EXHIBIT 99.1

mPhase Receives Largest Purchase Order Yet for POTS Splitters  
mPhase Technologies to Supply POTS Splitters to Covad Communications

## Edgar Filing: MPHASE TECHNOLOGIES INC - Form 8-K

NORWALK, Conn.--(BUSINESS WIRE)--July 2, 2003--mPhase Technologies, Inc. (OTC BB: XDSL), announced it has received its largest single purchase order to date from Covad Communications Group Inc. for passive central office POTS Splitters. Although pricing was not disclosed, the purchase order calls for mPhase to deliver 100,800 splitter ports, or 700 fully populated chassis over a period of the next 60 days for deployment across Covad's nationwide DSL network.

Over the past several months mPhase has seen a renewed interest in its line of DSL component products. With this order, mPhase will deplete all existing inventory and will reinvigorate manufacturing activities to meet current and anticipated future demand.

"We are pleased that mPhase has been recognized as a quality supplier of carrier-class central office splitters." stated Ronald Durando, President and CEO of mPhase.

Todd Nelson, Director of DSL Component Sales for mPhase added, "Covad has been a long-term customer of mPhase, and we are pleased to be a part of their on-going success."

Adoption of ADSL continues to grow spurred by lowered prices from service providers and increased competition in the broadband arena. In the US, advanced service ADSL lines increased 52% in the last six months of 2002, compared with a 22% increase in cable modem lines, the FCC stated in a recent report. Covad Communications continues to be a leader in DSL deployments. It was the first company to commercially deploy DSL in the United States and has spent hundreds of millions of dollars building a network that passes more than 40 million homes and businesses in 35 states - the largest nationwide footprint of any DSL company. Covad services are currently available in 96 of the country's top Metropolitan Statistical Areas (MSAs).

About mPhase Technologies, Inc.

mPhase Technologies Inc. develops solutions for cost-effectively and reliably transmitting broadcast digital television, high-speed Internet access and traditional telephone service over existing copper telephone lines. mPhase also offers a growing line of innovative DSL component products, such as the iPOTS, designed to help service providers lower the provisioning and operating costs associated with DSL.
