Notes to Quarterly Statement of Investments

July 31, 2007 (unaudited)

1. Significant Accounting and Operating Policies

Reaves Utility Income Fund is a closed-end management investment company (the Fund) that was organized under the laws of the state of Delaware by an Agreement and Declaration of Trust dated September 15, 2003. The Fund is a non-diversified series with an investment objective to provide a high level of after-tax income and total return consisting primarily of tax-advantaged dividend income and capital appreciation. The Declaration of Trust provides that the Trustees may authorize separate classes of shares of beneficial interest. The Fund commenced operations on February 24, 2004. The Fund's common shares are listed on the American Stock Exchange and trade under the ticker symbol UTG.

The Fund may have elements of risk, including the risk of loss of principal. There is no assurance that the investment process will consistently lead to successful results. An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment.

The following summarizes the significant accounting policies of the Fund.

Security Valuation: The net asset value per Share of the Fund is determined no less frequently than daily, on each day that the American Stock Exchange (the Exchange) is open for trading, as of the close of regular trading on the Exchange (normally 4:00 p.m. New York time). Securities held by the fund for which exchange quotations are readily available are valued at the last sale price, or if no sale price or if traded on the over-the-counter market, at the mean of the bid and asked prices on such day. Over-the-counter securities traded on NASDAQ are valued based upon the NASDAQ Official Closing Price. Debt securities for which the over-the-counter market is the primary market are normally valued on the basis of prices furnished by one or pricing services at the mean between the latest available bid and asked prices. As authorized by the Trustees, debt securities (other than short-term obligations) may be valued on the basis of valuations furnished by a pricing service which determines valuations based upon market transactions for normal, institutional-size trading units of securities. Short-term obligations maturing within 60 days are valued at amortized cost which approximates market value. Over-the-counter options are valued at the mean between bid and asked prices provided by dealers. Financial futures contracts listed on commodity exchanges and exchange-traded options are valued at closing settlement prices. Securities for which there is no such quotation or valuation and all other assets are valued at fair value in good faith by or at the direction of the Trustees. Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors may include, but are not limited to, the type and cost of the security; the fundamental analytical data relating to the investment; an evaluation of the forces which influence the market in which the security is sold, including the liquidity and depth of the market; information as to any transactions or offers with respect to the security; price, yield and the extent of public or private trading in similar securities of the issuer or comparable companies. The valuation assigned to fair-valued securities for purposes of calculating the Fund's NAV may differ from the security's most recent closing market price and from the prices used by other funds to calculate their NAVs.

Foreign Securities: The Fund may invest a portion of its assets in foreign securities. In the event that the Fund executes a foreign security transaction, the Fund will generally enter into a forward foreign currency contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

Edgar Filing: REAVES UTILITY INCOME FUND - Form N-Q

The accounting records of the Fund are maintained in U.S. dollars. Prices of securities denominated in foreign currencies are translated into U.S. dollars at the closing rates of exchange at period end. Amounts related to the purchase and sale of foreign securities and investment income are translated at the rates of exchange prevailing on the respective dates of such transactions.

The effect of changes in foreign currency exchange rates on investments is separately identified from the fluctuations arising from changes in market values of securities held and reported with all other foreign currency gains and losses in the Fund's Statement of Operations.

Options: In order to hedge against adverse market shifts, the Fund may utilize up to 5% of its total assets to purchase put and call options on securities. When a Fund purchases a call or put option, an amount equal to the premium paid is included in the Fund's Statement of Assets and Liabilities, which is included in the Annual and Semi-Annual reports to shareholders, as an investment, and is subsequently marked-to-market to reflect the current market value of the option. If an option expires on the stipulated expiration date or if the Fund enters into a closing sale transaction, a gain or loss is realized. If the Fund exercises a call, the cost of the security acquired is increased by the premium paid for the call. If the Fund exercises a put option, a gain or loss is realized from the sale of the underlying security, and the proceeds from such a sale are decreased by the premium originally paid.

In addition, the Fund may seek to increase its income or may hedge a portion of its portfolio investments through writing (*i.e.*, selling) covered put and call options. When a Fund writes a put or call option, an amount equal to the premium received is included in the Statement of Assets and Liabilities, which is included in the Annual and Semi-Annual reports to shareholders, as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option. If an option expires on its stipulated expiration date or if the Fund enters into a closing purchase transaction, a gain or loss is realized. If a written call option is exercised, a gain or loss is realized for the sale of the underlying security and the proceeds from the sale are increased by the premium originally received. If a written put option is exercised, the cost of the security acquired is decreased by the premium originally received. As a writer of an option, a Fund has no control over whether the underlying securities are subsequently sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the security underlying the written option. Written and purchased options are non-income producing securities.

The Fund may utilize up to 5% of its total assets to purchase put and call options on domestic stock indices to hedge against risks of market-wide price movements affecting its assets. In addition, the Fund may write covered put and call options on stock indices. Because no underlying security can be delivered, however, the option represents the holder's right to obtain from the writer, in cash, a fixed multiple of the amount by which the exercise price exceeds (in the case of a put) or is less than (in the case of a call) the closing value of the underlying index on the exercise date

Written option activity as of July 31, 2007 was as follows:

CALL OPTIONS WRITTEN

	Number of Contracts	Amount of Premiums
Options outstanding as of January 31, 2007		\$
Positions opened	790	187,325
Options expired	(350)	(91,947)
Options closed	(440)	(95,378)
Outstanding, July 31, 2007		\$
Market Value, July 31, 2007		\$

PUT OPTIONS WRITTEN

	Number of Contracts	Amount of Premiums
Options outstanding as of January 31, 2007	100	\$ 52,698
Positions opened		
Options expired		
Options closed	(100)	(52,698)
Outstanding, July 31, 2007		\$
Market Value, July 31, 2007		\$

Securities Transactions and Investment Income: Investment security transactions are accounted for as of trade date. Dividend income is recorded on the ex-dividend date. Interest income, which includes amortization of premium and accretion of discount, is accrued as earned. Realized gains and losses from securities transactions and unrealized appreciation and depreciation of securities are determined using the First In First Out basis for both financial reporting and income tax purposes.

2. Other

Calpine Corp. is currently undergoing bankruptcy proceedings. As of July 31, 2007, the Fund holds a corporate note for Calpine Generating Co., maturing April 2011 with a coupon rate of 11.50%. This is a secured position and as such the Fair Value Committee determined there is no uncertainty surrounding the collectibility of interest due on the note at this time.

Item 2 - Controls and Procedures.

(a) The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) within 90 days of this filing and have concluded that the registrant's disclosure controls and procedures were effective, as of that date.

(b) There was no change in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) during registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 3 Exhibits.

Separate certifications for the registrant's principal executive officer and principal financial officer, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and Rule 30a-2(a) under the Investment Company Act of 1940, are attached as Ex99.CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
