many of these businesses would be new to us, we believe that we possess underlying competencies from our existing businesses, such as strong engineering and software capabilities especially in database technologies, and other attributes, such as numerous long-term client relationships with technology companies that may be complementary to developing new businesses around these technologies. However, any investment by us to attempt to commercialize the technologies described in these patents could be costly and prove to be unsuccessful.

As detailed above, under the caption *Overview Developing HomeView Technology*, during fiscal year 2015 and 2016 we have invested a substantial amount of time in pursuing a data management offering for the residential property market. The product idea was detailed in a patent filing in 2012 that has yet to be awarded. We expect to introduce this technology to the market in the third quarter of fiscal 2016.

Strategic Transactions. We will continue to evaluate business combinations and other sale opportunities. We believe that, in addition to our remaining businesses and prospects described above, our status as a publicly traded company and tax attributes could make us an attractive strategic partner. As of May 31, 2015, SofTech had approximately \$21 million in federal tax attributes and approximately \$4 million in state tax attributes. We will continue to seek strategic transactions for the benefit of our shareholders, but there can be no assurances in this regard.

Other

Deferred CADRA Purchase Price. The sale of the CADRA assets includes contingent Earn-Out Payments equal to 10% of Mentor's revenue derived from the CADRA technology up to a maximum of \$750,000 over the three year period following completion of the transaction (ending October 31, 2016). Therefore, SofTech has a direct financial interest in the continued success of the CADRA technology subsequent to the sale. For the period from October 16, 2013 through October 31, 2015, Mentor has reported Earn-Out Payments of approximately \$469,000, a portion of which have been paid in accordance with the Earn-Out Agreement. Mentor has reported to us that its CADRA revenue over the more recent quarters has been trending down significantly, and as a result, our revenue forecast for the remaining twelve months of the earn-out period has been reduced.

The foregoing are the currently anticipated activities of the Company following the CADRA Sale. There can be no assurances that our pursuit of these activities will be successful. Furthermore, we may pursue other opportunities that we subsequently determine to be in the best interests of the Company.

Critical Accounting Policies and Significant Judgments and Estimates

The Securities and Exchange Commission (SEC) issued disclosure guidance for critical accounting policies. The SEC defines critical accounting policies as those that require the application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

Our significant accounting policies are described in Note B to the consolidated financial statements for the fiscal year ended May 31, 2015 included in our previously filed Form 10-K. There have been no changes to the policies for the three and six months ended November 30, 2015.

Results of Operations

Edgar Filing: SOFTECH INC - Form 10-Q

The table below presents the comparative statements of operations for the three month periods ended November 30, 2015 and November 30, 2014 along with the dollar and percentage change amounts for each revenue and expense item (expressed in thousands, except percentages):

	November 30, 2015	November 30, 2014	Change in \$	Change in %
Revenue:				
Products	\$ 354	\$ 199	\$ 155	77.9%
Services	950	828	122	14.7
Total revenue	1,304	1,027	277	27.0
Cost of revenue:

Revenue

The following table summarizes total revenue by product line for the three month periods ended November 30, 2015 and November 30, 2014 (in thousands, except percentages):

Product Line	November 30,		\$ Change	% Change
	2015	2014		
ProductCenter	\$ 1,003	\$ 862	\$ 141	16.4%
Connector	57	32	25	78.1
CADRA	121	130	(9)	(6.9)

Edgar Filing: SOFTECH INC - Form 10-Q

Other third party products		123		3		120		4000.0
Total	\$	1,304	\$	1,027	\$	277		27.0%

The following table summarizes total revenue by product line for the six month periods ended November 30, 2015 and November 30, 2014 (in thousands, except percentages):

Product Line	November 30,		\$ Change	% Change				
	2015	2014						
ProductCenter	\$	1,744	\$	1,518	\$	226		14.9%
Connector		116		81		35		43.2
CADRA		236		286		(50)		(17.5)
Other third party products		189		6		183		3050.0
Total	\$	2,285	\$	1,891	\$	394		20.8%

The product line revenue is further broken down by revenue type hereunder with explanations for changes in the three and six month periods ended November 30, 2015 as compared to the same periods in fiscal 2015.

Product Revenue

Product revenue for the three and six months ended November 30, 2015 was approximately \$354,000 and \$408,000, as compared to approximately \$199,000 and \$270,000 for the same period in the prior fiscal year, an increase of about 77.9% and 51.1%, respectively. The table below details product revenue by product line for the three month periods ended November 30, 2015 and 2014 (in thousands, except percentages):

Product Line	November 30,		\$ Change	% Change
	2015	2014		
ProductCenter	\$ 344	\$ 193	\$ 151	78.2%
CADRA	10	6	4	66.7
Total	\$ 354	\$ 199	\$ 155	77.9%

The table below details product revenue by product line for the six month periods ended November 30, 2015 and 2014 (in thousands, except percentages):

Product Line	November 30,		\$ Change	% Change
	2015	2014		
ProductCenter	\$ 378	\$ 245	\$ 133	54.3%
CADRA	21	25	(4)	(16.0)
Other third party products	9	—	9	—
Total	\$ 408	\$ 270	\$ 138	51.1%

The revenue increase for ProductCenter product revenue during the second quarter resulted from several existing customers expanding their use of the technology. These orders from existing customers in the first half of the current fiscal year resulted in volume in excess of annual licensing activity for this product line for fiscal years 2011 through 2014 and the best quarterly production since fiscal 2009. We believe the pipeline of qualified proposals signals continued product revenue growth relative to the prior fiscal year for this product line although estimating the quarter in which these proposals may generate purchase orders, if at all, cannot be accurately forecasted.

Service Revenue

Edgar Filing: SOFTECH INC - Form 10-Q

Our service revenue is composed of annual software maintenance and subscription contracts and consulting revenue generated primarily from our ProductCenter technology. The table below summarizes service revenue by product line for the three months ended November 30, 2015 and 2014, (in thousands, except percentages):

Product Line	2015	2014	\$ Change	% Change
ProductCenter	\$ 659	\$ 669	\$ (10)	(1.5)%
Connector	57	32	25	78.1
CADRA	111	124	(13)	(10.5)
Other	123	3	120	4000.0
Total	\$ 950	\$ 828	\$ 122	14.7%

The table below summarizes service revenue by product line for the six months ended November 30, 2015 and 2014 (in thousands, except percentages):

Product Line	2015	2014	\$ Change	% Change
ProductCenter	\$ 1,366	\$ 1,273	\$ 93	7.3%
Connector	116	81	35	43.2
CADRA	215	261	(46)	(17.6)
Other	180	6	174	2900.0
Total	\$ 1,877	\$ 1,621	\$ 256	15.8%

Maintenance and subscription revenue was approximately \$657,000 and \$1,304,000 for the three and six month periods ended November 30, 2015, as compared to \$614,000 and \$1,249,000 for the same period in the prior fiscal year, an increase of approximately 7.0% and 4.4%, respectively. For the three months ended November 30, 2015 compared to the same period in the prior fiscal year, maintenance revenue from ProductCenter and CADRA were generally unchanged while subscription revenue from the Connector and from third party products we distribute contributed equally to the \$43,000 increase. For the six month period ended November 30, 2015 compared to the same period in the prior fiscal year ProductCenter maintenance revenue increased 1.6%, CADRA maintenance revenue declined 15.0% primarily due to the weakness in the Euro relative to the USD and Connector subscription revenue increased 79.6%. During the same six month period, maintenance and subscription revenue related to third party products we distribute increased to \$43,000 from just \$6,000 in the prior fiscal year.

Our Connector technology is offered only as an annual subscription. Under these arrangements the subscriber pays upfront for the use of the technology for the subsequent twelve month period and the revenue is amortized evenly during the use period. For the three months ended November 30, 2015 our Connector subscription billings were approximately \$48,000 as compared to \$9,000 in the same period in the prior year. For the six month period ended November 30, 2015 our Connector subscription billings were approximately \$88,000 as compared to \$45,000 in the same period in the prior fiscal year. In the first half of the current fiscal year we added six new subscribers. Given the Aras Innovator installed base and what we perceive to be continuing market momentum for this technology we expect our Connector subscription business to continue to grow, although there can be no assurances that the revenue increase in the most recent quarter is sustainable.

Consulting revenue was approximately \$293,000 and \$573,000 for the three and six months ended November 30, 2015, respectively, an increase of approximately 36.9% and 54.0%, from the same period in the prior fiscal year. These professional services are generated primarily from our existing ProductCenter customers. However, the Connector technology and the third party PLM solutions we are distributing present us with consulting opportunities that we might not otherwise be aware of and we expect these opportunities to be a growing portion of the consulting group's activity.

The increased consulting revenue in the current quarter and for the six month period ended November 30, 2015 relative to the same period in the prior fiscal year was primarily due to a unique project we were awarded in May 2015 from our largest European customer. The project involves the implementation of several third party technologies in a test environment to create a central repository for engineering bill of materials for the customer's complex products. The creation of the central repository will allow for improvement in querying parts and vastly improved viewing of finished products.

Gross Margin

Gross margin as a percentage of revenue was 66.0% and 62.8% for the three and six month periods ended November 30, 2015, respectively, as compared to 54.3% and 53.6% in the same periods in the prior fiscal year. The increase in

overall gross margin in each of these periods is due primarily to the increase in product revenue of approximately 78% and 51% in the three and six month periods ended November 30, 2015 as compared to the same periods in the prior fiscal year, respectively, while incurring reduced product cost of revenue. The reduced cost was related to lower non-cash expenses from capitalized software costs in previous periods becoming fully amortized. The Company also improved its gross margin on its services offerings in each of the three and six month periods ended November 30, 2015 as compared to the same periods in the prior fiscal year which also contributed to the overall gross margin improvement.

Research and Development Expenses

Research and development expenses were approximately \$137,000 and \$291,000 for the three and six month periods ended November 30, 2015, respectively, as compared to approximately \$222,000 and \$494,000 in the comparable periods in fiscal 2015. During the three and six month period ended November 30, 2015 approximately \$113,000 and \$231,000 of software development costs related to the development of new products were capitalized. During the three and six month period ended November 30, 2014, no development costs were capitalized.

Selling, General and Administrative Expenses

Selling, general and administrative (SG&A) expenses were approximately \$634,000 and \$1,233,000 for the three and six month periods ended November 30, 2015, respectively, as compared to approximately \$645,000 and \$1,362,000 for the comparable periods in fiscal year 2015, a decrease of approximately 1.7% and 9.5%. The revenue increase for the three and six month periods ended November 30, 2015 as compared to the same periods in the prior fiscal year resulted in increased variable expenses related to bonuses and commissions. These increased variable expenses were offset by reduced professional fees related to litigation that ended in the prior fiscal year.

Gain on sale of product line

During the three month period ended November 30, 2015, the Company wrote down the fair value of the Earn-Out Payments by \$61,000 based on an independent valuation. The write down was required due to a material decline in the CADRA revenue as reported to the Company by Mentor. Under the terms of the Earn-Out Agreement, the Company is due 10% of the net revenue recorded by Mentor during the three year period from October 19, 2013 through October 31, 2016. Mentor has reported to us its CADRA revenue from October 19, 2013 through October 31, 2015 which amounted to approximately \$4.69 million but has been trending down significantly over the more recent quarters. Based on the most recent revenue trend, the CADRA revenue forecast on which the Earn-Out Payments are based for the remaining twelve months has been reduced resulting in the write down this quarter.

Interest Expense

Interest expense for the three and six month periods ended November 30, 2015 was approximately \$28,000 and \$41,000, respectively, as compared to approximately \$63,000 and \$127,000, for the comparable periods in the prior fiscal year. The average debt outstanding for the three and six month periods ended November 30, 2015 was approximately \$896,000 and \$705,000 compared to approximately \$988,000 and \$1.6 million from the comparable periods in the prior fiscal year. The decrease in average debt outstanding was the primary reason for the reduction in interest expense. Also during the three and six month periods ended November 30, 2014, the Company expensed approximately \$18,000 of non-cash interest expense related to the extinguishment of warrants issued to Pride s Crossing Capital.

Net Loss

The net loss for the three and six month periods ended November 30, 2015 was approximately (\$22,000) and (\$196,000) or (\$0.02) and (\$0.22) per share, respectively, as compared to net loss of approximately (\$379,000) and (\$952,000) or (\$0.44) and (\$1.08) per share for the comparable periods in the prior fiscal year.

Liquidity and Capital Resources

During the six month period ended November 30, 2015 the net cash used in operating activities totaled approximately \$514,000 as compared to approximately \$1.5 million in the comparable prior period. The net loss for the quarter adjusted for non-cash expenditures used approximately \$22,000 as compared to approximately \$703,000 in the comparable prior period. The net change in current assets and liabilities used \$492,000 during the six month period composed primarily of a reduction in the deferred maintenance liability, an increase in account receivable and an

increase in accounts payable and accrued expenses. The decline in the deferred maintenance liability is cyclical with the majority of the annual maintenance contracts being billed in the third and fourth quarters of the fiscal year.

Net cash used in investing activities for the six months ended November 30, 2015 was approximately \$253,000, primarily composed of capitalized software development costs related to new products and capital expenditures compared to approximately \$316,000 provided by investing activities in the prior fiscal year.

Net cash provided by financing activities for the six months ended November 30, 2015 totaled approximately \$523,000 composed primarily of an increase of \$454,000 in the short term borrowing arrangement with EssigPR, Inc., a Puerto Rico corporation (*EssigPR Note*).

In September 2015, the Company issued 10,000 shares of the Company's common stock at a purchase price of \$5.00 per share to an accredited investor in a private placement transaction for total proceeds of \$50,000. This transaction was completed pursuant to a Securities Purchase Agreement entered into with the investor. In lieu of registration rights, the investor is entitled to a fee of \$5,000 to be paid in eight equal quarterly installments during the twenty-four month period (the *Payment Period*) following the investment. The Securities Purchase Agreement also provides the investor with the right to require the Company to redeem the Common Stock held by such investor for \$7.00 per share in cash for a 30-day period following the *Payment Period*.

Capital Resource Activity

EssigPR Note. On June 20, 2014, the Company entered into a three (3) year promissory note agreement (the *Note*) with EssigPR, Inc. (*EssigPR*), a Puerto Rico corporation, as the lender. The *EssigPR Note* is a \$750,000 term loan maturing on April 1, 2017, that accrues interest at a 9.5% interest rate, paid quarterly in arrears. The principal on the *EssigPR Note* was to be repaid from the Holdback Payment and Earn-Out Payments in connection with Mentor's purchase of the CADRA product line from SofTech pursuant to the Asset Purchase Agreement.

On October 1, 2014, the Company entered into an additional short term borrowing arrangement with EssigPR (Short Term Note) whereby it was agreed that the Company would retain \$300,000 of the Holdback Payment due from Mentor in October 2014 rather than utilize those monies to pay down the above described Note. The interest rate on the Short Term Note is 9.5%, payable quarterly in arrears. The Short Term Note could be repaid at any time without penalty and was due in full on April 10, 2015. EssigPR was awarded 5,000 fully vested stock options to purchase SofTech common stock at \$1.00 per share. The stock options will expire on October 1, 2024 if not exercised. The Short Term Note arrangement did not increase the total principal amount of debt owed to EssigPR. Rather, the arrangement had the effect of establishing new payoff terms for that portion of the debt owed to EssigPR under the Note.

On April 2, 2015, the Short Term Note was amended to extend the due date by three months from April 10, 2015 to July 10, 2015. EssigPR was awarded 2,500 fully vested stock options to purchase SofTech common stock at \$1.00 per share. The stock options will expire on April 2, 2025 if not exercised.

On July 15, 2015, the Short Term Note was amended again to extend the due date by three months from July 10, 2015 to October 10, 2015. EssigPR was awarded 2,500 fully vested stock options to purchase SofTech common stock at \$1.00 per share. The stock options will expire on July 15, 2025 if not exercised.

On October 16, 2015, the Short Term Note was amended again to increase the borrowings from \$300,000 to \$700,000 and to extend the due date from October 10, 2015 to January 10, 2016. On November 30, 2015, the Short Term Note was again amended to increase the borrowings from \$700,000 to \$754,000.

On January 8, 2016, the Short Term Note was amended again to extend the due date from January 10, 2016 to April 10, 2016.

On the occurrence and continuance of an event of default under the Note that is not cured after written notice from EssigPR, all or any part of the indebtedness under the Note may become immediately due at the option of EssigPR. Under the Note, events of default are (1) a default in the payment of any money owed by the Company to EssigPR under the Note or in any other transaction or (2) a default in the Company's performance of any obligation to EssigPR under the Note or any other agreement between the two parties, whether such agreement is presently existing or entered into in the future. If the Company dissolves, becomes insolvent, or makes an assignment for the benefit of creditors, all such indebtedness under the Note shall become automatically due and payable.

EssigPR is owned by Joseph P. Daly, a related party of the Company whose beneficial ownership was approximately 19.6% of the Company's outstanding common stock as of November 30, 2015.

In addition to the borrowing arrangements with EssigPR and Joe Daly, the Company obtained a credit line of \$80,000 from BlueVine Capital, Inc. (BlueVine). This facility allows for short term advances of up to 85% of the face value of customer invoices that meet certain parameters specified and approved by BlueVine.

Short term advances from related parties. Robert Anthonyson, an Officer, Director and beneficial owner of 19.5% of Company common shares as of November 30, 2015, loaned the Company \$50,000 on July 29, 2015 which was repaid to Mr. Anthonyson during the second quarter of fiscal year 2016. Joseph Mullaney, an Officer, Director and beneficial owner of 11.2% of Company common shares as of November 30, 2015, loaned the Company \$19,300 on September 1, 2015 which was repaid during the second quarter of fiscal year 2016.

Capital Requirements for Business

As detailed above, under the caption *Overview Developing HomeView Technology*, the Company has made a significant investment during fiscal years 2015 and 2016 in the development of a new technology addressing the residential property market. We expect to introduce this product to the market in the third quarter of this fiscal year. The Company expects that additional capital will be required to fund this launch effectively.

The Company has been investigating various alternatives for raising this needed capital. While debt is one of those alternatives, the Company believes that some form of equity infusion is more appropriate given that the new product has not yet demonstrated market acceptance or proven its revenue model.

Another possible alternative to selling additional common shares or incurring debt may be to raise the necessary capital through the sale of one or more of the Company's existing revenue producing product lines. At this time, we do not know what alternatives will be available to us and no decision has been made on the best alternative available and any capital raising activity must factor in the results from the beta testing and the impact those results will have on the timetable for commercial launch. There can be no assurance that we can raise the necessary capital on reasonable terms. If the Company is unable to raise the necessary capital, its plans for maximizing the return on the capital invested in the new product and for establishing a new revenue source may be materially negatively impacted.

The consolidated financial statements have been prepared on a basis that contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company's long-term viability is dependent on its ability to generate sufficient product revenue, net income and cash flows from operations to support its business as well as its ability to obtain additional capital. Management's plans also include reducing operating costs and delaying certain expenditures, if necessary, to maintain the Company's liquidity.

The Company had a cash balance of approximately \$104,000 as of November 30, 2015. Management believes that with its available cash and current operating plan that projects cash generation from future operations it will have sufficient cash to meet the Company's working capital and capital expenditure requirements through at least the next twelve months. There can be no assurance, however, that the Company will not require additional financing in the future if funds from future operations or estimated expenses differ materially from those amounts estimated by management. If we were required to obtain additional financing in the future, there can be no assurance that sources of capital would be available on terms favorable to us, if at all.

Capital Requirements for Redeemable Common Stock

As described below, during calendar year 2016, the Company has substantial repurchase obligations relating to shares of common stock sold in various private placements, including \$420,000 of financial obligations with respect to shares of common stock that may be put to the Company in second quarter of fiscal year 2017.

Pursuant to the terms of prior private placements, we have outstanding 180,000 shares of our common stock that were sold at a purchase price of \$5.00 per share and each investor may, beginning on various dates in fiscal 2017 and fiscal 2018, require us to repurchase such investor's shares at \$7.00 per share, as indicated below:

Repurchase Period	No. of Shares Subject to Repurchase	Purchase Price (per share)	Repurchase Price (per share)	Aggregate Repurchase Price
9/18/16 - 10/18/16	20,000	\$5.00	\$7.00	\$140,000
9/22/16 - 10/22/16	30,000	\$5.00	\$7.00	\$210,000
10/9/16 - 11/8/16	10,000	\$5.00	\$7.00	\$70,000
6/20/17 - 9/18/17	110,000	\$5.00	\$7.00	\$770,000
9/21/17 - 10/21/17	10,000	\$5.00	\$7.00	\$70,000
Total:	180,000			\$1,260,000

If we are unable to honor the put right with respect to 110,000 of such shares (a financial obligation of \$770,000), the unpaid portion converts into a loan obligation secured by all our assets and bearing interest at an annual rate of 20%.

If we default on our obligations under such note, the holder of such note may assert any rights it has as a secured creditor, including rights to foreclose on our assets.

Item 3. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, we recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as ours are designed to do, and we necessarily were required to apply our judgment in evaluating the cost-benefit relationship of possible changes or additions to our controls and procedures.

As of the end of the period covered by this report (November 30, 2015), we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of the disclosure controls and procedures, as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting. There have been no changes in our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1A. RISK FACTORS

Our business is subject to numerous risks. We caution you that the following important factors, among others, could cause our actual results to differ materially from those expressed in forward-looking statements made by us or on our behalf in filings with the SEC, press releases, communications with investors and oral statements. Any or all of our forward-looking statements in the Annual Report on Form 10-K and in any other public statements we make may turn out to be wrong. They can be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties. Any factors mentioned in the discussion below will be important in determining future results. Consequently, no forward-looking statement can be guaranteed. Actual future results may differ materially from those anticipated in forward-looking statements. We undertake no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosure we make in our reports filed with the SEC.

Risks Related to Our Business

Following the sale of the CADRA business in October 2013, we have been and will continue to restructure our business to enable us to successfully operate as a significantly smaller company and to seek new sources of revenue and new strategic initiatives. SofTech operating results subsequent to the sale of the CADRA business may not be profitable, and we may be unsuccessful in developing new business opportunities.

The CADRA business was responsible for about half of the consolidated revenue in fiscal 2013 and the majority of the profitability and cash flow. The importance of the CADRA business to the consolidated results in fiscal 2013 was similar in at least the two immediately preceding fiscal years. The remaining product lines following the CADRA Sale, namely ProductCenter and the Connector technologies, are product lines that have historically been less profitable than the CADRA business, have fewer customers and have a more complex sales cycle. It is likely that the Company will need to reduce spending in order to achieve profitability, and ultimately will need to find new strategic directions and new sources of revenue in order to meaningfully increase the size of its business. The new product ideas that the management team has interest in pursuing as described in the patent filings over the last few years are speculative in that the products are still in development and the management team may not have the depth of experience required to be successful in those new markets.

We will need additional capital to continue to develop and launch our HomeView technology and launch this new product.

We generated positive cash flow as measured by EBITDA, a non-GAAP measure, every fiscal year from 2002 through 2014. The sale of the CADRA product line in fiscal 2014 together with the investment made in 2015 and 2016 to develop a new product for the residential property market has resulted in current year cash losses that have been funded by our balance sheet, sales of common stock and limited additional borrowings. As beta testing is completed on our new product offering, additional capital will be required for the commercial launch. There can be no assurance that the capital needed will be available or if the terms will be reasonable. If the Company is unable to raise the necessary capital, its plans for maximizing the return on the capital invested in the new product and for establishing a new revenue source may be materially negatively impacted.

If launched during fiscal year 2016, our HomeView product may not gain enough market acceptance to warrant continued investment.

We have made a substantial investment in pursuing the HomeView product idea. If we are able to raise the additional capital we need to launch the technology, we expect that investment to continue and possibly increase in fiscal 2016. While our analysis supports the need for this kind of technology in the residential property market, there can be no assurance that HomeView will gain the number of users required to warrant the continued investment. Failure to gain market acceptance may lead to the write off of the investment made in HomeView through a charge to income.

We have substantial repurchase obligations relating to securities we sold in various private placements, which may be put to us starting in September 2016. If we are unable to meet these financial obligations, which are approximately \$1,260,000 in the aggregate, or re-negotiate their terms, our financial condition would be materially adversely affected.

Pursuant to the terms of prior private placements, we have outstanding 180,000 shares of our common stock that were sold at a purchase price of \$5.00 per share and each investor may, beginning on various dates in fiscal 2017 and fiscal 2018, require us to repurchase such investor's shares at \$7.00 per share, as indicated below:

Repurchase Period		No. of Shares Subject to Repurchase	Purchase Price (per share)	Repurchase Price (per share)	Aggregate Repurchase Price
9/18/16	10/18/16	20,000	\$5.00	\$7.00	\$140,000
9/22/16	10/22/16	30,000	\$5.00	\$7.00	\$210,000
10/9/16	11/8/16	10,000	\$5.00	\$7.00	\$70,000
6/20/17	9/18/17	110,000	\$5.00	\$7.00	\$770,000
9/21/17	10/21/17	10,000	\$5.00	\$7.00	\$70,000
Total:		180,000			\$1,260,000

If we are unable to honor the put right with respect 110,000 of such shares (a financial obligation of \$770,000), the unpaid portion converts into a loan obligation secured by all our assets and bearing interest at an annual rate of 20%.

If we default on our obligations under such note, the holder of such note may assert any rights it has as a secured creditor, including rights to foreclose on our assets.

Revenue declines in our product lines may have a material adverse impact upon our business and overall financial performance.

We have experienced consolidated revenue declines each fiscal year since 2006. The revenue declines for fiscal years 2014 and 2015, however, were primarily due to the CADRA Sale that was completed four months into fiscal year 2014.

Revenue from our ProductCenter technology declined for eight straight fiscal years from fiscal year 2006 through fiscal year 2014. In fiscal year 2015, ProductCenter revenue increased by 14.6% compared to the prior fiscal year and in the first six months of fiscal year 2016 ProductCenter revenue experienced a 14.9% increase compared to the prior fiscal year. The backlog, pipeline of active deals and contract awards indicate that the double digit revenue growth is likely to continue for fiscal 2016, although there can be no assurances in that regard. The revenue declines described above were due to several factors. In July 2007, PTC informed us that it would not renew its partnership agreement with us when the agreement expired in January 2008. We had been a member of the PTC partnership program for 12 years. The PTC partnership agreement, among other things, provided us with the right to distribute certain information that allowed for our technology to directly interface with PTC's proprietary CAD tools. The non-renewal has essentially prevented us from marketing our ProductCenter solution to new customers that utilize PTC's technology and has negatively impacted our product revenue from this technology offering. In addition to the PTC partnership termination, ProductCenter revenues have been negatively affected by: (i) an increased number of competitive offerings in the marketplace, (ii) elongation of purchase decisions by customers of a technology that already has a long sales cycle, and (iii) uncertain economic conditions. The recent increases in ProductCenter revenue has come from existing customers expanding their use of the technology. It is difficult for the Company to determine if the current year revenue increase is sustainable.

Subscription revenue from our Connector technology increased by approximately 79.6% in the first six months of fiscal year 2016 compared to the same period in the prior year. We added six new customers and we hope to continue to build on that momentum. This solution is offered only as a subscription which makes revenue growth a more likely event year-over-year as compared to the perpetual license model employed with our ProductCenter technology. The customers for our Connector technology are Aras Innovator (a third party PLM solution) users that have already made the investment in that technology and are now trying to get more functionality from that investment. It is our understanding that Aras Innovator continues to grow at a much faster rate than the overall PLM market which provides us with an opportunity to continue to grow our Connector revenue.

While the recent revenue trend for ProductCenter is encouraging and the market acceptance for our Connector technology is building, we do not have enough broad based momentum from either technology to yet be able to definitively conclude that our historical revenue declines are behind us.

Significant future declines in our total revenues may have a material adverse impact upon our business and overall financial performance.

We compete against numerous technology companies in the mature PLM industry that are significantly larger and have vastly greater financial resources at their disposal.

Many of our competitors, including PTC, SolidWorks, Siemens and Autodesk, have substantially greater financial, technological, marketing, managerial and research and development resources and experience than we do and represent significant competition for us. Our competitors may succeed in developing competing technologies or products which may gain market acceptance more rapidly than our products. Existing or proposed products of our competitors may render our existing or proposed products noncompetitive or obsolete. If we are unable to compete successfully in the future, the competitive pressures that we face could adversely affect our profitability or financial performance.

Our agreements with certain software vendors may be terminated at will by the vendors.

We utilize third party vendors to provide certain software and utilities which help us to continue to develop and support ProductCenter customers with their integrations from ProductCenter to their respective CAD solutions. These agreements are subject to termination at will by the vendors, and, if terminated, we would need to seek alternative methods of providing continuing support to our existing customers and an alternative solution to meet the needs of prospective customers, which could have a material adverse effect on future performance. For example, in July 2007, we were informed that our agreement with one such vendor, PTC, was not going to be extended beyond its renewal date of January 31, 2008. Thus the agreement with PTC has since expired. A significant number of our current ProductCenter customers utilize PTC's proprietary CAD technology. We continue to support our current customers who are utilizing PTC's CAD solution with a customer specific consulting solution. While this customer specific consulting solution has allowed us to retain the majority of our customers utilizing PTC's CAD tool, it has precluded us from proposing our solution to new customers using that CAD technology. Our inability to offer our solution to new customers utilizing PTC's technology or similar restrictions that could result from any future terminations of similar agreements with other vendors could have an adverse effect on our future revenues.

Our ability to use our federal and state net operating loss carryforwards (NOLs) to reduce taxable income generated in the future could be substantially limited or eliminated.

As of May 31, 2015, we had approximately \$21 million of federal NOLs available to offset future taxable income, which expire in varying amounts beginning in 2022, if unused. We may not generate taxable income in time to use these NOLs prior to their expiration, and the Internal Revenue Service may not agree with the amount or timing of prior losses, thereby limiting the value of our NOLs. Furthermore, our ability to use our NOLs is subject to an annual limitation due to ownership changes that may have occurred or that could occur in the future, as determined by Section 382 of the Internal Revenue Code of 1986, as amended, as well as similar state regulations. Depending on the actual amount of any limitation on our ability to use our NOLs, our future taxable income could be subject to federal and/or state income tax, creating federal and/or state income tax liabilities. We previously maintained a tax benefits preservation plan with respect to our NOLs, which expired in February 2015.

Our quarterly results may fluctuate making our future revenue and financial results difficult to predict.

Our quarterly revenue and operating results are difficult to predict and may fluctuate significantly from quarter to quarter. Our quarterly revenue may fluctuate significantly for several reasons including: the timing and success of introductions of any new products or product enhancements or those of our competitors; uncertainty created by changes in the market; variations in the size and timing of individual orders; competition and pricing; seasonality; and customer order deferrals or cancellations as a result of general economic conditions or industry decline. Furthermore, we have often recognized a substantial portion of our product revenues in the last month of a quarter, with these revenues frequently concentrated in the last weeks or days of a quarter. As a result, product revenues in any quarter are substantially dependent on orders booked and shipped in the latter part of that quarter and revenues from any

future quarter are not predictable with any significant degree of accuracy. We typically do not experience order backlog. For these reasons, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indications of future performance.

Our financial condition could be adversely affected if significant errors or defects are found in our software.

Sophisticated software can sometimes contain errors, defects or other performance problems. If errors or defects are discovered in our current or future products, we may need to expend significant financial, technical and management resources, or divert some of our development resources, in order to resolve or work around those defects, and we may not be able to correct them in a timely manner or provide an adequate response to our customers.

Errors, defects or other performance problems in our products could cause us to delay new product releases or customer deployments. Any such delays could negatively impact our ability to realize revenue from the licensing and shipment of new or enhanced products and give our competitors a greater opportunity to market competing products. Such difficulties could also cause us to lose customers. Technical problems or the loss of customers could also damage our business reputation and cause us to lose new business opportunities.

We are dependent on key personnel whose loss could impair our operations, our product development or our sales efforts.

We are a small company especially for one that is publicly held. Our technologies are complex and have been developed over many years. While we enjoy the benefit of a very experienced, long-tenured employee group, we are dependent on many of those employees for the familiarity, expertise and unique insight they have developed with our products that would be extremely difficult and time consuming to replace. The loss of services of any of our key personnel could make it difficult for us to meet important objectives, such as timely and effective product introductions and financial goals.

We may be sued for infringing on the intellectual property rights of others.

Our ProductCenter technology was launched in the early 1990 s. Over the decades that our technologies have been in the marketplace, a significant number of patents have been filed by competitors. It is difficult if not impossible for us to monitor these patent awards to become familiar with their claims and we do not attempt to do so. Third parties may assert that we are employing their proprietary technology without authorization. There can be no assurance that we do not or will not infringe on the patent or proprietary rights of others. Parties making claims against us may be able to obtain injunctive or other equitable relief that could effectively block our ability to further develop, commercialize and sell products, and such claims could result in the award of substantial damages against us. In the event of a successful claim of infringement against us, we may be required to pay damages and obtain one or more licenses from third parties. We may not be able to obtain these licenses at a reasonable cost, if at all. In that event, we could encounter delays in product introductions while we attempt to develop alternative methods or products or be required to cease offering affected products and our operating results would be harmed.

Our sales and operations are globally dispersed, which exposes us to additional operating and compliance risks.

We sell and deliver software and services, and maintain support operations in multiple countries whose laws and practices differ from one another. For the three month periods ended November 30, 2015 and 2014, North America accounted for approximately 78.8% and 82.8%, Europe for approximately 21.0% and 17.2% and Asia for approximately 0.2% and zero of our revenue. Managing these geographically dispersed operations requires significant attention and resources to ensure compliance with laws. Accordingly, while we maintain a compliance program, we cannot guarantee that an employee, agent or business partner will not act in violation of our policies or U.S. or other applicable laws. Such violations can lead to civil and/or criminal prosecutions, substantial fines and the revocation of our rights to continue certain operations and also cause business and reputation loss.

We are obligated to maintain proper and effective internal control over financial reporting. We may not complete our analysis of our internal control over financial reporting in a timely manner, or these internal controls may not be determined to be effective, which may adversely affect investor confidence in our company and, as a result, the value of our common stock.

In December 2011, we filed a Form 8-A with the SEC in connection with the effectiveness of our registration statement (333-174818), subjecting us again to the reporting requirements under the Exchange Act. As a public company, we are required, pursuant to Section 404 of the Sarbanes-Oxley Act, to furnish a report by management on, among other things, the effectiveness of our internal control over financial reporting. This assessment includes disclosure of any material weaknesses identified by our management in our internal control over financial reporting. We may not be able to remediate future material weaknesses, or to complete our evaluation, testing and any required remediation in a timely fashion. During the evaluation and testing process, if we identify one or more material weaknesses in our internal control over financial reporting, we will be unable to assert that our internal controls are effective. If we are unable to assert that our internal control over financial reporting is effective, we could lose

investor confidence in the accuracy and completeness of our financial reports, which would have a material adverse effect on the price of our common stock.

Because we are a relatively small company, the requirements of being a public company, including compliance with the reporting requirements of the Exchange Act and the requirements of the Sarbanes-Oxley Act, may strain our resources, increase our costs and distract management; and we may be unable to comply with these requirements in a timely or cost-effective manner.

As a public company, we need to comply with certain laws, regulations and requirements, certain corporate governance provisions of the Sarbanes-Oxley Act and related regulations of the SEC. If we list our securities on an exchange, the exchange will impose additional requirements on listed companies, including enhanced corporate governance practices. For example, the NASDAQ listing requirements require that listed companies satisfy certain corporate governance requirements relating to independent directors, audit committees, distribution of annual and interim reports, shareholder meetings, shareholder approvals, solicitation of proxies, conflicts of interest, shareholder voting rights and codes of business conduct. Complying with the SEC statutes, regulations and requirements will occupy a significant amount of time of our board of directors and management and could increase our costs and expenses.

From time to time we may make acquisitions. The failure to successfully integrate future acquisitions could harm our business, financial condition and operating results.

As a part of our business strategy, we have in the past and may make acquisitions in the future. We may also make significant investments in complementary companies, products or technologies. Acquisitions present many risks, and we may not realize the financial and strategic goals that were contemplated at the time of any transaction. We cannot provide assurance that we will be able to successfully integrate any business, products, technologies or personnel that we may acquire in the future, and our failure to do so could harm our business, financial condition and operating results.

Weakness in the United States and international economies may continue to adversely affect our business.

The past few years have been characterized by weak global economic conditions. Because we market, sell and license our products throughout the world, in addition to the ongoing adverse effects on our business of continued weakness in the U.S. economy, we could be significantly affected by continuing weak economic conditions in foreign and domestic markets that could reduce demand for our products.

Risks Related to the Market for our Common Stock

Our stock price has been and is likely to continue to be volatile, and an investment in our common stock could decline in value.

Since the Recapitalization Transaction, the closing stock price has ranged from a low price of \$1.00 per share to a high price of \$4.95 per share. A contributing factor to the price fluctuation is the low average daily volume, which over the last three fiscal years has averaged fewer than 1,000 shares per day. Given the lack of market makers in the stock and the low demand, a shareholder's attempt to sell a large number of shares relative to the average daily volume in a short period of time will likely have a material negative impact on the share price.

Our common stock may be considered penny stock, further reducing its liquidity.

Our common stock may be considered penny stock, which will further reduce the liquidity of our common stock. Trading in penny stocks is limited because broker-dealers are required to provide their customers with disclosure documents prior to allowing them to participate in transactions involving the common stock. These disclosure requirements are burdensome to broker-dealers and may discourage them from allowing their customers to participate in transactions involving our common stock, thereby further reducing the liquidity of our common stock.

Penny stocks are equity securities with a market price below \$5.00 per share other than a security (i) that is registered on a national exchange or included for quotation on the NASDAQ system, (ii) whose issuer has net tangible assets of more than \$2,000,000 if it has been in continuous operation for greater than three years, or net tangible assets of more than \$5,000,000 if it has been in continuous operation for less than three years or (iii) whose issuer has average revenue of at least \$6,000,000 for the last three fiscal years.

Rules promulgated by the Securities and Exchange Commission under Section 15(g) of the Exchange Act require broker-dealers engaging in transactions in penny stocks, to first provide to their customers a series of disclosures and documents including:

.
a standardized risk disclosure document identifying the risks inherent in investment in penny stocks;

.
all compensation received by the broker-dealer in connection with the transaction;

.
current quotation prices and other relevant market data; and

.
a monthly account statement reflecting the fair market value of the securities.

These rules also require that a broker-dealer obtain financial and other information from a customer, determine that transactions in penny stocks are suitable for such customer and deliver a written statement to such customer setting forth the basis for this determination.

A small number of shareholders own a large number of shares thereby potentially exerting significant influence over us.

As of January 10, 2016, the three members of our board of directors beneficially own approximately 34.3% of our outstanding shares. Two other shareholders together beneficially own approximately 33.5% of outstanding shares. This concentration of ownership could significantly influence all matters requiring shareholder approval and could delay, deter or prevent a change in control of the Company or other business combinations that might otherwise be beneficial to our other shareholders. Accordingly, this concentration of ownership may harm the market price of our common stock. In addition, the interest of our significant shareholders may not always coincide with the interest of the Company's other shareholders. In deciding how to vote on such matters, they may be influenced by interests that conflict with our other shareholders.

Our stock is thinly traded, so you may be unable to sell at or near ask prices or at all.

The shares of our common stock are traded on the OTC Bulletin Board. Shares of our common stock are thinly traded, meaning that the number of persons interested in purchasing our common stock at or near ask prices at any given time may be relatively small or non-existent. This situation is attributable to a number of factors, including the fact that we are a small company that is relatively unknown to stock analysts, stockbrokers, institutional investors and others in the investment community who generate or influence sales volume. Even in the event that we come to the attention of such persons, they would likely be reluctant to follow an unproven company such as ours or purchase or recommend the purchase of our shares until such time as we become more seasoned and viable. As a consequence, our stock price may not reflect an actual or perceived value of the business. Also, there may be periods of several days or more when trading activity in our shares is minimal or non-existent, as compared to a seasoned issuer that has a large and steady volume of trading activity that will generally support continuous sales without an adverse effect on share price. A broader or more active public trading market for our common shares may not develop or if developed, may not be sustained. Due to these conditions, you may not be able to sell your shares at or near ask prices or at all if you need money or otherwise desire to liquidate your shares.

We do not presently intend to pay any cash dividends or repurchase any shares of our common stock.

We do not presently intend to pay any cash dividends on our common stock. Any payment of future dividends will be at the discretion of the board of directors and will depend on, among other things, our earnings, financial condition, capital requirements, level of indebtedness, statutory and contractual restrictions applying to the payment of dividends, and other considerations that our board of directors deems relevant. Cash dividend payments in the future may only be made out of legally available funds and, if we experience substantial losses, such funds may not be available. Accordingly, you may have to sell some or all of your common stock in order to generate cash flow from your investment.

We are a smaller reporting company and the reduced disclosure requirements applicable to us may make our common stock less attractive to investors.

We are currently a smaller reporting company, meaning that we are not an investment company, an asset-backed issuer, or a majority-owned subsidiary of a parent company that is not a smaller reporting company and have a public float of less than \$75 million and annual revenues of less than \$50 million during the most recently completed fiscal year. Smaller reporting companies are able to provide simplified executive compensation disclosures in their filings; are exempt from the provisions of Section 404(b) of the Sarbanes-Oxley Act requiring that independent registered public accounting firms provide an attestation report on the effectiveness of internal control over financial reporting; and have certain other decreased disclosure obligations in their SEC filings, including, among other things, only being required to provide two years of audited financial statements in annual reports. We have taken advantage of some of these reduced disclosure obligations, and thus the information we provide shareholders may be different from what you might receive from other public companies in which you hold shares.

Risks Related to the CADRA Sale

A portion of the purchase price was deferred and we may not receive those payments.

Up to \$750,000 of the total purchase price from the CADRA Sale is based on the revenues generated by the CADRA business during the three-year period following the asset sale. Specifically, the Company will be paid 10% of CADRA revenue generated by Mentor up to the \$750,000 maximum. The Company has no obligation subsequent to the transaction date with regard to royalty payments. In March 2014 and 2015, the Company received the first two royalty payments totaling approximately \$327,000 under this deferred arrangement related to the period from the transaction date to January 31, 2015. The Company is due two additional royalty payments under the Earn-Out Agreement based on CADRA revenues generated between February 1, 2015 and October 31, 2016 (the Remaining Royalty Period). Mentor has broad discretion to operate its post-closing business, and may choose to do so in a manner which may or may not result in the payment of all of the CADRA royalties pursuant to the Earn-Out Agreement.

CADRA royalty payments were recorded at the transaction date based on fair value of the expected royalty payments as described in the financial statements. As of November 30, 2015, the Company estimated the fair value of these future payments at \$325,000 and are subject to adjustment each fiscal quarter based on an independent third party valuation. The maximum royalty that could be received by the Company is \$423,000. During the three month period ended November 30, 2015, the Company wrote down the fair value of the Earn-Out Payments by \$61,000 based on an independent valuation. The write down was required due to a material decline in the CADRA revenue as reported to the Company by Mentor.

There can be no assurance that the Company will receive all of the royalty payments it has recorded on its balance sheet as of November 30, 2015. If the actual CADRA revenue results are lower than the forecasted results the Company may have to adjust the royalty asset through a charge to earnings. CADRA annualized revenue would have to average approximately \$2.417 million over the Remaining Royalty Period to maximize the royalty payments. For Mentor's most recently completed full fiscal year, CADRA revenue was approximately \$2.835 million, however, the CADRA revenue for the trailing twelve months was only \$2.168 million.

We will continue to incur the expenses of complying with public company reporting requirements following the closing of the CADRA Sale.

After the CADRA Sale, we will continue to be required to comply with the applicable reporting requirements of the Securities Exchange Act of 1934, as amended, even though compliance with such reporting requirements is economically burdensome and will represent an even greater percentage of our expenses post-closing as we will be a significantly smaller company following the sale of the CADRA business.

Closure of the office located in Germany

Our office located in Germany was focused exclusively on selling and supporting the CADRA product line. During fiscal year 2014, the Company closed this office and ceased operating in that country. We believe we have satisfied and/or accrued for all material obligations related to that closure including satisfying all employment related obligations to our former employees, however, the risk of identification of additional liabilities does exist.

Mentor did not assume any of the excluded liabilities under the Asset Purchase Agreement.

Under the Asset Purchase Agreement, Mentor did not assume all of the liabilities associated with the CADRA business. Certain liabilities remained with the Company post-closing. For example, Mentor only assumed customer support obligations related to certain assigned contracts and obligations for performance under contracts that arise after the closing, and did not assume liability for any obligation or breach by the Company that occurred or arose prior to the closing. While the Company believes that it has adequately accrued for these liabilities or is adequately insured against certain of the risks associated with such excluded liabilities, there can be no assurances that additional expenditures will not be incurred in resolving these liabilities.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In September 2015, we issued 10,000 shares of our common stock for an aggregate purchase price of \$50,000 to an accredited investor in a private placement pursuant to a Securities Purchase Agreement described under Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources, which description is incorporated herein by reference. We intend to use the proceeds from such private placement for working capital and other general corporate purposes.

Item 6. Exhibits

See Exhibit Index immediately following the signature page hereto, which Exhibit Index is incorporated herein by reference.
