**UNITED STATES**

**SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

**FORM 10-Q**

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2009

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 1-10706

**Comerica Incorporated**

Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

(Exact name of registrant as specified in its charter)

Delaware  
(State or other jurisdiction of  
Incorporation or organization)

38-1998421  
(I.R.S. Employer  
Identification No.)

Comerica Bank Tower

1717 Main Street, MC 6404

Dallas, Texas 75201

(Address of principal executive offices)

(Zip Code)

(214) 462-6831

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

\$5 par value common stock:

Outstanding as of July 27, 2009: 151,113,539 shares

---

**Note 1 - Basis of Presentation and Accounting Policies**

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

The accompanying unaudited consolidated financial statements were prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, the statements do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation were included. The results of operations for the six months ended June 30, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009. Management evaluated subsequent events through July 31, 2009, the date the consolidated financial statements were issued. Certain items in prior periods were reclassified to conform to the current presentation. For further information, refer to the consolidated financial statements and footnotes thereto included in the Annual Report of Comerica Incorporated and Subsidiaries (the Corporation) on Form 10-K for the year ended December 31, 2008.

### Fair Value

On January 1, 2008, the Corporation adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements, (SFAS 157), which defines fair value, establishes a framework for measuring fair value under accounting principles generally accepted in the United States, and enhances disclosures about fair value measurements. In the first quarter 2009, the Corporation elected to early adopt FASB Staff Position (FSP) No. FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly (FSP FAS 157-4). The FSP provides guidelines for making fair value measurements consistent with the principles presented in SFAS 157 and requires an assessment of whether certain factors exist to indicate that the market for an instrument is not active at the measurement date. If, after evaluating those factors, the evidence indicates the market is not active, the Corporation must determine whether recent quoted transaction prices are associated with distressed transactions. If the Corporation concludes that the quoted prices are associated with distressed transactions, an adjustment to the quoted prices may be necessary or the Corporation may conclude that a change in valuation technique or the use of multiple techniques may be appropriate to estimate an instrument's fair value. For further information about fair value measurements, refer to Notes 3 and 13.

Also, in the first quarter 2009, the Corporation elected to early adopt FSP No. FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments. The FSP required that disclosures on the estimated fair value of financial instruments be included in interim financial statements. It also required disclosure of the method(s) and significant assumptions used to estimate the fair value of financial instruments in the interim financial statements. For further information concerning the estimated fair value of financial instruments, refer to Note 13.

### Investment Securities

Debt securities held-to-maturity are those securities which the Corporation has the ability and management has the positive intent to hold to maturity as of the balance sheet dates. Debt securities held-to-maturity are recorded at cost, adjusted for amortization of premium and accretion of discount.

Debt securities that are not considered held-to-maturity and marketable equity securities are accounted for as securities available-for-sale and recorded at fair value, with unrealized gains and losses, net of income taxes, reported as a separate component of other comprehensive income (loss) (OCI).

Investment securities are reviewed quarterly for possible other-than-temporary impairment (OTTI). In the first quarter 2009, the Corporation elected to early adopt FSP No. FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. The FSP changed the method for determining whether OTTI exists for debt securities by requiring an assessment of the likelihood of selling the security prior to recovering its amortized cost basis. The FSP also changed the amount of an impairment charge to be recorded in the consolidated statements of income. If the Corporation intends to sell the security or it is more-likely-than-not that the Corporation will be required to sell the security prior to recovery of its amortized cost basis, the security would be written down to fair value with the full amount of any impairment

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

charge recorded as a loss in net securities gains (losses) in the consolidated statements of income. If the Corporation does not intend to sell the security and it is more-likely-than-not that the Corporation will not be required to sell the security prior to recovery of its amortized cost basis, only the credit component of any impairment of a debt security would be recognized as a loss in net securities gains (losses) in the consolidated statements of income, with the remaining impairment recorded in OCI. The adoption of FSP FAS No. 115-2 and FAS 124-2 had no impact on the Corporation's financial condition at or results of operations for the three- and six- month periods ended June 30, 2009.

Table of Contents

**Note 1 - Basis of Presentation and Accounting Policies (continued)**

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

The OTTI review for equity securities includes an analysis of the facts and circumstances of each individual investment and focuses on the severity of loss, the length of time the fair value has been below cost, the expectation for that security's performance, the financial condition and near-term prospects of the issuer, and management's intent and ability to hold the security to recovery. A decline in value of an equity security that is considered to be other-than-temporary is recorded as a loss in net securities gains (losses) in the consolidated statements of income.

Gains or losses on the sale of securities are computed based on the adjusted cost of the specific security sold.

For further information on investment securities, refer to Note 3.

### Impairment

Goodwill and identified intangible assets that have an indefinite useful life are subject to impairment testing, which the Corporation conducts annually, or on an interim basis if events or changes in circumstances between annual tests indicate the assets might be impaired. The Corporation performs its annual impairment test for goodwill and identified intangible assets that have an indefinite useful life as of July 1 of each year. The impairment test involves assigning tangible assets and liabilities, identified intangible assets and goodwill to reporting units, which are a subset of the Corporation's operating segments, and comparing the fair value of each reporting unit to its carrying value. If the fair value is less than the carrying value, a further test is required to measure the amount of impairment. The annual test of goodwill and intangible assets that have an indefinite life, performed as of July 1, 2008, did not indicate that an impairment charge was required. Additional impairment testing was conducted in both the fourth quarter of 2008 and the first quarter of 2009, when general economic conditions deteriorated significantly and the Corporation experienced a substantial decline in market capitalization. The additional testing did not indicate that an impairment charge was required. The Corporation assessed whether there were any indicators of impairment in the second quarter of 2009 and concluded that additional impairment testing was not required.

### Derivative Instruments and Hedging Activities

On January 1, 2009, the Corporation adopted SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133, (SFAS 161). SFAS 161 applies to all derivative instruments and related hedged items accounted for under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities. SFAS 161 requires entities to provide greater transparency about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. To meet those objectives, SFAS 161 requires (1) qualitative disclosures about objectives for using derivatives by primary underlying risk exposure (e.g., interest rate, credit or foreign exchange rate) and by purpose or strategy (fair value hedge, cash flow hedge, net investment hedge, and non-hedges), (2) information about the volume of derivative activity in a flexible format that the preparer believes is the most relevant and practicable, (3) tabular disclosures about balance sheet location and gross fair value amounts of derivative instruments, income statement and other comprehensive income location of gain and loss amounts on derivative instruments by type of contract, and (4) disclosures about credit-risk related contingent features in derivative agreements. For further information on derivative instruments and hedging activities, refer to Note 10.

### Earnings Per Share

On January 1, 2009, the Corporation adopted FSP No. EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities (FSP EITF 03-6-1). FSP EITF 03-6-1 clarifies that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are considered participating securities and should be included in the calculation of

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

basic earnings per share using the two-class method prescribed by SFAS No. 128, Earnings Per Share. FSP EITF 03-6-1 was applied retrospectively to all prior periods presented. The adoption of FSP EITF 03-6-1 had no impact on second quarter 2008 basic net income or basic income from continuing operations per common share. The impact of adoption on the six months ended June 30, 2008 was a reduction of \$0.01 in basic net income and basic income from continuing operations per common share. The impact of adoption on the year ended December 31, 2008 was a reduction of \$0.01 in basic net income and basic income from continuing operations per common share. For further earnings per share information, refer to Note 8.

Table of Contents

**Note 1 - Basis of Presentation and Accounting Policies (continued)**

Noncontrolling Interests

On January 1, 2009, the Corporation adopted SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB 51, (SFAS 160), which defines noncontrolling interest as the portion of equity in a subsidiary not attributable, directly or indirectly, to the parent. The adoption of the provisions of SFAS 160 did not have a material effect on the Corporation's financial condition and results of operations.

**Note 2 Pending Accounting Pronouncements**

In December 2008, the FASB issued FSP No. FAS 132(R)-1, Employers' Disclosures about Postretirement Benefit Plan Assets, (FSP FAS 132(R)-1). FSP FAS 132(R)-1 amends SFAS No. 132(R), Employers' Disclosures about Pensions and Other Postretirement Benefits, to require additional disclosures about assets held in an employer's defined benefit pension or other postretirement plan. FSP FAS 132(R)-1 requires (1) disclosure of the fair value of each major asset category, (2) consideration of whether additional categories or further disaggregation should be disclosed, (3) disclosure of the level within the fair value hierarchy in which each major category of plan assets falls, using the guidance in SFAS 157, and (4) reconciliation of beginning and ending balances of plan assets with fair values measured using significant unobservable inputs. FSP FAS 132(R)-1 is effective for financial statements issued for fiscal years ending after December 15, 2009. Accordingly, the Corporation will adopt the provisions of FSP FAS 132(R)-1 in its consolidated financial statements for the year ended December 31, 2009. The Corporation does not expect the adoption of the provisions of FSP FAS 132(R)-1 to have a material effect on the Corporation's financial condition and results of operations.

In June 2009, the FASB issued SFAS No. 166, Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140, (SFAS 166). SFAS 166 removes the concept of a qualifying special-purpose entity and eliminates the exception for qualifying special-purpose entities from consolidation guidance. In addition, SFAS 166 establishes specific conditions for reporting a transfer of a portion of a financial asset as a sale. If the transfer does not meet established sale conditions, sale accounting can be achieved only if the transferor transfers an entire financial asset or a group of entire financial assets and surrenders control over the entire transferred asset(s). SFAS 166 is effective for fiscal years beginning after November 15, 2009. Accordingly, the Corporation will adopt the provisions of SFAS 166 in the first quarter 2010. The Corporation is currently evaluating the impact of the provisions of SFAS 166.

Also, in June 2009, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R), (SFAS 167). SFAS 167 replaces the quantitative-based risks and rewards calculation for determining which enterprise, if any, has a controlling financial interest in a variable interest entity with a qualitative approach focused on identifying which enterprise has both the power to direct the activities of the variable interest entity that most significantly impacts the entity's economic performance and has the obligation to absorb losses or the right to receive benefits that could be significant to the entity. In addition, SFAS 167 requires reconsideration of whether an entity is a variable interest entity when any changes in facts and circumstances occur such that the holders of the equity investment at risk, as a group, lose the power from voting rights or similar rights of those investments to direct the activities of the entity that most significantly impact the entity's economic performance. It also requires ongoing assessments of whether an enterprise is the primary beneficiary of a variable interest entity and additional disclosures about an enterprise's involvement in variable interest entities. SFAS 167 is effective for fiscal years beginning after November 15, 2009. Accordingly, the Corporation will adopt the provisions of SFAS 167 in the first quarter 2010. The Corporation is currently evaluating the impact of the provisions of SFAS 167.

Table of Contents**Note 2 Pending Accounting Pronouncements (continued)**

In June 2009, the FASB issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, (SFAS 168). SFAS 168 establishes the FASB Accounting Standards Codification (the Codification) as the single source of authoritative, nongovernmental U.S. GAAP. The Codification does not change U.S. GAAP. All existing accounting standard documents will be superseded and all other accounting literature not included in the Codification will be considered nonauthoritative. SFAS 168 is effective for interim and annual periods ending after September 15, 2009. Accordingly, the Corporation will adopt the provision of SFAS 168 in the third quarter 2009. The Corporation does not expect the adoption of the provisions of SFAS 168 to have any effect on the Corporation's financial condition and results of operations.

**Note 3 - Investment Securities**

A summary of the Corporation's investment securities available-for-sale follows:

<i>(in millions)</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
<b>June 30, 2009</b>				
U.S. Treasury and other Government agency securities	\$ 78	\$	\$	\$ 78
Government-sponsored enterprise mortgage-backed securities	6,365	145	2	6,508
State and municipal auction-rate securities	54		1	53
Other state and municipal securities	2			2
Other auction-rate securities (a)	969	8	11	966
Other securities	150			150
Total investment securities available-for-sale	\$ 7,618	\$ 153	\$ 14	\$ 7,757
<b>December 31, 2008</b>				
U.S. Treasury and other Government agency securities	\$ 79	\$	\$	\$ 79
Government-sponsored enterprise mortgage-backed securities	7,624	242	5	7,861
State and municipal auction-rate securities	67		3	64
Other state and municipal securities	2			2
Other auction-rate securities (a)	1,112		29	1,083
Other securities	112			112
Total investment securities available-for-sale	\$ 8,996	\$ 242	\$ 37	\$ 9,201

(a) Included in other auction-rate securities at June 30, 2009 were auction-rate preferred securities with a fair value of \$820 million, including gross unrealized gains of \$8 million and gross unrealized losses of \$1 million. At December 31, 2008, the fair value of auction-rate preferred securities was \$936 million, including no gross unrealized gains and gross unrealized losses of \$18 million.

Table of Contents**Note 3 - Investment Securities (continued)**

A summary of the Corporation's temporarily impaired investment securities available-for-sale as of June 30, 2009 and December 31, 2008 follows:

<i>(in millions)</i>	Less than 12 months		Impaired Over 12 months		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
<b>June 30, 2009</b>						
U.S. Treasury and other Government agency securities	\$	\$	\$	\$	\$	\$
Government-sponsored enterprise mortgage-backed securities	706	2			706	\$ 2
State and municipal auction-rate securities	53	1			53	\$ 1
Other state and municipal securities						
Other auction-rate securities	700	11			700	11
Other securities						
Total temporarily impaired securities	\$ 1,459	\$ 14	\$	\$	\$ 1,459	\$ 14
<b>December 31, 2008</b>						
U.S. Treasury and other Government agency securities	\$	\$	\$	\$	\$	\$
Government-sponsored enterprise mortgage-backed securities	137	1	559	4	696	5
State and municipal auction-rate securities	64	3			64	3
Other state and municipal securities						
Other auction-rate securities	1,083	29			1,083	29
Other securities						
Total temporarily impaired securities	\$ 1,284	\$ 33	\$ 559	\$ 4	\$ 1,843	\$ 37

At June 30, 2009, the Corporation had 485 securities in an unrealized loss position, including 24 AAA-rated Government-sponsored enterprise mortgage-backed securities (i.e., FMNA, FHLMC), 126 auction-rate debt securities and 335 auction-rate preferred securities. The unrealized losses resulted from changes in market interest rates and liquidity, not from changes in the probability of contractual cash flows. The Corporation does not intend to sell the securities and it is not more-likely-than-not that the Corporation will be required to sell the securities prior to recovery of amortized cost. Full collection of the amounts due according to the contractual terms of the securities is expected; therefore, the Corporation does not consider these investments to be other-than-temporarily impaired at June 30, 2009.

Table of Contents**Note 3 - Investment Securities (continued)**

The table below summarizes the amortized cost and fair values of debt securities, by contractual maturity. Securities with multiple maturity dates are classified in the period of final maturity. Expected maturities may differ significantly from contractual maturities, as borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

<i>(in millions)</i>	Amortized Cost	Fair Value
June 30, 2009		
<b>Contractual maturity</b>		
Within one year	\$ 118	\$ 118
After one year through five years	7	7
After five years through ten years		
After ten years	210	199
Subtotal	335	324
Mortgage-backed securities	6,365	6,508
Equity and other nondebt securities	918	925
Total securities available-for-sale	\$ 7,618	\$ 7,757

Included in the contractual maturity distribution in the table above were auction-rate debt securities with an amortized cost and fair value of \$210 million and \$199 million, respectively. Auction-rate preferred securities having no contractual maturity with an amortized cost and fair value of \$813 million and \$820 million, respectively, were included in equity and other nondebt securities in the above table. Auction-rate securities are long-term, floating rate instruments for which interest rates are reset at periodic auctions. At each successful auction, the Corporation has the option to sell the security at par value. Additionally, the issuers of auction-rate securities generally have the right to redeem or refinance the debt. As a result, the expected life of auction-rate securities may differ significantly from the contractual life.

Sales, calls and write-downs of investment securities available-for-sale resulted in realized gains and losses as follows:

<i>(in millions)</i>	Six Months Ended June 30,	
	2009	2008
Securities gains	\$ 128	\$ 36
Securities losses	(2)	
Total net securities gains	\$ 126	\$ 36

At June 30, 2009, investment securities having a carrying value of \$5.2 billion were pledged where permitted or required by law to secure \$4.9 billion of liabilities, including public and other deposits, Federal Home Loan Bank of Dallas (FHLB) advances and derivative instruments. This included mortgage-backed securities of \$3.1 billion pledged with the FHLB to secure advances of \$3.1 billion at June 30, 2009. The remaining pledged securities of \$2.1 billion were primarily with state and local government agencies to secure \$1.8 billion of deposits and other liabilities.

Table of Contents**Note 4 - Allowance for Credit Losses**

The following summarizes the changes in the allowance for loan losses:

<i>(in millions)</i>	2009	Six Months Ended June 30, 2008
Balance at beginning of period	\$ 770	\$ 557
Loan charge-offs:		
Domestic		
Commercial	149	69
Real estate construction		
Commercial Real Estate business line	138	109
Other business lines		1
Total real estate construction	138	110
Commercial mortgage		
Commercial Real Estate business line	39	34
Other business lines	41	9
Total commercial mortgage	80	43
Residential mortgage	4	1
Consumer	18	10
Lease financing	24	
International	5	1
Total loan charge-offs	418	234
Recoveries:		
Domestic		
Commercial	8	8
Real estate construction		1
Commercial mortgage	2	2
Residential mortgage		
Consumer	1	1
Lease financing	1	
International	1	
Total recoveries	13	12
Net loan charge-offs	405	222
Provision for loan losses	515	329
Foreign currency translation adjustment		(1)
Balance at end of period	\$ 880	\$ 663

Changes in the allowance for credit losses on lending-related commitments, included in accrued expenses and other liabilities on the consolidated balance sheets, are summarized in the following table.

<i>(in millions)</i>	2009	Six Months Ended June 30, 2008
----------------------	------	--------------------------------------

Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

Balance at beginning of period	\$ 38	\$ 21
Less: Charge-offs on lending-related commitments (a)		1
Add: Provision for credit losses on lending-related commitments	(5)	11
Balance at end of period	\$ 33	\$ 31

(a) Charge-offs result from the sale of unfunded lending-related commitments.

Table of Contents**Note 4 - Allowance for Credit Losses (continued)**

A loan is impaired when it is probable that interest and principal payments will not be made in accordance with the contractual terms of the loan agreement. Consistent with this definition, all nonaccrual and reduced-rate loans are impaired. Impaired loans that are restructured and meet the requirements to be on accrual status are included with total impaired loans for the remainder of the calendar year of the restructuring. There were no loans included in the \$1,116 million of impaired business loans at June 30, 2009 that were restructured and met the requirements to be on accrual status. Impaired loans averaged \$1,050 million and \$990 million for the three- and six- month periods ended June 30, 2009, respectively, and \$627 million and \$549 million for the three- and six- month periods ended June 30, 2008, respectively. The following presents information regarding the period-end balances of impaired loans:

<i>(in millions)</i>	June 30, 2009	December 31, 2008
Total period-end nonaccrual business loans	\$1,116	\$904
Plus: Impaired business loans restructured during the period on accrual status at period-end		
Total period-end impaired business loans	\$1,116	\$904
Period-end impaired business loans requiring an allowance	\$1,085	\$807
Allowance allocated to impaired business loans	\$ 231	\$175

A specific portion of the allowance may be allocated to significant individually impaired loans. Those impaired loans not requiring an allowance represent loans for which the fair value of expected repayments or collateral exceeded the recorded investments in such loans.

Table of Contents**Note 5 - Medium- and Long-Term Debt**

Medium- and long-term debt are summarized as follows:

<i>(in millions)</i>	June 30, 2009	December 31, 2008
<b>Parent company</b>		
Subordinated notes:		
4.80% subordinated note due 2015	\$ 325	\$ 342
6.576% subordinated notes due 2037	510	510
Total subordinated notes	835	852
Medium-term notes:		
Floating rate based on LIBOR indices due 2010	150	150
Total parent company	985	1,002
<b>Subsidiaries</b>		
Subordinated notes:		
8.50% subordinated note due 2009		101
7.125% subordinated note due 2013	151	149
5.70% subordinated note due 2014	275	286
5.75% subordinated notes due 2016	681	701
5.20% subordinated notes due 2017	547	592
8.375% subordinated note due 2024	190	207
7.875% subordinated note due 2026	213	246
Total subordinated notes	2,057	2,282
Medium-term notes:		
Floating rate based on LIBOR indices due 2009 to 2012	2,369	3,669
Floating rate based on Federal Funds indices due 2009	100	100
Federal Home Loan Bank advances:		
Floating rate based on LIBOR indices due 2009 to 2014	8,000	8,000
Other notes:		
6.0% - 6.4% fixed rate notes due 2020	60	
Total subsidiaries	12,586	14,051
Total medium- and long-term debt	\$ 13,571	\$ 15,053

The carrying value of medium- and long-term debt was adjusted to reflect the gain or loss attributable to the risk hedged with interest rate swaps.

Comerica Bank (the Bank), a subsidiary of the Corporation, is a member of the FHLB, which provides short- and long-term funding collateralized by mortgage-related assets to its members. FHLB advances bear interest at variable rates based on LIBOR and were secured by \$4.9 billion of real estate-related loans and \$3.1 billion of mortgage-backed investment securities at June 30, 2009.

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

The Bank participates in the voluntary Temporary Liquidity Guarantee Program (the TLG Program) announced by the Federal Deposit Insurance Corporation (FDIC) in October 2008 and amended in March 2009. Under the TLG Program, all senior unsecured debt issued between October 14, 2008 and October 31, 2009 with a maturity of more than 30 days is guaranteed by the FDIC. Debt guaranteed by the FDIC is backed by the full faith and credit of the United States. The FDIC guarantee expires on the earlier of the maturity date of the debt or December 31, 2012 (June 30, 2012 for debt issued prior to April 1, 2009). At June 30, 2009, there was approximately \$7 million of senior unsecured debt outstanding in the form of bank-to-bank deposits issued under the TLG Program and \$5.2 billion available to be issued.

Table of Contents

**Note 6 - Income Taxes and Tax-Related Items**

The provision for federal income taxes is computed by applying the statutory federal income tax rate to income before income taxes as reported in the consolidated financial statements after deducting non-taxable items, principally income on bank-owned life insurance, and deducting tax credits related to investments in low income housing partnerships. State and foreign taxes are then added to the federal tax provision.

In 2008 and first quarter 2009, the Corporation applied an estimated annual effective tax rate to interim period pre-tax income to calculate the income tax provision or benefit for each quarter, as required by Accounting Practice Bulletin 28, Interim Financial Reporting (APB 28). FASB Interpretation No. 18, Accounting for Income Taxes in Interim Periods an Interpretation on APB 28 (FIN 18), allows an alternative method to calculate the effective tax rate when an entity is unable to make a reliable estimate of pre-tax income for the fiscal year. Under the alternative method, interim period federal income taxes are based on each discrete quarter's pre-tax income. In light of the recent volatility and uncertainty in the current economic market, the Corporation applied the alternative method allowed by FIN 18 to compute the income tax benefit beginning in the second quarter 2009. The change in method resulted in an increase of approximately \$20 million to the income tax benefit in the second quarter 2009, which represents the necessary adjustment to conform the prior quarter tax provision to the new methodology.

Unrecognized tax benefits were \$23 million and \$93 million at June 30, 2009 and 2008, respectively, and accrued interest was \$37 million and \$105 million at June 30, 2009 and 2008, respectively. In the second quarter of 2009, unrecognized tax benefits decreased \$49 million and accrued interest decreased \$49 million as a result of the settlement of certain tax matters with the Internal Revenue Service (IRS) related to the audit years 2001-2004, amendments to certain state income tax returns, and the recognition of certain anticipated refunds due from the IRS. The total amount of unrecognized tax benefits that, if recognized, would affect the Corporation's effective tax rate decreased \$22 million in the second quarter of 2009 as a result of the items mentioned above. The amount of interest accrued at June 30, 2009 includes interest for unrecognized tax benefits and interest payable to the IRS for tax positions that were settled, but not yet paid. The Corporation does not anticipate any significant settlements of tax issues within the next twelve months.

Based on current knowledge and probability assessment of various potential outcomes, the Corporation believes that current tax reserves, determined in accordance with FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109, are adequate to cover the matters outlined above, and the amount of any incremental liability arising from these matters is not expected to have a material adverse effect on the Corporation's consolidated financial condition or results of operations. Probabilities and outcomes are reviewed as events unfold, and adjustments to the reserves are made when necessary.

**Note 7 - Accumulated Other Comprehensive Income (Loss)**

Other comprehensive income (loss) includes the change in net unrealized gains and losses on investment securities available-for-sale, the change in accumulated net gains and losses on cash flow hedges and the change in the accumulated defined benefit and other postretirement plans adjustment. The Consolidated Statements of Changes in Shareholders' Equity include only combined other comprehensive income (loss), net of tax. The following table presents reconciliations of the components of the accumulated other comprehensive income (loss) for the six months ended June 30, 2009 and 2008. Total comprehensive income (loss) was \$(6) million and \$135 million for the six months ended June 30, 2009 and 2008, respectively. The \$141 million decrease in total comprehensive income (loss) for the six months ended June 30, 2009, when compared to the same period in the prior year, resulted primarily from a \$138 million decrease in net income.

Table of Contents**Note 7 - Accumulated Other Comprehensive Income (Loss) (continued)**

<i>(in millions)</i>	Six Months Ended June 30,	
	2009	2008
<b>Accumulated net unrealized gains (losses) on investment securities available-for-sale:</b>		
Balance at beginning of period, net of tax	\$ 131	\$ (9)
Net unrealized holding gains (losses) arising during the period	59	(24)
Less: Reclassification adjustment for net gains included in net income	126	36
Change in net unrealized gains (losses) before income taxes	(67)	(60)
Less: Provision for income taxes	(24)	(22)
Change in net unrealized gains (losses) on investment securities available-for-sale, net of tax	(43)	(38)
Balance at end of period, net of tax	\$ 88	\$ (47)

Less: Provision for income taxes	10	4
Change in defined benefit and other postretirement plans adjustment, net of tax	17	8
Balance at end of period, net of tax	\$ (453)	\$ (162)
<b>Total accumulated other comprehensive loss at end of period, net of tax</b>	<b>\$ (342)</b>	<b>\$ (207)</b>

Table of Contents**Note 8 Net Income (Loss) per Common Share**

Basic income (loss) from continuing operations and net income (loss) per common share are computed by dividing income (loss) from continuing operations applicable to common stock and net income (loss) applicable to common stock, respectively, by the weighted-average number of shares of common stock outstanding during the period, including nonvested restricted stock. Diluted income (loss) from continuing operations and net income (loss) per common share are computed by dividing income (loss) from continuing operations applicable to common stock and net income (loss) applicable to common stock, respectively, by the weighted-average number of shares of common stock, including nonvested restricted stock and dilutive common stock equivalents outstanding during the period. Common stock equivalents consist of common stock issuable under the assumed exercise of stock options granted under the Corporation's stock plans and a warrant, using the treasury stock method. Basic and diluted income (loss) from continuing operations per common share and net income (loss) per common share for the three- and six- month periods ended June 30, 2009 and 2008 were computed as follows:

<i>(in millions, except per share data)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
<b>Basic and diluted</b>				
Income from continuing operations	\$ 18	\$ 56	\$ 26	\$ 166
Less: Preferred stock dividends	34		67	
Income (loss) from continuing operations applicable to common stock	\$ (16)	\$ 56	\$ (41)	\$ 166
Net income	\$ 18	\$ 56	\$ 27	\$ 165
Less: Preferred stock dividends	34		67	
Net income (loss) applicable to common stock	\$ (16)	\$ 56	\$ (40)	\$ 165
Average common shares outstanding	151	151	151	151
Basic income (loss) from continuing operations per common share	\$ (0.11)	\$ 0.37	\$ (0.27)	\$ 1.10
Basic net income (loss) per common share	(0.10)	0.37	(0.26)	1.09
Average common shares outstanding	151	151	151	151
Common stock equivalents:				
Net effect of the assumed exercise of stock options				
Net effect of the assumed exercise of warrant				
Diluted average common shares	151	151	151	151
Diluted income (loss) from continuing operations per common share	\$ (0.11)	\$ 0.37	\$ (0.27)	\$ 1.10
Diluted net income (loss) per common share	(0.10)	0.37	(0.26)	1.09

The following average shares related to outstanding options and a warrant to purchase shares of common stock were not included in the computation of diluted net income (loss) per common share because the options' and warrant's exercise prices were greater than the average market price of common shares for the period.

<i>(options in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008

Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

Amortization of unrecognized prior service cost	(1)		(1)	
Amortization of unrecognized net loss	4	1	5	2
Net periodic benefit cost	\$ 7	\$ 4	\$ 11	\$ 8
Postretirement Benefit Plan (in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Interest cost	\$ 1	\$ 2	\$ 2	\$ 3
Expected return on plan assets	(1)	(1)	(2)	(2)
Amortization of unrecognized transition obligation	1	1	2	2
Amortization of unrecognized net loss	1		1	
Net periodic benefit cost	\$ 2	\$ 2	\$ 3	\$ 3

For further information on the Corporation's employee benefit plans, refer to Note 16 to the consolidated financial statements in the Corporation's 2008 Annual Report.

Table of Contents

**Note 10 - Derivative Instruments**

In the normal course of business, the Corporation enters into various transactions involving derivative financial instruments to manage exposure to fluctuations in interest rate, foreign currency and other market risks and to meet the financing needs of customers. These financial instruments involve, to varying degrees, elements of credit and market risk.

Credit risk is the possible loss that may occur in the event of nonperformance by the counterparty to a financial instrument. The Corporation attempts to minimize credit risk arising from financial instruments by evaluating the creditworthiness of each counterparty, adhering to the same credit approval process used for traditional lending activities. Counterparty risk limits and monitoring procedures were also established to facilitate the management of credit risk. Collateral is obtained, if deemed necessary, based on the results of management's credit evaluation. Collateral varies, but may include cash, investment securities, accounts receivable, equipment or real estate.

Market risk is the potential loss that may result from movements in interest or foreign currency rates and energy commodity prices, which cause an unfavorable change in the value of a financial instrument. The Corporation manages this risk by establishing monetary exposure limits and monitoring compliance with those limits. Market risk arising from derivative instruments entered into on behalf of customers is reflected in the consolidated financial statements and may be mitigated by entering into offsetting transactions. Market risk inherent in derivative instruments held or issued for risk management purposes is generally offset by changes in the value of rate sensitive assets or liabilities.

Derivative instruments are carried at fair value in either accrued income and other assets or accrued expenses and other liabilities on the consolidated balance sheets. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument is determined by whether it has been designated and qualifies as part of a hedging relationship in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended, (SFAS 133(R)), and, further, by the type of hedging relationship. For those derivative instruments that are designated and qualify as hedging instruments in accordance with SFAS 133(R), the Corporation designates the hedging instrument, based upon the exposure being hedged, as either a fair value hedge or a cash flow hedge. For derivative instruments designated and qualifying as a fair value hedge (i.e., hedging the exposure to changes in the fair value of an asset or a liability or an identified portion thereof that is attributable to a particular risk), the gain or loss on the derivative instrument, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in current earnings during the period of the change in fair values. For derivative instruments that are designated and qualify as a cash flow hedge (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. The remaining gain or loss on the derivative instrument in excess of the cumulative change in the present value of future cash flows of the hedged item (i.e., the ineffective portion), if any, is recognized in current earnings during the period of change. For derivative instruments not designated as hedging instruments in accordance with SFAS 133(R), the gain or loss is recognized in current earnings during the period of change.

For hedge relationships accounted for under SFAS 133(R) at inception of the hedge, the Corporation uses either the short-cut method or applies dollar offset or statistical regression analysis to assess effectiveness. The short-cut method is used for certain fair value hedges of medium- and long-term debt. This method allows for the assumption of zero hedge ineffectiveness and eliminates the requirement to further assess hedge effectiveness on these transactions. For SFAS 133(R) hedge relationships to which the Corporation does not apply the short-cut method, either the dollar offset or statistical regression analysis is used at inception and for each reporting period thereafter to assess whether the derivative used has been and is expected to be highly effective in offsetting changes in the fair value or cash flows of the hedged item. All components of each derivative instrument's gain or loss are included in the assessment of hedge effectiveness. Net hedge ineffectiveness is recorded in other noninterest income on the consolidated statements of income.

Table of Contents**Note 10 - Derivative Instruments (continued)**

The following table presents the composition of the Corporation's derivative instruments, excluding commitments, held or issued for risk management purposes or in connection with customer-initiated and other activities at June 30, 2009 and December 31, 2008.

	June 30, 2009			December 31, 2008

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

(a) Asset derivatives are included in accrued income and other assets and liability derivatives are included in accrued expenses and other liabilities in the consolidated balance sheets.

(b) Notional or contract amounts, which represent the extent of involvement in the derivatives market, are used to determine the contractual cash flows required in accordance with the terms of the agreement. These amounts are typically not exchanged, significantly exceed amounts subject to credit or market risk and are not reflected in the consolidated balance sheets.

(c) Unrealized gains represent receivables from derivative counterparties, and therefore expose the Corporation to credit risk. Credit risk, which excludes the effects of any collateral or netting arrangements, is measured as the cost to replace contracts in a profitable position at current market rates.

Table of Contents

**Note 10 - Derivative Instruments (continued)**

By purchasing and writing derivative contracts, the Corporation is exposed to credit risk if the counterparties fail to perform. The Corporation minimizes credit risk through credit approvals, limits, monitoring procedures and collateral requirements. Nonperformance risk, including credit risk, is included in the determination of net fair value. Customer-initiated derivative instruments with a fair value of \$723 million at June 30, 2009 were net of credit-related adjustments totaling \$3 million.

Bilateral collateral agreements with counterparties reduce credit risk by providing for the daily exchange of cash or highly rated securities issued by the U.S. Treasury or other government agencies to collateralize amounts due to either party. At June 30, 2009, counterparties had pledged marketable investment securities to secure approximately 80 percent of the fair value of contracts in an unrealized gain position. In addition, at June 30, 2009, master netting arrangements had been established with substantially all interest rate swap counterparties and certain foreign exchange counterparties. These arrangements effectively reduce credit risk by permitting settlement, on a net basis, of contracts entered into with the same counterparty.

Certain of the Corporation's derivative instruments contain provisions that require the Corporation's debt to maintain an investment grade credit rating from each of the major credit rating agencies. If the Corporation's debt were to fall below investment grade, the counterparties to the derivative instruments could require additional overnight collateral on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position on June 30, 2009 was \$131 million, for which the Corporation had assigned collateral of \$124 million in the normal course of business. If the credit-risk-related contingent features underlying these agreements had been triggered on June 30, 2009, the Corporation would be required to assign an additional \$15 million of collateral to its counterparties.

The Corporation had commitments to purchase investment securities for its available-for-sale and trading account portfolios totaling \$17 million and \$1.3 billion at June 30, 2009 and December 31, 2008, respectively. Commitments to sell investment securities related to the trading account portfolio totaled \$11 million at June 30, 2009 and \$10 million at December 31, 2008. Outstanding commitments expose the Corporation to both credit and market risk.

Risk Management

As an end-user, the Corporation employs a variety of financial instruments for risk management purposes. Activity related to these instruments is centered predominantly in the interest rate markets and mainly involves interest rate swaps. Various other types of instruments also may be used to manage exposures to market risks, including interest rate caps and floors, total return swaps, foreign exchange forward contracts and foreign exchange swap agreements.

As part of a fair value hedging strategy, the Corporation entered into interest rate swap agreements for interest rate risk management purposes. These interest rate swap agreements effectively modify the Corporation's exposure to interest rate risk by converting fixed-rate debt and deposits to a floating rate. These agreements involve the receipt of fixed-rate interest amounts in exchange for floating-rate interest payments over the life of the agreement, without an exchange of the underlying principal amount.

Risk management fair value interest rate swaps generated \$14 million and \$26 million of net interest income for the three- and six-month periods ended June 30, 2009, respectively, compared to net interest income of \$12 million and \$18 million for the three- and six-month periods ended June 30, 2008, respectively.

Table of Contents**Note 10 - Derivative Instruments (continued)**

The net gains (losses) recognized in other noninterest income (i.e., the ineffective portion) in the consolidated statements of income on risk management derivatives designated as SFAS 133(R) fair value hedges of fixed-rate debt and deposits were as follows.

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Interest rate swaps	\$ (1)	\$ 4	\$ (2)	\$ 5

As part of a cash flow hedging strategy, the Corporation entered into predominantly two-year interest rate swap agreements (weighted-average original maturity of 2.2 years) that effectively convert a portion of its existing and forecasted floating-rate loans to a fixed-rate basis, thus reducing the impact of interest rate changes on future interest income over the life of the agreements (currently over the next 21 months). Approximately four percent (\$1.7 billion) of the Corporation's outstanding loans were designated as hedged items to interest rate swap agreements at June 30, 2009. If interest rates, interest yield curves and notional amounts remain at current levels, the Corporation expects to reclassify \$19 million of net gains, net of tax, on derivative instruments designated as cash flow hedges from accumulated other comprehensive income (loss) to earnings during the next twelve months due to receipt of variable interest associated with existing and forecasted floating-rate loans.

The net gains (losses) recognized in income and OCI on risk management derivatives designated as SFAS 133(R) cash flow hedges of loans for the three- and six-month periods ended June 30, 2009 and 2008 are displayed in the table below.

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Interest rate swaps				
Gain (loss) recognized in OCI (effective portion)	\$ (1)	\$ 1	\$ 5	\$ 16
Gain (loss) recognized in other noninterest income (ineffective portion)	(1)			
Gain reclassified from accumulated OCI into interest and fees on loans (effective portion)	9	10	17	15

Foreign exchange rate risk arises from changes in the value of certain assets and liabilities denominated in foreign currencies. The Corporation employs spot and forward contracts in addition to swap contracts to manage exposure to these and other risks.

The net gains (losses) recognized in other noninterest income in the consolidated statements of income on risk management derivative instruments not designated as hedging instruments under SFAS 133(R) were as follows.

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Foreign exchange contracts	\$		\$ (1)	\$ 1

Table of Contents**Note 10 - Derivative Instruments (continued)**

The following table summarizes the expected average remaining maturity of the notional amount of risk management interest rate swaps and provides the weighted average interest rates associated with amounts to be received or paid on interest rate swap agreements as of June 30, 2009 and December 31, 2008.

<i>(dollar amounts in millions)</i>	Notional Amount	Maturity (in years)	Weighted Average Receive Rate	Pay Rate (a)
<b>June 30, 2009</b>				
Swaps - cash flow - receive fixed/pay floating rate				
Variable rate loan designation	\$ 1,700	1.4	5.22%	3.25%
Swaps - fair value - receive fixed/pay floating rate				
Medium- and long-term debt designation	1,600	8.6	5.73	1.91
Other time deposits designation	429	0.4	0.87	0.46
Total swaps - fair value	2,029			
Total risk management interest rate swaps	\$ 3,729			
<b>December 31, 2008</b>				
Swaps - cash flow - receive fixed/pay floating rate				
Variable rate loan designation	\$ 1,700	1.9	5.22%	3.56%
Swaps - fair value - receive fixed/pay floating rate				
Medium- and long-term debt designation	1,700	8.6	5.75	3.34
Total risk management interest rate swaps	\$ 3,400			

(a) Variable rates paid on receive fixed swaps are based on prime and LIBOR (with various maturities) rates in effect at June 30, 2009.

Management believes these hedging strategies achieve the desired relationship between the rate maturities of assets and funding sources which, in turn, reduce the overall exposure of net interest income to interest rate risk, although there can be no assurance that such strategies will be successful. The Corporation employs cash instruments, such as investment securities, as well as various types of derivative instruments to manage exposure to interest rate risk and other risks.

Customer-Initiated and Other

Fee income is earned from entering into various transactions, principally foreign exchange contracts, interest rate contracts and energy derivative contracts, at the request of customers. The Corporation mitigates market risk inherent in customer-initiated interest rate and energy contracts by taking offsetting positions, except in those circumstances when the amount, tenor and/or contracted rate level results in negligible economic risk, whereby the cost of purchasing an offsetting contract is not economically justifiable. For customer-initiated foreign exchange contracts, the Corporation mitigates most of the inherent market risk by taking offsetting positions and manages the remainder through individual foreign currency position limits and aggregate value-at-risk limits. These limits are established annually and reviewed quarterly.

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

For those customer-initiated derivative contracts which were not offset or where the Corporation holds a speculative position within the limits described above, the Corporation recognized in other noninterest income in the consolidated statements of income less than \$0.5 million of net gains in both the three-month periods ended June 30, 2009 and 2008, and \$1 million of net gains in both the six-month periods ended June 30, 2009 and 2008, respectively.

Table of Contents**Note 10 - Derivative Instruments (continued)**

Fair values for customer-initiated and other derivative instruments represent the net unrealized gains or losses on such contracts and are recorded in the consolidated balance sheets. Changes in fair value are recognized in the consolidated statements of income. The net gains recognized in income on customer-initiated and other derivative instruments were as follows.

<i>(in millions)</i>	Location of Gain	Three Months Ended June 30,		Six Months Ended June 30,	
		2009	2008	2009	2008
Interest rate contracts	Other noninterest income	\$ 2	\$ 4	\$ 6	\$ 11
Energy derivative contracts	Other noninterest income	1		1	
Foreign exchange contracts	Foreign exchange income	8	11	17	21
Total customer-initiated and other derivatives		\$ 11	\$ 15	\$ 24	\$ 32

Additional information regarding the nature, terms and associated risks of derivative instruments can be found in the Corporation's 2008 Annual Report on page 54 and in Note 1 to the consolidated financial statements.

**Note 11 Credit-Related Financial Instruments**

The Corporation's credit risk associated with off-balance sheet credit-related financial instruments as of June 30, 2009 and December 31, 2008 is represented by the contractual amounts included in the following table.

<i>(in millions)</i>	June 30, 2009	December 31, 2008
<b>Unused commitments to extend credit:</b>		
Commercial and other	\$ 22,413	\$ 25,901
Bankcard, revolving check credit and equity access loan commitments	1,990	2,124
Total unused commitments to extend credit	\$ 24,403	\$ 28,025
<b>Standby letters of credit</b>		
Commercial letters of credit	\$ 5,941	\$ 6,204
Other financial guarantees	101	156
	25	36

The Corporation maintains an allowance to cover probable credit losses inherent in lending-related commitments, including unused commitments to extend credit, letters of credit and financial guarantees. At June 30, 2009 and December 31, 2008, the allowance for credit losses on lending-related commitments, included in accrued expenses and other liabilities on the consolidated balance sheets, was \$33 million and \$38 million, respectively.

Unused Commitments to Extend Credit

Commitments to extend credit are legally binding agreements to lend to a customer, provided there is no violation of any condition established in the contract. These commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many commitments expire without being drawn upon, the total contractual amount of commitments does not necessarily represent future cash requirements of the Corporation. Commercial and other unused commitments are primarily variable rate commitments.

Standby and Commercial Letters of Credit and Financial Guarantees

Standby and commercial letters of credit represent conditional obligations of the Corporation which guarantee the performance of a customer to a third party. Standby letters of credit are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing and similar transactions. These contracts expire in decreasing amounts through the year 2018. The Corporation may enter into participation arrangements with third parties, which effectively reduce the maximum amount of future payments which may be required under standby and commercial letters of credit. These risk participations covered \$468 million of the \$6.0 billion standby and commercial letters of credit outstanding at June 30, 2009. Commercial letters of credit are issued to finance foreign or domestic trade transactions and are short-term in nature.

Table of Contents**Note 11 Credit-Related Financial Instruments (continued)**

Financial guarantees at June 30, 2009 included credit risk participation agreements, where the Corporation, primarily as part of a syndicated lending arrangement, guarantees a portion of the credit risk on an interest rate swap agreement between the lead bank in the syndicate and a customer. In the event of default by a customer, the Corporation would be required to pay the portion of the unpaid amount guaranteed by the Corporation to the lead bank. At June 30, 2009, the estimated fair value of the Corporation's credit risk participation agreements where the Corporation was the guarantor was \$22 million, and the estimated credit exposure was \$33 million. The estimated credit exposure includes the estimated credit risk as of June 30, 2009, in addition to an estimate for potential future risk for changes in interest rates in each remaining year of the contract until maturity. In addition, the estimated credit exposure assumes the lead bank was unable to liquidate assets of the customers. In the event of default, the lead bank has the ability to liquidate the assets of the customer, in which case the lead bank would be required to return a percentage of recouped assets to the participating banks. These credit risk participation agreements expire in decreasing amounts through the year 2016, with a weighted average remaining maturity on outstanding agreements of 1.7 years. Also included in financial guarantees was an indemnification obligation with a fair value of \$3 million at June 30, 2009 related to the sale of the Corporation's remaining ownership of Visa Inc. (Visa) shares.

At June 30, 2009, the carrying value of the Corporation's standby and commercial letters of credit and financial guarantees, included in accrued expenses and other liabilities on the consolidated balance sheet, totaled \$75 million.

The following table presents a summary of total internally classified watch list standby and commercial letters of credit and financial guarantees (generally consistent with regulatory defined special mention, substandard and doubtful) at June 30, 2009 and December 31, 2008. The Corporation manages credit risk through underwriting, periodically reviewing and approving its credit exposures using Board committee approved credit policies and guidelines.

<i>(dollar amounts in millions)</i>	June 30, 2009	December 31, 2008
Total watch list standby and commercial letters of credit	\$ 391	\$ 277
As a percentage of total outstanding standby and commercial letters of credit	6.5%	4.3%
Total watch list financial guarantees	\$	\$
As a percentage of total outstanding financial guarantees	%	%

**Note 12 Contingent Liabilities**

The Corporation and certain of its subsidiaries are subject to various pending or threatened legal proceedings arising out of the normal course of business or operations. In view of the inherent difficulty of predicting the outcome of such matters, the Corporation cannot state what the eventual outcome of these matters will be. However, based on current knowledge and after consultation with legal counsel, management believes that current reserves, determined in accordance with SFAS No. 5, Accounting for Contingencies, are adequate, and the amount of any incremental liability arising from these matters is not expected to have a material adverse effect on the Corporation's consolidated financial condition. For information regarding income tax contingencies, refer to Note 6.

Table of Contents

**Note 13 Fair Value Measurements**

The Corporation utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Investment securities available-for-sale, trading securities, derivatives and certain liabilities are recorded at fair value on a recurring basis. Additionally, from time to time, the Corporation may be required to record at fair value other assets and liabilities on a nonrecurring basis, such as loans held-for-sale, loans held-for-investment and certain other assets and liabilities. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

The Corporation categorizes assets and liabilities recorded at fair value into a three-level hierarchy, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

- Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.
- Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3 Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

Following is a description of the valuation methodologies and key inputs used to measure financial assets and liabilities recorded at fair value, as well as a description of the methods and significant assumptions used to estimate fair value disclosures for financial instruments not recorded at fair value in their entirety on a recurring basis. For financial assets and liabilities recorded at fair value, the description includes an indication of the level of the fair value hierarchy in which the assets or liabilities are classified.

*Cash and due from banks, federal funds sold and securities purchased under agreements to resell, and interest-bearing deposits with banks*

The carrying amount approximates the estimated fair value of these instruments.

*Trading securities and associated liabilities*

Securities held for trading purposes are recorded at fair value and included in other short-term investments on the consolidated balance sheets. Level 1 securities held for trading purposes include assets related to employee deferred compensation plans, which are invested in mutual funds and other securities traded on an active exchange. Deferred compensation liabilities, also classified as Level 1, are carried at the fair value of the obligation to the employee, which corresponds to the fair value of the invested assets. Level 2 securities include municipal bonds and mortgage-backed securities issued by government-sponsored entities and corporate debt securities. Securities classified as Level 3 include

securities in less liquid markets and securities not rated by a credit agency. The valuation method for trading securities is the same as the method used for investment securities available-for-sale, discussed above.

*Loans held-for-sale*

Loans held-for-sale, included in other short-term investments on the consolidated balance sheets, are recorded at the lower of cost or fair value. The fair value of loans held-for-sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Corporation classifies loans held-for-sale subjected to nonrecurring fair value adjustments as Level 2.

Table of Contents

**Note 13 Fair Value Measurements (continued)**

*Investment securities available-for-sale*

Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available or the market is deemed to be inactive at the measurement date and quoted prices are determined to be associated with distressed transactions, an adjustment to the quoted prices may be necessary or the Corporation may conclude that a change in valuation technique or the use of multiple valuation techniques may be appropriate to estimate an instrument's fair value. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities primarily include mortgage-backed securities issued by government-sponsored enterprises. Securities classified as Level 3, the substantial majority of which are auction-rate securities (ARS), represent securities in less liquid markets requiring significant management assumptions when determining the fair value. The fair value of auction-rate securities was determined using an income approach based on a discounted cash flow model utilizing two significant assumptions in the model: discount rate (including a liquidity risk premium for certain securities) and workout period. The interest rate used to discount cash flows included a reasonable market premium a willing buyer would require in an orderly transaction. The rate of redemption of the various types of ARS held by the Corporation during the six months ended June 30, 2009, which ranged from nominal to approximately 25 percent, was a significant consideration in the determination of a reasonable market premium a buyer would require.

The Corporation elected to adopt FSP FAS 157-4 in the first quarter 2009, and determined the market was not active for the ARS portfolio. For further information on the adoption of FSP FAS 157-4 and the valuation of ARS, see Notes 1 and 3.

*Loans*

The Corporation does not record loans at fair value on a recurring basis. However periodically, the Corporation records nonrecurring adjustments to the carrying value of loans based on fair value measurements. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once loans are identified as impaired, management measures impairment in accordance with SFAS No. 114, Accounting by Creditors for Impairment of a Loan, (SFAS 114) and establishes an allowance for loan losses. The allowance, based on the fair value of impaired loans, is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At June 30, 2009 and 2008, substantially all impaired loans were evaluated based on the fair value of the collateral. Impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Corporation records the impaired loan as nonrecurring Level 2. When a current appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Corporation records the impaired loan as nonrecurring Level 3.

Business loans consist of commercial, real estate construction, commercial mortgage, equipment lease financing and international loans. Retail loans consist of residential mortgage, home equity and other consumer loans. The estimated fair value for variable rate business loans that reprice frequently is based on carrying values adjusted for estimated credit losses and other adjustments that would be expected to be made by a market participant in an active market. The fair value for other business and retail loans is estimated using a discounted cash flow model that employs interest rates currently offered on the loans, adjusted by an amount for estimated credit losses and other adjustments that would be expected to be made by a market participant in an active market. The rates take into account the expected yield curve, as well as an adjustment

for prepayment risk, if applicable.

*Customers liability on acceptances outstanding and acceptances outstanding*

The carrying amount approximates the estimated fair value.

Table of Contents

**Note 13 Fair Value Measurements (continued)**

*Derivative assets and liabilities*

Substantially all of the derivative instruments held or issued by the Corporation for risk management or customer-initiated activities are traded in over-the-counter markets where quoted market prices are not readily available. For those derivative instruments, the Corporation measures fair value using internally developed models that use primarily market observable inputs, such as yield curves and option volatilities, and include the value associated with counterparty credit risk. As such, the Corporation classifies those derivative instruments as Level 2. Examples of Level 2 derivative instruments are interest rate swaps, energy and foreign exchange derivative contracts.

The Corporation also holds a portfolio of warrants for generally nonmarketable equity securities. These warrants are primarily from high technology, non-public companies obtained as part of the loan origination process. Warrants which contain a net exercise provision are required to be accounted for as derivatives and recorded at fair value. Fair value is determined using a Black-Scholes valuation model, which has five inputs: risk-free rate, expected life, volatility, exercise price, and the per share market value of the underlying company. Where sufficient financial data existed, a market approach method was utilized to estimate the current value of the underlying company. When quoted market values were not available, an index method was utilized. The estimated fair value of the underlying securities for warrants requiring valuation at fair value were adjusted for discounts related to lack of liquidity. The Corporation classifies warrants accounted for as derivatives as recurring Level 3.

*Foreclosed assets*

Upon transfer from the loan portfolio, foreclosed assets are adjusted to and subsequently carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Corporation records the foreclosed asset as nonrecurring Level 2. When a current appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Corporation records the foreclosed asset as nonrecurring Level 3.

*Nonmarketable equity securities*

The Corporation has a portfolio of indirect (through funds) private equity and venture capital investments. The majority of these investments are not readily marketable. The investments are individually reviewed for impairment on a quarterly basis by comparing the carrying value to the estimated fair value. The Corporation bases its estimates of fair value for the majority of its indirect private equity and venture capital investments on the percentage ownership in the fair value of the entire fund, as reported by the fund's management. For those funds where fair value is not reported by the fund's management, the Corporation derives the fair value of the fund by estimating the fair value of each underlying investment in the fund. In addition to using qualitative information about each underlying investment, as provided by the fund's management, the Corporation gives consideration to information pertinent to the specific nature of the debt or equity investment, such as relevant market conditions, offering prices, operating results, financial conditions, exit strategy and other qualitative information, as available. The lack of an independent source to validate fair value estimates, including the impact of future capital calls and transfer restrictions, is an inherent limitation

in the valuation process. The Corporation classifies nonmarketable equity securities subjected to nonrecurring fair value adjustments as Level 3.

*Loan servicing rights*

Loan servicing rights are subject to impairment testing. A valuation model, which utilizes a discounted cash flow analysis using interest rates and prepayment speed assumptions currently quoted for comparable instruments and a discount rate determined by management, is used for impairment testing. If the valuation model reflects a value less than the carrying value, loan servicing rights are adjusted to fair value through a valuation allowance as determined by the model. As such, the Corporation classifies loan servicing rights subjected to nonrecurring fair value adjustments as Level 3.

Table of Contents

**Note 13 Fair Value Measurements (continued)**

*Goodwill*

Goodwill is subject to an impairment test that requires an estimate of the fair value of the Corporation's reporting units. Estimating the fair value of reporting units is a subjective process involving the use of estimates and judgments, particularly related to future cash flows, discount rates (including market risk premiums) and market multiples. The fair values of the reporting units were determined using a blend of two commonly used valuation techniques, the market approach and the income approach. The Corporation gives consideration to two valuation techniques, as either technique can be an indicator of value. For the market approach, valuations of reporting units were based on an analysis of relevant price multiples in market trades in industries similar to the reporting unit. Market trades do not consider a control premium associated with an acquisition or a sale transaction. For the income approach, estimated future cash flows and terminal value (value at the end of the cash flow period, based on price multiples) were discounted. The discount rate was based on the imputed cost of equity capital. Material assumptions used in the valuation models included the comparable public company price multiples used in the terminal value, future cash flows and the market risk premium component of the discount rate. Due to the general uncertainty and depressed earning capacity in the financial services industry as of the measurement date, the Corporation concluded that the valuation under the income approach more clearly reflected the long-term future earning capacity of the reporting unit than the valuation under the market approach, and thus gave greater weight to the income approach.

As discussed in Note 1, the Corporation conducted an additional impairment test in the first quarter 2009. Prior to conducting the impairment test, management reviewed the assumptions and methodologies utilized in calculating the fair value of the reporting units and elected to update certain of the material assumptions described above. The updated assumptions incorporated the Corporation's view that the current market conditions reflected only a short-term, distressed view of recent and near-term results rather than future long-term earning capacity. The additional testing performed in first quarter 2009 did not indicate that an impairment charge was required. Had the Corporation not updated the assumptions, fair value of the reporting units would have continued to be in excess of the carrying value. The Corporation also performed a stress test of each of the material assumptions identified above which supported the conclusion that an impairment charge was not required. The Corporation assessed whether there were any indicators of impairment in the second quarter of 2009 and concluded that additional impairment testing was not required.

If the impairment testing discussed above resulted in impairment, the Corporation would classify goodwill subjected to nonrecurring fair value adjustments as Level 3. Additional information regarding the goodwill impairment testing can be found in Note 1.

*Deposit liabilities*

The estimated fair value of demand deposits, consisting of checking, savings and certain money market deposit accounts, is represented by the amounts payable on demand. The carrying amount of deposits in foreign offices approximates their estimated fair value, while the estimated fair value of term deposits is calculated by discounting the scheduled cash flows using the June 30, 2009 rates offered on these instruments.

*Short-term borrowings*

The carrying amount of federal funds purchased, securities sold under agreements to repurchase and other short-term borrowings approximates estimated fair value.

*Medium- and long-term debt*

The estimated fair value of the Corporation's variable rate medium- and long-term debt is represented by its carrying value. The estimated fair value of the fixed rate medium- and long-term debt is based on quoted market values. If quoted market values are not available, the estimated fair value is based on the market values of debt with similar characteristics.

*Credit-related financial instruments*

The estimated fair value of unused commitments to extend credit and standby and commercial letters of credit is represented by the estimated cost to terminate or otherwise settle the obligations with the counterparties. This amount is approximated by the fees currently charged to enter into similar arrangements, considering the remaining terms of the agreements and any changes in the credit quality of counterparties since the agreements were executed. This estimate of fair value does not take into account the significant value of the customer relationships and the future earnings potential involved in such arrangements as the Corporation does not believe that it would be practicable to estimate a representational fair value for these items.

Table of Contents**Note 13 Fair Value Measurements (continued)**Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The table below presents the recorded amount of assets and liabilities measured at fair value on a recurring basis.

<i>(in millions)</i>	Total	Level 1	Level 2	Level 3

Table of Contents**Note 13 Fair Value Measurements (continued)**Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Corporation may be required, from time to time, to record certain assets and liabilities at fair value on a nonrecurring basis in accordance with U.S. GAAP. These include assets that are recorded at the lower of cost or fair value that were recognized at fair value below cost at the end of the period. Assets and liabilities recorded at fair value on a nonrecurring basis are included in the table below.

<i>(in millions)</i>	Total	Level 1	Level 2	Level 3
June 30, 2009				
Loans	\$ 1,116	\$	\$	\$ 1,116
Other assets (a)	182		16	166
Total assets at fair value	\$ 1,298	\$	\$ 16	\$ 1,282
Total liabilities at fair value	\$	\$	\$	\$
December 31, 2008				
Loans	\$ 904	\$	\$	\$ 904
Other assets (a)	153		5	148
Total assets at fair value	\$ 1,057	\$	\$ 5	\$ 1,052
Total liabilities at fair value	\$	\$	\$	\$

(a) Includes foreclosed assets, private equity investments, loans held-for-sale and loan servicing rights.

Estimated Fair Values of Financial Instruments Not Recorded at Fair Value in their Entirety on a Recurring Basis

Disclosure of the estimated fair values of financial instruments, which differ from carrying values, often requires the use of estimates. In cases where quoted market values in an active market are not available, the Corporation uses present value techniques and other valuation methods to estimate the fair values of its financial instruments. These valuation methods require considerable judgment and the resulting estimates of fair value can be significantly affected by the assumptions made and methods used.

The amounts provided herein attempt to estimate the exchange price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (i.e., not a forced transaction, such as a liquidation or distressed sale) between market participants at the measurement date. However, the calculated fair value estimates in many instances cannot be substantiated by comparison to independent markets and, in many cases, may not be realizable in a current sale of the financial instrument. The Corporation typically holds the majority of its financial instruments until maturity, and thus does not expect to realize many of the estimated amounts disclosed. The disclosures also do not include estimated fair value amounts for items which are not defined as financial instruments, but which have significant value. These include such items as core deposit intangibles, the future earnings potential of significant customer relationships and the value of trust operations and other fee generating businesses. The Corporation believes the imprecision of an estimate could be significant.

Table of Contents**Note 13 Fair Value Measurements (continued)**

The carrying amount and estimated fair value of financial instruments not recorded at fair value in their entirety on a recurring basis on the Corporation's consolidated balance sheets are as follows:

<i>(in millions)</i>	June 30, 2009	
	Carrying Amount	Estimated Fair Value
<b>Assets</b>		
Cash and due from banks	\$ 948	\$ 948
Federal funds sold and securities purchased under agreements to resell	650	650
Interest-bearing deposits with banks	3,542	3,542
Loans held-for-sale	37	37
Investment securities available-for-sale	7,757	7,757
Total loans, net of allowance for loan losses (a)	45,672	45,537
Customers' liability on acceptances outstanding	7	7
Loan servicing rights	9	9
<b>Liabilities</b>		
Demand deposits (noninterest-bearing)	13,558	13,558
Interest-bearing deposits	27,433	27,507
Total deposits	40,991	41,065
Short-term borrowings	490	490
Acceptances outstanding	7	7
Medium- and long-term debt	13,571	12,791
Credit-related financial instruments	(90)	(119)

(a) Includes \$1,116 million of impaired loans recorded at fair value at June 30, 2009 on a nonrecurring basis.

**Note 14 Business Segment Information**

The Corporation has strategically aligned its operations into three major business segments: the Business Bank, the Retail Bank, and Wealth & Institutional Management. These business segments are differentiated based on the type of customer and the related products and services provided. In addition to the three major business segments, the Finance Division is also reported as a segment. The Finance segment includes the Corporation's securities portfolio and asset and liability management activities. This segment is responsible for managing the Corporation's funding, liquidity and capital needs, performing interest sensitivity analysis and executing various strategies to manage the Corporation's exposure to liquidity, interest rate risk, and foreign exchange risk. The Other category includes discontinued operations, the income and expense impact of equity and cash, tax benefits not assigned to specific business segments and miscellaneous other expenses of a corporate nature. Business segment results are produced by the Corporation's internal management accounting system. This system measures financial results based on the internal business unit structure of the Corporation. Information presented is not necessarily comparable with similar information for any other financial institution. The management accounting system assigns balance sheet and income statement items to each business segment using certain methodologies, which are regularly reviewed and refined. For comparability purposes, amounts in all periods are based on business segments and methodologies in effect at June 30, 2009. These methodologies may be modified as the management accounting system is enhanced and changes occur in the organizational structure and/or product lines.

For a description of the business activities of each business segment and further information on the methodologies, which form the basis for these results, refer to Note 25 to the consolidated financial statements in the Corporation's 2008 Annual Report.

(a) Return on average assets is calculated based on the greater of average assets or average liabilities and attributed equity.

(b) Net interest margin is calculated based on the greater of average earning assets or average deposits and purchased funds.

FTE - Fully Taxable Equivalent

N/M - Not Meaningful

Table of Contents

**Note 14 - Business Segment Information (continued)**

The Corporation's management accounting system also produces market segment results for the Corporation's four primary geographic markets: Midwest, Western, Texas and Florida. In addition to the four primary geographic markets, Other Markets and International are also reported as market segments. Market segment results are provided as supplemental information to the business segment results and may not meet all operating segment criteria as set forth in Statement of Financial Accounting Standards No. 131, Disclosures about Segments of an Enterprise and Related Information, (SFAS 131). For comparability purposes, amounts in all periods are based on market segments and methodologies in effect at June 30, 2009.

The Midwest market consists of operations located in the states of Michigan, Ohio and Illinois. Currently, Michigan operations represent the significant majority of the Midwest market.

The Western market consists of the states of California, Arizona, Nevada, Colorado and Washington. Currently, California operations represent the significant majority of the Western market.

The Texas and Florida markets consist of operations located in the states of Texas and Florida, respectively.

Other Markets include businesses with a national perspective, the Corporation's investment management and trust alliance businesses as well as activities in all other markets in which the Corporation has operations, except for the International market, as described below.

The International market represents the activity of the Corporation's international finance division, which provides banking services primarily to foreign-owned, North American-based companies and secondarily to international operations of North American-based companies.

The Finance & Other Businesses segment includes the Corporation's securities portfolio, asset and liability management activities, discontinued operations, the income and expense impact of equity and cash not assigned to specific business/market segments, tax benefits not assigned to specific business/market segments and miscellaneous other expenses of a corporate nature. This segment includes responsibility for managing the Corporation's funding, liquidity and capital needs, performing interest sensitivity analysis and executing various strategies to manage the Corporation's exposure to liquidity, interest rate risk and foreign exchange risk.

**Note 15 Discontinued Operations**

In December 2006, the Corporation sold its ownership interest in Munder Capital Management (Munder) to an investor group. As a result of the sale transaction, the Corporation accounted for Munder as a discontinued operation. As such, Munder was reported in Other and Finance & Other for business and market segment reporting purposes, respectively.

The impact of discontinued operations was not material to net income for the three- and six-month periods ended June 30, 2009 and 2008.

**Note 16 Variable Interest Entities (VIE s)**

The Corporation evaluates its interest in certain entities to determine if these entities meet the definition of a VIE, and whether the Corporation was the primary beneficiary and should consolidate the entity based on the variable interests it held. The following provides a summary of the VIE s in which the Corporation has a significant interest.

The Corporation owns 100 percent of the common stock of an entity formed in 2007 to issue trust preferred securities. This entity meets the definition of a VIE, but the Corporation is not the primary beneficiary as the expected losses and residual returns of the trust are absorbed by the trust preferred stock holders. The trust preferred securities held by this entity (\$500 million at June 30, 2009) qualify as Tier 1 capital and are classified as subordinated debt included in medium- and long-term debt on the consolidated balance sheets, with associated interest expense recorded in interest on medium- and long-term debt on the consolidated statements of income. The Corporation is not exposed to loss related to this VIE.

The Corporation has limited partnership interests in three venture capital funds, which were acquired in 1998, 1999 and 2001, where the general partner (an employee of the Corporation) in these three partnerships is considered a related party to the Corporation. These entities meet the definition of a VIE; however, the Corporation is not the primary beneficiary of the entities as the majority of variable interests are expected to accrue to the nonaffiliated limited partners. As such, the Corporation accounts for its interest in these partnerships on the cost method. Investments are included in accrued income and other assets on the consolidated balance sheets, with income (net of write-downs) recorded in other noninterest income on the consolidated statements of income. These entities had approximately \$143 million in assets at June 30, 2009. Exposure to loss as a result of involvement with these entities at June 30, 2009 was limited to approximately \$5 million of book basis of the Corporation s investments and approximately \$1 million of commitments for future investments.

The Corporation, as a limited partner, also holds an insignificant ownership percentage interest in 132 other venture capital and private equity investment partnerships where the Corporation is not related to the general partner. While these entities may meet the definition of a VIE, the Corporation is not the primary beneficiary of any of these entities as a result of its insignificant ownership percentage interest. The Corporation accounts for its interests in these partnerships on the cost method. Investments are included in accrued income and other assets on the consolidated balance sheets, with income (net of write-downs) recorded in other noninterest income on the consolidated statements of income. Exposure to loss as a result of involvement with these entities at June 30, 2009 was limited to approximately \$55 million of book basis of the Corporation s investments and approximately \$30 million of commitments for future investments.

Two limited liability subsidiaries of the Corporation are the general partners in two investment fund partnerships, formed in 1999 and 2003. These subsidiaries manage the investments held by these funds. These two investment partnerships meet the definition of a VIE. In the investment fund partnership formed in 1999, the Corporation is not the primary beneficiary of the entity as the majority of the variable interests are expected to accrue to the nonaffiliated limited partners. As such, the Corporation accounts for its indirect interests in this partnership on the cost method. This investment partnership had approximately \$49 million in assets at June 30, 2009 and was structured so that the Corporation's exposure to loss as a result of its interest would be limited to the book basis of the Corporation's investment in the limited liability subsidiary, which was insignificant at June 30, 2009. In the investment fund partnership formed in 2003, the Corporation is the primary beneficiary and consolidates the entity as the majority of the variable interests are expected to accrue to the Corporation. This investment partnership had assets of approximately \$5 million at June 30, 2009 and was structured so that the Corporation's exposure to loss as a result of its interest would be limited to the book basis of the Corporation's investment in the limited liability subsidiary, which was insignificant at June 30, 2009. Total fee revenue earned by the Corporation as general partner for these funds was insignificant (less than \$0.1 million) for each of the three- and six-month periods ended June 30, 2009 and 2008.

Table of Contents**Note 16 Variable Interest Entities (VIE s) (continued)**

The Corporation has a significant limited partnership interest in 20 low income housing tax credit/historic rehabilitation tax credit partnerships, acquired at various times from 1992 to 2008. These entities meet the definition of a VIE; however, the Corporation is not the primary beneficiary of the entities as the majority of the variable interests are expected to accrue to the general partner, who is also the party engaging in activities that are most closely associated with the entities. The Corporation accounts for its interest in these partnerships on the cost or equity method. These entities had approximately \$142 million in assets at June 30, 2009. Exposure to loss as a result of its involvement with these entities at June 30, 2009 was limited to approximately \$10 million of book basis of the Corporation's investment, which includes unused commitments for future investments.

The Corporation, as a limited partner, also holds an insignificant ownership percentage interest in 116 other low income housing tax credit/historic rehabilitation tax credit partnerships. While these entities may meet the definition of a VIE, the Corporation is not the primary beneficiary of any of these entities as a result of its insignificant ownership percentage interest. As such, the Corporation accounts for its interest in these partnerships on the cost or equity method. Exposure to loss as a result of its involvement with these entities at June 30, 2009 was limited to approximately \$333 million of book basis of the Corporation's investment, which includes unused commitments for future investments.

As a limited partner, the Corporation obtains income tax credits and deductions from the operating losses from these low income housing tax credit/historic rehabilitation tax credit partnerships, which are recorded as a reduction of income tax expense (or an increase to income tax benefit) and a reduction of federal income taxes payable. These income tax credits and deductions are allocated to the funds' investors based on their ownership percentages. Investment balances, including all legally binding commitments to fund future investments, are included in accrued income and other assets on the consolidated balance sheets, with amortization and other write-downs of investments recorded in other noninterest income on the consolidated statements of income. In addition, a liability is recognized in accrued expenses and other liabilities on the consolidated balance sheets for all legally binding unfunded commitments to fund low income housing partnerships (\$79 million at June 30, 2009).

The Corporation provided no financial or other support to any of the above VIE s that was not contractually required during the three- and six-month periods ended June 30, 2009, respectively.

The following table summarizes the impact of these VIE s on line items on the Corporation's consolidated statements of income.

<i>(in millions)</i>	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
Classification in Earnings	2009	2008	2009	2008
Interest on medium- and long-term debt	\$ 8	\$ 8	\$ 17	\$ 17
Other noninterest income	(17)	(12)	(31)	(22)
Provision for income taxes (a)	(12)	(11)	(23)	(21)

(a) Income tax credits from low income housing tax credit/historic rehabilitation tax credit partnerships.

Additional information regarding the Corporation's consolidation policy can be found in Note 1 to the consolidated financial statements in the Corporation's 2008 Annual Report.

Table of Contents**ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**Forward-Looking Statements

This report includes forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Any statements in this report that are not historical facts are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Words such as anticipates, believes, feels, expects, estimates, seeks, strives, plans, intends, outlook, forecast, position, target, potential, strategy, goal, aspiration, outcome, continue, remain, maintain, trend, objective and variations of such words and similar or future or conditional verbs such as will, would, should, could, might, can, may or similar expressions, as they relate to the Corporation's management, are intended to identify forward-looking statements. These forward-looking statements are predicated on the beliefs and assumptions of the Corporation's management based on information known to the Corporation's management as of the date of this report and do not purport to speak as of any other date. Forward-looking statements may include descriptions of plans and objectives of the Corporation's management for future or past operations, products or services, and forecasts of the Corporation's revenue, earnings or other measures of economic performance, including statements of profitability, business segments and subsidiaries, estimates of credit trends and global stability. Such statements reflect the view of the Corporation's management as of this date with respect to future events and are subject to risks and uncertainties. Should one or more of these risks materialize or should underlying beliefs or assumptions prove incorrect, the Corporation's actual results could differ materially from those discussed. Factors that could cause or contribute to such differences are further economic downturns, changes in the pace of an economic recovery and related changes in employment levels, changes in real estate values, fuel prices, energy costs or other events that could affect customer income levels or general economic conditions, the effects of recently enacted legislation, such as the Emergency Economic Stabilization Act of 2008 and the American Recovery and Reinvestment Act of 2009, and actions taken by the U.S. Department of Treasury, the Board of Governors of the Federal Reserve System, the Texas Department of Banking and the Federal Deposit Insurance Corporation, the effects of war and other armed conflicts or acts of terrorism, the effects of natural disasters including, but not limited to, hurricanes, tornadoes, earthquakes, fires, droughts and floods, the disruption of private or public utilities, the implementation of the Corporation's strategies and business models, management's ability to maintain and expand customer relationships, changes in customer borrowing, repayment, investment and deposit practices, management's ability to retain key officers and employees, changes in the accounting treatment of any particular item, the impact of regulatory examinations, declines or other changes in the businesses or industries in which the Corporation has a concentration of loans, including, but not limited to, the automotive production industry and the real estate business lines, the anticipated performance of any new banking centers, the entry of new competitors in the Corporation's markets, changes in the level of fee income, changes in applicable laws and regulations, including those concerning taxes, banking, securities and insurance, changes in trade, monetary and fiscal policies, including the interest rate policies of the Board of Governors of the Federal Reserve System, fluctuations in inflation or interest rates, changes in general economic, political or industry conditions and related credit and market conditions, the interdependence of financial service companies and adverse conditions in the stock market. The Corporation cautions that the foregoing list of factors is not exclusive. For discussion of factors that may cause actual results to differ from expectations, please refer to our filings with the Securities and Exchange Commission. Forward-looking statements speak only as of the date they are made. The Corporation does not undertake to update forward-looking statements to reflect facts, circumstances, assumptions or events that occur after the date the forward-looking statements are made. For any forward-looking statements made in this report, the Corporation claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Results of Operations

Net income for the three months ended June 30, 2009 was \$18 million, a decrease of \$38 million, or 68 percent, from \$56 million reported for the three months ended June 30, 2008. The decrease in net income in the second quarter 2009 from the comparable prior year quarter resulted primarily from increases of \$131 million in the provision for credit losses (\$142 million increase in the provision for loan losses, \$11 million decrease in the provision for credit losses on lending-related commitments) and \$43 million in Federal Deposit Insurance Corporation (FDIC) insurance expense, and a \$40 million decline in net interest income, partially offset by a \$99 million increase in net securities gains and a \$31 million decrease in salaries expense. The second quarters of both 2009 and 2008 contained large tax adjustments which, in addition to the decline in pre-tax income, resulted in a \$94 million decrease in the provision for income taxes. After preferred dividends of \$34 million, the net

Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

loss applicable to common stock was \$16 million for the second quarter 2009, compared to net income applicable to common stock of \$56 million in the same period a year ago. The diluted net loss per common share was \$0.10 in the second quarter 2009, compared to diluted net income per common share of \$0.37 for the same period a year ago.

Table of Contents

Net income for the first six months of 2009 was \$27 million, a decrease of \$138 million, or 83 percent, from \$165 million reported for the six months ended June 30, 2008. The decrease in net income in the six months ended June 30, 2009 from the comparable period last year resulted primarily from a \$170 million increase in the provision for credit losses (\$186 million increase in the provision for loan losses, \$16 million decrease in the provision for credit losses on lending-related commitments), a \$132 million decline in net interest income and a \$56 million increase in FDIC insurance expense, partially offset by a \$90 million increase in net securities gains and a \$60 million decrease in salaries expense. Both the six-month periods ended June 30, 2009 and June 30, 2008 contained large tax adjustments which, in addition to the decline in pre-tax income, resulted in a \$136 million decrease in the provision for income taxes. After preferred dividends of \$67 million, the net loss applicable to common stock was \$40 million for the first six months of 2009, compared to net income applicable to common stock of \$165 million in the same period a year ago. The diluted net loss per common share was \$0.26 for the first six months of 2009, compared to diluted net income per common share of \$1.09 for the comparable period last year.

2009 Outlook

- Management continues to focus on developing new and expanding existing customer relationships. Management expects subdued loan demand in light of a domestic economy that is expected to continue contracting in the near term.
- Management expects the net interest margin to benefit from improved loan pricing and maturities of higher-cost wholesale funding. Excess liquidity is expected to offset those benefits for the near-term, with the third quarter 2009 net interest margin expected to be relatively unchanged from the second quarter. Excess liquidity is expected to diminish during the fourth quarter from maturities of wholesale funding, resulting in net interest margin expansion. The target federal funds and short-term LIBOR rates are expected to remain flat for the remainder of 2009.
- Based on no significant further deterioration of the economic environment, management expects net credit-related charge-offs in the third quarter 2009 to be similar to second quarter 2009 and to improve modestly in the fourth quarter 2009. The provision for credit losses is expected to continue to exceed net charge-offs.
- Management expects additional securities gains from the sale of mortgage-backed government agency securities. Mortgage-backed government agency securities are expected to average about 10 percent of average assets.
- Management expects a mid- to high-single digit decrease in full-year 2009 noninterest expenses, compared to full-year 2008, due to control of discretionary expenses and workforce.

Net Interest Income

Net interest income was \$402 million for the three months ended June 30, 2009, a decrease of \$40 million compared to \$442 million for the same period in 2008. The decrease in net interest income in the second quarter 2009, compared to the same period in 2008, resulted primarily from a decrease in earning assets, the reduced contribution of noninterest-bearing funds in a significantly lower rate environment, a competitive environment for deposit pricing and the impact of a higher level of nonaccrual loans, partially offset by a \$30 million tax-related non-cash charge to lease income in the second quarter 2008. The rate-volume analysis in Table I of this financial review details the components of the change in net interest income on a fully taxable equivalent (FTE) basis for the three months ended June 30, 2009, compared to the same period in the prior year. On a FTE basis, net interest income decreased \$39 million to \$404 million for the three months ended June 30, 2009, from \$443 million for the comparable period in 2008. Average earning assets decreased \$1.6 billion, or three percent, to \$59.5 billion in the second quarter 2009, compared to the second quarter 2008, primarily due to a \$4.7 billion, or nine percent, decrease in average loans to \$47.6 billion, partially offset by increases of \$1.8 billion in average interest-bearing deposits with the Federal Reserve Bank and \$1.5 billion in average investment securities available-for-sale. The net interest margin (FTE) for the three months ended June 30, 2009 was 2.73 percent, compared to

2.91 percent for the comparable period in 2008. The 18 basis point decline in the net interest margin (FTE) resulted primarily from the reasons cited for the decrease in net interest income discussed above. In addition, the net interest margin was reduced by approximately eight basis points in the second quarter 2009 from excess liquidity, represented by \$1.8 billion of average balances deposited with the Federal Reserve Bank. This excess liquidity resulted from strong deposit growth and securities sales at a time when loan demand remained weak. These declines were partially offset by a 19 basis point increase resulting from the second quarter 2008 tax-related non-cash charge to lease income discussed above and an increase in loan spreads.

Net interest income was \$786 million for the six months ended June 30, 2009, a decrease of \$132 million compared to \$918 million for the same period in 2008. The decrease in net interest income in the six months ended 2009, compared to the same period in 2008, was primarily due to the same reasons cited in the quarterly discussion above. Table II provides an analysis of net interest income for the first six months of 2009 on a FTE basis compared to the same period in the prior year. On a FTE basis, net interest income for the six months ended June 30, 2009 was

Table of Contents

\$790 million, compared to \$920 million for the same period in 2008, a decrease of \$130 million. Average earning assets increased \$328 million, or one percent, to \$60.6 billion for the six months ended June 30, 2009, compared to \$60.3 billion for the same period in the prior year, primarily due to increases of \$2.2 billion in average investment securities available-for-sale and \$1.8 billion in average interest-bearing deposits with the Federal Reserve Bank, partially offset by a \$3.5 billion, or seven percent, decrease in average loans to \$48.6 billion for the six months ended June 30, 2009. The net interest margin (FTE) for the six months ended June 30, 2009 decreased to 2.63 percent from 3.07 percent for the same period in 2008, primarily due to the same reasons cited in the quarterly discussion above. The impact of average balances deposited with the Federal Reserve Bank, as discussed above, was a reduction of approximately eight basis points to the net interest margin (FTE) for the six months ended June 30, 2009. The impact of the 2008 tax-related non-cash charge to lease income on the change in the net interest margin, discussed above, was an increase of 10 basis points.

Net interest income and net interest margin are impacted by the operations of the Corporation's Financial Services Division. Financial Services Division customers deposit large balances (primarily noninterest-bearing) and the Corporation pays certain expenses on behalf of such customers (customer services included in noninterest expenses on the consolidated statements of income) and/or makes low-rate loans to such customers (included in net interest income on the consolidated statements of income). Footnote (a) to Tables I and II of this financial review displays average Financial Services Division loans and deposits, with related interest income/expense and average rates.

For further discussion of the effects of market rates on net interest income, refer to Item 3. Quantitative and Qualitative Disclosures about Market Risk in Part I of this financial review.

Management expects the net interest margin to benefit from improved loan pricing and maturities of higher-cost wholesale funding. Excess liquidity is expected to offset those benefits for the near-term, with the third quarter 2009 net interest margin expected to be relatively unchanged from the second quarter. Excess liquidity is expected to diminish during the fourth quarter from maturities of wholesale funding, resulting in net interest margin expansion. The target federal funds and short-term LIBOR rates are expected to remain flat for the remainder of 2009.

Provision for Credit Losses

The provision for loan losses was \$312 million for the second quarter 2009, compared to \$170 million for the same period in 2008. The provision for loan losses for the first six months of 2009 was \$515 million, compared to \$329 million for the same period in 2008. The Corporation establishes this provision to maintain an adequate allowance for loan losses, which is discussed under the Credit Risk subheading in the section entitled Risk Management of this financial review. The increases of \$142 million and \$186 million in the provision for loan losses in the three- and six-month periods ended June 30, 2009, respectively, when compared to the same periods in 2008, resulted primarily from challenges in residential real estate development (Midwest, Florida and Other markets), Middle Market lending (Midwest market), Global Corporate Banking (Western market) and Leasing (Midwest market) loan portfolios. The National economy was hampered by turmoil in the financial markets, declining home values and global recession. Michigan continued to contract for a sixth consecutive year. The average Michigan Business Activity Index compiled by the Corporation for January through May 2009 declined 16 percent when compared to the average for the full year 2008. The Michigan Business Activity index represents nine different measures of Michigan economic activity compiled by the Corporation. The major factors negatively impacting the Michigan economy were the ongoing structural adjustments in the state's auto sector, as exemplified by the recent bankruptcies of General Motors and Chrysler, and the spillover of the national recession that had a particularly adverse impact on U.S. car sales. The California economy lagged behind the national economy, primarily due to continued weakness in the state's residential real estate sector, evidenced by a 55 percent decline in building permits in the first five months of 2009 when compared to the same period in 2008. The California housing sector does appear to be stabilizing as indicated by increases in home sales over the past year and by rising median house prices in the three-month period ending in May 2009. However, efforts to resolve California's budget crisis are likely to cause a significant additional strain on the state's economy. A wide variety of economic reports indicate that Texas continued to outperform the nation in 2008 and early 2009. The Texas economy began contracting following the financial market meltdown in the fall of 2008 but has experienced a much more modest retrenchment in homebuilding than most other states. However, the state's energy and export sectors have experienced a significant retrenchment as oil and gas drilling declined in reaction to the severe drop in crude oil and natural gas prices in the first six months of 2009, when compared to the same period in 2008. Forward-looking indicators suggest that recent trends in economic conditions in the Corporation's primary geographic markets are likely to continue until the national economy begins expanding.

The provision for credit losses on lending-related commitments were negative provisions of \$4 million and \$5 million for the three- and six-month periods ended June 30, 2009, respectively, compared to provisions of \$7 million and \$11 million for the comparable periods in 2008. The Corporation establishes this provision to maintain

Table of Contents

an adequate allowance to cover probable credit losses inherent in lending-related commitments. The decreases for the three- and six-month periods ended June 30, 2009, when compared to the same periods in 2008, resulted primarily from the cancellation and drawdown of letters of credit in the Midwest market.

Based on no significant further deterioration of the economic environment, management expects net credit-related charge-offs in the third quarter 2009 to be similar to second quarter 2009 and to improve modestly in the fourth quarter 2009. The provision for credit losses is expected to continue to exceed net charge-offs.

**Noninterest Income**

Noninterest income was \$298 million for the three months ended June 30, 2009, an increase of \$56 million, or 24 percent, compared to \$242 million for the same period in 2008. The increase in noninterest income in the second quarter 2009, compared to the second quarter 2008, was primarily due to a \$99 million increase in net securities gains and a \$6 million second quarter 2009 gain on the sale of the Corporation's proprietary defined contribution plan recordkeeping business. These increases were partially offset by a \$16 million loss on the termination of leveraged leases, a \$10 million decrease in fiduciary income and smaller decreases in several other fee categories. Net securities gains in the second quarter 2009 included \$109 million of gains on the sale of mortgage-backed government agency securities and \$3 million of gains on the redemption of \$64 million par value of auction-rate securities, while net securities gains in the second quarter 2008 included a \$14 million gain on the sale of MasterCard shares.

Noninterest income was \$521 million for the first six months of 2009, an increase of \$42 million, or nine percent, compared to the same period in 2008, due primarily to a \$90 million increase in net securities gains, a \$24 million first quarter 2009 gain on the termination of certain structured lease transactions and a \$6 million second quarter 2009 gain on the sale of the Corporation's proprietary defined contribution plan recordkeeping business. These increases were partially offset by a \$16 million second quarter 2009 loss on the termination of leveraged leases, a \$20 million decrease in fiduciary income and smaller decreases in several other fee categories. Net securities gains increased primarily due to \$117 million of gains on the sale of mortgage-backed government agency securities and \$8 million of gains on the redemption of \$164 million par value of auction-rate securities in the first six months of 2009, compared to a \$21 million gain on the sale of Visa shares and a \$14 million gain on the sale of MasterCard shares in the first six months of 2008.

Management expects additional securities gains from the sale of mortgage-backed government agency securities in the second half of 2009. Mortgage-backed government agency securities are expected to average about 10 percent of average assets.

**Noninterest Expenses**

Noninterest expenses were \$429 million for the three months ended June 30, 2009, an increase of \$6 million, or two percent, from \$423 million for the comparable period in 2008. The increase in noninterest expenses in the second quarter 2009, compared to the second quarter 2008, reflected increases in FDIC insurance expense (\$43 million), other real estate expense (\$9 million) and pension expense (\$9 million), partially offset by decreases in salaries expense (\$31 million) and the provision for credit losses on lending-related commitments (\$11 million) and targeted decreases in discretionary categories. The increase in FDIC insurance expense was primarily due to the second quarter special assessment of \$29 million, resulting from an industry-wide FDIC special assessment charge, and an increase in base assessment rates. As

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

detailed in the table below, total salaries expense decreased \$31 million, or 16 percent, in the three months ended June 30, 2009, compared to the same period in 2008, primarily due to decreases in incentives (\$20 million) and regular salaries (\$9 million). Contributing to the decline in salaries expense was a decrease of approximately 1,000 full-time equivalent staff, or ten percent, from June 30, 2008 to June 30, 2009.

Noninterest expenses of \$826 million were unchanged for the first six months of 2009, compared to the comparable period in 2008. Noninterest expenses in the first six months of 2009, compared to the first six months of 2008, reflected increases in FDIC insurance expense (\$56 million), pension expense (\$20 million), other real estate expense (\$14 million) and litigation and operational losses (\$10 million), offset by decreases in salaries expense (\$60 million) and the provision for credit losses on lending-related commitments (\$16 million) and targeted decreases in discretionary categories. The \$10 million increase in litigation and operational losses resulted primarily from the first quarter 2008 reversal of a \$13 million Visa loss sharing arrangement expense. The remaining increases and decreases for the first six months of 2009, compared to the first six months of 2008, were primarily due to the same reasons cited in the quarterly discussion above.

Table of Contents

The following table summarizes the various components of salaries and employee benefits expense.

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
<b>Salaries</b>				
Salaries - regular	\$ 142	\$ 151	\$ 289	\$ 302
Severance	(1)	1	4	3
Incentives (including commissions)	15	35	28	67
Deferred compensation plan costs	8	4	3	(1)
Share-based compensation	7	11	18	31
<b>Total salaries</b>	<b>171</b>	<b>202</b>	<b>342</b>	<b>402</b>
<b>Employee benefits</b>				
Pension expense	14	5	30	10
Other employee benefits	39	43	78	85
<b>Total employee benefits</b>	<b>53</b>	<b>48</b>	<b>108</b>	<b>95</b>
<b>Total salaries and employee benefits</b>	<b>\$ 224</b>	<b>\$ 250</b>	<b>\$ 450</b>	<b>\$ 497</b>

Management expects a mid- to high-single digit decrease in full-year 2009 noninterest expenses, compared to full-year 2008, due to control of discretionary expenses and workforce.

Provision for Income Taxes

The provision for income taxes for the second quarter 2009 was a benefit of \$59 million, compared to a provision of \$35 million for the same period a year ago. For the six months ended June 30, 2009, the provision for income taxes was a benefit of \$60 million, compared to a provision of \$76 million for the same period a year ago. The large tax benefit in 2009 reflected the impact of permanent differences, credits and the tax adjustments described below.

In the second quarter 2009, the Corporation elected to change the method of calculating interim period federal income taxes from an estimated annual effective tax rate method to a method which determines taxes based on each discrete quarter's pre-tax income. The change in method resulted in an increase of approximately \$20 million to the income tax benefit in the second quarter 2009, which represents the necessary adjustment to conform the prior quarter tax provision to the new methodology. The provision for income taxes for the three and six months ended June 30, 2009 also reflected \$8 million of net after-tax adjustments including settlements related to federal and state tax audits. The provision for income taxes for the three and six months ended June 30, 2008 was impacted by an after-tax charge of \$13 million to increase reserves for interest on tax liabilities related to certain structured lease transactions. For further information on the change in method of calculating interim period federal income taxes, refer to the Critical Accounting Policies section of this financial review.

Table of ContentsBusiness Segments

The Corporation's operations are strategically aligned into three major business segments: the Business Bank, the Retail Bank, and Wealth & Institutional Management. These business segments are differentiated based on the products and services provided. In addition to the three major business segments, the Finance Division is also reported as a segment. The Other category includes discontinued operations and items not directly associated with these business segments or the Finance Division. Note 14 to the consolidated financial statements presents financial results of these business segments for the six months ended June 30, 2009 and 2008. For a description of the business activities of each business segment and the methodologies which form the basis for these results, refer to Note 14 to these consolidated financial statements and Note 25 to the consolidated financial statements in the Corporation's 2008 Annual Report.

The following table presents net income (loss) by business segment.

<i>(dollar amounts in millions)</i>	Six Months Ended June 30,			
	2009		2008	
Business Bank	\$ 62	96%	\$ 118	60%
Retail Bank	(26)	(40)	47	23
Wealth & Institutional Management	28	44	34	17
	64	100%	199	100%
Finance	(42)		(8)	
Other (a)	5		(26)	
Total	\$ 27		\$ 165	

*(a) Includes discontinued operations and items not directly associated with the three major business segments or the Finance Division*

The Business Bank's net income of \$62 million decreased \$56 million for the six months ended June 30, 2009, compared to the six months ended June 30, 2008. Net interest income (FTE) was \$640 million, an increase of \$15 million from the comparable prior year period. The increase in net interest income (FTE) was primarily due to increased loan spreads and the reduced negative impact of the Financial Services Division (see footnote (b) to Table 1 of this financial review), partially offset by a \$3.3 billion decrease in average loans, excluding the Financial Services Division, and a \$169 million decrease in average deposits, excluding the Financial Services Division. The provision for loan losses of \$429 million increased \$160 million from the comparable period in the prior year, primarily due to increases in reserves for the Middle Market, Commercial Real Estate, Global Corporate Banking and Leasing loan portfolios, partially offset by a reduction in reserves for Western residential real estate developers, mostly in California. Net credit-related charge-offs of \$334 million increased \$138 million from the comparable period in the prior year, primarily due to an increase in charge-offs in the Middle Market, Leasing and Commercial Real Estate loan portfolios, partially offset by a decline in charge-offs for Western residential real estate developers, mostly in California. Noninterest income of \$142 million decreased \$23 million from the comparable prior year period, primarily due to a \$14 million second quarter 2008 gain on the sale of MasterCard shares and decreases in investment banking fees (\$7 million), bankcard fees (\$5 million) and customer derivative income (\$5 million), partially offset by an \$8 million 2009 net gain on the termination of leveraged leases and an increase in income from warrants (\$7 million). Noninterest expenses of \$313 million decreased \$49 million from the same period in the prior year, primarily due to decreases in allocated net corporate overhead expenses (\$23 million), incentive compensation (\$20 million), the provision for credit losses on lending-related commitments (\$11 million), customer services expense (\$7 million) and salaries expense (\$4 million), partially offset by increases in FDIC insurance expense (\$18 million) and other real estate expenses (\$10 million).

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

The Retail Bank's net income decreased \$73 million, to a net loss of \$26 million for the six months ended June 30, 2009, compared to net income of \$47 million for the six months ended June 30, 2008. Net interest income (FTE) of \$253 million decreased \$41 million from the comparable period in the prior year, primarily due to declines in loan and deposit spreads resulting from a significantly lower rate environment and a \$113 million decrease in average loans, partially offset by the benefit provided by an increase in average deposit balances of \$426 million. The provision for loan losses increased \$19 million from the comparable period in the prior year, due to an increase in reserves for the Small Business and Personal Banking loan portfolios. Noninterest income of \$93 million decreased \$36 million from the comparable prior year period, primarily due to a \$21 million first quarter 2008 gain on the sale of Visa shares, a decline in net gains from the sale of Small Business and student loans (\$7 million) and a decrease in service charges on deposit accounts (\$4 million). Noninterest expenses of \$328 million for the six months ended June 30, 2009 increased \$24 million from the same period in the prior year, primarily due to the first quarter 2008 reversal of a \$13 million Visa loss sharing arrangement expense, and increases in FDIC insurance

Table of Contents

expense (\$22 million) and net occupancy expense (\$4 million). The increase in net occupancy expense resulted primarily from new banking centers. These increases were partially offset by a \$9 million decrease in allocated net corporate overhead expenses.

Wealth & Institutional Management's net income of \$28 million decreased \$6 million for the six months ended June 30, 2009, compared to the six months ended June 30, 2008. Net interest income (FTE) of \$77 million increased \$4 million from the comparable period in the prior year, primarily due to a \$354 million increase in average loan balances. The provision for loan losses increased \$17 million from the comparable period in the prior year, primarily due to an increase in reserves for the Private Banking loan portfolio. Noninterest income of \$143 million decreased \$6 million from the comparable period in the prior year, primarily due to a \$19 million decrease in fiduciary income, partially offset by gains of \$8 million on the redemption of auction-rate-securities and a \$6 million second quarter 2009 gain on the sale of the Corporation's proprietary defined contribution plan recordkeeping business. Noninterest expenses of \$152 million decreased \$10 million from the same period in the prior year, primarily due to decreases in incentive compensation (\$6 million) and allocated net corporate overhead expenses (\$6 million), partially offset by an increase in FDIC insurance expense (\$3 million).

The net loss for the Finance Division was \$42 million for the six months ended June 30, 2009, compared to a net loss of \$8 million for the six months ended June 30, 2008. The increased loss in the six months ended June 30, 2009, compared to the same period in the prior year, resulted primarily from a decline of \$145 million in net interest income (FTE), largely due to the Corporation's internal funds transfer policy, which provides a longer-term value for deposits, principally noninterest-bearing deposits. In the current low rate environment, the Finance Division provided a greater benefit for deposits to the three major business segments in the first six months of 2009 than was actually realized at the corporate level. Noninterest expenses increased \$7 million, mostly due to an increase in FDIC insurance expense (\$6 million). Partially offsetting these items was an increase of \$107 million in noninterest income, primarily due to gains on the sale of mortgage-backed government agency securities.

**The Other category's net income was \$5 million for the six months ended June 30, 2009, compared to a net loss of \$26 million for the six months ended June 30, 2008. The increase in net income of \$31 million was primarily due to timing differences between when corporate expenses are reflected as a consolidated expense and when the expenses are allocated to the business segments.**

Market Segments

The Corporation's management accounting system also produces market segment results for the Corporation's four primary geographic markets: Midwest, Western, Texas and Florida. In addition to the four primary geographic markets, Other Markets and International are also reported as market segments. Note 14 to these consolidated financial statements contains a description and presents financial results of these market segments for the six months ended June 30, 2009 and 2008.

The following table presents net income (loss) by market segment.

Six Months Ended June 30,

Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

<i>(dollar amounts in millions)</i>	2009		2008	
Midwest	\$ 31	48%	\$ 139	70%
Western	(14)	(22)	(30)	(15)
Texas	19	30	36	18
Florida	(14)	(22)	(5)	(3)
Other Markets	27	43	41	21
International	15	23	18	9
	64	100%	199	100%
Finance & Other Businesses (a)	(37)		(34)	
Total	\$ 27		\$ 165	

*(a) Includes discontinued operations and items not directly associated with the market segments*

The Midwest market's net income decreased \$108 million to \$31 million for the six months ended June 30, 2009, compared to the six months ended June 30, 2008. Net interest income (FTE) of \$394 million increased \$17 million from the comparable period in the prior year, primarily due to an increase in loan spreads and the benefit provided by an \$883 million increase in average deposit balances, partially offset by a \$1.3 billion decline in average loan balances and a decline in deposit spreads resulting from a significantly lower rate environment. The

Table of Contents

provision for loan losses increased \$158 million, largely due to increases in reserves for the Middle Market, Commercial Real Estate (primarily residential real estate development) and Leasing loan portfolios. Net credit-related charge-offs of \$153 million increased \$83 million from the comparable period in the prior year, primarily due to an increase in charge-offs in the Middle Market, Leasing, Commercial Real Estate (largely residential real estate developers) and Small Business loan portfolios. Noninterest income of \$221 million decreased \$51 million from the comparable period in the prior year, primarily due to a \$17 million first quarter 2008 gain on the sale of Visa shares, a \$14 million second quarter 2008 gain on the sale of MasterCard shares, and decreases in fiduciary income (\$14 million), bankcard fees (\$6 million) and service charges on deposit accounts (\$6 million), partially offset by an \$8 million 2009 net gain on the termination of leveraged leases. Noninterest expenses of \$379 million decreased \$11 million from the same period in the prior year, primarily due to decreases in allocated net corporate overhead expenses (\$17 million), incentive compensation (\$9 million) and the provision for credit losses on lending-related commitments (\$8 million), and smaller decreases in several other expense categories, partially offset by the first quarter 2008 reversal of a \$10 million Visa loss sharing arrangement expense and increases in FDIC insurance expense (\$21 million) and other real estate expenses (\$5 million).

The Western market recorded a net loss of \$14 million for the six months ended June 30, 2009, compared to a net loss of \$30 million for the six months ended June 30, 2008. Net interest income (FTE) of \$301 million decreased \$42 million from the comparable prior year period, primarily due to a decline in deposit spreads resulting from a significantly lower rate environment, a \$1.5 billion decline in average loan balances (excluding the Financial Services Division) and a \$924 million decline in average deposit balances, excluding the Financial Services Division. The provision for loan losses decreased \$49 million, due to a reduction in reserves for the residential real estate developers, mostly in California, partially offset by an increase in Global Corporate Banking reserves. Noninterest income of \$67 million for the six months ended June 30, 2009 was unchanged from the same period in the prior year, as a \$10 million increase in warrant income was offset by smaller decreases in several other income categories. Noninterest expenses of \$217 million decreased \$6 million from the same period in the prior year, primarily due to decreases in allocated net corporate overhead expenses (\$11 million), customer services expense (\$7 million), incentive compensation (\$5 million) and smaller decreases in several other expense categories, partially offset by increases in FDIC insurance expense (\$13 million), other real estate expenses (\$8 million) and net occupancy expense (\$3 million). The increase in net occupancy expense resulted primarily from new banking centers.

The Texas market's net income decreased \$17 million to \$19 million for the six months ended June 30, 2009, compared to the six months ended June 30, 2008. Net interest income (FTE) of \$143 million decreased \$4 million from the comparable period in the prior year, primarily due to declines in deposit spreads, partially offset by an increase in loan spreads and the benefit provided by an increase of \$315 million in average deposit balances. The provision for loan losses increased \$22 million the first six months of 2009, compared to the first six months of 2008, largely due to increases in reserves for the Commercial Real Estate and Energy loan portfolios. Noninterest income of \$42 million decreased \$5 million from the same period in the prior year, primarily due to a \$3 million first quarter 2008 gain on the sale of Visa shares. Noninterest expenses of \$119 million decreased \$2 million from the comparable period in the prior year, primarily due to a \$4 million decrease in incentive compensation and smaller decreases in several other expense categories, partially offset by a \$6 million increase in FDIC insurance expense.

The Florida market's net loss was \$14 million for the six months ended June 30, 2009, compared to a net loss of \$5 million for the six months ended June 30, 2008. Net interest income (FTE) of \$22 million decreased \$1 million from the comparable period in the prior year. The provision for loan losses increased \$16 million, to \$35 million for the six months ended June 30, 2009, when compared to the same period in the prior year, primarily due to an increase in reserves in the Commercial Real Estate loan portfolio, partially offset by a reduction in reserves for the Middle Market loan portfolio. Noninterest income of \$6 million decreased \$3 million from the same period in the prior year, primarily due to a decrease in customer derivative income. Noninterest expenses of \$18 million decreased \$3 million from the same period in the prior year, primarily due to a decline in the provision for credit losses on lending-related commitments.

The Other Markets' net income decreased \$14 million to \$27 million for the six months ended June 30, 2009, compared to the six months ended June 30, 2008. Net interest income (FTE) of \$79 million increased \$7 million from the comparable period in the prior

year, primarily due to an increase in loan spreads. The provision for loan losses increased \$38 million, primarily due to an increase in reserves for the Commercial Real Estate loan portfolio. Noninterest income of \$26 million decreased \$6 million from the comparable period in the prior year, primarily due to a \$7 million decrease in investment banking fees and smaller decreases in several other income categories, partially offset by gains of \$8 million on the redemption of auction-rate-securities and a gain of \$6 million on the second quarter 2009 sale of the Corporation's proprietary defined contribution plan recordkeeping

Table of Contents

business. Noninterest expenses of \$45 million decreased \$7 million from the comparable period in the prior year, primarily due to a decrease of \$15 million in incentive compensation, partially offset by smaller increases in several other expense categories.

The International market's net income decreased \$3 million to \$15 million for the six months ended June 30, 2009, compared to the six months ended June 30, 2008. Net interest income (FTE) of \$31 million increased \$1 million from the comparable period in the prior year. The provision for loan losses increased \$11 million. Noninterest income of \$16 million was unchanged from the comparable period in the prior year. Noninterest expenses of \$15 million decreased \$6 million from the comparable period in the prior year, primarily due to smaller changes in several expense categories.

The net loss for Finance & Other Businesses was \$37 million for the six months ended June 30, 2009, compared to a net loss of \$34 million for the six months ended June 30, 2008. The \$3 million increase in net loss was due to the same reasons noted in the Finance Division and Other category discussions under the Business Segments heading above.

The following table lists the number of the Corporation's banking centers by market segment at June 30:

	2009	2008
Midwest (Michigan)	232	233
Western:		
California	98	85
Arizona	13	9
Total Western	111	94
Texas	87	79
Florida	10	9
International	1	1
Total	441	416

Financial Condition

Total assets were \$63.6 billion at June 30, 2009, compared to \$67.5 billion at year-end 2008 and \$66.0 billion at June 30, 2008. Investment securities available-for-sale decreased \$1.4 billion, from \$9.2 billion at December 31, 2008, to \$7.8 billion at June 30, 2009, primarily due to sales of mortgage-backed government agency securities in the first six months of 2009. With interest rates at historically low levels, there was no longer a need to hold a large portfolio of fixed rate securities to mitigate the impact of potential future rate declines on net interest income. Prepayment activity was increasing on mortgage-backed government agency securities and market conditions were favorable for the sale of such securities. Total period-end loans decreased \$4.0 billion, or eight percent, to \$46.6 billion from December 31, 2008 to June 30, 2009. On an average basis, total loans decreased \$3.7 billion, or seven percent (\$3.6 billion, or seven percent, excluding Financial Services Division loans), to \$47.6 billion in the second quarter 2009, compared to the fourth quarter 2008. The declines reflected reduced demand in a contracting economic environment. Within average loans (excluding Financial Services Division), nearly all business lines showed declines, including National Dealer Services (20 percent), Commercial Real Estate (nine percent), Middle Market (eight percent), Global Corporate Banking (seven percent) and Small Business (five percent), from the fourth quarter 2008 to the second quarter 2009. Excluding Financial Services Division loans, average loans declined in all geographic markets from the fourth quarter 2008 to the second quarter 2009, including Western (eight percent), Midwest (eight percent), International (eight percent), Florida (six percent) and Texas (five percent).

Management continues to focus on developing new and expanding existing customer relationships. Management expects subdued loan demand in light of a domestic economy that is expected to continue contracting in the near term.

Table of Contents

Commercial real estate loans, consisting of real estate construction and commercial mortgage loans, totaled \$14.6 billion at June 30, 2009, of which \$5.2 billion, or 36 percent, were to borrowers in the Commercial Real Estate business line, which includes loans to residential real estate developers. The \$9.4 billion of commercial real estate loans in other business lines consist primarily of owner-occupied commercial mortgages. The following table reflects real estate construction and commercial mortgage loans to borrowers in the Commercial Real Estate business line by project type and location of property:

(dollar amounts in millions) June 30, 2009 Project Type:	Location of Property					Total	% of Total
	Western	Michigan	Texas	Florida	Other Markets		
<b>Real estate construction loans:</b>

Total liabilities decreased \$3.9 billion, or six percent, to \$56.5 billion at June 30, 2009, from \$60.4 billion at December 31, 2008. Total deposits decreased \$964 million, or two percent, to \$41.0 billion at June 30, 2009, from \$42.0 billion at December 31, 2008. Core deposits, which exclude other time deposits and foreign office time deposits, increased \$1.6 billion, or five percent, from December 31, 2008 to June 30, 2009. Other time deposits, which consist of brokered and institutional deposits, decreased \$2.7 billion from December 31, 2008 to June 30, 2009. Deposits in the Financial Services Division, which include title and escrow deposits and fluctuate with the level of home mortgage financing and refinancing activity, increased \$159 million, to \$2.2 billion at June 30, 2009, from December 31, 2008. Average Financial Services Division noninterest-bearing deposits increased \$93 million to \$1.4 billion in the second quarter 2009, from \$1.3 billion in the fourth quarter 2008. Average Financial Services Division interest-bearing deposits decreased \$381 million, to \$0.5 billion, during the same period. Medium- and long-term debt decreased \$1.5 billion to \$13.6 billion at June 30, 2009, from \$15.1 billion at December 31, 2008, as a result of the maturity of \$1.3 billion of medium-term notes in the six months ended June 30, 2009.

Table of Contents**Capital**

Total shareholders' equity was \$7.1 billion at June 30, 2009, compared to \$7.2 billion at December 31, 2008. The following table presents a summary of changes in total shareholders' equity in the six months ended June 30, 2009.

(in millions)

Balance at January 1, 2009		\$ 7,152
Retention of earnings (net income less cash dividends declared)		(45)
Change in accumulated other comprehensive income (loss):		
Investment securities available-for-sale	\$ (43)	
Cash flow hedges	(7)	
Defined benefit and other postretirement plans adjustment	17	
Total change in accumulated other comprehensive income (loss)		(33)
Repurchase of common stock under employee stock plans		(1)
Issuance of common stock under employee stock plans		(3)
Share-based compensation		18
Other		5
Balance at June 30, 2009		\$ 7,093

As shown in the table above, cash dividends declared exceeded net income for the first six months of 2009. Included in first six months of 2009 cash dividends declared was \$57 million declared on the preferred stock issued to the U.S. Treasury, covering the six-month period from November 14, 2008 through May 14, 2009.

In November 2007, the Board of Directors of the Corporation authorized the purchase up to 10 million shares of Comerica Incorporated outstanding common stock, in addition to the remaining unfilled portion of the November 2006 authorization. There is no expiration date for the Corporation's share repurchase program. No shares were purchased as part of the Corporation's publicly announced repurchase program in the first six months of 2009.

The following table summarizes the Corporation's share repurchase activity for the six months ended June 30, 2009.

(shares in thousands)	Total Number of Shares Purchased as Part of Publicly Announced Repurchase Plans or Programs	Remaining Share Repurchase Authorization (a)	Total Number of Shares Purchased (b)	Average Price Paid Per Share
	Total first quarter 2009		12,576	65
April 2009		12,576	32	20.55
May 2009		12,576		
June 2009		12,576		
Total second quarter 2009		12,576	32	20.56
Total year-to-date 2009		12,576	97	\$ 16.92

Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

- (a) Maximum number of shares that may yet be purchased under the publicly announced plans or programs.
- (b) Includes shares purchased as part of publicly announced repurchase plans or programs, shares purchased pursuant to deferred compensation plans and shares purchased from employees to pay for grant prices and/or taxes related to stock option exercises and restricted stock vesting under the terms of an employee share-based compensation plan.

Table of Contents

Risk-based regulatory capital standards are designed to make regulatory capital requirements more sensitive to differences in credit risk profiles among bank holding companies and to account for off-balance sheet exposure. Assets and off-balance sheet items are assigned to broad risk categories, each with specified risk-weighting factors. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items. The Corporation's capital ratios exceeded minimum regulatory requirements as follows:

<i>(dollar amounts in millions)</i>	June 30, 2009		December 31, 2008	
	Capital	Ratio	Capital	Ratio
Tier 1 common (a) (b)	\$ 5,139	7.65%	\$ 5,181	7.08%
Tier 1 risk-based (4.00% - minimum) (b)	7,774	11.57	7,805	10.66
Total risk-based (8.00% - minimum) (b)	10,723	15.96	10,774	14.72
Leverage (3.00% - minimum) (b)	7,774	12.12	7,805	11.77
Tangible common equity (a)	4,793	7.55	4,861	7.21

(a) See Supplemental Financial Data section for reconciliations of non-GAAP financial measures.

(b) June 30, 2009 capital and ratios are estimated.

At June 30, 2009, the Corporation and its U.S. banking subsidiaries exceeded the ratios required for an institution to be considered well capitalized (Tier 1 risk-based capital, total risk-based capital and leverage ratios greater than six percent, 10 percent and five percent, respectively).

**Risk Management**

The following updated information should be read in conjunction with the Risk Management section on pages 41-60 of the Corporation's 2008 Annual Report.

***Credit Risk*****Allowance for Credit Losses and Nonperforming Assets**

The allowance for credit losses includes both the allowance for loan losses and the allowance for credit losses on lending-related commitments. The allowance for loan losses represents management's assessment of probable losses inherent in the Corporation's loan portfolio. The allowance for loan losses provides for probable losses that have been identified with specific customer relationships and for probable losses believed to be inherent in the loan portfolio, but that have not been specifically identified. Internal risk ratings are assigned to each business loan at the time of approval and are subject to subsequent periodic reviews by the Corporation's senior management. The Corporation performs a detailed credit quality review quarterly on both large business and certain large consumer and residential mortgage loans that have deteriorated below certain levels of credit risk and may allocate a specific portion of the allowance to such loans based upon this review. The Corporation defines business loans as those belonging to the commercial, real estate construction, commercial mortgage, lease financing and international loan portfolios. A portion of the allowance is allocated to the remaining business loans by applying estimated loss ratios, based on numerous factors identified below, to the loans within each risk rating. In addition, a portion of the allowance is allocated to these remaining loans based on industry specific risks inherent in certain portfolios that have experienced above average losses, including portfolio exposures to Small Business loans,

high technology companies, the retail trade (gasoline delivery) industry and automotive parts and tooling supply companies. The portion of the allowance allocated to all other consumer and residential mortgage loans is determined by applying estimated loss ratios to various segments of the loan portfolio. Estimated loss ratios for all portfolios incorporate factors such as recent charge-off experience, current economic conditions and trends, and trends with respect to past due and nonaccrual amounts, and are supported by underlying analysis, including information on migration and loss given default studies from each of the three largest domestic geographic markets (Midwest, Western and Texas), as well as mapping to bond tables. The allowance for credit losses on lending-related commitments, included in accrued expenses and other liabilities on the consolidated balance sheets, provides for probable credit losses inherent in lending-related commitments, including unused commitments to extend credit, letters of credit and financial guarantees. Lending-related commitments for which it is probable that the commitment will be drawn (or sold) are reserved with the same estimated loss rates as loans, or with specific reserves. In general, the probability of draw for letters of credit is considered certain once the credit is assigned a risk rating that is generally consistent with regulatory defined substandard or doubtful. Other letters of credit and all unfunded commitments have a lower probability of draw, to which standard loan loss rates are applied.

Table of Contents

Actual loss ratios experienced in the future may vary from those estimated. The uncertainty occurs because factors may exist which affect the determination of probable losses inherent in the loan portfolio and are not necessarily captured by the application of estimated loss ratios or identified industry specific risks. A portion of the allowance is maintained to capture these probable losses and reflects management's view that the allowance should recognize the margin for error inherent in the process of estimating expected loan losses. Factors that were considered in the evaluation of the adequacy of the Corporation's allowance include the inherent imprecision in the risk rating system which covers probable loan losses as a result of an inaccuracy in assigning risk ratings or stale ratings which may not have been updated for recent negative trends in particular credits.

The total allowance for loan losses is available to absorb losses from any segment within the portfolio. Unanticipated economic events, including political, economic and regulatory instability in countries where the Corporation has loans, could cause changes in the credit characteristics of the portfolio and result in an unanticipated increase in the allowance. Inclusion of other industry specific portfolio exposures in the allowance, as well as significant increases in the current portfolio exposures, could also increase the amount of the allowance. Any of these events, or some combination thereof, may result in the need for additional provision for loan losses in order to maintain an allowance that complies with credit risk and accounting policies. At June 30, 2009, the total allowance for loan losses was \$880 million, an increase of \$110 million from \$770 million at December 31, 2008. The increase resulted primarily from increases in individual and industry reserves for loan portfolios in Middle Market (primarily in the Midwest and Western markets) and Global Corporate Banking (primarily in the Midwest and Western markets). The \$110 million increase in the allowance for loan losses in the first six months of 2009 was directionally consistent with the \$213 million increase in nonperforming loans from December 31, 2008 to June 30, 2009. As noted above, all large nonperforming loans are individually reviewed each quarter for potential charge-offs and reserves. Charge-offs are taken as amounts are determined to be uncollectible. A measure of the level of charge-offs already taken on nonperforming loans is the current book balance as a percentage of the contractual amount owed. At June 30, 2009, nonperforming loans were written down to 61 percent of the contractual amount, compared to 66 percent at December 31, 2008. This level of write-down was consistent with losses incurred on loans in recent years. The allowance as a percentage of total nonperforming loans, a ratio which results from the actions noted above, was 78 percent at June 30, 2009, compared to 84 percent at December 31, 2008. The allowance for loan losses as a percentage of total period-end loans was 1.89 percent at June 30, 2009, compared to 1.52 percent at December 31, 2008.

The allowance for credit losses on lending-related commitments was \$33 million at June 30, 2009, a decrease of \$5 million from \$38 million at December 31, 2008. The decrease resulted primarily from the cancellation and drawdown of letters of credit in the Midwest market.

Table of Contents

Nonperforming assets at June 30, 2009 were \$1.2 billion, compared to \$983 million at December 31, 2008, an increase of \$247 million, or 25 percent, and are summarized in the following table.

<i>(in millions)</i>	June 30, 2009	December 31, 2008
Nonaccrual loans:		
Commercial	\$ 327	\$ 205
Real estate construction:		
Commercial Real Estate business line	472	429
Other business lines	4	5
Total real estate construction	476	434
Commercial mortgage:		
Commercial Real Estate business line	134	132
Other business lines	175	130
Total commercial mortgage	309	262
Residential mortgage	7	7
Consumer	7	6
Lease financing		1
International	4	2
Total nonaccrual loans	1,130	917
Reduced-rate loans		
Total nonperforming loans	1,130	917
Foreclosed property	100	66
Total nonperforming assets	\$ 1,230	\$ 983
Loans past due 90 days or more and still accruing	\$ 210	\$ 125

Loans past due 90 days or more and still accruing interest generally represent loans that are well collateralized and in a continuing process that is expected to result in repayment or restoration to current status. At June 30, 2009, a significant majority of the \$210 million loans past due 90 days or more and still accruing were secured by real estate. Loans past due 30-89 days decreased \$41 million to \$371 million at June 30, 2009, compared to \$412 million at December 31, 2008.

Table of Contents

The following table presents a summary of changes in nonaccrual loans.

<i>(in millions)</i>	June 30, 2009	Three Months Ended March 31, 2009	December 31, 2008
Nonaccrual loans at beginning of period	\$ 982	\$ 917	\$ 863
Loans transferred to nonaccrual (a)	419	241	258
Nonaccrual business loan gross charge-offs (b)	(242)	(153)	(132)
Loans transferred to accrual status (a)	(4)	(4)	(11)
Nonaccrual business loans sold (c)	(10)	(3)	(14)
Payments/Other (d)	(19)	(16)	(47)
Nonaccrual loans at end of period	\$ 1,130	\$ 982	\$ 917

(a) Based on an analysis of nonaccrual loans with book balances greater than \$2 million.

(b) Analysis of gross loan charge-offs:

Nonaccrual business loans	\$ 242	\$ 153	\$ 132
Performing watch list loans (as defined below)	1		
Consumer and residential mortgage loans	14	8	12
Total gross loan charge-offs	\$ 257	\$ 161	\$ 144

(c) Analysis of loans sold:

Nonaccrual business loans	\$ 10	\$ 3	\$ 14
Performing watch list loans (as defined below)	6		
Total loans sold	\$ 16	\$ 3	\$ 14

(d) Includes net changes related to nonaccrual loans with balances less than \$2 million, payments on non-accrual loans with book balances greater than \$2 million and transfers of nonaccrual loans to foreclosed property. Excludes business loan gross charge-offs and business nonaccrual loans sold.

The following table presents the number of nonaccrual loan relationships with book balances greater than \$2 million and balance by size of relationship at June 30, 2009.

<i>(dollar amounts in millions)</i>	Number of Relationships	Balance
Nonaccrual Relationship Size		
\$2 million - \$5 million	63	\$ 209
\$5 million - \$10 million	43	296
\$10 million - \$25 million	24	336
Greater than \$25 million	3	101
Total loan relationships greater than \$2 million at June 30, 2009	133	\$ 941

Loan relationships with balances greater than \$2 million transferred to nonaccrual status totaled \$419 million in the second quarter 2009, an increase of \$178 million from \$241 million in the first quarter 2009. Of the transfers to nonaccrual in the second quarter 2009, \$204 million were from the Commercial Real Estate business line (including \$72 million, \$56 million and \$42 million from the Western, Other and Midwest markets, respectively), \$79 million were from the Middle Market business line (including \$46 million and \$19 million from the Midwest and Western markets, respectively) and \$78 million were from the Global Corporate Banking business line. There were 15 loan relationships greater than \$10 million transferred to nonaccrual in the second quarter 2009, totaling \$257 million, of which \$137 million and \$60 million were to companies in the Commercial Real Estate and Global Corporate Banking business lines, respectively.

Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

The following table presents a summary of total internally classified watch list loans (generally consistent with regulatory defined special mention, substandard and doubtful loans). Total watch list loans increased both in dollars and as a percentage of the total loan portfolio from December 31, 2008 to June 30, 2009.

<i>(dollar amounts in millions)</i>	June 30, 2009	March 31, 2009	December 31, 2008
Total watch list loans	\$ 7,386	\$ 6,676	\$ 5,732
As a percentage of total loans	15.9%	13.7%	11.3%

Table of Contents

The following table presents a summary of nonaccrual loans at June 30, 2009 and loan relationships transferred to nonaccrual and net loan charge-offs during the three months ended June 30, 2009, based primarily on the Standard Industrial Classification (SIC) industry categories.

(dollar amounts in millions)	June 30, 2009		Three Months Ended June 30, 2009			
	Nonaccrual Loans		Loans Transferred to Nonaccrual (a)		Net Loan Charge-Offs	
Real Estate	\$ 601	53%	\$ 189	45%	\$ 104	42%
Manufacturing	130	12	52	12	26	10
Services	127	11	48	12	17	7

Hotels	11	1	5	1	2	1
Churches	5					
Other (b)	13	1			8	3
Total	\$ 1,130	100%	\$ 419	100%	\$ 248	100%

(a) Based on an analysis of nonaccrual loan relationships with book balances greater than \$2 million.

(b) Consumer, excluding certain personal purpose, nonaccrual loans and net charge-offs are included in the "Other" category.

Net credit-related charge-offs for the second quarter 2009 were \$248 million, or 2.08 percent of average total loans, compared to \$157 million, or 1.26 percent of average total loans for the first quarter 2009 and \$133 million, or 1.04 percent, for the fourth quarter 2008.

For further discussion of credit risk, see pages 41-51 in the Corporation's 2008 Annual Report.

Table of Contents**ITEM 3. Quantitative and Qualitative Disclosures about Market Risk**Interest Rate Risk

Net interest income is the predominant source of revenue for the Corporation. Interest rate risk arises primarily through the Corporation's core business activities of extending loans and accepting deposits. The Corporation's balance sheet is predominantly characterized by floating rate commercial loans funded by a combination of core deposits and wholesale borrowings. This creates a natural imbalance between the floating rate loan portfolio and the more slowly repricing deposit products. The result is that growth in our core businesses will lead to a greater sensitivity to interest rate movements, without mitigating actions. Examples of such actions are purchasing investment securities, primarily fixed rate, which provide liquidity to the balance sheet and act to mitigate the inherent interest sensitivity, and hedging the sensitivity with interest rate swaps. The Corporation actively manages its exposure to interest rate risk, with the principal objective of optimizing net interest income and economic value of equity while operating within acceptable limits established for interest rate risk and maintaining adequate levels of funding and liquidity.

The Corporation frequently evaluates net interest income under various balance sheet and interest rate scenarios, using simulation modeling analysis as its principal risk management evaluation technique. The results of these analyses provide the information needed to assess the balance sheet structure. Changes in economic activity, different from those management included in its simulation analyses, whether domestically or internationally, could translate into a materially different interest rate environment than currently expected. Management evaluates a base case net interest income under an unchanged interest rate environment and what is believed to be the most likely balance sheet structure. This base case net interest income is then evaluated against non-parallel interest rate scenarios that gradually increase and decrease rates approximately 200 basis points in a linear fashion from the base case over twelve months (but no lower than zero percent). Due to the current low level of interest rates, the analysis reflects a declining interest rate scenario of a 25 basis point drop, while the rising interest rate scenario reflects a gradual 200 basis point rise. In addition, adjustments to asset prepayment levels, yield curves, and overall balance sheet mix and growth assumptions are made to be consistent with each interest rate scenario. These assumptions are inherently uncertain and, as a result, the model may not precisely predict the impact of higher or lower interest rates on net interest income. Actual results may differ from simulated results due to timing, magnitude and frequency of interest rate changes and changes in market conditions and management strategies, among other factors. However, the model can indicate the likely direction of change. Derivative instruments entered into for risk management purposes are included in these analyses.

The table below as of June 30, 2009 and December 31, 2008 displays the estimated impact on net interest income during the next 12 months by relating the base case scenario results to those from the rising and declining rate scenarios described above.

<i>(in millions)</i>	June 30, 2009		December 31, 2008	
	Amount	%	Amount	%
<b>Change in Interest Rates:</b>				
+200 basis points	\$ 85	6%	\$ 85	5%
-25 basis points (to zero percent)	(12)	(1)	(19)	(1)

In addition to the simulation analysis, an economic value of equity analysis is performed for a longer term view of the interest rate risk position. The economic value of equity analysis begins with an estimate of the mark-to-market valuation of the Corporation's balance sheet and then applies the estimated impact of rate movements upon the market value of assets, liabilities and off-balance sheet instruments. The economic value of equity is then calculated as the difference between the market value of assets and liabilities net of the impact of off-balance sheet

instruments. As with net interest income shocks, a variety of alternative scenarios are performed to measure the impact on economic value of equity, including changes in the level, slope and shape of the yield curve.

Table of Contents

The table below as of June 30, 2009 and December 31, 2008 displays the estimated impact on the economic value of equity from the 200 basis point immediate parallel increase or decrease in interest rates (but no lower than zero percent). Similar to the simulation analysis above, due to the current low level of interest rates, the economic value of equity analysis below reflects an interest rate scenario of an immediate 25 basis point drop, while the rising interest rate scenario reflects an immediate 200 basis point rise.

<i>(in millions)</i>	June 30, 2009		December 31, 2008	
	Amount	%	Amount	%
<b>Change in Interest Rates:</b>				
+200 basis points	\$ 481	4%	\$ 585	5%

Wholesale Funding

The Corporation satisfies liquidity requirements with either liquid assets or various funding sources. At June 30, 2009, the Corporation held excess liquidity, represented by \$3.5 billion deposited with the Federal Reserve Bank. The Corporation may access the purchased funds market when necessary, which includes certificates of deposit issued to institutional investors in denominations in excess of \$100,000 and to retail customers in denominations of less than \$100,000 through brokers (other time deposits on the consolidated balance sheets), foreign office time deposits and short-term borrowings. Purchased funds totaled \$5.7 billion at June 30, 2009, compared to \$9.5 billion at December 31, 2008. Capacity for incremental purchased funds at June 30, 2009, consisted mostly of federal funds purchased, brokered certificates of deposits, securities sold under agreements to repurchase and borrowings under the Federal Reserve Term Auction Facility. In addition, the Corporation is a member of the Federal Home Loan Bank of Dallas, Texas (FHLB), which provides short- and long-term funding to its members through advances collateralized by real estate-related assets. The actual borrowing capacity is contingent on the amount of collateral available to be pledged to the FHLB. As of June 30, 2009, the Corporation had \$8.0 billion of outstanding borrowings from the FHLB with remaining maturities ranging from less than 3 months to 5 years, and substantial collateral to support additional borrowings. Liquid assets consist of cash and due from banks, federal funds sold and securities purchased under agreements to resell, interest-bearing deposits with banks, other short-term investments and investment securities available-for-sale, which totaled \$13.0 billion at June 30, 2009, compared to \$12.8 billion at December 31, 2008. Additionally, if market conditions were to permit, the Corporation could issue up to \$12.3 billion of debt at June 30, 2009 under an existing \$15 billion medium-term senior note program which allows the Corporation or the principal banking subsidiary to issue debt with maturities between one and 30 years.

The Corporation participates in the voluntary Temporary Liquidity Guarantee Program (the TLG Program) announced by the Federal Deposit Insurance Corporation (FDIC) in October 2008 and amended in March 2009. Under the TLG Program, all senior unsecured debt issued between October 14, 2008 and October 31, 2009 with a maturity of more than 30 days is guaranteed by the FDIC. Debt guaranteed by the FDIC is backed by the full faith and credit of the United States. The FDIC guarantee expires on the earlier of the maturity date of the debt or December 31, 2012 (June 30, 2012 for debt issued prior to April 1, 2009). At June 30, 2009, there was approximately \$7 million of senior unsecured debt outstanding in the form of bank-to-bank deposits issued under the TLG Program; however, neither the Corporation nor any of its subsidiaries participating in the TLG Program had issued any FDIC-guaranteed debt pursuant to a FDIC-guaranteed debt offering. At June 30, 2009, there was approximately \$5.2 billion available to be issued under the TLG Program.

Other Market Risks

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

At June 30, 2009, the Corporation had a \$60 million portfolio of investments in private equity and venture capital investments, with commitments of \$31 million to fund additional investments in future periods. The value of these investments is at risk to changes in equity markets, general economic conditions and a variety of other factors. The majority of these investments are not readily marketable, and are reported in other assets. The investments are individually reviewed for impairment on a quarterly basis, by comparing the carrying value to the estimated fair value. Approximately \$14 million of the underlying equity and debt (primarily equity) in these funds are to companies in the automotive industry. The automotive-related positions do not represent a majority of any one fund's investments; therefore, the exposure related to these positions is mitigated by the performance of other investment interests within the fund's portfolio of companies.

The Corporation holds a portfolio of approximately 760 warrants for generally non-marketable equity securities. These warrants are primarily from high technology, non-public companies obtained as part of the loan

Table of Contents

origination process. As discussed in Note 1 to the consolidated financial statements in the Corporation's 2008 Annual Report, warrants that have a net exercise provision or non-contingent put right embedded in the warrant agreement are classified as derivatives which must be recorded at fair value (approximately 350 warrants at June 30, 2009). The value of all warrants that are carried at fair value (\$8 million at June 30, 2009) is at risk to changes in equity markets, general economic conditions and other factors. The majority of new warrants obtained as part of the loan origination process no longer contain an embedded net exercise provision.

Certain components of the Corporation's noninterest income, primarily fiduciary income, are at risk to fluctuations in the market values of underlying assets, particularly equity securities. Other components of noninterest income, primarily brokerage fees, are at risk to changes in the level of market activity.

For further discussion of market risk, see Note 10 to these consolidated financial statements and pages 52-59 in the Corporation's 2008 Annual Report.

Critical Accounting Policies

The Corporation's consolidated financial statements are prepared based on the application of accounting policies, the most significant of which are described in Note 1 to the consolidated financial statements included in the Corporation's 2008 Annual Report, as updated in Note 1 to the unaudited consolidated financial statements in this report. These policies require numerous estimates and strategic or economic assumptions, which may prove inaccurate or subject to variations. Changes in underlying factors, assumptions or estimates could have a material impact on the Corporation's future financial condition and results of operations. The most critical of these significant accounting policies are the policies for allowance for credit losses, valuation methodologies, pension plan accounting and income taxes. These policies are reviewed with the Audit Committee of the Corporation's Board of Directors and are discussed more fully on pages 61-67 of the Corporation's 2008 Annual Report. As of the date of this report, there have been no significant changes to the Corporation's critical accounting policies, except as discussed below.

Current accounting standards, specifically Accounting Practice Bulletin 28, Interim Financial Reporting (APB 28) require entities to provide for income taxes each quarter based on an estimate of the effective tax rate for the full year. In 2008 and the first quarter of 2009, the Corporation applied an estimated annual effective tax rate to the interim period pre-tax income to derive the income tax provision or benefit for each quarter. FASB Interpretation No. 18, Accounting for Income Taxes in Interim Periods an Interpretation on APB 28 (FIN 18), allows an alternative method to calculate the effective tax rate when an entity is unable to make a reliable estimate of pre-tax income for the fiscal year. Under the alternative method, interim period federal income taxes are based on each discrete quarter's pre-tax income. In light of the recent volatility and uncertainty in the current economic market, the Corporation applied the alternative method allowed by FIN 18 to compute the income tax benefit beginning in the second quarter of 2009.

Certain refinements to estimates and assumptions related to the fair value of auction-rate securities were made as a result of the Corporation's first quarter 2009 adoption of FASB Staff Position No. FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly, as discussed in Notes 1 and 13 to the consolidated financial statements.

Table of ContentsSupplemental Financial Data

The following table provides a reconciliation of non-GAAP financial measures with financial measures defined by GAAP.

<i>(dollar amounts in millions)</i>	June 30, 2009	December 31, 2008
Tier 1 capital (a) (b)	\$ 7,774	\$ 7,805
Less:		
Fixed rate cumulative perpetual preferred stock	2,140	2,129
Trust preferred securities	495	495
Tier 1 common capital (b)	5,139	5,181
Risk-weighted assets (a) (b)	67,202	73,207
Tier 1 common capital ratio (b)	7.65%	7.08%
Total shareholders' equity	\$ 7,093	\$ 7,152
Less:		
Fixed rate cumulative perpetual preferred stock	2,140	2,129
Goodwill	150	150
Other intangible assets	10	12
Tangible common equity	\$ 4,793	\$ 4,861
Total assets	\$ 63,630	\$ 67,548
Less:		
Goodwill	150	150
Other intangible assets	10	12
Tangible assets	\$ 63,470	\$ 67,386
Tangible common equity ratio	7.55%	7.21%

(a) Tier 1 capital and risk-weighted assets as defined by regulation.

(b) June 30, 2009 Tier 1 capital and risk-weighted assets are estimated.

The Tier 1 common capital ratio removes preferred stock and qualifying trust preferred securities from Tier 1 capital as defined by and calculated in conformity with bank regulations. The tangible common equity ratio removes preferred stock and the effect of intangible assets from capital and the effect of intangible assets from total assets. The Corporation believes these measurements are meaningful measures of capital adequacy used by investors, regulators, management and others to evaluate the adequacy of common equity and to compare against other companies in the industry.

**ITEM 4. Controls and Procedures**

(a) Evaluation of Disclosure Controls and Procedures. The Corporation maintains a set of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act )) that are designed to ensure that information required to be disclosed by the Corporation in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, to evaluate the effectiveness of the Corporation's disclosure controls and procedures as of the end of the period covered by this quarterly report (the Evaluation Date ). Based on the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, the Corporation's disclosure controls and procedures are effective.

(b) Changes in Internal Control Over Financial Reporting. During the period to which this report relates, there have not been any changes in the Corporation's internal controls over financial reporting procedures (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that have materially affected, or that are reasonably likely to materially affect, such controls.

**PART II. OTHER INFORMATION**

**ITEM 1. Legal Proceedings**

For information regarding the Corporation's legal proceedings, see Part I, Item 1, Note 12 Contingent Liabilities, which is incorporated herein by reference.

**ITEM 1A. Risk Factors**

There has been no material change in the Corporation's risk factors as previously disclosed in our Form 10-K for the fiscal year ended December 31, 2008 in response to Part I, Item 1A, of such Form 10-K. Such risk factors are incorporated herein by reference.

**ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds**

For information regarding the Corporation's share repurchase activity, see Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations - Capital, which is incorporated herein by reference.

**ITEM 4. Submission of Matters to a Vote of Security Holders**

The Corporation's Annual Meeting of Shareholders was held on May 19, 2009. At the meeting, shareholders of the Corporation voted to:

1. Elect four Class I Directors for three-year terms expiring in 2012 or upon the election and qualification of their successors;
2. Ratify the appointment of Ernst & Young LLP as independent auditors for the fiscal year ending December 31, 2009;
3. Approve a non-binding, advisory proposal approving executive compensation; and
4. Approve a shareholder proposal requesting that the board of directors take steps to eliminate classification with respect to director elections.

## Edgar Filing: COMERICA INC /NEW/ - Form 10-Q

1. The nominees for election as Class I Directors of the Corporation and the results were as follows:

	For	Against/Withheld	Abstained	Broker Non-Votes
Lillian Bauder	126,210,331	4,592,797	451,825	
Richard G. Lindner	122,991,211	7,812,991	450,751	
Robert S. Taubman	73,541,871	57,160,320	552,762	
Reginald M. Turner, Jr.	125,591,686	5,172,397	490,870	

The names of other Directors of the Corporation whose terms of office continued after the Annual Meeting of Shareholders were as follows:

Incumbent Class II Directors	Incumbent Class III Directors
Ralph W. Babb, Jr.	Kenneth L. Way
James F. Cordes	Joseph J. Buttigieg, III
Jacqueline P. Kane	Roger A. Cregg
	T. Kevin DeNicola
	Alfred A. Piergallini
	Nina G. Vaca

2. Ratification of the appointment of the independent auditors for the fiscal year ending December 31, 2009. The results were as follows:

	For	Against/Withheld	Abstained	Broker Non-Votes
Ernst & Young LLP	129,121,512	1,815,892	317,549	

Table of Contents

3. The results of the approval of the non-binding, advisory proposal approving executive compensation were as follows:

	For	Against/Withheld	Abstained	Broker Non-Votes
Non-binding, Advisory Proposal	90,011,944	40,076,188	1,166,821	

4. The results of the shareholder proposal requesting that the board of directors take steps to eliminate classification with respect to director elections were as follows:

	For	Against/Withheld	Abstained	Broker Non-Votes
Shareholder Proposal	82,695,420	24,126,893	2,013,722	22,418,918
